TESTIMONY BY CRAIG K. HIRAI
DIRECTOR, DEPARTMENT OF BUDGET AND FINANCE
TO THE SENATE COMMITTEE ON WAYS AND MEANS
ON
HOUSE BILL NO. 1992, H.D. 3

April 8, 2022 10:30 a.m. Room 211 and Videoconference

RELATING TO THE ENVIRONMENT

The Department of Budget and Finance (B&F) offers comments on this bill.

House Bill No. 1992, H.D. 3, amends Sections 205-2 and 205-4.5, HRS, to allow compost and co-composting operations in agricultural districts and appropriates an unspecified amount in general funds in FY 23 to the Department of Health for 1.00 full-time equivalent Environmental Specialist IV position in the Solid and Hazardous Waste Branch.

B&F notes that, with respect to the general fund appropriation in this bill, the federal Coronavirus Response and Relief Supplemental Appropriations Act requires that states receiving Elementary and Secondary School Emergency Relief (ESSER) II funds and Governor's Emergency Education Relief II funds must maintain state support for:

 Elementary and secondary education in FY 22 at least at the proportional level of the state's support for elementary and secondary education relative to the state's overall spending, averaged over FYs 17, 18 and 19; and Higher education in FY 22 at least at the proportional level of the state's support for higher education relative to the state's overall spending, averaged over FYs 17, 18 and 19.

Further, the federal American Rescue Plan (ARP) Act requires that states receiving ARP ESSER funds must maintain state support for:

- Elementary and secondary education in FY 22 and FY 23 at least at the proportional level of the state's support for elementary and secondary education relative to the state's overall spending, averaged over FYs 17, 18 and 19; and
- Higher education in FY 22 and FY 23 at least at the proportional level of the state's support for higher education relative to the state's overall spending, averaged over FYs 17, 18 and 19.

The U.S. Department of Education has issued rules governing how these maintenance of effort (MOE) requirements are to be administered. B&F will be working with the money committees of the Legislature to ensure that the State of Hawai'i complies with these ESSER MOE requirements.

Thank you for your consideration of our comments.

Testimony COMMENTING on HB1992 HD3 RELATING TO THE ENVIRONMENT

SENATOR DONOVAN M. DELA CRUZ, CHAIR SENATE COMMITTEE ON WAYS AND MEANS

Hearing Date: 4/8/2022 Room Number: 211/Videoconference

- 1 **Fiscal Implications:** This measure may impact the priorities identified in the Governor's
- 2 Executive Budget Request for the Department of Health's (Department) appropriations and
- 3 personnel priorities.
- 4 **Department Testimony:** The Department offers comments on HB1992 HD3. This bill proposes
- 5 to 1) allow composting and co-composting in agricultural districts and 2) restore an
- 6 Environmental Specialist IV position to the Department's Solid and Hazardous Water Branch.
- 7 The Department defers to the Office of Planning and Sustainable Development and Department
- 8 of Agriculture regarding allowable activities in agricultural districts.
- 9 The Department supports the restoration of an Environmental Health Specialist (EHS) IV to the
- 10 Solid and Hazardous Waste Branch. However, because the EHS IV position was deleted by
- 11 Act 9, SLH 2020, we ask that the Legislature authorize the addition of a permanent EHS IV
- position and funding in the budget bill. The position that was lost was an inspector and
- 13 enforcement officer providing compliance inspections, investigations, and regulatory
- enforcement of alternative waste facilities such as composters and recyclers, as well as transfer
- stations, convenience centers, and household hazardous waste collection events. Other functions
- were complaint investigations, which included illegal dumping, as well as outreach education,
- 17 research into emerging contaminants or innovative technologies, and other special projects. We
- anticipate that this new replacement position will be providing similar duties.

- 1 Offered Amendments: None
- 2 Thank you for the opportunity to testify on this measure.

TESTIMONY OF PHYLLIS SHIMABUKURO-GEISER CHAIRPERSON, BOARD OF AGRICULTURE

BEFORE THE SENATE COMMITTEE ON WAYS AND MEANS

APRIL 8, 2022 10:30 A.M. CONFERENCE ROOM 211 & VIA VIDEO CONFERENCE

HOUSE BILL NO. 1992 HD3 RELATING TO THE ENVIRONMENT

Chairperson Dela Cruz and Members of the Committee:

Thank you for the opportunity to testify on House Bill No. 1992 HD3 that encourages the production of local compost and restores an environmental specialist IV position with the Department of Health. The Department of Agriculture supports the bill but has concerns regarding the unpermitted composting operations and composting of food waste.

Although the intent to encourage composting on small and medium scale operations is appreciated, the potential lack of adequate composting procedures may be detrimental to appropriately eliminate invasive pests, such as the coconut rhinoceros beetle or the little fire ant. We support the implementation of permitting procedures for small and large composting operations by the Department of Health to ensure mitigation of adverse impacts from invasive pests that are attracted to inadequately processed compost.

Food waste that is a byproduct of food services from small businesses, restaurants, and resorts is a valuable food resource for swine operations across the

State. The rapid onset of the pandemic and the sudden reduction in supply of food waste created a severe shortage of food waste that critically impaired the ability of small hog farms in remote and rural communities to sustain their operations. The Department is concerned that encouraging or requiring composting of this food waste may create a shortage of food resources for hogs especially in underserved rural communities and conflict with existing county waste recycling programs such as Honolulu's food waste recycling ordinance (Section 9-3.5, ROH).

The Department defers to the Department of Health about the full-time environmental health specialist IV position.

Thank you for the opportunity to comment on this measure.

April 7, 2022

Sen. Donovan Dela Cruz, Chair Sen. Gilbert Keith-Agaran, Vice Chair; and Members of the Senate Committee on Ways and Means

Chair Dela Cruz, Vice Chair Keith-Agaran, and Committee Members,

Thank you for scheduling a hearing for this bill in your Committee.

The Department of Environmental Management of the County of Hawai'i strongly encourages the committee to **support HB 1992, HD3**. The bill's intent is in concurrence with our County's efforts associated with the U.S. Economic Development Administration's (EDA) Build Back Better Regional Challenge. The County of Hawai'i was fortunate to be one of 60 regional cluster finalists (out of more than 520 applicants) selected in 10 different clusters. Our efforts are focused on creating a strong agricultural economy that corrects past systemic barriers to growth that are unique to an island market, while also helping Hawai'i Island respond to economic downturns due to the pandemic and natural disasters.

Composting is a robust means to mitigate climate change, save valuable landfill space, support local farmers/ agriculture, and build resilience for our island home, especially in light of the recent supply chain issues we are currently experiencing. We must support our farmers to enable them to lessen our dependence on food shipped from outside the State of Hawai'i. This everincreasing volatility in the supply chain can be mitigated in part by supporting our farmers through increasing composting through this legislation.

Again, thank you for the opportunity to provide support for HB 1992, HD3.

Sincerely,

Ramzi Mansour

Director, Department of Environmental Management

COUNTY OF MAUI DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

2145 KAOHU STREET, SUITE 102 WAILUKU, MAUI, HAWAII 96793

April 6, 2022

TESTIMONY OF TAMARA L. FARNSWORTH COUNTY OF MAUI, MANAGER OF ENVIRONMENTAL PROTECTION & SUSTAINABILITY DIVISION

BEFORE THE SENATE COMMITTEE ON WAYS AND MEANS Friday, April 8, 2022, 10:30 a.m. Via Videoconference

In consideration of **HOUSE BILL 1992 HD 3 RELATING TO THE ENVIRONMENT**Honorable Donovan M. Dela Cruz, Chair
Honorable Gilbert S.C. Keith-Agaran, Vice Chair
Honorable Members of the Committee on Ways and Means

Mahalo nui loa for scheduling this bill for hearing in the Ways and Means Committee. The County of Maui Department of Environmental Management stands in <u>STRONG SUPPORT of HB1992 HD 3</u> which would allow for composting and co-composting in agriculturally-zoned districts and restores a regulatory position within the Department of Health.

The County of Maui is facing urgent and significant challenges in siting a new municipal compost facility due to these land-use restrictions. Rezoning and permitting of the agricultural lands will take up to seven or more years. Allowing for composting and co-composting on these agricultural lands would enable the county to start permitting and building a new compost facility within a few years, diverting tens of thousands of tons of green and organic waste and providing a needed resource to the community. Allowing for composting on agricultural lands will help to boost Maui's local economy and agricultural production, while enabling the counties and community to recycle their organic wastes.

Compost is an agricultural product and its production should be allowed as an agricultural activity. Along with agriculture, farming, fishing, and hunting, currently activities such as "wind-generated energy," "biofuel production," "solar energy facilities," "wind machines and wind farms," "geothermal resources exploration and ...development," "hydroelectric facilities," and "construction and operation of wireless communications antennas" are allowable in agriculturally-zoned districts; but not the composting of greenwaste and organic materials. This bill would simply allow for composting to be added to the list of allowable activities on agricultural land.

TESTIMONY OF TAMARA L. FARNSWORTH HB 1992 HD 3 April 8, 2022 Page 2 of 2

Changing the zoning allowance will not change the requirements for Department of Health regulations; instead, it will simply allow for composting and co-composting on agriculturally-zoned lands. Composting is a highly regulated activity for significant public health and environmental concerns, and requires a great deal of oversight and application of stringent regulations.

Therefore, we also support additional staff for the Department of Health Solid and Hazardous Waste Branch which will provide increased oversight of small-scale as well as municipal-scale composting programs. However, we would still support the bill if this provision was removed.

We respectfully urge this committee to pass HB1992 HD 3.

Thank you for the opportunity to provide testimony on this important issue.

SOLID WASTE MANAGEMENT DIVISION

DEPARTMENT OF PUBLIC WORKS
TROY TANIGAWA, ACTING COUNTY ENGINEER
MICHAEL H. TRESLER, ACTING DEPUTY COUNTY ENGINEER

Testimony of Allison Fraley

Solid Waste Program Coordinator County of Kaua'i Department of Public Works

Before the Senate Ways and Means Committee

Friday, April 8, 2022 10:30 AM In Conference Room 211 and Via Videoconference

In consideration of
House Bill 1992 HD3
Relating to the Environment

Honorable Chair Dela Cruz and Vice Chair Keith-Agaran and Members of the Committee:

The County of Kaua'i Department of Public Works submits testimony **in support** of House Bill 1992 HD3 which permits composting and co-composting operations in agricultural districts and appropriates funds to restore an Environmental Health Specialist IV position to the Solid and Hazardous Waste Branch of the State Department of Health (DOH).

As the municipal solid waste managers for Kaua'i, our department fully supports composting and cocomposting facilities on Kaua'i and throughout the State. These facilities sequester carbon, create nutrient rich natural material, and have the potential to significantly reduce material going to landfills. Here on Kaua'i we are rapidly approaching the end of life of our only landfill and are facing closure and re-siting. Expanding composting opportunities is a viable way to extend landfill life.

We also support hiring DOH Solid and Hazardous Waste Branch staff to support their work in managing this program, but if this position was not made available, the County of Kaua'i still supports the bill and the positive impacts it will have on our State.

We respectfully ask that this committee pass House Bill 1992 HD3.

Re: Hearing HB1992 HD3 RELATING TO THE ENVIRONMENT.

Hearing: Friday, April 8, 2022, 10:30 a.m., CR 211 and by videoconference

Aloha Chair Dela Cruz, Vice Chair Keith-Agaran, and Members of the Committee on Ways and Means:

The Climate Protectors Hawai'i is a group focused on reversing the climate crisis and encouraging Hawai'i to lead the world towards a safe and sustainable climate and future. The Climate Protectors Hawai'i SUPPORTS HB1992 HD3!

This bill would permit more composting and sustainable and regenerative agriculture Hawai'i, which would reduce greenhouse gas emissions (especially methane) and provide more healthy soil for local agriculture.

This bill would help achieve those goals by **allowing composting and co-composting operations in agricultural districts** under certain conditions, and it appropriates funds for a position at the DOH to assist in implementation.

Please pass this important bill to help farmers and reduce greenhouse gas emissions!

Mahalo!

Comments:

Support composting which helps elimate GHG and improves soil for more productive growing and helps sequester carbon. Allowing in agriculture districts makes sense - where there is an abundance of green waste that can be kept out of the landfill and made into a product that is used by the farmers. Regulations and oversight can eliminate any concerns about safety.

To: The Senate Committee on Ways and Means From: Sherry Pollack, Co-Founder, 350Hawaii.org

Date: Friday, April 8, 2022, 10:30 am

In support of HB1992 HD3

Aloha Chair Dela Cruz, Vice Chair Keith-Agaran, and Committee members of Ways and Means,

I am Co-Founder of the Hawaii chapter of 350.org, the largest international organization dedicated to fighting climate change. 350Hawaii.org is in **support of HB1992 HD3** which permits composting and co-composting operations in agricultural districts under certain conditions.

Composting is an important factor in regenerative agriculture that helps build soils and sequester carbon, all of which we must do more of to address the climate crisis. That is why it is important that we remove barriers to allow for composting and co-composting in agriculturally-zoned districts.

Allowing composting in agricultural districts will facilitate production of local organic material that farmers can use to improve soil health, increase drought resistance, and reduce the need for supplemental water and fertilizers while also increasing crop yields. Composting will also reduce carbon dioxide and human-made methane emissions, which are greenhouse gasses that contribute to climate breakdown.

Please pass this important legislation. We will all benefit!

Mahalo for the opportunity to testify.

Sherry Pollack Co-Founder, 350Hawaii.org

Environmental Caucus of The Democratic Party of Hawaiʻi

To: The Honorable Donovan M. Dela Cruz, Chair

The Honorable Gilbert S.C. Keith-Agaran, Vice Chair

Committee on Ways and Means

Re: HB 1992, HD 3 RELATING TO THE ENVIRONMENT

Hearing: Friday, April 8, 2022, 10:30 p.m., Conference Room 211, via Videoconference

Position: **Strong Support**

Aloha, Chair Luke, Vice Chair Yamashita, and Members of the Committee on Finance:

The Environmental Caucus of the Democratic Party of Hawai`i stands in strong support of HB 1992, HD3. This measure would permit composting and co-composting operations in agricultural districts, under certain conditions. This bill would also appropriate funds to establish an environmental health specialist IV position to the Solid and Hazardous Waste Branch of the Department of Health.

We believe that allowing composting in agricultural districts will facilitate the production of local organic material that farmers can use to improve soil health, increase drought resistance, and reduce the need for supplemental water and fertilizers while increasing crop yields, all of which are very important as we deal with the climate crisis.

Composting is a resource that has been missing as the result of an onerous permitting process which should be eliminated or reduced. Composting of food waste and green waste is the last area of waste management that needs to be addressed and made available to eliminate unnecessary landfill use.

In addition, we believe that an environmental health specialist IV position is necessary to facilitate and expedite the permitting process for small-scale composters.

We believe this bill to be highly beneficial; accordingly, we respectfully request that this bill be passed by your committee.

Mahalo for the opportunity to testify,

From: Zero Waste Hawai'i Island

Re: Hearing HB1992 HD3 RELATING TO THE ENVIRONMENT

Tuesday April 5th, 2022 pm, by videoconference

Aloha Chair Dela Cruz, Vice Chair Keith-Agaran, and members of the Senate Ways and Means Committee,

Thank you for scheduling a hearing for HB1992 HD3. We are in **strong support** of this bill which permits composting on agricultural land and appropriates funds to DOH to hire additional personnel to handle permitting of compost facilities. Diversion of organic waste from landfilling and incineration is a logical and low hanging fruit starting point to make better use of our resources. As local agriculture ramps up our need to utilize organic matter is vital to create soil amendments. Likewise, when organic waste is landfilled, it produces methane, a powerful greenhouse gas; but when composted carbon is sequestered in the soil and will help in the mitigation of climate change.

Hawaii is in dire need to update permitting requirements to remove barriers preventing facility operators from processing and composting organic waste. Lengthy wait times for permit approval due to lack of staff in DOH has also been a major stumbling block preventing proper usage of this resource. HB1992 HD3 is a simple first step in reforming our policies and providing personnel for DOH. I urge the WAM committee to please pass this bill!

Mahalo nui loa,

Comments:

Aloha Honorable Chair Dela Cruz, Vice Chair Keith-Agaran and Members of the Committee,

I am writing to request your support for HB 1992. This is the most important bill relating to composting that has been heard in the last 2 years.

On Maui, we are in a dire situation with composting. For the last two years over ninety-five percent (over 40,000 tons per year) of the island's green waste is being shredded and added to our landfill, or illegally dumped, which is both an invasive species and fire hazard. One hundred percent of our food waste and compostable food service ware is also being added to the landfill, creating toxic greenhouse gasses. These three valuable feedstocks could not only be removed from our waste stream completely, greatly extending the life of our landfill, but could be made into a valuable resource our island so desperately needs. Currently, we are unable to produce the compost that our residents and agricultural businesses on Maui need in order to create the proper growing conditions for healthy crops. Allowing for composting as an agriculture zoned activity is the first and most important step towards having county-made soil amendment products that we all need if we are ever going to reach the state wide goals for food security.

Is is very important to note that allowing composting as an ag zoned activity does not have anything to do with the Department of Health (DOH) permit requirements. To have any type of food waste composting operation, the business still has to go through the arduous (and necessary) requirements of obtaining a DOH composting permit for any and all types of feedstocks and technology. House Bill 1992 does not have any kind of negative impacts on environmental or human health and safety. The DOH current permitting process vets all angles of potential environmental and public health hazards with a fine tooth comb. Having been through this process myself, I appreciate how much time and expertise is put into the DOH permit process. We can have total faith in them to keep our environment, our water, and our people safe from any types of hazards that could possibly result from inadequate composting operations. They would never allow for it, their expertise in all of those areas is far too great.

In addition, there has been a critique of composting in general, and although this bill simply allows for composting in Ag zoned areas and is not meant to discuss the merits of compostiong itself, I feel it needs to be addressed. Food waste makes up 26% of our entire waste stream, with green waste comprising more than 30%, and our single use compostables stream (especially during covid) adding another 5% to the entire waste stream. All of these things are compostable

in a proper composting facility, meaning over 60% of everything that is currently being landfilled in Maui county could be turned into compost. As composters, we follow the EPA food waste hierarchy, which always puts food for animals above food waste for composting. The critique of "composting takes food waste from the pig farmers" is erroneous for several reason: #1 there is PLENTY of food waste to go around. There is enough to feed all the pigs and feed the permitted composting facilities at the same time (currently only West Maui Green Cycle is permitted to accept food waste on Maui). #2 Composting can deal with all the food waste that pigs cannot eat, which includes a lot of the post consumer waste from restaurants, schools and hotels. And #3, composters strive to work WITH the pig farmers, and with the proper collection infrastructure, we can actually collect more food to distribute to both the pig farmers and use it for composting, maximizing food waste diversion overall. We need all the solutions, and it is entirely possible to work together to make sure all of our community's needs are met.

Please support composting as an Agricultural Zoned activity. This legislative process is the only way to change this designation. The entire future of agriculture and sustainability in Maui county is counting on you all to make this incredibly important change (no pressure :D)

Mahalo nui loa,

Gretchen Losano

Owner, West Maui Green Cycle

April 8, 2022

HEARING BEFORE THE SENATE COMMITTEE ON WAYS AND MEANS

TESTIMONY ON HB 1992, HD3 RELATING TO THE ENVIRONMENT

Conference Room 211 & Videoconference 10:30 AM

Aloha Chair Dela Cruz, Vice-Chair Keith-Agaran, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports the intent of HB 1992, HD3, which permits composting and co-composting operations in agricultural districts under certain conditions and appropriates funds to restore an environmental health specialist IV position to the solid and hazardous waste branch of the department of health.

HFB recognizes and supports the diversion of discarded food and other useful wastes away from landfills. We support well-managed and appropriately sited composting efforts that produce a valuable resource for farmers and others. The benefits of compost are well-known; among other things, it can improve soil health, reduce greenhouse gas emissions, recycle nutrients, and mitigate the impact of droughts.

However, because there are potential hazards and threats to public health, the environment, agriculture, and our rural communities from *unregulated* composting operations, HFB feels strongly that *no commercial composting facility or operation* should be exempt from DOH regulatory oversight, appropriate restrictions, inspection, and control. The smaller size of an operation does not eliminate the valid concerns regarding public health and it certainly does not prevent the spread of destructive invasive species such as Little Fire Ants and Coconut Rhinoceros Beetle.

While we support composting, we defer to the expertise of the Hawai'i Department of Health and Department of Agriculture regarding the appropriate level of oversight necessary to operate a composting facility while also protecting farmers and the general community from potential fires, the spread of pathogens, and devastating invasive species, and environmental contamination.

Thank you for your continued support of Hawai'i agriculture.

Senate Committee on Ways and Means

Hawai'i Alliance for Progressive Action (HAPA) Supports: HB1992 HD3

Friday, April 8th, 2022 10:30a.m. Conference Room 211

Aloha Chair Dela Cruz, Vice Chair Keith-Agaran and Members of the Committee,

HAPA supports HB1992 HD3 which will permit composting and co-composting operations in agricultural districts. Appropriates funds to restore an environmental health specialist IV position to the solid and hazardous waste branch of the department of health.

HAPA supports efforts to reduce landfill waste, increase composting, address climate change and support regenerative agriculture. By expanding composting, which can divert up to 54% of household waste from the landfill and create rich fertilizer for healthy, nutritious plants.

HAPA believes that HB1992 HD3 is part of the solution to establishing a sustainable, profitable and regenerative agriculture system for Hawai'i while improving our land management practices and our environment.

Through encouraging on-site composting on agricultural lands, food producers have the added benefit of avoiding the costs associated with hauling waste to another location for recycling or disposal as well as reducing costs of inputs such as fertilizer or compost.

Keeping organic matter out of the landfill will reduce carbon dioxide and human-made methane emissions, which are greenhouse gasses that contribute to climate change and are also a critically important part of regenerative agriculture.

Please support HB1992 HD3. Thank you for your consideration.

Respectfully.

Anne Frederick Executive Director

Dear WAM Chair Delacruz and committee members,

I am strongly in favor of Bill HB1992 that encourages the process of composting on local farms and appropriates funds to hire an Environmental Health Specialist IV to oversee the program. Composting can help reduce farm costs (less need for fertilizers, pesticides and other soil amendments), the soil retains more water, produce is healthier in better soil and composting encourages the forming of small businesses.

For all these reasons I urge you to support Bill HB1992 HD3.

Thank you for your consideration.

Sincerely,

Jan Pappas
