**Testimony COMMENTING on HB36  
RELATING TO EXCITED DELIRIUM.**

REP. GREGG TAKAYAMA, CHAIR  
HOUSE COMMITTEE ON HEALTH

Hearing Date: February 5, 2025

Room Number: 329

- 1 **Fiscal Implications:** Potential appropriation to modify computer system.
- 2 **Department Testimony:** The Department of Health (DOH) takes no position on prohibiting  
3 excited delirium as a cause of death, offers comments, and recommends amendments to chapter  
4 326, Hawaii Revised Statutes (HRS), rather than chapter 338, HRS, and other amendments.
- 5 • DOH's function in registering deaths is ministerial only, meaning the department does  
6 not question, confirm, or alter causes of death. The department only documents and  
7 preserves the record.
    - 8 ○ Cause of death is determined by a clinical professional who has physically  
9 examined a body, such as a medical examiner or a coroner, but also attending  
10 physicians in hospital and hospice settings.
    - 11 ○ Information on a person's death is entered through DOH's Electronic Death  
12 Registration System (EDRS) by the person who determined the cause of death.
  - 13 • Since 2006, excited delirium was listed as an immediate cause of death 9 times  
14 ○ In recent years, excited delirium appears to have fallen out of use.
  - 15 • DOH may require modifications to EDRS to flag incoming uses of excited delirium,  
16 which may require an appropriation.
- 17 Because the Department of Health's role in recording causes of death is purely a ministerial  
18 function, amending chapter 338, HRS will be ineffective. DOH recommends Bill Section 1 be

1 added as a new section to chapter 327, HRS, or as new subsections under section [327C-1, HRS,](#)  
2 [“Determination of death.”](#)

3 This measure will be most effective if the prohibition on excited delirium as a cause of death is  
4 moved upstream from DOH, specifically to medical examiners, coroners, and attending  
5 physicians in hospital and hospice settings.

6 Thank you for the opportunity to testify.

7 **Proposed Amendments:** N/A.

**HB-36**

Comments:

We believe this bill has a lot of merit. The concept of excited delirium has been sadly used in several cases to justify or excuse or certainly negate liability for police misconduct in cases involving death. We have seen instances where individuals who had a mental illness were confronted by police officers who did not exercise proper de—escalation techniques and used excessive force. In civil trials which sought to achieve some measure of justice and compensation the defense of excited delirium was presented to “explain” the cause of death. Our understanding is that this concept has been medically debunked and yet it has confused juries who then rendered verdicts in favor of the police department or the municipality.

We are lawyers and not doctors at the Hawaii Disability Rights Center but it does seem to us that this concept has been abused and that further discussion should occur at the Legislature to determine whether it has any place in our civil or criminal justice system.

Re: HI HB36, Excited Delirium, Written Testimony of Julia Sherwin

Dear House Health Committee Members:

I am a pro bono lawyer for the Lawai International Center on Kauai, and a longtime civil rights lawyer in Oakland, California. I thank Chair Takayama for introducing HB36 concerning "Excited Delirium," and I strongly support the bill. I provided amendments for California's excited delirium bill, AB360 -- on which HB36 is based -- and advocated for the passage of California's bill. California's excited delirium legislation passed with 113 "Yes" votes and only one "No" vote, and was signed into law in October 2023.

I handle wrongful death cases involving law enforcement, and have worked to debunk excited delirium for two decades. I co-authored the Physicians for Human Rights (PHR) report on excited delirium, entitled *Excited Delirium and Deaths in Police Custody: The Deadly Impact of a Baseless Diagnosis* (March 2022)(<https://phr.org/our-work/resources/excited-delirium/>). The PHR report includes information I gathered over many years concerning the junk science nature of the excited delirium theory, its racist and sexist roots, and the bankrolling and promotion of the theory by TASER International (now known as Axon Enterprise) and its lawyer and paid defense experts. The PHR report also includes my physician co-authors' review of the medical literature concerning excited delirium, and conclusion that the theory of excited delirium has no medical basis. The World Health Organization, the American Medical Association, the American Psychiatric Association, the American Psychological Association, and now the National Association of Medical Examiners all recognize that excited delirium is not a valid diagnosis or cause of death.

I have handled many cases involving restraint asphyxia deaths in police custody during the last two decades. I have spoken at conferences concerning law enforcement contacts with the mentally ill, including the International Congress on Law and Mental Health. In 2020, I gave a presentation about excited delirium and its history at an international Death in Custody medical conference that had participants from 27 countries in attendance. I have also provided pro bono consultation to Minnesota Attorney General Keith Ellison and his lead special prosecutor, Steve Schleicher, to assist them in prosecuting the Minneapolis police officers who killed George Floyd, and to help them rebut the excited delirium defense when it arose in their case.

Excited delirium was debunked in Miami in the 1980's but the theory's founder, Charles Wetli, MD, continued to promote the theory nationally. BBC Radio recently released an excellent 30-minute program concerning the history of excited delirium, which you can find wherever you get your podcasts. It is the BBC Radio program by Jon Ronson entitled "The Most Mysterious Deaths," from his "Things Fell Apart" program, Season 2, Episode 1, <https://www.bbc.co.uk/sounds/play/m001v3dw>.

Following Dr. Wetli's lead, TASER International then promoted excited delirium as an alternate cause of death when people died after being Tased, or Tased and restrained as happened with Sheldon Haleck. The company extensively promoted the theory in law enforcement training and among forensic pathologists and Emergency physicians. The PHR report provides an extensive discussion of the history of the theory that I discovered during my years of investigation. Last fall, the American College of Emergency Physicians (ACEP) -- which has longtime defense experts and TASER/Axon-affiliated experts among its more prominent members -- finally withdrew its endorsement of excited delirium as a diagnosis, and rescinded its 2009 White Paper endorsing the theory. I attach my letter to ACEP's leadership explaining that the 2009 White Paper actually came out of a 2008 propaganda conference organized and hosted by a company founded by TASER International's general counsel, along with the company's longtime defense expert John Peters, who testified for the defense in the Sheldon Haleck case.

Sheldon Haleck was a combat veteran from a law enforcement family. Upon his graduation from Kaiser High School in Hawai'i Kai on Oahu, Sheldon joined the military. He served in the Hawai'i Air National Guard for 12 years until his honorable discharge. Sheldon had combat deployments to Afghanistan and Iraq, as well as numerous humanitarian deployments, including to Thailand after the 2004 tsunami. Sheldon's service to our country left him with PTSD.

On March 16, 2015, Honolulu Police officers stopped Sheldon for jaywalking in front of 'Iolani Palace. He was unarmed and non-threatening. Officers Tased Sheldon, pepper sprayed him, forced him into a prone position with officers on his back, hogtied him, and an officer put his knee on Sheldon's neck, until Sheldon became unresponsive and was later pronounced deceased. Sheldon left a loving wife, a 2-year-old son and 13-year-old stepson, parents, and an extended family who loved him deeply. Sheldon's family brought a federal lawsuit arising out of his death, but lost at trial because the jury believed the Honolulu Police Department's junk science defense of "excited delirium." The defense experts in the Halecks' trial included Stacey Hail, MD, and John Peters, two longtime TASER/Axon defense experts. The jury believed their assertion that Sheldon died of excited delirium.

Sheldon's parents have no recourse in their own case, but now advocate for the passage of Hawai'i legislation prohibiting the use of the debunked theory of "excited delirium," as California has done, to protect other families. I strongly support HB36. Mahalo nui loa for your time and attention.

Sincerely,

Julia Sherwin

American College of Emergency Physicians (ACEP)

Re: Excited Delirium/Hyperactive Delirium

Dear ACEP Members:

I am writing to request that you rescind your endorsement of Excited Delirium, a/k/a Hyperactive Delirium, and withdraw your 2009 White Paper on “excited delirium” at your upcoming meeting this weekend. I am a longtime civil rights lawyer handling wrongful death cases involving law enforcement, and have worked to debunk “excited delirium” for two decades. I co-authored the report from Physicians for Human Rights (PHR) on excited delirium, entitled *Excited Delirium and Deaths in Police Custody: The Deadly Impact of a Baseless Diagnosis* (March 2022). The report includes information I gathered over many years concerning the junk science nature of the “excited delirium” theory, its racist and sexist roots, and the bankrolling and promotion of the theory by TASER International (now known as Axon Enterprise) and its lawyer and paid defense experts. My PHR physician co-authors also include a review of the medical literature concerning the junk science theory.

I have spoken at conferences concerning law enforcement contacts with the mentally ill, including the International Congress on Law and Mental Health, as well as an international Death in Custody medical conference that had 197 participants from 27 countries in attendance. I have also provided *pro bono* consultation and advice to Minnesota Attorney General Keith Ellison and his lead special prosecutor, Steve Schleicher, to assist them in prosecuting the Minneapolis police officers who killed George Floyd, and to help them rebut the “excited delirium” defense when it arose in their case.

I have handled many cases involving restraint asphyxial deaths in police custody during the last two decades. I currently represent Mario Gonzalez, Deceased, and his seven-year-old son. Mario was killed on April 19, 2021, by Alameda, California, police officers who restrained him in a prone position, with three officers putting their weight on him, for over five minutes. For nearly four of those minutes, the officers had already handcuffed Mario behind his back. Defense forensic pathologist Judy Melinek has tried to insert “excited delirium” into her defense testimony in the case. I have repeatedly encountered the junk science theory of “excited delirium” as a defense in cases such as the Gonzalez case.

ACEP’s 2009 “White Paper” endorsing the existence of “excited delirium” was the result of a 2008 conference in Las Vegas organized by the Institute for the Prevention of In-Custody Deaths, Inc. (IPICD), a corporation founded by TASER International’s in-house lawyer, Michael Brave, along with longtime TASER defense expert and trainer, John Peters. The IPICD advertised its conference as “the first consensus conference that focuses upon excited delirium,” and promised “attendees will help make law enforcement, medical, and legal history through topic-specific breakout groups focused on arriving at a ‘consensus’ about excited delirium.” (**Attachment A**, Press Release for IPICD Conference). The IPICD promised, “The findings from this seminal event will then be published in leading medical, legal, and law enforcement journals.”

The IPICD conference was a propaganda conference organized by defense experts in TASER and restraint death cases. I have highlighted on the attached press release the speakers at the conference

ACEP

October 2, 2023

Page 2

whom I know to be longtime defense experts in TASER and/or restraint asphyxia death cases. ACEP's 2009 "White Paper" was the result of the 2008 IPICD propaganda conference. Many of its authors are longtime defense experts in TASER and/or restraint death cases, including especially Drs. Chan, Ho, Mash, and Vilke.

ACEP -- which has longtime defense experts and TASER/Axon-affiliated experts among its more prominent members -- has so far doubled down on "excited delirium." In response to our PHR report, ACEP simply substituted "hyperactive" for "excited." ACEP continues to promote the defense, now calling it "hyperactive delirium" instead of "excited delirium."

I just deposed ACEP member Gary Vilke last week for the third time, in my restraint asphyxia case *Mario Gonzalez, Deceased, v. City of Alameda*. Dr. Vilke admitted he has been a defense expert in at least 50 to 75 restraint asphyxia cases, and possibly even more than 100 cases. He admitted that by the time of trial next month in the *Gonzalez* case, he will make over \$50,000 as a defense expert from that case alone. He has already made over \$41,000 for his work as a defense expert in the case. In the last four years, he has testified as an expert in court or depositions 78 times. He admitted that, in every single case involving law enforcement, he always testifies that the officer did not cause or contribute to the person's death. Dr. Vilke and his colleagues have repeatedly relied on the ACEP White Paper to bolster their defense testimony. He admitted in deposition that he does not tell medical journals, nor the University of California San Diego's conflict-of-interest officials, that he is a longtime, paid defense expert in TASER and restraint death cases.

Charles Wetli, the forensic pathologist who was the first proponent of the "excited delirium" theory in the 1980's, said in 1990 that seventy percent of people who die from excited delirium are Black men, and "it may be genetic." (Russ Rymer, "Murder Without a Trace," *In Health*, May/June 1990). The PHR report contains further information from my two decades of research into the origins and junk science nature of the theory.

California AB 360, banning the junk science theory of "excited delirium," has been passed by the California legislature, 77 to 0 in the Assembly and 36 to 1 in the Senate. With this new legislation, California will lead the way nationally toward freedom from the racist theory of "excited/hyperactive delirium."

I was very disappointed that, after the PHR report debunking "excited delirium" was published, ACEP simply changed the name from "excited" to "hyperactive," and continues to promote the junk science theory. It is time for the American College of Emergency Physicians to stand up to its prominent members who are making a fortune as defense experts relying on the junk science theory, and rescind its 2009 White Paper and continued embrace of excited/hyperactive delirium. Thank you very much for your time and attention.

Sincerely,

Julia Sherwin

**PRESS RELEASE**

# **IPICD 3rd Annual Sudden Death, Excited Delirium & In-Custody Death Conference—LAS VEGAS**

Aug 15, 2008

---

Henderson, NV—The 3rd Annual Sudden Death, Excited Delirium & In-Custody Death Conference focusing upon the latest medical research findings, theories, and legal issues about excited delirium, sudden death, electronic control devices, and mental illness, which are of great concern for law enforcement agencies around the world, will be held on October 29-31, 2008 at The Orelans Hotel, Las Vegas, Nevada. The three-day Conference is sponsored by the Institute for the Prevention of In-Custody Deaths, Inc. (IPLICD), Henderson, Nevada.

The 2008 IPICD Conference will be the first consensus conference that focuses upon excited delirium and response protocols. Attendees will help make law enforcement, medical, and legal history through topic-specific breakout groups focused on arriving at a “consensus” about excited delirium, key law enforcement, emergency medical provider, and emergency department responses to and training issues about one of the most pressing issues of the day. The findings from this seminal event will then be published in leading medical, legal, and law enforcement journals.

Scheduled speakers include, but are not limited to such internationally-renown researchers, scientists, pathologists, and trial lawyers as Deborah Mash, Ph.D., University of Miami Brain Endowment Bank; Charles Wetli, M.D. and David Fishbain, M.D., the two doctors to identify “excited delirium” in the cocaine-wild 1980s; Vincent

DiMaio, M.D. and his wife, Theresa, authors of one of the most definitive texts on excited delirium; Steven Karch, M.D., pathologist and author of several texts on drugs and cocaine; Theodore Chan, M.D. and Gary Vilke, M.D., both from the University of California—San Diego; Judy Melinek, M.D., Assistant Medical Examiner, San Francisco.

Office of the Medical Examiner; Ellis Amdur, M.A., psychologist; Lt. Walter Bailey, Texas Sheriff's Department Mental Health Unit; Sgt. Edward Flosi, California peace officer; Carrie L. Sandbaken Hill, J.D., defense lawyer; Christine Hall, M.D. Canadian researcher; Bruce Levy, M.D., medical examiner; Andrew Dennis, M.D., trauma doctor and researcher; and Bob Wood, former drug addict.

Conference topics include the latest research on excited delirium and sudden death, mental illness, the role of the medical examiner, restraints and sudden death, legal defense strategies, handling expert witnesses, plus much more. The Conference flyer can be downloaded from the IPICD Web site: [www.ipicd.com](http://www.ipicd.com).

The 2006 & 2007 IPICD Conferences were sold out, so register NOW for this timely and important conference by visiting the Institute for the Prevention of In-Custody Deaths, Inc. Web site at [www.ipicd.com](http://www.ipicd.com) . Early registration tuition for the three-day educational conference is only \$595 per person, and includes a workbook, CD-ROM, certificate, lunch on Wednesday and Thursday, and other materials. After September 27, 2008, tuition is \$695 per person.

For more information about the Conference and/or the Institute for the Prevention of In-Custody Deaths, Inc., please visit [www.ipicd.com](http://www.ipicd.com), e-mail [staff@ipicd.com](mailto:staff@ipicd.com), or telephone toll-free: 866.944.4723.

Committee: House Committee on Health  
Hearing Date/Time: Wednesday, February 5, 2025 at 9:30am  
Place: Conference Room 329 & Via Videoconference  
Re: Testimony of the ACLU of Hawai'i in SUPPORT of HB36 Relating to Excited Delirium

Dear Chair Takayama, Vice Chair Keohokapu-Lee Loy, and Members of the Committee:

The ACLU of Hawai'i **supports HB36**, which (1) prohibits recognizing “excited delirium” as a medical diagnosis or cause of death, (2) prohibits law enforcement from using the term in an incident report, and (3) makes evidence of “excited delirium” inadmissible in civil cases.

“Excited delirium” (or “excited delirium syndrome”) is not real medical diagnosis. Yet for too long, it has been invoked to justify law enforcement violence—especially against people of color and those experiencing mental health crises.

Sheldon Haleck.<sup>1</sup> George Floyd.<sup>2</sup> Elijah McClain.<sup>3</sup> Daniel Prude.<sup>4</sup> Tyre Nichols.<sup>5</sup> Angelo Quinto.<sup>6</sup> Adam Trammell.<sup>7</sup> All were killed by police.

To justify tasing, choking, asphyxiating, pinning, kneeling on, crushing, handcuffing, pepper-spraying, drugging, clubbing, baton-striking, beating, punching, or kicking these individuals, officers gave the same excuse: “*I thought he had excited delirium.*”

<sup>5</sup> Adrian Sainz, *Former supervisor: ‘No need’ for officers to beat Tyre Nichols*, The Philadelphia Tribune (Sept. 20, 2024), [https://www.phillytrib.com/news/across\\_america/former-supervisor-no-need-for-officers-to-beat-tyre-nichols/article\\_efbb2309-0e63-50ff-ae59-462b48db07d2.html](https://www.phillytrib.com/news/across_america/former-supervisor-no-need-for-officers-to-beat-tyre-nichols/article_efbb2309-0e63-50ff-ae59-462b48db07d2.html).

<sup>6</sup> Daniela Pardo & Jackson Ellison, *Antioch family led the effort to ban excited delirium diagnosis in California*, Spectrum News 1 (Dec. 15, 2023), <https://spectrumnews1.com/ca/southern-california/inside-the-issues/2023/12/15/antioch-family-led-the-effort-to-ban-excited-delirium-diagnosis-in-california>.

<sup>7</sup> Gina Barton, *A mentally ill man died after being hit 18 times with a Taser in his home. The police officers weren’t charged.* Milwaukee Journal Sentinel (Apr. 27, 2018), <https://www.jsonline.com/story/news/local/milwaukee/2018/04/27/no-charges-against-west-milwaukee-officers-death-mentally-ill-man-hit-18-times-taser/552071002>.

But “excited delirium” has no basis in medicine. It has no consistent definition or diagnostic criteria.<sup>8</sup> The American Medical Association states, “current evidence does not support ‘excited delirium’ or ‘excited delirium syndrome’ as a medical diagnosis.”<sup>9</sup> The World Health Organization’s International Classification of Diseases 10th Revision (the official global standard for diagnosing diseases) and the DSM-5 (the authoritative classification system for mental health disorders used by medical professionals in the United States) both exclude it.<sup>10</sup> And major U.S. medical organizations—including the American Psychiatric Association<sup>11</sup>, the National Association of Medical Examiners<sup>12</sup>, the American College of Emergency Physicians<sup>13</sup>, and the American College of Medical Toxicology<sup>14</sup>—explicitly reject it.

Its roots expose why: it is a racist and scientifically baseless theory, weaponized to shield law enforcement from accountability. In the 1980s, at the height of the crack cocaine epidemic, Dr. Charles Wetli, a medical examiner, began attributing to “excited delirium” the sudden deaths of cocaine users in police custody, as well as a group of Black women sex workers in Miami who had used cocaine.<sup>15</sup> A serial killer had actually murdered these women, yet Dr. Wetli insisted genetics explained why Black people were more prone to dying from “excited delirium.”<sup>16</sup> Decades later, researchers and litigation defense experts funded by TASER International (now

<sup>16</sup> *Id.*

Axon Enterprises) published and distributed materials to police chiefs and medical examiners nationwide to broaden the term's use and acceptance.<sup>17</sup>

Hawai'i is not immune to this dangerous, pseudoscientific excuse for police violence. On March 16, 2015, Sheldon Haleck—a U.S. Air National Guard veteran—was experiencing a mental health crisis outside Iolani Palace. He was unarmed, non-violent, and not committing a crime. Yet three Honolulu police officers tased him 3 times and pepper-sprayed him 12 times in under 5 minutes.<sup>18</sup> Sheldon died the next day. The Ninth Circuit ruled Sheldon's family had enough evidence to take their Fourth Amendment excessive force case to trial.<sup>19</sup> Still, they lost. Why? HPD hired three serial Taser/Axon defense experts—Stacey Hail, John G. Peters, and Mark Kroll<sup>20</sup>—who convinced the jury that he died from “excited delirium,” not police violence.<sup>21</sup>

Sheldon's parents, Verdell and William Haleck, fought for years seeking justice, only to see the legal system fail them. Their heartbreak is a stark reminder that, as long as “excited delirium” remains an available defense, families of those killed by police will continue to face insurmountable obstacles to holding officers accountable. Notably, other lawsuits in Hawai'i involving deaths in police custody have invoked the same defense.<sup>22</sup>

As one medical group succinctly puts it, “it is time to discontinue the use of this term.”<sup>23</sup> By preventing law enforcement from relying on the baseless and prejudicial defense of “excited delirium,” HB36 ensures that only medically valid, evidence-based explanations are used in official reports and legal proceedings.

Other states—including California, Colorado, and Minnesota<sup>24</sup>—have already taken this step. Hawai'i should do the same.

**SUPPORT FOR HB 36– A Bill That Will Prohibit the Use of Excited Delirium**  
**Written Testimony-**National Police Accountability Project, Lauren Bonds, Executive Director  
**Hawaii House Health Committee – Wednesday, February 5, 2025**

Chair Takayama and Members of this Committee,

On behalf of the National Police Accountability Project (“NPAP”), we write to urge you to support HB 36, a bill that will would prohibit: (1) excited delirium from being recognized as a valid cause of death; (2) peace officers from using the term “excited delirium” when describing an individual in an incident report; and (3) using the term excited delirium to describe a person as part of an affirmative defense in a civil wrongful death action. HB 36 will help reduce the use of the unscientific, racist theory excited delirium to justify law enforcement violence and hinder accountability.

NPAP is a nonprofit organization dedicated to holding law enforcement and corrections officers accountable to constitutional and professional standards. We have hundreds of members across the country, including members in Hawaii, who regularly represent the loved ones of people who have been killed in police or prison custody. In many of our clients’ cases, officers and their legal defense teams claim that their loved ones died due to “excited delirium” rather than the obvious consequences of excessive force. Moreover, many officers attempt to justify their continued use of deadly force because our clients’ loved ones were in a “state of excited delirium.” For instance, the officers that killed George Floyd cited excited delirium as a defense in his criminal case and his colleagues referenced it at the scene of the crime.<sup>1</sup>

---

<sup>1</sup> Steve Karnowski, *EXPLAINER: Why ‘excited delirium’ came up in at Chauvin trial?* Associated Press, Apr. 19, 2021, <https://apnews.com/article/health-death-of-george-floyd-trials-george-floyd-3b60b3930023a2668e7fc63f903fc3aa>.

Similarly, the City of Aurora cited excited delirium to justify the use of a prolonged stranglehold against Elijah McClain.<sup>2</sup>

“Excited delirium” is a condition that lacks clear diagnostic criteria and is almost exclusively cited as a cause of death in cases where a person was killed by law enforcement officers.<sup>3</sup> There is no consensus about the definition of excited delirium in medical literature or surveyed clinicians.<sup>4</sup> Even the shrinking community of proponents of excited delirium concede that it is a “diagnosis of exclusion,” or a potential explanation for deaths “when there are no other explanations.”<sup>5</sup> Unsurprisingly, a recent report by Harvard University and University of Michigan doctors found that the syndrome is “scientifically meaningless,” not a proper medical diagnosis, and should not be cited as a cause of death.<sup>6</sup>

Courts across the country have also raised doubts about excited delirium in law enforcement death cases questioning the syndrome’s scientific validity and an officer’s ability to determine whether a person was in a state of excited delirium.<sup>7</sup> Accordingly, the restrictions proposed by HB 36 would be consistent with how many courts already treat cause of death findings of excited delirium and officer statements claiming a person was suffering from the syndrome.

In addition to the problems of scientific validity, excited delirium is rooted in racial stereotypes and has been disproportionately applied in deaths of Black men. The

Comments:

Mahalo for the opportunity to testify in strong support of HB36, which proposes to end the use of junk science in any government report related to the unintended death of any person in police custody.

The 'ohana of Sheldon Paul Haleck - a native Hawaiian air guardsman, who died as a result of an apparent encounter with Honolulu police officers between the statue of King Kamehameha and Iolani Palace - believe their son did not have to die because of a jaywalking infraction. I agree.

Individuals living with behavioral health issues and law enforcement require more support. More support in crisis intervention training and methods to de escalate violence. More support in life skills to navigate society after the loss of employment or other major life changes.

The residents of Hawaii deserve to be safe, even when they are suffering some sort of mental health crisis. Hawaii residents also deserve to know that their police force is trained to the highest and best standards, and that excessive police force will not be tolerated or covered up with the use of junk science.

Increasing the training for both HPD and CORE, while removing the use of any junk science - like "excited delirium" - from all police and government documents, including certificates of death, will ensure that best practices are the followed.

Please allow our community to learn and heal from our considerable and preventable losses by passing HB36 onto the next committee for a hearing. Mahalo a me ka ha'aha'a.

I am in full support of HB36 to ban the term 'excited delirium' from being used in the State of Hawaii. The goal is to ensure that no other family will suffer the heartbreak and disappointment Sheldon Haleck's family has from being denied justice for their loved one. This bill should be passed, in memory of Sheldon Haleck, to ban the use or reference to 'excited delirium' or any words related to that term.

I urge the committee to pass HB36. I ask that you take this testimony into consideration and I thank you for the opportunity to testify.

Comments:

House Committee on Health: Chair, Gregg Takayama and Vice Chair, Sue Keohokapu-Lee Loy and House Committee Members:

We strongly support HB36, Relating to Excited Delirium to ban the use of the term "excited delirium" or any other term relating to it from being used in the State of Hawaii, based on recently enacted legislation in California.

We are Verdell and William Haleck who previously lived in Honolulu for 26 years before moving to Washington, Utah in 2005. We are speaking on behalf of our son, Sheldon Haleck, who was a husband, father, son, uncle, friend and a veteran who was honorably discharged from the Air National Guard and who wrestled with the aftermath of his past deployments -- PTSD, drugs and other mental health issues. In March 2015, Sheldon died as a result of a confrontation with Honolulu police in front of Iolani Palace for jaywalking. His only crime was walking in the street and not listening to the commands by police to move to the sidewalk. He was unarmed, non-aggressive and did not harm anyone or damage any property, he did have a recreational amount of a drug in his system and he was suffering from a mental health crisis. Sheldon was pepper sprayed 13 times and tased 3 times before he was handcuffed and hogtied with several police officers on his back and one officer on his legs and another officer with his knee to his neck. The Honolulu Police Department claimed he died of "Excited Delirium," which is defined as agitation, aggression and acute distress which leads to sudden death, a defense theory that has been debunked in the medical community. In our civil case, the police defense expert, an ER doctor, testified that Sheldon did not die from being tased or pepper sprayed or from police use of excessive force, but that he experienced "excited delirium" and that is what caused his death. The jurors believed that it was a real medical diagnosis and found the police not responsible for Sheldon's death. The sudden death symptom of "excited delirium" is now known to be 'positional asphyxia' or 'respiratory failure' due to the lack of oxygen to the lungs caused by the weight of the police officers on Sheldon's back and the officers knee to his neck while he was in a prone position and being handcuffed and hogtied causing him to become unresponsive and followed by his death. (Like George Floyd) We have no recourse in Sheldon's case, so we now seek change by HB36, Relating to Excited Delirium so that no other family should have to suffer the heartbreak and disappointment in their pursuit for justice for their loved one.

The recent October 2023 vote by the American College of Emergency Physicians (ACEP) disavowed its 2009 position 'white paper' which supported 'excited delirium' as a medical diagnosis that helped undergird court cases across the country, such as ours.

In October 2023, California was the first state to pass a law to ban the controversial term "excited delirium" followed by the States of Colorado and Minnesota. The ban forbids the use of the term "excited delirium" as a medical diagnosis or cause of death. It also prohibits coroners and medical examiners from listing it as a cause of death on a death certificate or autopsy report. It would bar law enforcement from using the term to describe the condition of someone in an incident report and it would be inadmissible as evidence in civil lawsuits, such as ours. We now seek to ban the terms "excited delirium, excited delirium syndrome, hyperactive delirium, agitated delirium, and exhaustive mania" from being used in the State of Hawaii.

Our goal is not only for our son, Sheldon, but for all those individuals who have unjustly lost their lives while in police custody and for those who might find themselves in the same tragic situation in the future.

We would like to thank you again for your time and we humbly ask for your support to pass HB36, Relating to Excited Delirium to ban the term "excited delirium" or any term relating to it from being used in the State of Hawaii. We humbly ask if this bill does get passed, could it please be called "Sheldon's Law or Act" in honor of our son, Sheldon so that his death was not in vain.

Mahalo,

Verdell and William Haleck

House Committee on Health

Chair, Gregg Takayama

Vice Chair, Sue L. Keohokapu-Lee Loy

Committee Members of the Committee on Health

I strongly support HB36, Relating to Excited Delirium to ban the use of the term 'excited delirium' or any other term relating to it from being use in the State of Hawai'i, based on recently enacted legislation in California.

I am Verdell Haleck and I lived in Honolulu for 26 years before moving to Washington, Utah in 2005. I am representing my son, Sheldon Haleck, who was a husband, father, son, uncle, friend and a veteran who was honorably discharged from the Air National Guard and who wrestled with the aftermath of his past deployments -- PTSD, drugs and other mental health disorders. In March of 2015, Sheldon died as a result of a confrontation with Honolulu police in front of Iolani Palace for jaywalking. He was unarmed, non-aggressive and did not harm anyone or damage any property and he was having a mental health crisis. His only crime was walking in the street and he did not obey the commands of the police to move to the sidewalk. Sheldon was pepper sprayed and tased before he was handcuffed and hogtied with several police officers on his back and a knee to his neck where he became unresponsive and died the next day. The Police Department claimed that he died of "Excited Delirium," which is defined as agitation, aggression and acute distress which leads to sudden death, a defense theory that has been debunked in the medical community. In our civil case, the police defense expert, an ER doctor, testified that Sheldon experienced 'excited delirium' and that is what caused his death. The jurors in our case believed that it was a real medical diagnosis and found the police not responsible for Sheldon's death. The sudden death symptom of 'excited delirium' is suspected to be 'positional asphyxia' or 'respiratory failure' due to the lungs being deprived of oxygen by the body weight of the police officers on the victims back and the knee to the neck or shoulder blade while the victim is in a prone position and hancuffed and hogtied causing the victim to become unresponsive and

followed by death. (Like George Floyd) We have no recourse in Sheldon's case, so we now seek change by the introduction of HB36, Relating to Excited Delirium. Our goal is not only for our son, Sheldon, but for all those individuals who have unjustly lost their lives while in police custody and for those who might find themselves in the same tragic situation in the future.

We call on the Hawaii Legislature to enact the following legislation:

1. Prohibits 'excited delirium' from being recognized as a valid medical diagnosis or cause of death in the State of Hawaii, including prohibiting coroners, medical examiners, physicians, or physician assistants from stating on a death certificate or in any report that a cause of death was 'excited delirium;'
2. Prohibits peace officers from using the term 'excited delirium' to describe an individual in an incident report;
3. Prohibits a party or witness in any legal proceeding from testifying that a person was in 'excited delirium;'
4. Prohibits a state or local government entity, or employee or contractor of a state or local government entity, from documenting, testifying to, or otherwise using in any official capacity or communication 'excited delirium' as a recognized medical diagnosis or cause of death;'
5. Defines prohibited 'excited delirium' to include a person's state of agitation, excitability, paranoia, extreme aggression, physical violence, and apparent immunity to pain that is not listed in the most current version of the Diagnostic and Statistical Manual of Mental Disorders, or for which the court finds there is insufficient scientific evidence or diagnostic criteria to be recognized as a medical condition, including: 'excited delirium' syndrome, 'excited delirium,' hyperactive delirium, agitated delirium and exhaustive mania.

The recent October 2023 vote by the American College of Emergency Physicians (ACEP) disavowed its 2009 position 'white paper' which supported 'excited delirium' as a medical diagnosis that helped undergird court cases across the country, such as ours.

We would like to thank you again for your time and we humbly ask for your support to pass HB36, Relating to Excited Delirium to ban the term 'excited delirium' or any term relating to it from being used in the State of Hawai'i. We would humbly ask if this bill gets passed, if the bill could be called "Sheldon's Law or Act" in honor of my son so that his death was not in vain.

Mahalo,

Verdell Haleck

Comments:

I would urge the passage of HB 36 relating to Excited Delirium to ban the use of Excited Delirium in Hawaii. This bill is necessary to prevent justice being denied as in the case of Sheldon Haleck and his family. As a Board Certified Physician licensed and retired from 37 years of practice in Hawaii, I recognize that Excited Delirium is not a legitimate clinical entity and has been rejected as such by multiple official Medical Organizations.
