WRITTEN
TESTIMONY ONLY

**Testimony COMMENTING on SB 0345 SD2
RELATING TO COSMETICS**

REP. MARK J. HASHEM, CHAIR
HOUSE COMMITTEE ON AGRICULTURE

Hearing Date: 3/17/2021

Room Number: 325

1 **Fiscal Implications:** This measure may impact the priorities identified in the Governor's
2 Executive Budget Request for the Department of Health's (Department) appropriations and
3 personnel priorities.

4 **Department Testimony:** The Department appreciates the opportunity to provide testimony
5 offering comments on SB0345 SD2. The Food and Drug Branch (FDB) is responsible for
6 assuring cosmetics are properly labeled and safe for use by consumers through the enforcement
7 of the Hawaii Revised Statutes (HRS) Chapter 328, "Food, Drugs, and Cosmetics". However,
8 the subject of the bill is not designed to address the safety or labeling of the cosmetic sold to the
9 consumer but rather the manner in which it was developed for market. Chapter 328, HRS, is
10 directed at product quality control and consumer protection and is not an ideal fit for provisions
11 seeking to address animal testing in the development of new cosmetic ingredients.

12 The Department supports the development and use of alternatives to whole-animal testing as
13 well as adherence to the most humane methods available within the limits of scientific capability
14 when animals are used for testing the safety of cosmetic products. However, the regulation of
15 cruelty-free cosmetics would require oversight by a department or agency that is well-versed in
16 matters involving animal testing methods and animal rights or that can effectively enforce the
17 prohibition of manufacturers from importing for sale cosmetics that contain a new ingredient that

1 has been tested on animals. These matters are outside the jurisdiction of FDB and the scope of
2 Chapter 328, HRS.

3 Should the legislature enact these amendments, FDB respectfully requests that the amendments
4 be placed in HRS Chapter 321, as originally intended, to allow county prosecutors the ability to
5 pursue potential violators as provided for in the measure.

6

7

8

9

10 **Offered Amendments:** None.

11 Thank you for the opportunity to testify on this measure.

RE: Testimony in support of SB 345: Relating to Cosmetics
Wednesday, March 17, 2021, 10 a.m., Capitol room 325

Aloha Chair Hashem, Vice Chair Perruso, and Committee Members,

On behalf of the Hawaiian Humane Society, thank you for considering our support of Senate Bill 345, SD2, which bans the import for profit, sale, and offer for sale of any cosmetic in the state if the final product or any component of the final product was developed or manufactured using animal testing performed on or after 1/1/2022.

Hawaiian Humane believes the use of animals for experimentation should be permitted only when there are no feasible alternatives and only when the experiment is believed likely to produce new and substantial information. That is certainly not the case in testing the chemicals used in cosmetics where modern alternatives are cheaper, faster and can better predict human reactions. These animal-free techniques are required in European Union countries as well as a growing number of states, including California, Nevada and Illinois. We support SB 345, SD2, with the amendments proposed by Cruelty Free International. The provisions of this measure are well vetted, supported by many in the cosmetics industry itself, and include exemptions to address threats to human health.

There is no evidence that any local cosmetics manufacturers will be affected by this law, except that they will no longer have to compete against manufacturers who abuse animals in pursuit of profits. We ask the committee to pass SB 345, SD2, with the proposed amendments. Mahalo for your consideration.

SB345, SD2 RELATING TO COSMETICS
House Committee on Agriculture
March 17, 2021, 10:00am State Capitol

Aloha Rep. Mark J. Hashem, Chair, Rep. Amy A. Perruso, Vice Chair, and Committee Members,

Down to Earth Organic and Natural testifies in support of SB345, SD2.

Down to Earth Organic and Natural has six locations on Oahu and Maui. Since we opened in 1977, we have supported healthy lifestyles and preservation of the environment by selling local, fresh, organic and natural products, and by promoting a healthy, plant-based and vegetarian lifestyle.

We are in support of SB345, SD2, banning the import for profit, sale, and offer for sale of any cosmetic in the State if the final product or any component of the final product was developed or manufactured using animal testing performed on or after 1/1/2022.

Down to Earth has been an all-vegetarian store since our first store opened over 40 years ago. We have become a hub for many Hawaii residents that are compassionate to all animals. We appreciate this opportunity to testify on behalf of these community members in support of this bill.

Testing cosmetics on animals involves rubbing the product into the eyes and skin, forced feeding, or "lethal dose" tests. The sale of cosmetics that have been tested on animals has been banned in the European Union, Israel, and India, showing that there are other alternatives. Additionally, all of the cosmetic and natural living products that we sell at our Down to Earth stores are "cruelty-free" and never tested on animals. Cruelty-free products are abundant and preferred by many of our customers.

Thank you for the opportunity to comment on this bill.

House Agriculture Committee

RE: SUPPORT FOR SB345 SD2; RELATING TO COSMETICS

Submitted By: Inga Gibson, Pono Advocacy, on behalf of Cruelty Free International
PonoAdvocacy@gmail.com, 808.922.9910

Dear Chair Hashem and Members of the House Agriculture Committee,

We respectfully urge your **support on SB345 SD2** which would prohibit the import for profit, sale, and offer for sale of any cosmetic in the State if the final product or any component of the final product was developed or manufactured using animal testing performed on or after 1/1/2022. Effective 1/1/2022.

We respectfully request one amendment as suggested by the Department of Health, to move the language of the bill to Chapter 321 rather than Chapter 328, per below:

Page 2, line 18 strike Chapter 328 and replace with 321: "§3218- Cosmetics; animal testing; prohibition.

Modern cosmetic safety testing standards and practices no longer require the use of animals. These new testing methods are also more reliable, effective and efficient. Four states, California, Nevada, Virginia and Illinois have already enacted this same legislation, along with more than 30 countries. Manufacturers have therefore already discontinued the cosmetic testing of new ingredients on animals. This measure would simply formally align Hawaii with this national trend.

Please see below letters of support from the Personal Care Products Council, representing more than 500 cosmetic companies and manufacturers nationwide, and an additional letter of support from The Body Shop, who is one of the hundreds of companies who have long discontinued the sale of cosmetic products tested on animals,

Please note that this bill:

Does NOT prohibit medical or research testing, only testing for cosmetics, and provides additional exemptions to prevent any potential conflict with any federal laws;

Does NOT impact retailers, only cosmetic manufacturers, who fully support this legislation.

Fortunately, there is currently no animal testing of cosmetics being performed on animals in Hawaii.

Thank you for your consideration of this testimony.

STATEMENT IN SUPPORT OF CFI/PCPC ANIMAL TESTING BAN AGREEMENT

In 2019, Cruelty Free International¹(CFI) and the Personal Care Products Council² (PCPC) forged a compromise agreement on state animal testing legislation. The model legislation will ban cosmetics products from being sold in states if those products or their ingredients have been tested on animals. The legislation makes necessary exceptions if, for example, the testing is mandated by federal, state or foreign regulators, and allows companies to rely on existing data from testing that was done to address regulatory requirements for non-cosmetic purposes under specific conditions.

Cosmetics and personal care products companies have been strong leaders in the search for and development of alternative cosmetics testing methods for safety assessments, and have worked with regulators in the U.S. and globally to gain acceptance of these methods. For nearly four decades, PCPC member companies have been at the forefront in significantly reducing the use of animals in product safety testing.

The legislation reflects months of discussions between PCPC and CFI, and represents a shared commitment to address the safety of humans and animals, while preserving access to so many products that consumers trust and rely on every day.

The cosmetics industry has long worked toward eliminating the use of animal testing, and this legislation is an effective measure that balances our common goal to make cosmetics animal testing obsolete globally.

Reviewed 1/13/2021

¹ Cruelty Free International is the leading organization working to create a world where nobody wants or believes we need to experiment on animals. Our dedicated team are experts in their fields, combining award-winning campaigning, political lobbying, pioneering undercover investigations, scientific and legal expertise and corporate responsibility. Educating, challenging and inspiring others across the globe to respect and protect animals, we investigate and expose the reality of life for animals in laboratories, challenge decision-makers to make a positive difference for animals, and champion better science and cruelty free living.

² Based in Washington, D.C., the Personal Care Products Council (PCPC) is the leading national trade association representing the global cosmetic and personal care products companies. Founded in 1894, PCPC's 600 member companies manufacture, distribute and supply the vast majority of finished personal care products marketed in the U.S. As the makers of a diverse range of products millions of consumers rely on and trust every day – from sunscreens, toothpaste and shampoo to moisturizer, lipstick and fragrance – personal care products companies are global leaders committed to product safety, quality and innovation.

January 27, 2021

Honorable Senate President Ronald Kouchi

cc. Honorable Committee Chair Senator Baker, Chang, Misalucha, Nishihara, Riviere, Buenaventura, Fevella.

RE: Strong Support for SB 345 Hawaii Cruelty Free Cosmetics Act

Aloha Senator Kouchi,

The Body Shop is pleased to support the Hawaii Cruelty Free Cosmetics Act (SB 345)

SB 345 will prohibit the sale of any cosmetic product that has been tested on animals after the date January 1, 2022 thus bringing Hawaii in line with California, Nevada and Illinois as well as with over 40 countries which already prohibit the sale of new animal-tested cosmetics.

As a company that has relied on non-animal safety tests to ensure our products meet cosmetic safety needs, we have direct experience with the utility and success of these modern approaches. With a plethora of ingredients available that have already been proven safe as well as the growth in modern non-animal safety tests available, there is no reason to test cosmetic products or ingredients on animals. Moreover, we know that being cruelty free is deeply important to our customers.

Eliminating the sale of animal tested cosmetics in Hawaii is a move that is welcomed by our company and one that will help the move the US in the right direction helping to ensure that animals are no longer harmed for the sake of cosmetics anywhere in the world.

We respectfully urge your support for SB 345.

Sincerely,

Nicolas Debray
President, Americas
The Body Shop

March 16, 2021

HOUSE COMMITTEE ON AGRICULTURE

Rep. Mark J. Hashem, Chair Rep. Amy A. Perruso, Vice Chair

RE: Support for SB 345 Hawaii Cruelty Free Cosmetics Act

Aloha Chair Hashem, Vice Chair Perruso, and Committee

On behalf of Cruelty Free International, I am pleased to support SB 345 Hawaii Cruelty Free Cosmetics Act, which will prohibit cosmetic manufactures from selling any cosmetic in the state if it was developed or manufactured using an animal test performed after the date of enactment.

The legislation makes exceptions for special safety concerns, drugs used in cosmetics, foreign testing requirements, and allows companies to rely on existing data from testing that was done to address regulatory requirements for non-cosmetic purposes under specific conditions. We worked very hard with industry stakeholders to reach an agreement on these points that consider the complexities of the industry while achieving a primary and shared goal of ensuring that cosmetics are not the cause of new animal testing.

Non-animal testing methods spare significant numbers of animals from pain, distress, and death. And crucially, non-animal testing methods have higher relevance for humans compared to tests in animals, and thus to ensure a better protection of human health. Not only do companies have these modern tests at their disposal they also have thousands of existing cosmetic ingredients with histories of safe use and existing safety data that can be utilized without further testing. Hundreds of successful cosmetics companies of all sizes now rely on non-animal testing methods and support globally consistent rules on this issue.

Passage of SB 345 would bring Hawaii in line with nearly 40 countries and now four US states [California, Illinois, Nevada and, recently, Virginia] that prohibit the sale of new animal-tested cosmetics. Moreover, ending animal testing for cosmetics is an issue that unites Americans across generations and political affiliations. A 2019 SurveyUSA poll revealed that nearly 8 out of 10 of poll respondents said that they would support a law that would prohibit animal testing for cosmetics. When broken down by self-reported party affiliation 83% of Democrats, 72% of Republicans, and 80% of Independents support or strongly support a law. Likewise, the poll revealed that there is no generational divide: 76% of those aged 50-64 said they are against animal testing for cosmetics, followed by 75% of those 65 and over, 72% of 34- to 49-year-olds and 65% of those aged 18-34.

History has shown that state activity often leads to changes at the federal level. State efforts on this issue have already and helped inform a way forward for the national approach as the agreements reached on state legislation were adopted into the federal Humane Cosmetics Act. The Hawaii Cruelty Free Cosmetics Act reflects the interests of industry, consumers and animal protection organizations and would make Hawaii one of the first states to create a cruelty free cosmetics market and help to move the rest of the nation in the right direction.

Sincerely

A handwritten signature in black ink, appearing to read "Monica C. [unclear]".

Head of Public Affairs -North America
Cruelty Free International

THE HUMANE SOCIETY
OF THE UNITED STATES

To: Representative Mike J. Hashem, Chair
House Agriculture Committee members

In Support Of: SB 345

Date: March 16, 2021

Testimony By: Lindsay Vierheilig, Hawaii State Director, The Humane Society of the United States

Dear Chair Hashem, Vice Chair Perruso, and members of the House Agriculture Committee,

I appreciate the opportunity to submit this written testimony on behalf of our Hawaii members and supporters urging the committee to pass SB 345, which prohibits a manufacturer from importing for profit, selling, or offering for sale in Hawaii any cosmetic, for which an animal test was conducted or contracted by or on behalf of the manufacturer, or any supplier of the manufacturer, on or after January 1, 2022.

There is strong corporate support for ending animal testing for cosmetics. SB 345 has received letters of support from Ao Organics, O'o Hawaii, Pure Mana Cosmetics, all cosmetics companies located in Hawaii (please see attached). In addition, the Humane Cosmetics Act, federal legislation to end the production and sale of animal-tested cosmetics, has been endorsed by more than 325 individual companies in the cosmetics industry and was introduced with the full support of the Personal Care Products Council, the largest cosmetics trade association representing approximately 600 companies in the United States.

In traditional animal tests, rabbits, guinea pigs, mice and rats have substances forced down their throats, dripped into their eyes, or smeared onto their skin before they are killed. These test methods are unreliable predictors of human safety. Different species can respond differently when exposed to the same chemicals. Consequently, animal tests may under- or over-estimate real-world hazards to people. In addition, results from animal tests can be quite variable and difficult to interpret.

Fortunately, animal testing for cosmetics is completely unnecessary. There are no animal testing requirements for cosmetic safety substantiation in the United States. Companies can already create great products using thousands of available ingredients that have a history of safe use and do not require new testing. For new ingredients where animal testing may currently be used, many non-animal methods have been, and continue to be, developed. Non-animal methods can combine human cell-based tests and sophisticated computer models to deliver human-relevant results at less cost and in less time than the animal tests.

SB 345 contains some exceptions that allow for sale of products with new animal testing under certain conditions including testing: (1) Required by a federal or state agency when there is a specific human health concern and there is no available alternative test or alternative ingredient; (2) Required by a foreign regulatory authority, if no evidence derived from such test was relied upon to substantiate the safety of a cosmetic sold within Hawaii; (3) Conducted on a product or ingredient classified as a drug by the Federal Food, Drug, and Cosmetic Act; and (4) Conducted for non-cosmetic purposes if no evidence derived from such test was relied upon to substantiate the safety of a cosmetic sold within Hawaii without documented evidence that the testing was done to satisfy non-cosmetic testing requirements and the ingredient was in use in a non-cosmetic

product for at least 12 months. These limited exceptions recognize the realities of chemical testing laws around the globe while also creating the incentive for cosmetic companies to push for the development and acceptance of additional non-animal test methods.

There has been a global trend toward eliminating cosmetic animal testing. In 2019, California became the first state in the country to ban the sale of cosmetics newly tested on animals followed by Nevada and Illinois in 2019. Most recently, Virginia became the fourth state in the country to pass a ban on the sale of animal-tested cosmetics. Historically, the European Union (EU) began the trend in 2013 by finalizing a ban on the sale of cosmetics tested on animals, creating the world's largest cruelty-free cosmetics marketplace. This ban compelled cosmetic companies around the world to end animal testing and invest in the development of non-animal alternatives instead. Similar bans have also been enacted in Israel, Norway, India, and Switzerland and are under consideration in several other countries. In order to sell their products in any of these countries, cosmetic companies must already comply with bans on animal testing.

The Humane Society of the United States urges the committee to pass SB 345 and help bring about an end to the use of animal testing in cosmetics.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lindsay Vierheilig".

RE: Support HB 1088 and SB 345

Dear Chairman Hashem and the members of the House Committee on Agriculture:

My name is Chelsa Davis and I am the owner, founder, and formulator of Ao Organics Hawai'i. We are a company located in Honoka'a that produces natural and organic skincare and body products. We would like to express our strong support of HB 1088 and SB 345 which would prohibit the sale of cosmetic products that have been tested on animals.

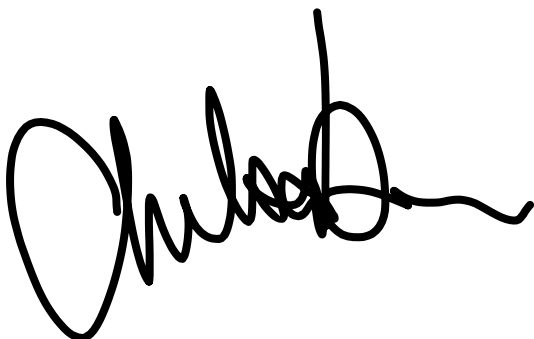

As a formulator, I can create innovative products using ingredients that have already been proven to be safe. In addition, for new ingredients, there are many non-animal methods available, which are more relevant to humans, faster and cheaper, that can be used for safety evaluations.

Hawaii has the opportunity to be a leader in creating a cruelty-free cosmetics market. Please support HB 1088 and SB 345.

Thank you.

Sincerely,

Chelsa Davis

Honolulu, HI 96813

January 31, 2021

RE: Please Support HB 1088 SB 345

Dear Chairman Gabbard Vice-Chair Nishihara, and the members of the Senate Committee on Agriculture and Environment:

My name is Holly Harding and I am the CEO of O'o Hawaii. We are a company that produces high quality, skincare products without the need for animal testing. We export our products all over the world including Korea, Japan, Hong Kong, Europe, Israel, India and Canada. I am writing to express my strong support of HB 1088 and SB 345 which would prohibit the sale of cosmetic products that have been tested on animals.

Animal testing for cosmetics is completely unnecessary. Cosmetics products can be created using thousands of ingredients that have already been proven to be safe. In addition, there are many non-animal test methods available that can be used for safety evaluations of new ingredients. These alternatives provide data that is more relevant to humans and offer savings in time and cost from traditional animal tests. In addition, most animals have a skin pH that is more neutral than humans at roughly a 7. Human skin is more acidic, thus making testing of human products on animals irrelevant.

More than 30 countries including the European Union, India, Israel, Norway and Switzerland have already banned production and sale of animal-tested cosmetics, and international companies must already be in compliance with bans in those countries. Laws to end the sale of animal-tested cosmetics have also passed in California, Nevada and Illinois. Passage of HB 1088 and SB 345 would help push for harmonization of U.S. cosmetic policy with these states and countries and facilitate the trade of safe and humane cosmetic products worldwide.

hawaii

**TESTIMONY OF TINA YAMAKI, PRESIDENT
RETAIL MERCHANTS OF HAWAII
March 17, 2021**

Re: SB 345 SD2 Relating to Cosmetics

Good morning Chair Hashem and members of the House Committee on Agriculture. I am Tina Yamaki, President of the Retail Merchants of Hawaii and I appreciate this opportunity to testify.

The Retail Merchants of Hawaii was founded in 1901, RMH is a statewide, not for profit trade organization committed to the growth and development of the retail industry in Hawaii. Our membership includes small mom & pop stores, large box stores, resellers, luxury retail, department stores, shopping malls, local, national, and international retailers, chains, and everyone in between.

We would like to offer some comments in regard to SB 345 SD2 Relating to Cosmetics. This measure bans the import for profit, sale, and offer for sale of any cosmetic in the State if the final product or any component of the final product was developed or manufactured using animal testing performed in a cruel manner on or after 1/1/2024. Effective 7/1/3021.

This measure would not only affect lipsticks, eye shadows, foundations and other make up products, but also perfumes, skin care (lotions and creams), hair care products, soaps, hair dyes, cleansing creams, sunscreen, shaving creams, powers, and nail polish to name a few.

Cosmetic brands like retailers want to be sure that the products that are sold to the consumer are safe to use. While we are aware that there are products out there that are cruelty free, we also are very much aware that many major brands after considering available alternatives, may determine that animal testing is necessary to assure the safety of a product or ingredient. Using animals to test cosmetics is one of the only ways to test the effects products have on the whole-body system. Complex issues still do not have a comprehensive and viable means of being tested outside of animals. Even with new technology like 3D printing of skin and chips that mimic the structure and function of human organs test only in part and not as a whole. In order for many of these companies to be "cruelty free" there has to be a lot more scientific and technology advancements. We are just not there yet.

This bill does affect retailers as we would not be able to continue to bring in brands if they test on animals. And we would like to point out that it will also not deter customers from purchasing their favorite brands. As we have seen in the past, if they cannot get it in the stores on our islands, they will shop for it online. And if manufactures around the world are no longer or have already stopped testing on animals, then this bill is not necessary.

Mahalo again for this opportunity to testify.
