In consideration of  
HOUSE BILL 306, HOUSE DRAFT 1  
RELATING TO STATE WATER CODE PENALTIES

House Bill 306, House Draft 1 proposes to: add a minimum penalty and a maximum penalty per violation of the State Water Code; expand the types of potential violations of the State Water Code; and make each day that a violation exists or continues to exist a separate offense. This bill also requires the Commission on Water Resource Management (Commission) to consider certain factors when imposing penalties and makes the setting, charging, and collecting of administrative fines by the Commission mandatory, rather than discretionary. **The Department of Land and Natural Resources (Department) supports this measure with comments.**

This bill will support the Commission in its affirmative duty “to protect, control and regulate the use of Hawaii’s water resources” as articulated in Article XI Section 7 of the Constitution of the State of Hawai‘i. As the “primary guardian” of the critical public trust resource, fresh water,<sup>1</sup> the Commission places great importance on deterring violations of the State Water Code. The Department found that the current maximum penalty of \$5,000 per violation in Hawai‘i Revised Statutes (HRS) Section 174C-15 does not have a sufficient deterrent effect.

In its 1994 Report to the State Legislature, the Review Commission on the State Water Code, pursuant to Section 5 of Act 45, proposed a maximum fine of \$25,000 for reckless, knowing, or intentional violations of the State Water Code. The Department recommends a maximum fine of at least **\$25,000** to match the recommendations of the Review Commission, and refers to the language provided in House Bill 1142, which would provide for continued increases to penalties over time. The Department believes

<sup>1</sup> In re Water Use Permit Applications, 94 Hawai‘i, 97, 141, 9 Pd.3, 409, 453 (2000). (Waiāhole I)

that these amendments will ensure that penalties remain an effective deterrent and provide ample advance notice to those who may be affected by the increased penalties.

The Department appreciates the amendments made to this measure, including the types of violations that constitute a penalty and the list of factors that must be considered by the Commission when imposing a penalty. These amendments align with House Bill 1142, which was introduced as part of the Governor's Legislative Package.

Thank you for the opportunity to testify in support of this measure.

**House Committee on Judiciary & Hawaiian Affairs**

**Hawai'i Alliance for Progressive Action (HAPA) Supports: HB306 HD1**

February 5th, 2025 at 2:00pm; Conference Room 411

Aloha Chair Tarnas , Vice Chair Poepoe and members of the committee,

HAPA is testifying in support of HB306 HD1 which adds a minimum penalty of \$50 and a maximum penalty of \$60,000 per violation of the State Water Code and makes each day that a violation exists or continues to exist a separate offense. This bill appropriately requires the Commission on Water Resource Management to determine the amount of the penalty based on the circumstances of the violation.

Enforcement of the Hawai'i's Water Code is essential to the health of traditional and customary practices by ensuring streamflows are sufficient for kalo cultivation, health of riparian species, and for overall conservation efforts to ensure abundant clean water resources for future generations.

The increased fine limit provides the necessary power to dissuade private interests from repeatedly taking more water than allowed and overstressing aquifers. This is particularly critical in communities such as west Maui where water resources are already severely constrained.

HAPA supports the recent amendments in the HD1 that direct the Water Commission to consider the nature, circumstances, extent, gravity, and history of the violation and of any prior violations; the economic benefit to the violator, or anticipated by the violator, resulting from the violation; the opportunity, difficulty, and history of corrective action; good faith efforts to comply; the degree of culpability; and such other matters as justice may require. Given the extensive history of water code violations in Hawaii that have enriched large scale corporate diverters at the expense of small scale subsistence practices, it is vital that increased penalties are appropriately targeted to address and dissuade the truly egregious violations.

Please support HB 306 HD1. Mahalo for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Anne Frederick', is written over a light blue horizontal line.

Anne Frederick,  
Executive Director

HOUSE COMMITTEE ON JUDICIARY AND HAWAIIAN AFFAIRS  
Wednesday, February 5, 2025 — 2:00 p.m.

**UluPono Initiative supports HB 306 HD 1, Relating to State Water Code Penalties.**

Dear Chair Tarnas and Members of the Committee:

My name is Mariah Yoshizu, and I am the Government Affairs Associate at UluPono Initiative. We are a Hawai'i-focused impact investment firm that strives to improve the quality of life throughout the islands by helping our communities become more resilient and self-sufficient through locally produced food, renewable energy, clean transportation choices, and better management of freshwater resources.

**UluPono supports HB 306 HD 1**, which adds a minimum penalty and amends the maximum penalty per violation of the State Water Code, expands the types of potential violations of the State Water Code, and makes each day that a violation exists or continues to exist a separate offense. This bill also establishes factors the Commission on Water Resource Management (CWRM) must consider when determining the amount of the penalty and increase maximum fines in five-year increments from 2030 to 2045.

What value do we place on an irreplaceable resource? Currently, CWRM can only impose a maximum fine of \$5,000 per violation of the State Water Code. This stands in stark contrast to other jurisdictions like Arizona, California, and Texas that have the authority to issue fines of \$10,000 per day to water users who exceed their permitted allocations. Even within our own state, the Hawai'i Department of Health (DOH) can charge a maximum penalty of \$60,000 per water pollution violation.

We cannot issue a water pollution fine if there is no water left to pollute. The State Water Code was established to protect Hawai'i's water resources, but its effectiveness depends on compliance and meaningful enforcement. This bill sends a message that we value the health and wellbeing of water, and mistreatment of such a vital resource can have serious financial consequences.

We applaud the Legislature for underscoring the immeasurable value of *wai* by considering this measure for passage.

Thank you for the opportunity to testify.

Respectfully,

Mariah Yoshizu  
Government Affairs Associate

*Investing in a Sustainable Hawai'i*

Testimony for JHA on 2/5/2025 2:00:00 PM

Submitted By	Organization	Testifier Position	Testify
David Z. Arakawa	Land Use Research Foundation of Hawaii	Comments	Written Testimony Only

Comments:

The Land Use Research Foundation of Hawaii (LURF) is a private, non-profit research and trade association whose members include major Hawaii landowners, developers, and utility companies. LURF's mission is to advocate for reasonable, rational, and equitable land use planning, legislation and regulations that encourage well-planned economic growth, housing, and renewable energy, while safeguarding Hawaii's significant natural, cultural, and agricultural resources, and public health and safety.

For over one hundred years, LURF members have led the state in private water research, development, installation, generation, transmission, and delivery.

LURF appreciates the opportunity to provide its **comments and concerns regarding HB 306, HD1.**

LURF Position: We appreciate that this bill is well-intended, however, in 2023, Governor Green vetoed a bill with the same intent, and several of the same veto issues remain unresolved in this measure and there also other important issues that should be addressed.

LURF's comments and concerns relating to this measure include among other things:

**1. The original \$60,000 a-day fines are excessive and inconsistent with fines proposed in HB 1142 (\$25,000 a-day, Governor's Bill package).** As this bill moves forward, the amount of fines inserted should be based on facts and justification.

**2. Insufficient Justification.** This was raised in Governor Green's 2023 veto of HB 153. Evidence and statistics of violations and fines should be presented to determine whether the current fines and system is working.

**3. Possible negative consequences and impacts on county Water Supply Departments, Agriculture and Housing.**

**4. Lack of due process protections.** In the past, the county water supply departments have highlighted the following:

- lack of clarity regarding violations and fines criteria, guidelines, exceptions; e

- lack of explanation of CWRM's practice and procedure relating to the administrative proceedings of civil resource violations of state law;
- lack of specificity regarding the assessment of administrative sanctions for such violations; and
- a graduated fines schedule.

**5. New environmental and social issues should be considered:** Including chemical and other contamination, wildfires, emergencies, climate change, agricultural production, and housing, etc.;

**6. Need for more transparency and stakeholders' input.** \$60,000 a day fines are intended to have a major impact on county water supply agencies, other government agencies including health, agriculture and housing, many communities, industries, businesses and individuals. Thus, we appreciate that CWRM has reached out to the county water departments and over the past few weeks, other stakeholders, including LURF. We would respectfully request that CWRM convene group meetings with all stakeholders to discuss and resolve the issues relating to this bill.

**7. A CWRM Stakeholder Working Group should be created similar to the 1987 State Water Code Committee.** In BWS' 2023 testimony in opposition to HB 1088 CWRM I that was later vetoed by Governor Green, the BWS provided a brief, but informative history of the enactment of the State Water Code, including the members of the Advisory Study Commission on Water Resources. LURF would respectfully recommend that Hawaii's water issues have changed greatly since 1987, and should be comprehensively addressed by such an advisory commission of stakeholders with relevant experience.

LURF is willing to work with the proponents of this bill, Legislators and other stakeholders relating to this measure.

LURF respectfully requests that this bill be held in Committee until the above issues are addressed and resolved.

Comments:

Aloha,

I strongly urge you to support HB306 HD1. Enforcing Hawai‘i's Water Code is crucial for protecting traditional and customary practices, ensuring that our streamflows remain healthy and sustainable. Without proper enforcement, kalo cultivation—the foundation of Hawaiian culture and food sovereignty—suffers, along with the delicate ecosystems that depend on these waterways.

Adequate streamflows are essential not only for kalo farmers but also for maintaining the health of riparian species and preserving our clean water resources for future generations. Strengthening enforcement will help safeguard these vital systems, supporting both cultural traditions and long-term conservation efforts.

Mahalo for your time and consideration. Please pass HB306 HD1 to uphold the responsible stewardship of Hawai‘i's water resources.

## Comments:

Aloha nui. Hawai‘i has a long history with wai, water management, and ways that we have lost and maintained traditional practice due to our history with wai. I support HB306, because not only is water essential to our physical well-being, but also as kanaka our mental and spiritual well-being. Our water code must have penalties to create boundaries on its usage, but with that also come the need for enforcement and sustaining those relationships. Mahalo.

Comments:

**Aloha Chair and members of the Committee on Judiciary & Hawaiian Affairs:**

I support HB306 HD1 which seeks increases in Water Code Penalties

We all know that Hawai‘i has a long history of flagrant water code violations by major water diverters and that they continue to flex their influence and muscle till this day, with the blessing and support of the current Hawaii State Water Commission Chairperson. For many of these diverters, money is not an object; however, higher penalties for the near future may send a stronger message while we, as a people, work for transparency, fairness, and sustainability.

Enforcement of Hawai‘i's Water Code is essential to the health of traditional and customary practices by ensuring streamflows are sufficient for kalo cultivation, health of riparian species, and for overall conservation efforts to ensure abundant clean water resources for future generations.

Please support HB 306 HD1.

Respectfully,

Martha Evans

Aloha Chair Representative Tarnas, Vice Chair Representative Poepoe and Members of the Committee on Judiciary and Hawaiian Affairs.

Please support HB 306 HD 1 to increase State Water Code penalties.

Mahalo.

Comments:

Aloha e,

Enforcement of Hawai‘i's Water Code is essential to the health of traditional and customary practices by ensuring streamflows are sufficient for kalo cultivation, health of riparian species, and for overall conservation efforts to ensure abundant clean water resources for future generations. Please support HB 306 HD1.

Mahalo,

Isis Usborne
