
HOUSE CONCURRENT RESOLUTION

REQUESTING THE AUDITOR TO ASSESS THE CHALLENGES TO THE TIMELY DELIVERY OF HEALTH CARE SERVICES IN THE STATE DUE TO PRIOR AUTHORIZATION REQUIREMENTS AND INCLUDE AN ANALYSIS OF PRIOR AUTHORIZATION REFORM, WITH INPUT OF DATA AND FEEDBACK FROM ALL STAKEHOLDERS, INCLUDING PATIENT ADVOCATES, PROVIDERS, FACILITIES, AND PAYERS.

1 WHEREAS, patients face continued challenges in accessing
2 health care due to the burdens of prior authorization
3 requirements, which serves as an upfront bottleneck to the
4 delivery of many commonly indicated diagnostic tests and medical
5 treatments; and

6
7 WHEREAS, prior authorization further compounds the
8 increased costs and administrative demands on providers and
9 staff, which are made worse by the health care workforce
10 shortages in the State; and

11
12 WHEREAS, recent changes to the Centers for Medicare and
13 Medicaid Services (CMS) rules on prior authorization are a step
14 in the right direction, but it is necessary to address the prior
15 authorization inconsistencies and concerns for all payers so
16 that Hawaii residents can receive the timely medical care that
17 they need; and

18
19 WHEREAS, time-consuming prior authorization processes
20 encumber family physicians, divert valuable resources from
21 direct patient care, and delay the start or continuation of
22 necessary treatment, leading to lower rates of patient adherence
23 to treatment and negative clinical outcomes; and

24
25 WHEREAS, administrative complexity in the United States
26 health care system has been identified as a source of enormous

1 spending and should be further examined for cost-saving
2 opportunities; and

3
4 WHEREAS, although payers use prior authorization and claims
5 processes to reduce medical costs and design custom benefit
6 designs to achieve a specific premium price, the misapplication
7 of prior authorization often leads to inappropriate and
8 dangerous delays in diagnosis and treatment and may result in
9 abandoned care; and

10
11 WHEREAS, the misapplication of prior authorization
12 increases the already substantial barriers to health care for
13 patients in rural and underserved areas; and

14
15 WHEREAS, recent CMS rules have mandated changes to reform
16 prior authorization that, taken together, will reduce overall
17 payer and provider burden and improve patient access in federal
18 programs; however, these changes do not apply to private
19 insurers; and

20
21 WHEREAS, Hawaii health care private payers still require
22 prior authorization for common inpatient, residential treatment
23 center, and partial hospitalization admissions that are not
24 directly from an emergency department, as well as for commonly
25 indicated diagnostic testing and treatment of urgent cases for
26 mental health, surgery, gynecology, and oncology; and

27
28 WHEREAS, the timeline is substantially variable and
29 inconsistent for private payers in terms of prior authorization
30 turnaround, and this complexity leads to confusion, additional
31 paperwork, cost for staff, and contributes to significant
32 provider team burnout; and

33
34 WHEREAS, an analysis by the Auditor is necessary to
35 facilitate collaboration on prior authorization reform, with
36 input of data and feedback from all stakeholders including
37 patient advocates, providers, facilities, and payers; now,
38 therefore,

39
40 BE IT RESOLVED by the House of Representatives of the
41 Thirty-second Legislature of the State of Hawaii, Regular
42 Session of 2024, the Senate concurring, that the Auditor is

1 requested to assess the challenges to the timely delivery of
2 health care services in the State due to prior authorization
3 requirements and include an analysis of prior authorization
4 reform, with input of data and feedback from all stakeholders,
5 including patient advocates, providers, facilities, and payers;
6 and

7
8 BE IT FURTHER RESOLVED that the assessment and analysis is
9 requested to evaluate the following:

- 10
11 (1) A determination of a reasonable and appropriate prior
12 authorization response time, including whether a
13 response time of twenty-four hours for urgent care and
14 forty-eight hours for non-urgent care is feasible;
15
16 (2) Whether adverse determinations should only be
17 conducted by a physician licensed in the State and of
18 the same specialty that typically manages the
19 patient's condition;
20
21 (3) The manner in which retroactive denials may be avoided
22 if care is preauthorized;
23
24 (4) Whether it is feasible for a prior authorization to be
25 valid for at least one year, regardless of dosage
26 changes;
27
28 (5) For patients with chronic conditions, whether the
29 prior authorization may be valid for the length of the
30 treatment;
31
32 (6) Whether private insurers may publicly release prior
33 authorization data by drug and service as it relates
34 to approvals, denials, appeals, wait times, and other
35 categories;
36
37 (7) Whether it is reasonable and appropriate for a new
38 health plan to honor the patient's prior authorization
39 for a transition prior of time; i.e., at least ninety
40 days;
41

H.C.R. NO. 182

1 (8) The factors that would allow for the reduction of
2 total volume of prior authorization requests, such as
3 exemptions or gold-carding programs; and
4

5 (9) A comparison of the State's prior authorization
6 policies with other states' prior authorization
7 policies; and
8

9 BE IT FURTHER RESOLVED that the Auditor is requested to
10 submit a report of its findings and recommendations, including
11 any proposed legislation, to the Legislature no later than
12 twenty days prior to the convening of the Regular Session of
13 2025; and
14

15 BE IT FURTHER RESOLVED that a certified copy of this
16 Concurrent Resolution be transmitted to the Auditor.
