

SPECIAL COMMITTEE REPORT

Spec. Com. Rep. No. 1

Your Committee on Credentials begs leave to report that it has examined the Certificates of Election of the Senate of the Twenty-Fourth Legislature of the State of Hawaii, Regular Session of 2007, and finds that the following persons have been legally elected and are fully qualified to sit as members of the Senate.

The newly elected Senators whose respective terms of office will expire on November 2, 2010, are:

Second Senatorial District

Russell S. Kokubun

Fourth Senatorial District

Shan S. Tsutsui

Eighth Senatorial District

Sam Slom

Ninth Senatorial District

Les Ihara, Jr.

Tenth Senatorial District

Brian T. Taniguchi

Eleventh Senatorial District

Carol Fukunaga

Thirteenth Senatorial District

Suzanne N.J. Chun Oakland

Fourteenth Senatorial District

Donna Mercado Kim

Fifteenth Senatorial District

Norman Sakamoto

Nineteenth Senatorial District

Mike Gabbard

Twentieth Senatorial District

Will C. Espero

Twenty-Fourth Senatorial District

Jill Tokuda

Twenty-Fifth Senatorial District

Fred Hemmings

Signed by Rosalyn H. Baker, David Y. Ige and Paul Whalen.

INTERIM SPECIAL COMMITTEE REPORTS

Spec. Com. Rep. No. 1

Your Joint Legislative Committee on Family Caregiving, created pursuant to Act 285, Session Laws of Hawaii 2006, and having been directed to report to the Legislature by S.B. No. 3253, S.D. 1, H.D. 1, C.D. 1 (2006), entitled:

“A BILL FOR AN ACT RELATING TO CAREGIVING,”

begs leave to report as follows:

PART I. BACKGROUND**Introduction**

Family caregiving has always been a universal experience of all ethnicities, lifestyles, and income levels. Recently, however, caregiving of family elders has become more than an act of love and familial responsibility. Due to a shortage of care providers in Hawaii, family caregiving has become a critical element of our health and long-term care system. By 2020, more than one in four individuals is expected to be sixty years old or older. The need for personal care assistance due to physical, sensory, cognitive, and self-care disabilities increases with age. As Hawaii's

population ages, many more families will be providing higher levels of long-term care to frail and disabled older adults at home. A comprehensive public policy to strengthen support for family caregivers is essential.

Legislative Mandate

Your Joint Legislative Committee (JLCFC) was created by Senate Bill No. 3253, S.D. 1, H.D. 1, C.D. 1, which was enacted as Act 285, Session Laws of Hawaii (SLH) 2006. The JLCFC members are: Senator Les Ihara, Jr. and Representative Marilyn B. Lee, Co-Chairs; Senators Rosalyn Baker, Suzanne Chun Oakland, and Gordon Trimble; and Representatives Josh Green, M.D., and Alex Sonson. Former Representatives Dennis A. Arakaki and Anne V. Stevens have also served on the JLCFC.

Act 285, SLH 2006, directed the JLCFC to develop a comprehensive public policy to strengthen support for family caregivers who provide unpaid, informal assistance to persons age sixty and older with physical or cognitive disabilities. At the request of several testifiers, the JLCFC clarified that the definition of family caregivers included non-family members who are often friends, neighbors or good Samaritans. The JLCFC was also directed to consider providing support in categories including:

- (1) Coordinated services and policies;
- (2) Training and education;
- (3) Respite services;
- (4) Financial incentives; and
- (5) Balancing work and caregiving.

The JLCFC was directed to seek input from the Department of Health, Department of Human Services, Department of Taxation, University of Hawaii, Executive Office on Aging, and the elderly, disability, business, and faith-based communities. The JLCFC was also directed to submit its findings and recommendations to the Legislature no later than twenty days prior to the convening of the Regular Session of 2007.

Approach of the JLCFC

The JLCFC met for informational briefings on September 27, October 3, October 18, November 1, and November 16, 2006. In addition, the JLCFC met with the Legislature's Kupuna Caucus for a joint informational briefing on November 3, 2006, and held meetings on November 17 and December 13, 2007.

The JLCFC conferred with all of the organizations as directed by Act 285, SLH 2006. Input was obtained from individual members of the public and representatives of the following organizations: Department of Health; Department of Human Services; Department of Taxation; Executive Office on Aging (EOA); Policy Advisory Board for Elder Affairs; University of Hawaii at Manoa, School of Social Work; University of Hawaii at Hilo; State Council on Developmental Disabilities; University of Hawaii Community College System; City and County of Honolulu, Elderly Affairs Division; County of Hawaii, Office of Aging; County of Maui, Office on Aging; County of Kauai Agency on Elderly Affairs; Hawaii Caregiver Coalition; Hawaii Alliance for Retired Americans; AARP Hawaii; Project Dana; Aging and Disability Resource Center; Alzheimer's Association, Aloha Chapter; ARC in Hawaii; Child & Family Service; Chamber of Commerce of Hawaii, Health Committee; National Federation of Independent Businesses; Society of Human Resource Management; Faith Action for Community Equity; Catholic Charities Hawaii; Hawaii Conference United Church of Christ and Church of the Crossroads; Muriel Sisters; Kilohana Adult Day Care Program; National Alliance on Mental Illness Oahu; Mental Health Association in Hawaii; Goodwill Industries of Hawaii; Queen Lili'uokalani Children's Center; and Brain Injury Association of Hawaii.

In addition, the JLCFC obtained input from unpaid, individual family caregivers representing the following family caregiver categories: older adult family caregiver taking care of an older adult; family caregiver who does not live with the care recipient; family caregiver who is employed; family caregiver who is taking care of someone at end-of-life; family caregiver taking care of someone with Alzheimer's Disease; family caregiver taking care of multiple care recipients; family caregiver support group facilitator; and long-distance family caregiver. The JLCFC also heard testimony from representatives of the following programs currently in place in other states: Oregon's Lifespan Respite Care System, Minnesota's Alternate Care Program, the California Paid Family Leave Program, and the Virginia Caregivers Grant Program.

The JLCFC is aware that Senate Concurrent Resolution No. 13 (2006) is related to Act 285, SLH 2006, as it requests the Governor to convene a Work-Family Task Force to review Hawaii's work-family laws and policies, and requests the Legislative Reference Bureau (LRB) to study other states' laws and practices that promote good work-family policy. Therefore, the JLCFC obtained input from a member of the Governor's Long Term Living Initiative Subcommittee on Family Caregivers, as well. As of the time this report was written, the LRB study was not available for publication.

PART II. SUBSTANTIVE ISSUES

The JLCFC adopted a policy of determining what the State can do to foster a person's ability to age-in-place, particularly through the support of family caregivers. After hearing all of the testimony presented, and cognizant of its direction to consider providing support in the categories designated in Act 285, SLH 2006, the JLCFC also adopted a policy of establishing a comprehensive and sustainable, community-based family caregiver support system to maximize resources in all communities.

The JLCFC envisions a comprehensive and sustainable, community-based family caregiver support system that has components including:

- (1) A coordinated referral and case management service;
- (2) Centralization of available services;
- (3) Volunteers;
- (4) Education and training; and
- (5) Financial assistance.

In making its recommendations, the JLCFC focused on addressing the immediate needs of family caregivers, as well as, facilitating the development of a comprehensive, community-based family caregiver support system by recommending measures that will contribute to that goal.

Finding A: In 2003, the *Hawaii Health Survey* reported that an estimated 192,390 individuals in the State provide regular care or assistance to a person aged sixty years or older. The figure may be higher as testifiers noted the possibility of many “hidden” family caregivers in Hawaii who do not identify themselves as family caregivers. According to a publication by the EOA entitled *Family Caregivers: A Summary of National and Local Data, December 2004*, the EOA “has been sponsoring collection of a limited number of data elements on caregiving through the Hawaii Health Survey.” While the EOA’s data collection yields helpful family caregiving data, it is still necessary to gather more information on this subject to enable the State to apply resources and services in a more efficacious manner.

Recommendation A: The JLCFC recommends that a comprehensive needs assessment be conducted to determine, among other things, the size of the current family caregiver population, extent of unmet caregiving needs of elders, what percentage of care recipients’ needs being met by paid versus family caregivers, and the impact of family caregiving on employment and the family caregiver’s income. The comprehensive needs assessment should identify past surveys, such as the 2003 *Hawaii Health Survey*, and include focus groups. The needs assessment may include a telephone survey or other method for gathering reliable data regarding family caregivers’ needs, such as, adding additional family caregiving questions to the upcoming *Hawaii Health Survey*. Policy questions should be developed to guide the needs assessment. The findings of the needs assessment can be used to facilitate the development of a comprehensive and sustainable, community-based family caregiver support system.

Finding B: For many family caregivers, their role as family caregiver arises as suddenly as the care recipient’s health declines, leaving the family caregivers with an immediate need for services, but little preparation or education regarding who to contact for assistance or what services are available to them. In addition, the family caregivers may not know who is capable or qualified to provide them with the services that they or the care recipients need. The testimony revealed that family caregivers would benefit from a single point of access system that coordinates services and policies, and that provides referrals to services and providers. Also, family caregivers themselves need support services, including respite services and training, education, and counseling on areas such as caregiving and dealing with end-of-life issues.

Recommendation B: The JLCFC recommends that:

- (B1) The work of the JLCFC be extended for one year beyond its sunset date of June 30, 2007, to develop a comprehensive and sustainable, community-based family caregiver support system. The JLCFC should focus on how the Hawaii Aging and Disability Resource Center (ADRC) can serve as a single-entry, one stop source for family caregiver services and referrals in Hawaii County (where it currently being developed), as well as, in the other counties. The JLCFC should consider how successful service referral models, such as, the Palolo Chinese Home HiNOA Program and the Beacon Hill Village concierge service in Boston, Massachusetts can be expanded or replicated to provide similar referral services in Hawaii communities. The JLCFC should also monitor any pilot programs recommended herein and report on their possible integration into a comprehensive, community-based family caregiver support system;
- (B2) A pilot program be established and funded to reimburse family caregivers who provide free and continuing day-to-day care in the home to a qualified relative who is a functionally dependent person or who is suffering from cognitive impairment. The pilot program should include a report to the Legislature on the outcomes and costs of the pilot program;
- (B3) A volunteer-hours exchange pilot program be established and funded to develop a Hawaii community model based on volunteer credit banking programs on the mainland and in other countries. The pilot program should include a report to the Legislature on the outcomes and costs of the pilot program;
- (B4) A pilot program be established and funded to provide emergency and evening respite services. The pilot program should include a report to the Legislature on the outcomes and costs of the pilot program;
- (B5) During the 2007 legislative interim, the JLCFC explore a paid family leave program under the state Temporary Disability Insurance Law, similar to the California Paid Family Leave Program, to provide wage replacement benefits to employees who take time off from work to care for a seriously ill family member; and
- (B6) Support be given to including an appropriation in the Executive Budget for the UH Center for Aging Research and Education (CARE) to transition from a volunteer staff to a paid director and paid faculty to establish a bonafide research and training center.

Finding C: There is an immediate need to expand in-home services (e.g., housekeeping, bathing services, home-delivered meals, etc.) and access services (e.g., transportation, case management, escort, etc.), both on Oahu, and particularly on the neighbor islands, to facilitate family caregiving and aging-in-place. Most of the family caregivers and others who testified noted an immediate need for financial assistance, as well. Many family caregivers are faced with the difficult choice of continuing employment or leaving work to care for a family member. This places a financial strain on the family caregiver. However, the State benefits from the value of the services that family caregivers provide to care recipients by way of deferred paid caregiving and institutionalization. According to *Family Caregivers: A Summary of National and Local Data, December 2004*, one study “estimated that approximately 115,000 family caregivers in Hawaii provided personal care to persons aged 15 years old and older, for a total of approximately 107 million hours, resulting in an estimated economic value of caregiving of approximately \$875 million per year.”

Recommendation C: The JLCFC recommends that:

- (C1) An appropriation be made to Kupuna Care to expand its in-home and access services statewide and to add the flexibility to provide services to the caregivers of the qualified care recipients, as well;
- (C2) An appropriation be made for the Sage PLUS Program to expand its health insurance information, counseling, and referral services to the neighbor islands and to support its operating costs;
- (C3) Proposed federal funding cuts to successful, established programs be monitored to determine if alternative sources of funding are necessary to maintain the programs;
- (C4) A tax credit be provided for the cost of home modifications to enable the family caregiver to better assist the care recipient in the home;
- (C5) A narrow tax credit, a grant-in-aid to the counties, or a “cash and counseling” model be explored to address family caregivers’ present needs. Any tax credit, grant, or “cash and counseling” model should be targeted to a specific population and should include a mechanism for supporting family caregivers’ purchase of “quality-of-life” items for the care recipient (e.g., adult incontinence products, lotions, etc.); and

(C6) A resolution be passed requesting the Board of Professional Engineers, Architects, Surveyors and Landscape Architects at the Department of Commerce and Consumer Affairs promote awareness of family caregiving needs in the architectural design of new residences.

Finding D: Numerous testifiers appeared on behalf of grandparents in support of recognizing their role as family caregivers for their grandchildren. As the JLCFC's was directed to focus on family caregivers who provide unpaid, informal assistance to persons age sixty and older with physical or cognitive disabilities, this group fell outside the scope of this report. However, it should be noted that the National Family Caregiver Support Program under the reauthorized Older Americans Act is available to family caregivers of older adults age sixty and older, as well as grandparents of children age eighteen years and younger.

Recommendation D: The JLCFC recommends that the definition of family caregiver be amended to include this population of family caregivers, as well.

Finding E: Local communities must be prepared to accommodate their aging population. Planning should be done now to accommodate "aging in place" in the community and to accommodate those facilities and services that will make aging in place possible. Local governments should review existing policies, programs, and services that affect the aging population and aging services and develop an "aging in place" in the community plan.

Recommendation E: The JLCFC recommends that the counties examine current zoning laws, building codes, and subdivision requirements and eliminate encumbrances to family caregiving and aging in place as may be appropriate to prepare to meet our aging population's needs.

PART III. CONCLUSION

The JLCFC recommends that legislation be introduced in the 2007 legislative session to implement the recommendations outlined in this report. Co-chairs Senator Les Ihara, Jr. and Representative Marilyn B. Lee, and other members of the JLCFC will jointly sponsor the necessary legislation.

Signed by Senator Les Ihara, Jr., and Representative Marilyn Lee, Co-Chairs on behalf of the Committee.

Committee members: Senators Les Ihara, Jr., Rosalyn H. Baker, Suzanne Chun Oakland, Gordon Trimble; Representatives Marilyn B. Lee, Josh Green, M.D., Alex M. Sonson.

Spec. Com. Rep. No. 2

Your Committees on Human Services of the Senate and House of Representatives, to which was referred S.C.R. 52, S.D. 1 (2006), entitled:

"SENATE CONCURRENT RESOLUTION REQUESTING THE COMMITTEES ON HUMAN SERVICES OF THE SENATE AND HOUSE OF REPRESENTATIVES TO CONVENE INTERIM HEARINGS ON THE USE OF LEGAL INTERVENTIONS AVAILABLE TO THE FAMILY COURT."

beg leave to report as follows:

PART I. BACKGROUND

Introduction

In the 2004 Regular Session, the Senate adopted Senate Resolution No. 40 authorizing the Senate Committee on Human Services to convene interim hearings on the Hawaii Family Court. The purpose of the interim hearings was to explore ways to:

- (1) Make the Family Court more accessible, family oriented, and focused on reduction in caseload;
- (2) Limit the long-term use of interventions such as temporary restraining orders and protective orders;
- (3) Ensure greater accountability of court-appointed personnel such as custody evaluators and guardians ad litem; and
- (4) Reduce the needless expenditure of time and money on counterproductive litigation relating to child custody.

During the course of those interim hearings, task force groups were formed and submitted their findings and recommendations to the Senate Committee on Human Services. Some of the recommendations were adopted and received legislative attention, but there were still issues that remained unresolved.

Legislative Mandate

In order to continue work on the unresolved issues, the Senate and the House of Representatives adopted S.C.R. 52, S.D. 1 (2006), authorizing the Committees on Human Services of the Senate and the House of Representatives to convene interim hearings on the use of legal interventions available to the Family Court, including:

- (1) An assessment of the caseload;
- (2) The long-term use of temporary restraining orders;
- (3) The selection, use, and accountability of custody evaluators, guardians ad litem, factfinders, parenting coordinators, and other court-appointed personnel;
- (4) An evaluation of definitions of "the best interests of the child";
- (5) An examination of issues that may have an impact on the fair and timely resolution of cases; and
- (6) The identification of practices that meet an acceptable national standard of care for the children and families before the Family Court.

The Committees on Human Services of the Senate and House of Representatives were also requested to:

- (1) Establish one or more task forces to facilitate their work with representation from the Department of Human Services; Department of Health; Hawaii Association of Marriage and Family Therapists; Family Law Section of the Hawaii State Bar Association; National

Association of Social Workers, Hawaii Chapter; Children's Rights Council; Hawaii Coalition for Dads; Legal Aid Society of Hawaii; Volunteer Legal Services Hawaii; Hawaii State Coalition Against Domestic Violence; Domestic Violence Clearinghouse and Legal Hotline; Mediation Center of the Pacific; EPIC Ohana Conferencing; and American Psychological Association; and

- (2) Report their findings, along with any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2007.

Approach

The Chair of the Senate Human Services Committee, Senator Suzanne Chun Oakland, and the Chair of the House Human Services Committee, Representative Alex M. Sonson, convened the S.C.R. 52 Task Force (Task Force), with representation from all of the organizations as directed by S.C.R. 52, S.D. 1 (2006), to facilitate their work.

The Task Force held public meetings on July 17, August 22, October 9, November 27, December 1, December 15, 2006, and January 5, 2007.

The Task Force prioritized four categories and formed four committees to explore which issues should be prioritized within each category and to report their findings and recommendations to the Task Force. The four committees were:

- (1) Best Interests of the Child Committee;
- (2) Family Court Models Committee;
- (3) Family Court, Sunshine & Accountability Committee; and
- (4) Temporary Restraining Orders Committee.

In addition to conferring with all of the organizations as directed by S.C.R. 52, S.D. 1 (2006), between the Task Force and the four committees, input was obtained from individual members of the public and representatives of the following organizations: the Judiciary; University of Hawaii, School of Social Work; Hawaii State Commission on the Status of Women; City and County of Honolulu Prosecutor's Office; American Civil Liberties Union of Hawaii; Hawaii Association of Family Therapists; VOICES, Maui Chapter; VOICES, Oahu Chapter; Coalition for a Drug-Free Hawaii; Hawaii Women Lawyers; Women Helping Women, Maui Chapter; Na Lei Lokahi; Na Keiki Law Center; Parents for Righteousness; and Stop the Violence.

The Family Court Custody Investigation Unit also made a presentation to the Task Force.

PART II. COMMITTEE FINDINGS

Best Interests of the Child Committee

The Task Force requested the Best Interests of the Child Committee to explore and prioritize the possibility of defining "best interests of the child," adopting a standard and criteria for best interests of the child, and the reintroduction of S.B. No. 3233 (2006) to authorize parents to amend provisions of the parenting plan.

The Best Interests of the Child Committee held public meetings on October 18, October 30, and November 9, 2006.

The Best Interests of the Child Committee examined various models, including the Jameson Study, to compile a list of the best interests of the child standards that a court should consider when deciding the issue of child custody. After a full discussion, the Best Interests of the Child Committee agreed upon the standards listed in Attachment A.

The Best Interests of the Child Committee considered whether various child custody related presumptions should exist. The Best Interests of the Child Committee determined that the domestic violence presumption in section 571-46, Hawaii Revised Statutes, should remain. The Best Interests of the Child Committee found that once the court determines that domestic violence is not an issue, there should be a rebuttable presumption of joint custody (e.g., both parents share equally in the parenting of the child). If the joint custody presumption is disputed, the court would then consider the best interests of the child standards listed in Attachment A.

The Best Interests of the Child Committee also discussed the issue of enabling parents to amend parenting plans when both parents agree to the changes. The Best Interests of the Child Committee reviewed the law and determined that a mechanism already exists for parents who are in agreement to amend their parenting plans.

Family Court Models Committee

The Task Force requested the Family Court Models Committee to explore and prioritize the possibility of a non-adversarial "triage" model, "parenting time (visitation) facilitation specialists," a parent advocate or facilitator for custody cases, co-parenting education classes, expansion of Kids First, parents presenting their story at Kids First to encourage settlement, Alternative Dispute Resolution or co-parenting models not being used if battered spouse or parent, protecting a battered spouse (psychological and physical abuse) by investigating alleged abuse before a custody evaluation, evaluating the degree of conflict or abuse prior to determining custody and visitation, decreasing conflict and the effect of a "presumption," neutral pre-court services with trained personnel to identify domestic violence and mediation-type services and to report findings to the court, shaping the system to help families reduce the emotional drain on the larger community, getting government sectors to be more consumer-oriented, and a process for informing agencies serving families about changes in the law.

The Family Court Models Committee held public meetings on September 26, October 16, October 27, and November 3, 2006.

After a full discussion, the Family Court Models Committee found that:

- (1) A process, known as the Family Court Parenting Plan Model, should exist to assist parents to develop a parenting plan without and prior to family court intervention;
- (2) Child custody matters involving domestic violence should be exempt from the process and should be screened out at any time in the process in addition to the first screening;
- (3) After the initial screening for domestic violence, parents should participate in an expanded version of Kids First that includes:

- (A) Education about parenting after divorce;
 - (B) Parenting roles within one home and across homes;
 - (C) Optional advanced parenting education;
 - (D) An opportunity for children to provide their activities schedules;
 - (E) An introduction to the concept of a parenting plan; and
 - (F) An overview of divorce and paternity procedures;
- (4) If the parents are unable to develop a parenting plan after participation in the expanded version of Kids First, the parents should meet with a Trained Parenting Plan Facilitator for a series of facilitations, if necessary, to assist with their development of a parenting plan;
 - (5) The Trained Parenting Plan Facilitator should be able to make confidential recommendations for services to either parent at any time in the process;
 - (6) The process should be confidential, non-adversarial, without the presence of attorneys, and the parents should have the same Trained Parenting Plan Facilitator throughout the process;
 - (7) If after participating in the process the parents still cannot develop a parenting plan, they should proceed to Family Court with any agreed upon issues and for resolution of the outstanding issues; and
 - (8) The parents should have the same judge throughout the child custody proceedings.

The Family Court Models Committee also found that there is a further need to:

- (1) Assess the level of children's involvement in the process, including the possibility of expanding services to meet children's needs in regard to the impact of a child custody dispute;
- (2) Research and recommend best practices in the development of a parenting plan;
- (3) Research and recommend best practices in the training and qualifications of the trained parenting plan facilitator, including training on the issues facing both the petitioner and the respondent;
- (4) Evaluate the current assessment of domestic violence matters; and
- (5) Research the possible establishment of a domestic violence court.

Family Court, Sunshine & Accountability Committee

The Task Force requested the Family Court, Sunshine & Accountability Committee to explore and prioritize the possibility of a Family Law Advisory Committee, open meetings, public disclosure of the Judiciary's claim that it is self-evaluating, more communication between the Judiciary and the public or consumers, monitoring the enforcement of recently enacted laws, further judicial accountability, sanctioning attorneys for misrepresentation, developing guidelines for factfinders to focus on the "best interests of the child," the Judiciary providing updates on custody evaluation and Alternative Dispute Resolution programs, reviewing factfinders' fees, defining the guardian ad litem's responsibilities, clarifying and developing a glossary of the different court-appointed personnel, and greater public involvement in the Judiciary.

The Sunshine & Accountability Committee held public meetings on October 18, October 30, and November 9, 2006.

After a full discussion, including the review of various models, past legislation, and research (Attachment B), the Sunshine & Accountability Committee prioritized:

- (1) The establishment of a Family Law Advisory Committee;
- (2) Expanding the scope of chapter 92, Hawaii Revised Statutes, known as the Sunshine Law, to include non-adjudicatory functions of the Judiciary;
- (3) Investigating public and media access to Family Court hearings and the constitutionality of the Family Court Confidentiality Form; and
- (4) Training custody evaluators.

At the Sunshine & Accountability Committee's request, the Task Force sent a letter to Chief Justice Ronald T. Y. Moon, on or about October 16, 2006, requesting information regarding the Family Court Confidentiality Form. Copies of the letter to Chief Justice Moon and the response from the Deputy Chief Judge of the Family Court of the First Judicial Circuit, Frances Q. F. Wong, and the Chief Court Administrator of the First Circuit Court, William A. Santos, dated October 25, 2006, are provided under Attachment C.

Temporary Restraining Orders Committee

The Task Force requested the Temporary Restraining Orders Committee to explore and prioritize the possibility of reexamining the temporary restraining orders process, reducing the filings of false temporary restraining orders, reexamining the temporary restraining orders statute to look at "imminent harm," the temporary restraining orders requirement for an order of protection, assistance in evenings or weekends, a consequence or sanction for filing a false temporary restraining order, and the need for a pre-screening process to identify abuse.

The Temporary Restraining Orders Committee held public meetings on September 26, October 17, October 26, and November 8, 2006.

After a full discussion, the Temporary Restraining Orders Committee determined that there is a need:

- (1) For additional information from the Family Court regarding temporary restraining orders;
- (2) For temporary restraining orders to address the issue of minors in greater detail;
- (3) To specify how the child is being harmed if including the child on an Ex Parte Petition for a Temporary Restraining Order for Protection;

- (4) For an agency to investigate and file a written report with the Family Court regarding allegations of harm to a child;
- (5) To modify the Ex Parte Petition for a Temporary Restraining Order for Protection form as follows:
 - (A) The form should request information on the parties' legal relationship to the child (e.g., birth or adoptive parent, legal guardian, member of household, joint or sole custody, etc.);
 - (B) There should be some indication on the form whether there has been agency contact and if so, it should be specified;
 - (C) There should be a question on the form regarding whether there are "any other known legal actions regarding the child or the parties"; and
 - (D) The form should be expanded to include an area for a narrative to elaborate on the "threats of abuse to the child"; and
- (6) To get better information before the Family Court Judge.

PART III. COMMITTEE RECOMMENDATIONS

Each Committee submitted a report of its full findings and recommendations to the Task Force (Attachment D). The Committees' recommendations were discussed at length by Task Force members and adopted in the form presented under Part IV.

PART IV. TASK FORCE RECOMMENDATIONS

Based on the findings and recommendations of the four committees, and after a full discussion and a majority vote of the members, the Task Force recommends that with regard to:

Best Interests of the Child

- (1) Custody and visitation (parenting time) criteria and procedure be amended to specify what the court shall consider when determining the best interests of the child;
- (2) The Legislative Reference Bureau be requested to study joint or shared physical and legal custody presumptions in Family Law as enacted and applied by other jurisdictions;

Family Court Models

- (3) The Judiciary be requested to review similar, existing parenting plan initiatives and implement a pilot Family Court Parenting Plan Model program in the First Circuit Family Court;
- (4) A task force be convened to evaluate the current assessment of domestic violence matters and the possibility of establishing a domestic violence court in the First Circuit Family Court;
- (5) One or more task forces be convened during the interim to further study and make recommendations regarding the remaining issues identified by the Family Court Models Committee;

Family Court, Sunshine & Accountability

- (6) A Citizen's Family Law Advisory Committee be established and placed, for administrative purposes, within the Judiciary;
- (7) A letter be written to the Chief Justice of the Hawaii State Supreme Court, Ronald T. Y. Moon, requesting information regarding the Family Court's practice and procedure of sealing records and other documents in the legal matters within its jurisdiction;
- (8) A letter be written to the Deputy Chief Judge of the Family Court of the First Judicial Circuit, Frances Q. F. Wong, requesting information regarding Family Court custody evaluators and policies related to custody evaluators;
- (9) The Legislative Reference Bureau be requested to study custody evaluator training models applied in other jurisdictions;
- (10) A task force be convened during the interim to further study and make recommendations regarding Family Court custody evaluator issues;

Temporary Restraining Orders

- (11) A letter be written to the Deputy Chief Judge of the Family Court of the First Judicial Circuit, Frances Q. F. Wong, requesting further information regarding temporary restraining orders;
- (12) A written copy of the referral should be provided to the parties prior to a hearing in any case involving allegations of child abuse;
- (13) A task force be convened during the interim to further study and make recommendations regarding the remaining issues and recommendations identified by the Temporary Restraining Orders Committee; and

Other

- (14) The Committees on Human Services of the Senate and the House of Representatives be requested to reconvene the Task Force to further study some of the remaining recommendations made by the committees.

PART V. CONCLUSION

After a majority vote of the members, the Task Force recommends that legislation be introduced in the 2007 legislative session to implement the recommendations outlined in this report. The co-conveners of the Task Force, Senator Suzanne Chun Oakland and Representative Alex M. Sonson, will sponsor the necessary legislation.

Signed by Senator Suzanne Chun Oakland and Representative Alex M. Sonson, Chairs, on behalf of the Committees.

CONFERENCE COMMITTEE REPORTS

Conf. Com. Rep. 1 on S.B. No. 1529

The purpose of this measure is to clarify the civil adjudication of civil traffic infractions.

Your Committee on Conference finds that this measure would provide clear, unambiguous, and consistent methods of processing traffic infractions in a more expedient and less burdensome manner, while ensuring protections against self-incrimination for defendants. Currently, a vast majority of lesser traffic offenses can be adjudicated without requiring the defendant's appearance in court. However, some methods used in processing traffic infractions remain unclear, ambiguous, and inconsistent. This measure attempts to address these issues. Your Committee on Conference notes that the measure permits the court to schedule the criminal and civil cases concurrently.

Your Committee on Conference has adopted the S.D. 2 version of this measure that is substantially similar to the H.D. 2 version, in addition to changing references to "citations" to "infractions", with the concurrence of the Judiciary. Your Committee on Conference has also changed the effective date from July 1, 2112, to January 1, 2008.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1529, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1529, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Hooser, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hooser). Representatives Souki, Waters, Pine, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Pine).

Conf. Com. Rep. 2 on S.B. No. 1709

The purpose of this measure is to treat three-wheeled mopeds designed to carry a driver and a passenger seated side by side the same way as single driver mopeds except for the requirement that the driver sit astride and alone on the moped.

Your Committee finds that three-wheeled mopeds are increasingly common on the roadways. Three-wheeled mopeds are typically rented to tourists by moped rental companies. Current law does not allow these vehicles to be classified as a moped.

The intent of this measure is to allow three-wheeled mopeds that are designed to carry a passenger to operate on highways, streets, and roadways in the same way as single driver mopeds except with regards to operating in bicycle lanes. Three-wheeled mopeds that are designed to carry a passenger are generally larger than single driver mopeds and present safety issues that may not be covered under existing laws that regulate single driver mopeds. This measure addresses those safety issues.

Your Committee on Conference has amended this measure by adopting the H.D. 2, and added language that clarifies that:

- (1) A driver of a three-wheeled moped is required to have bodily injury and property damage insurance; and
- (2) Are prohibited on bicycle lanes.

Your Committee on Conference also amended the effective date from July 1, 2112, to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1709, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1709, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Tsutsui). Representatives Souki, Waters, Ching, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 3 on S.B. No. 946

The purpose of this measure is to allow a person whose driver's license has been revoked for life to reapply and be reissued a driver's license upon specified conditions and procedures.

Your Committee on Conference finds that a lifetime suspension of a driver's license, though warranted when imposed, eventuates in an inequality after a driver becomes rehabilitated from substance abuse.

The intent of this measure is to provide fairness and equity in the driver's license revocation process. The law should account for rehabilitation under certain safeguards as contained in this measure. However, this measure should not be construed as forgiving the offending driver. Your Committee on Conference recommends passage of this measure out of compassion for those who have paid the debt of their past indiscretions.

Your Committee on Conference has amended this measure by adopting the S.D. 2 version, a substantially similar measure, and inserting a fee of \$50 to cover administrative costs. Your Committee has also changed the effective date to July 1, 2008, at the request of the Administrative License Revocation Office in order to allow time for implementation.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 946, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 946, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, Waters, Nishimoto, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Marumoto).

Conf. Com. Rep. 4 on S.B. No. 1528

The purpose of this measure is to clarify that all traffic offenses and violations under the statewide traffic code are treated as traffic violations, not convictions.

Your Committee on Conference finds that this measure would affirm that traffic offenses are infractions, and therefore are deemed civil rather than criminal matters. This measure is in keeping with Hawaii appellate case law.

Your Committee on Conference has amended this measure by changing the effective date from July 1, 2020, to upon its approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1528, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1528, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, Waters, Meyer, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Meyer).

Conf. Com. Rep. 5 on S.B. No. 1704

The purpose of this bill is to amend chapter 514A, Hawaii Revised Statutes (HRS), by reenacting parts I, V, and VII, of chapter 514A, HRS, that were previously repealed by Act 164, Session Laws of Hawaii 2004, and to make other housekeeping amendments.

Your Committee finds that Act 213, Session Laws of Hawaii 2000, and Act 131, Session Laws of Hawaii 2003, required the Real Estate Commission to review chapter 514A, HRS, make findings and recommendations for the recodification of that chapter, and submit legislation consistent with its review to the Legislature. The recodified condominium law was submitted and subsequently enacted as Act 164, Session Laws of Hawaii 2004, Act 93, Session Laws of Hawaii 2005, and Act 273, Session Laws of Hawaii 2006, as chapter 514B, HRS. However, parts I, V, and VII of chapter 514A, HRS, were repealed during the process. This has made it more difficult for members of associations of apartment owners, boards, and others in the condominium business created prior to July 1, 2006, to understand and discern exactly what laws and rights are applicable to them.

Your Committee has amended this measure, as recommended by the Real Estate Commission, by:

- (1) Adding a new section to amend section 467, HRS, to include apartments defined in section 514A-3, HRS, and governed by chapter 514A, HRS, in the definition of "hotel condominium";
- (2) Adding a new section to amend section 514B-161, HRS, to require that if an apartment owner or the board of directors requests mediation of a dispute involving the interpretation or enforcement of the association of apartment owners' declaration, bylaws, or house rules, the other party in the dispute shall be required to participate in mediation;
- (3) Changing the effective date to provide that:
 - (a) Sections 2, 3, and 4, of this measure shall take effect retroactive to July 1, 2006;
 - (b) Section 514A-121.5(b) to (j) in section 2 of this measure shall be repealed on June 30, 2009; and
 - (c) Cases pending before the Office of Administrative Hearings of the Department of Commerce and Consumer Affairs as part of the condominium dispute resolution pilot project established by section 28 of Act 164, Session Laws of Hawaii 2004, on June 30, 2006, that may have been dismissed due to the repeal of part VII of chapter 514A, HRS, shall be reinstated and subject to section 514A-121.5, in section 2 of this measure;
- (4) Making necessary technical and conforming amendments to sections 514A-6 and 514A-121.5, HRS, in section 2 of this measure; and
- (5) Making other technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1704, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1704, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Espero). Representatives Herkes, McKelvey, Marumoto, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (McKelvey).

Conf. Com. Rep. 6 on S.B. No. 1047

The purpose of this measure is to allow a driver who is at least nineteen years of age who meets certain requirements to obtain a commercial driver's license to drive in intrastate commerce.

Your Committee on Conference finds that there is a shortage of commercial drivers in Hawaii and the age requirement for commercial licenses makes recruiting younger individuals, such as high school seniors, difficult because they have to wait years to obtain a license.

The current age required to receive a commercial driver's license is twenty-one. This measure would increase the pool of qualified commercial drivers by lowering the age to nineteen. Your Committee is keenly aware that lowering the age may not solve the problem of the shortage of drivers, and may present highway safety concerns. However, the measure addresses these concerns in large part by ensuring that the applicant has a safe driving record in order to obtain a commercial driver's license.

In addition, your Committee on Conference believes that increasing the eligible pool of commercial drivers will increase demand for commercial driving schools and other instructional programs to enable the licensing of more commercial drivers. High school seniors would be more inclined to consider commercial driving as a career if the license eligibility age were nineteen.

Your Committee has amended the measure by deleting the requirement that a commercial drivers license applicant under the age of twenty-one complete a Department of Transportation administered training program and by changing the effective date from July 1, 2012, to upon its approval. Your Committee has also made a technical amendment to remove an extraneous subsection designation in section 1 of the bill.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1047, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1047, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hooser, Gabbard, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Hooser). Representatives Souki, Waters, Nishimoto, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Pine).

Conf. Com. Rep. 7 on S.B. No. 1410

The purpose of this measure is to conform Hawaii's insurance laws to national standards regarding:

- (1) Long-term care insurance; and
- (2) The sharing of information with foreign insurance regulatory agencies by the Insurance Commissioner to facilitate the regulation of the insurance industry.

Your Committee finds that this measure is a reflection of model standards developed by the National Association of Insurance Commissioners.

Your Committee has amended this measure by making technical changes for the purpose of clarity.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1410, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1410, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Ihara, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Ihara). Representatives Herkes, McKelvey, Yamane, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (McKelvey).

Conf. Com. Rep. 8 on S.B. No. 920

The purpose of this measure is to prevent abuses that may occur from the distribution of condominium association membership lists. Specifically, this measure prohibits:

- (1) The use or distribution of membership lists without the prior written consent of the condominium association's board of directors; and
- (2) The condominium's managing agent, manager, and board of directors from using information from membership lists to create any separate list as a means of evading the restrictions on the use of such information.

Your Committee finds that condominium association member lists are the property of the association and members' information must be kept private. The intent of this measure is to stop managing agents from using condominium member lists without the prior written consent of the board of directors of a condominium association.

Your Committee has amended this measure by:

- (1) Adding language to specify that the consent requirements and the restrictions on the creation of separate lists found in subsections (f) and (g) in section 2 of this measure shall not apply to any time share plan regulated under chapter 514E, Hawaii Revised Statutes; and
- (2) Making this measure effective upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 920, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 920, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Espero). Representatives Herkes, McKelvey, Marumoto, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (McKelvey).

Conf. Com. Rep. 9 on S.B. No. 139

The purpose of this bill is to clarify that the cigarette tax moneys collected and earmarked, pursuant to section 245-15, Hawaii Revised Statutes, to fund the Cancer Research Center of Hawaii, emergency medical services, trauma care, and community health centers shall be calculated on a per cigarette basis. This bill further ensures that moneys are earmarked for each special fund through 2011 and beyond.

Your Committee on Conference amended this bill by changing the tax collection date for moneys earmarked for the Hawaii Cancer Research Special Fund from prior to September 29, 2006, to prior to October 1, 2007. Your Committee finds that prior to October 1, 2007, completes a fiscal quarter and will avoid administrative problems for the Department Of Taxation.

Your Committee on Conference further amended this bill by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 139, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 139, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Fukunaga, Baker, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Green, Mizuno, Chong, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Chong).

Conf. Com. Rep. 10 on S.B. No. 755

The purpose of this measure is to provide standards for the selection of County Ethics Commissioners to ensure their impartiality and independence.

Your Committee on Conference finds that, in the interest of ensuring sufficient independence and impartiality, the selection process of the State Ethics Commissioners should serve as a model for the selection of County Ethics Commissioners. Each member of the State Ethics Commission is appointed by the Governor from a list of two persons nominated by the Judicial Council, and complies with Article XIV of the Constitution of the State of Hawaii, which provides that: "Ethics commissioners shall be selected in a manner which assures their independence and impartiality."

Your Committee further finds that, in contrast, members of the Honolulu Ethics Commission are appointed by the Mayor and confirmed by the Honolulu City Council, both of which are subject to oversight by the County Ethics Commission.

To remedy this perceived conflict of interest, this measure requires the counties to establish a selection process that ensures a minimal amount of involvement of persons who are to be subject to an ethics commission's oversight by requiring each County Ethics Commissioner to be appointed from a list of nominees selected by an independent body and not subject to confirmation by the county legislative body.

Your Committee has amended this measure to further clarify the selection process of County Ethics Commissioners by requiring that county ethics commissioners in each county to be selected by an independent body as set forth by county ordinance in each county.

The intent of your Committee on Conference is to create improved standards for the selection of County Ethics Commissioners that will allow them to fulfill their duties in an independent and impartial manner.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 755, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 755, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Tsutsui, Hemmings, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Tsutsui). Representatives Waters, B. Oshiro, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 11 on S.B. No. 618

The purpose of this measure is to require the Department of Education to establish a program for awarding honorary high school diplomas to individuals who were unable to complete high school due to military service during World War II, the Korean Conflict, or the Vietnam War and individuals interned during the Japanese and Japanese-American Internment during World War II.

Your Committee on Conference finds that during times of need, many citizens disrupt their lives and education to serve and protect their country through military service. In the past, many of Hawaii's citizens were unable to complete their compulsory education due to military service during World War II, the Korean Conflict, or the Vietnam War, or due to the Japanese and Japanese-American Internment during World War II. This measure recognizes the tremendous hardships suffered and sacrifices made by our loyal and courageous veterans and interned citizens through the establishment of a program for bestowing high school diplomas on these worthy individuals.

Upon further consideration, your Committee on Conference has amended this measure by:

- (1) Changing references to an "honorary diploma" to a "veterans high school diploma"; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 618, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 618, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Sakamoto, Hemmings, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Hemmings). Representatives Takumi, Evans, Har, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 12 on S.B. No. 1008

The purpose of this measure is to enhance the regulation of annuity sales by establishing standards and procedures for insurers and insurance producers that make recommendations to consumers regarding the purchase or exchange of annuities.

Your Committee finds that there is a need to protect consumers who purchase annuity products. This measure is based upon model legislation and the intent is to ensure that the insurance needs and financial objectives of consumers in transactions involving annuity products are appropriately and adequately addressed.

Your Committee has amended this measure by:

- (1) Adding language clarifying that nothing in this measure shall be construed to affect any provision of chapter 485A, Hawaii Revised Statutes, relating to the Uniform Securities Act;
- (2) Making the measure effective January 1, 2008; provided that section 5 shall take effect on July 1, 2008, and that section 4 shall be repealed on July 1, 2008; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1008, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1008, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Trimble, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Trimble). Representatives Herkes, Lee, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 13 on S.B. No. 667

The purpose of this bill is to ensure that residents of this State have access to appropriate mental health services by licensed mental health counselors and to enable qualified mental health counselor applicants to obtain licensure.

Specifically, this bill provides for the licensing of qualified mental health services providers by:

- (1) Allowing alternative experience for the practicum intern and post-graduate experience required for mental health counselor licensure, for applicants who graduated from an accredited educational institution before July 1, 2007; and
- (2) Clarifying that the requirement that clinical supervisors hold certain licenses does not apply to the practicum intern and post-graduate experience supervision requirements for applicants graduating from an accredited educational institution prior to July 1, 2007.

Your Committee on Conference amended this bill by changing the delayed effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 667, S.D. 3, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 667, S.D. 3, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Taniguchi, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Whalen). Representatives Green, Herkes, McKelvey, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 14 on S.B. No. 1675

The purpose of this bill is to encourage the use of automated external defibrillators by strengthening the law regarding civil liability.

Specifically, this bill changes the term automatic external defibrillator to automated external defibrillator and provides immunity from liability to any individual who administers an automated external defibrillator in a good faith attempt to resuscitate another person in immediate danger of loss of life, instead of providing immunity only to those who have successfully completed a training program.

Your Committee on Conference amended this bill to encourage employers and businesses to provide this life saving technology by:

- (1) Removing employers from vicarious liability for civil damages resulting from the provision of an automated external defibrillator, clarifying that employer liability only attaches as a result of a person's or employer's gross negligence or wanton acts or omissions; and
- (2) Removing the requirement that only employers who provide a defibrillator program shall be immune from liability.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1675, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1675, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Hee, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Waters, Ward, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 15 on S.B. No. 1425

The purpose of this measure is to ensure that an adequate supply of licensed contractors is available to perform necessary repairs and reconstruction work during a state of emergency or disaster. Specifically, this measure:

- (1) Authorizes the Contractors License Board (Board) to issue emergency contractor's licenses to qualified out-of-state contractors;
- (2) Authorizes the Board to establish an Emergency Contractors Recovery Fund to assist in covering liability costs for persons injured as a result of work performed by a contractor that is issued an emergency license to perform necessary repair and reconstruction work during a state of emergency or disaster;
- (3) Authorizes the Board to collect fees from applicants for an emergency contractor's license;
- (4) Requires a determination by the Board that a shortage of a qualified workforce exists prior to issuing emergency contractor's licenses to qualified out-of-state contractors;
- (5) Requires that an applicant for an emergency contractor's license provide:
 - (A) Proof of workers' compensation, property damage, and liability insurance in an amount not less than \$300,000 per occurrence and \$600,000 in the aggregate;
 - (B) A current financial statement prepared by a certified public accountant;
 - (C) A credit report; and
 - (D) Proof of intent to pay any and all applicable state general excise taxes by means of a state tax clearance statement;
- (6) Clarifies that a contractor who is issued an emergency contractor's license is subject to requirements set by Hawaii's contractor laws under Chapter 444, Hawaii Revised Statutes; and
- (7) Specifies that an emergency contractor's license shall only be valid during the period that the emergency exists.

Your Committee on Conference finds that the after effects of hurricanes Katrina and Rita demonstrated the adverse consequences of having a short supply of skilled and licensed contractors. Currently, if a natural disaster or other state of emergency were to arise in Hawaii, the demand

for skilled and licensed contractors in Hawaii to perform the necessary repair and reconstruction work may exceed the actual supply. Your Committee on Conference further finds that allowing out-of-state contractors licensed in other jurisdictions to perform work in Hawaii under an emergency license represents a reasonable balance between the need for more contractors and the need to protect consumers.

To this end, your Committee on Conference amended this measure by:

- (1) Removing the provision authorizing the Board to establish an Emergency Contractors Recovery Fund;
- (2) Removing the minimum monetary amounts for insurance liability in the provision requiring proof of workers' compensation, property damage, and liability insurance;
- (3) Amending the provision requiring proof of licensure as a contractor in another state that follows the same adopted version of the applicable county's uniform building code to provide that the county in which the contractor is licensed have a similar, rather than the same uniform building code;
- (4) Clarifying language regarding submitting a state tax clearance statement;
- (5) Inserting language requiring the applicant to provide proof of bond in the amount and in such form as set forth in section 444-16.5, Hawaii Revised Statutes;
- (6) Removing the provision requiring a contractor who is issued an emergency contractor's license to be subject to requirements set forth by Hawaii's contractor license maintenance and penalty laws under chapter 444, Hawaii Revised Statutes;
- (7) Removing the provision requiring the emergency contractor's license to remain valid only during the period of the emergency; and
- (8) Making nonsubstantive changes for the purpose of style and clarity.

It is the intent of your Committee on Conference to ensure that there is an adequate supply of licensed contractors available to perform the necessary repairs and reconstruction work during a state of emergency or disaster and putting requirements in place to ensure public and consumer safety.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1425, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1425, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Taniguchi, Sakamoto, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Sakamoto). Representatives Evans, Herkes, Har, McKelvey, Yamane, Finnegan, Managers on the part of the House. Ayes, 5. Noes, none. Excused, 1 (Finnegan).

Conf. Com. Rep. 16 on S.B. No. 870

The purpose of this measure is to:

- (1) Establish and designate an archaeological data survey as an online database program of the State of Hawaii Museum of Natural and Cultural History, beginning with the collections of Bishop Museum; and
- (2) Authorize the Museum, in consultation with the Office of Hawaiian Affairs and the Department of Land and Natural Resources, to withhold from the database, either temporarily or permanently, information that may pose a threat to the protection of valuable archaeological sites and artifacts.

Your Committee on Conference finds that requiring a consensus of the three entities to determine what information may be withheld from the data survey will ensure protection for vulnerable artifacts and sites that may be threatened with harm or degradation should information about them be readily available.

Your Committee on Conference has amended this measure by making the bill effective upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 870, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 870, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Espero, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Ito, Chong, Carroll, Hanohano, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Carroll).

Conf. Com. Rep. 17 on S.B. No. 1924

The purpose of this measure is to allow the Board of Land and Natural Resources to sell or exchange up to fifteen acres of state land to an eleemosynary organization under certain conditions without legislative approval for three years.

Specifically, this measure requires that:

- (1) The eleemosynary organization use the land for the construction and maintenance of a multi-purpose community center with sufficient size and facilities to serve a community of twenty-five thousand people;
- (2) The eleemosynary organization demonstrates the sufficient sources of funding for the construction and maintenance of the community center; and
- (3) If the land ceases to be used for the purposes and conditions of the multi-community center, the land will revert back to the State.

Your Committee on Conference has amended this measure by:

- (1) Establishing that section 171-50(c), Hawaii Revised Statutes, does not apply to this measure;

- (2) Properly citing sections 171-50(a) and (b), Hawaii Revised Statutes, within the measure, where applicable;
- (3) Clarifying that, if the land reverts back to the State, any pending liabilities assigned to the property, eleemosynary organization, or other party in effect prior to the reversion will not be transferred to the State;
- (4) Changing the effective date of this measure from July 1, 2020, to effective upon its approval; and
- (5) Making technical and nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1924, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1924, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Ito, Chong, Sagum, Tokioka, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Tokioka).

Conf. Com. Rep. 18 on S.B. No. 866

The purpose of this measure is to ensure that the Hawaii Tourism Authority (HTA) and Hawaii Visitors and Convention Bureau (HVCB) boards function independently from each other and that the relationship between the two boards remain at arm's length when the two entities transact tourism marketing contracts.

The measure accomplishes this purpose by prohibiting a person who has served as a member of the Board of Directors of the HVCB from sitting as a public, voting member of the Board of the HTA until at least two years have expired between the person's termination from service on the Board of the HVCB and the person's appointment to the Board of the HTA.

Your Committee on Conference finds that the *Special Master's Report to the Hawaii Tourism Authority on Recommendations Regarding The Hawaii Visitors and Convention Bureau*, dated December 31, 2003, by the Candon Consulting Group, LLC, recommended that the independence of the respective boards of directors of the HTA and the HVCB be preserved. Individuals have served consecutively as directors of both the HTA board and the HVCB board and visa-versa. This situation invites questions about the arm's length nature of the relationship between these two boards and their respective organizations. If enough members of each board regularly alternate service from one to the other, the independence of each entity would diminish or disappear. Your Committee notes that the intent of this measure is already embodied in HTA's current policy.

Your Committee on Conference further finds that, because tourism marketing contracts are executed between the HTA and the HVCB through a process that is exempt from the State Procurement Code, it is necessary to establish safeguards such as the two-year board service moratorium to ensure propriety.

Your Committee on Conference has amended this measure by changing the effective date from July 1, 2025 to upon its approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 866, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 866, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Kim, Trimble, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Trimble). Representatives Yamane, Manahan, Ching, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 19 on S.B. No. 1750

The purpose of this bill is to prevent injury and death to infants and young children caused from shaken baby syndrome by requiring hospitals that provide medical care to a newborn to provide each parent of the newborn with written educational information approved by the Department of Health and provided by nonprofit organizations about the dangerous effects of shaken baby syndrome and the different methods of preventing shaken baby syndrome.

Your Committee on Conference amended this bill by:

- (1) Removing the requirement that hospitals provide information on shaken baby syndrome and inserting language allowing hospitals to provide this information;
- (2) Requiring the Department of Health to report statistical information and recommendations for legislation to the Legislature; and
- (3) By making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1750, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1750, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Fukunaga). Representatives Green, Mizuno, Ching, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 20 on S.B. No. 58

The purpose of this measure is to provide for the orderly disposition of a licensed dentist's practice in the event of the dentist's unexpected death or incapacity by allowing the executor or administrator of the dentist's estate, or the dentist's legal guardian or authorized representative, to operate the practice for up to one year for the purpose of winding down, transferring, or selling the practice.

The sudden death or incapacitation of a dentist not only affects patients' continuity of care, but also causes the dental practice to rapidly lose value for each day it remains closed. In such situations, the dentist's family may be forced to hurriedly sell the practice before it loses much of its value; the dentist's work staff may suddenly find themselves unemployed; and existing patients may be confused by the abrupt change in the

practice's ownership. Your Committee finds that this measure seeks to address these concerns by providing a sufficient transition period for a deceased or incapacitated dentist's practice to be closed, transferred, or sold.

Your Committee has amended this measure to make it effective upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 58, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 58, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Hee, Espero, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Green, Herkes, Waters, McKelvey, Mizuno, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 2 (Waters, Awana).

Conf. Com. Rep. 21 on S.B. No. 1017

The purpose of this measure is to remove a provision that limited the use of funds appropriated for fiscal year 2006-2007 as a grant-in-aid to the Hawaii Habitat for Humanity Association only to homes built on leased state lands.

Your Committee finds that Hawaii Habitat for Humanity provides a valuable service to the people of Hawaii by providing low-income families with safe and affordable self-help houses with zero interest loans. Hawaii Habitat for Humanity helps many low-income families achieve the goal of homeownership at a time when affordable housing in the State is out of reach for many families.

The intent of this measure is to ensure that Hawaii Habitat for Humanity Association's zero-interest revolving fund can continue to assist low-income families achieve homeownership in the State.

Your Committee has amended this measure by reinstating the language regarding administration of the loans and changing the reference to chapter 201G, Hawaii Revised Statutes, to chapter 201H, Hawaii Revised Statutes, to ensure that a standard for operating the loan program exists.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1017, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1017, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Espero). Representatives Shimabukuro, Rhoads, Awana, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Awana).

Conf. Com. Rep. 22 on S.B. No. 1803

The purpose of this measure is to provide health care coverage for Hawaii's residents by amending state health insurance laws with respect to small insurers.

Specifically, this measure:

- (1) Exempts a small group health issuer from having to offer a group health plan to small employers that employ only one employee, if the issuer offers the small employers at least one small group health plan that meets the requirements of chapter 393, Hawaii Revised Statutes, relating to prepaid health care plans; and
- (2) Exempts any accident or sickness insurer with less than thirty per cent share of the accident and sickness insurance market from the prohibition against requiring a prospective insured to purchase another class or an additional policy of the same class of insurance in order to obtain the desired accident and sickness insurance policy.

Your Committee finds that affordable health insurance is one of the State's most pressing concerns and that small insurers provide coverage to individuals, self-employed workers, and small business group plans that have one or few employees. Expanding coverage options will benefit consumers and should increase health insurance competition in Hawaii.

Your Committee has amended this measure by:

- (1) Adding language to allow the Insurance Commissioner to prohibit the exemption from section 431:2-201.5, Hawaii Revised Statutes, of group health plans offered to small employers that employ only one employee if the Insurance Commissioner determines that the group health insurer has the capacity to adequately deliver services to enrollees of additional groups subject to its obligations to existing employer groups;
- (2) Removing the exemption of any accident or sickness insurer with less than thirty per cent share of the accident and sickness insurance market from the prohibition against requiring a prospective insured to purchase another class or an additional policy of the same class of insurance in order to obtain the desired accident and sickness insurance policy;
- (3) Removing the requirement that the Insurance Commissioner conduct a review of the efficacy of this measure; and
- (4) Making this measure effective July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1803, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1803, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Hee, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Green, Herkes, Yamashita, Mizuno, Souki, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 23 on S.B. No. 188

The purpose of this measure is to amend the Small Business Regulatory Flexibility Act by:

- (1) Requiring a small business impact statement to be submitted to the Small Business Regulatory Review Board (Board) as early as possible in the review process;
- (2) Requiring the Board to notify a small business that they may complain to the Ombudsman if the decision is to uphold an agency rule;
- (3) Expanding Board duties to include review of any proposed new or amended rule; and
- (4) Making housekeeping amendments.

Your Committee on Conference has amended this measure by changing the effective date from July 1, 2050 to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 188, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 188, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Taniguchi, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Yamashita, Herkes, Waters, Wakai, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Wakai).

Conf. Com. Rep. 24 on S.B. No. 1315

The purpose of this measure is to:

- (1) Codify sections of Act 292, Session Laws of Hawaii 2000, to make the Access Hawaii Committee, which provides oversight of the Internet portal manager, permanent; and
- (2) Add a representative of the Legislature's data management system and the Administrative Director of the Judiciary to the Committee.

Your Committee on Conference has amended this measure by:

- (1) Increasing the total membership from thirteen to fifteen;
- (2) Replacing a representative of the Legislature's data management system with a representative of the Senate appointed by the President of the Senate and a representative of the House of Representatives appointed by the Speaker of the House of Representatives; and
- (3) Changing the effective date to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1315, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1315, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Ige, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Yamashita, Sagum, Ward, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 25 on S.B. No. 46

The purpose of this measure is to require public disclosure of proposed compensation or changes in compensation for administrative positions in the University of Hawaii system that are filled by civil-service exempt employees.

Specifically, this measure requires the disclosure to be made no later than ten business days before any related open meeting is convened for purposes of public comment.

Your Committee has amended this measure by:

- (1) Inserting three sections from the S.D. 1 version of this measure relating to public disclosure of proposed compensation or change in compensation, as follows:
 - (A) Section 2, amending section 89C-4, Hawaii Revised Statutes, as a new section 2 of this measure;
 - (B) Section 3, amending section 92-5(a), Hawaii Revised Statutes, as a new section 3 of this measure; and
 - (C) Section 5, amending section 304A-1004, Hawaii Revised Statutes, as a new section 5 of this measure;
- (2) Renumbering the existing section 2 as a new section 4 of this measure and changing the disclosure timeframe from ten to six business days in section 304-1001, Hawaii Revised Statutes;
- (3) Renumbering the remaining sections of the measure consecutively;
- (4) Changing the effective date from July 1, 2059, to upon approval; and
- (5) Making technical nonsubstantive changes for the purposes of style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 46, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 46, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Chang, Sonson, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 26 on S.B. No. 987

The purpose of this measure is to support renewable energy by:

- (1) Clarifying the definition of “renewable energy producer” to include thermal energy sold to customers of district cooling systems, for purposes of leasing public lands;
- (2) Allowing a county to grant, sell or otherwise dispose of easements for chilled water and seawater distribution systems for renewable energy seawater air conditioning district cooling systems by negotiation without public auction; and
- (3) Establishing, as state and county policy, priority handling and processing of state and county permits for renewable energy projects.

Your Committee on Conference has amended this measure by changing the effective date from July 1, 2050, to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 987, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 987, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Kokubun, Inouye, Hooser, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Kokubun). Representatives Morita, Ito, Carroll, Chong, Thielen, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Thielen).

Conf. Com. Rep. 27 on S.B. No. 1943

The purpose of this measure is to:

- (1) Add biofuel processing facilities to the list of permitted uses in an agricultural district; and
- (2) Establish an energy feedstock program.

Your Committee on Conference has amended this measure by:

- (1) Adding a paragraph in the findings and purpose section to emphasize that it is the intent of the Legislature that Hawaii-based production of energy feedstock shall become a significant portion of the total feedstock intake for Hawaii biofuels processing facilities;
- (2) Adding crops for bioenergy to activities allowed in agricultural districts;
- (3) Clarifying the description of biofuel processing facilities; and
- (4) Establishing that, in addition to being exempt from civil service, the temporary staff authorized to be hired by the Department of Agriculture for the new energy feedstock program shall also be exempt from the State’s public sector collective bargaining laws.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1943, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1943, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, English, Kokubun, Hooser, Trimble, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Ito, Morita, Tsuji, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 28 on S.B. No. 56

The purpose of this bill allows dentists to claim an exemption from jury service.

Your Committee has amended this bill by changing the delayed date to effective upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 56, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 56, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Nishihara). Representatives Waters, B. Oshiro, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 29 on S.B. No. 1665

The purpose of this measure is to strengthen Hawaii’s animal cruelty laws. This measure creates an offense of cruelty to animals in the first degree by making it a felony to intentionally or knowingly torture, mutilate, or poison or cause the torture, mutilation, or poisoning of any pet animal resulting in serious bodily injury or death of the pet animal.

Your Committee finds that violence, whether against humans or animals, must not be tolerated in our society. Evidence suggests that there is a link between animal abuse and the commission of violent acts against humans. Your Committee further finds that Hawaii is one of only nine states in the United States which does not have a felony offense for domestic animal abuse.

Your Committee made the torturing, mutilation, and poisoning of pet animals a felony. Your Committee finds that pet animals provide a close emotional bond and relationship with their owners and family members and friends. Violence and harm committed against these animals have significant emotional impact to their owners and family. Thus, pet animals are protected by the felony provisions.

Your Committee amended this measure by:

- (1) Adding poisoning, along with torture and mutilation, to cruelty to animals in the first degree;
- (2) Eliminating the mandatory counseling provision for animal cruelty offenders;
- (3) Making conduct, against a pet animal, that result in serious bodily injury or death, a felony;
- (4) Defining pet animals as a dog, cat, domesticated rabbit, guinea pig, or caged birds, so long as they are not bred for consumption;

- (5) Making conduct against any animal resulting in substantial bodily injury, a misdemeanor;
- (6) Exempting the practice of cropping and docking from the felony provision but retaining the misdemeanor prohibition; and
- (7) Conforming the forfeiture provisions to apply to the felony prohibitions.
- (8) Making technical, non-substantive changes.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1665, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1665, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Waters, B. Oshiro, Sonson, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 30 on S.B. No. 1833

The purpose of this bill is to modify the provisions of the Hawaii Family Leave Act by providing the employee - not the employer - with the option of substituting accrued paid leave, such as vacation, personal, or paid family leave, for any part of the four-week period allowed for family leave. Currently, family leave may consist of paid leave, unpaid leave, or a combination of paid and unpaid leave.

A growing number of employees are taking family leave to care for elderly family members and loved ones. Such care often necessitates the substitution of other types of leave, including vacation leave, when the amount of allowed family leave is depleted. Your Committee on Conference believes that the manner in which family leave is taken should be a decision that is left to the employee and that an employer should not force an employee to exhaust the employee's accrued vacation leave to care for a family member.

Your Committee on Conference has amended this measure by changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1833, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1833, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Sonson, Nakasone, Ward, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 31 on S.B. No. 1004

The purpose of this bill is to increase access to mental health care by establishing requirements under which qualified, licensed psychologists practicing at federally qualified health centers may prescribe certain types of psychotropic medication under the general supervision of a medical doctor.

Your Committee on Conference amended this measure by:

- (1) Removing the term and definition of "prescribing mental health professional" and replacing it with "supervising physician" which means a medically trained and licensed physician or psychiatrist who accepts professional responsibility for the provision of psychopharmacotherapy;
- (2) Clarifying that the requirement of a supervised practicum shall be by a medically trained and licensed physician or psychiatrist who accepts professional responsibility for the provision of psychopharmacotherapy and who is not in the employ of the person being directed or supervised;
- (3) Clarifying that it is the duty of a psychologist holding a conditional prescription certificate to inform the Board of Psychology (Board) the name of the supervising physician under whose supervision the psychologist will prescribe psychotropic medication and to promptly inform the Board of any change of the supervising physician;
- (4) Changing the agency responsible for the joint formulary advisory committee from the Department of Health to the Department of Commerce and Consumer Affairs;
- (5) Adding two psychologists working at federally qualified health centers to the joint formulary advisory committee membership;
- (6) Amending the date that the State Health Planning and Development Agency is to submit a report to the Legislature from 2010 to 2013; and
- (7) Altering the effective date in order to allow the Department of Commerce and Consumer Affairs time to develop rules and procedures and to read as follows:

"This Act shall take effect upon approval; provided that:

- (1) Prescriptive authority for qualified psychologists shall not be granted until July 1, 2008;
- (2) Section 5 of this Act shall take effect on July 1, 2009; and
- (3) On July 1, 2014, this Act shall be repealed and section 465-3, Hawaii Revised Statutes, shall be reenacted in the form in which it read on the day before the effective date of this Act."

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1004, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1004, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Taniguchi, Baker, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Green, Herkes, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 32 on S.B. No. 1400

The purpose of this measure is to protect elderly consumers in our communities by requiring financial institutions to report suspected financial abuse.

Your Committee on Conference finds that reporting financial abuse to the Department of Human Services is important because the Department is better suited to carry out investigations of potential financial abuse of elders. Your Committee on Conference finds that mandating financial institutions to report suspected financial abuse to the Department would not increase the jurisdiction of the Department, since any report of financial abuse of a nondependent elder could be rereferred to the proper enforcement authorities. It is the intent of your Committee on Conference that the reporting financial institution is to have no liability for any further act or omission once it has made the required report to the Department of Human Services or the local law enforcement agency.

Your Committee on Conference amended this measure to:

- (1) Require financial institutions to report all suspected incidents of financial abuse of elders to the Department of Human Services in addition to local law enforcement agencies;
- (2) Require the Department to make a timely determination as to whether it has jurisdiction over the elder in question and to notify the reporting agency in cases where the department does not have jurisdiction;
- (3) Require financial institutions to report suspected cases not under the jurisdiction of the Department to the proper local law enforcement agency; making it clear that no financial institution shall be held liable for not reporting suspected cases to the local law enforcement agency where the Department fails to notify the financial institution of its lack of jurisdiction;
- (4) Revert back to Senate Draft No. 2 for the definition of "financial abuse," which is simpler and easier to understand; and
- (5) Go into effect upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1400, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1400, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Taniguchi, Hee, Ihara, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Hee, Hemmings). Representatives Shimabukuro, Herkes, Waters, McKelvey, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 2 (Herkes, Marumoto).

Conf. Com. Rep. 33 on S.B. No. 1161

The purpose of this measure is to provide due process to parties in family court protective order proceedings involving alleged domestic abuse by amending section 586-10.5, Hawaii Revised Statutes, to require the Department of Human Services' report on the matter to be provided to the parties at least two days before the hearing, if possible.

Your Committee finds that reports made by the Department of Human Services to the family court should be made in writing to ensure that a written record is established.

Your Committee amended this measure to amend section 586-10.5, Hawaii Revised Statutes, to:

- (1) Delete the option that would allow the Department of Human Services to provide an oral report regarding the dispositions of referrals made to the department in cases where there are allegations of domestic abuse involving minors or incapacitated persons; and
- (2) Require the court to:
 - (A) File the report and mail a copy to the petitioner and respondent at least two working days prior to the hearing date when possible; or
 - (B) When mailing the report within the required time frame is not possible, to provide a copy to the petitioner and the respondent at the hearing.

Your Committee also amended the title of section 586-10.5, Hawaii Revised Statutes, to reflect the additional responsibilities of the court.

Finally, your Committee amended the effective date of this measure from January 1, 2112 to January 1, 2008.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1161, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1161, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Hee, Fukunaga, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Waters, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 34 on S.B. No. 228

The purpose of this bill is to create special sentencing for graffiti offenders and requiring the discharge of community service through graffiti eradication activities. The bill also establishes the graffiti eradication sentencing program within the judiciary and removes the five-year look-back period for aggravated criminal property damage.

Your Committee on Conference has provided new language to hold minors and their parents or guardians responsible for the minors' acts of graffiti. The minor or the minor's parent or guardian will be held responsible for the cost of materials and supplies to remove the graffiti. The minor will also be required to perform a minimum of eighty hours of community service eradicating other graffiti damaged property.

However, your Committee on Conference is concerned of the dangers involved in eradicating graffiti from such places as highway bridges or signs and has provided an alternative option for the court in these situations. This option would require the minor or the minor's parents or legal guardian to pay for the costs incurred in removing or repairing such property rather than endangering the minor.

Your Committee on Conference amended the bill by:

- (1) Removing Section 2 entitled special sentencing considerations and Section 3 creating a graffiti eradication program with the Judiciary and replacing the sections with new language that amends section 577-3.5, Hawaii Revised Statutes (H.R.S.) to require the court to order
 - (a) a minor who is found to have committed an act of graffiti, the minor's parents, or the minor's legal guardian to remove the graffiti from the affected property within 60 days and to pay for the cost of paint and materials or to pay for the actual cost of repairing or replacing the damaged property, and
 - (b) the minor to perform a minimum of eighty hours of community service removing graffiti from other properties; and
- (2) Changing the delayed date to take effect upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 228, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 228, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Kokubun). Representatives Waters, B. Oshiro, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 35 on S.B. No. 1603

The purpose of this measure is to reduce the exposure of state and county governments to liability and keep public beach parks with potentially dangerous conditions open to the public by:

- (1) Repealing the sunset dates of Act 190, Session Laws of Hawaii 1996 (Act 190), and Act 170, Session Laws of Hawaii 2002 (Act 170); thus making these provisions permanent laws;
- (2) Extending the sunset date of Act 82, Session Laws of Hawaii 2003 (Act 82), to June 30, 2010; and
- (3) Indemnifying county agencies when a state agency uses county facilities or avails itself of county aid or support.

Your Committee on Conference finds that Act 190 established a process to develop legally adequate warnings at public beach parks. Act 170 provides liability protection for lifeguard services on the beach and in the ocean. Act 82 established a risk assessment group to review warning sign design and placement and to protect the State and counties from liability arising from recreational activities on public lands.

Your Committee on Conference has amended this measure by:

- (1) Amending and extending the sunset date of Act 170, Session Laws of Hawaii 2002, from June 30, 2007, to June 30, 2010;
- (2) Amending and extending the sunset date of Act 82, Session Laws of Hawaii 2003, from June 30, 2008, to June 30, 2010;
- (3) Creating a task force within the Department of the Attorney General to:
 - (A) Collect data on and examine the effectiveness of providing lifeguards conditional liability protection for lifeguard services at State beach parks;
 - (B) Collect data on and examine the effectiveness and adequacy of warning signs at public beach parks, and protecting the State and counties from unlimited liability with regard to activities in the ocean and at public beaches;
 - (C) Collect data on and examine the effectiveness and adequacy of warning signs at public recreational lands, and protecting the State and counties from unlimited liability arising out of recreational activities on public lands; and
 - (D) Submit a written report of its findings and recommendations, including any proposed legislation, to the Legislature prior to the 2008 Regular Session; and
- (4) Amending section 46-72, Hawaii Revised Statutes, to conform the statutes of limitations for injuries or damages involving counties with the limitations applicable generally to the State and private citizens; and
- (5) Making technical and nonsubstantive amendments for the purposes of style and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1603, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1603, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Inouye, Hee, Hooser, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Hee, Slom). Representatives Ito, Waters, Thielen, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 36 on S.B. No. 162

The purpose of this measure is to designate Iolani Palace as the State of Hawaii Museum of Monarchy History and to exempt the State of Hawaii Museum of Monarchy History from the standards and conditions related to the receipt of funds contained in chapter 42F, Hawaii Revised Statutes.

Your Committee on Conference finds that the Friends of Iolani Palace has served as the "de facto" caretaker for over forty years by maintaining Hawaii's most significant historic house museum. While the Friends of Iolani Palace have received financial assistance from the State, this

assistance is not always received on a yearly or consistent basis. Thus, the Friends of Iolani Palace rely heavily on private donations and small, piecemeal state subsidies.

Your Committee on Conference has amended this measure by:

- (1) Clarifying the purpose section by adding additional purposes relating to the examination of the use of funds appropriated and an annual report requirement of the functions accomplished;
- (2) Clarifying that it is the official designation of the Friends of Iolani Palace that shall be the State of Hawaii Museum of Monarchy History;
- (3) Transferring the responsibility to provide annual reports to the Legislature from the Director of the Friends of Iolani Palace to the State of Hawaii Museum of Monarchy History;
- (4) Changing the effective date of this measure to be effective upon its approval; and
- (5) Making technical and nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 162, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 162, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, English, Hee, Tokuda, Slom, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, none. Representatives Ito, Chong, Sagum, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 37 on S.B. No. 1154

The purpose of this measure is to provide flexibility to the Board of Regents of the University of Hawaii in the financing and administration of capital projects within the jurisdiction of the University.

Your Committee on Conference finds that pursuant to Act 115, Session Laws of Hawaii 1998, the University of Hawaii was granted greater flexibility in managing its resources. Since that time, the University of Hawaii has gained increased autonomy over its operations and administration and established itself as an entity that is highly capable of handling a vast array of responsibilities, including financial strategy. This measure provides the University of Hawaii with increased financial autonomy through the authority to issue revenue bonds for university capital projects, subject to approval by the Governor. This authority will aid the University of Hawaii in ensuring that it remains a premiere institution of higher learning that will rival the elite universities of this nation and in continuing to provide safe and modern facilities for its students.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Including a \$100 million limit on the total principal amount of revenue bonds that may be issued by the Board of Regents;
- (2) Including an appropriation of \$100 million from the revenue bond proceeds authorized for university projects;
- (3) Changing the effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1154, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1154, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Taniguchi, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Taniguchi). Representatives Chang, Tokioka, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 38 on S.B. No. 138

The purpose of this measure is to ensure that the Diamond Head State Monument, one of Hawaii's most recognized natural monuments, is sufficiently preserved and cared for by establishing a sub-account within the state parks special fund into which eighty per cent of admission proceeds generated by the Diamond Head State Monument will be deposited to cover costs for operations, repair, and maintenance of the Diamond Head State Monument.

Your Committee on Conference finds that the moneys generated through admission fees to the Diamond Head State Monument are currently deposited into the state parks special fund to be used for the maintenance of state parks and state parks programs statewide. Your Committee on Conference believes that the funds the Diamond Head State Monument receives from the state parks special fund is not sufficient to ensure proper operation and maintenance of the monument. Establishing a sub-account within the state parks special fund into which a percentage of the proceeds generated by the admission fees to the Diamond Head State Monument to cover costs for operations, repair, and maintenance of the Diamond Head State Monument will provide additional financial support to protect and maintain this highly recognizable landmark.

Your Committee on Conference has amended this measure by:

- (1) Changing the percentage of the admission proceeds to be deposited into the sub-account to fifty-five per cent; and
- (2) Changing the effective date of this measure to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 138, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 138, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Ito, Chong, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 39 on S.B. No. 1182

The purpose of this measure is to provide financial relief for residents of certain residential care homes by increasing the monthly needs allowance of care home residents.

Your Committee on Conference finds that the monthly needs allowance for residents of long-term care and community care home facilities in Hawaii has not been raised since 1988, when it was set at \$30. Your Committee on Conference further finds that the amount is far too low for these residents to procure the daily necessities essential to enjoy a minimally acceptable quality of life. Therefore, your Committee on Conference finds it is in the public's interest to raise the monthly needs allowance from \$30 to \$50.

Your Committee on Conference amended this measure to:

- (1) Provide that the monthly needs allowance shall also be paid to individuals who are incapacitated; provided that the operator of the residence or facility at which the person resides spends the money on behalf of the person and provides a written accounting of the spending;
- (2) Take effect on July 1, 2007; and
- (3) Make technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1182, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1182, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Fukunaga, Baker, Hooser, Ihara, Sakamoto, Hemmings, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 3 (Fukunaga, Ihara, Hemmings). Representatives Green, Shimabukuro, Mizuno, Rhoads, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 40 on S.B. No. 1222

The purpose of this measure is to:

- (1) Establish that all energy technology systems must be installed and placed in service in the State of Hawaii to obtain the State's income tax energy tax credit; and
- (2) Expand tax credits applicable to shareholder pro rata shares in S corporations.

Your Committee on Conference has amended this measure by changing the applicable years of this measure from taxable years beginning after December 31, 2007, to taxable years beginning after December 31, 2006.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1222, S.D. 3, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1222, S.D. 3, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Fukunaga, Baker, Hooser, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Hooser). Representatives Morita, M. Oshiro, Carroll, Chong, Thielen, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 2 (Chong, Thielen).

Conf. Com. Rep. 41 on S.B. No. 1191

The purpose of this measure is to make appropriations for various traffic improvements to enhance pedestrian safety, and to establish a photo red light imaging detector system program.

This measure makes appropriations to the Department of Transportation for the following purposes:

- (1) To identify and implement immediate improvements to high-risk crosswalks and road crossings;
- (2) To work with the counties and nonprofit organizations to identify and implement improvements to high-risk crosswalks and road crossings, and to concurrently conduct a study to identify state and county intersections where the time to cross the intersection is insufficient for the elderly, children, and disabled pedestrians, and to develop additional plans to make crosswalks and roadways safer;
- (3) For the purchase and installation of traffic countdown timers at state-controlled intersections;
- (4) For a public awareness campaign on pedestrian safety; and
- (5) For the purchase and installation of pedestrian-activated signals, and for pilot projects such as the painting of advanced crosswalk markings, hand-carried signs and flags, and enforcement of crosswalk laws for drivers and pedestrians, among others.

This measure also makes appropriations to the counties as follows:

- (1) For the purchase and installation of traffic countdown timers; provided that each county shall provide matching funds; and
- (2) For the purposes of establishing the photo red light imaging detector system program.

Your Committee on Conference finds that the elderly, children, and disabled persons are the most vulnerable to pedestrian accidents, while others are also at risk. Making Hawaii's roadways safer for pedestrians is consistent with Kamehameha's famous law, Ke Kanawai Mamalahoe, the Law of the Splintered Paddle, now in Article IX of the State Constitution. Ke Kanawai Mamalahoe ensures that every man, woman, and child is able to travel freely and in peace, with the right "to lie down to sleep by the roadside without fear of harm." Due to the alarming rise in pedestrian accidents so far this year, immediate action is needed.

Your Committee has amended this measure by:

- (1) Appropriating the sum of \$1,500,000 in each fiscal year (\$3,000,000 total) for expenditure by the Department of Transportation of which (\$1,800,000 total) to be expended for pedestrian safety improvements, and as matching grants-in-aid to each county (\$1,200,000 total) for pedestrian safety improvements;
- (2) Deleting all other appropriations;
- (3) Deleting the provisions relating to a photo red light imaging detector system; and
- (4) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1191, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1191, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, Lee, Nishimoto, Pine, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 42 on S.B. No. 1929

The purpose of this measure is to allow the Chief Procurement Officer to assess administrative fines for noncompliance with the Hawaii Public Procurement Code.

Your Committee on Conference finds that existing law does not provide for the assessment of administrative fines for noncompliance with procurement laws. While a criminal misdemeanor sanction applies to providers of services and vendors of goods for violation of the procurement code, there are no administrative sanctions for anyone whose actions may not warrant criminal prosecution. Furthermore, criminal sanctions are rarely utilized inasmuch as most procurement violations are usually inadvertent, a result of administrative error, lack of knowledge, or simple carelessness.

This measure is intended to address situations wherein an agency's inappropriate procurement decision or action appears to be a lack of concern to adequately understand the seriousness of the violation. In these flagrant but infrequent situations, the authority to assess an administrative fine will help to emphasize the importance of compliance with the State's procurement code.

Your Committee on Conference has amended this measure by:

- (1) Deleting the provision requiring the procurement policy board to establish proposed administrative rules for submission to the Legislature;
- (2) Deleting the repeal of the misdemeanor penalty; and
- (3) Changing the effective date from July 1, 2034 to upon its approval, with the proviso that the repeal of the criminal penalty takes effect on the day that the administrative rules on fines take effect, in order to maintain the criminal penalty during the transition.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1929, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1929, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Tsutsui, Kim, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Yamashita, Waters, Magaoay, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Waters).

Conf. Com. Rep. 43 on S.B. No. 1066

The purpose of this measure is to:

- (1) Require the Department of Agriculture to prescribe a schedule of service fee and charges and collect appropriate service fees or charges for pest inspection, quarantine, and eradication services from any importer of commercial shipments;
- (2) Establish the pest inspection, quarantine, and eradication fund; and
- (3) Make an appropriation out of the pest inspection, quarantine, and eradication fund.

Your Committee on Conference finds that invasive species pose a significant threat to the environment, culture, economy, and quality of life in Hawaii. The lack of adequate and sustainable funding to prevent the introduction of invasive species into the State inhibits enforcement. Increased inspection at ports of entry will help prevent new invasive species from becoming established by proactively preventing their entry through enhanced vigilance. This measure will assist in funding preventative and mitigative invasive species activities.

Your Committee on Conference has amended this measure by:

- (1) Establishing a set fee for the inspection, quarantine, and eradication of invasive species computed on the basis of one dollar for each twenty-foot equivalent unit per containers, in lieu of requiring the Department of Agriculture to establish a fee schedule;
- (2) Deleting the appropriation section; and
- (3) Changing the effective date from July 1, 2025 to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1066, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1066, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Tsutsui, Hooser, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Tsuji, Morita, Souki, M. Oshiro, Brower, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 2 (Souki, Ching).

Conf. Com. Rep. 44 on S.B. No. 17

The purpose of this measure is to prohibit government contracts with a value of less than \$1,000,000 for design professional services from requiring the design professional to defend the governmental body from any liability, damage, loss, claim, action, or proceeding.

This measure addresses the problems that arise from the fact that a great majority of architectural businesses may not be able to absorb the unpredictable costs of defending the State against all claims.

Your Committee on Conference has amended this measure by changing the effective date from January 1, 2112, to upon its approval and by making technical, nonsubstantive amendment for the purpose of style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 17, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 17, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Hee, Kim, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Yamashita, Waters, Magaoay, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Waters).

Conf. Com. Rep. 45 on S.B. No. 12

The purpose of this measure is to ensure fair pricing methodologies in the health insurance market by:

- (1) Prohibiting health insurance rates that are excessive, inadequate or unfairly discriminatory;
- (2) Requiring health care insurers to submit rate filings for approval by the Insurance Commissioner; and
- (3) Establishing penalties and appeal procedures.

Your Committee on Conference amended this measure by:

- (1) Removing language that clarified that "managed care plan" shall not include any health plan established or funded by any federal, state, or county government;
- (2) Including language that requires every managed care plan to file in triplicate with the Insurance Commissioner, every rate, charge, classification, schedule, practice, or rule and every modification of any of the foregoing;
- (3) Requiring the Insurance Commissioner to establish rules to ensure that confidential and proprietary information is protected and shall not be subject to public inspection;
- (4) Clarifying that the rates shall be established in accordance with actuarial principles, based on reasonable assumptions, and supported by adequate supporting and supplementary rating information;
- (5) Amending the filing waiting period to sixty days and the extension period to fifteen days;
- (6) Adding language authorizing the Insurance Commissioner to "make the following rate effective when filed: any special filing with respect to any class of health insurance, subdivision, or combination thereof that is subject to individual risk premium modification and has been agreed to under a formal or informal bid process";
- (7) Adding language that provides that rate filings shall not apply to third party administrator services, prepaid dental insurance offered by managed care plans, prepaid vision insurance offered by managed care plans, and disability insurers licensed under chapter 431;
- (8) Requiring the Insurance Commissioner to "... specify interim rates sufficient to protect the interests of the managed care plan and its enrollees, ensure the solvency of the managed care plan, maintain the plan's health care delivery, and prevent any impairment of enrollees' health care benefits. When a new rate becomes legally effective and the new rate is higher than the interim rate, the commissioner shall allow the managed care plan to retroactively adjust the premiums to the time when the interim rate was first imposed. If the new rate is lower than the interim rate, the commissioner may order that the difference be applied to stabilize future rates or be refunded to current enrollees of the managed care plan";
- (9) Changing the effective date to January 1, 2008; and
- (10) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 12, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 12, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Taniguchi, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Herkes, M. Oshiro, Sonson, Marumoto, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 46 on S.B. No. 795

The purpose of this measure is to require the Department of Accounting and General Services to establish a Statewide Building Code Council and implement a statewide building code.

Specifically, the measure outlines the requirements and provisions to be contained in the statewide building code. The measure also appropriates an unspecified amount for the operations of the State Building Code Council, including technical assistance services, and training and administrative assistance, as required, to be expended by the Department of Accounting and General Services.

Your Committee on Conference finds that the State has historically allowed the individual counties to establish their own building codes. The adoption of a uniform statewide building code applicable to one and two family dwellings, all other residential uses, commercial and industrial buildings, and state buildings would make it possible for building owners, designers, contractors, and code enforcers within the State to apply consistent standards. Your Committee on Conference believes that the health and safety considerations relating to establishing a statewide building code is of statewide interest, especially relating to emergency disaster preparedness.

Your Committee on Conference has amended this measure by:

- (1) Adding a purpose section that describes the differences in various codes from county to county and stating the overall purpose of the measure is to require the Department of Accounting and General Services to establish and implement a statewide building code;
- (2) Clarifying language to ensure that statewide building code requirements apply to all construction in the State of Hawaii;
- (3) Clarifying the descriptions of the Statewide Building Code Council;
- (4) Requiring the Statewide Building Code Council members to serve four-year terms;
- (5) Inserting a specific amount in the appropriation section for the operations of the Statewide Building Code Council, including technical assistance services, and training and administrative assistance as required;
- (6) Changing the effective date to July 1, 2007; and
- (7) Making technical nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 795, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 795, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Nishihara, Tsutsui, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Herkes, Sagum, Tokioka, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 47 on S.B. No. 678

The purpose of this measure is to exempt from the general excise tax amounts received by the operator of the Hawaii Convention Center for reimbursement of costs or advances made pursuant to a contract with the Hawaii Tourism Authority (HTA).

Existing law requires that the general excise tax be imposed on the operator of the Hawaii Convention Center based on the gross income that the operator derives from its contract with HTA, including the costs and advances that the operator receives for operating the convention center. Since the moneys that are paid to the operator are paid out of the Convention Center Enterprise Special Fund, some of the moneys that should be used to operate the convention center are in fact being used to pay the operator's general excise tax obligation. Exempting the costs and advances from the general excise tax in this case would make those moneys available for the marketing and operations of the Convention Center in accordance with the HTA contract.

Your Committee on conference has amended this measure by changing the effective date from July 1, 2030, to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 678, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 678, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Espero, Tsutsui, Kim, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Trimble). Representatives Yamane, Manahan, Chong, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 48 on S.B. No. 149

The purpose of this measure is to authorize the issuance of general obligation bonds to finance capital improvement projects in the State.

Your Committee on Conference finds that the total amount of principal and interest estimated for the general obligation bonds authorized under this measure, and for all bonds authorized and unissued and calculated for all bonds issued and outstanding, will not cause the debt limit of the State to be exceeded at the time of issuance.

Your Committee on Conference has amended this measure by:

- (1) Inserting the appropriate dollar amounts throughout the measure as provided by the Department of Budget and Finance; and
- (2) Making technical, nonsubstantive amendments for purposes of style and clarity.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 149, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 149, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Whalen). Representatives M. Oshiro, Nakasone, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 49 on S.B. No. 837

The purpose of this measure is to promote Hawaii's diversified agricultural industry and protect its agricultural lands for long term agricultural activities by authorizing the Agribusiness Development Corporation to purchase and lease privately owned agricultural lands in Kunia and Ewa.

Specifically, this measure:

- (1) Authorizes the Agribusiness Development Corporation to purchase privately owned agricultural lands in Kunia and Ewa with a combination of revenues derived through the issuance of general obligation bonds, general obligation reimbursable bonds, revenue bonds, and general fund appropriations;
- (2) Appropriates funds to the Agribusiness Development Corporation for the purchase of agricultural lands in Kunia and Ewa that are owned by private entities;
- (3) Allows the Agribusiness Development Corporation to purchase, accept, and maintain permanent conservation easements;
- (4) Allows the Agribusiness Development Corporation to contract with a financial institution to provide lease management services, including the collection of lease rents and other moneys owed the corporation related to the lease of agricultural lands under the corporation's control; and
- (5) Allows the Agribusiness Development Corporation to lease the Kunia and Ewa agricultural lands under its control for up to fifty-five years.

Your Committee on Conference finds that enabling the Agribusiness Development Corporation to purchase agricultural lands in Kunia and Ewa, and then lease those lands for up to fifty-five years will ensure that these lands will remain for agricultural production. Your Committee on Conference believes that the purchase of strategic parcels of agricultural lands, such as the parcels in Kunia and Ewa, will ensure that these lands will remain in agriculture in perpetuity.

Your Committee on Conference has amended this measure by:

- (1) Deleting revenue bonds, general obligation bonds, and general obligation reimbursable bonds as financial vehicles that the Agribusiness Development Corporation may use to purchase lands in Kunia and Ewa;
- (2) Changing the blank appropriation amount to \$9,200,000 for the Agribusiness Development Corporation to purchase agricultural lands owned by private entities in Kunia and Ewa;
- (3) Changing the effective date of this measure from July 1, 2020, to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 837, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 837, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Tokuda, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Slom). Representatives Tsuji, Chong, Brower, Yamane, Ching, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 50 on S.B. No. 1284

The purpose of this bill is to establish a policy to enable the Employees' Retirement System (ERS) to eventually eliminate its unfunded liability.

The bill would:

- (1) Increase the state and county contributions to the ERS for all their employees;
- (2) Repeal one of three provisions allowed an adjustment of the employer contribution rates "if the period required to amortize the unfunded accrued liability falls below 25 years" and replaces it with "if there is no unfunded accrued liability";
- (3) Change the salary assumptions from an increase of four percent to assumptions adopted by the Board on the recommendation of the actuary; and
- (4) Prohibit benefit enhancements whenever an unfunded accrued liability exists.

Your Committee on Conference amended the bill by providing that a moratorium on benefit enhancements be from January 2, 2008 to January 2, 2011.

Your Committee on Conference further amended the bill by changing the effective date from July 1, 2059 to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1284, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1284, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Kokubun). Representatives Sonson, Nakasone, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 51 on H.B. No. 1379

The purpose of this bill is to conform the State Unemployment Insurance (UI) law to federal law by:

- (1) Excluding services by certain temporary migrant agricultural workers who are residents of foreign countries from the employment security law; and

- (2) Treating Indian tribes similarly to government and nonprofit groups in providing coverage under the employment security law.

Hawaii is currently experiencing a worker shortage, and many businesses, especially agricultural industries, have been forced to hire employees from foreign countries on a temporary basis. Under current law, these businesses are required to pay state unemployment taxes on these individuals even though they will never qualify to collect unemployment benefits. This measure attempts to remedy this situation.

Your Committee on Conference has amended this measure by making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1379, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1379, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, Hooser, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Sonson, Nakasone, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 52 on H.B. No. 1646

The purpose of this bill is to protect the health and safety of consumers and the environment from the negative effects of pesticides by:

- (1) Requiring every pesticide retailer in the state to post a warning sign or place a warning sign at the product display areas with respect to the sale of pesticides;
- (2) Requiring the pesticide warning signs to contain at a minimum:
 - (A) Information on the proper handling, storage, and disposal of all pesticides sold;
 - (B) Emergency telephone numbers to call in case of pesticide poisoning; and
 - (C) Any other information deemed by the Department of Agriculture (DOA) to be appropriate and helpful for consumers;
- (3) Requiring DOA to adopt rules regarding the posting of the warning signs; and
- (4) Authorizing DOA to adopt any other rules including rules regarding the size and placement of the warning signs.

Your Committee on Conference has amended this bill by:

- (1) Correcting a typographical error to the definition of “distribute or sell”;
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1646, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1646, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Kokubun, Hooser, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Morita, Tsuji, Herkes, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 53 on H.B. No. 1628

The purpose of this bill is to raise consumer awareness of macadamia nut products by requiring labels on macadamia nut consumer packages claiming that a portion of the macadamia nuts was grown in Hawaii to specify the percentage by weight of Hawaii-grown macadamia nuts.

Your Committee finds that this bill will help protect consumers from misleading labels on macadamia nut packages by requiring clearer disclosures of the amount and origin of the raw or processed macadamia nuts sold in packages.

Your Committee has amended this measure by:

- (1) Making it effective upon its approval; and
- (2) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1628, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1628, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Taniguchi, Tokuda, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Tsuji, Herkes, Brower, McKelvey, Ching, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 54 on H.B. No. 349

The purpose of this bill is to protect the health and safety of bicyclists and motorists by:

- (1) Authorizing each county to adopt and enforce ordinances regulating both guided and unguided bicycle tour businesses operating on state and county highways; and
- (2) Requiring each county to follow federal guidelines for commercial bicycle tours when those tours begin in federal or state parks and continue on to state highways.

Current laws do not regulate bicycle tours operating on state or county roadways. While these tours provide a valuable service to Hawaii's tourism market, many safety and liability concerns have been raised by a number of individuals at both the state and county level. Allowing each county to adopt ordinances that regulate the operations of these tours provides safety for both the bicyclist and the motorist using public roadways.

Your Committee on Conference has amended this bill by:

- (1) Changing its effective date to upon approval; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 349, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 349, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, English, Fukunaga, Hemmings, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Souki, Yamane, Yamashita, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Pine).

Conf. Com. Rep. 55 on H.B. No. 714

The purpose of this bill is to assist the Department of Land and Natural Resources (DLNR) in the enforcement of laws protecting and conserving the state's natural resources and to protect its law enforcement personnel by:

- (1) Allowing the use of blue and red lights on approved law enforcement vehicles of its Division of Conservation and Resource Enforcement Division (DOCARE); and
- (2) Amending the definition of "authorized emergency vehicles" to include DOCARE vehicles.

Under state law, DOCARE officers are provided with full police powers to enforce all state laws and county ordinances within all lands and waters of the state under the jurisdiction of DLNR. However, patrol vehicles currently used by DOCARE are not authorized to use emergency lights that would designate their vehicles as law enforcement vehicles. Your Committee on Conference finds that the use of blue and red colored lights would not only act as a deterrent to criminal activity on state lands but also provide safety for DOCARE officers as they would be easily identified as law enforcement personnel.

However, your Committee on Conference has been notified by the Department of Public Safety (DPS) that vehicles used by their officers already use blue and red lights and that as currently written, it is unclear as to whether these law enforcement vehicles would not be authorized to use blue and red lights. Accordingly, your Committee on Conference has amended this measure by:

- (1) Amending section 291-31.5, Hawaii Revised Statutes (HRS), to allow DOCARE vehicles to operate, affix, display, or possess a lamp, reflector, or illumination device that appears to be the color blue and red rather than creating an entirely new section under Chapter 291, HRS;
- (2) Clarifying that DPS law enforcement vehicles are also allowed to use blue and red lamps, reflectors, or illumination devices that are authorized by the Director of Public Safety;
- (3) Including DPS and DOCARE vehicles under the definition of "authorized emergency vehicle" in section 291C-1, HRS; and
- (4) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 714, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 714, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, English, Tokuda, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Souki, Ito, Waters, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 56 on H.B. No. 71

The purpose of this bill is to monitor the qualifications and competence of nurse aides practicing in the state by providing a process for the certification and recertification of nurse aides who work in nursing facilities participating in Medicare and Medicaid programs and in other state-licensed and state-certified health care settings.

Your Committee on Conference has amended this bill by making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 71, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 71, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Ige, Taniguchi, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Green Shimabukuro, McKelvey, Mizuno, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 57 on H.B. No. 1264

The purpose of this bill is to successfully implement a sustainable affordable-housing development model by authorizing the Hawaii Housing Finance and Development Corporation (HHFDC) to waive the ten-year-buyback and shared-appreciation-equity restrictions under Chapter 201H, Hawaii Revised Statutes (HRS), for:

- (1) Lessees of sustainable affordable residential leases under section 516-1, HRS; and
- (2) Designated immediate family members who are offered the right of first refusal upon the death of the purchaser.

Your Committee on Conference has amended this bill by deleting the waiver of restrictions for the sale or transfer to a designated immediate family member who is offered the right of first refusal upon the death of the purchaser.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1264, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1264, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Ihara, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Ihara). Representatives Shimabukuro, Rhoads, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 58 on H.B. No. 1370

The purpose of this bill is to appropriate emergency funding to the Department of Health's (DOH) Adult Mental Health Division (Division).

Pursuant to the requirements set forth in Article VII, Section 9, of the Hawaii State Constitution, the Governor, in Governor's Message No. 234 to the Legislature, requested immediate consideration and passage of this bill by the Legislature, citing an existing critical funding shortage.

This bill appropriates funds for fiscal year 2006-2007 to sustain the ongoing services provided by the Division.

Your Committee on Conference has amended this bill by:

- (1) Changing the appropriation to \$8,377,698; and
- (2) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1370, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1370, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Whalen, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Whalen). Representatives Green, Mizuno, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 59 on H.B. No. 1608

The purpose of this bill is to protect public health and safety during traffic emergencies by allowing for the establishment of traffic emergency zones to provide access to an affected area. Among other things, this measure:

- (1) Provides the Governor or state director of transportation in the case of a state highway, or a mayor or county director of transportation in the case of a county highway, with emergency powers to protect public health and safety in cases of highway closures;
- (2) Exempts state or county highway or street improvements from certain county permitting and approval processes and from the state procurement code when an area has been designated a traffic emergency zone;
- (3) Allows for the acquisition of cane haul roads by the state or county department of transportation for designation as state or county highways for a temporary period of time;
- (4) Provides a qualified immunity for government for a claim for negligence in the design, construction, repair, and correction of work performed; and
- (5) Indemnifies the owner of a cane haul road from any liability that may arise out of the use of such cane haul road when designated as a state highway.

Many communities throughout the state, especially those with limited highway access, are often affected when a major accident or natural disaster occurs. Some communities have faced hours of isolation in such instances. Allowing traffic emergency zones to be established will aid the State Department of Transportation and county departments of transportation in providing quicker access to areas affected by the closure of the only means of travel into or out of a community.

Your Committee on Conference notes that the qualified standard of care under the emergency doctrine is intended to ensure that negligence claims take into consideration the relevant facts and circumstances of the emergency situation when evaluating the reasonableness of actions or omissions, including the time constraints and seriousness of the emergency. Greater latitude should be given when time is short and potential consequences are catastrophic, such as the need to quickly evacuate people in the face of a tsunami. On the other hand, greater care should be taken where time constraints or consequences are less severe. Consideration should also be given to the time available for reasonable actions in advance of expected emergencies or the time available if the emergency access is to continue over an extended period.

Your Committee on Conference has amended this measure by:

- (1) Clarifying that designation of a traffic emergency zone can occur when substantial endangerment to public health and safety is or is highly likely to be caused by the temporary closure of, or lack of adequate access to an area, by a county highway or state highway; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1608, S.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1608, S.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, Evans, B. Oshiro, McKelvey, Pine, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Evans).

Conf. Com. Rep. 60 on H.B. No. 1612

The purpose of this bill is to expand consumer protections against identity theft by allowing security freezes to be placed on consumer credit reports upon the request of consumers who are not victims of identity theft.

Your Committee on Conference finds that there is a need to provide greater protections against identity theft by allowing any consumer to place a security freeze on the consumer's credit report, regardless of whether the consumer has been the victim of identity theft so that the consumer does not have to wait until the consumer can establish that the consumer's identity has been stolen before requesting the security freeze.

Your Committee on Conference has amended this measure by:

- (1) Specifying that any consumer who is a Hawaii resident may place a security freeze on the consumer's credit report;
- (2) Clarifying that a consumer credit reporting agency cannot charge a fee to a victim of identity theft for placing, lifting, or removing a security freeze on a credit report, but may charge any other consumer a fee not to exceed \$5 for each request by the consumer to place, lift, or remove a security freeze from a credit report;
- (3) Changing the effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1612, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1612, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Ihara, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Ihara). Representatives Herkes, Waters, McKelvey, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 61 on H.B. No. 1337

The purpose of this bill is to provide additional protections for consumers of pre-paid cemetery or funeral services. Specifically, this bill, among other things:

- (1) Establishes procedures for the cancellation, termination, and refund of pre-need funeral and pre-need interment services contracts;
- (2) Requires cemetery authorities to file and maintain copies of maps or plats providing unique identifiers for each plot, niche, mausoleum, or crypt, and to maintain a permanent, accurate record of the identity of each person whose remains are located in the cemetery;
- (3) Gives contracts containing pre-need interment services priority over mortgages or other liens perfected on cemetery property that has been dedicated to cemetery use;
- (4) Creates a statutory lien upon all real and personal property held by a pre-need funeral authority when its pre-need funeral trusts are not fully funded;
- (5) Requires a cemetery or pre-need funeral authority to disclose certain additional information to a purchaser of cemetery property or pre-need funeral services in a written contract;
- (6) Requires the records of cemetery and pre-need funeral authorities to include change of address notices and cancellation notices from purchasers, and notices of termination sent to purchasers; and
- (7) Increases from \$1,000 to \$5,000, the maximum amount of fines for each violation of the Cemetery and Funeral Trusts law committed by cemetery or pre-need funeral authorities.

Your Committee on Conference finds that this measure improves consumer protections within the death care industry by clarifying and enhancing both the rights of purchasers of pre-need funeral or interment services and the responsibilities of cemetery and pre-need funeral authorities.

Your Committee on Conference has amended this measure by making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1337, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1337, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Herkes, Waters, Ching, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 62 on H.B. No. 487

The purpose of this bill is to make housekeeping amendments to implement laws relating to the Hawaii Housing Finance and Development Corporation that were enacted during the Regular Session of 2006.

Your Committee has amended this bill by:

- (1) Adding a definition of "elderly housing project"; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 487, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 487, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Shimabukuro, Rhoads, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 63 on H.B. No. 692

The purpose of this bill is to extend the lapse date, from June 30, 2007, to June 30, 2010, for special purpose revenue bonds previously authorized to assist Aloun Farms in building an agricultural processing plant.

Your Committee on Conference has amended this measure by changing its effective date to June 29, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 692, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 692, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Tsuji, M. Oshiro, Brower, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 64 on H.B. No. 375

The purpose of this bill is to enhance pedestrian safety by:

- (1) Requiring drivers to stop for pedestrians within a crosswalk under certain conditions;
 - (2) Clarifying when it would be safe for a driver to proceed after stopping for a pedestrian in a crosswalk;
 - (3) Providing specific monetary penalties for a driver who violates the crosswalk law, as follows:
 - (A) For a first infraction, a fine of \$150;
 - (B) For a second infraction, a fine of \$300, and revocation of license and privilege to operate a vehicle for a period of 90 days; and
 - (C) For a third and subsequent infraction committed within two years of the date of a second infraction, a fine of \$1,000, and revocation of license and privilege to operate a vehicle for a period of 180 days;
- and
- (4) Providing a flat penalty of a \$100 fine for each violation of the crosswalk law by a pedestrian.

The number of pedestrians crossing the street that are injured or killed appears to be increasing every year, with approximately 122 pedestrian fatalities occurring over the past four years. Your Committee on Conference finds these numbers to be unacceptable. While both inattentive drivers and pedestrians share some of the blame, drivers have the greater potential to cause injury to a pedestrian with their vehicles. Clarifying a driver's duty to stop and yield the right of way for a pedestrian in a crosswalk and establishing increased fines for both drivers and pedestrians who violate Hawaii's crosswalk laws will make Hawaii's streets safer for everyone.

However, your Committee on Conference notes that as currently drafted, drivers who violate Hawaii's crosswalk law multiple times may receive lesser fines due to the timeframe in which the infraction occurred. Accordingly, your Committee on Conference has amended this measure by:

- (1) Clarifying that:
 - (A) For a first infraction, or any infraction not preceded within one year by a prior violation, a fine of \$150 shall be imposed;
 - (B) For an infraction that occurs within one year of a prior violation, a fine of \$300 and revocation of license and privilege to operate a vehicle for a period of 90 days shall be imposed; and
 - (C) For an infraction that occurs within two years of two prior violations and for four or more violations, regardless of when they were committed, a fine of \$1,000, and revocation of license and privilege to operate a vehicle for a period of 180 days;
- and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 375, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 375, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, B. Oshiro, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 65 on H.B. No. 1518

The purpose of this bill is to minimize frivolous or fraudulent tort claims against engineers, architects, landscape architects, and surveyors by providing a Design Claim Conciliation Panel (Panel) to review claims.

Your Committee on Conference finds that design professionals have had fewer protections against frivolous lawsuits since the repeal in 2004 of the Design Professional Conciliation Panel Law established by Act 228, Session Laws of Hawaii 1981. This measure seeks to fill that void by establishing a new conciliation panel to review the merits of tort claims against design professionals and providing procedures to resolve these claims before resorting to litigation.

Your Committee on Conference has amended this measure by:

- (1) Requiring that the design professional that must be consulted by the claimant or the claimant's attorney prior to filing a claim with the Panel must also be knowledgeable and experienced in Hawaii building codes and construction practices and the professional standard of care in Hawaii;
- (2) Changing the effective date to January 1, 2008; and

- (3) Making technical, nonsubstantive amendments for clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1518, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1518, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Hee, Sakamoto, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Herkes, Waters, McKelvey, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 66 on H.B. No. 1830

The purpose of this bill is to provide a safe haven for newborns by:

- (1) Providing immunity from prosecution for persons leaving an unharmed newborn at a hospital, fire station, or police station, or with emergency medical services personnel, within 72 hours of birth;
- (2) Providing immunity from liability to the hospital, fire station, police station, or emergency services personnel who receive the newborn;
- (3) Requiring that the individual leaving the newborn provide written information on the family medical history of the child; and
- (4) Requiring personnel to make a reasonable effort to obtain certain information pertaining to the child from the person leaving the child.

Your Committee on Conference has amended this bill by:

- (1) Removing the requirement that written information be provided on the family medical history of the child;
- (2) Inserting provisions for the acceptance of a harmed newborn child; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1830, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1830, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Hee, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Shimabukuro, Green, Waters, Mizuno, Marumoto, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 67 on H.B. No. 964

The purpose of this bill is to ensure the safety of workers by providing a cost effective detection and deterrence tool of drug testing. Specifically, this bill facilitates employment-related drug testing by:

- (1) Including, in the definition of "substance abuse on-site screening test" under the Substance Abuse Testing law, the use of screening tests that may be used for forensic testing as a workplace testing device;
- (2) Requiring employers using a screening test for pre-employment screening to administer the test in accordance with the manufacturer's package insert if there is no United States Food and Drug Administration insert; and
- (3) Authorizing employers to drug test job applicants and unions to drug test members.

Drug use, especially the use of "crystal meth", is a major problem facing Hawaii, and is a growing problem in the workplace that contributes to an impaired workforce resulting in work quality issues. In an effort to promote drug-free environments, many employers require prospective employees to be subjected to substance abuse screening prior to employment. However, these tests can be costly and difficult to schedule since only a few laboratories conduct them. Your Committee on Conference finds that the use of oral fluid drug screening devices may provide a cost effective way for employers to provide drug screening of potential employees.

However, your Committee on Conference is also cognizant of concerns raised about this bill by both opponents and proponents of the measure, particularly with regard to confidentiality and false positive results. Accordingly, your Committee on Conference has amended this measure by:

- (1) Clarifying the definition of "substance abuse on-site screening test" (screening test) to mean a test that is manufactured by a facility that is certified as meeting the ISO 13485:2003 standard established by the International Organization for Standardization and which may be used by an employer in the workplace;
- (2) Deleting reference to a screening test under the definition of "substance abuse test" under Hawaii's Substance Abuse Testing law;
- (3) Deleting the requirement that a screening test be used for pre-employment screening purposes only;
- (4) Stipulating that every employer using a screening test administer the test according to the package insert accompanying the screening test;
- (5) Removing the authority of unions to drug test members;
- (6) Deleting the requirement that employers using a screening test adhere to rules pertaining to specimen collection, urine specimen, shipping of specimens, chain of custody, and confidentiality that may be applicable to on-site drug testing;
- (7) Inserting language stipulating that any indication of the presence of drugs, alcohol, or the metabolites of drugs by the screening test shall not be used to deny or deprive a person of employment or any benefit, or result in any adverse action against an employee or prospective employee unless a substance abuse test is conducted and certain requirements are met, including requiring an employer to have an employee or prospective employee report within 4 hours to a licensed laboratory for a substance abuse test;
- (8) Requiring the employer to bear the cost of the laboratory referral;

- (9) Allowing an employee or prospective employee to be denied or deprived of employment or benefits, or have adverse action taken against the employer or prospective employee, if the employee or prospective employee refuses to take or fails to report for a substance abuse test, provided that the employer gave written notice stating that:
 - (A) The employer followed statutorily established procedures for administering the screening test;
 - (B) The employee or prospective employee was informed that they may refuse to submit to the screening test; and
 - (C) If the employee or prospective employee fails to submit to a substance abuse test, the employer may take adverse employment action against the employee or prospective employee;
- (10) Establishing strict confidentiality requirements with regard to any information concerning the screening test; and
- (11) Making it unlawful for any employer to suspend, discharge, or discriminate against an employee because the employee tested positive for the presence of drugs, alcohol, or the metabolites of drugs in a screening test unless an employee fails or refuses to report to a laboratory for a substance abuse test.

Technical, nonsubstantive amendments were also made for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 964, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 964, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Hee, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Sonson, Green, Waters, B. Oshiro, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Waters).

Conf. Com. Rep. 68 on H.B. No. 1503

The purpose of this bill is to strengthen protections for dislocated workers by amending Hawaii's Dislocated Workers law. Specifically, this bill:

- (1) Expands the 60-day notification to employees and the Director of Labor and Industrial Relations (Director) of the closing of covered establishments by:
 - (a) Adding the notification requirement for the transfer of any covered establishment from one employer to another because of the sale, transfer, merger, and other business takeover or transaction of business interest; and
 - (b) Expanding the definition of "closing" to include bankruptcy and other close of business transactions;
- (2) Stipulating that if an employer does not provide at least 60 days' notice to each employee and the Director of a closing, divestiture, partial closing, or relocation of a covered establishment, the employer shall be liable to each affected employee for an amount equal to back pay and benefits for the period of violation;
- (3) Exempting a covered establishment which is actively seeking a buyer for a sale, transfer, or merger until such time the sale, transfer, or merger results in a divestiture from notification requirements until a divestiture occurs; and
- (4) Imposing penalties on an employer who fails to notify the Director or employees of a closing, partial closing, divestiture, or relocation of a business with fines being deposited into the Employment and Training Fund.

Current Hawaii law protects employees who face termination from employment due to a sudden closure or partial closure of a business as a result of a sale, transfer, merger, or transaction of business interests. However, your Committee on Conference finds that bankruptcies and divestitures of businesses are not covered under current law. This bill will help ameliorate the effects these situations will have on people's lives.

However, your Committee on Conference notes that concerns were raised regarding the exemption from the notification requirements for businesses actively seeking a buyer for a sale, transfer, or merger and whether these businesses would be able to comply with the 60-day notice requirement. Accordingly, your Committee on Conference has amended this measure by:

- (1) Stipulating that a business actively seeking a buyer for a sale, transfer, or merger is not required to provide 60-days' notice until the employer has entered into a binding agreement for the sale, transfer, or merger of the covered establishment that results in a divestiture; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1503, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1503, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Kokubun). Representatives Sonson, Waters, Nakasone, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Nakasone).

Conf. Com. Rep. 69 on H.B. No. 791

The purpose of this bill is to establish a requirement for ethanol content for each grade of gasoline produced, imported, or sold in the State. Specifically, this measure requires that premium gasoline produced, imported, or sold in the State for use in motor vehicles contain no ethanol.

Your Committee finds that there are small niche markets, especially to fill a non-automobile demand, for gasoline that contains no ethanol. Your Committee believes, however, that an attempt to allow the free market to meet this demand should be explored.

Accordingly, your Committee has amended this bill by:

- (1) Deleting the amendments to chapter 486H, Hawaii Revised Statutes, that refer to ethanol content requirement, and deleting the repeal of section 486J-10, Hawaii Revised Statutes;
- (2) Requiring fuel distributors to report to the Department of Business, Economic Development, and Tourism on the distribution and availability of gasoline that does not contain ethanol, and requiring the Department to report its findings prior to the 2008 Regular Session of the Legislature for the purpose of assisting the Legislature in determining future policy to ensure the availability of non-blended gasoline for certain watercraft, small engine, and light aircraft markets; and
- (3) Changing the effective date to be upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 791, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 791, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Taniguchi, Hooser, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Morita, Herkes, McKelvey, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 70 on H.B. No. 1246

The purpose of this bill is to deter the theft of copper by:

- (1) Establishing theft of copper as a felony offense; and
- (2) Imposing additional requirements for, and establishing additional penalties for violations relating to, the sale of copper to scrap dealers.

Your Committee on Conference has amended this bill by:

- (1) Allowing a scrap dealer to only accept the seller's, and not the seller's agent's, written statement that the seller has the lawful right to sell and dispose the copper;
- (2) Requiring a scrap dealer to report to the police not only suspicious attempted sales but all instances of attempted sales in which the seller does not provide a receipt or notarized declaration;
- (3) Imposing mandatory minimum sentencing for violations of the scrap dealer licensing and statement requirements;
- (4) Clarifying that the mandatory minimum fine of \$5,000 and six-month suspension of the scrap dealer's license applies not only to the third offense but to all subsequent offenses;
- (5) Providing that a scrap dealer is subject to license revocation if the third or subsequent offense occurs within a five-year period from the occurrence of two prior offenses;
- (6) Clarifying that the offense of theft of copper applies only to copper that weighs a pound or more, instead of any property that weighs a pound or more and contains copper in whole or in part;
- (7) Including a sunset date of July 1, 2009; and
- (8) Making technical, nonsubstantive changes for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1246, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1246, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Waters, B. Oshiro, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 71 on H.B. No. 1130

The purpose of this bill is to improve our election system by:

- (1) Revising various election campaign filing deadlines and filing periods;
- (2) Clarifying the treatment of Internet activity under the campaign spending law by amending the definitions of "contribution" and "expenditure";
- (3) Requiring noncandidate committees to register with the Campaign Spending Commission (Commission) by filing an organizational report and to file the report earlier than candidate committees under certain circumstances;
- (4) Requiring:
 - (A) Noncandidate committees;
 - (B) Board of Education candidates;
 - (C) Board of Education candidate committees; and
 - (D) Candidates who were previously exempt from mandatory electronic filing because their contributions or expenditures were \$5,000 or less,

to file their reports by electronic means;
- (5) Repealing the right of a candidate or candidate committee without access to a computer or the Internet to request a waiver from the Commission from the mandatory electronic filing requirement;

- (6) Repealing the two-fundraisers-per-election limit that currently applies to candidates who are not running for statewide office;
- (7) Clarifying the applicability of the cap on contributions by nonresident individuals and persons;
- (8) Increasing amounts that may be spent per voter for state and county elections in a partially publicly-funded campaign;
- (9) Adding the Office of the Prosecuting Attorney as an election subject to the spending limitation per voter in partially publicly-funded campaigns; and
- (10) Increasing the maximum amount of public funding available to partially publicly-funded campaigns.

Your Committee on Conference has amended this measure by:

- (1) Deleting the sections relating to increased expenditure limits and available public funds for partially publicly-funded campaigns; and
- (2) Changing the effective date to take effect upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1130, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1130, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Waters, B. Oshiro, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 72 on H.B. No. 895

The purpose of this bill is to provide the counties and tow companies with the tools necessary to take custody and properly dispose of abandoned vehicles in a more efficient manner by allowing the counties to increase registration fees and thereby increase deposits into the Highway Beautification and Disposal of Abandoned or Derelict Vehicles Revolving Fund to defray costs associated with the storage of abandoned or derelict vehicles.

Abandoned and derelict motor vehicles mar the beauty of Hawaii's landscape and, at times, create unsafe situations on our roadways. While the counties work diligently to remove these vehicles in a timely manner, increases in the number of abandoned vehicles, along with a lengthy notification process that sometimes takes upwards of three months, has caused the problem to steadily worsen.

However, storage space problems, as well as increased operational and storage costs, have caused many tow companies financial hardship. As such, your Committee on Conference has amended this measure by:

- (1) Allowing motor vehicle registration fees to be increased up to a maximum of \$10;
- (2) Increasing towing and storage fees that towing companies may charge; and
- (3) Decreasing the number of days in which the owner of the towed motor vehicle must be notified.

Your Committee on Conference is also cognizant of the fact that many complaints have been received regarding the charging of "unhooking" fees for vehicles that are hooked to a tow-truck when an owner appears on the scene to recover a vehicle, and "overtime" fees for tows occurring during the evening hours and on weekends. Accordingly, your Committee on Conference has further amended this measure by:

- (1) Eliminating the ability of tow-companies to charge overtime and unhooking fees; and
- (2) Changing the effective date to July 1, 2007.

Technical, nonsubstantive amendments were also made for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 895, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 895, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, English, Tsutsui, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, Har, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 73 on H.B. No. 14

The purpose of this bill is to repeal the transfer of functions from the Department of Budget and Finance to the Department of Education as specified in Act 51, Session Laws of Hawaii 2004, as amended, because the two departments have improved the fiscal processes between them.

Your Committee on Conference has amended this bill by making technical, nonsubstantive amendments for purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 14, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 14, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 74 on H.B. No. 275

The purpose of this bill is to protect student-athletes and educational institutions from potentially unscrupulous practices of athlete agents by enacting the Uniform Athlete Agents Act, which requires sports agents to register with the Department of Commerce and Consumer Affairs, and sets forth requirements for agreements between athlete agents and student-athletes.

Your Committee on Conference has amended this bill by:

- (1) Changing the effective date to July 1, 2008; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 275, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 275, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Hee, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Chang, Herkes, Tokioka, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 75 on H.B. No. 1372

The purpose of this bill is to appropriate \$439,684 as an emergency appropriation to reimburse costs associated with the delivery of emergency aeromedical services on Oahu by the Hawaii Army National Guard or other provider.

Pursuant to the requirements set forth in Article VII, section 9, of the Constitution of the State of Hawaii, the Governor has requested immediate consideration and passage of this bill, citing an existing critical funding emergency to continue aeromedical services on Oahu.

Your Committee on Conference has amended this bill by:

- (1) Increasing the appropriation to \$1,444,828; and
- (2) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1372, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1372, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Mizuno, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 76 on H.B. No. 1063

The purpose of this bill is to allow the Department of Defense to receive and expend all the federal Temporary Assistance to Needy Families funds received from the Department of Human Services for the Hawaii National Guard's Operation About Face family of programs statewide, by increasing the amount for fiscal year 2006-2007 from \$4,700,000 to \$7,900,000 in item I-20 of section 3 of Act 178, Session Laws of Hawaii 2005, as amended by Act 160, Session Laws of Hawaii 2006.

Your Committee on Conference has amended this bill by making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1063, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1063, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Tsutsui, Chun Oakland, Hemmings, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Evans, Har, Pine, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Pine).

Conf. Com. Rep. 77 (Majority) on H.B. No. 30

The purpose of this bill is to protect Hawaii's interests in international trade agreements by prohibiting the Governor from entering into any trade agreement without the approval of the Legislature through concurrent resolution adopted by a majority vote of the Senate and House of Representatives. If the Legislature is not in session, the Governor is required to notify the President of the Senate and Speaker of the House of Representatives and allow the Legislature to consider approval of the procurement provisions in a special session.

Your Committee on Conference has amended this bill by:

- (1) Clarifying that the Legislature may, but is not required to convene a special session to consider approval of the procurement provisions;
- (2) Clarifying that the Governor may not approve a trade agreement without legislative approval by a way of a concurrent resolution; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 30, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 30, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, English, Fukunaga, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Tsutsui, Whalen). Representatives Cabanilla, Yamashita, Tokioka, Thielen, Managers on the part of the House. Ayes, 2. Noes, 1 (Thielen). Excused, 1 (Yamashita).

Conf. Com. Rep. 78 on H.B. No. 334

The purpose of this bill is to demonstrate that Hawaii can successfully use its renewable resources to generate electricity by authorizing up to \$10,000,000 in special purpose revenue bonds to be issued to assist Sopogy, Inc., to establish a solar farm power plant at the Natural Energy Laboratory of Hawaii Authority (NELHA).

Your Committee on Conference finds that space limitations at NELHA may prevent Sopogy from securing the land needed for its solar farm project and has thus amended this bill to allow Sopogy to establish its project at suitable sites in the state other than the NELHA site.

Your Committee on Conference finds that Sopogy's solar farm power plant will move our state toward independence from petroleum products by demonstrating the viability and value of solar power as part of Hawaii's renewable energy portfolio.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 334, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 334, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Tsutsui, Hooser, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Yamashita, Morita, Carroll, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 79 on H.B. No. 1364

The purpose of this bill is to expand participation in the State Rent Supplement Program (Program) by:

- (1) Requiring the Hawaii Public Housing Authority (HPHA) to allow individuals and families living in transitional shelters, who are homeless or on the public housing or Section 8 wait lists, to be eligible for the Program wait list; and
- (2) Removing the \$160 per month cap on payments and requiring the Program to serve individuals with incomes up to 95 percent of the area median income.

Your Committee on Conference has amended this bill by:

- (1) Removing the provisions requiring HPHA to allow individuals and families living in transitional shelters, who are homeless or on the public housing or Section 8 wait lists, to be eligible for the Program wait list;
- (2) Specifying that income limits are based on annual median income (AMI) as determined by the United States Department of Housing and Urban Development;
- (3) Requiring HPHA to give preference to qualified tenants with incomes at or below 80 percent AMI; and
- (4) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1364, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1364, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Tsutsui, Ihara, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Tsutsui). Representatives Shimabukuro, Rhoads, Hanohano, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 80 on H.B. No. 402

The purpose of this bill is to provide the Department of Land and Natural Resources the necessary tools for proper stewardship of state lands by broadening the use of the Land Conservation Fund to include:

- (1) Payments of debt service on state financial instruments relating to the acquisition of interests or rights in land having value as a resource to the State; and
- (2) Acquisition of interests or rights in land having value as a resource to the State through the establishment of:
 - (A) Permanent conservation easements for the preservation and protection of land for agricultural use; or
 - (B) Agricultural easements.

Your Committee on Conference has amended this bill by:

- (1) Changing the effective date to July 1, 2007; and
- (2) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 402, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 402, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Ito, Tsuji, Chong, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 81 on H.B. No. 250

The purpose of this bill is to meet the critical demand for harbor expansion and upgrades by establishing a formal partnership between the Aloha Tower Development Corporation (ATDC) and the Department of Transportation (DOT) for the development of Honolulu Harbor and Kewalo basin infrastructure projects on an expedited basis.

Your Committee on Conference finds that the continuing demand for further improvements and development of harbor facilities to meet rapid growth is a challenge that harbors statewide face. Your Committee on Conference therefore, believes that the planning of improvements and development of harbors statewide by ATDC is desirable. In particular, your Committee on Conference recognizes that the needs of Kahului Harbor are dire and should be treated with the utmost priority and urgency. However, due to the jurisdictional constraints of the ATDC, your Committee on Conference has amended this bill by:

- (1) Removing Kewalo Basin and the Kakaako area lands from the scope of this bill; and
- (2) Authorizing ATDC to partner with DOT only for the development of Honolulu Harbor and its adjacent lands.

This bill has also been amended by:

- (1) Deleting the provision for legislative approval on a project-by-project basis; and
- (2) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 250, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 250, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, English, Baker, Fukunaga, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Fukunaga). Representatives Ito, Souki, Chong, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 82 on H.B. No. 116

The purpose of this bill is to provide for the effective integration of facilities necessary for the provision of advanced wireless communications services by:

- (1) Establishing an application process for the siting of wireless communications facilities that encourages the placement of antennas on existing structures; and
- (2) Making wireless communication antennas a permitted use in the state agricultural district.

Your Committee on Conference finds that with the increasing use of wireless communications in everyday activities and for a variety of purposes, sufficient coverage and capacity of wireless networks is necessary to meet the daily needs of consumers.

Your Committee on Conference has amended this measure by:

- (1) Deleting the preamble;
- (2) Deleting the provisions establishing an application process for the siting of wireless communications facilities;
- (3) Clarifying that the construction and operation of wireless communication antennas is a permitted use within the state agricultural district, but that this permitted use does not authorize the construction of any new structure that is not deemed a permitted use within the state agricultural district;
- (4) Specifying that wireless communication antennas located within the state agricultural district may either be freestanding or placed upon or attached to an existing structure; and
- (5) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 116, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 116, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Fukunaga, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Fukunaga). Representatives Herkes, Yamashita, Magaoay, Thielen, Managers on the part of the House. Ayes, 3. Ayes with Reservations, 1 (Thielen). Noes, none. Excused, 1 (Yamashita).

Conf. Com. Rep. 83 on H.B. No. 1322

The purpose of this bill is to improve insurance licensing by:

- (1) Reestablishing the limited line motor vehicle rental company producer's license issuance fee and services fee; and
- (2) Eliminating the requirement that licensed adjusters and independent bill reviewers must maintain a place of business in Hawaii.

Your Committee on Conference finds that this measure seeks to improve the insurance licensing operations of the Department of Commerce and Consumer Affairs by:

- (1) Amending the insurance licensing statutes to reestablish fees that were inadvertently deleted in previous legislation; and
- (2) Bringing greater consistency to the insurance licensing laws by making the place-of-business requirements for insurance adjusters and independent bill reviewers similar to those for insurance producers.

Your Committee on Conference has amended this measure by:

- (1) Changing the effective date to July 1, 2007; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1322, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1322, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Baker). Representatives Herkes, Tokioka, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 84 on H.B. No. 155

The purpose of this bill is to:

- (1) Provide an environmentally-friendly strategy for the lighting of Hawaii's streets, highways, airports and harbors; and
- (2) Work toward reducing Hawaii's dependence on oil imports.

Specifically, this bill establishes that, to the extent practicable, in the event that regulations or standards relating to outdoor lighting at airport facilities, harbors, or highways conflict with county ordinances or other regulations, the more stringent requirement or standard to reduce bright sources of light in the night sky shall govern all new installations. This bill also requires the Department of Transportation (DOT) to include biofuel storage and transmission infrastructure in all harbor improvement master plans.

Artificial lighting is increasing on all of the major Hawaiian islands as metropolitan centers increase. This increase in artificial light, especially from light sources at Hawaii's airports and harbors and along Hawaii's highways now threatens the telescopes' ability at Mauna Kea and Haleakala to study the night sky. DOT's compliance with county lighting ordinances, along with the use of environmentally-friendly, fully-shielded lighting fixtures, will conserve energy and resources while maintaining appropriate outdoor lighting suitable for safety, utility, and security.

While your Committee on Conference finds that reducing Hawaii's dependence on imported oil is important, questions remain about the cost and feasibility of improving Hawaii's harbor infrastructure to accommodate biofuel storage facilities. Accordingly, your Committee on Conference has amended this bill by:

- (1) Deleting Part II, which required DOT to include biofuel storage and transmission infrastructure in all harbor improvement master plans; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 155, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 155, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Inouye, Baker, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Baker). Representatives Souki, Morita, Yamashita, Lee, Pine, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 85 on H.B. No. 483

The purpose of this bill is to improve regulations of the check cashing industry by, among other things:

- (1) Requiring check cashers to register with the Department of Commerce and Consumer Affairs (DCCA);
- (2) Setting forth requirements for payment plans offered by check cashers;
- (3) Requiring check cashers to maintain records and report on business operations in accordance with DCCA rules;
- (4) Requiring additional information to be included in the posting and notice of check casher fees;
- (5) Limiting the total amount of a deferred deposit transaction to no more than 30 percent of the customer's gross monthly income; and
- (6) Exempting from the general excise tax, fees and interest received by check cashers for deferred deposit transactions.

Deferred deposit transactions, or payday loans, have the potential to trap consumers in a cycle of debt that makes it difficult to build assets for the future. In 2005, the Office of the State Auditor conducted a sunrise analysis on the regulation of check cashing and deferred deposit agreements and recommended that chapter 480F, Hawaii Revised Statutes, be strengthened to be more consumer friendly.

Your Committee on Conference further finds that requiring registration, rather than licensing, of check cashers with DCCA takes into consideration the concerns of both consumers and the industry regarding regulating check cashing and payday lending.

Your Committee on Conference also notes that a sunset of the registration requirements established by this measure would afford the Legislature an opportunity to revisit the issue of enhancing the regulation of check cashers and determine whether check cashers should be licensed.

Accordingly, your Committee on Conference has amended this measure by:

- (1) Changing the effective date to July 1, 2007;
- (2) Providing a sunset date of June 30, 2009, for the provisions of this bill:
 - (A) Requiring check cashers to register with the Department of Commerce and Consumer Affairs; and
 - (B) Setting forth requirements for payment plans offered by check cashers;
- (3) Specifying the print sizes required for postings and notices of check casher fees; and
- (4) Making technical, nonsubstantive amendments for clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 483, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 483, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Espero, Trimble, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Trimble). Representatives Herkes, Waters, Sagum, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 86 on H.B. No. 34

The purpose of this bill is to voice Hawaii's opposition to the humanitarian crisis presently occurring in the Darfur Region of Sudan by prohibiting the Employees' Retirement System (ERS) from investing in securities of companies that have active business operations with Sudan.

Your Committee on Conference finds that a tragedy is currently occurring in the Darfur Region of Sudan. The United States, along with the international community and hundreds of humanitarian and faith-based organizations, have all agreed that genocide is occurring in this region of the world. At present, over 400,000 people have been killed in the region, with another 2.5 million people being displaced from their homes despite calls from the international community that the Sudanese Government put an end to these atrocities. Placing economic pressure on the Sudanese Government by prohibiting the ERS from investing in companies that do business with Sudan is but one step that can be taken to remedy this tragic situation, as similar action taken against the country of South Africa during the 1980s, as a means of ending the policy of apartheid, had a profound effect on the policies of that country.

However, your Committee on Conference understands the concerns raised by the ERS. Accordingly, your Committee on Conference has amended this measure by:

- (1) Stipulating that only companies with direct holdings be identified and scrutinized by the public trust and eliminating scrutiny for indirect holdings or possible future holdings;
- (2) Requiring the fund to assemble a "scrutinized companies list" which contains all scrutinized companies identified in which the public fund has direct holdings;
- (3) Eliminating the requirement that the public fund continue a semi-annual correspondence informing a company with _____ and encouraging the company to continue to refrain from initiating active business operations in Sudan until it is able to avoid scrutinized business operations;
- (4) Requiring that, for each company newly identified with active business operations in which the public fund owns direct holding, the public fund send a written notice informing a company of its scrutinized company status and that it may become subject to divestment from the public fund;
- (5) Deleting the requirement that the public fund submit letters to the managers of actively managed investment funds with indirect holdings in companies with scrutinized active business operations requesting that the manager consider removing the companies from the fund or create a similar actively managed fund with indirect business holdings devoid of such companies; and
- (6) Changing the effective date to July 1, 2007.

Other technical, nonsubstantive amendments were made for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 34, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 34, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Baker). Representatives Sonson, Cabanilla, Nakasone, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 87 on H.B. No. 1005

The purpose of this bill is to improve the ability of the Public Utilities Commission (PUC) to carry out its duties and responsibilities by:

- (1) Requiring the PUC to restructure its operations pursuant to the PUC's December 2006, report to the Legislature, to improve its effectiveness and efficiency;
- (2) Appropriating funds to meet the costs incurred as a result of the restructuring process; and
- (3) Authorizing the PUC to consider the need for increased renewable energy use in exercising its authority and duties.

Your Committee on Conference finds that this measure will greatly benefit the public interest by enabling the PUC to efficiently and effectively carry out its duties.

Your Committee on Conference has amended this measure by:

- (1) Deleting the appropriation for the costs of restructuring;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for style and clarity.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1005, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1005, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Herkes, Morita, M. Oshiro, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 88 on H.B. No. 162

The purpose of this bill is to improve child support enforcement services in the state by:

- (1) Authorizing the Child Support Enforcement Agency to collect an annual fee of \$25, and use in accordance with the requirements of federal Title IV-D, for nonpublic assistance collection services in those cases in which no public assistance has been paid to the custodial parent under Title IV-A and the State has collected at least \$500 from the absent parent; and
- (2) Transferring the family support divisions of the City and County of Honolulu and the County of Hawaii whose functions, duties, responsibilities and activities relate to child support enforcement to the Department of the Attorney General (AG), effective October 1, 2007, without loss of pay, benefits, or where applicable, civil service status.

Your Committee on Conference has amended this bill by reverting to the language contained in Senate Draft 1 in Section 2 of the bill relating to the transfer of employees of the family support divisions of the County of Hawaii and of the City and County of Honolulu to the AG, for clarity and technical accuracy. Your Committee on Conference notes that this language represents the consensus of the counties and the AG concerning this matter and believes that this language is more appropriate.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 162, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 162, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Chun Oakland, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Baker, Chun Oakland). Representatives Waters, Sonson, Nakasone, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 89 on H.B. No. 1231

The purpose of this bill is to appropriate funds to satisfy claims against the State for judgments, settlements, and miscellaneous payments.

Your Committee on Conference has amended this bill by:

- (1) Appropriating funds for three additional claims that have been resolved, totaling \$230,040;
- (2) Adding the dollar amount and the percentage that the appropriation contained in this bill will cause the state general fund expenditure ceiling to be exceeded for fiscal year 2006-2007;
- (3) Changing the effective date to upon approval; and
- (4) Making technical, nonsubstantive amendments for clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1231, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1231, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Tsutsui). Representatives Waters, M. Oshiro, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 90 on H.B. No. 667

The purpose of this bill is to preserve affordable housing in Honolulu by:

- (1) Increasing Hawaii Housing Finance and Development Corporation's (HHFDC) revenue bond authority from \$300,000,000 to \$400,000,000;
- (2) Authorizing the issuance of general obligation bonds for fiscal year 2007-2008 to acquire an interest in the land and improvements of the Kukui Gardens property; and
- (3) Appropriating funds for fiscal year 2007-2008 to acquire an interest in the land and improvements of the Kukui Gardens property and allowing HHFDC to contract with a private nonprofit management and development organization to operate the existing facility and to develop additional affordable rentals.

Your Committee on Conference has amended this bill by:

- (1) Removing the appropriation of funds;
- (2) Specifying the amount of up to \$25,000,000 in general obligation bonds;
- (3) Making a correction to the tax map key identification;
- (4) Clarifying that HHFDC may enter into a long-term, below market, ground lease of the land, and deed the improvements to a private nonprofit housing organization for the purposes of operating, managing, and maintaining the existing rental units and to potentially develop additional affordable rentals on the site;
- (5) Changing the effective date to July 1, 2007; and
- (6) Making technical, nonsubstantive amendments for clarity, consistency, and style.

Your Committee on Conference notes that HHFDC intends to submit a request during the Regular Session of 2008 for the authorization of an additional \$26,000,000 in general obligation bonds for fiscal year 2008-2009 to complete the structured transaction.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 667, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 667, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Chun Oakland, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Shimabukuro, M. Oshiro, Rhoads, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 91 on H.B. No. 835

The purpose of this bill is to assist pineapple plantation workers affected by the closing of Del Monte Fresh Produce by:

- (1) Establishing the Pineapple Workers and Retirees Housing Assistance Fund (Assistance Fund) to provide mortgage payments or rent subsidies to eligible workers, retirees, and their families; and
- (2) Appropriating funds for purposes of the Assistance Fund.

Your Committee on Conference requests that the Hawaii Housing Finance and Development Corporation expedite the rulemaking process to implement the Assistance Fund.

Your Committee on Conference has amended this bill by:

- (1) Appropriating \$600,000 for each year of fiscal biennium 2007-2009 for purposes of the Assistance Fund;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 835, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 835, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Whalen, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Whalen). Representatives Shimabukuro, Rhoads, Magaoy, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 92 on H.B. No. 1605

The purpose of this bill is to enhance traffic flow on the island of Maui by appropriating funds for the development and implementation of an Intelligent Transportation System architectural plan for Maui, which includes a Maui traffic control center.

Traffic congestion continues to be a problem for the people of Maui. Traffic delays continue to intensify, creating slow transit times for commuters as well as public safety issues. Intelligent Transportation Systems apply communications and information technology to resolve traffic control issues and reduce congestion. The establishment of an Intelligent Transportation System on the island of Maui, including a Maui traffic control center, would help to maximize traffic flow and alleviate traffic congestion.

Your Committee on Conference has amended this measure by:

- (1) Specifying that \$400,000 shall be appropriated from the State Highway Fund for the development and implementation of an Intelligent Transportation System architectural plan for Maui; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1605, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1605, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Baker, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Souki, Carroll, McKelvey, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 93 on H.B. No. 500

GENERAL OVERVIEW

Through this measure, your Committee on Conference has made meaningful investments in the State's health and human services programs, education system, and environment to lay the foundation for a sustainable Hawaii, with strong families and communities, a workforce prepared to compete in the global marketplace, and a healthy economy and environment. Your Committee on Conference crafted a budget that invests in our State's greatest resource – its people.

These investments must be targeted and mindful of the future – government cannot be all things to all people. Spending in the executive budget has increased forty-four per cent over the last four years. It is without question that this growth rate is unsustainable over the long term. Indications that Hawaii's economy is slowing provide additional incentive to exercise fiscal conservatism when determining the level of additional funding for government programs.

While Hawaii's economy continues to grow, signs point to a slower growth rate in the near term. As a result, your Committee on Conference has crafted a balanced budget that responds to the needs and demands of our communities, with a focus on increasing the quality of life for Hawaii's residents, while remaining fiscally responsible.

STATE OF THE ECONOMY

After several years of strong economic growth – peaking with double-digit growth rates in fiscal year 2005 (sixteen per cent) and 2006 (10.9 per cent) – Hawaii’s economy slowed sharply in 2006. In January 2007, a distinguished local economist commented that, after subsiding for nearly two years because of rising consumer price inflation, real personal income growth in Hawaii was approximately zero in mid-2006. The economist further noted that recent personal income growth rates should increasingly translate back toward the two per cent real growth that he believes is a sustainable path for Hawaii through the remainder of the decade.

In addition, the University of Hawaii Economic Research Organization’s March 2, 2007, forecast also noted that “there are no warning signs on the horizon of an outright end to Hawaii’s economic expansion” and “[j]ob and income growth will slow further, but not cease, and the unemployment rate will gradually ease upward from recent record-low levels.”

COUNCIL ON REVENUES

At its March 13, 2007, meeting, the Council on Revenues decided to retain its December forecast of the general fund tax revenues for fiscal year 2007-2008 through fiscal year 2012-2013. The growth rate remains at six per cent for the current fiscal year, and 4.1 per cent for the second year of the biennium.

However, the preliminary comparative statement of state general fund collections for March 2007 indicates that revenue growth is only at 2.9 per cent over the corresponding period last year. This leaves a gap of 3.1 per cent growth that must be overcome if state revenues are to meet the Council’s projections.

Essentially, the forecast of the Council on Revenues and the most recent collection data underscore the need to adopt a fiscally prudent, sustainable budget for the State of Hawaii.

FEDERAL RESERVE – NATIONAL ECONOMIC OUTLOOK

According to the March 28, 2007, forecast on the United States economy by the Chairman of the Board of Governors of the Federal Reserve, economic growth in the United States has slowed. The slowdown is attributed to a correction in the housing market, which has transitioned from the rapid expansion of previous years to a more sustainable pace.

Overall, the Federal Reserve believes that the United States economy appears likely to continue moderate expansion over the coming quarters. Real gross domestic product rose at an annual rate of about two per cent in the second half of 2006 and is presently expanding at a similar rate. The moderate expansion could change substantially, however, if the correction to the housing market is more severe than is currently anticipated or if the recent weakness in business investments persist.

Finally, the Chairman noted the troubling specter of inflation. Core consumer price index inflation over the twelve months ending in February was 2.7 per cent, up from 2.1 per cent a year earlier. In addition, the price index for personal consumption expenditures – another measure of core inflation monitored closely by the Reserve – trends similarly upward.

BUDGET HIGHLIGHTS

In total (all sources of funding), this measure appropriates \$10,370,709,982 in fiscal year 2007-2008 and \$10,539,570,447 in fiscal year 2008-2009. Specifically regarding general fund appropriations, this measure appropriates \$5,185,780,822 in fiscal year 2007-2008 and \$5,273,531,614 in fiscal year 2008-2009. Compared with the budget submitted by the Governor in December 2006, as adjusted by the seven Governor’s Messages throughout this legislative session, this budget represents an amount of \$4,707,738 in fiscal year 2007-2008 and \$12,672,889 in fiscal year 2008-2009 that is lower in general fund appropriations. In new general fund appropriations, health and human services account for approximately twenty-eight per cent, lower education accounts for approximately thirty-five per cent, and higher education accounts for approximately thirteen per cent for fiscal year 2007-2008 and nineteen per cent for fiscal year 2008-2009 of the change to the State’s general fund budget.

Health and Human Services

In total, this budget provides an additional \$124,230,748 for fiscal year 2007-2008 and \$138,384,849 for fiscal year 2008-2009 in general fund appropriations in the areas of health and human services.

Your Committee on Conference provided \$6,753,704 in general funds for each year of the biennium for infants and toddlers with developmental delays, ensuring that children with special health needs receive continued care coordination and early intervention services. Your Committee on Conference added five new positions and \$236,928 in general funds for the upcoming biennium to continue the preschool developmental screening of gap group participants in the Children with Special Health Needs program. Two additional permanent positions and \$87,965 in general funds for fiscal year 2007-2008 and \$112,953 in general funds for fiscal year 2008-2009 were also added by your Committee on Conference for the Family Health Services Administration and the Children and Youth Wellness program.

Your Committee on Conference added \$1,248,750 in general funds for each year of the biennium to purchase family planning services for women to address a critical shortage of needed services.

Your Committee on Conference is dedicated to ensuring that a system of care is provided for Hawaii’s seriously mentally ill population and has designated a total of \$20,000,000 in general funds over the biennium for the Adult Mental Health Division for purchase of service contracts, as well as the provision of core services in each county.

Recognizing that substance abuse still plagues our communities, your Committee on Conference provided \$735,833 in general funds for fiscal year 2007-2008 and \$1,817,500 in general funds for fiscal year 2008-2009 to continue funding adolescent school-based substance abuse treatment services at all public middle and intermediate schools statewide.

To accommodate the increasing number of individuals with developmental disabilities admitted to the Medicaid Home and Community-Based Services waiver program, your Committee on Conference provided full funding, requiring an additional \$8,764,412 in general funds and \$8,558,196 in interdepartmental transfer funds transferred from the Department of Human Services for fiscal year 2007-2008 and \$11,479,791 in general funds and \$12,239,470 in interdepartmental transfer funds for fiscal year 2008-2009 to meet the state matching requirements under Title XIX.

Your Committee on Conference continued funding of agency-operated developmental disabilities domiciliary homes and apartment complexes operating with a twenty-four-hour, seven day a week staff, by providing \$1,800,000 in general funds for each year of the biennium. Your Committee on Conference believes that this additional \$600,000 general fund subsidy over the executive branch's biennial request is necessary to preserve residential alternatives for the developmentally disabled and mentally retarded population. A total of \$115,255 in general funds over the biennium was also added to the Developmental Disabilities Council to establish and support a statewide self-advocacy network for persons with developmental disabilities.

Your Committee on Conference, however, is concerned that the Developmental Disabilities Division has yet to implement its long awaited reorganization that has been pending since the closure of Waimano Training School and Hospital. Such inaction is detrimental to sound public policy and programming and further impedes the overall efficiency of the division. To this end, your Committee on Conference urges the division to focus on remedying these deficiencies to meet on-going challenges.

Your Committee on Conference provided strong support over the next biennium to ensure and strengthen the continuum of care for individuals, families, and communities, statewide. Improving access to health care services, especially in rural areas, is an important priority for your Committee on Conference. To ensure the provision of comprehensive medical and health care services to the rural communities of Hana, Molokai, Wahiawa, and Waianae, your Committee on Conference provided an additional \$3,800,000 for each year of the biennium.

Emergency medical treatment and the stabilization and transportation of patients are critical to maintaining public health and safety. Your Committee on Conference provided \$4,089,269 in general funds for fiscal year 2007-2008 and \$3,762,622 in general funds for fiscal year 2008-2009 to meet increased operational requirements for various ambulance service contracts on the islands of Oahu, Hawaii, Kauai, and Maui.

Your Committee on Conference also provided \$1,783,000 in general funds for fiscal year 2007-2008 and \$1,645,000 in general funds for fiscal year 2008-2009 for the statewide maintenance of the Emergency Medical Services Medical Communications system. To cover the additional cost for aeromedical services for rural O'ahu, your Committee on Conference provided \$800,000 in general funds for each year of the biennium. Furthermore, your Committee on Conference provided an additional \$3,000,000 in general funds for fiscal year 2007-2008 and 2008-2009 for the City and County of Honolulu's Emergency Medical Services. Your Committee on Conference also added \$388,000 in general funds for fiscal year 2007-2008 and \$397,000 for fiscal year 2008-2009 to purchase two ambulances and two Lifepak 12 defibrillators for each year of the biennium to address the needs of Oahu's emergency medical services.

To ensure the availability of comprehensive quality health care and to alleviate the health care workforce shortage in Hawaii, especially on the neighbor islands, your Committee on Conference added a total of \$400,000 in general funds and \$250,000 in special funds over the biennium for the State Health Planning and Development Agency, in conjunction with an appropriate agency such as the John A. Burns School of Medicine, to develop and maintain a statewide comprehensive health care workforce map and database. Your Committee on Conference believes that this data is essential to understanding Hawaii's workforce needs and distribution, given the pending retirement in the near future of many members of the workforce who belong to the baby boom generation.

Hawaii Health Systems Corporation and Kahuku Hospital

Your Committee on Conference determined that it is necessary to subsidize the operation of Kahuku Hospital to ensure its continued operation as it affiliates with the Hawaii Health Systems Corporation. Thus, your Committee on Conference provided \$1,500,000 in general funds for each year of the biennium for that purpose. Your Committee on Conference, however, believes that the cost to subsidize Kahuku Hospital should remain separate from the rest of the Hawaii Health Systems Corporation's funding and thus created a new program – Kahuku Hospital (HTH 211) to ensure transparency and accountability.

Further, to maintain the current level of services for the Hawaii Health Systems Corporation, your Committee on Conference also provided a special fund ceiling increase of \$46,983,063 for fiscal year 2007-2008 and \$70,789,063 for fiscal year 2008-2009 for that purpose. This increase will allow the Hawaii Health Systems Corporation to qualify three hospitals, Kula, Ho'ola Hamakua, and Samuel Mahelona Memorial Hospitals for critical access hospital status and increased reimbursement rates for services. Your Committee on Conference also appropriated an additional \$3,000,000 in general funds for fiscal years 2007-2008 and 2008-2009 for trauma center services.

Housing and Homelessness

Your Committee on Conference believes that we can and must do a better job of providing basic shelter for those who cannot afford to buy or rent housing in Hawaii. For those already homeless or in danger of becoming so, your Committee on Conference provided \$4,392,348 for fiscal years 2007-2008 and 2008-2009 to operate homeless shelters, provide necessary services, and where possible, provide intervention services to prevent families from becoming homeless.

Your Committee on Conference recognizes that the number of affordable rental units needed is approximately three thousand four hundred, with the demand over the next five years reaching seventeen thousand units. To further the development of affordable rental housing units, your Committee on Conference provided \$15,000,000 for fiscal year 2007-2008 to be deposited into the Rental Housing Trust Fund, enabling additional gap equity low interest loans or grants to be available to developers of affordable rental housing units.

In order to increase the availability of, and safety in, public housing, your Committee on Conference provided \$5,835,000 for fiscal year 2007-2008 and \$4,430,000 for fiscal year 2008-2009 for security improvements, energy efficient appliances, and to expedite repairs and the rental of vacant units in public housing developments.

The Department of Hawaiian Home Lands continues to develop and deliver land to native Hawaiians and provide native Hawaiians with an opportunity at homeownership. In support of this effort, your Committee on Conference has provided \$486,668 in special funds for fiscal year 2007-2008 and \$638,336 in special funds for fiscal year 2008-2009 for costs related to the Department's move to Kapolei and \$1,100,000 in special funds for debt service expenses for the construction of its new facility.

Development of larger multi-home project sites in the Kapolei area is creating more opportunities for lease awards, and the facility move will allow the Department to be closer to the many families that receive lease awards. As growth in Leeward Oahu continues, the Department will have a permanent presence to better serve the native Hawaiian population.

Your Committee on Conference strongly supports the efforts of the Department of Human Services to provide critical services to those least able to provide for themselves.

Of those in need, the children are the most vulnerable. Child Protective Services has made commendable progress toward improving their services for the abused and neglected children of this State. In the "Child and Family Services Review, Program Improvement Plan," required by the federal government, measures of efficiency in dealing with the immediate and on-going needs of these children have increased considerably. Encouraged by this progress, your Committee on Conference has approved an additional \$2,500,000 in general funds and \$2,275,000 in federal funds in each year of the biennium for improved services, including essential training for foster homes and adoptive parents. This amount is \$500,000 more than the Administration's budget request, which would not have taken full advantage of federal matching for this critical need.

Treatment of incarcerated youths in Hawaii has also been the subject of recent federal scrutiny. After years of unacceptable conditions at the Hawaii Youth Correctional Facility, the United States Department of Justice entered into a Memorandum of Agreement with the State on February 7, 2006. The Memorandum of Agreement requires the Hawaii Youth Correctional Facility to protect incarcerated youth from harm, provide them with proper access to medical and mental healthcare, and provide special education services as needed. The Memorandum of Agreement was designed to mandate a high level of training for all youth corrections officers and their supervisors, while protecting high-risk youth from self-inflicted harm or harm from others.

While the Committee recognizes the progress cited in the Department of Justice's report dated November 15, 2006, there are still concerns with the Hawaii Youth Correctional Facility's inability to hire and retain qualified employees and utilize the already extensive funding approved last legislative session. Your Committee on Conference is therefore providing the Hawaii Youth Correctional Facility with \$229,100 in additional general funds for essential training, as well as contracts to help alleviate abusive employee sick leave practices, and requiring that a progress report be submitted prior to the next legislative session. It is our hope that the Office of Youth Services will continue in the positive direction they have taken and make great strides toward their improvement goals for the Hawaii Youth Correctional Facility.

During the 2006 session, the Legislature approved a request for \$1,300,000 for the Safe House Program on the island of Hawaii. This program offers the courts an alternative for youth in need of residential placement that is more structured than a traditional group home but less severe than incarceration at the Hawaii Youth Correctional Facility. Your Committee on Conference has learned that the most urgent need for an additional Safehouse is on Maui. Maui judges send the largest number of minor offenders to the Hawaii Youth Correctional Facility due to the lack of an alternative residential program. Therefore, your Committee on Conference is providing an additional \$900,000 in fiscal year 2007-2008 and \$700,000 in fiscal year 2008-2009 to fund a Safehouse on Maui that is projected to provide fourteen co-ed beds for troubled youth.

This program was funded for the past two years with the understanding that federal funding would become available. Your Committee on Conference has learned that difficulties with Family Court approvals have hindered the process. Your Committee on Conference encourages the Department of Human Services to work diligently with the courts to overcome these barriers so that in the near future this very valuable program can receive the Title IV-E federal funding which will enable further expansion.

An improved economy, successful work placement strategies, and the federal time limit for benefits have reduced the number of Hawaii families who rely on Temporary Assistance to Needy Families cash benefits. Under federal rules, Temporary Assistance to Needy Families funds may also be used for programs and services to strengthen families and youth who are at risk. Your Committee on Conference provided \$4,536,713 for fiscal year 2007-2008 for various purchase of service contracts that will strengthen families, teach life skills, and improve the employability of low income families throughout Hawaii. Your Committee on Conference expects that the Department will ensure that these services reach the families that so desperately need assistance.

Sex Abuse and Domestic Violence

Unfortunately, violence within families still exists in the State. Your Committee on Conference recognizes that sexual violence, domestic abuse, and related concerns are not only law enforcement issues but also social issues that must be addressed in multiple ways. To this end, your Committee on Conference provided \$1,076,217 in general funds for fiscal years 2007-2008 and 2008-2009 for the Statewide Sexual Violence Services program through the Department of the Attorney General.

Your Committee on Conference also provided a much needed increase in funding for domestic violence shelters throughout the State by authorizing an additional \$762,500, statewide, for each year of the biennium.

• East Hawaii	\$315,936
• Kauai	\$405,385
• Maui	\$411,538
• Molokai	\$250,475
• Leeward Oahu and Honolulu	\$733,514
• Windward Oahu	\$431,487
• West Hawaii	\$322,833

Your Committee on Conference believes that the additional funding for domestic violence shelters and sex assault services is necessary to assist victims of such abuse, whether adults or children. Your Committee on Conference notes that funds for legal support services, as well as intrafamilial sex abuse and domestic violence services, are contained in the Judiciary budget.

Education

For both higher and lower education combined, this measure provides an additional \$212,057,676 for fiscal year 2007-2008 and \$285,058,441 for fiscal year 2008-2009 in new general fund appropriations.

Lower Education

With the proper education, Hawaii's students can actively participate in shaping the world they will live in, become the skilled workforce desired by employers, and enable Hawaii to attract new businesses and industries that offer living wage jobs. Education is the key to creating and sustaining a healthy and diversified economy.

To assist Hawaii's children in unlocking their potential, your Committee on Conference continues to make public lower and higher education its top priority. Providing the necessary programs, equipment, materials, and technology for Hawaii's children will support our children's ability to participate and compete in the global economy. Toward this end, your Committee on Conference has reaffirmed its continued support for Hawaii's public schools by providing for the critical needs to improve student achievement, as determined by the priorities of the Board of Education and the Department of Education.

Your Committee on Conference has provided for the Department of Education's highest priority items, including several items that were not included by the Governor in the December submittal, although they were approved by the Board of Education. Your Committee on Conference is providing for the following programs and materials necessary to support our children:

- \$20,105,474 to continue Weighted Student Formula funding under Act 160, Session Laws of Hawaii 2006;
- \$10,000,000 in federal funds for impact aid;
- \$8,748,056 in fiscal year 2007-2008 and \$7,270,623 in fiscal year 2008-2009 to meet the requirements of the No Child Left Behind initiative and for English for Second Language Learners proficiency testing;
- \$4,287,401 for special education teachers and educational assistants for current Individualized Education Plan requirements;
- \$2,940,950 in fiscal year 2007-2008 and \$2,577,132 in fiscal year 2008-2009 for instructional equipment and furnishings for schools;
- \$1,000,000 for the Early Education Task Force for schools;
- \$1,100,000 to continue the Superintendent's fund to support the Weighted Student Formula implementation;
- \$1,162,565 in fiscal year 2007-2008 and \$1,521,007 in fiscal year 2008-2009 for energy efficiency projects for public libraries;
- \$1,000,000 for books and library materials for public libraries;
- \$800,000 for the continuation of funding for substitute teacher compensation;
- \$250,000 for a recruitment and retention support center for schools;
- \$79,891 for agricultural programs in schools;
- \$427,308 for educational interpretation for mainstream hearing-impaired students and \$38,610 for equipment and furnishings;
- \$400,000 in general funds in both fiscal years and \$596,801 for fiscal year 2007-2008 and \$1,096,801 for fiscal year 2008-2009 in special funds for non-school hour programs at schools;
- \$328,508 in fiscal year 2007-2008 and \$835,436 in fiscal year 2008-2009 for athletic health care trainers and supplies for school athletic programs;
- \$175,000 for PSAT testing for schools; and
- \$5,636,680 for the transfer of two hundred fifty-eight permanent and 17.8 temporary school health aid positions from the Department of Health to comply with the requirements of Act 51, Session Laws of Hawaii 2004, as amended by Act 225, Session Laws of Hawaii 2006.

Your Committee on Conference provided for increased funding for technology and accountability through the following appropriations for equipment, positions, infrastructure, and programs:

- \$3,571,956 in fiscal year 2007-2008 and \$2,782,414 in fiscal year 2008-2009 for information technology improvements, including an Electronic Comprehensive Student Support System, an Electronic Student Information System, and a Wide Area Network upgrade; and
- \$3,073,932 in fiscal year 2007-2008 and \$2,792,932 in fiscal year 2008-2009 for investments to improve fiscal accountability, including providing fifteen complex area business managers and three accountants, creating a new facilities asset management plan to support renovations and maintenance of public schools, and redeveloping a new financial management system that will integrate the existing financial and human resource systems.

Your Committee on Conference provided relief for the increasing cost of maintaining facilities and services by providing the following additions to the Department of Education budget:

- \$12,358,139 in fiscal year 2007-2008 and \$13,118,345 in fiscal year 2008-2009 for school food services;
- \$1,365,962 in fiscal year 2007-2008 and \$3,182,543 in fiscal year 2008-2009 for essential utility services;
- \$9,991,030 in fiscal year 2007-2008 and \$14,029,731 in fiscal year 2008-2009 for increasing school bus transportation contracted costs; and
- \$1,278,000 for increases in property insurance.

Your Committee on Conference believes that these appropriations will provide Hawaii's public school students with the resources needed to support increased student achievement.

Higher Education

An economy based on knowledge, ideas, and risk-taking is the reality our State must embrace, and the University of Hawaii, system-wide, is critical to achieving this reality. New technologies and new industries are just two of the opportunities available to a skilled and literate workforce. College graduates are likely to change jobs several times over a lifetime of work, and to get ahead, incumbent workers will learn new skills and gain additional knowledge at the University of Hawaii.

The University of Hawaii Board of Regents approved a detailed biennial operating budget request of \$67,950,071 in fiscal year 2007-2008 and \$116,644,851 in fiscal year 2008-2009 which included the creation of positions vital to the expansion of programs such as Workforce Training and Development (i.e. nursing, construction, teaching, and social work), Economic Diversification Initiatives, Native Hawaiian Studies, Student Services Enhancement and Expansion, and Distance Learning Initiatives. For these initiatives, the Governor requested \$46,702,713 in fiscal year 2007-2008 and \$83,880,216 in fiscal year 2008-2009 in a scaled down University of Hawaii budget. Your Committee on Conference has provided the University of Hawaii with \$62,297,570 in fiscal year 2007-2008 and \$101,811,884 in fiscal year 2008-2009 for programs including:

- Restoring \$250,000 in each year of the biennium to support Western Interstate Commission for Higher Education programs for students interested in the fields of veterinary medicine, dentistry, optometry, and occupational and physical therapy that currently are not offered at the University of Hawaii;
- Addressing the growing shortage of nurses with appropriations of \$1,322,270 in fiscal year 2007-2008 and \$2,568,276 in fiscal year 2008-2009 for Statewide Nursing Workforce Development at the community colleges, University of Hawaii-Hilo, and University of Hawaii-Manoa and funds for staffing and operational support, including \$400,000 for the Quentin Burdick Rural Health Professions program;
- \$3,634,725 in fiscal year 2007-2008 and \$3,953,817 in fiscal year 2008-2009 in general funds to support further expansion of the John A. Burns School of Medicine to address the shortage of medical specialists and fulfill its potential to become a world-class leader in health, biomedical, and biotechnology research, training, and teaching;
- \$834,084 in general funds and \$1,710,000 in special funds in fiscal year 2007-2008 and \$750,000 in general funds and \$3,454,903 in special funds in fiscal year 2008-2009 for the establishment of a College of Pharmacy for the University of Hawaii Hilo campus;
- \$800,000 in general funds and \$400,000 from the research and training revolving fund in each fiscal year for support of AIDS research to assist Asian-Pacific Islanders; and
- \$11,000,000 in each fiscal year in special funds to establish the Cancer Research Special Fund created by Act 316, Session Laws of Hawaii 2006.

Your Committee on Conference remains committed to the vision of creating a world-class institution of higher learning and provided approximately \$26,170,000 in fiscal year 2007-2008 and \$38,570,000 in fiscal year 2008-2009 in continued support of University of Hawaii programs, workforce, curriculum, and student educational development, including approximately \$5,193,925 in fiscal year 2007-2008 and \$9,967,997 in fiscal year 2008-2009 for the University of Hawaii-Hilo and \$8,218,973 in fiscal year 2007-2008 and \$16,665,608 in fiscal year 2008-2009 for community college programs and \$1,767,288 in fiscal year 2007-2008 and \$2,905,350 in fiscal year 2008-2009 for staffing development and the expansion of programs and curriculum for the long-anticipated West O'ahu campus in Kapolei.

Your Committee on Conference finds that the economic capital of the State can be expanded only if there exists a solid foundation upon which to build. Thus, your Committee on Conference provided \$1,500,000 in fiscal year 2007-2008 and \$2,000,000 in fiscal year 2008-2009 for the "B Plus" state scholarship program and \$510,000 in fiscal year 2007-2008 and \$605,000 in fiscal year 2008-2009 for the Graduate Professional Access and Health Careers Opportunity Programs. Your Committee on Conference believes that funding these programs is necessary to foster student interest in post-secondary education and provide the means for additional students to pursue their own career paths, thus adding to our State's economic well-being.

Another area of concern for the University is the sharp increase in fuel, utilities, and other costs related to energy consumption. The University is one of the highest single consumers of these resources and has had to explore options to fund its energy cost shortfalls. The new tuition schedule approved by the Board of Regents in September 2006 will positively and significantly impact the revenues of the system. Additionally, a sizable portion of its projected tuition revenues are earmarked for utilities. Your Committee on Conference commends the University for taking this proactive step in providing for its own energy consumption. Thus, your Committee on Conference provided \$15,150,000 in fiscal year 2007-2008 and \$35,950,000 in fiscal year 2008-2009 in special funds to enable the University of Hawaii at Manoa to address these expected shortfalls in operating and utility costs, as well as to fund faculty, staffing, and student employee costs, collective bargaining costs, and routine facility maintenance costs campus-wide. Your Committee on Conference remains confident that the tuition fee schedule adjustment proposed by the University will provide the needed additional funds despite an anticipated drop in attendance due to the increase in tuition.

Your Committee on Conference is steadfast in its belief that higher education is the foundation of the future economic growth and stability of the State. Your Committee on Conference provided a budget for the University that addresses increases in utilities and employee compensation, medical and scientific research, workforce shortages, critical program shortfalls in student development and growth, Native Hawaiian studies and program development, current and planned expansion of the University statewide, and supporting diversity and lifestyle initiatives to provide the best opportunities for the students, faculty, and employees of the University – present and future.

Environment

Land and Natural Resources

Much of what makes Hawai'i a great place to live or to visit is its natural resources. Preserving, protecting, and providing for our islands' resources for the future and present benefit is of utmost importance. Hawai'i is a prime visitor destination for world leaders, businesspeople, and families, as well as a prime location for movie producers and film crews. Families statewide can continue to enjoy our island lifestyle through the protection of our natural environment. For residents and visitors alike, your Committee on Conference has provided support to:

- Combat invasive species, including the coqui frog, by providing an additional \$1,000,000 in general funds and special funds for both fiscal years 2007-2008 and 2008-2009, for the Hawaii and county invasive species councils;
- Enhance the State Parks Interpretive program by appropriating approximately \$485,000 in special funds for visitor education, tours, and trails assistance;
- Expand conservation and resource enforcement with fifteen additional personnel and equipment, by appropriating \$1,894,169 in fiscal year 2007-2008 and with twenty-five positions and \$1,969,240 in fiscal year 2008-2009;
- Encourage prevention of wildfires by creating a full-time Firewise Communities program coordinator for community outreach and education and providing additional ongoing state support of interdepartmental firefighting efforts with overtime pay, replenishment of outdated equipment, vehicles, and communications and life-saving apparatus by appropriating approximately \$330,000 in fiscal year 2007-2008 and \$340,000 in fiscal year 2008-2009; and
- Assist in reforestation, land and road restoration, and hazard control efforts for the over two thousand three hundred acres of public forest lands in the Kula Forest Reserve, Upper Waiohuli, Maui destroyed in the January 2007 wildfire by appropriating \$3,115,000 in special funds over the biennium for these purposes.

To protect wildlife and ensure the safety of residents and homes, your Committee on Conference has also appropriated \$500,000 in general funds for fiscal year 2007-2008 and \$420,000 for fiscal year 2008-2009 for Kawai Nui Marsh, which is an important wetland habitat for endemic and endangered native Hawaiian birds as well as a significant flood control reservoir.

To support the safe enjoyment of our natural resources, your Committee on Conference has also provided \$606,534 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009 for lifeguard services, and \$312,921 in special funds for lifeguard equipment costs in fiscal year 2007-2008 at Makena beach on Maui and Ke'e beach on Kaua'i.

Agriculture

Invasive pests threaten not only Hawai'i's native plants and wildlife, but agricultural crops and livestock as well. Hawai'i's agricultural industry contributes to our economy and remains an integral part of our State's character. With the continual threat of invasive pests that can damage our local consumption and export industry, the control and eradication of such pests is essential. Your Committee on Conference has therefore provided:

- \$196,014 for fiscal year 2007-2008 and \$236,352 for fiscal year 2008-2009 in general funds for five permanent positions to meet state mandates for bio-control research of natural enemies of invasive species;
- \$179,240 for fiscal year 2007-2008 and fiscal year 2008-2009 in general funds to continue the brown tree snake prevention program to defend against a threat that could potentially cost the State \$485,000,000 annually;
- \$500,000 in interdepartmental transfer funds for the Invicta manifest system to help efficiently allocate the Department of Agriculture's resources; and
- \$220,192 in federal funds for fiscal year 2007-2008 and fiscal year 2008-2009 for three temporary positions to assist the Plant, Pest, and Disease Control Division.

Your Committee on Conference finds that the *Varroa destructor* is a mite that feeds off of honeybees and is spread to other bees through direct contact. These parasites have destroyed more than half of some beekeepers' hives in the continental United States, and have essentially wiped out all wild honeybees there. The mite was discovered in Makiki in early April and has since been confirmed in hives around the island of Oahu. The local beekeeping industry is particularly concerned that the mite has the potential to devastate the burgeoning commercial queen bee export industry on the Big Island.

Your Conference Committee is gravely concerned with the mite's impact on our local beekeepers and has appropriated \$650,000 for fiscal year 2007-2008 to study the level of mite infestation in the State and to work toward controlling this latest invasive specie.

Business, Economic Development and Tourism

Your Committee on Conference has remained steadfast in its support of Hawaii's existing business and economic engines. Specifically, in recognition of the importance of tourism to the State's economy, your Committee on Conference provided \$14,595,156 in special funds for fiscal year 2007-2008 and fiscal year 2008-2009 for the Hawaii Tourism Authority in support of our State's efforts to preserve Hawaii's ranking as a pre-eminent visitor destination.

With respect to energy, your Committee on Conference finds that sustainable communities in Hawaii's future must attain greater energy efficiencies and reductions in our reliance on fossil fuels. Your Committee on Conference provided two temporary positions and \$130,000 in general funds and \$500,000 in federal funds for fiscal year 2007-2008 and fiscal year 2008-2009 to implement the energy efficiency and renewable energy programs in the State. Additionally, recognizing the importance of the Hawai'i Renewable Hydrogen Program, your Committee on Conference provided \$4,742,500 in special funds for fiscal year 2007-2008 and \$2,609,375 for fiscal year 2008-2009 for venture capital investments in private sector and federal projects that support this initiative.

Defense

Your Committee on Conference provided the necessary support to the Department of Defense to carry out its mission to ensure the safety of the public and to ensure that recovery efforts following the occurrence of natural or man made disasters are expeditiously executed. Your Committee on Conference approved:

- \$1,136,202 for fiscal year 2007-2008 and for fiscal year 2008-2009 as a reserve for public assistance and damage recovery in case of a disaster;
- \$111,483 for fiscal year 2007-2008 and \$148,645 for fiscal year 2008-2009 to provide a core disaster recovery staff;
- \$191,129 for fiscal year 2007-2008 and \$234,335 for fiscal year 2008-2009 to install and maintain a state siren warning system;
- \$1,836,611 for fiscal year 2007-2008 and \$1,896,753 for fiscal year 2008-2009 for the Hawaii National Guard Environmental Office; and
- \$25,000 for both fiscal years of the biennium to provide an additional subsidy to the Civil Air Patrol;

The efforts extended by our armed forces are greatly appreciated by the State. Your Committee on Conference provided the following program support for our armed forces veterans:

- \$37,500 for a quarterly veterans' benefit and entitlement newsletter;
- \$33,230 for a Clerk Typist I to assist in clearing the backlog of unprocessed discharge documents;
- \$8,000 for travel expenses for an Office of Veterans' Services Counselor; and
- \$144,180 for fiscal year 2007-2008 and \$152,192 for fiscal year 2008-2009 for maintenance of veterans' cemeteries.

Public Safety

Your Committee on Conference notes that Hawaii continues to struggle with the persistent growth of the inmate population and a high rate of recidivism among convicted offenders. The traditional solution to prison overcrowding is to add prison beds by building new facilities or

expanding others. With the unlikelihood of any new facilities being built in the near future, your Committee on Conference, working closely with your Committee on Public Safety, recognizes the need for interim measures.

The primary strategy used by this Administration to reduce overcrowding has been to transfer inmates out of State. However, with a total of over 2,112 inmates (1,939 males and 173 females) housed in out of state facilities, and the escalating costs associated with those inmates, your Committee on Conference finds it necessary to support programs that reduce recidivism, upgrade the physical condition of existing facilities, and develop a transitional housing and release program to keep released inmates from returning to prison.

As previously mentioned, your Committee on Conference supports programs that assist in developing practical skills for inmates so that, upon release, their chances of obtaining gainful employment and becoming productive citizens increase and the propensity for recidivism decreases. Your Committee on Conference notes that important initiatives for community reintegration programs are contained in other legislative proposals. Your Committee on Conference provided for the following correction programs in the hopes of decreasing inmate recidivism:

- \$7,335,451 in revolving funds for fiscal year 2007-2008 and fiscal year 2008-2009 for the Correctional Industries program to provide inmates with experience in working in various trades and to increase their ability to become productive citizens upon release from prison;
- Three positions and \$408,552 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009 to continue traditional substance abuse services for inmates participating in Project Bridge programs;
- \$150,000 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009 for inmate transition and job development programs;
- Four positions and \$143,472 in general funds for fiscal year 2007-2008 and four positions and \$168,576 in general funds for fiscal year 2008-2009 for re-entry case workers to ensure that offenders will have housing and employment upon release from prison;
- \$50,000 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009 for an intensive re-entry program that will serve women offenders within one year to six months of their release from prison to provide them with life skills training;
- \$98,700 in general funds for fiscal year 2007-2008 and \$75,000 in general funds in fiscal year 2008-2009 to establish a culinary arts training program and to fund a landscape training program at the Women's Community Correctional Center; and
- \$50,000 in general funds for fiscal year 2007-2008 and \$26,000 in general funds for fiscal year 2008-2009 to support a vocational program offered by the mason's union to train inmates to become masons.

Looking to the future, your Committee on Conference has appropriated \$5,000,000 for the planning and design of one or more new correctional facilities on the island of Hawaii to provide no fewer than five hundred beds and appropriate space for drug treatment and other rehabilitative programs. It is hoped that the Administration will recognize the value of this appropriation as each passing day delays the availability of modern and efficient correctional facilities in the State.

Your Committee on Conference notes that there is a growing personnel vacancy problem in the Department of Public Safety. In testimony before the Senate Committee on Ways and Means on January 9, 2007, the Department noted that there were close to three hundred vacant positions, totaling over \$11,000,000 in general fund costs alone. Some of these vacancies date back to 1989. Your Committee on Conference is certain that a portion of the \$11,000,000 in vacancies is being used for purposes other than filling positions (as evidenced by the vintage of some of the vacancies). Therefore, your Committee on Conference eliminated eighteen positions and \$665,160 in general funds for positions that have been vacant for three years or longer. Your Committee on Conference believes that it is in the best interest of the Department to prepare a plan to address the vacancy problem before future vacant positions and funds are removed – potentially impacting items being funded with vacancy savings.

Other Department Highlights

To expand and update the State Institutional Network, your Committee on Conference provided \$2,400,000 for fiscal year 2007-2008. Your Committee on Conference recognizes the critical importance of the network and the numerous departments that utilize its various telecommunication services.

To help expedite the speed of businesses and professionals to obtain their professional and vocational licensing, your Committee on Conference has provided \$258,000 for fiscal year 2007-2008 for a records scanning project that will move all hard documents into electronic format. With the move away from paper records, the professional and vocational licensing process will become that much more efficient.

Pursuant to Act 143, Session Laws of Hawaii 2006, the Public Utilities Commission reported to the Legislature during the 2007 session on the findings from the organizational review of its operations. Upon recommendation from your Committee on Commerce, Consumer Protection, and Affordable Housing to implement the first phase of the proposed Public Utilities Commission reorganization, your Committee on Conference provided seven positions and \$495,790 in special funds for fiscal year 2008-2009 to implement the restructuring. In addition, your Committee on Conference approved \$609,710 in special funds for fiscal year 2008-2009 to relocate the Commission to new offices.

The Public Utilities Commission also requested permanent staff and funding for the Petroleum Industry Monitoring program it inherited from the Department of Business, Economic Development and Tourism under Act 78, Session Laws of Hawaii 2006. Your Committee on Conference provided three positions and \$213,595 in special funds for both years of the biennium.

GOVERNMENT ACCOUNTING AND STANDARDS BOARD – STATEMENT 45

The Government Accounting and Standards Board, was organized in 1984 to establish standards of financial accounting and reporting for state and local governmental entities. These standards guide the preparation of external financial reports of those entities.

In April 2004, the Government Accounting and Standards Board issued its Statement No. 45, which established standards for measuring and recognizing other postemployment benefits that primarily consist of retiree healthcare services. Because many government agencies cover healthcare costs on a pay-as-you-go basis, a large unfunded liability has developed. Recently, consultants reported that Hawaii's liability is approximately \$11,100,000,000. To put this amount in perspective, this is over twice as large as the State's annual general fund budget.

Not addressing this liability may have an impact on the State's bond rating, which would have a long-term effect on the State's ability to issue debt, as well as impact the amount that it pays for its debt. In one scenario proposed by the State's consultant, Hawaii would pay an additional

\$340 million per year for its healthcare payments, an amount larger than the total annual budgets of the Department of Land and Natural Resources and the Department of Business, Economic Development, and Tourism combined.

This is a critical problem with which government will soon have to deal. Your Committee on Conference would be remiss if it did not mention the substantial liability that will affect all government entities in the near future. Your Conference Committee has great concerns and would like to see all stakeholders – the Governor, the mayors, and state and county legislators – come together to determine the best way to address this liability.

CAPITAL IMPROVEMENT PROGRAM HIGHLIGHTS

Investing in our educational system's infrastructure is a top priority of your Committee on Conference, and as such, the Capital Improvement Program budget devotes significant resources toward enhancing and expanding public school and University of Hawaii facilities. Your Committee on Conference provided a total of \$411,231,000 and \$340,150,000, in capital improvements, by all means of financing, for the Department of Education and the University of Hawaii, respectively. The following are a few highlights:

Department of Education (by all means of financing)

- \$155,923,000 for Department of Education statewide support, including the following lump sum items:
 - \$75,000,000 for school building improvements;
 - \$25,000,000 for electrical system improvements;
 - \$9,000,000 for compliance with the Americans with Disabilities Act;
 - \$8,000,000 for noise and heat abatement;
 - \$5,000,000 for compliance with the Clean Water Act;
- \$67,683,000 for Ewa Makai Middle School;
- \$41,377,000 for Wailuku II Elementary School; and
- \$20,000,000 for Kihei High School.

University of Hawaii (by all means of financing):

- \$135,000,000 for the University of Hawaii-West Oahu;
- \$32,067,000 for capital renewal and deferred maintenance;
- \$17,933,000 for health, safety, and various code requirements;
- \$6,837,000 for temporary facilities for nursing programs at community colleges statewide; and
- \$41,579,000 for the new Windward Community College Library and Learning Resources Center.

Other Highlights (by all means of financing)

- \$55,666,000 for various improvements to small boat harbors statewide;
- \$30,780,000 for dam and reservoir safety improvements statewide;
- \$25,000,000 for renovations, repair and maintenance, and elevator improvements for public housing projects statewide;
- \$20,950,000 for various improvements to state parks statewide;
- \$20,000,000 for Hawaii Health Systems Corporation health and safety projects system wide;
- \$19,000,000 for energy conservation improvements in state buildings; and
- \$12,092,000 for repairs and improvements to existing Department of Public Safety facilities.

Conclusion

With relatively modest revenue projections for Hawaii and the nation, as well as the troubling specter of inflation, your Committee on Conference has appropriated resources that reflect prudence and provide for sustainability. Your Committee on Conference will not soon forget the fiscal crises of the past, but looks to the future with cautious optimism, knowing the resources provided in this budget will address the urgent infrastructure and service needs of the State and provide for the strengthening of our families and communities, thus positioning Hawaii for success in the global economy and the sustaining of Hawaii as a great place to not only visit, but to *live*.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 500, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 500, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, Chun Oakland, English, Fukunaga, Hooser, Kim, Menor, Tokuda, Tsutsui, Hemmings, Whalen, Managers on the part of the Senate. Ayes, 9. Noes, none. Excused, 2 (English, Menor). Representatives M. Oshiro, Belatti, Brower, Carroll, Chong, Hanohano, Har, Lee, Magaoay, Manahan, Mizuno, Nakasone, Rhoads, Sagum, Tokioka, Awana, Meyer, Ward, Managers on the part of the House. Ayes, 17. Noes, none. Excused, 1 (Carroll).

Conf. Com. Rep. 94 on H.B. No. 1212

Your Committee on Conference provided an additional \$13,160,304 in general funds and \$796,705 in special funds for fiscal year 2007-2008 and an additional \$10,255,303 in general funds and \$204,067 in special funds for fiscal year 2008-2009, increasing the Judiciary's total budget for fiscal years 2007-2008 and 2008-2009 to \$149,488,167 and \$145,990,528, respectively.

Your Committee on Conference recognizes that the Judiciary is experiencing an increase in demand for its services resulting in dwindling resources. Your Committee on Conference addressed this situation by providing funding to improve the efficiency and productivity of existing programs and services and provide additional staffing and resources to ensure that the Judiciary is able to maintain its level of service as demand rises. Your Committee on Conference provided:

- (1) \$2,181,648 in general funds and special funds for fiscal year 2007-2008 and \$277,344 in general funds and special funds for fiscal year 2008-2009 for technology related items; and
- (2) \$1,291,439 and \$1,408,372 in general funds and special funds for fiscal year 2007-2008 and fiscal year 2008-2009, respectively, for the Hilo Courthouse.

Your Committee on Conference also supports the Judiciary's efforts to improve access to its services to better meet the needs of Hawaii's underserved populations. In this regard, your Committee on Conference provided the following:

- (1) \$268,198 in additional general funds for fiscal year 2007-2008 and fiscal year 2008-2009 for domestic violence services;
- (2) \$75,000 for the Hawaii Family Law Clinic;
- (3) \$200,000 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009 for intrafamilial sex abuse treatment services for child victims;
- (4) \$395,852 and \$439,706 in general funds and special funds for fiscal year 2007-2008 and fiscal year 2008-2009, respectively, for Girls Court;
- (5) \$70,816 in general funds and special funds and \$84,288 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009, respectively, for the Children's Justice Center; and
- (6) \$100,000 in general funds for fiscal year 2007-2008 and fiscal year 2008-2009, respectively, for the Office of Equality and Access to the Courts to address increased interpreter fees.

In addition to the resources provided for the Judiciary's operating requirements, your Committee on Conference appropriated \$27,750,000 in general obligation bonds for each fiscal year for various renovations, repairs, and improvements to Judiciary facilities statewide. This amount includes \$25,200,000 to finally complete construction of the Kapolei Judiciary Complex.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1212, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1212, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Waters, M. Oshiro, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 95 on H.B. No. 1200

The purpose of this measure is to appropriate funds for the operating and capital improvement expenses of the Office of Hawaiian Affairs for the fiscal biennium July 1, 2007, through June 30, 2009.

The budget for the Office of Hawaiian Affairs has remained relatively stable over the past several years, and this measure maintains that stability. In addition to several small housekeeping transfers within its budget, the Office of Hawaiian Affairs has also requested additional funding for two programs--the Multi Service Project for Alu Like, Inc., and Na Pua No'eau.

Additional funding for these programs will enable the Office of Hawaiian Affairs to provide additional services to its target population. Specifically, Alu Like, Inc., provides essential social services, community economic development, business assistance, employment preparation, training, library services, and educational and childcare services. Also, the Na Pua No'eau program nurtures leadership qualities in native Hawaiian children and offers educational programs that better prepare Hawaiian youth for the future.

Your Committee on Conference has provided full funding for all of the Office of Hawaiian Affairs' operating-budget initiatives.

The Office of Hawaiian Affairs requested that the \$56,040,000 needed to construct a new office building and cultural center in Kakaako be shared between the Office of Hawaiian Affairs and the State--with fifty per cent coming from its trust funds and the other fifty per cent from general obligation bond funds. Your Committee on Conference supports the development of an office building for the Office of Hawaiian Affairs and a cultural center to showcase and perpetuate the Hawaiian culture. However, the Office of Hawaiian Affairs has over \$400,000,000 in trust funds at its disposal and receives annual payments from the State of at least \$15,000,000. Accordingly, your Committee on Conference has funded the project completely through the use of the Office of Hawaiian Affairs' trust funds.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1200, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1200, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, English, Hee, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 2 (English, Slom). Representatives Ito, M. Oshiro, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 96 on H.B. No. 928

The purpose of this bill is to:

- (1) Increase low- and moderate-income families' homeownership by exempting family self-sufficiency escrow accounts from the asset test for public assistance;
- (2) Appropriate funds for programs and services providing homeownership assistance; and
- (2) Increase state supplemental payments for certain domiciliary care and require a portion of the payment to be retained by the recipient for personal use.

Your Committee on Conference has amended this bill by:

- (1) Inserting an appropriation amount of \$500,000 for each year of fiscal biennium 2007-2009 for programs and services providing homeownership assistance;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 928, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 928, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Tsutsui, Hooser, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Rhoads, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 97 on H.B. No. 1899

The purpose of this bill is to ensure the conservation of Kawai Nui Marsh, one of our state's largest and most important remaining wetlands, by:

- (1) Transferring ownership of lot 3 of Kawai Nui Marsh from the City & County of Honolulu (C&C of Honolulu) to the State to take advantage of federal funds, by September 1, 2007; and
- (2) Appropriating funds for the Department of Land and Natural Resources (DLNR) to:
 - (A) Maintain the Kawai Nui Marsh or contract with the C&C of Honolulu or any other public or private entity to maintain the Kawai Nui Marsh; and
 - (B) Conduct or contract for educational, ecological, cultural, and environmental services for Kawai Nui Marsh and its adjoining state-owned areas.

Your Committee on Conference has amended this bill by:

- (1) Deleting the appropriations for DLNR to maintain Kawai Nui Marsh or contract with the C&C of Honolulu to maintain Kawai Nui Marsh;
- (2) Deleting the appropriations to conduct or to contract for educational, ecological, cultural, and environmental services for Kawai Nui Marsh and its adjoining state-owned areas, as this appropriation has been addressed in the budget;
- (3) Changing the effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1899, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1899, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Tokuda, Baker, Kokubun, Hee, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Slom). Representatives Ito, Chong, Thielen, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 98 on H.B. No. 869

The purpose of this bill is to reduce Hawaii's dependence on oil by appropriating funds to the University of Hawaii to conduct a study on energy-efficient transportation strategies in conjunction with the Department of Business, Economic Development, and Tourism.

Your Committee on Conference has amended this bill by:

- (1) Inserting the sum of \$50,000 for the study; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 869, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 869, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Sakamoto, Menor, Baker, Gabbard, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Morita, Souki, Carroll, Thielen, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 99 on H.B. No. 1614

The purpose of this bill is to support efforts to reduce and eliminate drug nuisances by appropriating funds for the enforcement and prosecution of drug nuisance abatement laws and to fund additional positions in the Drug Nuisance Abatement Unit of the Department of the Attorney General.

Your Committee on Conference amended the bill by:

- (1) Inserting an appropriation amount of \$150,000 for fiscal year 2007-2008 for additional positions for the Drug Nuisance Abatement Unit; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1614, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1614, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Waters, Lee, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 100 on H.B. No. 1004

The purpose of this bill is to enhance protections for consumers by:

- (1) Requiring the Division of Consumer Advocacy of the Department of Commerce and Consumer Affairs (Division) to restructure its operations pursuant to the Division's December 2006 report to the Legislature to improve its effectiveness and efficiency;
- (2) Appropriating funds to meet the costs incurred as a result of the restructuring process; and
- (3) Appropriating funds to the Office of the Auditor for research and support services necessary to protect Hawaii consumers by developing additional deterrents for identity theft.

Your Committee on Conference has amended this measure by:

- (1) Inserting the following appropriation amounts:
 - (A) \$168,000 for fiscal year 2007-2008 and the same sum for fiscal year 2008-2009 for additional positions in the Division;
 - (B) \$30,000 for fiscal year 2007-2008 and the same sum for fiscal year 2008-2009 to send professional staff of the Division to specialized training seminars; and
 - (C) \$100,000 for fiscal year 2007-2008 from the Compliance Resolution Fund for the Office of the Auditor to provide research and support services to develop deterrents for identity theft;
- (3) Giving business and government an additional year to comply with the social security number protection provisions of Act 137, Session Laws of Hawaii 2006, by extending the effective date of Act 137 to July 1, 2008; and
- (4) Changing the effective date to June 30, 2007, except for the appropriations in this bill, which are to take effect on July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1004, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1004, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Fukunaga, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Herkes, Morita, Waters, Magaoay, Carroll, Marumoto, Managers on the part of the House. Ayes, 6. Ayes with Reservations, 1 (Marumoto). Noes, none. Excused, none.

Conf. Com. Rep. 101 on S.B. No. 1853

The purpose of this measure is to preserve and sustain Native Hawaiian indigenous resources management practices by creating an `Aha Moku Council System that will provide advisory assistance to the Department of Land and Natural Resources on all matters regarding the management of the State's natural resources.

Specifically, this measure adds a new chapter to title 12, Hawaii Revised Statutes, that:

- (1) Establishes an `Aha Moku Commission to assist in the formation of regional `Aha Moku Councils, which will serve in an advisory capacity on all matters regarding the management of the State's natural resources; and
- (2) Requires the Department of Land and Natural Resources to seek advisory assistance from the `Aha Moku Councils in developing a comprehensive set of best practices for natural resources management.

Your Committee on Conference finds that developing an `Aha Moku Council System that incorporates and represents all thirty-seven moku statewide will enable the development of a comprehensive set of best practices for natural resources management, which will reflect and sustain traditional Native Hawaiian practices. Your Committee on Conference emphasizes that the formation of an `Aha Moku Council System will be an inclusive process and not limited to participation from Native Hawaiians.

Your Committee on Conference has amended this measure:

- (1) Deleting the new chapter added to title 12, Hawaii Revised Statutes, and replacing it with language that creates an `Aha Kiolo Advisory Committee to:
 - (A) Explore, examine, and derive best practice models for the creation of an `Aha Moku Council System and `Aha Moku Council Commission;

- (B) Explore best practice models to establish an administrative structure, including member criteria and selection, for the creation of an `Aha Moku Council Commission to oversee an `Aha Moku Council System;
 - (C) Establish goals and objectives for an `Aha Moku Council Commission and `Aha Moku Councils to accomplish, including benchmarks for long-term planning;
 - (D) Establish a feasible operational budget for an `Aha Moku Council Commission; and
 - (E) Submit written reports of its findings and recommendations, including any legislation, to the Legislature prior to the convening of the 2008 and 2009 Regular Sessions;
- (2) Deleting the blank appropriation amount and replacing it with an appropriation of \$110,000 for each year of the 2007-2009 fiscal biennium for the administrative costs of the `Aha Kiole Advisory Committee and for allowing each of the thirty-seven moku statewide to participate in the discussion on the creation of an `Aha Moku Council System;
 - (3) Changing the effective date of this measure from July 1, 2020, to effective upon approval and changing the effective date of the appropriation from July 1, 2020, to July 1, 2007; and
 - (4) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1853, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1853, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, English, Hee, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Slom). Representatives Ito, Carroll, Chong, Hanohano, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 102 on S.B. No. 1382

The purpose of this bill is to appropriate funds for collective bargaining cost items for collective bargaining unit (2) and their excluded counterparts, including the cost of salary adjustments and contributions to the Hawaii employer-union health benefits trust fund.

Your Committee finds that the public employer has entered into agreements with the exclusive representative of bargaining units (2), (3), (4), (6), (8), and (13). The exclusive representative has notified the public employer that their membership has ratified the agreements, and in accordance with law, the public employer has submitted the cost items to the Legislature for appropriation within ten days of the ratification.

Your Committee has amended this measure as follows by:

- (1) Adding collective bargaining units (3), (4), (6), (8), and (13), and their excluded counterparts for funding under this measure;
- (2) Incorporating the funding figures agreed upon between the public employer and the exclusive representative of the bargaining units and the funding figures for their excluded counterparts; and
- (3) Providing a separate break out of funding for the Department of Education, including the public library system.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1382, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1382, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Sonson, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 103 on S.B. No. 1388

The purpose of this bill is to appropriate funds for all collective bargaining cost items for collective bargaining unit (9) and their excluded counterparts.

Your Committee finds that the decision of the arbitration panel appointed pursuant to law for collective bargaining unit (9) has been received by the Governor who, pursuant to section 89-11(g), Hawaii Revised Statutes, has transmitted, to the Legislature for appropriation, proposed legislation containing all items requiring moneys for implementation. Your Committee finds that this measure will fund the arbitration award for collective bargaining unit (9) for the upcoming fiscal biennium.

Your Committee has amended this measure as follows:

- (1) By incorporating the funding figures reached under the arbitration award; and
- (2) By providing a separate break out of funds for the Department of Education.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1388, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1388, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Sonson, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 104 on S.B. No. 1372

The purpose of this bill is to allow state departments and agencies, with the approval of the Department of Budget and Finance, to enter directly into financing agreements to finance the construction of facilities and to lease or purchase equipment.

Your Committee finds that allowing other departments and agencies to directly enter into financing agreements will effectively achieve a balance between increased government efficiency and continued oversight over the agreements by the Department of Budget and Finance.

Your Committee has amended this measure by making several technical amendments for the purposes of clarity and style and by changing the effective date from July 1, 2020, to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1372, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1372, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Whalen). Representatives M. Oshiro, Lee, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 105 on S.B. No. 990

The purpose of this measure is to increase the transparency of petroleum industry pricing by:

- (1) Requiring the Public Utilities Commission (PUC) to refer to the Attorney General for prosecution, deceptive, false, or misleading statements, and unlawful profiteering discovered in connection with PUC's regulation under chapter 486H, Hawaii Revised Statutes (HRS), Gasoline Dealers, or chapter 486J, HRS, the Petroleum Industry Information Reporting Act (Reporting Act);
- (2) Requiring the Department of Business, Economic Development, and Tourism (DBEDT) to use the information obtained under the Reporting Act to support the DBEDT Director's role as the State Energy Resources Coordinator and conduct strategic and systematic energy planning and emergency preparedness activities; and
- (3) Appropriating funds to allow the PUC to hire staff and administer the Reporting Act and DBEDT to fulfill its analysis and planning responsibilities as State Energy Resources Coordinator under the Reporting Act.

Your Committee on Conference finds that there is a need for more transparency in the petroleum industry and this measure seeks to address this issue by requiring the PUC to report petroleum industry profiteering or false or deceptive statements to the Attorney General, requiring DBEDT to use the information to conduct strategic and systematic energy planning and emergency preparedness activities, and allowing the PUC to examine and investigate distributors.

Your Committee on Conference has amended this measure by:

- (1) Removing section 1, the purpose section, of this measure;
- (2) With regard to the filing requirements of section 486J-3, HRS, removing the language allowing filing at other appropriate time intervals and on dates to be determined by the PUC;
- (3) Amending section 9 of the measure to require that the PUC publicly report information within fourteen days rather than thirty days and by removing the language giving the PUC the discretion to disclose the information as soon as practically and technically feasible;
- (4) Appropriating \$1,200,000 out of the general fund for fiscal year 2007-2008 to be deposited into the Petroleum Industry Monitoring, Analysis, and Reporting Special Fund;
- (5) Appropriating \$1,200,000 out of the Petroleum Industry Monitoring, Analysis, and Reporting Special Fund for fiscal year 2007-2008 to administer, implement, and maintain the Petroleum Industry Monitoring, Analysis, and Reporting Program; and
- (6) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 990, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 990, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Morita, Herkes, Carroll, McKelvey, Thielen, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 106 on S.B. No. 1402

The purpose of this measure is to promote the installation of wind resistive devices for homes by appropriating funds out of the Loss Mitigation Grant Fund to be used for the purposes of the Loss Mitigation Grant Program.

The measure also makes the installation of residential safe rooms eligible for loss mitigation grant funds.

Your Committee on Conference finds that Act 5, Special Session, Session Laws of Hawaii 2005 (Act 5), appropriated \$2,000,000 for the Loss Mitigation Grant Program to provide grants for the installation of wind resistive devices for dwellings. The funds, however, have since lapsed due to the time consuming development of technical standards and program guidelines needed to administer the program.

This measure re-appropriates funds under Act 5 to allow the grants to be awarded as intended under the original Loss Mitigation Grant Program and for the installation of residential safe rooms.

Your Committee on Conference has amended this measure by:

- (1) Appropriating \$2,000,000 out of the Loss Mitigation Grant Program; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1402, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1402, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Herkes, Lee, McKelvey, Marumoto, Managers on the part of the House. Ayes, 4. Ayes with Reservations, 1 (McKelvey). Noes, none. Excused, none.

Conf. Com. Rep. 107 on S.B. No. 1946

The purpose of this measure is to increase the safety and effectiveness of dams and reservoirs and prevent future dam failures in the State.

Specifically, this measure:

- (1) Requires the owner or operator of each dam to hold a valid certificate of approval to impound water;
- (2) Allows authorized personnel of the Department of Land and Natural Resources (DLNR) to enter upon any property, public or private, at reasonable times, without notice, to investigate the condition or operation of any dam;
- (3) Makes it unlawful to refuse entry to any authorized personnel of DLNR to inspect a dam or reservoir;
- (4) Grants DLNR rights to injunctive relief to enforce the provisions of Chapter 179D, Hawaii Revised Statutes (Dam and Reservoir Safety Act (Act));
- (5) Allows DLNR, in cases of emergency, to employ immediate remedial measures, at the cost of the owner of a dam or reservoir, to protect life and property;
- (6) Establishes a Dam and Reservoir Safety Special Fund to implement the Act;
- (7) Allows liens to attach to the property of a dam or reservoir owner for the costs of any remedial measures taken by DLNR;
- (8) Requires dams and reservoirs completed prior to the effective date of this measure to apply for a certificate of approval to impound water;
- (9) Requires dams or reservoirs up to ninety per cent completed on the effective date of this measure to submit, for approval by DLNR, plans and specifications for any dam or reservoir construction, enlargement, repair, or removal, prior to commencing the work contemplated;
- (10) Permits a dam or reservoir owner to continue to impound water while in the process of applying for a certificate of approval to impound water, unless the Board of Land and Natural Resources (BLNR) determines that the dam or reservoir poses a danger to the health and safety of persons or property;
- (11) Requires DLNR to submit annual reports to the Governor and Legislature relating to the Act;
- (12) Requires dam and reservoirs owners regulated by the Act to, among other things:
 - (A) Maintain an operation and maintenance plan, including an inspection and monitoring program;
 - (B) Establish an emergency action plan for high and significant hazard potential dams and reservoirs;
 - (C) Facilitate access by any necessary state agency or representative to the dam, reservoir, or appurtenances; and
 - (D) Furnish, upon request, plans, specifications, operating and maintenance data, and other pertinent information;
- (13) Gives the State, BLNR, or DLNR immunity from actions for damages sustained by the failure of private dams or reservoirs regulated by the Act;
- (14) Allows BLNR to catalog and maintain an inventory of all regulated dams and reservoirs under the Act;
- (15) Establishes administrative penalties of up to \$25,000 per day for a first violation of the Act, or any rule, order, or condition adopted pursuant to the Act;
- (16) Makes it a class C felony and establishes monetary criminal fines of up to \$25,000 per day for a first violation, and up to \$50,000 per day for subsequent violations for any person who negligently or with notice, violates the Act, or any rule, order, or condition adopted pursuant to the Act;
- (17) Appropriates into and out of the Dam and Reservoir Safety Special Fund an unspecified amount; and
- (18) Makes other amendments to existing sections of the Act, for purposes of consistency with the new provisions of the Act.

Your Conference on Committee finds that in light of the Kaloko Reservoir Dam tragedy on March 14, 2006, amending chapter 179D, Hawaii Revised Statutes, will enable the State to increase the effectiveness of its dam safety program, by strengthening the monitoring and enforcement measures that provide dam and reservoir safety throughout the State and creating a Dam and Reservoir Safety Special Fund to carry out the purposes of the program.

Your Conference on Committee has amended this measure by:

- (1) Clarifying that the BLNR will have jurisdiction of all dams and reservoirs until the DLNR has completed its statewide inspections, the DLNR has established and implemented rules and criteria for a five year dams and reservoirs inspection and classification processes, and the BLNR declares which dams or reservoirs are to be removed from its jurisdiction;
- (2) Adding a definition for "Operator";
- (3) Deleting new language from section 179D-4, Hawaii Revised Statutes, that would provide that no action can be brought against the State, the Board, or the Department, or its employees for damages sustained through the partial or total failure of any private dam or reservoir

addressed under chapter 179D, Hawaii Revised Statutes, or its maintenance or operation by reason of any supervision or other action taken or not taken pursuant to chapter 179D;

- (4) Inserting into the blank appropriation an amount of \$1,000,000, to be deposited into the Dam and Reservoir Safety Special Fund and expended by the DLNR to carry out the purposes of the special fund;
- (5) Changing the effective date of this measure from July 1, 2020 to effective upon approval and changing the effective dates for the appropriation deposited into and expended by the DLNR from the Dam and Reservoir Safety Special Fund from July 1, 2020 to July 1, 2007;
- (6) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1946, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1946, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Hee, Hooser, Tokuda, Slom, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, 1 (Slom). Representatives Ito, Waters, Sagum, Tokioka, Thielen, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 108 on S.B. No. 896

The purpose of this measure is to:

- (1) Appropriate funds in FY 2007-2008 and FY 2008-2009 to the High Technology Development Corporation to negotiate a ten-year lease to house a technology incubator and innovation center in a life sciences research complex in Kakaako, and for planning, development, and operational costs of the center; and
- (2) Require an annual progress report to the Legislature beginning in 2008.

Your Committee on Conference has amended this measure by:

- (1) Changing the square footage in the lease agreement from ninety-nine thousand square feet to sixty-six thousand square feet;
- (2) Appropriating \$150,000 in fiscal year 2007-2008 and \$250,000 in fiscal year 2008-2009; and
- (3) Changing the effective date from July 1, 2020, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 896, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 896, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Ige, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Yamashita, Ito, M. Oshiro, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 109 on S.B. No. 880

The purpose of this measure is to:

- (1) Establish the museum of Hawaiian music and dance committee to determine the appropriate type of institution that should be established, its location, possible financing mechanisms, and to complete an initial business plan for the museum of Hawaiian music and dance; and
- (2) Appropriate funds to the Hawaii Tourism Authority to assist the committee.

Your Committee on Conference has amended this measure by:

- (1) Appropriating \$80,000 in fiscal year 2007-2008 and the same sum in fiscal year 2008-2009; and
- (2) Changing the effective date to make the bill effective upon approval, with section 4 to take effect July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 880, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 880, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Yamane, Manahan, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 110 on S.B. No. 1228

The purpose of this measure is to:

- (1) Establish a process to determine the most appropriate means of memorializing the World War II Japanese internment camp experience in Hawaii; and
- (2) Appropriate funds to the Department of Land and Natural Resources for the purpose of this Act.

Your Committee on Conference has amended this measure by:

- (1) Appropriating \$50,000 for fiscal year 2007-2008; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1228, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1228, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Espero, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Yamane, Manahan, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 111 on S.B. No. 1026

The purpose of this measure is to protect the environment through recycling by allowing sixty-eight-fluid-ounce beverage bottles to be recycled under Hawaii's Deposit Beverage Container Program.

Specifically, this measure:

- (1) Increases the volume limit of deposit beverage containers from sixty-four to sixty-eight fluid ounces;
- (2) Requires distributors to report container numbers sold and make fee payments on that basis;
- (3) Permits calculation of redemption value of refund for previously processed and baled containers; and
- (4) Phases in redemption of sixty-eight ounce containers.

Your Committee has amended this bill by:

- (1) Expanding and clarifying the purpose section to allow the Director of Health some discretion in temporarily suspending the deposit beverage container handling fee if it is determined that the deposit beverage container deposit special fund contains sufficient funds;
- (2) Removing the provision allowing consumers to request that the refund value be computed by container count only if the consumers is redeeming not more than fifty containers of each material type per visit;
- (3) Removing language requiring the use of steel or bi-metal cans or unique containers;
- (4) Changing the effective date of the measure to July 1, 2007; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1026, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1026, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Baker, Hooser, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Morita, Yamashita, Chong, Carroll, Yamane, Ching, Managers on the part of the House. Ayes, 6. Noes, none. Excused, none.

Conf. Com. Rep. 112 on S.B. No. 1515

The purpose of this measure is to require any commercial harbor tenant or user to reimburse the Department of Transportation for the entire amount of a fine levied upon the department by reason of the tenant or user's violation of any federal, state, or county law or rule.

Your Committee on Conference finds that as the landowner of harbor facilities and lands, the Department of Transportation may be held liable by the federal government for the violation of federal environmental laws committed by harbor users or tenants. Your Committee also finds that the measure will allow for a full recovery of fines imposed on the Department of Transportation, as the landowner, for violations of federal and state air and water pollution laws committed by harbor users and tenants.

Your Committee on Conference has amended this measure by:

- (1) Clarifying the language in the purpose section for purpose of style;
- (2) Making a conforming statutory amendment to section 266-25, Hawaii Revised Statutes, relating to penalties for violation of rules, for the purpose of reconciling a possible statutory conflict in interpretation; and
- (3) Changing the effective date from January 1, 2112, to upon its approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1515, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1515, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Souki, B. Oshiro, M. Oshiro, Pine, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 113 on S.B. No. 1882

The purpose of this bill is to reduce the tax burden for lower income resident taxpayers by establishing a graduated food tax credit.

Your Committee has amended this bill by expanding the current low-income refundable tax credit and renaming it the refundable food/excise tax credit. The new credit will provide additional income brackets, raise the income cap to increase the number of people who qualify for the credit, and raise the amount of the tax credit for each bracket to provide tax relief to lower income families. The new brackets and credit amounts more accurately reflect current needs and incomes of those who are struggling to pay for necessities.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1882, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1882, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Tsutsui, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives M. Oshiro, Chong, Lee, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 114 on S.B. No. 148

The purpose of this bill is to satisfy the Hawaii State constitutional mandate requiring taxpayers to receive a tax credit or refund when the balance of the state general fund exceeds five percent of general revenues for each of two successive fiscal years.

Your Committee on Conference has amended this bill by providing a graduated tax credit based on federal adjustable gross income to help low-income taxpayers.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 148, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 148, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives M. Oshiro, Lee, Chong, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 115 on S.B. No. 1779

The purpose of this measure is to provide better protections for the children of Hawaii.

Your Committee on Conference finds that it is in the public's interest to establish a two-year statewide task force to evaluate and make recommendations on the State's responses to cases of child sexual assault and exploitation to make improvements and to better protect and serve the children of Hawaii. Your Committee on Conference further finds that the Department of Human Services should be able to ensure the safety of children who are not safe in their family homes by submitting a permanent plan with the goal of guardianship that the court should be able to award without the termination of parental rights.

Your Committee on Conference amended this measure to:

- (1) Deleting references to a task force;
- (2) Deleting the appropriation;
- (3) Changing the effective date to upon approval; and
- (4) Making technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1779, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1779, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Fukunaga, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Waters, Rhoads, Pine, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 116 on S.B. No. 1916

The purpose of this measure is to strengthen the support to family caregivers, including extending the joint legislative committee of family caregiving, requiring comprehensive needs assessments, and appropriating funds for continued and expanded services.

Your Committee on Conference amended the measure to:

- (1) Substitute the Joint Legislative Committee on Caregiving for the Executive Office on Aging as having the task of conducting a comprehensive assessment of the needs of care recipients aged sixty and older with physical or cognitive disabilities and the needs of their family caregivers;
- (2) Exempt the expenditures of the Joint Legislative Committee under sections 5 and 6 from chapter 103D, Hawaii Revised Statutes, provided that the committee endeavors to ensure transparency in its procurement processes;
- (3) Allow the Joint Legislative Committee on Caregiving to contract out to a qualified third party to conduct the assessment;
- (4) Insert language regarding the 2005 federal grant for the Aging and Disability Resource Center;
- (6) Clarify that the appropriations in section 9 are to the Executive Office on Aging;
- (7) Clarify that the appropriation made in section 10 is for the purpose of providing direct services to family caregivers as well as for expanding the Kupuna Care program's in-home and access services to qualified care recipients;
- (8) Insert specific monetary amounts in the appropriation sections; and
- (9) Change the July 1, 2020, effective date to upon approval; provided that sections 5, 8, and 9 are to take effect on July 1, 2007, and section 2 is to take effect on June 29, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1916, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1916, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Ihara, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Green, Shimabukuro, Magaoy, Lee, Ching, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 117 on S.B. No. 1672

The purpose of this measure is to ensure that Hawaii's residents have continued access to health care by increasing the Medicaid fee schedule and appropriating funds to meet the increase.

Your Committee on Conference finds that it is in the public interest to ensure accessibility to healthcare for Hawaii's Medicaid recipients. Your Committee on Conference further finds that the rising costs of health care and the resulting inadequacy of payment and reimbursement from Medicaid has severely impacted the services Hawaii's physicians have been able to provide.

Your Committee on Conference amended this measure to:

- (1) Omit the proposed amendment to the Medicaid fee schedule in the Hawaii Revised Statutes;
- (2) Make an appropriation in the amount of \$8,000,000 for each year of the 2007-2009 fiscal biennium to increase payments for physicians' services up to 100 per cent of the current Medicaid rate;
- (3) Require the Department of Human Services to include a sum at least equal to \$8,000,000 in addition to its baseline Medicaid request and to report the amount to be requested no later than twenty days before the convening of the 2008 Regular Session;
- (4) Require the Department of Human Services to report to the Legislature no later than twenty days before the convening of the 2008 Regular Session with the financial amounts necessary to continue the increased payments for physicians services and to increase payments to all Medicaid fee-for-service and QUEST providers up to 100 per cent of the current Medicaid rate;
- (5) Take effect on July 1, 2007; and
- (6) Make technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1672, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1672, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Hemmings, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Green, Waters, M. Oshiro, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 118 on S.B. No. 1676

Your Committee on Conference finds that this bill is intended to help Hawaii Health Systems Corporation address the rising costs of medical malpractice and hospital liability insurance and the lack of insurers providing sufficient coverage in Hawaii. However, such an undertaking by Hawaii Health Systems Corporation requires oversight by those with appropriate knowledge and experience in financial matters and the insurance industry.

Accordingly, your Committee on Conference has amended this measure by:

- (1) Establishing a ten-member captive insurance board that shall carry out Hawaii Health Systems Corporation's duties and responsibilities relating to the establishment of any captive insurance company pursuant to section 323F-7(a)(20), Hawaii Revised Statutes, and the operation thereof;
- (2) Amending section 323F-3, Hawaii Revised Statutes, to clarify that the Hawaii Health Systems Corporation board shall carry out the duties and responsibilities of the corporation other than those duties and responsibilities relating to the establishment of any captive insurance company pursuant to section 323F-7(a)(20), Hawaii Revised Statutes, and the operation thereof;
- (3) Adding an appropriation for fiscal year 2007-2008;
- (4) Changing the effective date to July 1, 2007; and
- (5) Making further technical, nonsubstantive amendments for clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1676, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1676, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Taniguchi, Baker, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Herkes, Nakasone, McKelvey, Marumoto, Managers on the part of the House. Ayes, 5. Ayes with Reservations, 1 (Marumoto). Noes, none. Excused, none.

Conf. Com. Rep. 119 on S.B. No. 992

The purpose of this bill is to support the generation of electricity with fuels that are lower in cost and air emissions by clarifying that naphtha fuel sold for use in power-generating facilities will be taxed at the rate of one-cent per gallon, with an effective date of July 1, 2020, and a repeal date of December 31, 2009.

Current technology allows for a variety of liquid fuels to power electric-generation facilities, as opposed to the use of diesel fuel or oil fuel. These new technologies allow for the use of multiple types of liquid fuels, such as naphtha, that were previously used solely for transportation purposes.

Section 243-4, Hawaii Revised Statutes (HRS), sets the tax rates for numerous fuels, such as diesel oil and aviation fuel at one-cent per gallon and other fuels at the much higher county fuel tax rates; however, this section does not specifically address the tax rate for naphtha fuel. Your Committee on Conference understands that this ambiguity has resulted in naphtha fuel used in power-generation facilities being taxed at the rate of one-cent per gallon, the same rate as diesel fuel, which your Committee on Conference finds to be in conformity with the intent of section 243-4, HRS.

Your Committee on Conference has amended this bill by:

- (1) Changing the effective date to upon approval, and adding a two-year sunset date;
- (2) Providing that the rate of tax for naphtha as provided for in section 243-4(a)(3), Hawaii Revised Statutes, shall be effective retroactively and apply to any imposition of the fuel tax on naphtha sold for use in a power-generating facility; and
- (3) Making technical, nonsubstantive amendments for clarity, style, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 992, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 992, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Baker, Fukunaga, Hooser, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Trimble). Representatives Morita, Yamashita, Carroll, Wakai, Thielen, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 2 (Wakai, Thielen).

Conf. Com. Rep. 120 on S.B. No. 1060

The purpose of this bill is to assist injured workers and enhance the workers' compensation law by, among other things:

- (1) Providing an alternative dispute resolution process for workers' compensation claims;
- (2) Establishing optional, evidence-based treatment guidelines for medical providers treating injured workers;
- (3) Requiring essential medical services to be continued for an injured employee during a dispute between the employee and the employer or the employer's insurer regarding treatment, until the Director of Labor (Director) issues a decision on whether medical treatment should be continued;
- (4) Allowing an employer or employer's insurer to recover medical costs from a claimant's personal health care provider or other appropriate occupational or non-occupational insurer for medical treatment the Director determines should have been discontinued;
- (5) Allowing injured employees to be referred for vocational rehabilitation services where the employee has achieved maximum medical improvement and the employer has made no offer of suitable work;
- (6) Allowing employers to request the Director to issue a credit for the amount of temporary total disability benefits that the Director determines should have been discontinued;
- (7) Amending rulemaking powers under the Workers' Compensation Law;
- (8) Establishing requirements and standards for physicians selected by mutual agreement between the claimant and the employer to perform independent medical examinations; and
- (9) Requiring employers' insurers to provide annual reports regarding the costs of their policies to the Director and the Insurance Commissioner.

Your Committee on Conference has amended the bill by:

- (1) Removing the provisions establishing optional, evidence-based treatment guidelines for medical providers treating injured workers;
- (2) Restoring the existing paragraph (8) of the exemptions from the definition of "Employment" in Section 386-1, Hawaii Revised Statutes (H.R.S.) and deleting the new proposed language that was numbered paragraph(8);
- (3) Adding a new subsection (c) to Section 382-31, H.R.S., that allows an employee to receive a weekly benefit equal to seventy per cent of the employee's average weekly wages if the injury causes permanent or temporary disability and payment of compensation was not begun within thirty days of or within the same year as the day of injury whichever is later;
- (4) Clarifying Section 386-94, H.R.S. that only an approved claim by a claimant's attorney shall be a lien upon the compensation as fixed by the Director, the Appellate Board or the Court;
- (5) Removing Section 7 of the bill that amended Section 386-72, H.R.S. entitled "Rulemaking powers."
- (6) Amending proposed language to Section 386-79, H.R.S., entitled "Medical Examination by employer's physician" to allow a claimant who is no longer residing in Hawaii be examined by physicians from a list who are licensed in the state where the claimant resides;
- (7) Deleting proposed language to allow an employee and the employee's physician to record the independent medical examination under Section 387-79, H.R.S.;
- (8) Adding a provision to repeal certain rules related to Workers' Compensation;
- (9) Changing the effective date from July 1, 2020 to June 30, 2007; and
- (10) Making technical, non-substantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1060, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1060, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Sonson, Souki, Nakasone, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 121 on S.B. No. 709

The purpose of this measure is to:

- (1) Require the Department of Business, Economic Development, and Tourism to investigate, collect, analyze, and publish research and data to track economic progress and aid in the development and economic health of growth industries; and
- (2) Appropriate funds for the purposes of the Act.

Your Committee on Conference has amended this measure by:

- (1) Clarifying that the appropriation is for additional resources, including two permanent full-time equivalent economist positions in the Department of Business, Economic Development, and Tourism to improve the State's ability to measure the productivity of and progress toward achieving innovation in Hawaii's economy, and to assess the effectiveness of measures enacted by the legislature to improve Hawaii's economic situation;
- (2) Appropriating \$150,000 in fiscal year 2007-2008 and \$250,000 in fiscal year 2008-2009; and
- (2) Changing the effective date from July 1, 2034, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 709, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 709, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Espero, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, Chong, Tokioka, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 122 on S.B. No. 810

The purpose of this bill is to facilitate the establishment of a "totally integrated community" on the state-owned Waimano Ridge lands by:

- (1) Appropriating funds for:
 - (a) The Waimano Ridge Task Force operating expenses;
 - (b) Updating the Waimano Ridge comprehensive master plan; and
 - (c) One permanent, full-time Waimano Ridge facilities manager position; and
- (2) Authorizing the issuance of general obligation bonds for building demolition and water system upgrade and building improvement projects on Waimano Ridge lands.

Your Committee on Conference amended this measure by:

- (1) Inserting the appropriation amount of \$150,000 for the task force operating expenses;
- (2) Deleting the appropriation sections for the master plan and the manager position;
- (3) Deleting the section authorizing the issuance of general revenue bonds; and
- (4) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 810, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 810, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, M. Oshiro, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 123 on S.B. No. 1115

The purpose of this measure is to continue the provision of comprehensive perinatal care on the island of Oahu to women who have a history of methamphetamine and other substance abuse.

Your Committee on Conference amended this measure by inserting the appropriation amount of \$200,000 for fiscal year 2007-2008, and by changing the effective date from July 1, 2020, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1115, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1115, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Chun Oakland, Baker, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Shimabukuro, Lee, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 124 on S.B. No. 1170

The purpose of this measure is to address budgetary shortfalls and implement recommended improvements to the Healthy Start Program, including Enhanced Healthy Start.

Your Committee on Conference finds that Hawaii's Healthy Start Program and Enhanced Healthy Start are effective tools for combating child abuse and neglect. Your Committee on Conference further finds that there have been several suggestions for important program improvements that will allow more children and families to benefit.

Your Committee on Conference amended this measure to:

- (1) Specify the amount appropriated is \$1,660,409, for each year of the 2007-2009 fiscal biennium; and
- (2) Take effect on July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1170, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1170, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Sakamoto, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Green, Shimabukuro, Mizuno, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 125 on S.B. No. 932

The purpose of this measure is to prepare incarcerated individuals for reentry into the community by establishing a comprehensive offender reentry system within the Department of Public Safety and providing funding for reentry programs such as restorative circles, cognitive restructuring programs, and a day-reporting pilot project, that have proven to be effective.

Your Committee on Conference finds that the rehabilitation and preparation of incarcerated individuals for reentry results in lower recidivism rates, thereby reducing the economic and noneconomic costs to the public.

Your Committee on Conference amended this measure to:

- (1) Clarify that the placement of parents in correctional facilities in consideration of the best interest of the family is to be consistent with public safety and inmate security;
- (2) Clarify the staffing allowed for the adult offender reentry program;
- (3) Require the assistance of the Department of Taxation, in addition to the Department of Industrial Relations, in establishing tax incentives for employers who hire formerly incarcerated individuals, and require suggestions for legislation before the 2008 legislative session;
- (4) Replace the proposed stakeholders committee with a legislative oversight committee with different obligations;
- (5) Provide that the Department of Public Safety is not required to complete the research requested on its own;
- (6) Change the duration of the day-reporting pilot project to one year and change the reporting requirements accordingly;
- (7) Specify that the Director of Public Safety is to return offenders incarcerated on the mainland back to Hawaii one year before their release date:
 - (A) Is to be contingent upon the existence of the appropriate programs in Hawaii and shall be consented to by the offender if the offender is participating a successful rehabilitation or reentry program in the mainland facility at that time; and
 - (B) Does not preclude those with less than one year of incarceration remaining on their sentence from being returned to prepare for reentry;
- (8) Clarify that the appropriation for the restorative circles is for the continuation of existing programs, as well as the creation of new programs throughout the State;
- (9) Reduce all appropriations to one year, insert the specific dollar amounts into the appropriation sections, and clarify the uses of the appropriations;
- (10) Require the Department of Public Safety to report to the Legislature prior to the 2008, 2009, and 2010 legislative sessions on the progress and effectiveness of the components of this measure;
- (11) Take effect on July 1, 2007; and
- (12) Make technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 932, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 932, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Espero, Baker, Sakamoto, Tsutsui and Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Evans, Sonson, Har and Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 126 on H.B. No. 436

The purpose of this bill is to improve healthcare access in Hawaii by requiring medical assistance programs such as QUEST and Medicaid to include chiropractic coverage.

Your Committee on Conference has amended this bill by:

- (1) Appropriating \$1,000,000 for each year of fiscal biennium 2007-2009 for chiropractic coverage under medical assistance programs; and

- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 436, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 436, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Taniguchi, Tsutsui, Ihara, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Shimabukuro, Green, Lee, Rhoads, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 127 on H.B. No. 506

The purpose of this bill is to encourage the continued development of alternative energy sources, thereby reducing the state's dependence on imported fuels, by extending by five years the date by which a qualifying ethanol production facility must be in production to take advantage of the ethanol facility tax credit.

Your Committee on Conference has amended this bill by changing its effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 506, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 506, H.D. 1, S.D. 1, C.D. 1.

Conf. Com. Rep. 128 on H.B. No. 122

The purpose of this bill is to increase transparency in government by requiring public disclosure by any entity that receives certain kinds of financial assistance from the State.

Your Committee on Conference has amended this bill by:

- (1) Inserting an appropriation amount of \$250,000 for fiscal year 2007-2008; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 122, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 122, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Baker, Fukunaga, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives M. Oshiro, Lee, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 129 on H.B. No. 718

The purpose of this bill is ensure the keiki of Hawaii have access to facilities to learn about, interact with, and enjoy our State's marine resources and ecosystem by:

- (1) Appropriating funds to the Hawaii Community Development Authority (HCDA) to proceed with any necessary environmental remediation measures at the Kewalo basin cove; and
- (2) Setting aside the old ice chute and fuel dock operations building site at the cove for continued use by the Kewalo Keiki Fishing Conservancy.

Your Committee on Conference has amended this bill by:

- (1) Changing the appropriation amount for the necessary environmental remediation measures to \$30,000 for fiscal year 2007-2008; and
- (2) Changing the effective date to July 1, 2007;
- (3) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 718, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 718, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Fukunaga, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Ito, Chong, Thielen, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Thielen).

Conf. Com. Rep. 130 on H.B. No. 13

The purpose of this bill is to support the administration and operation of the Department of Education's food distribution program by establishing the Food Distribution Program Revolving Fund for the collection and distribution of generated revenue.

Your Committee on Conference has amended this bill by making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 13, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 13, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 131 on H.B. No. 1630

The purpose of this bill is to prepare students for the information technology age by providing a comprehensive project-based and student-centered learning program in which students are responsible for their own learning. Specifically, this bill appropriates funds to be deposited into the Hawaii 3Ts School Technology Laboratories Fund (Fund) to maintain the Project EAST Program (Program) in existing schools and expand the Program to schools around the state.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of general funds to be deposited into the Fund, and out of the Fund, to \$1,100,000;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1630, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1630, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Espero, Sakamoto, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Slom). Representatives Takumi, M. Oshiro, Chong, Sagum, Finnegan, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 132 on H.B. No. 15

The purpose of this bill is to fund special education teaching programs by creating the Felix Stipend Program Special Fund (Fund) into which shall be deposited moneys received as repayment from students due to a breach in their contractual agreements under the Felix Stipend Program.

Your Committee on Conference has amended this bill by:

- (1) Deleting the appropriation from general funds because it is unnecessary;
- (2) Changing the appropriation amount out of the Fund to \$250,000; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 15, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 15, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Tsutsui, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, Chang, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 133 on H.B. No. 598

The purpose of this bill is to enhance the learning experiences of students across the state by establishing and appropriating funds for the Online Learning Task Force (Task Force) to develop a systematic plan to expand opportunities for online learning.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of the appropriation to support the operations of the Task Force, to \$50,000;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 598, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 598, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Fukunaga, Tsutsui, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Fukunaga). Representatives Takumi, Lee, Berg, Finnegan, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Berg).

Conf. Com. Rep. 134 on H.B. No. 104

The purpose of this bill is to improve access to medical care by:

- (1) Establishing a process by which Medicaid fee-for-service individual provider reimbursement rates are increased annually for inflation;
- (2) Retroactively adjusting for inflation, payments made to providers of hospital outpatient services and other individual providers; and
- (3) Appropriating funds:
 - (A) To adjust for inflation, payments made to Medicaid fee-for-service hospitals; and
 - (B) For the State's portion of the federal disproportionate share hospital allowance.

Your Committee on Conference has amended this bill by:

- (1) Removing the provisions related to an annual increase in Medicaid fee-for service individual provider reimbursement rates;
- (2) Removing the retroactive payment adjustment;
- (3) Removing the appropriation for inflation, payments made to Medicaid fee-for-service hospitals;
- (4) Inserting an amount of \$7,376,000 for fiscal year 2007-2008 for the State's portion of the federal disproportionate share hospital allowance; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 104, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 104, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Ihara, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Green, M. Oshiro, Mizuno, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 135 on H.B. No. 531

The purpose of this bill is to establish a temporary "Hawaii 3-5 Transition" task force to study the feasibility of expanding Hawaii's early intervention section to continue services for children three to five years of age and appropriating funds for the task force.

Your Committee on Conference has amended this bill by:

- (1) Clarifying that the task force's study is focused on children three years and one day up to five years of age;
- (2) Clarifying the composition of the task force to include at least two parents of children who may require these services and one representative from each of the departments and agencies listed;
- (3) Adding a representative of the Board of Education to the task force;
- (4) Inserting an appropriation amount of \$120,000 for fiscal year 2007-2008 for the task force; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 531, H.D. 3, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 531, H.D. 3, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Chun Oakland, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Shimabukuro, Green, Takumi, Rhoads, Mizuno, Ward, Managers on the part of the House. Ayes, 6. Noes, none. Excused, none.

Conf. Com. Rep. 136 on H.B. No. 226

The purpose of this bill to assess the amount of and reduce greenhouse gas emissions (emissions) in Hawaii by:

- (1) Requiring the Department of Health (DOH) to conduct an inventory of Hawaii emission sources and update the report by the Department of Business, Economic Development, and Tourism (DBEDT) and DOH entitled "Inventory of Hawaii Greenhouse Gas Emissions Estimates for 1990", dated July 1997;
- (2) Appropriating fund to enable the Hawaii Energy Policy Forum of the University of Hawaii to:
 - (A) Convene stakeholders to develop a coherent plan with an implementation timetable to reduce emissions; and
 - (B) Analyze the effectiveness of the Global Warming Solutions Act of 2007 (Act), as devised in this bill to reduce emissions and propose modifications thereto to the Legislature prior to the implementation of the scoping plan for achieving the maximum technologically feasible and cost-effective reductions in emissions;

and
- (3) By implementing the Act that includes:
 - (A) Requiring the Director of Health (Director) to determine statewide emissions as of 1990 and approve a statewide emissions limit to be achieved by 2020;
 - (B) Requiring the Director to establish emission limits and emission reduction measures within specified parameters to become operative on July 1, 2012;
 - (C) Requiring the Director to establish a system of market-based declining annual aggregate emission limits for sources or categories of sources that emit emissions, within specific parameters, to achieve the statewide emissions limit;
 - (D) Requiring the Director to prepare and approve a scoping plan for achieving the maximum technologically feasible and cost-effective reductions in emissions by 2020; and
 - (E) Provisions relating to reporting and verification of statewide emissions and monitoring and enforcement.

The ramifications of global warming requires a comprehensive approach in developing a statewide framework of action that incorporates Hawaii's unique needs and resources. Accordingly, your Committee on Conference has amended this bill by:

- (1) Declaring as a state policy that by January 1, 2020, Hawaii shall reduce emissions to levels at or below the best estimations and updates of the inventory of emission estimates for 1990;

- (2) Establishing the statewide emissions limit to be equal to or below the level of emissions in 1990;
- (3) Establishing a Greenhouse Gas Emissions Reduction Task Force (Task Force) that is required, before December 1, 2009, to prepare a work plan with specified objectives and a regulatory scheme for implementing the maximum practically and technically feasible and cost-effective reductions in emissions to meet the State's declared policy;
- (4) Requiring the Task Force to submit reports to the Legislature, at specified times, relating to its work plan and regulatory scheme, together with proposed legislation, for achieving reductions in emissions for sources or categories of sources of emissions;
- (5) Requiring the Director to adopt rules, before December 31, 2011, relating to, among other matters:
 - (A) Establishing emission limits applicable to sources or categories of sources of emissions; and
 - (B) Reporting and verification of statewide emissions and monitoring and compliance;
- (6) Authorizing the Director to specify a schedule of fees to be paid by sources of emissions to be deposited into the Clean Air Special Fund; and
- (7) Appropriating \$500,000 for each of the fiscal years of 2007-2008 and 2008-2009.

Technical nonsubstantive amendments were also made for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 226, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 226, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Baker, Hooser, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Morita, Carroll, Thielen, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 137 on H.B. No. 90

The purpose of this bill is to enhance the monitoring of the insurance marketplace, protection of insurance policyholders, and compliance with the Insurance Code and regulations, by adopting the National Conference of Insurance Legislators Market Conduct Surveillance Model Law, which establishes a framework for the Insurance Commissioner to conduct market conduct examinations of domestic and foreign insurers.

A market conduct examination is a review of an insurer's marketplace practices. Your Committee on Conference finds that this measure will enable the Insurance Commissioner to conduct comprehensive and targeted market conduct examinations of an insurer's operations to evaluate compliance with applicable state laws.

Your Committee on Conference has amended this measure by:

- (1) Inserting appropriation amounts of \$318,000 for fiscal year 2007-2008 and \$365,000 for fiscal year 2008-2009 to carry out the provisions of this bill; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 90, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 90, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Herkes, Magaoy, Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 138 on H.B. No. 899

The purpose of this bill is to establish sustainable strategies that will reduce Hawaii's dependence on fossil fuels and reduce greenhouse gas emissions. Specifically, this measure appropriates an unspecified amount of funds for Phase I and Phase II of the research, development, and implementation of a pilot project to demonstrate ecologically-sustainable strategies that will enhance soil fertility for the production of clean energy feedstocks and food crops.

Your Committee on Conference has amended this measure by:

- (1) Inserting an appropriation amount of \$450,000 for fiscal year 2007-2008 for Phase I;
- (2) Deleting the appropriation for fiscal year 2008-2009 and the provisions regarding Phase II funded by this appropriation; and
- (3) Making technical nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 899, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 899, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Kokubun, Baker, Hooser, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Trimble). Representatives Tsuji, Morita, Brower, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 139 on H.B. No. 1221

The purpose of this bill is to provide financial assistance to Hawaii's livestock industry by establishing the Livestock Revitalization Program (Program).

Your Committee on Conference has amended this measure by:

- (1) Amending the definition of "qualified producer" by clarifying that it applies to a person that, at the time of application for and disbursement of funds under the Program, is in the business of producing:
 - (A) Pork from a herd located in Hawaii of no less than 50 sows; and
 - (B) Beef that is grown, slaughtered, processed, and marketed in Hawaii, with producers finishing at least 100 head of beef cattle annually;
- (2) Deleting the provisions allowing a qualified producer to receive reimbursement for up to 50 percent of each farm's feed expenses and requiring the Department of Agriculture (DOA) to establish a formula to calculate reimbursement amounts;
- (3) Specifying that the subsidy shall not be allowed if the flock or herd size falls five percent or more below the required minimums;
- (4) Establishing a maximum grant of \$250,000 per qualified producer per year;
- (5) Requiring applicants to submit certified quarterly and annual financial statements;
- (6) Establishing that funds shall be disbursed upon approval by DOA for up to:
 - (A) Sixty percent of the feed costs incurred for the production of poultry products;
 - (B) Forty percent of the feed costs incurred for milk production;
 - (C) Fifty percent of the feed costs incurred for pigs raised in Hawaii and slaughtered for local consumption; and
 - (D) Fifty percent of the feed costs for beef cattle raised in Hawaii and slaughtered in Hawaii for local consumption;
- (7) Specifying that feed costs shall not include cost of transportation to Hawaii;
- (8) Prohibiting reimbursements to qualified producers if the reimbursement will result in an annual profit of more than:
 - (A) Twelve percent for milk producers;
 - (B) Eight percent for poultry producers;
 - (C) Eight percent for pork producers; and
 - (D) Eight percent for beef producers;
- (9) Inserting an appropriation amount of \$3,000,000 for fiscal year 2007-2008 and the same amount for fiscal year 2008-2009 for the Program;
- (10) Specifying a lapse date of December 31, 2010, for unencumbered balances of the appropriation; and
- (11) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1221, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1221, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Tokuda, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Tsuji, Brower, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 140 on H.B. No. 1211

The purpose of this bill is to increase fees for court-appointed counsel and guardians ad litem who represent the best interests of children and other persons in Family Court civil cases. Specifically, this bill:

- (1) Increases fees for legal services to \$90 per hour;
- (2) Sets fees for non-legal services at \$60 per hour;
- (3) Raises the maximum allowable fees for designated Family Court proceedings; and
- (4) Appropriates funds for the payment of reasonable compensation.

Your Committee on Conference has amended this measure by:

- (1) Deleting the requirement for the Judiciary to submit its budget request to the Department of Budget and Finance (B&F) for the payment of reasonable compensation;
- (2) Changing the expending agency from B&F to the Judiciary;
- (3) Changing the appropriation amount from an unspecified sum to \$880,000 for fiscal year 2007-2008; and
- (4) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1211, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1211, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun and Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Waters, Tokioka and Marumoto, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 141 on H.B. No. 855

The purpose of this bill is to provide injured employees with necessary medical services in the event workers' compensation coverage is disputed, by requiring these services to be continued until the Director of Labor and Industrial Relations (Director) issues a decision on the matter.

Your Committee on Conference has amended this measure by:

- (1) Clarifying that an injured employee shall continue to receive essential medical services prescribed by the treating physician necessary to prevent deterioration of the injured employee's condition or further injury until the Director determines that medical services pursuant to the treatment plan shall be discontinued;
- (2) Clarifying that the Director shall make a decision within 30 days of the filing of a dispute and notify the employer, the employee, and the provider of the decision;
- (3) Clarifying that an employer or employer's insurer may recover from the injured employee's personal health care provider or other appropriate occupation or non-occupational insurer all the sums paid for medical services rendered after the employer, the employee, and the provider receives notification of the Director's decision;
- (4) Inserting language that requires the Director to submit any proposed adoption, amendment, or repeal of administrative rules under Hawaii's workers compensation law to both houses of the Legislature prior to their submission to the Governor for approval;
- (5) Inserting language that the submitted rules are disapproved unless the Legislature approves the submitted rules, in their entirety, through adoption of a concurrent resolution within 365 days of their submission to the Legislature; and
- (6) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 855, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 855, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Kokubun, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Kokubun). Representatives Sonson, Nakasone, Pine, Managers on the part of the House. Ayes, 3. Ayes with Reservations, 1 (Pine). Noes, none. Excused, none.

Conf. Com. Rep. 142 on H.B. No. 833

The purpose of this bill is to assist individuals who provide attendant care and day care services authorized by the Department of Human Services (DHS) by:

- (1) Creating certain exemptions under Hawaii's Employment Security Law, Workers' Compensation Law; Temporary Disability Insurance Law; and Prepaid Health Care Law; and
- (2) Requiring the Department of Labor and Industrial Relations (DLIR) to submit a report to the Legislature on the financial impact and consequences of the exclusions from employment related laws for service providers who provide Medicaid waiver service for persons with developmental disabilities and mental retardation.

Currently, numerous individuals provide a valuable service to the State of Hawaii by serving as domestic caregivers, many of them through contracts with DHS. Recently, questions have arisen as to whether these caregivers, especially those attached to a provider agency, are independent contractors or employees. When these individuals have been ruled as employees, they have been subjected to Hawaii's employment laws resulting in skyrocketing operational costs, a situation that could threaten the existence of these caregivers and seriously affect Hawaii's health and human services system.

Your Committee on Conference finds that the exemptions provided in this measure benefit the State of Hawaii by ensuring that valuable and necessary Medicaid waiver services will continue to be provided to disabled and elderly adults in Hawaii without disruption. This is evident because the exemptions, as clarified, are consistent with existing law and reflect the practices of Medicaid waiver service providers who have provided these services for many years under the prior determinations of law by the Director of Labor and Industrial Relations.

While your Committee on Conference did contemplate amending this measure to include its retroactive application, this is unnecessary since the existing exemptions under sections 386-1, 392-5, and 393-5, Hawaii Revised Statutes, already exclude individuals in the employ of the "recipient of social service payments" as the term is defined in this measure. Further, the Director of DLIR has previously testified that the decision in *In Re Manawa Lea* was limited to and only applied to *Manawa Lea*. Therefore, the decision does not create a precedent and it need not be addressed by this measure.

However, specific concerns were raised by both the Attorney General and Director of DLIR regarding the broad scope of the exemptions, determinations as to whether an individual is an employee or independent contractor, and compliance with the Federal Unemployment Tax Act (FUTA).

Your Committee on Conference has amended this measure by:

- (1) Allowing the terms identifying specific waiver services to be amended by DHS;
- (2) Narrowing the scope of the exemptions to specifically identify waiver services exempted from Hawaii's Employment Security Law, Workers' Compensation Law; Temporary Disability Insurance Law; and Prepaid Health Care Law;
- (3) Stipulating that the exempted individual voluntarily agree in writing to be considered an independent contractor prior to the application of the exemption;

- (4) Limiting the application of the exemption from Hawaii's Employment Security Law to individuals not covered by FUTA; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 833, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 833, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Hee, Hemmings, Sakamoto, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Sonson, Shimabukuro, Nakasone, Magaoay, Manahan, Pine, Managers on the part of the House. Ayes, 5. Noes, none. Excused, 1 (Shimabukuro).

Conf. Com. Rep. 143 on H.B. No. 1292

The purpose of this bill is to enable the Employees' Retirement System (ERS) to maintain its status as a tax-qualified retirement plan by complying with the Internal Revenue Code. Among other things, this bill:

- (1) Prohibits elective officers and judges from terminating their ERS membership upon reaching the statutory cap on retirement benefits even though they remain in office and delay receipt of the benefits until a future separation date;
- (2) Prohibits elective officers from joining the ERS at any time during their term of office; and
- (3) Requires elective officers to exercise a one-time, irrevocable option to join the ERS when they are elected.

Your Committee on Conference finds that this is an important measure that protects the ERS' tax-qualified status, ensuring the favorable tax treatment of employee contributions made on a pre-tax basis.

Your Committee on Conference has amended this measure by:

- (1) Allowing a member who has served in the Legislature for at least five years and who attains the age of 65 to retire and receive a service retirement allowance; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1292, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1292, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Kokubun). Representatives Sonson, Nakasone, Souki, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 144 on H.B. No. 1567

The purpose of this bill is to fund salary increases and other cost adjustments, including Hawaii Employer-Union Health Benefits Trust Fund costs, authorized by Chapter 89C, Hawaii Revised Statutes (HRS), for state officers and employees of agencies excluded from collective bargaining, including the State Ethics Commission, Office of the Auditor, Office of the Legislative Reference Bureau, and Office of the Ombudsman.

Your Committee on Conference has amended this measure by:

- (1) Inserting specific appropriation amounts to fund salary increases and other cost adjustments authorized by Chapter 89C, HRS, for state officers and employees of agencies excluded from collective bargaining, including the State Ethics Commission, Office of the Auditor, Office of the Legislative Reference Bureau, and Office of the Ombudsman;
- (2) Deleting language appropriating monies to fund the Hawaii Employer-Union Health Benefits Trust Fund costs authorized by Chapter 89C, HRS; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1567, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1567, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Kokubun). Representatives Sonson, M. Oshiro, Ward, Managers on the part of the House. Ayes, 2. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 145 on H.B. No. 751

The purpose of this bill is to support workforce and economic development by:

- (1) Extending the time period in which the Department of Labor and Industrial Relations (DLIR) may expend Reed Act monies appropriated under Act 190, Session Laws of Hawaii 2006 (Act 190);
- (2) Removing restrictions placed on funds used by the Workforce Development Council that conflict with federal restrictions; and
- (3) Providing DLIR with a specific sum of money for administrative purposes.

Act 190 provided \$10,000,000 in Reed Act funds to four county workforce investment boards for workforce and economic development purposes. However, the one-year time frame to expend these funds has proven to be inadequate due to the complexity of the issue and the procedural requirements involved in using federal funds.

While your Committee on Conference finds that \$127,245 is adequate for DLIR to administer Reed Act funds, it is your Committee on Conference's understanding that the workforce investment boards and Workforce Development Council are willing to assist DLIR with administrative expenses should the appropriation prove inadequate.

Accordingly, Your Committee on Conference has amended this measure by:

- (1) Specifying that the funds appropriated to DLIR are for administrative expenses including but not limited to the cost of providing oversight, monitoring, and reporting;
- (2) Allowing the county workforce investment boards and Workforce Development Council to use a portion of the sums allocated to them to further compensate DLIR for administrative expenses not covered by funds appropriated to DLIR; and
- (3) Requiring DLIR, the Workforce Development Council, and the county workforce investment boards to negotiate the additional compensation in paragraph (2).

Technical nonsubstantive amendments were also made for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 751, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 751, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Gabbard). Representatives Sonson, Nakasone, Pine, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 146 on H.B. No. 1572

The purpose of this bill is to fund all collective bargaining cost items negotiated for state employees in collective bargaining unit (1), including salary increases and other cost adjustments, Hawaii Employer-Union Health Benefits Trust Fund contributions, as well as salary increases and other cost adjustments for their excluded counterparts.

On April 23, 2007, pursuant to section 89-11(g), Hawaii Revised Statutes, the Governor transmitted proposed legislation to the Legislature containing all items requiring moneys for implementation which are subject to appropriation.

Your Committee on Conference has amended this measure by:

- (1) Inserting specific appropriation amounts to fund cost items negotiated with collective bargaining unit (1) of the Executive Branch, Judicial Branch, and Hawaii Health Systems Corporation and their excluded counterparts for fiscal biennium 2007-2009; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1572, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1572, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Sonson, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 147 on H.B. No. 1569

The purpose of this bill is to fund all collective bargaining cost items negotiated for state employees in collective bargaining unit (10), including salary increases and other cost adjustments, Hawaii Employer-Union Health Benefits Trust Fund contributions, as well as salary increases and other cost adjustments for their excluded counterparts.

On April 20, 2007, pursuant to section 89-11(g), Hawaii Revised Statutes, the Governor transmitted proposed legislation to the Legislature containing all items requiring moneys for implementation, which are subject to appropriation.

Your Committee on Conference has amended this measure by:

- (1) Inserting specific appropriation amounts to fund cost items negotiated with collective bargaining unit (10) of the Executive Branch, Judicial Branch, and Hawaii Health Systems Corporation and their excluded counterparts for fiscal biennium 2007-2009; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1569, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1569, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Sonson, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 148 on H.B. No. 1568

The purpose of this bill is to fund all collective bargaining cost items negotiated for state employees in collective bargaining unit (5), including salary increases and other cost adjustments, Hawaii Employer-Union Health Benefits Trust Fund (EUTF) contributions, as well as salary increases and other cost adjustments for their excluded counterparts.

On April 19, 2007, pursuant to section 89-11(g), Hawaii Revised Statutes, the Governor transmitted proposed legislation to the Legislature containing all items requiring moneys for implementation, which are subject to appropriation.

Your Committee on Conference has amended this bill by:

- (1) Inserting specific appropriation amounts to fund cost items negotiated with collective bargaining unit (5) of the Executive Branch and their excluded counterparts for fiscal biennium 2007-2009;
- (2) Inserting specific amounts to cover the Voluntary Employee Benefit Association contribution amounts instead of EUTF; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1568, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1568, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Kokubun, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Sonson, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 149 on H.B. No. 1345

The purpose of this bill is to appropriate emergency funding for emergency relief operations statewide as a result of the October 15, 2006, Kiholo Bay earthquake disaster.

Pursuant to the requirements set forth in Article VII, Section 9, of the Hawaii State Constitution, the Governor, in Governor's Message No. 233 to the Legislature, requested immediate consideration and passage of this bill by the Legislature citing an existing critical funding shortage.

This bill appropriates general funds for fiscal year 2006-2007 to cover:

- (1) Operational expenses associated with earthquake disaster recovery efforts, including but not limited to National Guard personnel on state active duty and helicopter operating expenses; and
- (2) The 25 percent non-federal cost share for earthquake disaster recovery projects eligible under the Federal Emergency Management Agency's public assistance program,

and requires expending agencies or departments to submit expenditure data reports.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of the appropriation for operational expenses associated with earthquake disaster recovery efforts from \$18,189,896 to \$900,000 for fiscal year 2006-2007;
- (2) Changing the general fund appropriation of \$5,810,104 for the non-federal cost share for earthquake disaster recovery projects to the emergency and budget reserve fund appropriation of \$24,000,000 for fiscal year 2006-2007;
- (3) Clarifying specific earthquake disaster recovery projects for which the \$24,000,000 appropriation is to be allocated;
- (4) Requiring expending agencies or departments to submit annual expenditure reports; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1345, H.D. 2, S.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1345, H.D. 2, S.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Baker, Tsutsui, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Evans, Har, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 150 on H.B. No. 831

The purpose of this bill is to respect and provide for the wishes of Filipino veterans to have their body returned to the Philippines for burial upon their death by paying directly to a mortuary or crematory the cost of:

- (1) Providing funeral and burial services at the request of a qualifying deceased World War II Filipino veteran's survivor or an interested party; and
- (2) Transporting the veteran's remains to the Philippines,

upon the submission of a contract for services on behalf of the deceased veteran and an itemized unpaid invoice.

Your Committee on Conference has amended this bill by:

- (1) Specifying a limit of \$2,000 per person on the amount paid for funeral and burial services and transportation costs;
- (2) Inserting an appropriation of \$20,000 for fiscal year 2007-2008;
- (3) Making this bill effective upon its approval and changing the effective date of the appropriation to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for clarity, style, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 831, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 831, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Inouye, Tsutsui, Hooser, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Evans, Har, Manahan, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 151 (Majority) on H.B. No. 24

The purpose of this bill is to provide greater incentives for teachers certified by the National Board for Professional Teaching Standards to work in certain positions, such as at a school that is in restructuring under the No Child Left Behind Act, at a school with a high turnover rate, or in a hard-to-fill position, by giving these teachers an additional bonus per year.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of the bonus to \$5,000 each year;
- (2) Removing the provision that the additional bonus will be provided to not more than 50 teachers per year, based upon performance criteria established by the Superintendent of Education;
- (3) Changing the amount of the appropriation to \$500,000;
- (4) Changing the effective date to July 1, 2007; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 24, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 24, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Tsutsui, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, Sonson, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 3. Ayes with Reservations, 1 (Finnegan). Noes, 1 (Takumi). Excused, none.

Conf. Com. Rep. 152 on H.B. No. 1757

The purpose of this measure is to:

- (1) Increase fines for certain violations of vehicle length and gross weight requirements;
- (2) Repeal fines for second, third, and subsequent violations;
- (3) Require, rather than permit the Department of Transportation to establish a process for vehicle weight violators to mail in uncontested fine payments; and
- (4) Exempt the sale of liquid and alcohol fuels from the general excise tax.

Your Committee on Conference finds that the current system in place for disposing of violations of commercial vehicle length and weight restrictions is burdensome on violators, commercial trucking and delivery companies, law enforcement personnel, and the courts.

Your Committee on Conference further finds that permitting operators to mail in uncontested fines saves time and money for everyone involved in the process. In addition, while the bill eliminates progressive fines and penalties for repeat violators, it doubles the fines and penalties for violation of commercial vehicle length and weight restrictions. Your Committee on Conference finds that these increased fines are sufficient to deter potential violators and to punish those who commit these violations.

Your Committee on Conference also finds that re-enacting the general excise tax exemption for alcohol fuel will help reduce the cost of gasoline for Hawaii's consumers.

Your Committee on Conference has amended this measure by:

- (1) Removing the exemption of the sale of liquid fuel from the general excise tax and adding language that requires that tax savings from the exemption of alcohol fuels shall be passed on to the consumer; and
- (2) Changing the effective date to July 1, 2007, to allow the Department of Taxation to prepare the necessary tax forms, and repealing the exemption for alcohol fuel on June 30, 2009.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1757, H.D. 1, S.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1757, H.D. 1, S.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Hee, Baker, Fukunaga, Menor, Gabbard, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, none. Representatives Souki, B. Oshiro, Lee, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 153 on H.B. No. 1171

The purpose of this bill is to enable the governmental needs of the public to be met in a more timely and efficient manner by exempting positions or contracts for personal services with private persons or entities lasting up to one year from civil service laws.

Personal services positions and contracts enable the counties to fulfill necessary duties and services to the public. Your Committee on Conference finds that making the permanent exemption of certain personal services positions and contracts with private persons or entities from civil service laws would enable the counties to meet the needs of the public in a timely and cost efficient manner.

Your Committee on Conference has amended this measure by:

- (1) Specifying that exempted positions or contracts for personal services with private persons or entities must involve services that cost no more than \$750,000;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1171, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1171, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Hee, Baker, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Sonson, M. Oshiro, Nakasone, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 154 on H.B. No. 19

The purpose of this bill is to implement a new method of financing, in part, new or expanding existing Department of Education (DOE) educational facilities by establishing school impact fees.

Your Committee on Conference finds that Act 246, Session Laws of Hawaii 2005, established the School Impact Fee Working Group (Working Group) that was tasked with, among other things, submitting proposed legislation on its recommendations for determining school impact fees within identified school impact districts. In December 2006, the Working Group transmitted its report to the Legislature, which contained recommendations for two different approaches. The parties that participated in the Working Group have continued to work toward further refining the policies, procedures, formulas, and calculations for requiring school impact fees as a result of new residential developments.

Your Committee on Conference further finds that refining this process includes:

- (1) Enlisting the aid of the counties to assist in the implementation of school impact fees;
- (2) Developing implementation and interim procedures to allow for a transition to impact fees;
- (3) Recognizing the need for the Legislature to revisit this issue to assess where statutory guidance maybe necessary in the future; and
- (4) Allowing the Board of Education and DOE the opportunity to explore alternative financing methods, such as increasing the conveyance tax on certain transactions and creating a dedicated source of funding in the conveyance tax for school facility needs, which would include renovation of existing school facilities.

These have been addressed through the concerted efforts of the interested parties and should be included in this measure to ensure that the most appropriate and effective methods for calculating school impact fees, as well as the manner by which these methods should be implemented, are fully realized.

Accordingly, this measure represents agreement among all of the parties on some of the fundamental elements needed to calculate school impact fees; however, your Committee on Conference, as well as the parties, also recognize that there is still much work to do to perfect the methodology.

Upon further review, your Committee on Conference has amended this measure by, among other things;

- (1) Clarifying in the purpose section that DOE is responsible for determining each school impact district's appropriate student generation rate;
- (2) Including language to clarify the purpose, including the establishment of a general methodology and approach for identifying need areas and calculating appropriate school impact fees for new residential developments;
- (3) Clarifying the findings regarding new residential developments, as opposed to subdivisions, being required to contribute toward the construction of new or the expansion of existing public school facilities through a land requirement or the construction requirement;
- (4) Clarifying that a developer shall provide its proportionate share of the land or the construction cost of new or expanded school facilities;
- (5) Including definitions for the terms "acres/student"; "construction cost"; "cost per student"; "cost/unit"; "land component"; "multi-family unit count"; "new residential development"; "proportionate share"; "recent school construction averages"; "revenue credit"; "school impact fee: land component"; "school impact fee: construction cost component"; "single-family unit count"; and "student generation rate"; and deleting definitions for the terms "greenfield school impact district" and "plat";
- (6) Rewording the provisions relating to the applicability of and exemptions relating to school impact fees by, among other things, including transient accommodation projects in the exemption;
- (7) Requiring DOE to include in its written analysis, prior to the designation of a school impact district, an analysis to support the need to construct new or expanded existing school facilities in the area within 25 years to accommodate projected growth, and removing certain other requirements for the written analysis, including those relating to greenfield school impact districts;
- (8) Requiring DOE to prepare an impact fee analysis with specific requirements;
- (9) Establishing a procedure for determining the area requirements for new school facilities, whether land dedication or a fee in lieu is required, the value per acre, and the dollar amount of the fee in lieu;
- (10) Establishing a formula for the construction cost component of school impact fees;
- (11) Specifying that the calculation of revenue credits shall be reviewed and calculated recognizing that the impact fee shall be set at 100 percent of the fair market value of the land and ten percent of the total school construction cost;
- (12) Establishing provisions regarding refunds of fees in lieu or impact fees that are not expended within 25 years from the date of collection;

- (13) Clarifying provisions relating to credits for contributions, payments, or construction;
- (14) Specifying that private construction of school facilities is considered a "public work" under Chapter 104, Hawaii Revised Statutes (HRS);
- (15) Establishing a new section in Chapter 46, HRS, relating to county powers regarding school impact fees;
- (16) Including provisions for the implementation and interim procedures relating to school impact fees;
- (17) Requiring DOE to report annually on its implementation of the provisions of this bill; and
- (18) Changing the effective date to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 19, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 19, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, Ito, M. Oshiro, Chong, Finnegan, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 155 on H.B. No. 1003

The purpose of this measure is to facilitate the growth of the alternative fuel industry in the State and develop renewable energy resources to reduce its dependence on imported sources of energy.

Specifically, this measure:

- (1) Statutorily establishes the Hawaii Natural Energy Institute of the University of Hawaii at Manoa to:
 - (A) Research and develop renewable energy in coordination with government and private agencies;
 - (B) Demonstrate efficient energy end-use technologies;
 - (C) Increase funding for research and development; and
 - (D) Submit annual reports to the Legislature; and
- (2) Creates the energy systems development special fund for developing an integrated approach and portfolio management for renewable energy and end-use energy-efficient technologies;
- (3) Establishes the Hawaii biofuels program to manage the State's transition to energy self-sufficiency;
- (4) Establishes the biofuels development revolving loan fund to assist public and private projects to research, establish, and implement the Hawaii biofuels program;
- (5) Requires the Department of Business, Economic Development, and Tourism to develop a bioenergy master plan in consultation with representatives of the relevant stakeholders and submit an interim and final report to the 2008 and 2009 Regular Sessions of the Legislature, respectively; and
- (6) Makes appropriations for the purposes of this measure.

Your Committee has amended this bill by:

- (1) Removing the environmental response fund as a source of funding for the energy systems development special fund;
- (2) Requiring the Hawaii natural energy institute to cooperate with and provide support for the evaluation panel in preparing its evaluation and reports to the Legislature concerning projects and activities funded by the energy systems development special fund;
- (3) Deleting section 4 which appropriates funds from the general revenues to the energy systems development special fund;
- (4) Deleting section 5 which appropriates funds out of the energy systems development special fund;
- (5) Removing the provisions creating the Hawaii biofuels program within the Department of Business, Economic Development, and Tourism;
- (6) Removing the provisions establishing the biofuels development revolving loan fund and appropriating moneys to and from the fund;
- (7) Specifies that the bioenergy master plan shall address:
 - (A) Strategic partnerships relating to biomass corps;
 - (B) Evaluation of the State's potential to rely on biofuels as a significant renewable energy resource;
 - (C) Biofuels demonstration projects;
 - (D) Promoting the State's renewable biofuels resources to potential partners and investors for development and export; and
 - (E) A plan or roadmap to implement commercially viable biofuels development.
- (8) Changing the appropriation for the development of a bioenergy master plan to \$300,000 for fiscal year 2007-2008;
- (9) Redesignation of section and part numbers consecutively; and
- (10) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1003, H.D. 3, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1003, H.D. 3, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Sakamoto, Baker, Fukunaga, Trimble, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Trimble). Representatives Morita, Chang, Carroll, Thielen, Managers on the part of the House. Ayes, 3. Ayes with Reservations, 1 (Thielen). Noes, none. Excused, none.

Conf. Com. Rep. 156 on H.B. No. 1359

The purpose of this bill is to improve access to prescription drugs by:

- (1) Creating a Hawaii State Pharmacy Assistance Program by merging the current State Pharmacy Assistance Program which coordinates the Medicare Part D prescription drug benefit and the Hawaii Rx Plus Program under a single comprehensive Hawaii State Pharmacy Assistance Program umbrella; and
- (2) Requiring the Department of Human Services to take all steps necessary to enable participation in joint prescription drug purchasing agreements with any other health benefits plan or organization within or outside of this state that agrees to participate in a joint purchasing agreement.

Your Committee on Conference has amended this bill by:

- (1) Inserting an appropriation amount of \$50,000;
- (2) Changing the effective date to July 1, 2008; and
- (3) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1359, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1359, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Taniguchi, Baker, Chun Oakland, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Green, Shimabukuro, Herkes, Mizuno, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 157 on H.B. No. 55

The purpose of this bill is to protect our youth by establishing a Youth Suicide Early Intervention and Prevention Program for Hawaii.

Your Committee on Conference has amended this bill by:

- (1) Authorizing, rather than mandating, the Department of Health to:
 - (A) Establish and operate a statewide Youth Suicide Early Intervention and Prevention Program;
 - (B) Provide appropriate research, training, and technical assistance;
 - (C) Provide research, training, and technical assistance resources; and
 - (D) Develop and submit proposals for funding from federal agencies and private organizations to support the establishment of a Youth Suicide Early Intervention and Prevention Program;
- (2) Changing the effective date to July 1, 2007; and
- (3) Changing the date on which this Act will be repealed to June 30, 2009.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 55, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 55, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Ige, Baker, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Shimabukuro, Lee, Mizuno, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 158 on H.B. No. 807

The purpose of this bill is to formally establish an Office of the Long-Term Care Ombudsman within the Executive Office on Aging and to appropriate funds to establish three additional ombudsman program specialist IV positions and a clerk typist II position, to support a regional Long-Term Care Ombudsman Program on the neighbor islands.

Your Committee on Conference has amended this bill by:

- (1) Deleting provisions establishing three additional ombudsman program specialist IV positions and a clerk typist II position, to support a regional Long-Term Care Ombudsman Program on the neighbor islands;
- (2) Removing the appropriation section which would have funded the establishment of a regional Long-Term Care Ombudsman Program on the neighbor islands; and
- (3) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 807, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 807, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Sakamoto, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Green, Shimabukuro, Mizuno, Rhoads, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 159 on H.B. No. 843

The purpose of this bill is to authorize the Hawaii Health Systems Corporation (Corporation) to bring Kahuku Hospital under its governance through formal affiliation with the Corporation and to provide for transitional facilitation by the Director of Health.

Your Committee on Conference has amended this bill by:

- (1) Clarifying that the physical assets and the ground lease of Kahuku Hospital will become the property of the Corporation;
- (2) Changing the appropriated amount to \$3,900,000;
- (3) Providing for this bill to take effect upon its approval;
- (4) Changing the effective date for the appropriation section to July 1, 2007; and
- (5) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 843, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 843, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, M. Oshiro, Magaoay, Mizuno, Meyer, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 160 on H.B. No. 1477

The purpose of this bill is to increase access to primary health care services provided by family physicians or residents in the family medicine residency program at the University of Hawaii to medically underserved residents in rural areas of the State by appropriating funds to:

- (1) Support and expand the family medicine residency program of the University of Hawaii John A. Burns School of Medicine's Department of Family Medicine and Community Health to provide rural primary health care services; and
- (2) Develop a permanent statewide rural primary health care training program in the County of Hawaii to expand the rural health care training available for individuals in the family medicine residency program of the University of Hawaii John A. Burns School of Medicine.

Your Committee on Conference has amended this bill by:

- (1) Inserting the following appropriations:
 - (A) \$1,500,000 for fiscal year 2007-2008 to support and expand the family medicine residency program of the University of Hawaii John A. Burns School of Medicine's Department of Family Medicine and Community Health to provide rural primary health care services; and
 - (B) \$2,500,000 for fiscal year 2008-2009 to develop a statewide Rural Primary Health Care Training Program to provide family physicians to rural areas and improve health care access for the people of Hawaii;
- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1477, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1477, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Sakamoto, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Green, Chang, Mizuno, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 161 on H.B. No. 367

The purpose of this bill is to establish and fund a pilot program for screening, brief intervention, and referral to substance abuse treatment in the state.

Your Committee on Conference has amended this bill by inserting an appropriation amount of \$84,000 for fiscal year 2007-2008.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 367, H.D. 1, S.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 367, H.D. 1, S.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Sakamoto, Taniguchi, Baker, Slom, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Slom). Representatives Green, Chang, Mizuno, Awana, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 162 on H.B. No. 1368

The purpose of this bill is to:

- (1) Change the name of the Hospital and Medical Facilities Special Fund to the Office of Health Care Assurance (OHCA) Special Fund (Fund);
- (2) Increase the amount of the Fund that can be used for OHCA activities; and
- (3) Make other improvements to the Fund.

Your Committee on Conference has amended this bill by making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1368, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1368, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, M. Oshiro, Mizuno, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Ching).

Conf. Com. Rep. 163 on H.B. No. 1220

The purpose of this bill is to promote the high standard of quality of agricultural products produced in Hawaii by establishing the Seal of Quality Special Fund (Special Fund).

Your Committee on Conference has amended this measure by:

- (1) Appropriating \$10,000 out of the Special Fund for the Seal of Quality Program;
- (2) Providing that paragraph (1) takes effect on July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1220, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1220, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Tsuji, Yamashita, Brower, Wakai, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Wakai).

Conf. Com. Rep. 164 on H.B. No. 400

The purpose of this bill is to provide a stable and reliable source of water for Hawaii's farmers by:

- (1) Appropriating an unspecified amount of funds for drought mitigation projects and measures in each county; and
- (2) Authorizing the issuance of an unspecified amount of general obligation bonds (GO bonds) to improve certain irrigation systems throughout the state.

Your Committee on Conference has amended this measure by:

- (1) Inserting an appropriation amount of \$4,000,000 for fiscal year 2007-2008 for the drought mitigation measures;
- (2) Deleting the provisions authorizing the issuance of GO bonds to improve certain irrigation systems throughout the state;
- (3) Changing its effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 400, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 400, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Tsuji, Brower, Meyer, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 165 on H.B. No. 399

The purpose of this bill is to help protect vital soil and water resources by appropriating an unspecified amount of funds to the Hawaii Association of Conservation Districts for the operation of the Soil and Water Conservation Districts (Districts).

Your Committee on Conference has amended this measure by:

- (1) Inserting an appropriation amount of \$500,000 for fiscal year 2007-2008 for the operation of the Districts; and
- (2) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 399, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 399, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Tsutsui, Tokuda, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Tsuji, Ito, Brower, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 166 on H.B. No. 1435

The purpose of this bill is to support the Honolulu Symphony's fundraising efforts in providing for private funds to match state general funds previously appropriated for the State of Hawaii Endowment Fund (Endowment Fund) under Act 97, Session Laws of Hawaii 2006 (SLH 2006), by:

- (1) Specifying a list of the types of private funds that may be used to match the general funds; and
- (2) Extending the lapse date of unexpended and unencumbered funds appropriated under Act 97, SLH 2006, for the Endowment Fund to June 30, 2009.

Your Committee on Conference has amended this measure by:

- (1) Removing the list specifying the types of private funds that may be used to match the general funds;
- (2) Allowing pledges to be used to match the general funds as provided by the law establishing the Endowment Fund; and
- (3) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1435, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1435, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, none. Representatives Yamane, Manahan, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 167 on H.B. No. 575

The purpose of this bill is to help protect Hawaii's visitors and residents by:

- (1) Requiring the Board of Directors (Board) of the Hawaii Tourism Authority (HTA) to request the Governor to declare that a tourism emergency exists if the Board of HTA determines that an adverse effect on Hawaii's tourism industry resulting from world conflict, terrorist threat, natural disaster, disease outbreak, or other catastrophic event may result in a substantial interruption of commerce in Hawaii and adversely affect the welfare of its people;
- (2) Upon the Governor's declaration that a tourism emergency exists, requiring HTA to develop and implement measures to respond to the tourism emergency;
- (3) Establishing a Tourism Emergency Trust Fund (Trust Fund) to provide for the development and implementation of emergency measures to respond to the tourism emergency; and
- (4) Specifying that, except for certain funds, funds in the Tourism Special Fund must be deposited into the Trust Fund in a manner sufficient to maintain a balance of \$5,000,000 in the Trust Fund.

Your Committee on Conference has amended this measure by:

- (1) Clarifying under the list of powers for HTA that HTA may develop and implement measures to respond to any adverse effects on the tourism industry;
- (2) Changing its effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 575, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 575, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Inouye, Tsutsui, Kim, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Tsutsui, Trimble). Representatives Yamane, Evans, Manahan, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 168 on H.B. No. 1866

The purpose of this bill is to protect the health and safety of those participating in mixed martial arts contests by:

- (1) Providing the Director of Commerce and Consumer Affairs (Director of DCCA) comprehensive authority to regulate mixed martial arts contests;
- (2) Appropriating an unspecified amount of funds for the operational and administrative expenses of regulating mixed martial arts contests; and
- (3) Prohibiting no rules combat, extreme or ultimate fighting, and other similar contests.

Your Committee on Conference has amended this bill by:

- (1) Removing references to "ultimate fighting" to avoid infringing on the intellectual property rights of a private corporation;
- (2) Deleting the provision prohibiting the granting of licenses to contestants or promoters unless they have authorized the Hawaii Criminal Data Justice Center to release a criminal history record check to the Director of DCCA;
- (3) Prohibiting the granting of licenses to promoters unless the promoter has submitted a criminal abstract on the promoter to the Director of DCCA;

- (4) Changing the funding source for the appropriation from general funds to the Compliance Resolution Fund (CRF), and appropriating \$130,000 for fiscal year 2007-2008 and \$205,000 for fiscal year 2008-2009 out of the CRF for the operational and administrative expenses of regulating mixed martial arts contests; and
- (5) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1866, H.D. 3, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1866, H.D. 3, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Taniguchi, Baker, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Yamane, Herkes, Manahan, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 169 on H.B. No. 1719

The purpose of this bill is to exempt the following from the general excise tax:

- (1) Amounts received by a submanager of an association of apartment owners or of certain nonprofit homeowners or community associations in reimbursement of sums paid for common expenses;
- (2) Amounts received by an operator of a hotel from the owner of the hotel or from a timeshare association for employee wage and benefit costs disbursed by the operator; and
- (3) Amounts received by a suboperator of a hotel from the owner of the hotel, timeshare association, or operator of the hotel, for employee wage and benefit costs disbursed by the suboperator.

Your Committee on Conference has amended this measure by:

- (1) Changing its effective date to January 1, 2008; and
- (2) Repealing the provisions of this measure on December 31, 2009.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1719, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1719, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Nishihara, Baker, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamane, M. Oshiro, Manahan, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 170 on H.B. No. 1352

The purpose of this bill is to establish the Fiftieth Anniversary of Statehood Commission to plan and coordinate various activities to commemorate the 50th anniversary of Hawaii's admission to statehood.

Your Committee on Conference has amended this measure by:

- (1) Deleting the condition that the members selected by the President of the Senate, the Speaker of the House of Representatives, and the Governor represent certain specified sectors of the community;
- (2) Changing the funding source for the appropriation from general funds to the Tourism Special Fund (TSF) and appropriating \$100,000 out of the TSF to be expended by the Hawaii Tourism Authority for the purposes of this bill; and
- (3) Making technical, nonsubstantive amendments for style, clarity, and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1352, H.D. 1, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1352, H.D. 1, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Tsutsui, Kim, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Yamane, Manahan, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 171 on S.B. No. 1718

The purpose of this measure is to support the development of renewable and efficient energy systems in the State by authorizing the issuance of special purpose revenue bonds to assist BlueEarth Maui Biofuels, LLC, with the construction of a biodiesel refinery on Maui for the purpose of producing fuel for electrical generation.

Your Committee on Conference finds that this measure will help meet Hawaii's goals for energy efficiency and renewable energy use by reducing dependency on imported fossil fuels, providing biodiesel at competitive prices, and stimulating the local production of ethanol. This measure will also provide encourage to local agricultural research, development, and cultivation of renewable energy feedstock crops.

Your Committee on Conference amended this measure by:

- (1) Requiring, as a condition precedent to the issuance of special purpose revenue bonds, that BlueEarth Maui Biodiesel, LLC, or its affiliates give priority to utilizing Hawaii grown fuel stock when available and ensure that no import fuel stock is used that is the product of growth on farms where forest have been cleared to accommodate the growing of such crops;
- (2) Requiring that BlueEarth Maui, in order to receive bond financing, shall import fuel stock produced only from sustainable sources;

- (3) Requiring BlueEarth Maui Biodiesel, LLC, and its affiliates to document that sustainable sources are utilized and requiring the documentation to be transmitted and otherwise made available to the Department of Business, Economic Development, and Tourism;
- (4) Requiring the Department of Business, Economic Development, and Tourism to certify the documentation submitted and to notify the Department of Budget and Finance in writing as to whether BlueEarth Maui Biodiesel, LLC, and its affiliates will comply with the fuel stock and other requirements prior to the issuance of any special purpose revenue bonds;
- (5) Inserting the amount of special purpose revenue bonds authorized as \$59,000,000;
- (6) Making the bonds taxable under state and federal income tax laws; and
- (7) Changing the effective date from July 1, 2020, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1718, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1718, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Menor, Tsutsui, Hooser, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Morita, M. Oshiro, Chong, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Chong).

Conf. Com. Rep. 172 on S.B. No. 686

The purpose of this measure is to require the Department of Education to report to the Legislature on various aspects regarding the establishment of a career ladder program for educational assistants and provides necessary funding for the program.

Your Committee on Conference finds that a career ladder program for educational assistants was contemplated prior to the transfer of education positions and employees, including educational assistants, from the jurisdiction of the Department of Human Resources Development to the Department of Education pursuant to Act 253, Session Laws of Hawaii 2000. However, to date, the Department of Education has not established a career ladder program, which would provide a salary structure for educational assistants based on specific job requirements such as training, job performance, and years of experience. Your Committee on Conference believes in the merits of establishing a career ladder program for educational assistants; however, it is concerned with the lack of information currently being provided.

This measure requires the Department of Education to report to the Legislature on a career ladder program to be established for educational assistants, including relevant information on the employees affected, and the true costs of implementing a program. Your Committee on Conference believes that, in the future, the Legislature should consider appropriating an appropriate amount of funds to implement a career ladder program; however, prior to such funding, the Department of Education should present all necessary and relevant information to allow for the implementation of a program, which includes repricing class levels.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Requiring the Department of Education to report to the Legislature on a career ladder program for educational assistants that includes:
 - (A) Repricing class levels and a career ladder program, and other career ladder enhancements;
 - (B) The number of employees affected by repricing and a career ladder program; and
 - (C) The cost of implementing repricing and a career ladder program for educational assistants;
- (2) Deleting the appropriation provision; and
- (3) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 686, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 686, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Hooser, Nishihara, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, none. Representatives Takumi, Sonson, Lee, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 173 on S.B. No. 688

The purpose of this measure is to appropriate funds for the development and initiation of plans by the Hawaii P-20 Initiative Council for education in Hawaii for the coming century.

Your Committee on Conference finds that planning for education in the new century is a complicated mission that must take into account early childhood, primary, secondary, and post-secondary education, as well as career and workforce training. The establishment of a clear vision and a plan for achieving that vision is necessary for the success of the educational system in the State. The Hawaii P-20 Initiative is a consortium of public and private educators, governmental officials, including representatives from the University of Hawaii and the Department of Education, and community leaders who work together to improve academic achievement in the State. The Hawaii P-20 Initiative Council is the appropriate body to develop and initiate plans for education in Hawaii for the new century by ensuring that we produce responsible and productive citizens from an education system that contemplates a comprehensive vision that promotes lifelong learning from early childhood education to career and workforce preparation.

Accordingly, your Committee has amended this measure by:

- (1) Inserting an appropriation amount of \$50,000 for each year of the fiscal biennium 2007-2009 for the Hawaii P-20 Initiative to develop and initiate plans for education in Hawaii in the twenty-first century; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 688, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 688, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Chang, Takumi, Lee, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 174 on S.B. No. 1614

The purpose of this measure is to improve teacher recruitment and licensing by appropriating funds for the implementation of a new human resource management model for Waianae High School and its feeder elementary and middle schools.

Your Committee on Conference finds that a critical teacher shortage currently exists in Hawaii. As a result, the State must focus on efforts to grow and develop a teacher workforce, as well as recruit and retain qualified teachers in the public schools today. Recruitment and retention of highly qualified teachers is a significant problem at Waianae High School, where only slightly more than half of the teachers are fully licensed.

Your Committee on Conference further finds that Waianae High School currently serves approximately two thousand students with only one hundred fifty teachers. Many of the students in Waianae are living at or below the poverty level, and the academic achievement of most Waianae public schools demonstrates a lack of learning. Accordingly, your Committee on Conference recognizes the need for action in the Waianae public schools and believes that the utilization of a human resource management model could be beneficial to the school, its students, and the community at large.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Inserting an appropriation amount of \$500,000 for each year of the fiscal biennium 2007-2009 for a new human resource management model at Waianae High School; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1614, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1614, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Takumi, Lee, Hanohano, Shimabukuro, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 175 on S.B. No. 1820

The purpose of this measure is to allow the Department of Education to enter into financing agreements, with the concurrence of the Director of Finance, for which lease payments shall be paid through a separate account established within the State Educational Facilities Improvement Special Fund.

Your Committee on Conference finds that the children of Hawaii, their education, and future success are of great importance to the State. Currently, the need for the construction of new public schools is necessary to serve students in rapidly growing new communities, alleviate overcrowded schools, and replace schools in disrepair. With the many financial challenges facing various aspects of the state government, the Legislature must explore alternative methods for allowing the Department of Education to build the necessary new schools for public school students in the State. This measure will allow the Department of Education to partner with private developers through financing agreements to expedite the construction of new schools. However, your Committee on Conference further finds that clarification is necessary to maximize the ability of the Department of Education to enter into financing agreements for which funding has already been provided.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Specifying that any school:
 - (A) To which the Legislature has appropriated planning and design funds prior to the effective date of the Act; and
 - (B) For which a private developer is willing to enter into a lease purchase agreement with the Department of Education within a specified time,

shall be exempt from the requirement that expenditures from the Lease Payments for Schools Account be restricted to lease payments on new schools included within the Department of Education's current six-year capital improvements program and for which the Legislature has adopted a concurrent resolution or appropriated planning and design funds and specified that the remainder of costs are eligible for funding through a financing agreement;

- (2) Removing language that sought to change the limit on financing agreements entered into by the University of Hawaii from exceeding \$3,000,000; and
- (3) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1820, S.D. 1, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1820, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Nishihara, Tsutsui, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Tsutsui). Representatives Takumi, M. Oshiro, Nakasone, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 176 on S.B. No. 1931

The purpose of this measure is to increase and support workforce development in the State by establishing the Educational Workforce Working Group to examine workforce and workforce-related issues; requiring the Department of Education to include plans for workforce-related needs in its strategic plan; requiring the University of Hawaii to report to the Legislature on workforce development efforts; and appropriating funds for workforce development liaisons and support staff for the Department of Education.

Your Committee on Conference finds that current and future workforce needs in the State must be addressed through comprehensive, focused, and concerted efforts of the Department of Education and the University of Hawaii System. Although other entities currently exist to address workforce development issues, there is still a lack of understanding as to where the needs are, how they are being met, and what can be done to better meet the current and future workforce needs of the State. This measure establishes a working group to explore the aforementioned and other issues and to report to the Legislature so that focused efforts can be made in the future to address workforce needs. Your Committee on Conference determines that in order to cull relevant information from other existing entities involved in workforce development, the composition of the working group members should be reconsidered.

Additionally, this measure requires the Department of Education to address educational and workforce related needs in its strategic plan and requires the University of Hawaii provide relevant information on its efforts to address workforce development needs and its plans for improving those efforts in the future. The receipt of this information will assist the Legislature in addressing current and future workforce development needs of the State in an informed manner. This measure also appropriates funds for a workforce academy liaison in the Department of Education, who would be responsible for coordinating workforce development efforts with the academies to provide students with career exploration, awareness, and mentoring. Your Committee on Conference believes that a comprehensive approach should be taken to coordinate and expand workforce development efforts in the State to meet the current and future needs of both the public and private sectors. These efforts will require additional staff to address and facilitate workforce development that utilizes resources in and meets the needs of the public and private sectors.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Changing the composition of the panel to be as follow:
 - (A) Two representatives appointed by the president of the senate;
 - (B) Two representatives appointed by the speaker of the house of representatives;
 - (C) The director of business, economic development, and tourism or the director's designee;
 - (D) The superintendent of education or the superintendent's designee;
 - (E) Two representatives from the University of Hawaii system; provided that at least one shall be the chancellor of a community college;
 - (F) Two high school principals appointed by the superintendent of education from the high school principals leadership group;
 - (G) The executive director of the Hawaii P-20 council or the executive director's designee;
 - (H) The chairperson of the workforce development council or the chairperson's designee;
 - (I) The president and chief executive officer of Enterprise Honolulu or the president and chief executive officer's designee;
 - (J) The president of the Hawaii Science and Technology Council or the president's designee;
 - (K) The president and chief executive officer of the Hawaii Community Foundation or the president and chief executive officer's designee; and
 - (L) The executive director of the Honolulu Community Action Program or the executive director's designee;
- (2) Inserting an appropriation amount of \$25,000 for each year of the fiscal biennium 2007-2009 for the Workforce Working Group and \$125,000 for fiscal year 2007-2008 and \$50,000 for fiscal year 2008-2009 for workforce development liaison positions and support staff within the Department of Education;
- (3) Changing its effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1931, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1931, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Fukunaga, Nishihara, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, none. Representatives Takumi, Chang, Sonson, Yamashita, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 5. Noes, none. Excused, 1 (Sonson).

Conf. Com. Rep. 177 on S.B. No. 1133

The purpose of this measure is to:

- (1) Make permanent the increase of the rental motor vehicle surcharge tax from \$2 to \$3 by repealing the sunset provision in the law that authorized the increase; and
- (2) Require the Legislative Reference Bureau to conduct a review of the State Highway Fund.

Your Committee on Conference has amended this measure by:

- (1) Adding a findings and purpose section;
- (2) Extending the sunset provision of the \$3 surcharge period from August 31, 2007, to August 31, 2008;

- (3) Replacing the Legislative Reference Bureau with a joint Senate and House of Representatives task force as the entity to conduct a review of the State Highway Fund; and
- (4) Changing the effective date of the Act from July 1, 2020, to upon approval.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1133, S.D. 3, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1133, S.D. 3, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Espero, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Espero). Representatives Souki, Yamashita, McKelvey, M. Oshiro, Meyer, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Meyer).

Conf. Com. Rep. 178 on S.B. No. 600

The purpose of this measure is to exempt from taxation an unspecified percentage of capital gains realized during taxable years 2008-2009 from sale of leased fee interest in condominium units to association of apartment owners or residential cooperative corporations.

Your Committee has amended this measure by:

- (1) Changing the unspecified percentage to one hundred per cent;
- (2) Changing the effective date to upon approval for taxable years beginning after December 31, 2007, and ending prior to January 1, 2013; and
- (3) Making technical, nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 600, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 600, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Taniguchi, Baker, Chun Oakland, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Taniguchi, Slom). Representatives Shimabukuro, Herkes, Rhoads, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 179 on S.B. No. 1034

The purpose of this measure is to exempt aviation fuel purchased by a common carrier for use in intrastate transportation from within a foreign trade zone from the general excise and use taxes.

Your Committee on Conference finds that a healthy inter-island airline industry is vital to the State's economy. Hawaii's inter-island airlines continue to face severe financial challenges. Fuel costs in particular have skyrocketed and grown volatile in recent years.

The intent of this measure is to level the playing field and create a fairer market for all airlines. Sales of fuel sold from a foreign-trade zone for use by airlines traveling out of the State of Hawaii are exempt from general excise and use taxes. However, intrastate flights are not exempt.

Your Committee on Conference has amended this measure by:

- (1) Deleting amendments to the foreign trade zone chapter (chapter 212, Hawaii Revised Statutes);
- (2) Clarifying the language of the amendment to more accurately reflect the nature of the exemption;
- (3) Adding a monetary cap of \$3,800,000 annually to the general excise and use taxes;
- (4) Deleting the requirement that the Department of Taxation conduct a study on the impact of the exemption;
- (5) Changing the effective date to July 1, 2007; and
- (6) Adding a reenactment provision to preserve the underlying provisions of the affected sections of law upon the repeal of the amendments made by this measure on December 31, 2009.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1034, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1034, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators English, Fukunaga, Baker, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Yamashita, Souki, M. Oshiro, Chong, Pine, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 180 on S.B. No. 1922

The purpose of this measure is to:

- (1) Appropriate funds to the University of Hawaii to develop a permanent facility for the Academy for Creative Media;
- (2) Appropriate funds to the Department of Business, Economic Development, and Tourism and to Honolulu Community College to develop a digital media incubator facility; and
- (3) Establish and appropriate funds to the University of Hawaii and Honolulu Community College for a Music and Enterprise Learning Experience Program and a music and entertainment business training center at Honolulu Community College.

Your Committee on Conference has amended this measure by:

- (1) Making corrections to student and fundraising statistics related to the Academy for Creative Media;

- (2) Authorizing a thirty-five year lease of the existing public broadcasting facility and studio on the University of Hawaii at Manoa campus to PBS Hawaii; provided that PBS Hawaii shall be responsible for renovation of the facility and shall provide forty per cent of the net usable square footage of the facility to the Academy for Creative Media through a written memorandum of understanding, and appropriating \$2,870,000 in fiscal year 2007-2008 and \$2,000,000 for fiscal year 2008-2009 for the equipment and installation suitable for the academy for creative media programs, costs associated with handicapped compliance, and common area spaces of the PBS Hawaii facility and studio;
- (3) Deleting the appropriation for planning, design, and construction of a permanent facility for the Academy of Creative Media;
- (4) Deleting the authorization and appropriation for a digital media incubator facility;
- (5) Appropriating \$150,000 in fiscal year 2007-2008 and the same sum in fiscal year 2008-2009 for MELE; and
- (6) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1922, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1922, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Sakamoto, Baker, Ige, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 2 (Ige, Slom). Representatives Chang, Yamashita, Yamane, M. Oshiro, Chong, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 2 (Chong, Yamane).

Conf. Com. Rep. 181 on H.B. No. 317

The purpose of this bill is to make it more cost-effective for Hawaii's small business owners to outsource their employment and payroll needs to a professional employment organization (PEO), while protecting employee rights by:

- (1) Allocating between a PEO and their client company, responsibility for the labor law rights and tax reporting and withholding obligations of employees assigned to the client company;
- (2) Exempting a PEO from the general excise tax on amounts received from a client company that are disbursed for wages, salaries, payroll taxes, and employment benefits of employees assigned to the client company; and
- (3) Making the exemption inapplicable if assigned employees are excluded from any employee rights or benefits required by law, or the PEO fails to pay any assigned employee withholding taxes for which the organization is responsible.

Your Committee on Conference finds that by eliminating the double imposition of the general excise tax on amounts that a PEO disburses for the client company's employee payroll and benefits, this bill will reduce the cost of outsourcing employment and payroll needs and support the growth of small businesses in Hawaii.

Your Committee on Conference has amended this bill by:

- (1) Changing its effective date to July 1, 2007, and specifying that the general excise tax exemption is to apply to gross income or gross proceeds received after June 30, 2007; and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 317, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 317, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Slom, Managers on the part of the Senate. Ayes, 2. Noes, none. Excused, 1 (Slom). Representatives Yamashita, M. Oshiro, Chong, Marumoto, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 182 on H.B. No. 310

The purpose of this bill is to invest in Hawaii's human resources by establishing a Hawaii Broadband Task Force (Task Force) to develop a long-term strategy to offer affordable Internet access and promote broadband usage statewide.

Your Committee on Conference has amended this bill by:

- (1) Specifying that the Task Force is to be comprised of three members of the House of Representatives and Senate, respectively, four representatives of government entities, and five representatives from the private sector;
- (2) Providing that the government and private sector representatives are to be appointed jointly by the President of the Senate and the Speaker of the House of Representatives;
- (3) Requiring the Auditor to provide research and support services to the Task Force;
- (4) Clarifying that the Task Force is to make findings and recommendations to improve Hawaii's broadband capabilities and services, and removing language requiring Task Force plans to encompass the actual development and installation of a broadband system;
- (5) Removing the appropriation for the Task Force;
- (6) Changing the effective date to July 1, 2007; and
- (7) Making technical, nonsubstantive amendments for clarity, consistency, and style.

Your Committee on Conference finds that the Task Force will identify means of leveraging federal and other private sector opportunities to develop and improve Hawaii's broadband capabilities. The Task Force's study and recommendations will allow Hawaii to take the essential first steps toward keeping pace with the advances in information technology that are reshaping our world.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 310, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 310, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Ige, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, Sagum, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 183 on H.B. No. 1670

The purpose of this bill is to facilitate intellectual property development in Hawaii, while upholding high labor and environmental standards and funding instruction that encourages innovation by public school students, by:

- (1) Establishing the Ingenuity Company, a for-profit, limited liability company chartered by the State to own, license, use, and sell intellectual property for the benefit of inventors, labor unions, and public educators; and
- (2) Appropriating funds to capitalize the Ingenuity Company.

Your Committee on Conference has amended this measure by:

- (1) Inserting an appropriation of \$30,000 to capitalize the fund; and
- (2) Changing the effective date to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1670, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1670, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Sakamoto, Baker, Gabbard, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Gabbard). Representatives Yamashita, Takumi, Sonson, M. Oshiro, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 184 on H.B. No. 1083

The purpose of this bill is to support the growth of Hawaii's high technology business sector by appropriating funds to:

- (1) Allow the High Technology Development Corporation to negotiate a lease with the developers of a life sciences research complex in Kakaako for laboratory and office space for a state-operated high technology incubator and innovation center;
- (2) Help Hawaii's small high technology businesses compete more successfully for federal funds by continuing funding for the Hawaii Small Business Innovation Research Grant and Hawaii Small Business Technology Transfer Grant Programs (Grant Programs); and
- (3) Establish a follow-on funding program to help Hawaii-based small businesses commercialize successful research and development projects initially funded through the Hawaii Technology Development Venture or the National Defense Center of Excellence for Research in Ocean Sciences.

Your Committee on Conference has amended this bill by:

- (1) Removing the provisions concerning the Kakaako high technology incubator and the Grant Programs;
- (2) Inserting an appropriations of \$5,000,000 for fiscal year 2007-2008 for the follow-on funding program;
- (3) Deleting the project oversight responsibilities of the National Defense Center of Excellence for Research in Ocean Sciences;
- (4) Changing the effective date to July 1, 2007; and
- (5) Making technical, nonsubstantive amendments for clarity, consistency, and style.

Your Committee on Conference finds that the follow-on funding program will help Hawaii-based high technology companies that have already successfully performed research and development funded by the federal government, to move their innovations from concept to final commercialization.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1083, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1083, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Ige, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, Ito, M. Oshiro, Chong, Yamane, Ward, Managers on the part of the House. Ayes, 6. Noes, none. Excused, none.

Conf. Com. Rep. 185 on H.B. No. 1659

The purpose of this bill is to ensure that funds solicited by government to cover the costs and expenses of a state-sponsored enterprise, including trips and other endeavors to generate business opportunities and goodwill for the State, are expended fairly and openly, and subject to competitive procedures, by providing that these funds must be deposited into the general fund, disbursed by legislative appropriation, and expended under the procurement code.

Your Committee on Conference understands that this bill targets trade show activities coordinated by state agencies where participants from the business community are responsible for offsetting part of the costs of booths, equipment, and other related expenses. However, while the

procedures required by this bill would increase transparency and accountability, they will also delay the ability of agencies to gain access to solicited funds.

To allow this valuable public-private marketing program to continue unabated, your Committee on Conference has amended this bill by inserting an appropriation of \$50,000 as seed money for initial costs and expenses. The effective date of this bill has also been changed to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1659, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1659, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Nishihara, Tsutsui, Kim, Trimble, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Trimble). Representatives Yamashita, Lee, Awana, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 186 on H.B. No. 1270

The purpose of this bill is to improve government planning by:

- (1) Enhancing the ability of the Office of Planning (OP) to collect government agency geospatial data, and assemble and manage a comprehensive and accurate statewide geographic information system;
- (2) Allowing the Office of the Auditor and the Hawaii 2050 Task Force to further develop the Hawaii 2050 Sustainability Plan; and
- (3) Ensuring that the position of Director of OP is given the same status as the head of a principal state department and is subject to the same appointment procedures.

Your Committee on Conference has amended this bill by:

- (1) Removing the provisions relating to the Director of OP;
- (2) Inserting an appropriation of \$850,000 for fiscal year 2007-2008 for the Hawaii 2050 Task Force;
- (3) Changing the effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive amendments for clarity, consistency, and style.

Your Committee believes that this measure will provide the guidance necessary for the State to renew its long-term plans, protect its valuable resources, and enhance the quality of life for all the people of Hawaii.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1270, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1270, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Kokubun, Baker, Tokuda, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Yamashita, Magaoay, Waters, Chong, M. Oshiro, Marumoto, Managers on the part of the House. Ayes, 6. Noes, none. Excused, none.

Conf. Com. Rep. 187 on H.B. No. 767

The purpose of this bill is to encourage students of underrepresented populations to attend college by:

- (1) Requiring the Department of Education to provide students who participate in the Running Start Program (Program) with guidance in earning credit toward high school graduation upon the satisfactory completion of certain University of Hawaii (UH) courses; and
- (2) Appropriating funds for scholarships for students who are members of underrepresented populations in higher education to participate in the Program.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of general funds to be deposited into the UH Scholarship and Assistance Special Fund (Fund), and out of the Fund, to \$50,000 each for fiscal year 2007-2008 and fiscal year 2008-2009;
- (2) Changing the effective date to upon approval; provided that sections 3 and 4 of the bill shall take effect on July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 767, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 767, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Tsutsui, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Chang, Takumi, Sagum, Ching, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 188 on H.B. No. 777

The purpose of this bill is to establish and appropriate funds for an educator loan forgiveness program to strengthen teacher recruitment and retention for hard-to-fill positions at Hawaii's public schools or rural-area public schools.

Your Committee on Conference has amended this bill by:

- (1) Changing the amount of general funds to be deposited into the Hawaii Educator Loan Program Special Fund (Fund), and expended out of the Fund, to \$250,000;

- (2) Changing the effective date to July 1, 2007; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 777, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 777, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Nishihara, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Chang, Sagum, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 189 on H.B. No. 1014

The purpose of this bill is to ensure a high quality of teaching in Hawaii's public schools by appropriating funds:

- (1) For each complex area to establish the capacity to coordinate and expand complex-level resources for teacher professional development, alignment of curriculum, and teacher mentoring in schools; and
- (2) For induction teacher mentoring for new teachers and teachers who are new to Hawaii.

Your Committee on Conference has amended this bill by:

- (1) Clarifying the purpose language of the bill;
- (2) Changing the appropriation for establishment of the capacity to coordinate and expand complex-level resources as follows:
 - (A) Changing the amount of the appropriation to \$585,000;
 - (B) Specifying that the appropriation is to go to not more than five complex areas;
 - (C) Removing the stipulation that a portion of the funds allocated to individual schools by complex areas shall be for professional development and support of curriculum in visual and performing arts education, physical education, and virtual learning materials and programs; and
 - (D) Requiring that the complexes selected shall be those that have schools where there is a high turnover of teachers or hard-to-fill vacancies and have few other resources for professional development;
- (3) Deleting the appropriation for induction teacher mentoring;
- (4) Inserting an appropriation of \$165,000 for the Teach For America Program;
- (5) Changing the effective date to July 1, 2007; and
- (6) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1014, H.D. 2, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1014, H.D. 2, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Chang, Takumi, Tokioka, Finnegan, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Tokioka).

Conf. Com. Rep. 190 on H.B. No. 1764

The purpose of this bill is to authorize the issuance of revenue bonds to assist the Hawaii Health Systems Corporation (Corporation) in the construction, improvement, and equipment of its healthcare facilities.

Your Committee on Conference has amended this bill by:

- (1) Authorizing the Maui regional system board, or any of the Corporation's regional subsidiary corporations to finance the cost of improvements to their healthcare facilities through the issuance of revenue bonds;
- (2) Providing for the use of the bond revenues to finance Maui's proposed heart, brain, and vascular center;
- (3) Clarifying that the principal of and interest on the revenue bonds issued will be payable from the revenues and other financial assets of the Corporation, its regional system board, or its regional subsidiary corporations financed by the bonds;
- (4) Inserting a provision to allow for the use of the moneys generated by the revenue bonds; and
- (5) Making technical, nonsubstantive changes for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1764, H.D. 1, S.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1764, H.D. 1, S.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Green, Nakasone, Mizuno, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 191 on S.B. No. 914

The purpose of this measure is to address the inadequacies of mental health care services provided to persons committed to Hawaii state correctional facilities by providing funding for improvements and monitoring progress.

Your Committee on Conference finds that addressing the shortcomings of mental health care for incarcerated persons in Hawaii correctional facilities is important and must be done in a timely manner.

Your Committee on Conference amended this measure to:

- (1) Revert to the Senate Draft No. 2 reporting requirements, which require the Department of Public Safety to report to the Legislature with a detailed mental health plan rather than simply submitting a plan;
- (2) Specify that the report shall be submitted in a written form understandable by lay readers and made available to the public;
- (3) Appropriate a sum of \$500,000 for fiscal year 2007-2008;
- (4) Change the effective date to July 1, 2007; and
- (5) Make technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 914, S.D. 2, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 914, S.D. 2, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Espero, Baker, Chun Oakland, Nishihara, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Evans, Har, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 192 on S.B. No. 1174

The purpose of this measure is to support the continuation and expansion of parent-child interaction programs at state correctional facilities.

Your Committee on Conference finds that it is important to support and foster parent-child relationships of incarcerated parents and other offender populations. Your Committee on Conference further finds that the Strengthening Keiki of Incarcerated Parents Program has been successful and is a good model to use for replication at correctional facilities and other institutions and agencies that service offender populations throughout the State.

Your Committee on Conference amended this measure by:

- (1) Following the language of the Senate Draft No. 1, with the exception of expanding parent-child programs to agencies servicing offender populations as well as institutions and correctional facilities as per the House Draft No. 1;
- (2) Inserting in the appropriation the specific amount of \$250,000 for each fiscal year in the 2007-2009 fiscal biennium;
- (3) Changing the effective date to July 1, 2007; and
- (4) Making technical, nonsubstantive changes for the purposes of consistency and clarity.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1174, S.D. 1, H.D. 1, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1174, S.D. 1, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Espero, Tsutsui, Sakamoto, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Evans, Har, Finnegan, Managers on the part of the House. Ayes, 3. Noes, none. Excused, none.

Conf. Com. Rep. 193 on S.B. No. 613

The purpose of this measure is to provide support and incentives to early childhood education programs and facilities in the State.

Your Committee on Conference finds that a critical teacher shortage problem exists in Hawaii. The need to recruit and retain highly qualified individuals is only surpassed by the need to grow a qualified teacher workforce. This is true at all levels of public school education, but of significant import at the early childhood education level. The State has made great strides to improve early childhood education by developing and making available junior kindergarten and kindergarten programs; however, as research indicates that early childhood education is instrumental in lifelong success, the State must do more to promote, enhance, and support programs and initiatives that address the needs of our young children.

Your Committee on Conference further finds that the Legislature, pursuant to Act 259, Session Laws of Hawaii 2006, established the Early Learning Education Task Force to develop a five-year plan for a coherent, comprehensive, and sustainable early learning system for children from birth to age five. The task force found five key elements to increasing early educator capacity in the State. This measure addresses these key factors by establishing a program to provide incentives to early education professionals and those seeking degrees in the field. Your Committee on Conference believes that the State must invest in our future teachers and assist them in achieving high academic levels and to grow a highly-qualified early education workforce.

Additionally, the need exists to capture and assist younger individuals interested in pursuing early education careers, including those at the high school level. Your Committee on Conference believes that all efforts should be explored to ensure the establishment of a qualified and sustainable early educator workforce.

Your Committee on Conference also determines that additional improvements to the early education system can be accomplished through the provision of land and other facilities for early childhood education programs.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Including language in the purpose section and in statute that requires the Department of Education to collaborate with parents and providers to encourage inclusionary classes with special education eligible and general education students ages three to five, subject to available resources and individualized education plans;
- (2) Requiring the Department of Education's kindergarten report card to assess an individual junior kindergarten or kindergarten student's readiness for advancement;
- (3) Changing the language regarding a school's ability to move students between junior kindergarten and kindergarten to allow movement based on the kindergarten report card;
- (4) Removing language that required schools to incorporate the Hawaii preschool content standards for four-year old children in developing appropriate instruction for the junior kindergarten tier;
- (5) Reinstating language that allows the junior kindergarten and kindergarten program to include a model for blending junior kindergarten and kindergarten students into a single classroom;
- (6) Authorizing the Department of Education to give preference to certain teachers; provided that such preference does not violate any collective bargaining agreement;
- (7) Removing language creating a preference for junior kindergarten educational assistants who have early childhood education credentials;
- (8) Removing amendments to the Hawaii Educator Loan Program that required ten per cent of the sums appropriated into the program's special fund to be used to assist educators seeking associate's or bachelor's degrees in early childhood education;
- (9) Requiring the Department of Education and the Department of Human Services to collaborate to develop suitable Pre-plus classrooms on Department of Education campuses, including charter schools;
- (10) Removing the requirement that the Department of Human Services administer the appropriated capital improvement project funds for the planning, design, and construction of temporary facilities to support Pre-plus programs on public school campuses;
- (11) Removing the requirement that the Department of Accounting and General Services implement required planning, design, and construction functions for temporary facilities to support Pre-plus programs on designated public school campuses;
- (12) Removing the requirement that the Department of Education procure preschool service delivery and implementation and provide general oversight of the Pre-plus program;
- (13) Removing amendments to section 302A-1506.5(a), Hawaii Revised Statutes, requiring that early childhood education classrooms meet the licensing standards determined by the Departments of Education and Human Services;
- (14) Changing the reporting requirement on early childhood education facilities from the Department of Health reporting to the Department of Education to the Department of Education reporting to the Legislature annually;
- (15) Removing language authorizing the Department of Education to establish rules to effectuate section 302A-1506.5, Hawaii Revised Statutes;
- (16) Removing the appropriation for the Hawaii Educator Loan Program;
- (17) Removing the appropriation for the development of courses of public school junior kindergarten and kindergarten teachers for a certificate in early childhood education;
- (18) Removing the authorization for the issuance of general obligation bonds, and the appropriation of funds therefrom, for Pre-plus facilities;
- (19) Removing the authorization for the issuance of general obligation bonds, and the appropriation of funds therefrom, for the Department of Labor and Industrial Relations public-private Pre-plus initiative;
- (20) Changing the effective date to July 1, 2007; and
- (21) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 613, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 613, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Chun Oakland, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Takumi, Chang, M. Oshiro, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 194 on S.B. No. 885

The purpose of this bill is to enhance career and technical education in Hawaii's schools, thereby preparing our students for further education and employment, by:

- (1) Broadening the Department of Education's (DOE) Agriculture Education Program to include instruction in healthy eating habits and educational opportunities in the fields of farming, diversified agriculture, landscaping, aquaculture, culinary arts, and related industries such as market development and science and technology;
- (2) Requiring DOE to report to the 2008 and 2009 Legislatures on its efforts to implement this program; and
- (3) Appropriating funds for these purposes.

Your Committee on Conference has amended this bill by, among other things:

- (1) Clarifying the purpose language of the bill;

- (2) Statutorily establishing a Career and Technical Education Program within DOE;
- (3) Clarifying the provisions of the Agriculture Education Program;
- (4) Requiring the Agriculture Education Program to coordinate with culinary arts programs;
- (5) Changing the amount of the appropriation for the Agriculture Education Program to \$350,000;
- (6) Establishing and appropriating funds for the Hawaii Excellence Through Science and Technology Academy Pilot Program to be administered by Kauai Community College, in partnership with DOE, at two public schools;
- (7) Establishing the Fostering Inspiration and Relevance Through Science and Technology (FIRST) Pre-Academy Program which shall be administered by the University of Hawaii (UH) College of Engineering;
- (8) Establishing the Robotics and Problem-Based, Applied Learning Program which shall be administered by the UH College of Engineering;
- (9) Establishing the Research Experiences for Teachers Program (RET) which shall be administered by the UH College of Engineering;
- (10) Appropriating funds for the FIRST Pre-Academy Program, including funds for the Robotics and Problem-Based, Applied Learning Program and RET;
- (11) Establishing and appropriating funds for the Business/Education Internship and Mentorship Program within the Department of Business, Economic Development, and Tourism;
- (12) Establishing and appropriating funds for a professional development program, within the UH College of Education, to provide practicing elementary, middle, and high school science and mathematics teachers with opportunities to increase their knowledge and understanding of recent developments in science, technology, engineering, and mathematics;
- (13) Appropriating funds for the Transition To Teaching Program to provide stipends to attract science, technology, engineering, and mathematics graduates to the UH post baccalaureate certificate in secondary education program;
- (14) Changing the effective date to July 1, 2007; and
- (15) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 885, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 885, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Kokubun, Baker, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Takumi, Tsuji, Yamashita, Brower, Ching, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 195 on S.B. No. 603

The purpose of this measure is to improve the public charter school system by clarifying the functions, duties, and roles of the Charter School Review Panel and the Board of Education in the administration and operations of the charter schools in the State.

Your Committee on Conference finds that public charter schools throughout the State serve an important function by creating choices for parents and students within the public school system, while providing a system of accountability for student achievement. Charter schools encourage innovation and provide opportunities for parents to play powerful roles in shaping and supporting the education of their children. Pursuant to Act 298, Session Laws of Hawaii 2006, the Legislature sought to improve the charter school system by adopting proposals recommended by the Task Force on Charter School Governance that was established by Act 87, Session Laws of Hawaii 2005. However, additional reform is necessary to allow charter schools in the State to continue to strive for excellence through effective and efficient operations.

Your Committee on Conference believes that with the numerous duties imposed on the Board of Education and the need for the charter schools to be more autonomous, the Charter School Review Panel should be given increased authority over the administration and operations of the charter schools within the State. However, it is not the intent of the Legislature to alter or affect the Board of Education's role as the State Education Agency for Hawaii. Additionally, the Board of Education should continue to be the final authority over certain decisions of the Panel. Your Committee on Conference determines that the increased authority should include the authority to approve charter school applications; revoke charters; approve amendments to detailed implementation plans; and hire the Executive Director of the Charter School Administrative Office, as the decision should be brought closer to its constituency, as well as approval of the hiring of staff. As a result of this increased authority, your Committee on Conference finds that greater accountability and greater transparency are also necessary in the operations of the Charter School Review Panel.

Upon further review, your Committee on Conference has amended this measure by:

- (1) Specifying that it is not the Legislature's intent to alter or affect the Board of Education's role as the State Education Agency for the State of Hawaii;
- (2) Authorizing the Charter School Review Panel to review, approve, or deny charter school applications; revoke school charters; and review, approve, or deny amendments to school detailed implementation plans;
- (3) Establishing a review process for appeals from decisions of the Charter School Review Panel to the Board of Education;
- (4) Changing the term of the Executive Director of the Charter School Administrative Office to a maximum of four years;
- (5) Authorizing the Charter School Review Panel to hire and evaluate an Executive Director, as well as approve the hiring of staff;
- (6) Making the Charter School Review Panel subject to the requirements of chapter 92, Hawaii Revised Statutes;

- (7) Changing the composition of the panel by including an additional representative from the University of Hawaii, removing the parent of a charter school student, and ensuring that a certain number of members are not affiliated with charter schools;
- (8) Requiring the additional members of the panel, as a result of increased membership of the panel, to be appointed by September 1, 2007, and establishing interim quorum requirements to allow the panel to operate until all twelve panel members have been appointed;
- (9) Removing language that requires the Board of Education to submit to the Legislature annual appropriation requests to fund panel operations;
- (10) Authorizing the panel to make adjustments to charter school allocations due to noncompliance with federal and state reporting requirements;
- (11) Updating the funding formula to ensure that charter school allocations are based on the most recent department budget base;
- (12) Removing the appropriation to the Charter School Administrative Office for various cost items; and
- (13) Changing the effective date to upon approval and including language to preserve changes to section 89-6(g), Hawaii Revised Statutes, upon repeal and reenactment under Act 245, Session Laws of Hawaii 2005.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 603, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 603, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Baker, Hooser, Tokuda, Gabbard, Chun Oakland, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, none. Representatives Takumi, M. Oshiro, Lee, Finnegan, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 196 on S.B. No. 1917

The purpose of this measure is to assess and address the housing crisis in Hawaii.

Your Committee on Conference finds that the homeless and affordable housing crises continue to be one of the State's most significant and challenging social problems. Meaningful solutions to Hawaii's housing and homeless problems must be found.

Your Committee on Conference has amended this measure to:

- (1) Postpone the sunset date for the rental housing trust fund to June 30, 2008;
- (2) Retain the existing fifty per cent allocation of the taxes collected in each fiscal year shall be paid into the rental housing trust fund;
- (3) Insert the monetary figures for the appropriations made in this measure;
- (4) Delete the appropriation from the general fund into the rental housing trust fund;
- (5) Insert a severability clause;
- (6) Change the effective date to July 1, 2007; provided that the section postponing the sunset date for the rental housing trust fund shall take effect on June 29, 2007; and
- (7) Make technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1917, S.D. 3, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1917, S.D. 3, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Taniguchi, Fukunaga, Baker, Menor, Tsutsui, Hemmings, Managers on the part of the Senate. Ayes, 6. Noes, none. Excused, 1 (Hemmings). Representatives Shimabukuro, Ito, M. Oshiro, Rhoads, Awana, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 197 (Majority) on S.B. No. 1792

The purpose of this measure is to advance the State's commitment to provide quality health care for the people of the Hawaii, by:

- (1) Adopting the original task force recommendation of community-based governance; and
- (2) Establishing regional affiliate boards for all regions to be governed by a community-based regional affiliate board of directors, and to provide the necessary authority for each region to accomplish the goal of community-based governance.

Your Committee has amended this bill by:

- (1) Changing regional affiliate boards to regional system boards, increasing the initial membership on the board from eleven to twelve, and specifying that:
 - (A) The regional system boards shall be established no later than January 1, 2008; and
 - (B) No additional debts or liabilities or superior debts shall be added to any regional board that would negatively impact the holders of bond notes;
- (2) Inserting that, until December 31, 2008, a regional system board may appoint a regional chief financial officer and may discharge a regional chief executive officer or regional chief financial officer for cause and that, effective January 1, 2009, the hiring and firing of the regional chief executive officers shall be subject to approval of both the regional system board and the corporation board;
- (3) Inserting the provision that up to December 31, 2008, the discharge of a regional chief executive officer shall only be for cause and after January 1, 2009, regional chief executive officers and other exempt personnel shall be subject to discipline, including discharge in

- accordance with duly executed contracts, laws governing exempt personnel of the State, and regional system policies adopted in accordance with corporate policies;
- (4) Reducing from ten to eight members of the corporation board to be appointed by the governor from a list of two non-physicians submitted by the senate president and the speaker of the house of representatives within fifteen days of the effective date of this Act as follows:
 - (A) One member from region I from the city and county of Honolulu;
 - (B) One member from region II from Kauai county;
 - (C) Two members from region III from Maui county, except the senate president and the speaker of the house of representatives shall submit two non-physician candidates each;
 - (D) Two members from region IV from eastern Hawaii county, except the senate president and the speaker of the house of representatives shall submit two non-physician candidates each;
 - (E) One member from region V from western Hawaii county, except the senate president and the speaker of the house of representatives shall submit two non-physician candidates each; and
 - (F) Two additional members residing in the State;
 - (5) Reinstating the rotation of physician members on the corporation board;
 - (6) Specifying that a regional system board, in addition to the public health facility management advisory committee, may submit physician candidates for the board and requiring the Governor to attempt to choose physician members from different regions and to rotate their appointments among the five regions;
 - (7) Adding continuing medical education programs to the duties of the corporation board;
 - (8) Adding the provisions that:
 - (A) Duties and powers exercised by the regional system boards shall be consistent with corporation-wide policies, and wherever appropriate, corporation-wide policies shall take into account differences among regions and among types of facilities, particularly acute care, critical access, and long-term care facilities within the system; and
 - (B) New corporation-wide policies, and major changes to existing policies other than those changes mandated by legal or regulatory requirements, shall be developed by the corporation board after consultation with a policies committee. The policies committee shall be made up of representatives of the corporation board and each regional system board or designees of each board. The corporation board shall have two representatives on this committee. The corporation board shall review and consider approval of the policies within thirty days of transmittal by the policies committee or at the next board meeting; provided that, if the policies committee fails to take action within thirty days of receiving the proposed policy, the corporation board may consider and adopt or reject or revise the policy. The regional system boards and corporation board, as needed, may submit a request to the committee to alter corporation-wide policies along with detailed justification for the request. The regional system boards and the corporation board shall establish a procedure to further implement this section collaboratively;
 - (9) Adding that the regional system boards shall submit their regional and facility budgets to the corporation to be consolidated into a corporation-wide budget for purposes of corporation-wide planning and appropriation requests;
 - (10) Adding that rates and charges may vary among regions and facilities and may be consolidated with the rates of other regions into one charge master. Third-party payer contracts may be negotiated at the corporation-wide level with input from the regions, taking into consideration the rates set by the regional system boards. For purposes of securing revenue bonds, the corporation or regional board may covenant to set, and if necessary increase, rates and charges as needed to pay debt service and related obligations plus a coverage factor;
 - (11) Adding that the corporation and each regional system board shall be entitled to undertake the acquisition, construction, and improvement of property, facilities, and equipment to carry out these capital and strategic plans;
 - (12) Clarifying that only the corporation may sue or be sued and that the corporation or any of its regional system boards may waive sovereign immunity for any bonds to the same extent as the State of Hawaii;
 - (13) Clarifying that the corporation board shall delegate to a regional system board its authority to enter into and execute contracts relating to matters exclusively affecting that region;
 - (14) Adding that the corporation board may issue revenue bonds up to \$100,000,000 and that the regional system boards shall have the power to issue revenue bonds in any amount;
 - (15) Adding that the corporation board may pledge other financial assets of the corporation or the regional system boards to secure bond liabilities;
 - (16) Clarifying the custodial control of the regional system boards over facilities and physical assets in the respective regions;
 - (17) Adding that all contracting for or acceptance of gifts, grants, loans, property, or other aid shall be consistent with corporation-wide policies established by the corporation board;
 - (18) Adding that proceeds of bonds and moneys pledged to secure bonds may be invested in obligations permitted by any document that authorizes the issuance or securing of bonds;
 - (19) Adding that, regarding internal policies, the corporation board shall be subject to management and financial audits and clarifying that the regional system boards and the corporation board shall enjoy the exemption from section 103-53(e), Hawaii Revised Statutes, that the corporation board shall be subject to the Hawaii procurement code but that the regional system boards shall not be subject to the code;

- (20) Clarifying that a regional chief financial officer and chief executive officer may only be hired or dismissed with the regional system board's approval and the corporation board;
- (21) Adding that regional system boards and the corporation board are also exempt from the public meeting requirements under part I of chapter 92, Hawaii Revised Statutes;
- (22) Adding that the corporation and any regional system board may deposit moneys into trustee accounts for the purposes of securing or issuing bonds;
- (23) Adding that each regional system board shall submit the results of the annual audit to the corporation board within one hundred twenty days after the close of the regional system board's fiscal year;
- (24) Adding language to protect officers and employees transferred;
- (25) Adding that the terms of membership of the corporation board shall expire as follows:
 - (A) The terms of board members whose date of appointment was prior to and including July 1, 2004, shall expire on December 31, 2007;
 - (B) The terms of board members whose date of appointment was after July 1, 2004, shall expire on September 30, 2008;
- (26) Adding an appropriation of \$750,000 to the Hawaii Health Systems Corporation to support establishment of the regional system boards;
- (27) Changing the effective date from upon its approval to July 1, 2007; provided that:
 - (A) Section 19 shall take effect on January 1, 2009;
 - (B) Section 16 and section 323F-7(c)(30)(B), Hawaii Revised Statutes, shall be repealed on January 1, 2009, and the statutes amended in those sections shall be reinstated in the form they were in before the adoption of this Act; and
 - (C) The amendments made to section 323F-7(c)(15), Hawaii Revised Statutes, in section 23 of this Act shall not take effect if House Bill No. 1764 in any form passed by the legislature, regular session of 2007, becomes an Act.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1792, S.D. 3, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1792, S.D. 3, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Nakasone, Green, Tokioka, Mizuno, Awana, Managers on the part of the House. Ayes, 4. Noes, 1 (Green). Excused, none.

Conf. Com. Rep. 198 on S.B. No. 907

The purpose of this measure is to:

- (1) Rename the Office of Space Industry, as the Office of Aerospace Development, and adds additional duties relating to identifying and promoting opportunities for expanding and diversifying aerospace-related industries in the State; and
- (2) Appropriate funds for the Office of Aerospace Development, to establish and operate a Pacific International Center for Space Explorations, and for safety and environmental studies for an FAA commercial space port license.

Your Committee on Conference has amended this measure by:

- (1) Appropriating \$500,000 in fiscal year 2007-2008 for the purposes of this Act; and
- (2) Changing the effective date from July 1, 2034, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 907, S.D. 2, H.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 907, S.D. 2, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Tsutsui, Espero, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, Sagum, Tokioka, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 199 on H.B. No. 1631

The purpose of this bill is to provide greater transparency in the use of high technology tax incentives while simultaneously gathering and analyzing statistical information on the value of these incentives to the state. Specifically, the bill requires that the Department of Taxation (Department) prepare an annual report using statistics about the high technology businesses already available from July 1, 2004.

Your Committee on Conference has amended this measure by requiring every qualified high technology business (QHTB) that accepts an investment for which the high technology business investment tax credit could be claimed to file an annual survey with the Department. The survey will include information about the QHTB such as investment credit data, revenue and expense data, and specifics about employment and wage data for the QHTB, which will allow the Department to measure the effectiveness of the high technology investment tax credit, including its effect on capital formation, economic development, and diversification of the State's economy based on such factors as the number of QHTBs in various industry sectors, jobs created, compensation levels, and qualified research activities. The results of this study and other information will be reported to the Legislature annually.

Your Committee on Conference further amended this measure by deleting the appropriation section and repealing the bill's provisions after three and a half years to encourage a reevaluation of the usefulness of the information collected and its analyses.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1631, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1631, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Ige, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, M. Oshiro, Chong, Sagum, Ward, Managers on the part of the House. Ayes, 5. Noes, none. Excused, none.

Conf. Com. Rep. 200 on H.B. No. 1008

The purpose of this bill is to ensure that all of Hawaii's children receive appropriate health care by:

- (1) Establishing the Hawaii Infant Health Care Program as a three-year pilot program to provide health care services to uninsured children who are one day, but not more than 30 days of age;
- (2) Establishing the Hawaii Children's Health Care Program as a three-year pilot program to provide coverage to uninsured children who are at least 31 days to 18 years of age;
- (3) Providing free medical care to children 18 years of age or younger whose family income is at or below 300 percent of the federal poverty level (FPL);
- (4) Allowing children 18 years of age or younger whose family income is at or between 250 and 300 percent of the federal poverty level to receive free QUEST-Net benefits; and
- (5) Appropriating funds for the above purposes.

Your Committee on Conference has amended this bill by:

- (1) Inserting the following appropriation amounts:
 - (A) \$150,000 for fiscal year 2007-2008 and \$250,000 for fiscal year 2008-2009 for the Hawaii Infant Health Care Program;
 - (B) \$700,000 for fiscal year 2007-2008 and \$900,000 for fiscal year 2008-2009 for the Hawaii Children's Health Care Program;
 - (C) \$109,000 for fiscal year 2007-2008 and \$218,000 for fiscal year 2008-2009 to provide medical care to children 18 years of age or younger whose family income is at or below 300 percent of FPL;
 - (D) \$350,000 for fiscal year 2007-2008 and \$700,000 for fiscal year 2008-2009 for medical assistance under QUEST-Net;
 - (E) \$52,000 for each year of fiscal biennium 2007-2009 for two full-time equivalent permanent eligibility worker positions; and
 - (F) \$50,000 for fiscal year 2007-2008 for the purchase of equipment and supplies to implement these various programs and services;

and
- (2) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1008, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1008, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Ige, Baker, Hemmings, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Hemmings). Representatives Green, Shimabukuro, Mizuno, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, none.

Conf. Com. Rep. 201 on H.B. No. 212

The purpose of Part I of this bill is to establish a temporary Maui health initiative task force to develop a comprehensive strategic health plan for the county of Maui.

The purpose of Part II of this bill is to appropriate funds for the State Health Planning and Development Agency to develop and maintain a statewide comprehensive health care workforce map and database.

Your Committee on Conference amended this measure by:

- (1) Requiring the State Health Planning and Development Agency to integrate the report into the activities of the Tri-Isle Subarea Health Planning Council;
- (2) Adding “. . .the state health planning and development agency shall grant expedited review to any application for a certificate of need whose health care service area is within Maui County that demonstrates financial viability and meets the Hawaii health performance plan relating to Maui county as revised pursuant to section 2(e). Any required hearings or reviews shall be held in Maui county.”
- (3) Inserting an appropriation amount of \$100,000 out of the general fund for the operation of the task force;
- (4) Deleting the appropriation for the work force map and database because funds were appropriated in H.B. No. 500, C.D. 1, the executive budget, for that purpose; and
- (5) Changing the effective date to take effect upon approval; provided that the appropriation section shall take effect on July 1, 2007; and
- (6) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 212, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 212, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Tsutsui, Whalen, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, 1 (Whalen). Representatives Green, Sonson, Mizuno, Meyer, Managers on the part of the House. Ayes, 3. Ayes with Reservations, 1 (Meyer). Noes, none. Excused, none.

Conf. Com. Rep. 202 on H.B. No. 1529

The purpose of this bill is to open the door to higher education opportunities by establishing two scholarship programs in honor of United States Senator Hiram L. Fong and United States Senator Oren E. Long, respectively, to be administered by the University of Hawaii (UH).

Your Committee on Conference has amended this bill by:

- (1) Changing the appropriation for UH to establish an endowment trust to fund the Senator Hiram L. Fong Scholarship to \$50,000;
- (2) Changing the appropriation for UH to establish an endowment trust to fund the Senator Oren E. Long Scholarship to \$50,000; and
- (3) Making technical, nonsubstantive amendments for clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of H.B. No. 1529, H.D. 2, S.D. 2, as amended herein, and recommends that it pass Final Reading in the form attached hereto as H.B. No. 1529, H.D. 2, S.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Sakamoto, Tsutsui, Tokuda, Gabbard, Managers on the part of the Senate. Ayes, 4. Noes, none. Excused, none. Representatives Chang, Lee, Bertram, Ching, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (Bertram).

Conf. Com. Rep. 203 on S.B. No. 1365

The purpose of this measure is to:

- (1) Require the Employees' Retirement System, by January 1, 2009, to develop criteria to ensure that it gives preference to Hawaii venture capital investments of equal or lesser risk and equal or greater return to out-of-state investments and caps these investments at three per cent of system funds; and
- (2) Appropriate funds to the University of Hawaii Office of Technology Transfer and Economic Development to enter into a partnership with a private sector entity.

Your Committee on Conference has amended this measure by:

- (1) Deleting the specific requirements for the development of criteria related to Hawaii venture capital investments;
- (2) Requiring the Employee's Retirement System Board, by January 1, 2008, to develop criteria to determine the amount of funds that may be prudently invested in Hawaii private placement investments;
- (3) Adding a requirement that the Employees' Retirement System report annually to the Legislature on any Hawaii venture capital investments; provided that if the board determines it is not prudent to invest in any Hawaii venture capital investment the board shall report the rationale for the decision;
- (4) Deleting the appropriation to the University of Hawaii Office of Technology Transfer and Economic Development; and
- (5) Changing the effective date of July 1, 2020, to July 1, 2007.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference is in accord with the intent and purpose of S.B. No. 1365, S.D. 2, H.D. 3, as amended herein, and recommends that it pass Final Reading in the form attached hereto as S.B. No. 1365, S.D. 2, H.D. 3, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Fukunaga, Baker, Ige, Slom, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Slom). Representatives Yamashita, Chang, Sonson, M. Oshiro, Ward, Managers on the part of the House. Ayes, 4. Noes, none. Excused, 1 (Ward).

Conf. Com. Rep. 204 on S.C.R. No. 209

The purpose of this measure is to request the Auditor to study the social and financial impact of mandatory health insurance coverage for use of the LGI Intelligent Medical Vigilance System.

Your Committee on Conference amended this measure by:

- (1) Changing the title to request the Auditor to study insurance coverage for the use of medical vigilance services in acute care hospitals;
- (2) Inserting references to S.B. No. 409, S.D. 1, which mandates coverage of medical vigilance services for all policies and contracts, hospital and medical service plan contracts, medical service corporation contracts, and health maintenance organization plans and contracts issued after December 31, 2007; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference concurs with the intent and purpose of S.C.R. No. 209, H.D. 1, as amended herein, and recommends its adoption in the form attached hereto as S.C.R. No. 209, H.D. 1, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Ige, Baker, Fukunaga, Whalen, Managers on the part of the Senate. Ayes, 3. Noes, none. Excused, 1 (Whalen). Representatives Mizuno, McKelvey, Magaoay, Ward, Managers on the part of the House. Ayes, 3. Noes, none. Excused, 1 (McKelvey).

Conf. Com. Rep. 205 (Majority) on S.C.R. No. 48

The purpose of the measure is to request an audit of the Hawaii Disability Rights Center (the Center) to investigate whether the Center:

- (1) Is fulfilling its mission;
- (2) Is abusing its authority over its access to records of persons with developmental disabilities or mental illness;
- (3) Has appropriate grievance procedures and alternative remedied to litigation in place; and
- (4) Is being appropriately overseen by any state or federal authority.

Your Committee on Conference finds that there is an ongoing dispute as to whether the federal law that provides the Center access to records overrides the privacy rights of persons receiving services and their families, with or without the appropriate waivers of these privacy rights.

Your Committee on Conference further finds that there is an ongoing dispute concerning the justification necessary for the Center to demand access to records of persons with disabilities.

Your Committee on Conference further finds that the Center's need for access to records should be balanced to the greatest extent possible against the ability of service providers to allocate their limited personnel resources to both provide services to persons with disabilities and to produce documents in response to requests for records and other information.

Your Committee on Conference amended this measure by deleting its title and contents, inserting a more accurate description of the concerns and issues involved, and requesting the Attorney General to:

- (1) Provide an outline of the legal authority that grants the Center access to:
 - (A) Facilities serving individuals with disabilities;
 - (B) Individuals with disabilities; and
 - (C) The records of the individuals with disabilities;
- (2) Describe, after conferring with the National Disability Rights Network, the federal Center for Mental Health Services, and the federal Administration on Developmental Disabilities, the inter-relationship between the aforementioned legal authority and the laws protecting the privacy of individuals and their records, including but not limited to the federal Health Insurance Portability and Accountability Act; and
- (3) Describe, after conferring with the appropriate federal agencies, the inter-relationship between the rights and responsibilities of natural and legal guardians respecting individuals with disabilities and those of the Center respecting these individuals.

Your Committee on Conference further amended this measure to request the Attorney General to:

- (1) Report on best practices identified in other jurisdictions regarding the manner in which the Center should conduct investigations of allegations of abuse or neglect of an individual with disabilities; and
- (2) Submit the analysis requested by this measure and any recommendations for legislation, administrative rules, or audit deemed necessary to the Legislature prior to the convening of the 2008 Regular Session.

As affirmed by the record of votes of the managers of your Committee on Conference that is attached to this report, your Committee on Conference concurs with the intent and purpose of S.C.R. No. 48, S.D. 1, H.D. 2, as amended herein, and recommends its adoption in the form attached hereto as S.C.R. No. 48, S.D. 1, H.D. 2, C.D. 1.

Signed by the Chairs on behalf of the Committee. Senators Chun Oakland, Baker, Fukunaga, Ihara, Hemmings, Managers on the part of the Senate. Ayes, 5. Noes, none. Excused, none. Representatives Mizuno, Rhoads, Magaoay, Ward, Managers on the part of the House. Ayes, 3. Noes, 1 (Rhoads). Excused, none.

STANDING COMMITTEE REPORTS

SCRep. 1 Ways and Means on S.B. No. 638

The purpose of this measure is to appropriate funds to provide for the expenses of the Legislature and its service agencies.

More specifically, this measure provides for the expenses of the Legislature, the Office of the Auditor, the Legislative Reference Bureau, the Office of the Ombudsman, the State Ethics Commission, the Legislative Information System, and the Legislative Broadcast System.

Your Committee has amended the bill by replacing the word "or" with the word "for" on page 3, line 10.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 638, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 638, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, 4 (Chun Oakland, English, Menor, Tsutsui).

SCRep. 2 (Joint) Health and Economic Development and Taxation on S.B. No. 139

The purpose of this measure is to clarify that the cigarette tax collected pursuant to section 245-15, Hawaii Revised Statutes, shall be assessed on a per cigarette basis and to ensure that the cigarette taxes collected are earmarked for each special fund through the year 2011 and beyond.

Testimony in support of this measure was submitted by the Department of Taxation, the Department Of Health, the City and County of Honolulu Emergency Services Department, the Cancer Research Center of Hawaii, the American Cancer Society, the Coalition for a Tobacco-Free Hawaii, Hawaii Pacific Health, Hawaii Primary Care Association, The Queen's Medical Center, and the American Heart Association. Testimony discussing this measure was submitted by the Tax Foundation of Hawaii.

Your Committees find that clarification of Act 316, Session Laws of Hawaii 2006, is necessary to ensure that the cigarette tax is assessed on a per cigarette basis as the Legislature intended. Your Committees further find that, since the cigarette tax was implemented in September 2006, the Department of Taxation has collected the tax on a per cigarette basis.

It is the intent of your Committees to encourage the reduction of tobacco consumption by continuing the collection of cigarette tax revenues and ensuring that these revenues are properly administered and dispersed as the Legislature intended.

Your Committees amended this measure, in accordance with the recommendations submitted by the Department of Taxation, by amending the effective date of subsequent increases in the cigarette tax to begin after September 30, instead of September 29 of each respective year.

As affirmed by the records of votes of the members of your Committees on Health and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 139, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 139, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 2 (Menor, Whalen).

SCRep. 3 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 70

The purpose of this measure is to make an appropriation to provide lifeguard services at Makena State Park on Maui.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources; Department of the Corporation Counsel, City and County of Honolulu; the Hawaiian Lifeguard Association; and a Maui County Council member.

Makena Beach at the Makena State Park on Maui is known as one of the best beaches in the State and is a popular destination for tourists as well as a favorite recreation area for Maui residents. Makena Beach is also locally known for its dangerous high waves and rough shore break, which results in the emergency rescue and resuscitation of many unsuspecting tourists and residents. Currently, there are no lifeguards on duty at the beach to warn its users of the beach's dangerous conditions or to rescue them. Your Committee finds that making an appropriation to fund lifeguard services will provide emergency and rescue services and increase water safety and security at Makena Beach.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 70 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 4 Economic Development and Taxation on S.B. No. 302

The purpose of this short form bill is to amend the law relating to arts.

Your Committee has amended this bill by inserting language in section 103-8.5, Hawaii Revised Statutes, to add an unspecified percentage of moneys appropriated for state capital improvement projects to the Works of Art Special Fund for performing arts, and to include performances such as live musical, dance, dramatic, choreographed athletic, or acrobatic performances, poetry readings, speeches, and lectures in the definition of works of art.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 302, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 302, S.D. 1, and be recommitted to the Committee on Economic Development and Taxation, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 5 Judiciary and Labor on Jud. Com. No. 1

Recommending that the Senate consent to the nomination of the following:

DISTRICT COURT OF THE SECOND CIRCUIT

KEITH E. TANAKA

The Nominee received a B.A. from the University of Hawaii and a J.D. from the William S. Richardson School of Law. He has been licensed to practice law in Hawaii since 1983. He has served as Deputy Public Defender for the State of Hawaii for five years. For the past eighteen years, the Nominee has been in private practice as a court appointed criminal defense attorney working in District, Family, and Circuit Court. His cases also included appellate work, divorce proceedings, arbitration, commissioner on foreclosure proceedings and parole hearings.

Your Committee received testimony in support of the Nominee from: Jeffrey Portnoy President of the Hawaii State Bar Association, John M. Tonaki State Public Defender, William "Pili" McGrath Deputy Public Defender, Michael M. Ebesugawa Deputy Public Defender, Wendy A. Hudson Supervising Attorney Office of the Public Defender, Maui, Susan L. Arnett Felony Trial Supervisor Office of the Public Defender, Oahu, Ronette M. Kawakami Deputy Public Defender, James R. Rouse Esq., Philip H. Lowenthal Esq., Matthew S. Kohm Esq., Ruth I. Murata, Verdine Kong, Jon H. Apo Esq., Christopher M. Dunn Esq., Keith S. Shigetomi Esq., Susan Fukuda, and Joseph T. Toma Esq. Your committee did not receive any testimony opposing the Nominee.

The Board of Directors of the Hawaii State Bar Association (HSBA) rated the Nominee to be highly qualified. As part of the HSBA Board's procedure for taking a position on judicial appointments, the Nominee was asked to submit a resume, respond to a questionnaire, and appear before the Board to answer questions. The HSBA Board utilized a modified version of the American Bar Association Guidelines for Reviewing Qualifications of Candidates for State Judicial Office. These Guidelines include the following criteria for judicial positions: integrity, legal knowledge and ability, professional experience, judicial temperament, diligence, financial responsibility, public service, collegiality, and writing ability.

During the confirmation process, your Committee expressed strong concerns regarding the evaluation process of the Judicial Selection Commission and the Hawaii State Bar Association. The Judicial Selection Commission's (JSC) questionnaire filled out by the nominee did not disclose the fact that he was criticized by the Intermediate Court of Appeals (ICA). The ICA, in reversing a guilty conviction, discussed the nominee's representation of his client. The committee is troubled by the fact that the reversal could and should have been disclosed to the Judicial Selection Commission by the nominee. Moreover, the committee is concerned that the nominee while not disclosing the reversal to the JSC disclosed the reversal to the Hawaii State Bar Association (HSBA). Your committee believes that it is reasonable that the JSC may not have recommended the nominee had the nominee truthfully disclosed the reversal to it. These issues cited herein should be reviewed by the JSC, the Chief Justice, the Governor and the HSBA and dealt with appropriately as these concerns may affect future nominations.

In addition, your committee wishes to advise you that the committee also requested and received the complete record of the nominee from the Office of Disciplinary Counsel. The information provided contained no record of transgressions of the nominee.

However, your Committee has reviewed the personal history, resume, and statements submitted by the Nominee and finds the Nominee to have the necessary qualifications and legal experience to be appointed to the position of the nomination to District Court and further believes that it may not have reached the same conclusion if the nomination were to a higher court.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee, after full consideration of the background, experience, and qualifications of the nominee, has found the nominee to be qualified for the position to which nominated and recommends that the Senate consent to the nomination.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Gabbard).

SCRep. 6 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 5

The purpose of this measure is to appropriate moneys out of the funds derived from the public land trust described under section 10-3(1), Hawaii Revised Statutes, for the repair and maintenance of Iolani Palace.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the Office of Hawaiian Affairs, the Friends of Iolani Palace, and the Daughters of Hawaii. The Department of the Attorney General submitted comments on the measure.

Iolani Palace is a Hawaiian national treasure and the only official state residence of royalty in the United States. During the monarchy period, the Palace was the center of social and political activity in the Kingdom of Hawaii. The restoration and preservation of the palace continues today through the efforts of concerned individuals and interest groups, so that the Palace may maintain its grandeur and historic significance.

Under section 10-3(1), Hawaii Revised Statutes, the Office of Hawaiian Affairs is authorized to hold and use a portion of the funds derived from the public land trust for the betterment of the conditions of Native Hawaiians. Your Committee finds that Iolani Palace is a significant cultural asset for Native Hawaiians and their history, and funding from the public land trust for the repair and maintenance of the Palace fulfills the purpose of improving conditions for Native Hawaiians.

Being that the intent of this measure is to provide funding from the public land trust for the repair and maintenance of royal palaces with Native Hawaiian cultural and historic significance, your Committee has amended this measure by broadening its scope to include Queen Emma Summer Palace in Nuuanu Valley on Oahu and Hulihee Palace in Kailua-Kona on the Big Island. Your Committee notes that there are three palaces located in Hawaii, Iolani Palace, Queen Emma Summer Palace, and Hulihee Palace, which are all royal palaces with Native Hawaiian cultural significance. Your Committee also notes that, according to the testimony submitted by the Daughters of Hawaii, Hulihee Palace sustained damage due to the October, 2006, earthquake and is in need of repair and maintenance. Although the Daughters of Hawaii have requested and applied for federal emergency funding and have established a private fundraising campaign, supplemental funding will assist in covering the repair costs that are estimated in the hundreds of thousands of dollars.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 5, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 5, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 7 Economic Development and Taxation on S.B. No. 331

The purpose of this short form bill is to amend the law relating to electronic data and information.

Your Committee has amended this bill by:

- (1) Adding a findings and purpose section;
- (2) Adding a new section in Chapter 92, Hawaii Revised Statutes, prohibiting all governmental agencies of the State and county from displaying an individual's social security number in any record or document available for public inspection that is collected, created, or maintained by an agency; and
- (3) Appropriating an unspecified amount to the Office of the Auditor for research and support services necessary to develop additional deterrents for identity theft, and in particular, those related to the compromise of electronic data and information.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 331, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 331, S.D. 1, and be recommitted to the Committee on Economic Development and Taxation, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 8 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 842

The purpose of this measure is to promote and sustain agricultural endeavors in the State.

Specifically, the measure appropriates funds to the Hawaii Farm Bureau Federation to conduct agricultural research and development.

Testimony in support of this measure was submitted by the Department of Agriculture; College of Tropical Agriculture and Human Resources, University of Hawaii; Hawaii Farm Bureau Federation; Maui County Farm Bureau; Big Island Farm Bureau; Kauai County Farm Bureau; Hawaii Agriculture Research Center; Hawaii Crop Improvement Association; Hawaii Aquaculture Association; Alexander & Baldwin, Inc.; Hawaiian Commercial & Sugar Company; Kauai Coffee Company, Inc.; Hawaii Beekeepers' Association; and a private individual.

Agriculture research is essential to the success of diversified agriculture in Hawaii. The knowledge gained through research efforts helps producers boost their yields through informed choices about which crops and varieties to plant, when and where to plant them, how to protect them from pests, and how to optimize post-harvest quality. Agricultural research assists in increasing local food production, improving the State's food security, and assists Hawaii's producers to compete in local and export markets.

The Hawaii Farm Bureau Federation is a nonprofit organization that works to resolve the problems that many farmers, ranchers, and other agricultural producers face in Hawaii. The Bureau represents, protects, and advances the social, economic, and educational interests of Hawaii's agricultural sector. Your Committee finds that appropriating funds to the Hawaii Farm Bureau Federation will facilitate research that will support the continued expansion of diversified agriculture and help create new local, national, and international marketing opportunities for Hawaii agricultural goods.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 842 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1(Hee).

SCRep. 9 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 6

The purpose of this measure is to prohibit the sale or offering for sale of all Hawaiian species of edible `opihi, except when the `opihi shell is at least one and one-fourth inches in diameter and is used to make a curio or jewelry.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs, the Nature Conservancy, and five private individuals. The Department of Land and Natural Resources supported the interest of the measure with amendments. Testimony in opposition to this measure was submitted by Tamashiro Market, Inc., and Tanioka's Seafoods and Catering.

In recent years, the number of edible `opihi found in Hawaii has declined. The popularity of `opihi as a delicacy has led to overharvesting on the island of Oahu and has made `opihi difficult to find on the neighbor islands. Your Committee finds that prohibiting the sale or offer for sale of all Hawaiian species of edible `opihi will preserve the existing population of `opihi in Hawaii, foster future and larger populations of `opihi in Hawaii, and conserve this unique species that has a significant connection with Native Hawaiian history and culture.

Your Committee believes that the intent of this measure is to preserve the population of `opihi in Hawaii, and to recognize the cultural significance the `opihi has to Native Hawaiian history and culture.

Accordingly, your Committee notes that the Division of Aquatic Resources is currently gathering data on existing populations of all known Hawaiian `opihi species. Your Committee recognizes that this data will be valuable in establishing benchmarks for `opihi conservation efforts, which will be submitted to the Legislature by the end of the 2007 Regular Session.

Furthermore, your Committee notes that `opihi shells are used to make curios or jewelry, especially on the island of Niihau, and an exception for the use of `opihi shells in jewelry is already included in the measure. Your Committee recognizes the significance of gathering rights under the Hawaii Supreme Court case, *Public Access Shoreline Hawaii v. County of Hawaii County Planning Commission*, more commonly known as the "P.A.S.H. Decision," and the concerns that the residents of Niihau may have with respect to the sale prohibition provision in this measure.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 6 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Fukunaga).

SCRep. 10 Ways and Means on S.B. No. 139

The purpose of this measure is to clarify that the cigarette tax collected pursuant to section 245-15, Hawaii Revised Statutes, is to be assessed on a per cigarette basis and to ensure that the cigarette taxes collected are earmarked for each special fund through the year 2011 and beyond.

Testimony in support of this measure was submitted by the Emergency Medical Services Department of the City and County of Honolulu, the American Cancer Society Hawaii Pacific, Inc., Hawaii Pacific Health, Coalition for a Tobacco Free Hawaii, the Queen's Medical Center, American Heart Association of Hawaii, Healthcare Association of Hawaii, and two individuals.

Your Committee finds that clarification of Act 316, Session Laws of Hawaii 2006, is necessary to ensure that the cigarette tax is assessed on a per cigarette basis as the Legislature intended. Your Committee further finds that, since the cigarette tax was implemented in September 2006, the Department of Taxation has collected the tax on a per cigarette basis. It is the intent of your Committee to encourage the reduction of tobacco consumption by continuing the collection of cigarette tax revenues and ensuring that these revenues are properly administered and distributed as the Legislature intended.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 139, S.D. 1, and recommends that it pass Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 8. Noes, none. Excused, 3 (Chun Oakland, Hooser, Menor).

SCRep. 11 Tourism and Government Operations on S.B. No. 678

The purpose of this measure is to exempt from the general excise tax amounts received by the operator of the Hawaii Convention Center for reimbursement of costs or advances made pursuant to a contract with the Hawaii Tourism Authority.

Your Committee received testimony in support of this measure from the Hawaii Tourism Authority, Department of Business, Economic Development, and Tourism, and Department of Taxation. Comments were received from the Tax Foundation of Hawaii.

Existing law requires that the general excise tax be imposed upon amounts received from any source, unless exempted by statute. Thus, the operator of the Hawaii Convention Center, a private entity on contract with the Hawaii Tourism Authority, must pay the general excise tax for revenue it receives as part of its contract. The moneys are paid out of the Convention Center Enterprise Special Fund. Your Committee finds that the moneys paid in general excise taxes by the private contractor could otherwise be applied to the operation and marketing of the Hawaii Convention Center. The amount of general excise taxes paid in 2006 was \$700,000, according to testimony. This is a substantial sum of money that, in effect, amounts to taking money from one government source and putting it in another of the same kind.

The intent of this measure is to relieve the inequity of what amounts to the State taxing itself for its own operations. The situation is distinguishable from the situation wherein a private entity is contracted by the State for services that are not provided by the State.

Your Committee has amended this measure by making technical, nonsubstantive amendments for proper drafting form.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 678, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 678, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 12 Tourism and Government Operations on S.B. No. 868

The purpose of this measure is to prohibit an ex officio member of a board or commission from serving as chair of that board or commission.

Your Committee received no testimony on this measure.

Your Committee finds that an irreconcilable conflict of interest exists when an ex officio member of a board or commission, who is usually a department director, is also the chair of that board or commission. Your Committee believes that a board or commission should act independently of any department, and that having a department head as a board or commission chair serves to impede this independence.

Your Committee also finds that board or commission members who serve as interim appointees also should not serve as the chair of a board or commission, since doing so may disrupt the continuity and the efficient operation of the board or commission.

In light of this finding, your Committee has amended this measure by adding a prohibition for interim appointments to serve as chair or a board or commission.

Your Committee believes that the amended measure will ensure that boards and commissions are headed by a chair who is a permanent member.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 868, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 868, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, none.

SCRep. 13 Tourism and Government Operations on S.B. No. 750

The purpose of this measure is to ensure that vacation rentals and bed and breakfast establishments comply with the transient accommodation tax laws as well as other state and county laws and ordinances.

Specifically, the measure requires the Department of Taxation (DOTAX) to coordinate with the Hawaii Tourism Authority (HTA) and each respective county to identify owners of residential properties subject to the transient accommodations tax (TAT) who operate vacation rentals, where the owner does not reside on the property, and bed and breakfast establishments, where the owner resides on the property.

This measure also requires DOTAX to conduct audits of the owners of residential properties used for vacation rentals and bed and breakfast establishments, and to report annually to the Legislature on TAT revenues from such properties.

The organization, Keep it Kailua! testified in support of the measure. Your Committee received testimony in support of the intent of the measure from DOTAX, HTA, the City and County of Honolulu Department of Planning and Permitting, and one individual. Comments were received from the Tax Foundation of Hawaii.

Your Committee finds that vacation rentals and bed and breakfast establishments have long operated incognito from the oversight of government zoning, licensing, and taxation. The results have been detrimental to the well-being and economy of the State. This measure is an important step in implementing a means of identifying and keeping inventory of these illegal operations.

The intent of this measure is to level the playing field among furnishers of transient accommodations. Your Committee believes that it is inherently unfair for vacation rentals and bed and breakfasts to escape their responsibility to the counties and to the State.

Your Committee has amended this measure by:

- (1) Making a conforming statutory amendment to the HTA chapter to reflect its responsibility to cooperate with the DOTAX; and
- (2) Making other technical, nonsubstantive amendments for clarity and style.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 750, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 750, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 14 Tourism and Government Operations on S.B. No. 695

The purpose of this measure is to create a category of hunting license for a three-day period of hunting on a private or commercial shooting preserve.

Your Committee received testimony in support of this measure from the Department of Land and Natural Resources (DLNR), Hawaii Rifle Association, Lessons in Firearms Education, Arrow One Ranch LLC, Palawai Outfitters, Mauna Loa Outfitters LLC, Kaneohe Gun Shop, and five individuals.

Your Committee finds that hunting is a popular sport that has been undeveloped in Hawaii. Hunting game animals is a well-recognized sport on the Mainland and around the world. Nationwide, hunters are among the largest contributors of money and support toward the conservation and expansion of natural preserves and wildlife habitats.

Testimony indicated that many tourists are unaware of Hawaii's hunting game offerings, and may decide after arriving here that they want to spend a few days to hunt while here. However, this is not possible without a hunting license. Existing law requires a Hawaii hunting license for anyone to hunt, even if a person possesses a valid hunting license in another state. As a prerequisite for obtaining a hunting license, a person must possess a valid hunter education certificate under section 183D-18, Hawaii Revised Statutes. Thus, it is nearly impossible for a tourist to hunt in Hawaii without laborious pre-planning.

Your Committee is cognizant about the safety issues concerning hunting tourism. However, most tourists who want to hunt engage the services of a licensed hunting guide under section 183D-25.5, Hawaii Revised Statutes. Hunting guides testified that safety is their utmost and primary concern.

Your Committee has amended this measure on the recommendation of the DLNR by:

- (1) Providing for a fee of \$95 for a seven-day license, rather than a three-day license for \$50; and
- (2) Allowing the DLNR to set a fee for private and commercial shooting preserve and farmers' licenses, to be deposited into the wildlife revolving fund.

Your Committee believes that this measure, as amended, will encourage tourists to visit Hawaii and will provide revenues through hunting activities that will bolster the State's ability to protect additional natural habitats, and therefore sustain the beauty of our State. Testimony indicated that there are established businesses that cater to tourists who desire to hunt while in Hawaii. This measure would facilitate the development of hunting tourism.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 695, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 695, S.D. 1, and be referred to the Committee on Water, Land, Agriculture, and Hawaiian Affairs.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 15 Tourism and Government Operations on S.B. No. 779

The purpose of this measure is to authorize the State Fire Council to employ an administrator and an administrative assistant, and to specify the duties of the administrator.

Your Committee received testimony in support of this measure from the State Fire Council, Honolulu Fire Department, Hawaii Fire Department, and Kauai Fire Department.

Section 132-16, Hawaii Revised Statutes, establishes the State Fire Council, which consists of the fire chiefs of the counties. The functions of the State Fire Council are to adopt the State Fire Code, and to coordinate applications to the federal government for federal grant assistance for fire-related projects and to administer those grants. The State Fire Council also undertakes a myriad of other fire-prevention duties, including fire inspection and prevention.

Existing law does not provide for an administrator for the State Fire Council. Your Committee finds that an administrator is needed to assist the council with its operations to enhance the effectiveness and efficiency of the council.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 779 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, none.

SCRep. 16 (Joint) Intergovernmental and Military Affairs and Education on S.B. No. 618

The purpose of this measure is to direct the Department of Education to establish a program to grant high school diplomas to veterans of the armed services who could not complete their high school education due to compulsory service in the armed services of the United States during World War II, the Korean Conflict, and the Vietnam War, as well as those who did not complete high school because of wartime practices.

Testimony in support of the measure was submitted by the Department of Education, the Office of Veteran Services, the Advisory Board on Veteran Services, the Hawaii National Guard Association, the Hawaii National Guard Enlisted Association, the National Guard Association of Hawaii Insurance Trust, and the Chamber of Commerce of Hawaii,

Your Committees believe that the offer of high school diplomas should be made to those persons who were drafted and unable to complete their high school education as well as Japanese Americans who were relocated to internment camps on the mainland during World War II and not allowed to finish high school.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 618 and recommend that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 4 (Hee, Nishihara, Taniguchi, Hemmings).

SCRep. 17 (Joint) Intergovernmental and Military Affairs and Education on S.B. No. 640

The purpose of this measure is to ensure that social workers are properly trained to deal with the long-term needs of major natural disaster victims.

Specifically, the measure appropriates funds for the continuation of the University of Hawaii School of Social Work's long-term case management training program to benefit victims of major natural disasters, including expansion of the program to the entire State, focusing on utilizing the University of Hawaii's campuses on the neighbor islands of Kauai, Maui, and Hawaii as training sites.

Testimony in support of the measure was submitted by the State of Hawaii Department of Defense, the University of Hawaii at Manoa, the American Red Cross Hawaii State Chapter, and two private individuals.

Your Committees find that as a result of the number of major natural disasters that have occurred globally in the past year and the difficulties that arose in providing a swift, appropriate, and effective response to the victims of those events, the United States Federal Emergency Management Agency began to identify gaps in its response system. Among other things, the agency noted that recovery from major natural disasters takes much longer than anyone had ever anticipated.

Your Committees further find that there is virtually no established system in the State of Hawaii that provides long-term case management services to victims that identifies the ongoing needs of the affected communities, and that develops, coordinates, and distributes resources to meet those needs.

Your Committees also find that this measure provides funding for a much needed long-term case management training program to local caseworkers through the University of Hawaii's School of Social Work in order to address the on-going needs of victims of major natural disasters throughout the State of Hawaii.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 640 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 4 (Hee, Nishihara, Taniguchi, Hemmings).

SCRep. 18 Transportation and International Affairs on S.B. No. 523

The purpose of this short form measure is to amend the law relating to transportation.

Your Committee has amended this measure by replacing its contents with language that provides for biofuel storage and transmission infrastructure.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 523, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 523, S.D. 1, and be recommitted to the Committee on Transportation and International Affairs, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Tsutsui).

SCRep. 19 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 162

The purpose of this measure is to exempt Iolani Palace from the standards and conditions related to the receipt of funds under chapter 42F, Hawaii Revised Statutes.

Testimony in support of this measure was submitted by the Friends of Iolani Palace; the Association of the Hawaiian Civic Clubs; and the Oahu Council, Association of the Hawaiian Civic Clubs. Testimony in opposition was submitted by the Department of Land and Natural Resources.

Iolani Palace is a historic treasure and the only official state residence of royalty in the United States. During the monarchy period, the Palace was the center of social and political activity in the Kingdom of Hawaii. The Palace relies heavily upon private donations and small state subsidies to cover its operation, repair, and preservation costs. Your Committee finds that providing an exemption for Iolani Palace from the

standards and conditions under chapter 42F, Hawaii Revised Statutes, relating to the receipt of funds, will provide relief in the financial operations and budget of the Palace. Furthermore, the exemption will provide the Palace the same relief that is granted for the Bernice Pauahi Bishop Museum under section 6E-40, Hawaii Revised Statutes.

The intent of this measure is to recognize the historic significance of Iolani Palace. This type of exemption will enable the Friends of Iolani Palace to preserve, restore, interpret, and share the sacred, cultural, and historic significance of the Palace for future generations.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 162 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Slom).

SCRep. 20 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 845

The purpose of this measure is to ensure that irrigation systems on the Island of Hawaii are properly maintained and remain operational.

The measure accomplishes this purpose by:

- (1) Providing funds for improvements to both the Lower Hamakua irrigation ditch system and the Waimea irrigation ditch system on the island of Hawaii; and
- (2) Reimbursing the irrigation system revolving fund for the expenses incurred as a result of the October, 2006, earthquake.

Testimony in support of this measure was submitted by the Department of Agriculture, Hawaii Farm Bureau Federation, Big Island Farm Bureau, Hawaii Crop Improvement Association, J & D Farm, and the Dean of the University of Hawaii College of Tropical Agriculture and Human Resources.

Water is essential to agricultural production. Irrigation systems that were developed to support plantation agriculture continue to remain vital to many of Hawaii's diversified farms. Big Island growers who use water from the Lower Hamakua irrigation ditch system and the Waimea irrigation ditch system continue to be negatively impacted by damage to those systems caused by the October, 2006, earthquake. As a result of the earthquake, the Department of Agriculture used funds from the Irrigation System Revolving Fund to pay for expenses, including the costs of hiring personnel for earthquake damage assessment, contractors, pumping, materials, supplies, and equipment.

The Lower Hamakua irrigation ditch system and the Waimea irrigation ditch system sustained damage as a result of the earthquake. Currently, the movement of water through these damaged irrigation systems is made possible by temporary repairs that must be replaced with more permanent repairs if the systems are to return to full capacity. Your Committee finds that funding for repair and maintenance of the Lower Hamakua and Waimea irrigation ditch systems will provide growers with reliable sources of irrigation water. Your Committee further finds that the Irrigation System Revolving Fund needs to be reimbursed so that funds will continue to be available for the repair and maintenance of Hawaii's irrigation systems.

Your Committee believes that this measure will support the continued expansion of diversified agriculture in the State and provide the necessary funding for the repair and maintenance of irrigation systems, which Hawaii farmers heavily rely upon for their agricultural productivity, fulfills this purpose.

Your Committee has amended this measure by:

- (1) Combining sections 2 and 3 for a combined appropriation for the repair and maintenance of both the Lower Hamakua and Waimea irrigation ditch systems on the Big Island;
- (2) Changing the blank appropriation amount for the repair and maintenance of the irrigation systems to a sum of \$3,500,000;
- (3) Changing the blank appropriation amount for deposit into the irrigation system revolving fund to a sum of \$150,000; and
- (4) Making technical, nonsubstantive changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 845, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 845, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 21 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 844

The purpose of this measure is to support the important efforts of the Hawaii 2050 Sustainability Task Force by appropriating funds for the development of the Hawaii 2050 Sustainability Plan.

Testimony in support of this measure was submitted by the Office of the Auditor; the Office of Planning; the Office of Hawaiian Affairs; the Association of Hawaiian Civic Clubs; the Hawaii Farm Bureau Federation; three members from the Hawaii 2050 Sustainability Task Force; and five private individuals.

A lot has changed in the three decades since the first Hawaii State Plan was established, including population growth and aging, technological advances, geopolitical circumstances, and social and environmental challenges. In light of these local, regional, and global changes, and to better define and implement state goals, objectives, policies, and priority guidelines, the Legislature adopted Act 8, Special Session Laws of Hawaii 2005, which created the Hawaii 2050 Sustainability Task Force to review the Hawaii State Plan and the State's planning process. Furthermore, the Office of the Auditor is required to submit to the Legislature the Hawaii 2050 Sustainability Plan.

The Hawaii 2050 Sustainability Plan will provide a framework for addressing vital quality-of-life and public policy issues, including land and water use, energy, public infrastructure, economic development, transportation, education, the arts, and health, and provide strategies to meet the needs of Hawaii's residents now and in the future. The Sustainability Plan requires a tremendous amount of time, energy, and resources, however,

the members of the Task Force are committed to providing a plan that will create a sustainable vision for Hawaii, and engage the community to ensure that sustainability goals and objectives are met.

Your Committee finds that the Hawaii 2050 Sustainability Plan will be an important tool and guiding force for the State and that community engagement is vital for the development, implementation, and longevity of the plan. Therefore, an appropriation of additional funds will assist the Hawaii 2050 Sustainability Task Force and the Office of the Auditor in planning additional community engagement and public education activities statewide, continuing its website and public awareness programs, conducting large conferences, and drafting, finalizing, and disseminating the Hawaii 2050 Sustainability Plan, which will be submitted to the Legislature prior to the 2008 Regular Session.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 844 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Slom).

SCRep. 22 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 937

The purpose of this measure is to support the revitalization of the Hawaiian language and appropriate funds to Ke Kula 'O Nawahiokalani'opu'u Iki Laboratory Public Charter School for the construction and maintenance of school facilities and other educational program needs.

Testimony in support of this measure was submitted by the University of Hawaii; Ka Haka 'Ula O Ke'elikolani College of Hawaiian Language, University of Hawaii at Hilo; the Charter School Administrative Office; the Office of Hawaiian Affairs; and seven private individuals with the support from student teachers of the University of Hawaii at Manoa Ho'okulaiwi: 'Aha Ho'ona'auao 'Oiwī (proposed Center for Native Hawaiian and Indigenous Education).

Ke Kula 'O Nawahiokalani'opu'u Iki Laboratory Public Charter School is a P-12 school, which is attached to the Ka Haka 'Ula O Ke'elikolani College of Hawaiian Language, and teaches a college curriculum to students who are primarily from lower economic backgrounds on the island of Hawaii. The charter school has been recognized as a national and international model of excellence in education through an indigenous language, and has a one hundred per cent high school graduation rate and an eighty per cent college attendance rate. Currently, the existing school facilities have become inadequate to support the school's growing enrollment of students. Your Committees find that appropriating funds for the construction and maintenance of school facilities will enable the faculty and staff to focus their energies on the important tasks of developing teaching models and curriculum.

The intent of this measure is to provide support in the preservation and perpetuation of the Hawaiian language. Supporting the education and training of Hawaiian-speaking children by providing proper learning facilities ensures that the Hawaiian language will continue to remain vibrant for future generations.

Your Committees have amended this measure by:

- (1) Referring to the charter school by its proper and full name, Ke Kula 'O Nawahiokalani'opu'u Iki Laboratory Public Charter School; and
- (2) Making technical and nonsubstantive amendments for the purposes of style and consistency.

Your Committees recognize and note that in 2006, the Legislature passed Act 298, Session Laws of Hawaii 2006, which bases the funding and financing of charter schools on: (1) actual and projected enrollment figures in the current school year for each charter school; (2) a per-pupil amount for each regular education and special education student; and (3) fringe benefit costs. Currently, there are twenty-seven total charter schools in Hawaii. Before considering the specific funding needs for one charter school, all of the charter schools must be considered as a whole. Your Committees believe this merits further discussion by the Committee on Ways and Means.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 937, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 937, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 23 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 847

The purpose of this measure is to assist in the planning and implementing of a long range plan that will help Hawaii's agricultural industry achieve self-sufficiency during times of drought.

The measure accomplishes this purpose by appropriating funds to each county to adequately implement drought mitigation strategies and plans.

Testimony in support of this measure was submitted by the Department of Agriculture, the Department of Land and Natural Resources, the Hawaii Farm Bureau Federation, and the Maui County Farm Bureau.

The effects of droughts can be devastating for Hawaii agricultural producers. Droughts can last for years and during that time, crop yields can fall dramatically and farms can close. In addition to agriculture and livestock industries, droughts affect water supply, commerce, the environment, and public health.

The Hawaii Drought Plan and the County Drought Mitigation Strategies identify and recommend the implementation of drought mitigation actions, subject to available funding. These drought mitigation strategies were developed in consultation with key stakeholders who participated as representative members on each respective local county drought committees. The county committees identified and prioritized projects to help reduce the impact of droughts in their communities. Your Committee finds that an appropriation of funds will signal the importance of these projects and assist in the implementation of the drought strategies and plans in each county.

Your Committee has amended this measure by:

- (1) Deleting the total dollar amount and leaving it blank for the Senate Committee on Ways and Means to determine;

- (2) Identifying each county for a separate appropriation, and leaving each dollar amount blank for the Senate Committee on Ways and Means to determine; and
- (3) Making technical, nonsubstantive changes for the purposes of style and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 847, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 847, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 24 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1127

The purpose of this measure is to promote the knowledge and practices of sciences as they existed prior to Western contact in Hawaii by appropriating funds for the development of a traditional science curriculum and standards relating to pre-western contact Hawaii.

Testimony in support of this measure was submitted by the Department of Education.

Contemporary science curriculums taught in schools focus on theories and practices of modern and Western societies. By adhering to traditional Native Hawaiian knowledge and practices, Native Hawaiian societies prior to 1778 Western contact lived in a more harmonious and symbiotic relationship with their environments than contemporary societies. The modern day science curriculum, however, tends to ignore the traditional knowledge and practices.

The traditional Native Hawaiian knowledge and practices are still pertinent today, as the crews of the many successful Hokule'a voyages have proven. Your Committee finds that appropriating funds for the development of a traditional science curriculum and standards relating to pre-western contact Hawaii will accomplish the intent of this measure, which is to promote the Native Hawaiian knowledge and practice of the sciences in Hawaii's schools. Developing a pre-western contact science curriculum will ensure that Native Hawaiians traditional knowledge and practices are not lost, and will be preserved and available for future generations to learn and practice.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1127 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Slom).

SCRep. 25 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1308

The purpose of this measure is to augment financing opportunities for agricultural and aquacultural ventures in the State.

The measure accomplishes this purpose by strengthening the aquaculture loan program under chapter 219, Hawaii Revised Statutes, by creating parity with the agriculture loan program, and combining the revolving and reserve funds of each program together to provide flexibility in funding.

Testimony in support of this measure was submitted by the Department of Agriculture, the Hawaii Agriculture Research Center, the Hawaii Aquaculture Association, and Aquatic Innovations.

The aquaculture industry has recently undergone tremendous growth. Between the years of 2000 and 2006, the industry grew twenty-seven per cent with an increase from \$22,170,000 to \$28,400,000. Aquaculture operations range from small scale ornamental fish operations to open ocean cage cultures, which can be tremendously capital intensive. These industries make available to the public fresh, locally-grown seafood, while diversifying the State's economy and providing employment opportunities. While the demand for aquaculture production is rising, aquacultural producers are also faced with the rising costs of aquaculture facilities, operating inputs, and transportation expenses.

Your Committee finds that strengthening the aquaculture loan program by creating parity with the agriculture loan program and creating more flexibility in funding will enable aquacultural producers to better compete on local and global levels. Increasing loan limits for aquacultural operations will provide additional funding for larger scale operations at a level similar to the agricultural loan program. The use of one revolving and one reserve fund and the combining of expenditure ceilings will enable the Department of Agriculture to assist both the agricultural and aquacultural industries by providing proper funding in a timelier manner without the need to increase the expenditure ceilings of each fund or transferring moneys between the funds.

The intent of this measure is to assist in establishing stronger and more efficient aquaculture operations, and thereby expanding the State's economy. Strengthening the aquaculture loan program will encourage the development of new aquaculture operations and increasing loan limits will aid in the expansion of existing aquacultural operations.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1308 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 26 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 840

The purpose of this measure is to perpetuate the cultural heritage and unique lifestyle of the residents of Kalapana by authorizing the Department of Land and Natural Resources, subject to specific criteria and priority requirements, to award leases for the remaining nineteen lots at Kikala-Keokea.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, and the Office of Hawaiian Affairs.

The unique way of life of the Native Hawaiian residents of Kalapana was disrupted by volcanic eruptions and lava flows that began on January 3, 1983, which destroyed one of the last Native Hawaiian settlements on the island of Hawaii. The Legislature enacted Act 314, Session Laws of Hawaii 1991 (Act 314), to provide relief to the displaced residents of Kalapana by authorizing the Department of Land and Natural Resources to

negotiate long-term leases with qualified, displaced Kalapana families so that they could continue to maintain their heritage and unique way of life in the Kikala-Keokea homestead area, adjacent to the Kalapana-Kapoho Beach Road.

Your Committee finds that, prior to the sunset date of Act 314, the Department of Land and Natural Resources entered into lease agreements with forty-eight qualified and eligible families, but there were still nineteen remaining lots that were not leased after Act 314 expired. Authorizing the Department of Land and Natural Resources to award leases for the remaining nineteen lots at Kikala-Keokea will fulfill the intent of this measure which is to recognize and perpetuate the unique cultural lifestyle of the area residents of Kalapana.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 840 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Slom).

SCRep. 27 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 950

The purpose of this measure is to establish kalo, or taro, as the official state plant of Hawaii.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs; Association of Hawaiian Civic Clubs; Oahu Council, Association of the Hawaiian Civic Clubs, and a private individual.

Taro is sacred to Native Hawaiians and is an integral part of the Native Hawaiian culture. Taro is a culturally significant plant to the kanaka maoli, Hawaii's indigenous people. According to the kumulipo, the Hawaiian creation chant, Hawaiian genealogy emerges from the kalo plant. Taro holds great cultural, religious, and historic meaning to Native Hawaiians and is highly respected and revered. Your Committee finds that establishing the kalo plant as the official state plant will ensure continued respect for this sacred ancestor of the Native Hawaiian people.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 950 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Slom).

SCRep. 28 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 958

The purpose of this measure is to create a ten-year moratorium on testing, propagating, cultivating, raising, and growing of genetically modified taro in Hawaii.

Testimony in support of the measure was submitted by a Councilmember, Kauai County Council; Hawaii Organic Farmers Association; KAHEA: The Hawaiian-Environmental Alliance; Kauai Taro Growers Association; Kako`o Oiwi; over fifty-five private individuals; a petition from Maui with sixty-seven signatures; and a petition from Kauai with over eight hundred signatures. Testimony in opposition to the measure was submitted by the Department of Health; University of Hawaii; College of Tropical Agriculture and Human Resources, University of Hawaii; Hawaii Coffee Association; Hawaii Science and Technology Council; Hawaii Crop Improvement Association; Hawaii Papaya Industry Association; and four private individuals. The Department of Agriculture submitted comments.

Taro is sacred to Native Hawaiians and is an integral part of the Native Hawaiian culture. Taro is a culturally significant plant to the kanaka maoli, Hawaii's indigenous people. According to the kumulipo, the Hawaiian creation chant, Hawaiian genealogy emerges from the kalo plant. Taro holds great cultural, religious, and historic meaning to Native Hawaiians and is highly respected and revered.

Your Committee heard overwhelming testimony from farmers, interest groups, and private individuals who were all against genetically modified taro due to their concerns that genetically modified taro will destroy the genetic strains of native taro species, and is disrespectful of the cultural foundation taro holds for Native Hawaiians, their culture, and their religious practices. Furthermore, questions exist regarding the possible health, environmental, economic, and cultural impacts of genetically modified taro. Thus, your Committee finds that creating a ten-year moratorium on testing, cultivating, and growing genetically modified taro in Hawaii will provide sufficient time to address the numerous concerns raised by genetically modified taro experiments.

Your Committee, however, recognizes that there are many lethal insects and diseases of taro that occur in the Pacific that can cause wide spread agricultural and financial losses for taro farmers. The Department of Agriculture (Department) testified that due to the Plant Protection Act of 2000, the Department is no longer able to inspect taro from Asia and the Pacific that may carry pests and diseases, which may cause infestation or disease in Hawaii taro patches. Furthermore, the Department points out that Customs and Border Protection under the Department of Homeland Security replaced the United States Department of Agriculture agents and now conducts inspections of plant products from foreign countries, thus, leaving the passenger and baggage pathway more vulnerable to unwanted plant pests and diseases. Your Committee notes that the Hawaii Farm Bureau Federation has submitted a draft report regarding genetically modified organisms to the Department of Agriculture for finalization and is looking forward to the report's findings and recommendations for further guidance on this issue.

Your Committee has amended this measure by:

- (1) Deleting section 1 of the measure and replacing it with specific language to emphasize the cultural significance that taro holds in Native Hawaiian culture, religion, and history; and
- (2) Including "developing" as one of the actions that is prohibited during the ten-year moratorium.

Your Committee believes that the amended measure will address the overwhelming Native Hawaiian cultural concerns that genetically modified taro poses. While genetic engineering may arguably serve as a tool to improve or protect agricultural crops, it is still prudent to respect and preserve the integrity and purity of the various varieties of taro grown in Hawaii.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 958, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 958, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Fukunaga).

SCRep. 29 Energy and Environment on S.B. No. 993

The purpose of this measure is to protect public interests by lessening the State's dependency on fossil fuels and encouraging the development of renewable energy systems.

The measure accomplishes this purpose by authorizing the issuance of \$20,000,000 in special purpose revenue bonds to assist Honolulu Seawater Air Conditioning, LLC., in the financing of a seawater air conditioning district cooling system in downtown Honolulu.

Your Committee received testimony in support of this measure from Honolulu Seawater Air Conditioning, LLC., Enterprise Honolulu, World Business Academy, Hawaii Renewable Energy Alliance, and the Hawaii Science and Technology Council.

Your Committee finds that the use of alternative energy production will promote the State's goal of lessening its dependence on fossil fuels. Your Committee further finds that encouraging the development of seawater air conditioning cooling systems will reduce fossil fuel dependency and ozone-depleting greenhouse gases by replacing traditional high power consuming technologies with a more efficient alternative.

Your Committee believes that the issuance of special purpose revenue bonds will make the development of these systems more economically feasible and will reduce and stabilize cooling costs for its consumers.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 993 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Ihara, Kokubun).

SCRep. 30 Energy and Environment on S.B. No. 994

The purpose of this measure is to lessen the State's dependency on fossil fuels.

The measure accomplishes this purpose by including seawater district cooling systems in the definition of "qualified business" for the purpose of state enterprise zone benefits.

Your Committee received testimony in support of this measure from the Department of Business, Economic Development and Tourism, Honolulu Seawater Air Conditioning, LLC., Enterprise Honolulu, University of Hawaii at Manoa- Environmental Center, and the World Business Academy. The Department of Taxation submitted comments regarding this measure.

Your Committee finds that the use of alternative energy production will promote the State's goal of lessening its dependence on fossil fuels. Your Committee further finds that encouraging the use of seawater air conditioning cooling systems will reduce fossil fuel dependency and ozone-depleting greenhouse gases by replacing the traditional high power consuming technologies with a more efficient alternative.

Your Committee believes that providing enterprise zone benefits will effectively reduce the costs of seawater district cooling systems, which in turn will encourage its use by developers and customers, and consequently fulfill the intent of the measure to lessen the State's dependence on fossil fuels.

Your Committee received a fiscal impact statement from the Department of Taxation that provided that this measure will result in a revenue loss to the State of approximately \$450,000. However, this statement did not specify how the fiscal impact was calculated or whether the stated amount was calculated as a one-time fuel impact or on an annual basis.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 994 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Ihara, Kokubun).

SCRep. 31 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1531

The purpose of this measure is to ensure Native Hawaiian cultural representation on matters relating to marine and coastal zone managements by requiring the Director of the Office of Planning to appoint one member on the Marine and Coastal Zone Advocacy Council from a list of three nominees submitted by the Office of Hawaiian Affairs.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs, the Native Hawaiian Legal Corporation, and three private individuals. Testimony in opposition to this measure was submitted by the Office of Planning.

The coastal zone management program under section 205A-2, Hawaii Revised Statutes, was established to manage, promote, preserve, and protect the State's marine, coastal, and surrounding recreational areas. The program focuses on Hawaii's ecosystem as a whole rather than on the individual species, resources, or uses, thus, the objectives and policies of the program have broad implications. The Marine and Coastal Zone Advocacy Council provides the Office of Planning advice regarding marine and coastal zone management, planning, coordination, and facilitation of the functions of the coastal zone management program. The Council balances the various interests involving coastal zone management to ensure that its advice to the Office of Planning is systemic in content. However, the Office's decisions concerning the management of coastal zone resources can have a direct effect on traditional Native Hawaiian cultural traditions, practices, and beliefs. Your Committee finds that traditional Native Hawaiian coastal and ocean usage and practices need to be taken into consideration and represented on the Marine and Coastal Zone Advocacy Council.

Your Committee notes that the Office of Planning indicated in its written testimony that the Office has strongly supported Native Hawaiian interests in the coastal zone management program initiatives. The Office commits staff and fiscal resources to projects; invites and assures the participation of Native Hawaiian organizations in meetings and workshops on coastal zone management and ocean resources management plan matters; and co-sponsors with the Office of Hawaiian Affairs workshops to promote dialogues with kupuna on the subject of a moku management framework for planning and managing ocean and coastal resources. Furthermore, the Office points out that, in addition to Native Hawaiian interests, the coastal zone management program is required to recognize, observe, protect, and balance other interests such as business, the environment, terrestrial and marine commerce, recreation, research, and tourism. Thus, the Office of Planning is concerned that allowing the

Office of Hawaiian Affairs to designate a member on the Marine and Coastal Zone Advocacy Council may have an unintended effect and inference of providing a preference to one interest over the other interests that the Council must balance for efficient operation.

Accordingly, your Committee has amended this measure by:

- (1) Deleting language that requires the Director of the Office of Planning to appoint one member of the Marine and Coastal Zone Advocacy Council from a list of three nominees submitted by the Office of Hawaiian Affairs, and replacing it with specific language that requires at least one member on the Marine and Coastal Zone Advocacy Council to have substantial experience and expertise in traditional Native Hawaiian coastal and ocean usage and practices; and
- (2) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

Your Committee believes that the amended measure fulfills the intent of the measure to provide and ensure the observation and consideration of Native Hawaiian traditional and cultural coastal and ocean uses and practices on the Marine and Coastal Zone Advocacy Council.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1531, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1531, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Slom).

SCRep. 32 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 546

The purpose of this short form measure is to amend the law relating to land use.

Your Committee has amended this measure by replacing its contents with language that:

- (1) Changes the minimum residential lot size from one-half acre to one acre in a rural district;
- (2) Establishes a minimum residential lot size of five acres in an agricultural district; and
- (3) Allows for the clustering of dwelling units in both districts; provided that the maximum density limitation for each respective type of district is not diminished.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 546, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 546, S.D. 1, and be recommitted to the Committee on Water, Land, Agriculture, and Hawaiian Affairs, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 33 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 561

The purpose of this short form measure is to amend the law relating to water.

Your Committee has amended this measure by replacing its contents with language that requires private entities that furnish water used for agricultural purposes in an area zoned for agricultural use to establish a water rate structure for agricultural use that is comparable to the rate structure used by the respective local county board of water supply.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 561, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 561, S.D. 1, and be recommitted to the Committee on Water, Land, Agriculture, and Hawaiian Affairs, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 34 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1877

The purpose of this short form measure is to amend the law relating to important agricultural lands.

Your Committee has amended this measure by replacing its contents with language that:

- (1) Exempts owners of real property designated as important agricultural lands from paying real property taxes, and makes an appropriation to the counties to offset any revenues lost as a result of exempting land owners of important agricultural lands from real property taxation; and
- (2) Allows farmers to develop, construct, and maintain dwelling units for farmers, employees, and their families on lands designated as important agricultural lands; provided that the farmer complies with certain conditions.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1877, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1877, S.D. 1, and be recommitted to the Committee on Water, Land, Agriculture, and Hawaiian Affairs, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 35 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 848

The purpose of this measure is to address the potential crisis that is developing at the East Kauai irrigation system by appropriating funds to cover operation and maintenance expenses of the irrigation system.

Testimony in support of this measure was submitted by the Agribusiness Development Corporation; the Department of Water, County of Kauai; East Kauai Water Users' Cooperative; Hawaii Farm Bureau Federation; Kauai County Farm Bureau; Hawaii Crop Improvement Association; and Saiva Siddhanta Church.

The East Kauai irrigation system is the only system in the State that is run by the community. In 2001, Amfac Sugar Company announced that it was ceasing operations of its ditch system, which irrigated four thousand acres of land in the Kapaa area. The East Kauai Water Users' Cooperative received a revocable permit from the State to operate the East Kauai irrigation system and took over operations in 2002.

Currently, the East Kauai Water Users' Cooperative faces a serious funding shortfall to cover operation and maintenance expenses. Large portions of the land served by the ditch remain fallow or are occupied by ranchers or farmers who have only begun to develop the land. The income generated from users is insufficient to cover the normal operations and maintenance expenses of the irrigation system. Your Committee finds that appropriating funds for the operation and maintenance of the East Kauai irrigation system will allow the irrigation system to continue to provide water for agricultural producers and its other users.

Your Committee has amended this measure by:

- (1) Adopting the suggestion made by the Agribusiness Development Corporation and adding language to clarify that the East Kauai Water Users' Cooperative will receive funds for the operation and maintenance of the East Kauai irrigation system, and the amounts received will not supplant any other funds appropriated to the Cooperative; and
- (2) Making technical, nonsubstantive changes for the purposes of style and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 848, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 848, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 36 Intergovernmental and Military Affairs on S.B. No. 804

The purpose of this measure is to create a special fund to reimburse service members of the Hawaii National Guard and Hawaii National Guard Reserves for premiums paid under service members' group life insurance policies while service members are deployed on active duty to a war zone.

Your Committee received testimony in support of this measure from the State of Hawaii Department of Defense, the Hawaii National Guard Enlisted Association, the Hawaii National Guard Association, the National Guard Association of Hawaii Insurance Trust, and the Armed Services Committee of the Chamber of Commerce of Hawaii.

Testimony in opposition to this measure was submitted by the Department of Budget and Finance.

Your Committee finds that members of Hawaii's National Guard and National Guard Reserves make many sacrifices for the people of Hawaii and the United States. The intent of this measure is to provide reimbursement for premiums paid for group life insurance by service members of the Hawaii National Guard and Hawaii National Guard Reserves who are deployed to a war zone.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 804 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 37 Transportation and International Affairs on S.B. No. 1034

The purpose of this measure is to exempt common carriers from the general excise and use taxes for fuel sold from a foreign trade zone to common carriers for use in intrastate transportation.

Your Committee received testimony in support of this measure from the Department of Business, Economic Development, and Tourism, Aloha Airlines, The Chamber of Commerce of Hawaii, Transport Workers Union, Aloha Airlines Pilots' Union, International Association of Machinists and Aerospace Workers District 141, Hawaiian Airlines and the Hawaii Fueling Facilities Corporation. Comments were received from the Department of Taxation and Tax Foundation of Hawaii.

Your Committee finds that a healthy inter-island airline industry is vital to the State's economy. Hawaii's inter-island airlines continue to face severe financial challenges. Fuel costs in particular have skyrocketed and grown volatile in recent years. In fact, for most airlines, the cost of fuel has surpassed labor as the highest operating cost factor.

The intent of this measure is to level the playing field and create a fairer market for all airlines. Sales of fuel sold from a foreign-trade zone for use by airlines traveling out of the State of Hawaii are exempt from general excise and use taxes. However, intrastate flights are not exempt. To the extent that the Hawaii general excise and use taxes apply to intrastate flights, these taxes only exacerbate the problem for Hawaii airlines. Your Committee received a fiscal impact statement from the Department of Taxation on a revenue loss of \$12.3 million annually. The Department did not submit the methodology by which the fiscal impact was calculated.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1034 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Tsutsui).

SCRep. 38 Intergovernmental and Military Affairs on S.B. No. 1500

The purpose of this measure is to make an emergency appropriation of \$4,500,000 to the Department of Taxation to address unbudgeted expenses incurred by the Department in implementing the administration of the county surcharge on the State's General Excise Tax provided for under section 46-16.8, Hawaii Revised Statutes.

Testimony in support of the measure was submitted by the State of Hawaii Department of Taxation, and the City and County of Honolulu Department of Budget and Fiscal Services.

Your Committee finds that it is necessary to increase the appropriation to the Department of Taxation from \$4,500,000 to \$5,000,000 in order for it to fulfill its obligations with the tax collection system software vendor and to cover expenses related to the administration and collection of the county surcharge on the State's General Excise Tax.

Your Committee further finds that this emergency appropriation is necessary and in the best interest of the public to assure that the City and County of Honolulu's county surcharge on the State's General Excise Tax is not adversely impacted. An adverse impact could ultimately affect the funding of the City and County of Honolulu's mass transit project, including the ability of the City and County of Honolulu to obtain federal funding for the mass transit project. Failure to provide this emergency appropriation will also result in the City and County of Honolulu surrendering its guarantee for these costs.

In light of these findings your Committee has amended the measure by increasing the amount appropriated from \$4,500,000 to \$5,000,000.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1500, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1500, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 39 Transportation and International Affairs on S.B. No. 1677

The purpose of this measure is to provide effective, efficient responses to incidents, special events, and roadway construction to ensure the smooth flow of traffic on the island of Maui.

Specifically, this measure appropriates funds for the design of a Maui traffic control center.

No testimony was received on this measure.

Your Committee finds that on Maui, traffic across the island is routinely backlogged during morning and afternoon rush hours as a result of roadway maintenance and improvements and when there are traffic accidents or special events. Other examples of commuter traffic backlogs occur in areas such as Paia town where Hana Highway meets Baldwin Avenue, the Piilani Highway corridor from Kihei to Wailea, and in Lahaina town where Lahainaluna Road meets Honoapiilani Highway. A traffic control center for the island of Maui would inform drivers, maximize traffic flow, and enhance public safety.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1677 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Hooser, Taniguchi, Tsutsui).

SCRep. 40 Transportation and International Affairs on S.B. No. 1514

The purpose of this measure is to transfer \$36.4 million from the general fund to the State Highway Fund in each of the fiscal years 2007-2008 and 2008-2009, and to appropriate those moneys for state highway improvements.

Your Committee received testimony in support of this measure from the Department of Transportation (DOT) and Hawaii Transportation Association.

This measure provides funding to the DOT to continue to operate, maintain, and construct the state highway system, and to continue to improve road quality. Specifically, the transfers will provide the means for the State Highways Division to implement special maintenance projects to catch up on deferred maintenance in the 2007-2008 and 2008-2009 biennium period. In addition, the transfers allow the DOT to pull down federal matching funds, if any, as applicable.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1514 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Hooser, Taniguchi, Tsutsui).

SCRep. 41 Ways and Means on S.B. No. 149

The purpose of this measure is to authorize the issuance of general obligation bonds and determine whether the issuance of the bonds will cause the State's debt limit to be exceeded.

Your Committee finds that:

- (1) The measure will authorize the financing of project appropriations contained in acts of the Legislature for which the means of funding are designated as general obligation bond funds or reimbursable general obligation bond funds; and
- (2) Issuance of the bonds authorized will not cause the State's constitutional debt limit to be exceeded.

The Department of Budget and Finance and the Hawaii State Teachers Association submitted testimony in support of this measure.

Your Committee has amended this measure by making technical nonsubstantive corrections.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 149, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 149, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 8. Noes, none. Excused, 3 (Chun Oakland, Hooser, Menor).

SCRep. 42 Ways and Means on S.B. No. 1083

The purpose of this measure is to appropriate funds to hard wire all state capitol conference rooms, the capitol auditorium, and both legislative chambers for video broadcasts.

The League of Women Voters provided testimony in support of this measure. Olelo Community Television offered comments.

Your Committee finds that video broadcasts improve public access capabilities and facilitate citizen participation. Your Committee further finds that hard wiring the state capitol avoids the costs of manual installation of wiring by a contractor, as currently practiced.

Your Committee has amended this bill by making a technical nonsubstantive amendment for clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1083, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1083, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 8. Noes, none. Excused, 3 (Chun Oakland, Hooser, Menor).

SCRep. 43 Ways and Means on S.B. No. 1084

The purpose of this measure is to appropriate funds to broadcast legislative proceedings via the Internet.

Your Committee received supporting testimonies from Life of the Land, the League of Women Voters, and the President and CEO of Olelo Community Television.

Your Committee finds that televised coverage of legislative sessions and hearings is critical to maintaining an informed electorate in a democratic society. Coverage of legislative proceedings, however, are limited to brief news reports by local television stations and limited coverage by local cable television channels that are available only to paying cable viewers at certain broadcast times. Your Committee further finds that thousands of homes across the State could access proceedings of the legislature using the Internet, thus expanding public access to the legislative process.

Current computer technology called streaming media or webcasting allows the transmission of video and audio signals over the Internet to all islands and beyond, and recordings of live webcasts can be archived so that users can listen to or view a file at their leisure. The streaming media or webcasting programs can also be accessed wherever computers are available, such as public libraries, schools, youth centers, and other public places.

Your Committee has amended the measure by deleting the phrase "section centers" on page 2, lines 14, and 15 for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1084, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1084, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 8. Noes, none. Excused, 3 (Chun Oakland, Hooser, Menor).

SCRep. 44 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1007

The purpose of this measure is to require an investment broker and agent who share compensation for their services to pay the general excise tax on only that portion of the compensation retained by each.

Your Committee received testimony in support of this measure from Linsco/Private Ledger Corporation, SunAmerica Securities Inc., Brookstreet Securities Corporation, the National Association of Insurance and Financial Advisors Hawaii, and an individual.

Your Committee received comments on this measure from the Department of Taxation and the Tax Foundation of Hawaii.

Your Committee finds that where an investment broker and agent share compensation, each should only be required to pay taxes on their respective portions, rather than on the entire compensation.

The intent of this measure is to add investment brokers and agents to the list of persons in section 237-18, Hawaii Revised Statutes, who are only required pay general excise tax on the portion of compensation they retain individually, rather than on the whole compensation received.

Your Committee has amended this measure by changing the effective date upon which the new taxing structure applies from gross income or gross proceeds received after December 31, 2006, to gross income or gross proceeds received after June 30, 2007.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1007, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1007, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 45 (Joint/Majority) Commerce, Consumer Protection and Affordable Housing and Transportation and International Affairs on S.B. No. 1506

The purpose of this measure is to maintain the rental motor vehicle surcharge at \$3 a day and to appropriate funds out of the State Highway Fund for operational costs, maintenance, and capital improvements on the State highway system.

Your Committees received testimony in support of this measure from the Department of Taxation and the Department of Transportation.

Catrala Hawaii, Avis Budget Group, Dollar Rent A Car, Enterprise Rent-A-Car, and Thrifty Car Rental submitted testimony in opposition to this measure.

Comments on this measure were received from the Hawaii Insurers Council and the Tax Foundation of Hawaii.

Your Committees find that the rental vehicle surcharge tax is a major revenue source for the State Highway Fund, contributing approximately twenty-five per cent of all the revenues deposited into the fund. The existing law allows for the rental vehicle surcharge tax to revert to \$2 a day on September 1, 2007, which would reduce revenue for much needed repairs on the State highway system.

Your Committees have amended this measure by deleting the specific amount appropriated from the State Highway Fund to promote further discussion, making the appropriation effective on July 1, 2007, and making technical, nonsubstantive changes for purposes of clarity and style.

Your Committees note that this measure, as part of the Administration Package, would maintain the tax at \$3 per day and make this amount permanent instead of allowing the tax to revert back to \$2 per day.

As affirmed by the records of votes of the members of your Committees on Commerce, Consumer Protection, and Affordable Housing and Transportation and International Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1506, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1506, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, 1 (Slom). Excused, 5 (Hooser, Ihara, Inouye, Sakamoto, Tsutsui).

SCRep. 46 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1542

The purpose of this measure is to recognize the significance of ceded lands in Hawaii by prohibiting the Department of Land and Natural Resources from selling, exchanging, or otherwise alienating lands contained within the Public Land Trust without the consent of the Board of Trustees of the Office of Hawaiian Affairs.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs, the Native Hawaiian Legal Corporation, and a private individual. Testimony in opposition to this measure was submitted by the Department of Land and Natural Resources and the Department of the Attorney General.

The Board of Land and Natural Resources is responsible for managing the Public Land Trust. Pursuant to the Admission Act, the lands, proceeds, and income of the Public Land Trust must be managed and used for one or more of five trust purposes. The betterment of the conditions of Native Hawaiians is one of those purposes.

Your Committee heard testimony presented from the Department of Land and Natural Resources and the Department of the Attorney General that essentially objected to prohibiting the Board of Land and Natural Resources from selling, exchanging, or otherwise alienating ceded lands without the approval of the Board of Trustees of the Office of Hawaiian Affairs. Despite their reasons for objecting to this measure, your Committee finds that in lieu of a prior approval from the Office of Hawaiian Affairs, the Board of Land and Natural Resources should still be required to seek the approval from a government body prior to the sale or exchange of ceded lands to further ensure that the purposes of the Public Land Trust, especially with respect to the betterment of the conditions of Native Hawaiians, are observed and respected.

Accordingly, your Committee has amended this measure by:

- (1) Deleting language that requires the Board of Land and Natural Resources to obtain consent from the Board of Trustees of the Office of Hawaiian Affairs prior to the sale, exchange, or otherwise alienation of ceded land, and replacing it with specific language that requires the Board of Land and Natural Resources to:
 - (A) Obtain approval of the Legislature by at least two-thirds majority vote of the members of each house prior to the sale, exchange, or otherwise alienation of ceded land; and
 - (B) Submit a concurrent resolution with specific information on the land and the action proposed for introduction to the Legislature for its review prior to the sale, exchange, or alienation of ceded land; and
- (2) Making technical, nonsubstantive stylistic changes for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1542, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1542, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Slom).

SCRep. 47 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 615

The purpose of this measure is to recognize Native Hawaiian traditional and cultural practices pertaining to the land and the ocean by appropriating funds to develop a plan for the creation of a permanent `Aha Moku Advisory Council, which will serve as an advisory body to governmental agencies involved with adopting and maintaining regulatory policies pertaining to the ocean and land.

Testimony in support of this measure was submitted by the Association of Hawaiian Civic Clubs, the Hawaiian Civic Club of Hilo, the Nature Conservancy, and a private individual.

Before Western contact, Native Hawaiians successfully controlled, nurtured, protected, and preserved their native cultural traditions and practices. These traditions and practices reflect a deep spiritual connection with the ocean and the land, but are in imminent danger of being lost. Furthermore, Hawaiian indigenous and endemic species of marine and terrestrial life, found nowhere else in the world, are in imminent danger of extinction. Ironically, the Native Hawaiian community, as the host culture, is usually not consulted at the policy-making level on laws and rules that relate to the ocean and land, and may have a direct impact on their culture, despite their traditional cultural methods defined under ahupua`a management systems, which sustained the Native Hawaiians for thousands of years prior to Western contact.

Your Committees find that actively engaging the Native Hawaiian community in creating a consensus on a process to protect and perpetuate Hawaii's unique marine and land resources will create a more sustainable future for Hawaii. An `Aha Moku task force consisting of representatives from each moku of each island and other key stakeholders will assist in developing a plan for the formation of a permanent `Aha Moku Advisory Council. The permanent `Aha Moku Advisory Council will then serve as an advisory body to governmental agencies involved with adopting and maintaining regulatory policies pertaining to the ocean and land.

The intent of this measure is to provide sustainable measures for the continued presence and growth of Hawaii's unique and delicate marine and land resources. Engaging the Native Hawaiian community in creating a marine and land resources consensus will assist in the protection and preservation of Native Hawaiian cultural traditions and practices, and create a more sustainable future for Hawaii's marine and land resources.

Your Committees have amended this measure by:

- (1) Adopting the suggestion made by the Association of Hawaiian Civic Clubs by:
 - (A) Adding specific language that the permanent `Aha Moku Advisory Council will be developed by participants in the Na Ho`ohanohano I Na Kupuna Puwalu Series; and
 - (B) Adding, as an additional duty for the task force to accomplish, the researching of a proper site within the University of Hawaii to be a permanent and safe depository for data and information; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 615, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 615, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 48 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 835

The purpose of this measure is to support the diversified agriculture industry by appropriating funds for the College of Tropical Agriculture and Human Resources to develop a long range plan for a food innovation and security center to develop and promote new, safe, high-quality, high-value agricultural products from Hawaii.

Testimony in support of this measure was submitted by the College of Tropical Agriculture and Human Resources, University of Hawaii; the Department of Agriculture; Hawaii Farm Bureau Federation; Maui County Farm Bureau; Big Island Candies; and the Hawaii Food Industry Association.

Agriculture and its value-added products contribute \$2,400,000,000 to the State's economy and employ more than 38,000 people. The value of diversified agriculture has more than doubled during the past twenty-five years, and this growth indicates an improvement in the State's food security and lessens the State's dependence on food imports. Despite these favorable numbers, more needs to be done to ensure a higher level of food security and self-sufficiency for the State.

Your Committees find that creating a food innovation and security center will assist Hawaii's agricultural and value-added businesses to bring to market products whose quality and value offset the State's high costs of land, labor, water, and transportation. This center will focus on Hawaii's statewide food needs by providing value-added businesses assistance with developing new products from Hawaii-grown produce, and providing agricultural producers assistance with producing safe, wholesome foods that meet Good Agricultural Practices (GAP), and Health Approved Safety Standards Protection (HASSP) certification standards.

Your Committees believe that this measure will support and assist in the expansion of diversified agriculture. A food innovation and security center will promote the production of high-quality, high-value, safety-certified food products for both local and export markets, which will result in the continued growth of Hawaii's diversified agricultural industry.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 835 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 49 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 936

The purpose of this measure is to support the revitalization of the Hawaiian language and appropriate funds for Ka Haka `Ula O Ke`elikolani College of Hawaiian Language at the University of Hawaii at Hilo.

Testimony in support of this measure was submitted by the University of Hawaii; Ka Haka `Ula O Ke`elikolani College of Hawaiian Language, University of Hawaii at Hilo; the Office of Hawaiian Affairs; and eight private individuals with the support from student teachers of the University of Hawaii at Manoa Ho`okulawi: `Aha Ho`ona`auao `Oiwai (proposed Center for Native Hawaiian and Indigenous Education).

With the exception of its use within the Ni`ihau community, the Hawaiian language is still on the brink of extinction. The Hawaiian Language Immersion Program is the primary vehicle through which the Hawaiian language can be perpetuated as a living language with the creation of future generations of Hawaiian-speaking children.

Your Committees find that it is critical to support initiatives that focus on teacher professional development, curriculum research and development, and educational leadership for the Hawaiian Language Immersion Program. Funding will enable the Ka Haka `Ula O Ke`elikolani College of Hawaiian Language to continue to operate at the level provided by start-up grant funds and also stabilize the College's strong record of innovation and excellence. Furthermore, additional funding will enable the College to hire new staff.

The intent of this measure is to provide support in the preservation and perpetuation of the Hawaiian language. Supporting the education and training of future Hawaiian language immersion teachers ensures that the Hawaiian language will continue to remain vibrant for future generations.

Your Committees have amended this measure by:

- (1) Replacing the blank dollar appropriation amount with \$608,000, for Ka Haka `Ula O Ke`elikolani College of Hawaiian Language to obtain equity funding to hire additional staff members, and to acquire necessary tools and material to implement the program; and
- (2) Deleting the Department of Education as the expending agency and adding the University of Hawaii.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 936, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 936, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 50 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 1093

The purpose of this measure is to develop a community-based consensus for managing Hawaii's marine resources by appropriating funds for the creation of an ocean health consensus project.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the University of Hawaii, Aqua Lung, Frogman Charters, Jack's Diving Locker, Trilogy Excursions, the Ocean Tourism Coalition, Lahaina Divers, Maui-Molokai Sea Cruises – Prince Kuhio, Expeditions, the Nature Conservancy, Maui Dive Shop/Ali'i Nui, and three private individuals. Testimony in opposition to this measure was submitted by a private individual. A private individual submitted comments.

Hawaii has the highest level of marine endemism of any place of similar size in the tropics. Twenty-five per cent of the fish species native to Hawaii are found nowhere else in the world. Scientists estimate that a number of native fish species have declined by more than seventy-five per cent over the past one hundred years. This is a loss that affects the livelihood of fishermen, Native Hawaiian culture and practices, and Hawaii's food supply. Due to Hawaii's geographic isolation, it is crucial that the State's shore reef systems and fisheries achieve and maintain a level of self-sufficiency and sustainability.

Your Committees find that there is a critical need to obtain consensus among the various stakeholders who use Hawaii's marine resources for sustenance, recreation, and commercial production. Establishing a community-based consensus on the management of Hawaii's marine resources will provide valuable input and tools in the development of a plan to protect, preserve, and enhance the State's marine resources for the benefit of future generations.

The intent of this measure is to provide sustainable measures for the continued presence and growth of Hawaii's unique and delicate marine resources. The creation of a community-based ocean health consensus is consistent with efforts to create a more sustainable Hawaii.

Your Committees have amended this measure by:

- (1) Adding ocean tourism as one of the key stakeholder representatives to be included in the consensus project; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

Your Committees recognize and note the concerns from the Department of Land and Natural Resources regarding the lack of guidance on the actual process by which the key stakeholders will be selected and convene for the consensus, and the time frame in which the outcome of this project will be accomplished. Your Committees appreciate the Department's willingness to work with the University of Hawaii and the Center for Conservation Research and Training to develop a framework and timeline for the consensus project.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1093, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1093, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 51 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Education on S.B. No. 1784

The purpose of this measure is to support the revitalization of the Hawaiian language by:

- (1) Creating a link between the public schools, the local communities, and university teacher education programs by amending section 304A-1203, Hawaii Revised Statutes; and
- (2) Appropriating funds to establish and resource Ho'okulaiwi: `Aha Ho'ona'auao `Oiwī (proposed Center for Native Hawaiian and Indigenous Education).

Testimony in support of this measure was submitted by the Department of Education; the University of Hawaii; Principal, Nanaikapono Elementary School; the Native Hawaiian Legal Corporation; Ngā Pae o te Māramatanga, National Institute of Research Excellence in Maori Development and Advancement at the University of Auckland; Te Whare Wānanga o Awanuiārangi; the National Indian Education Association; the Office of Hawaiian Affairs; and one hundred sixty-three private individuals.

With the exception of its use within the Ni'ihau community, the Hawaiian language is still on the brink of extinction. Furthermore, Native Hawaiian students perform poorly in regular public schools because they lack role models and there is an absence of curriculum and teaching styles that speak to the Hawaiian way of life and learning. The Hawaiian Language Immersion Program is the primary vehicle through which the Hawaiian language can be perpetuated as a living language with the creation of future generations of Hawaiian-speaking children.

Your Committees find that there is a critical need for teachers, curriculum developers, researchers, and teacher educators in the Hawaiian community. Ho'okulaiwi: `Aha Ho'ona'auao `Oiwī addresses this need by preparing teachers for Department of Education Hawaiian Language Immersion Programs, Title I schools with a large number of Native Hawaiian children, or Hawaiian-focused charter schools, and trains educational leaders in curriculum research, school administration, and continuing education of teachers by supporting study at the masters and doctoral levels. Appropriating funds to establish resources for Ho'okulaiwi: `Aha Ho'ona'auao `Oiwī within the University of Hawaii will allow the program to train and prepare more qualified teachers and provide more permanent faculty positions.

Your Committees further find that Ho'okulaiwi is a form of educational renewal that addresses the needs of each individual school by including members of the community and school in decision-making for teaching methods, recruiting, and curriculum development. Involving the community within the decision-making process provides another valuable perspective and allows the incorporation of Native Hawaiian cultural traditions and practices within the school curriculum.

The intent of this measure is to provide support in the preservation and perpetuation of the Hawaiian language. By training teachers, Ho'okulaiwi: `Aha Ho'ona'auao `Oiwī assists in the preservation and continuation of the Hawaiian language for future generations.

Your Committees have amended this measure by:

- (1) Adopting the suggestion made by the Department of Education to delete any references to local community boards for consistency and clarity; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1784, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1784, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Fukunaga, Taniguchi).

SCRep. 52 (Majority) Energy and Environment on S.B. No. 731

The purpose of this measure is to restrict the fuel tax to fuel used for transportation purposes.

Your Committee received testimony in support of this measure from the Kauai Island Utility Cooperative. Your Committee received testimony in opposition to this measure from the Department of Taxation, the Department of Transportation, and one individual. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that restricting the fuel tax to fuel used only for transportation purposes is overly broad and detrimental to the state highway system's operations and maintenance. Your Committee further finds that the license tax currently imposed upon facilities that purchase liquid fuel for electricity generation results in more than \$2 million of annual tax liability, which is then passed on to its consumers.

It is the intent of your Committee to relieve some of the tax burden from power-generating facilities and electric cooperatives that purchase liquid fuel. It is the further intent of your Committee to not exempt power-generating facilities and electric cooperatives from the environmental response tax pursuant to section 243-3.5, Hawaii Revised Statutes.

Your Committee received a fiscal impact statement on this measure from the Department of Taxation that anticipates a revenue loss of approximately \$1.7 million in fiscal year 2008.

Your Committee amended this measure in accordance with the Department of Taxation's recommendations by removing the exemption from section 243-7, Hawaii Revised Statutes, and adding the exemption to the "license taxes" section, section 243-4, Hawaii Revised Statutes.

Your Committee further amended this measure by clarifying that the exemption applies to power-generating facilities and electric cooperatives, thereby narrowing the scope from the original language of the measure that very broadly exempted the fuel tax from "fuel used for power generation purposes".

Your Committee further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 731, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 731, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, 1 (Trimble). Excused, 2 (Ihara, Kokubun).

SCRep. 53 Energy and Environment on S.B. No. 1077

The purpose of this measure is to bring the State into the forefront of environmental change by setting an example and promoting policies and regulations within state departments and agencies to decrease the release of greenhouse gas.

The intent of this measure is to require the head of each state department, through planning, processes, regulations, and permit applications, to reduce greenhouse gas emissions where feasible.

Testimony in support of this measure was received from Honolulu Seawater Air Conditioning, LLC; Life of the Land; the Conservation Council for Hawai'i; Hawaii Solar Energy Association; the Respiratory & Environmental Disabilities Association of Hawaii; the Sierra Club Hawai'i Chapter; and eight individuals. The Department of Business, Economic Development and Tourism submitted comments on this measure.

Your Committee finds that climate change due to human-produced greenhouse gas emissions is a serious issue that must be addressed to protect our health and environment. Ongoing efforts must be made to increase the use of newer, cleaner technologies.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1077 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Ihara).

SCRep. 54 Energy and Environment on S.B. No. 1247

The purpose of this measure is to prohibit the Department of Health from issuing permits, after December 31, 2008, to any new facilities that burn or consume coal, or to any existing coal burning facilities intending to expand or modify, which would result in an increase of coal consumption.

Your Committee received testimony in support of this measure from Life of the Land; Honolulu Seawater Air Conditioning, LLC; the Sierra Club, Hawai'i Chapter; Respiratory and Environmental Disabilities Association of Hawaii; and nine individuals. The Department of Health; Hawaii Agriculture Research Center, Alexander & Baldwin, Inc.; Gay & Robinson, Inc.; and ILWU Local 142 submitted testimony in opposition to this measure.

Your Committee finds that the burning of coal as a source of energy is not part of a clean and sustainable energy future for the State and negatively affects the State's air quality. The intent of this measure is to decrease coal consumption within the State by prohibiting the Department of Health from issuing permits for new covered sources and for modified existing sources that would increase coal consumption.

Your Committee has amended this measure by changing the compliance date to December 31, 2009, to take into account the concerns raised by the Department of Health that the deadline of December 31, 2008, was too short.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1247, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1247, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 3. Ayes with Reservations, 1 (Kokubun). Noes, none. Excused, 2 (Ihara, Trimble).

SCRep. 55 Commerce, Consumer Protection and Affordable Housing on S.B. No. 763

The purpose of this measure is to provide additional assistance to low-income renters by providing an increase in the low-income household renter tax credit.

Your Committee received testimony in support of this measure from one individual. The Department of Taxation provided comments on this measure.

Your Committee finds that the lack of affordable rentals and the continual increase in rent prices makes it difficult for low-income renters to be able to find affordable rentals and to continue to pay their ever increasing rent. This tax credit, which has not been increased since 1981, will provide some assistance to low-income renters by increasing the tax credit for low-income household renters to an unspecified amount, to be multiplied by the number of qualified exemptions, for taxable years beginning December 31, 2006.

The Department of Taxation testified that, because the amount of the tax credit is unspecified, they are not able to ascertain the measure's fiscal impact.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 763 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 56 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1962

The purpose of this measure is to provide an income tax deduction to residential unit owner-occupants for the qualifying costs of installation of an automatic fire sprinkler system.

Your Committee received testimony in support of this measure from the State Fire Council, the Honolulu Fire Department, and the Hawaii Council of Associations of Apartment Owners. Testimony in opposition to this measure was received from the Department of Taxation. Comments on this measure were received from the Tax Foundation of Hawaii.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in an annual revenue loss to the State of approximately \$10,100,000, assuming the maximum tax credit of \$7,000 was claimed. During the public hearing on this measure, your Committee received testimony from the Department of Taxation that the State would suffer up to a \$1,500,000 annual loss for every \$1,000 claimed as a tax credit under this measure. However, the Department of Taxation did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that this measure encourages the installation of automatic fire sprinkler systems in residential units to mitigate the effects residential fires and prevent property damage, injuries, and deaths.

Your Committee has amended this measure by deleting the specified amount for the maximum deduction that may be claimed in order to promote further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1962, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1962, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 57 Economic Development and Taxation on S.B. No. 623

The purpose of this measure is to appropriate funds to the Hawaii Small Business Development Center Network for:

- (1) Three existing vacant positions and one new position;
- (2) Reestablishment of a training program in Kailua-Kona to bring the network into compliance with requirements of the United States Small Business Administration; and
- (3) Restoration of funds lost to indirect fees.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism and the Hawai'i Small Business Development Center (SBDC) Network.

Your Committee finds that the SBDC Network provides thousands of small business owners and managers throughout the State with individual and group business training, counseling, and research. As a result, many of these Hawaii residents have been able to expand or start new businesses. In addition, the SBDC Network has been instrumental in bringing millions of dollars in federal funding to Hawaii since 1994.

Your Committee applauds the work of the SBDC Network, and is strongly supportive of this measure to appropriate the additional funds necessary for the SBDC Network to continue its work on behalf of Hawaii's small businesses.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 623 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 58 Economic Development and Taxation on S.B. No. 897

The purpose of this measure is to appropriate \$1,000,000 for deposit into the Hawaii 3Ts School Technology Laboratories Fund to expand the Project EAST (Environmental and Spatial Technology) program to Oahu and continuing to expand EAST on the neighbor islands.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism, High Technology Development Corporation, Department of Education, Economic Development Alliance of Hawaii, Hawaii Island Economic Development Board, Maui Economic Development Board, Kauai Economic Development Board, Women in Technology, Trex Hawaii, LLC, a teacher at Kaua'i High School, nearly four dozen EAST students from King Kekaulike High School, Baldwin High School, Lahainaluna High School, Maui High School, and Molokai High School, and three individuals.

Your Committee finds that Project EAST has been very successful in the eight Hawaii public schools that currently offer the program – five on Maui, one on the Big Island, one on Kauai, and the latest EAST on Molokai. In addition, Hawaii students have won extensive honors at each of the national EAST competitions they have attended since the program's inception in Hawaii.

Your Committee heard testimony that spoke to the strengths of EAST in developing team-building and learning skills, as well as the practical applications of technology in problem solving. Members of your Committee were particularly impressed by the student testimony, both for its enthusiasm and maturity.

It is the intent of your Committee to voice strong support for Project EAST and its expansion to Oahu and additional neighbor island schools.

Your Committee has amended the findings and purpose section of this measure to acknowledge the support of the Senate Majority Caucus for Project EAST, and made nonsubstantive, technical amendments.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 897, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 897, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 59 Economic Development and Taxation on S.B. No. 710

The purpose of this measure is to appropriate \$2,710,000 for fiscal year 2007-2008, for the Department of Accounting and General Services' Information Processing Services Program to implement an interim alternate data center site and a business continuity plan while a solution for a permanent alternate data center site is developed.

Testimony in support of this measure was received from the Department of Accounting and General Services, High Technology Development Corporation, and one individual.

Your Committee finds that government operations are increasingly dependent on reliable information processing and telecommunication services as more of the State's services become automated. In the event of a system failure, state agencies would be unable to pay over sixty thousand state employees and contractors, process welfare checks to over ten thousand recipients, provide health related services or otherwise procure, regulate, or undertake a wide variety of services to the public that are now provided by telephone, over the Internet, or even through face to face transactions. The October 2006, earthquakes that shook the islands made that very clear, and it was fortunate that the State's data center was not compromised.

Your Committee further finds that establishing an alternate data center to provide critical core functions has taken on an increased urgency. The Department of Accounting and General Services projects a non-recurring facility preparation cost of \$500,000 and approximately \$2,200,000 for annual operational costs of a short-term five thousand square foot facility.

Discussion of the alternate data center also raised the issue of building a permanent facility designed to include other large user government agencies. A permanent twenty thousand square foot facility, housed at a location other than Oahu, could be operational within two to three years, once funding is available.

Your Committee has amended this measure by replacing the appropriation with an unspecified amount for the purposes of further discussion on the costs of providing an interim data center as well as the costs of a permanent facility.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 710, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 710, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 60 Economic Development and Taxation on S.B. No. 880

The purpose of this measure is to establish the museum of Hawaiian music and dance committee to determine the appropriate type of institution that should be established, its location, possible financing mechanisms, and to complete an initial business plan for the museum.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism, the State Foundation on Culture and the Arts, and the Hawaii Tourism Authority.

Your Committee finds that the establishment of a museum of Hawaiian music and dance would provide a focus and a gathering place for the many aspects of Hawaiian culture.

Such a facility is long overdue, and it is the intent of your Committee to provide financial support for the work of the museum of Hawaiian music and dance committee.

Your Committee notes that in discussions on this measure, concerns were raised that the scope of the committee's mandate may require funding beyond the cost sharing between the Hawaii Tourism Authority, the Office of Hawaiian Affairs, and the State Foundation on Culture and the Arts, as required under section 2(b) of this measure. Your Committee believes the issue merits further discussion, regarding both costs and the financial responsibilities of the agencies.

Your Committee has amended the measure accordingly, by:

- (1) Appropriating an unspecified amount to the Hawaii Tourism Authority to assist the committee; and
- (2) Making nonsubstantive, technical amendments.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 880, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 880, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 61 Economic Development and Taxation on S.B. No. 928

The purpose of this measure is to appropriate funds for one boards and commissions administrative assistant position to assist the Small Business Regulatory Review Board.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism, the Small Business Regulatory Review Board and two board members, and the Hawaii Business League.

Your Committee finds that the Small Business Regulatory Review Board meets monthly and its eleven volunteer business owner or officer members spend countless unpaid hours reviewing existing, new, and modified administrative rules that affect small businesses. In the process, they analyze hundreds of pages of proposed rules to determine if there are better ways to make them less complex and costly for smaller firms, review current rules, and organize conferences on problems facing small businesses.

The administrative assistant position proposed by this measure would assist in the Board's marketing efforts, be responsible for all administrative support, maintain the Board's website, monitor budget and procurement information, and coordinate meetings.

Your Committee is in strong support of this measure and believes that its passage is critical to maintaining the successful work of the Small Business Regulatory Review Board.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 928 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 62 Energy and Environment on S.B. No. 1396

The purpose of this measure is to create an income tax credit for the purchase of eligible energy efficient appliances.

Your Committee received testimony in support of this measure from the Department of Taxation; the Department of Business, Economic Development and Tourism; the Department of Commerce and Consumer Affairs; Hawaiian Electric Company, Inc.; the Gas Company; the Sierra Club, Hawai'i Chapter; and one individual. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that encouraging energy efficiency will help the State reduce its dependence on imported fossil fuels, preserve Hawaii's delicate environment, and reduce the need for building new electric generation capacity. The intent of this measure is to promote greater energy efficiency and demand side management awareness among consumers by creating an income tax credit that may be claimed on the purchase of appliances that satisfy the energy efficiency guidelines of the Environmental Protection Agency and the federal Department of Energy.

Your Committee has amended this measure to change references to the term electricity to the more appropriate term, energy, in the purpose section of this measure.

Your Committee received a fiscal impact statement from the Department of Taxation indicating that this measure, if passed, would result in a revenue loss to the State of \$9.6 million for fiscal year 2009. No methodology for determining the loss was furnished.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1396, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1396, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Ihara).

SCRep. 63 Health on S.B. No. 1610

The purpose of this measure is to reduce health care costs for private hospitals and their patients.

The measure accomplishes this purpose by providing a general excise tax exemption to private hospitals that have an annual patient population consisting of sixty per cent or more of individuals who are uninsured, or Medicaid or Medicare recipients.

Your Committee received testimony in support of this measure from one individual.

Your Committee finds that health care costs are increasing more rapidly than the cost of living. In addition, many private hospitals care for patients who do not have insurance, or who are Medicaid or Medicare recipients. This results in many unpaid or underpaid health care bills that hospitals often absorb.

Your Committee anticipates that this measure will have a fiscal impact on the State's general fund; however, a statement to this effect was not submitted by the Department of Taxation or any other state agency.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1610 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Baker). Noes, none. Excused, 1 (Whalen).

SCRep. 64 Health on S.B. No. 1686

The purpose of this measure is to provide for the improvement of health care services and treatments by supporting medical research for the early detection of hepatitis.

Specifically, the measure establishes the Antara Medical Trust Fund, the moneys from which will be expended for FDA approved laboratories in Hawaii to develop commercially marketable tests for the early detection of hepatitis. The measure also offers a tax credit as an incentive to taxpayer's who contribute to the Antara Medical Trust Fund.

Your Committee received testimony in support of this measure from Antara Biosciences Inc. and Hawaii Citizens for Better Health.

Your Committee finds that hepatitis is a serious health care problem in our community. Low income individuals are at an increased risk of contracting hepatitis. Your Committee further finds that promoting medical research for in vitro diagnostic testing for hepatitis will help to decrease the serious complications those infected with the disease endure and prevent the further spread of the disease.

In addition, your Committee believes that establishing the Antara Medical Trust Fund will further benefit Hawaii by creating more biotech jobs within the State and by providing funding for health care services for low income individuals and residents living in rural areas of the State.

Your Committee amended this measure by including a technical amendment that requires a claim for this tax credit to be filed on or before the end of the twelfth month following the close of the taxable year for which the credits may be claimed.

Your Committee anticipates that this measure will have a fiscal impact on the general fund; however, a statement to this effect was not submitted by the Department of Taxation or any other state agency.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1686, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1686, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 65 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 849

The purpose of this measure is to clarify the legislative intent and application of Act 12, Special Session Laws of Hawaii 2005 (Act 12), relating to the Director of the Office of Planning.

Specifically, this measure:

- (1) Amends section 225M-2, Hawaii Revised Statutes, to provide that the Director of the Office of Planning will hold office for a term to expire at the end of the term for which the Governor was elected, unless removed sooner by the Governor; and
- (2) Amends Act 12, to provide that any person serving as the Director of the Office of Planning on the day after the 2006 General Election and any Director thereafter will be subject to the advice and consent by the Senate.

Testimony in opposition to this measure was submitted by the Governor's Office and the Office of Planning.

In 2005, the Legislature enacted Act 12, which clarified that the Department of Business, Economic Development, and Tourism has sole jurisdiction over the Land Use Commission and the State Planning Act, and directed the Office of Planning to directly report only to the Director of Business, Economic Development, and Tourism. Furthermore, Act 12 amended section 225M-2, Hawaii Revised Statutes, to emphasize the importance of the Office of Planning and accordingly required that its director be nominated by the Governor, by and with the advice and consent of the Senate, and appointed by the Governor, without regard to chapter 76, Hawaii Revised Statutes.

Your Committee finds that it was the intent of the Legislature when enacting Act 12 that the position of the Director of the Office of Planning be given a high level status within the Executive Branch, and that its term of office coincide with the Governor's term of office. Thus, the position of Director must be treated in like manner as the single executive of a principal department of the State, including its term of office and submitting to the advice and consent by the Senate. Your Committee believes that amending section 225M-2, Hawaii Revised Statutes, and Act 12, Special Session Laws of Hawaii 2005, fulfills and clarifies the intent of Act 12.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 849 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Hee).

SCRep. 66 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 259

The purpose of this measure is to improve the quality of life for the residents of the Papakolea homestead and surrounding areas by appropriating funds to assist in covering the operations costs of the Papakolea Community Center and Park.

Testimony in support of this measure was submitted by the Department of Hawaiian Home Lands and the Office of Hawaiian Affairs.

The Papakolea Community Center and Park is located on Hawaiian Home Lands. Although the community center and park is open to everyone, its primary users are from the surrounding neighborhoods of Papakolea, Tantalus, Pauoa, and Makiki. In 2005, the Community Center recorded over 15,000 visitors and users of the Center. The Center provides area residents with a full-range of comprehensive services including life long education classes and experiences, health and wellness programs, and entrepreneurial and employment opportunities. Thus, the Center is the focal point for kupuna, family, and youth activities.

Your Committee finds that appropriating funds to assist the Center with covering the operations costs of this important resource fulfills the intent of this measure, which is to improve the quality of life of the residents of the Papakolea homestead and surrounding areas.

Your Committee has amended this measure by deleting the dollar amount and replacing it with a blank amount for determination by the Committee on Ways and Means.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 259, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 259, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 67 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Tourism and Government Operations on S.B. No. 715

The purpose of this measure is to promote Hawaii's agricultural industry by encouraging the purchase and use of Hawaii agricultural products.

More specifically, this measure adds a new section to the State Procurement Code under chapter 103D, Hawaii Revised Statutes, to provide incentives for food operations of state correctional facilities and state hospitals and healthcare facilities to award contracts to the lowest responsible and responsive bidder with preferences given to agricultural products raised or grown in Hawaii.

Testimony in support of this measure was submitted by the Department of Agriculture, the Department of Accounting and General Services, the State Procurement Office, the Hawaii Farm Bureau Federation, the Maui County Farm Bureau, the Hawaii Agriculture Research Center, and the Maui Economic Development Board, Inc. A private individual submitted comments.

Hawaii heavily depends on the importation of food and goods. It is becoming increasingly more difficult for Hawaii agricultural producers to compete with foreign and out-of-state agricultural producers because Hawaii agricultural producers are faced with high labor costs, land values, and transportation costs. As a result, there is much debate on the issue of Hawaii's food supply security and sustainability. Your Committees find that state agencies should assist in promoting and maintaining of Hawaii's agricultural industry by providing a preference within the State Procurement Code for agricultural products raised or grown in Hawaii. Your Committees believe that establishing a preference program within the State Procurement Code for agricultural products raised and grown in Hawaii fulfills the intent of this measure, which is to promote and protect Hawaii's agricultural industry, and enable a more viable food security future for Hawaii.

Your Committees have amended this measure by:

- (1) Adopting the suggested amendments from the State Procurement Office by deleting section 1 of this measure and replacing it with language that:
 - (A) Adds a new definition for "Hawaii agricultural products" to section 103D-1001, Hawaii Revised Statutes; and
 - (B) Amends section 103D-1002, Hawaii Revised Statutes, by adding a new subsection for the purpose of encouraging the purchase and use of Hawaii agricultural products in food operations of state correctional facilities and state hospitals and healthcare facilities, and requiring the Department of Agriculture, with the assistance of the State Procurement Office, to develop a Hawaii agricultural product program; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and clarity.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 715, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 715, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 2 (Slom, Trimble). Noes, none. Excused, 1 (Fukunaga).

SCRep. 68 (Joint/Majority) Water, Land, Agriculture and Hawaiian Affairs and Tourism and Government Operations on S.B. No. 718

The purpose of this measure is to support the floriculture industry in Hawaii by encouraging the purchase of flower lei made only with flowers grown in Hawaii.

More specifically, this measure adds a new section to the State Procurement Code under chapter 103D, Hawaii Revised Statutes, to provide incentives for state agencies to award contracts to the lowest responsible and responsive bidder with preferences given to flower lei made only with flowers grown in Hawaii.

Testimony in support of this measure was submitted by the Department of Agriculture, the Department of Accounting and General Services, the State Procurement Office, the Hawaii Farm Bureau Federation, the Maui County Farm Bureau, Green Point Nurseries, the Maui Flower Growers Association, Paradise Flower Farms, and a private individual.

Hawaii is known for its beautiful flowers and lei. It is common for a lei to be given to someone for a special occasion or as a symbolic gesture of aloha. Ironically, these lei are often times made with flowers that are imported from a foreign county where they are grown at a fraction of the cost of locally grown flowers and lei. Hawaii floricultural producers are faced with high labor costs, land values, and transportation costs, which makes it difficult for local floriculture producers to compete with foreign floricultural competitors. Your Committees find that state agencies should assist in promoting and maintaining Hawaii's floricultural industry by providing a preference within the State Procurement Code for floricultural products raised or grown in Hawaii.

The State Procurement Office presented testimony in support of this measure with suggested amendments for the intent of this measure to be properly reflected in and consistent with the State Procurement Code. The State Procurement Office indicated to your Committees that the definition for "Hawaii products" under section 103D-1001, Hawaii Revised Statutes, includes and applies to Hawaii-grown flowers. Thus, the Hawaii product preference provisions under section 103D-1002, Hawaii Revised Statutes, also apply to Hawaii-grown flowers. The State Procurement Office, however, pointed out that flower lei are considered small purchases and are currently not included within the scope of the State Procurement Code. The Office indicated that it will need to adopt rules to establish a floricultural product program to address the intent of this measure, which the Office is authorized to do under section 103D-1002, Hawaii Revised Statutes.

Accordingly, your Committees have amended this measure by:

- (1) Adopting the suggested amendments from the State Procurement Office by deleting section 1 of this measure and replacing it with language that amends section 103D-1002, Hawaii Revised Statutes, by adding a new subsection for the purpose of encouraging the purchase and use of Hawaii grown flowers by requiring the Department of Agriculture, with the assistance of the State Procurement Office, to develop a Hawaii floriculture program; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and clarity.

Your Committees believe that the amendments made to this measure fulfill the intent of this measure, which is to promote and protect Hawaii's floricultural industry.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 718, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 718, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, 1 (Trimble). Excused, 1 (Fukunaga).

SCRep. 69 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 933

The purpose of this measure is to streamline the process for the acquisition and management of lands having value as a resource to the State.

Specifically, this measure provides more flexibility in the appraisal process when the Board of Land and Natural Resources acquires land having value as a resource to the State by:

- (1) Allowing the Board of Land and Natural Resources the option to accept an existing appraisal prepared on behalf of a nonprofit organization, or contract for an independent appraisal; and
- (2) Prohibiting the Board of Land and Natural Resources from purchasing land for a sum greater than the highest value fixed on any appraisal unless the higher value is justified by the appraiser or the Attorney General, or the acquisition is made by condemnation.

Testimony in support of this measure was submitted by the Nature Conservancy and the Trust for Public Land. The Department of Land and Natural Resources submitted comments.

Under chapter 173A, Hawaii Revised Statutes, land having value as a resource to the State includes land having natural, environmental, recreational, scenic, cultural, agricultural production value, and may include park and trail systems that provide access to these types of land. The Legacy Land Conservation Commission was established under section 173A-2.4, Hawaii Revised Statutes, to advise the Department and the Board of Land and Natural Resources on the acquisition of land having value as a resource to the State and request grants from the Land Conservation Fund for the preservation of lands having value as a resource to the State.

When the Board of Land and Natural Resources acquires land having value as a resource to the State, the Board is required to contract for an independent appraisal, even if a current appraisal already exists and is available. Your Committee finds that providing the Board an additional option of accepting an existing and current appraisal that was prepared by nonprofit organization will save the State money on unnecessary and duplicative appraisals. Your Committee believes that providing additional flexibility in the appraisal process during land acquisitions will fulfill the intent of this measure, which is to streamline the process for the acquisition and management of lands having a resource to the State.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 933 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 70 (Joint) Energy and Environment and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 598

The purpose of this measure is to encourage green building design and practices in an effort to shift toward greater energy sustainability.

The measure attempts to accomplish this purpose by providing a general excise tax exemption for buildings or facilities built in conformance with the United States Green Building Council's Leadership on Energy and Environmental Design green building rating system.

Your Committees received testimony in support of this measure from Honolulu Seawater Air Conditioning, LLC., and the Hawaii Association of Realtors. The Department of Business, Economic Development, and Tourism and the American Chemistry Council submitted testimony supporting the intent of this measure. Testimony offering comments on this measure was submitted by the Department of Taxation and the Hawaii Carpenter's Union.

Your Committees find that buildings represent forty per cent of our total energy use. Encouraging the construction of energy efficient buildings is essential to Hawaii's energy sustainability.

Your Committees have amended this measure by requiring the Department of Taxation to work in conjunction with the Department of Accounting and General Services to determine the criteria for green building qualification.

Your Committees further amended this measure by clarifying that the exemption applies to all buildings statewide.

Your Committees also amended this measure to provide that a building may qualify as a "green building" if it is in conformance with comparable state-approved, nationally recognized, and consensus based guideline, standard, or system, except when the guideline, standard, or system interferes with the use of the building or facility as an emergency shelter.

Furthermore, your Committees changed the effective date of the measure from upon approval to July 1, 2007.

The Department of Taxation was unable to calculate the measure's fiscal impact because the exemption percentage was left blank.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 598, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 598, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 2 (Fukunaga, Ihara).

SCRep. 71 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1350

The purpose of this measure is to increase the inventory of affordable housing units to benefit the State's working class by exempting the sale or transfer of real property that is subject to a sustainable affordable lease from the ten-year buyback and shared appreciation equity restrictions under chapter 201H, Hawaii Revised Statutes.

Testimony in support of this measure was submitted by the Hawaii Housing Finance and Development Corporation; Hawaii Reserves, Inc.; and the Hawaii Leeward Planning Conference.

Under section 201H-47, Hawaii Revised Statutes, for a period of ten years after the purchase, lessees of sustainable affordable leases who wish to sell their homes must sell back their homes to the Hawaii Housing Finance and Development Corporation, who in turn will resell the home to another income-qualified family, or to a qualified resident. Sustainable affordable lease projects already satisfy the intent of the buyback and shared equity appreciation restrictions under chapter 201H, Hawaii Revised Statutes, because the homes in a sustainable affordable development are permanently affordable and intended to remain in the affordable housing inventory. If the traditional ten-year buyback and shared appreciation equity restrictions are applied to sustainable affordable leases, the purpose and implementation of the sustainable affordable development model under chapter 516, part VI, Hawaii Revised Statutes, will be frustrated. Your Committee finds that exempting sustainable affordable leasehold developments and projects from the ten-year buyback and shared appreciation equity restrictions will expedite the development process for sustainable affordable leaseholds.

The Hawaii Leeward Planning Conference indicated to your Committee that there are many instances where immediate family members of a deceased lessee are forced to move out of the affordable home because of the ten-year buyback and shared equity provisions. Accordingly, your Committee has amended this measure by adopting the amendment that was suggested by the Hawaii Leeward Planning Conference by adding an additional exemption under section 201H-47(c), Hawaii Revised Statutes, to include the right of first refusal for the sale or transfer of real property to an immediate family member of the purchaser upon the purchaser's death.

Your Committee believes that the amended measure fulfills the intent of this measure, which is to increase the inventory of affordable housing units to benefit the State's working class.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1350, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1350, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 72 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1758

The purpose of this measure is to support and expand a diversified agricultural industry in Hawaii by appropriating funds for the Agribusiness Incubator Program at the College of Tropical Agriculture and Human Resources at the University of Hawaii to continue its operations and services until replacement federal funding can be secured.

Testimony in support of this measure was submitted by the Department of Agriculture; the College of Tropical Agriculture and Human Resources, University of Hawaii; the Agribusiness Incubator Program; Mana Ulu Kalo Company LLC; Big Island Plants and Foliage, Inc.; Green Point Nurseries, Inc.; Maui Land and Pineapple Company, Inc.; Matsuda-Fukuyama Farms, Inc.; Kahuku Farmers, Inc.; Nalo Farms Inc.; Green Growers, Inc.; Grove Farm Co., Inc.; Hawaii Cooperative of Organic Farmers; Hawaii Farm Bureau Federation; and five private individuals.

The University of Hawaii's Agribusiness Incubator Program provides hands-on business consulting services to agribusinesses that might not otherwise have access to these types of assistance. The Program improves the viability of new businesses and increases the success rate of existing agribusiness expansion through a comprehensive business consulting program. To date, the Program has served thirty-one clients, including farming and value-added businesses located statewide. On average, clients have increased their revenues by one hundred twenty-one per cent, increased their operating profits by ninety per cent, and increased their workforce by thirty-four per cent.

Currently, the Agribusiness Incubator Program is entirely dependent upon funding through a special grant from the United States Department of Agriculture to institutions, which serve Native Alaskans and Native Hawaiians. This year, the Program will lose funding in September of 2007.

Your Committee finds that additional state funding will allow the Program to continue to provide agribusinesses with valuable services and resources until alternative sources of funding are found to cover future operating budgets. Your Committee believes that appropriating funds to the Agribusiness Incubator Program fulfills the intent of this measure, which is to support and expand a diversified agricultural industry in Hawaii.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1758 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Tokuda).

SCRep. 73 Education on S.B. No. 1133

The purpose of this measure is to require businesses that claim certain state tax credits to provide experiential learning opportunities to public school students.

Testimony in support of this measure was submitted by the Workforce Development Council and one individual. Comments on the measure were submitted by the Department of Taxation.

Your Committee finds that the State affords a multitude of tax credits to taxpayers based on various services, investments, or other criteria, including school repair and maintenance, ethanol production, low-income housing, certain renovations and development, and high technology businesses or investments. Your Committee further finds that as a condition to receiving these types of tax incentives, certain businesses should be required to provide some contribution or benefit to the State and its residents.

Experiential learning is one way by which these businesses can benefit from additional assistance and workforce development and our students can benefit from the opportunities to learn and gain experience in various fields. Experiential learning is learning through actual experience, allowing students to test academic theories through real world applications. Your Committee believes that experiential learning provides students with an invaluable opportunity to relate their studies to real world experiences.

Your Committee recognizes that this measure may currently be too broad in its application, as it could have the unforeseen consequence of requiring a large number of businesses with fifty or more employees who claim the capital goods excise tax credit to provide experiential learning opportunities. Your Committee determines that the measure should be more limited in its scope to focus on fewer businesses, particularly those in emerging industries such as those within the innovation and high technology sectors.

Accordingly, your Committee has amended this measure by:

- (1) Removing the requirement that businesses with fifty employees or more that claim the tax credit provided under section 235-110.7, Hawaii Revised Statutes, provide experiential learning opportunities to public school students;
- (2) Changing the taxable year from which the measure applies from after 2006 to after 2050 to facilitate further discussion on the measure; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1133, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1133, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Chun Oakland, Nishihara, Taniguchi).

SCRep. 74 (Majority) Energy and Environment on S.B. No. 644

The purpose of this measure is increase the use of renewable energy to protect our environment, reduce pollution, and make housing more affordable.

The measure attempts to accomplish this purpose by mandating the installation of solar water heating devices in all new residential units constructed on or after January 1, 2008. It also provides an income tax credit for solar water heating devices installed in new homes prior to the mandate.

Your Committee received testimony in support of this measure from the Sierra Club, Hawai'i Chapter and Windward Ahupua'a Alliance. The Hawaii Renewable Energy Alliance submitted testimony in support of the intent of this measure with comments. Your Committee received testimony in opposition to this measure from Hawaiian Electric Company, The Gas Company, the Land Use Research Foundation of Hawaii, and the Building Industry Association- Hawaii. The Department of Taxation, the Department of Business, Economic Development, and Tourism, Hawaii Solar Energy Association, the Tax Foundation of Hawaii, and one individual submitted comments on this measure.

Your Committee finds that solar water heating is the best "clean" energy alternative for homes in Hawaii. Your Committee further finds that using fossil fuels to heat water is one of the most significant contributors to environmental pollution. Solar hot water needs to be a basic amenity in our homes, just like indoor plumbing and electricity. In addition, your Committee notes that mandating solar water heating is not a new concept. Israel has had this policy in place since 1957, recognizing the need to be petroleum independent from their neighboring countries.

Your Committee received a fiscal impact statement from the Department of Taxation indicating that this measure, if passed, would result in an annual revenue loss to the State of \$24.4 million for fiscal year 2009 and beyond.

Further, your Committee believes that affordability is essential to the success of this measure. Although solar water heating makes housing more affordable over time, an incentive is needed to set this in motion, raise awareness, and reduce the initial costs of the device.

Your Committee amended this measure by:

- (1) Providing a tax credit for owners of all homes, newly constructed or existing, who install a solar water heating device;
- (2) Requiring and installation inspection or a comparable quality assurance standard;
- (3) Delaying the date from which residential solar water heating becomes mandatory by one year so that solar water heating will be mandatory beginning January 1, 2009; and
- (4) Making the tax credit continuous, thus home owners who install a solar water heating device in their homes after January 1, 2009 will still be eligible for the tax credit.

Your Committee further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 644, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 644, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Trimble). Excused, 1 (Ihara).

SCRep. 75 Energy and Environment on S.B. No. 1098

The purpose of this measure is to reduce our dependence on petroleum products, encourage the purchase of motor vehicles that operate on alternative fuels, and promote the use of renewable energy in homes.

The measure attempts to accomplish this purpose by providing a general excise tax exemption for the installation of solar thermal energy systems and the purchase of fuel efficient automobiles.

Your Committee received a fiscal impact statement from the Department of Taxation indicating that this measure, if passed, would result in a revenue loss to the State of \$1.5 million for fiscal year 2008.

Your Committee received testimony in support of this measure from the Hawaii Solar Energy Association and Hawaii Renewable Energy Alliance. The Department of Business, Economic Development, and Tourism submitted testimony in support of the intent of this measure. The Department of Taxation and the Tax Foundation of Hawaii submitted comments on this measure.

Your Committee finds that promoting the use of solar energy for water heating and energy efficient vehicles is the most cost effective approach to reducing Hawaii's demand for imported fossil fuels. In addition, your Committee finds that energy conservation can be further advanced by general excise tax exemptions on the sale of biofuels, provided that the end consumer realizes the savings from this exemption.

Accordingly, your Committee amended this measure by:

- (1) Defining "solar thermal energy system";
- (2) Redefining the exemption for "fuel efficient" automobiles to alternative fuel motor vehicles or hybrid vehicles that meet or exceed thirty-five miles per gallon for highway driving and that can also operate using non-petroleum biodiesel;
- (3) Including a general excise tax exemption for the sale of biofuels with an assurance that the end consumer will benefit from the exemption; and
- (4) By adopting the Department of Taxation recommendation to clarify that the tax exemptions apply to gross income or gross proceeds received on or after January 1, 2008.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1098, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1098, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Ihara).

SCRep. 76 Energy and Environment on S.B. No. 1222

The purpose of this measure is to encourage the use of renewable energy technology systems in the State.

The measure attempts to accomplish this purpose by clarifying that tax credits are eligible to only in-state installations of renewable energy technology systems.

Your Committee received comments on this measure from the Department of Taxation, Hawaii Renewable Energy Alliance, and the Tax Foundation of Hawaii.

Your Committee received a fiscal impact statement from the Department of Taxation indicating that this measure, if passed, would result in a revenue gain to the State of \$29,000.

Your Committee finds that allowing renewable energy technology systems installed out-of-state to be eligible for tax credits defeats the purpose of offering tax credits. Your Committee further finds that clarification is needed to ensure only renewable energy technology systems installed in the State of Hawaii are eligible for tax credits.

Your Committee adopted the Department of Taxation's recommendations and amended this measure by re-inserting "resident" into section 235-129(a), Hawaii Revised Statutes, and by clarifying that all tax credits earned by an S corporation may be allocated to its shareholders.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1222, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1222, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Ihara).

SCRep. 77 (Joint) Health and Intergovernmental and Military Affairs on S.B. No. 11

The purpose of this measure is to decrease the financial burden of health care costs on patients in the State.

Your Committees received testimony in support of this measure from Hawaii Medical Association, the Hawaii Society of Clinical Oncology, Healthcare Association of Hawaii, and ten individuals. The Hawaii Coalition of Care Home Administrators submitted testimony in support of the intent of this measure with recommendations. The Department of Taxation submitted testimony with comments on this measure.

Your Committees find that the costs of health care services are increasing, as are the number of uninsured individuals and their ability to pay for these services. Your Committees further find that health care services are necessities to living, not a luxury, and; therefore, should not be subject to taxation.

Your Committees intend to accomplish the purpose of this measure by exempting all medical services performed or provided by a licensed medical practitioner, hospital, medical facility, nursing home or facility, or rehabilitation facility from the county surcharge on the state general excise tax.

The Department of Taxation submitted a fiscal impact statement regarding this measure indicating that the revenues derived from the Honolulu County surcharge on the general excise tax will be lowered by approximately \$9 million for fiscal year 2008 and beyond. The department further stated that this measure will impact the general fund by a loss of approximately \$900,000, or ten per cent of the surcharge collected.

Your Committees amended this measure by making a technical, nonsubstantive amendment and changing the effective date for the purpose of encouraging further discussion.

As affirmed by the records of votes of the members of your Committees on Health and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 11, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 11, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Menor).

SCRep. 78 Intergovernmental and Military Affairs on S.B. No. 797

The purpose of this measure is to provide an income tax credit for the construction of residential safe rooms.

Testimony in support of this measure was submitted by the Department of Defense. Testimony in opposition to this measure was submitted by the Department of Taxation.

The Department of Taxation was unable to ascertain the fiscal impact this measure would have on state tax revenue, but it opined that it would be substantial.

Your Committee finds that the construction of residential safe rooms would serve to mitigate the loss of life in a hurricane or tsunami. Presently, there is only one incentive under the current Loss Mitigation Grant Program that provides a partial reimbursement for approved resistive devices. A tax credit, coupled with a grant, will provide an additional incentive for homeowners to build safe rooms, which may reduce the dependence of public emergency shelters.

Your Committee further finds that the language of section 235-110.91(h), Hawaii Revised Statutes, should be added to this measure to require all claims for the income tax credit be filed within twelve months following the close of the taxpayer's taxable year, as is required of all other tax credits. Your Committee also finds, for clarification purposes, the term "taxpayer" should be changed to "individual" throughout the measure. In light of these findings, your Committee amended this measure to reflect these changes.

The intent of your Committee is to provide an income tax credit to encourage individuals to construct a residential safe room, which would serve to mitigate the loss of life in a hurricane or a tsunami.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 797, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 797, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 79 Intergovernmental and Military Affairs on S.B. No. 798

The purpose of this measure is to create a one-time tax credit for victims of the October 15, 2006 earthquake.

Taxpayers who are not claimed or are not otherwise eligible to be claimed as a dependent by another taxpayer for federal or Hawaii state individual income tax purposes, who file a net income tax return for a taxable year, would be eligible for this one-time nonrefundable earthquake victim tax credit.

Testimony in support of this measure was submitted by the Department of Defense. The Department of Taxation submitted comments on this measure.

The Department of Taxation was unable to ascertain the fiscal impact of the measure since it is unknown how much of the losses incurred due to a disaster may be covered by insurance or government and charitable relief.

Your Committee finds that as a result of the October 15, 2006 earthquake, many residents of the State of Hawaii have suffered property damage to their real or personal property. Many victims do not have earthquake insurance and many have paid for home repairs and replacement of household furnishings out of their own pockets. A one-time tax credit will allow victims to off-set some of their expenses from the damage caused by the October 15, 2006 earthquake.

Your Committee amended this measure by deleting subsection (d) in section 1, relating to qualified taxpayers certifying to the Department of Taxation that they are in compliance with all applicable federal, state, and county statutes, rules, and regulations, and therefore, eligible for the tax credit. This language was removed because the Department of Taxation does not have the staff necessary to carry out such a provision. Your Committee also made technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 798, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 798, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 80 Intergovernmental and Military Affairs on S.B. No. 805

The purpose of this measure is to provide an exemption from passenger motor vehicle taxes and registration fees for members of the Hawaii National Guard and Hawaii-based reserve components of the U.S. military.

Testimony in support of the measure was submitted by the State Department of Defense, the Department of Taxation, the Department of Transportation, the National Guard Association of Hawaii Insurance Trust, the Hawaii National Guard Association, the Hawaii National Guard Enlisted Association, and the Chamber of Commerce of Hawaii. The Tax Foundation submitted comments on the measure.

Your Committee finds that the exemption of passenger motor vehicle taxes and registration fees for members of the Hawaii National Guard and Hawaii-based reserve components of the U.S. military provided in this measure is similar to the exemption provided to nonresident military personnel under the Soldiers' and Sailors' Civil Relief Act.

Your Committee amended this measure by extending the exemption from passenger motor vehicle taxes and registration fees for members of the Hawaii National Guard and Hawaii Reserves to other resident active duty personnel, including Coast Guard personnel. Your Committee has also included language that prohibits the use of the exemption on commercial vehicles.

Your Committee intends that this amendment will strongly convey to members of the Hawaii National Guard, Hawaii Reserves and other active duty personnel, including Coast Guard personnel that the State of Hawaii truly cares and supports their service and commitment to our nation.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 805, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 805, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 81 Intergovernmental and Military Affairs on S.B. No. 808

The purpose of this measure is to establish a five per cent income tax credit for Hawaii employers that hire State residents who are members of the Hawaii National Guard. It also establishes that the maximum tax credit per Hawaii National Guard employee shall be \$1,000.

Testimony in support of this measure was submitted by the State of Hawaii Department of Defense, the Hawaii National Guard Association, the Hawaii National Guard Enlisted Association, the National Guard Association of Hawaii Insurance Trust, and the Chamber of Commerce of Hawaii.

Comments were submitted by the Department of Taxation and the Tax Foundation of Hawaii.

Your Committee finds that as our nation continues its war on terrorism, many of our citizen soldiers and airmen will be called to active military duty to deploy. To this end, this measure provides an incentive for employers to hire and continue to employ members of the Hawaii National Guard. It also serves as a key recruitment and retention incentive and, at the same time, demonstrates that the State of Hawaii truly cares and supports its National Guard.

Your Committee further finds that the terms employer and taxpayer are used interchangeably throughout this measure. In order to alleviate any confusion regarding these terms, your Committee has replaced the term, "employer" with "taxpayer."

The Department of Taxation testified that, if this measure is enacted, the estimated revenue loss would be approximately \$5,000,000 annually. No methodology on how the amount was calculated was provided.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 808, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 808, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 82 Intergovernmental and Military Affairs on S.B. No. 809

The purpose of this measure is to establish the Hawaii Reserve Military Family Relief Special Fund in order to provide emergency economic relief to families of deployed members of the Hawaii National Guard and Federal Reserve members and create an income tax check-off to fund it.

Testimony in support of the measure was submitted by the Department of Defense and the Chamber of Commerce of Hawaii. Testimony in opposition to the measure was submitted by the Department of Budget and Finance. Comments were submitted by the Department of Taxation and the Tax Foundation of Hawaii.

Your Committee finds that members of the Hawaii National Guard and Federal Reserve units and their families are faced with numerous challenges when members are activated and deployed to hostile and hazardous combat and peacekeeping zones. All too often, members and their families face unexpected emergencies and the need for outside financial assistance is essential to their well-being. Establishment of the Hawaii Reserve Military Family Relief Special fund provides members and their families with a source for this assistance.

Your Committee finds that delaying the establishment of the Hawaii Reserve Military Family Relief Special Fund to apply to taxable years beginning after December 31, 2010, would provide the Department of Taxation adequate time to add a check-off provision to the income tax return form. As such, your Committee has amended the bill to provide for this date.

Your Committee further finds that the amendments made to section 235-102.5, Hawaii Revised Statutes, separates certain language contained in the existing subsection (d) and establishes it as a new subsection (f). Your Committee believes that the separation of this language was inadvertent, since the separated language is vital to the operation of subsection (d). In light of this belief, your Committee has amended the measure by reinstating subsection (d) as it currently exists.

Your Committee received a fiscal impact statement from the Department of Taxation that this check-off would generate approximately \$100,000 to \$250,000 annually. No methodology for calculating the amount was furnished.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 809, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 809, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 83 Intergovernmental and Military Affairs on S.B. No. 1341

The purpose of this measure is to appropriate funds to:

- (1) Cover the costs of recovery and remediation efforts as a result of storms that occurred in February and March 2006;
- (2) Stabilize and repair storm-damaged slopes, drainage ways, and drainage systems to restore functionality and prevent future damage;
- (3) Hire consultants to determine structural integrity of dams and reservoirs statewide, assess potential immediate risk, and recommend long-term plans to ensure dam safety; and
- (4) Investigate, review, and litigate all issues relating to the Ka Loko dam breach that occurred in March 2006.

The bill appropriates \$500,000 for fiscal year 2007-2008, to be expended by the Department of Land and Natural Resources, and \$2,000,000 for fiscal year 2007-2008, to be expended by the Department of the Attorney General.

Your Committee received testimony in support of this measure from the Department of Defense, the Department of Land and Natural Resources, and the Attorney General's Office.

Your Committee finds that the state agencies requesting funds pursuant to this measure continue to respond to the impact of the storms that occurred in February and March, 2006, to ensure the safety of all of Hawaii's residents. All of Hawaii's residents will benefit from the State's ongoing effort to remediate after the storms and will safeguard Hawaii's residents from natural disasters of this sort in the future. The appropriations made by this measure are in the public interest and for the public health, safety, and the general welfare of the State.

Your Committee has changed the effective date from upon approval to July 1, 2007.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1341, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1341, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 84 Intergovernmental and Military Affairs on S.B. No. 1625

The purpose of this measure is to allow each county to assess a rental motor vehicle surcharge tax payable to the respective county assessing the tax and to extend the sunset date of the \$3 a day state rental motor vehicle surcharge tax.

Testimony in support of this measure was submitted by the Department of Transportation. Testimony in opposition to this measure was submitted by the Legislative Committee of Catrala Hawaii, Avis Budget Group, Dollar Rent A Car, Dollar Thrifty Automotive Group, Inc, and Enterprise Rent-A-Car. Comments were submitted by the Department of Taxation, Hawaii Insurers Council, and the Tax Foundation of Hawaii.

Your Committee finds that it is important to provide a funding source for state highway improvement and maintenance projects to ensure that Hawaii's highways and roads are as safe as possible. To this end, your Committee believes that the counties should have the option to assess a rental motor vehicle surcharge tax and the responsibility for administering a county rental motor vehicle surcharge tax should fall on the electing county. Your Committee also believes that the sunset date on the existing \$3 state rental motor vehicle surcharge tax should be extended from 2007 to 2009 to produce additional revenue.

Your Committee amended the bill by:

- (1) Authorizing the counties to assess a motor vehicle surcharge tax of up to \$1 per day from October 2007, to August 31, 2009, payable to the respective county; provided that the county adopts an ordinance and meets other requirements prior to October 1, 2007;
- (2) Placing the responsibility of administering the county rental motor vehicle surcharge tax on the electing county; and
- (3) Extending the sunset date on the existing \$3 per day state rental motor vehicle surcharge tax from October 1, 2007, to August 31, 2009.

Your Committee intends that these amendments will provide funding for state highway improvement and maintenance projects.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, by extending the \$3 state rental motor vehicle surcharge, if passed, would result in a revenue gain of \$12,000,000 in fiscal year 2008, and \$16,000,000, each fiscal year thereafter. Allowing the counties to assess a motor vehicle surcharge of up to \$3 per day, would result in revenue gains totaling as much as \$36,000,000 in fiscal year 2008, and \$48,000,000 in each fiscal year thereafter. The fiscal impact statements submitted did not specify the methodology by which the fiscal impacts were calculated. In addition, your Committee notes that because the amended measure only allows a county motor vehicle surcharge tax of up to \$1 day, the projected revenue generation will be less than what is listed in the fiscal impact statement.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1625, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1625, S.D. 1, and be referred to the Committees on Commerce, Consumer Protection and Affordable Housing and Transportation and International Affairs.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 85 (Majority) Energy and Environment on S.B. No. 1703

The purpose of this measure is to reduce Hawaii's dependency on imported petroleum.

The measure attempts to accomplish this purpose by:

- (1) Levying an additional one per cent general excise tax on the gross proceeds of the sale of passenger cars and light duty trucks weighing more than five thousand pounds curb weight;

- (2) Establishing a Clean Fuel Revolving Fund into which the additional one per cent tax will be deposited to provide rebates to individuals who purchase qualified alternative fuel vehicles or hybrid vehicles in Hawaii; and
- (3) Providing a general excise tax exemption for amounts received from the sale of qualified alternative fuel vehicles and hybrid vehicles.

Your Committee received testimony in support of this measure from the Sierra Club, Hawai'i Chapter. Your Committee received testimony in opposition to this measure from the Alliance of Automobile Manufacturers. The Department of Taxation submitted testimony in opposition to part of this measure. The Department of the Attorney General submitted recommendations for this measure. The Department of Business, Economic Development, and Tourism, Hawaii Automobile Dealers Association, and the Tax Foundation submitted comments on this measure.

Your Committee finds that encouraging the purchase of fuel efficient and alternative fuel vehicles is crucial to Hawaii's energy and economic security. Your Committee further finds that the "feebate" program established in this bill may be an effective method of accomplishing this goal with a reduced fiscal impact to the State. However, significant concerns were raised by several testifiers including the impact this measure will have on trucks used for agricultural purposes and work duty.

Your Committee received a fiscal impact statement from the Department of Taxation indicating that the additional general excise tax on certain passenger cars and trucks does not have any revenue impact. However, this general excise tax would collect an additional \$6.8 million which would then be allocated to the Clean Fuel Revolving Fund.

Your Committee amended this measure by changing the effective date to encourage further discussion and to enable subsequent committees to address concerns about this bill.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1703, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1703, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, 1 (Trimble). Excused, 2 (Ihara, Kokubun).

SCRep. 86 Energy and Environment on S.B. No. 985

The purpose of this measure is to reduce petroleum dependency and encourage the use of hybrid vehicles.

The measure attempts to accomplish this purpose by offering tax credits to individuals who purchase hybrid motor vehicles.

Your Committee received testimony in support of this measure from two individuals. Testimony supporting the intent of this measure was submitted by the Sierra Club, Hawai'i Chapter and the Alliance of Automobile Manufacturers. The Department of Taxation, the Tax Foundation of Hawaii, and one individual submitted comments on this measure.

The Department of Taxation was unable to determine the fiscal impact of the measure due to the fact that the amount of the tax credit is unspecified.

Your Committee finds that minimizing the use of fossil fuels is essential to Hawaii's energy independence. An effective mechanism to encourage the purchase of vehicles that are powered by alternative fuels is needed. Your Committee further finds that general excise tax exemptions are the most effective and expedient means of achieving this goal.

Accordingly, your Committee amended this measure by removing the tax credit language and inserting language that offers a general excise tax exemption to purchasers of "alternative fuel vehicles." Your Committee defined "alternative fuel vehicle" as a motor vehicle that obtains forty miles or more per gallon and as defined in section 30B of the Internal Revenue Code (with respect to all alternative motor vehicle tax credit), and includes advanced lean burn technology motor vehicles, alternative fuel motor vehicles, fuel cell motor vehicles, and hybrid motor vehicles.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 985, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 985, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Ihara).

SCRep. 87 Education on S.B. No. 94

The purpose of this measure is to establish a revolving fund to support the Department of Education's food distribution program.

Testimony in support of this measure was submitted by the Department of Education (DOE). Testimony in opposition to this measure was submitted by the Department of Budget and Finance.

Your Committee finds that the DOE provides commodity foods to agencies, including public schools, private schools, and other state institutions, that participate in the National School Lunch Program. Commodity foods are currently stored in warehouses within the State; however, the DOE is prohibited from using federal funds to pay fees associated with the state-contracted warehouses. Your Committee further finds that, according to the DOE, warehouse charges for fiscal year 2006 totaled in excess of \$1.2 million. As the DOE is unable to continue to shoulder the costs of warehouse expenses on its own, it is forced to recover a portion of the costs from those agencies that are the recipients of commodity foods.

Your Committee determines that the establishment of a revolving fund, funded through the collection of fees collected for, interest earned on, and other moneys associated with the DOE's food distribution program, is necessary to support the continued operations of the food distribution program and allow it to be a self-sustaining program.

Accordingly, your Committee has amended this measure by:

- (1) Including an appropriation out of the food distribution program revolving fund for the payment of services provided by state contracted warehouses under the DOE food distribution program; and
- (2) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 94, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 94, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 88 Education on S.B. No. 76

The purpose of this measure is to require the Department of Education to develop a plan to provide for air conditioning systems in all public school facilities within the next ten years and to incorporate energy conservation initiatives in public school facilities.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association. Testimony in opposition to this measure was submitted by the Department of Education (DOE).

Upon further review of the measure and the testimony provided, your Committee has amended the purpose of this measure to require the development and implementation of a plan for temperature reduction measures in public school facilities that incorporates energy conservation initiatives and appropriate funds for that purpose.

Your Committee finds that although Hawaii's tropical climate is ideal for outdoor recreational activities, it is not necessarily conducive to learning for public school students. Many of Hawaii's public schools are not equipped with air conditioning or other temperature reduction measures, which can make the classroom environments uncomfortable and even unbearable for students and teachers alike. Your Committee further finds that the DOE maintains a lengthy priority list of schools which need to be equipped with air conditioning systems. The DOE has begun installing air conditioning systems at the highest priority schools and currently follows energy efficiency guidelines in undertaking each project. However, according to the DOE's calculations, the funds necessary to comply with the objectives of this measure would require total funding in the neighborhood of \$1,000,000,000 or \$100,000,000 each year over a ten-year period. Additionally, the DOE has indicated that it does not believe air conditioning all public school facilities within the next ten years is an achievable goal.

Your Committee is mindful of the DOE's concerns, but remains committed to providing public school students with comfortable learning environments. Your Committee understands that the task of providing air conditioning to all public school facilities within the State, while incorporating energy conservation initiatives is a daunting proposition that requires a comprehensive approach to the problem.

Therefore, your Committee determines that a more realistic approach to the problem would be to develop alternative methods for reducing the temperature of classrooms. Your Committee believes that creative and innovative methods for establishing suitable classroom environments for students may be utilized, including the use of alternative energy resources, incentives for energy consumption or cost reduction, alternative materials for buildings, and other energy efficient measures. Additionally, the DOE should seek the expertise of knowledgeable individuals or firms in the development of the plan to ensure the most cost-effective and efficient methods are being used.

Accordingly, your Committee has amended this measure by:

- (1) Deleting the requirement that the DOE develop a plan to provide for air conditioning systems in all public school facilities within the next ten years and to incorporate energy conservation initiatives in public school facilities;
- (2) Requiring the DOE to develop a plan to provide for temperature reduction measures in public school facilities within the State that incorporates energy conservation initiatives within a \$200,000,000 budget over the next ten years;
- (3) Specifying that the plan should include:
 - (A) The utilization of temperature reduction measures, which may include air conditioning, tinted glass for windows, thicker insulation, reflective roofing, trees or other vegetation for shade, and wooden versus glass or aluminum louvers;
 - (B) The incorporation of energy conservation initiatives throughout public school facilities;
 - (C) The use of wind, photovoltaic, hydropower, geothermal energy, ocean thermal energy conversion, and wave energy technologies;
 - (D) The creation of incentives for schools to reduce electrical energy consumption or costs, or both, including returning up to fifty per cent of the savings at each school to the school for its own use;
 - (E) The development of long-term plans to reduce usage or costs, or both, related to electricity, gas, and water, including the construction of new infrastructures;
 - (F) The establishment of energy reduction usage or cost goals, or both, for all public school facilities and timelines for attaining those goals; and
 - (G) Providing for the implementation of energy efficient lights, appliances, or other fixtures in all public school facilities;
- (4) Requiring the DOE to contract with a private engineering firm, or other appropriate entity, in developing the plan; and
- (5) Including an authorization for the issuance of general obligation bonds and making an appropriation of \$20,000,000 per year for the fiscal biennium for the development and implementation of the plan.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 76, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 76, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 89 Education on S.B. No. 1179

The purpose of this measure is to appropriate funds for non-school hour programs for school-age children.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii Youth Services Network, and the Coalition for a Drug-Free Hawaii. Testimony in opposition to the measure was submitted by the Office of Youth Services.

Your Committee finds that in the United States, nearly two-thirds of school-age children are from families where both parents work outside of the home. As a result, many school-age children are left unattended or without some type of formal non-school hour care program in which to participate. Your Committee further finds that structured programs and activities during non-school hours for school-age children help to reduce the risk of delinquency and behavioral problems and establish a safe and nurturing environment for school-age children.

The Department of Education administers the A+ program, which provides non-school hour care to children enrolled in Hawaii public elementary schools in grades kindergarten through six. Currently, Hawaii is the only state that makes non-school hour child care universally available to all children enrolled in public elementary schools and partially subsidizes its cost to parents. However, no similar program exists for older children who require care and supervision.

Your Committee believes in the importance of caring for our youth and protecting them from the dangers of juvenile crime, drug use, and experimentation with tobacco, alcohol, and sex, during non-school hours. The establishment of non-school hour programs for children in grades kindergarten through twelve will provide for the safety of our children and help to reduce juvenile crime, improve school performance, and provide our children with structured non-school learning experiences. Your Committee also believes that a non-school hour activities program coordinator could ensure that all students have access to quality non-school hour programs through the coordination of all non-school hour activities.

Accordingly, your Committee has amended this measure by:

- (1) Including an appropriation for a non-school hour activities program coordinator to coordinate all non-school hour activities; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1179, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1179, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Taniguchi).

SCRep. 90 Education on S.B. No. 766

The purpose of this measure is to recruit and retain qualified teachers for employment at neighbor island public schools through the establishment of a loan forgiveness program.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawaii, the Hawaii Teacher Standards Board, and one individual. Testimony in opposition to this measure was submitted by the Department of Budget and Finance and one individual.

Your Committee finds that qualified teacher recruitment and retention for our public schools is of the utmost importance to providing quality education to our children. Economics often play a major role in the recruitment and retention of teachers, and the high cost of living in Hawaii only exacerbates the existing teacher shortage problem. Teaching positions in public schools in geographically isolated locations or hard-to-fill positions in densely populated locations present a particular challenge for the Department of Education. Alternative incentives to increased salary must be explored to be cost-effective while still ensuring our schools are staffed by qualified teachers. Your Committee recognizes that the Hawaii Educator Loan Program, administered by the University of Hawaii, was established as a tool for recruiting students to become educators and teach in public schools in the State. Your Committee believes that the establishment of a similar program geared towards filling hard-to-fill positions throughout the entire State would assist the Department of Education in its recruitment and retention efforts.

Your Committee recognizes that the Department of Education continues to increasingly be tasked with greater responsibilities and may require the assistance of a financial institution in administering a loan forgiveness program. Additionally, your Committee recognizes that a schedule for the reduction of loan repayment amounts is also necessary to truly incentivize the program and that the program should be limited to allow participation only while continuing to teach in a hard-to-fill position.

Accordingly, your Committee has amended this measure by:

- (1) Expanding its application from teachers who are employed at neighbor island schools to teachers throughout the State who are employed in hard-to-fill positions;
- (2) Authorizing the Department of Education to contract with a financial institution for the administration of the Educator Loan Forgiveness Program;
- (3) Creating a loan forgiveness schedule for reduced payments for years one through seven;
- (4) Limiting participation in loan forgiveness to teachers who continue to teach in hard-to-fill positions; and
- (5) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 766, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 766, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Taniguchi).

SCRep. 91 Education on S.B. No. 1095

The purpose of this measure is to ensure that state child serving agencies maintain a high quality of service.

The measure accomplishes this purpose by establishing quality assurance committees at various levels within the Department of Education to address policies impacting the delivery of services by state child serving agencies and to provide opportunities for community input and feedback.

Testimony in support of this measure was submitted by the Department of Education, the Department of Health, the State Council on Developmental Disabilities, and the Special Education Advisory Council. Testimony in opposition to the measure was submitted by one individual. Comments on the measure were submitted by the Hawaii State Teachers Association and the Office of Information Practices.

Your Committee finds that ensuring the delivery of quality services by state child serving agencies is necessary in caring for our children and in fulfilling the State's obligation under the Felix Consent Decree. Your Committee further finds that efforts to establish a statewide quality assurance system to monitor the performance and efficacy of services provided to children by state child serving agencies have been undertaken by the Departments of Education and Health. Furthermore, testimony indicates that efforts to develop a Memorandum of Agreement among state child serving agencies may negate the necessity of the establishment of multiple quality assurance committees as provided under this measure.

However, your Committee believes that the Legislature should remain committed to ensuring that quality services are being provided to our children and determines that an ombudsman with knowledge of the system and the services available would be beneficial to stakeholders in resolving problems and assuring the delivery of appropriate services. An ombudsman would be of great service to stakeholders and provide further assurances regarding the quality of services being provided within the State.

Accordingly, your Committee has amended this measure by:

- (1) Removing its contents, which created quality assurance committees at the school, complex, district, and state levels;
- (2) Deleting the appropriation for support staff for the state quality assurance committee;
- (3) Including an appropriation for one full-time equivalent ombudsman position for each school district to assure the delivery of quality services by state child serving agencies; and
- (4) Specifying that each ombudsman shall:
 - (A) Assist families in ensuring that their children are receiving state services that meet the needs of each child by helping to monitor the performance and effectiveness of the services being provided;
 - (B) Address questions and concerns of stakeholders and other interested parties with regard to the delivery of services by state child serving agencies;
 - (C) Investigate complaints from stakeholders or other members of the public against a department or child serving agency, or other organization;
 - (D) Work to resolve individual issues through problem solving with stakeholders; and
 - (E) Help to identify issues or policies within the system and develop solutions for implementation within the Department of Education.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1095, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1095, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Chun Oakland, Nishihara, Taniguchi).

SCRep. 92 Intergovernmental and Military Affairs on S.B. No. 733

The purpose of this measure is to appropriate funds for the Office of Veteran Services to cover the cost of staff, printing, and distribution of a newsletter, published quarterly for each year, in order to inform veterans on important issues, including any changes to their benefits, the availability of support services and programs, and relevant events and ceremonies.

This measure appropriates \$100,000 for fiscal year 2007-2008, and \$100,000 for fiscal year 2008-2009.

Your Committee received testimony in support of this measure from the Department of Defense, the State Advisory Board on Veteran Services, and one individual.

Your Committee finds that it is important to provide timely and accurate communication to the 114,000 veterans who reside in the State of Hawaii, elsewhere, and abroad. There are still thousands of veterans who remain unaware of their benefits. This newsletter will continue to make a significant impact in reaching and informing veterans on important issues regarding their benefits.

Your Committee further finds that the funding for this measure should be expended by the Office of Veteran Services instead of the Department of Defense.

Your Committee amended the measure to provide for this change in expending agency, along with other minor grammatical changes. Your Committee intends that the Office of Veteran Services is a more appropriate expending agency for this measure.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 733, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 733, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 93 Intergovernmental and Military Affairs on S.B. No. 1428

The purpose of this measure is to raise the salary cap for the position of Director of the Office of Veterans Services from an amount not to exceed sixty-nine per cent of the salary of the Director of Human Resources Development to an amount not exceeding seventy-four per cent of the salary of the Director of Human Resources Development.

Testimony in support of this measure was received by the Department of Defense, the Advisory Board on Veterans Services, and the Department of Human Resources Development

Your Committee finds that due to the increased deployments of the Hawaii National Guard and Hawaii-based Reserve components, the State's veteran population is expected to continue to grow. The Office of Veterans Services is responsible for the development and management of policies and programs related to veterans and their families. With the increase in veterans, and the responsibilities and expertise that is required for this position, the current compensation limitation is too low and has not kept pace with the inflation. Under existing law, the maximum salary

allowable for this position is \$64,608.84. This measure would allow the Governor to increase the salary up to approximately \$70,670.00, based on the salary recommendations for department heads contained in the 2004 Executive Salary Commission Report. This measure provides for fair compensation for the Director of the Office Veterans Services position.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1428 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 94 Health on S.B. No. 51

The purpose of this measure is to protect the health and safety of individuals who receive home care services.

Your Committee received testimony in support of this measure from Healthcare Association of Hawaii and Castle Medical Center. The Department of Health submitted testimony in support of the intent of this measure with comments.

Your Committee finds that the health care services sector is growing in home and community-based provider markets. Increasingly, elderly and disabled individuals want to be cared for and remain living in their homes instead of being institutionalized. Home care agencies provide many of the needed supportive services in the home. However, your Committee finds that these home care agencies do not have to be licensed. Currently, the only requirement for home care agencies in Hawaii is a general excise tax license.

It is the intent of your Committee to accomplish the purpose of this measure by requiring home care agencies to be licensed. This will ensure that quality care is being provided and will help to protect the often vulnerable population from potential abuse, exploitation, and improper care.

Your Committee has amended this measure by adopting the Department of Health recommendation of removing the appropriation from the measure. According to the department, the licensing process can be established using existing resources within the department. Your Committee has also made a technical amendment for the purpose of clarity.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 51, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 51, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 95 Health on S.B. No. 69

The purpose of this measure is to provide comprehensive quality health care and alleviate the health care workforce shortage in Hawaii.

The measure accomplishes this purpose by appropriating funds to an unspecified agency to support the development and maintenance of a statewide comprehensive health care workforce map and database that appropriately and effectively assesses staffing needs.

Your Committee received testimony in support of this measure from the Mayor of the County of Hawaii, Hawaii Medical Service Association, Hawaii Pacific Health, Hawaii Psychiatric Medical Association, and two individuals. Your Committee received testimony with comments on this measure from Department of Health, Department of Human Services, and Hawaii Medical Association.

Your Committee finds that a severe shortage of health care workers exists in our State, especially on the neighbor islands. Your Committee further finds that data is critical to understanding our workforce needs. Currently, a comprehensive, publicly-available database does not exist.

It is the intent of your Committee that the database is updated on a regular basis to maintain its accuracy and assures appropriate confidentiality.

Your Committee has amended the measure by deleting the specific amount appropriated and leaving it unspecified.

Your Committee further finds that, although it has amended the measure by removing the specific amount to be appropriated, an appropriation in the amount of \$500,000 is recommended for the initial development and maintenance of the state health care workforce map and database.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 69, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 69, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 96 Health on S.B. No. 240

The purpose of this measure is to authorize the Neurotrauma Special Fund to be used for funding direct services that assist individuals with neurotraumatic injuries.

Your Committee received testimony in support of this measure from the Hawaii Disability Rights Center, the Occupational Therapy Association of Hawaii, Hawaii Centers for Independent Living, Hawaii Psychiatric Medical Association, the Center on Disability Studies, and three individuals. Your Committee received testimony in opposition to this measure from the Governor's Policy Office. Testimony making comments on this measure was submitted by the Department of Health, the Department of Human Services, and the Department of Budget and Finance.

Your Committee finds that individuals with neurotraumatic injuries are in need of basic health and human services. Your Committee further finds that many of these individuals do not qualify for services from the Developmental Disabilities Division or the Adult Mental Health Division of the Department of Health.

It is the intent of your Committee to ensure that individuals with neurotraumatic injuries receive the direct services they need, by authorizing the Neurotrauma Special Fund to pay for these services. Further, it is not the intent of your Committee to place the State in a position of vulnerability that would subject the State to liability in the event of insufficient resources in the Neurotrauma Special Fund to pay for direct services.

Accordingly, your Committee amended this measure by adding a limitation of liability provision stating that the responsibilities of the Department of Health are limited to the resources available and that no action may be brought to compel the provision of further services.

Your Committee further amended this measure by changing the effective date for the purpose of encouraging further discussion on this matter.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 240, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 240, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 97 Health on S.B. No. 810

The purpose of this measure is to ensure that the state-owned lands in the Waimano ridge area are used in an effective, appropriate, and “community-friendly” manner that has the approval of the residents of the Waimano ridge community and the State.

Your Committee received testimony in support of this measure from the Center on Disability Studies. Your Committee received testimony in opposition to this measure from the Department of Health.

Your Committee finds that the Waimano ridge task force is in need of financial support in order for it to develop and implement a “community-friendly” master plan for the state-owned Waimano ridge lands.

Your Committee intends to accomplish the purpose of this measure by providing needed funding through appropriations and general obligation bonds for the Waimano ridge task force to establish a comprehensive Waimano ridge master plan, for a full-time facilities manager position, and for building projects. This funding will enable the Waimano ridge task force to develop a master plan that facilitates the establishment of a “totally integrated community” where activities on the state-owned Waimano ridge lands will be community-friendly. It is the further intent of your Committee to authorize the issuance of general obligation bonds to support building demolition, building improvements, and water system upgrades for the Waimano ridge lands that will allow for the implementation of the master plan.

Your Committee amended this measure by adopting the Department of Health’s recommendation to change the purpose section language to reflect the Legislature’s support of good communications and relations between the State and the Waimano ridge community residents.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 810, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 810, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 98 Health on S.B. No. 952

The purpose of this measure is to enable Kahuku Hospital to remain in operation and continue to serve the residents and visitors of the north shore of Oahu.

The measure accomplishes this purpose by authorizing the Hawaii Health Systems Corporation to acquire Kahuku Hospital. This acquisition will enable the hospital to remain in operation, and retain its certificate of need and critical access hospital designation.

Your Committee received testimony in support of this measure from the Department of Health, Hawaii Health Systems Corporation, Kahuku Hospital, the Kahuku Hospital Laboratory, Healthcare Association of Hawaii, Brigham Young University Hawaii, the Polynesian Cultural Center, Hawaii Reserves, Inc., Ko’olauloa Community Health and Wellness Center, Inc., Na Lei Lokahi- The Salvation Army Family Treatment Services, United Public Workers, Queen Lili’uokalani Children’s Center, the Laie Community Association, and two hundred forty-two individuals and residents of the Kahuku community. Your Committee received testimony from the State Procurement Office that was limited to opposing the proposed provision that would exempt Kahuku Hospital from the procurement requirements of Chapters 103D and 103F, Hawaii Revised Statutes.

Your Committee finds that Kahuku Hospital is in jeopardy of closing its doors as of June 30, 2007, if it cannot be acquired by Hawaii Health Systems Corporation as part of its Chapter 11 bankruptcy reorganization proceeding. Your Committee further finds that Kahuku Hospital is the only facility in the community offering emergency services and therefore, it is imperative to keep the hospital operating in order to serve the residents and visitors of the north shore of Oahu.

It is the intent of your Committee that this measure gives authorization and support for Hawaii Health Systems Corporation to acquire Kahuku Hospital and in no way mandates Hawaii Health Systems Corporation to acquire Kahuku Hospital.

If a voluntary acquisition takes place, your Committee intends for the transition to be based on sound management principles, basic community needs, and not to jeopardize the present support of other hospitals in the Hawaii Health Systems Corporation system. In addition, the Department of Health estimates that this acquisition will generate approximately \$3.9 million in transition costs; \$1 million for Hawaii Health Systems Corporation and \$2.9 million for Kahuku Hospital.

Further, it is the intent of your Committee to ensure the continuation of Kahuku Hospital’s emergency services while encouraging the development of an alternative model of health care that utilizes federal funding and works in conjunction with community health centers.

Your Committee adopted the recommendations of the State Procurement Office and amended this measure by deleting the language exempting Kahuku Hospital from the procurement requirements of Chapters 103D and 103F, Hawaii Revised Statutes. Your Committee further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 952, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 952, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Baker). Noes, none. Excused, 1 (Whalen).

SCRep. 99 Health on S.B. No. 1260

The purpose of this measure is to keep Kahuku Hospital operating in order to serve the residents of the north shore of Oahu.

Your Committee received testimony in support of this measure from the Department of Health, Hawaii Medical Association, the Councilmember for City and County of Honolulu District II, and thirty-one individuals. The Department of the Attorney General submitted testimony with recommendations on this measure.

Your Committee finds that Kahuku Hospital is in jeopardy of closing its doors in March 2007. Your Committee further finds that by enabling Kahuku Hospital to file for chapter 11 reorganization bankruptcy, rather than for chapter 7 liquidation bankruptcy, will allow the hospital to:

- (1) Continue operations;
- (2) Preserve its hospital license;
- (3) Retain its certificate of need and critical access hospital designation; and
- (4) Reorganize and settle its debts.

Your Committee further finds that the board of directors of Kahuku Hospital has agreed to continue the hospital's operations into the first half of 2007 under a chapter 11 reorganization proceeding pending the enactment of legislation that will have the effect of causing Kahuku Hospital to be acquired by Hawaii Health Systems Corporation, or otherwise to become affiliated with the Hawaii Health Systems Corporation.

It is the intent of your Committee to accomplish the purpose of this measure by authorizing a grant pursuant to chapter 42F, Hawaii Revised Statutes, and appropriating \$950,000 to Kahuku Hospital to maintain the hospital's operations, to cover the costs associated with the chapter 11 reorganization, and the potential transfer of hospital operations to the Hawaii Health Systems Corporation.

Your Committee has adopted the recommendations of the Department of the Attorney General and amended this measure by including language that clarifies that the grant pursuant to chapter 42F, Hawaii Revised Statutes, is to be appropriated as an emergency appropriation in order to simplify and expedite the grant to Kahuku Hospital.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1260, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1260, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 100 (Joint/Majority) Transportation and International Affairs and Intergovernmental and Military Affairs on S.B. No. 1042

The purpose of this measure is to lessen the amount of artificial light that contributes to the diminishing ability of the telescopes on Mauna Kea and Haleakala to conduct research.

Specifically, the measure requires the Department of Transportation, to the extent that it is practical, to comply with county ordinances and standards relating to outside lighting for all new installations at airports, harbors, and highways.

Your Committees received testimony in support of this measure from the University of Hawaii Institute for Astronomy and the Commission 50 of the International Astronomical Union.

The Department of Transportation submitted testimony in opposition to this measure.

Your Committees find that Hawaii is home to two of the world's premier astronomy observatories, Haleakala on Maui and Mauna Kea on Hawaii. Mauna Kea is considered the finest observing site in the world. One of the most critical needs for preserving the value of these sites is to reduce bright sources of light that penetrate the dark night sky. Recent nighttime images from the international space station revealed that some of the brightest sources of light on Maui and Hawaii are the airports and harbors on both islands. Astronomers on Mauna Kea are now detecting artificial light sources from urban areas that are diminishing the telescopes' ability to do research.

Your Committees have amended this measure to take out the requirement that airport runways be included by the Department of Transportation when complying with county ordinances and standards relating to outside lighting for all new installations at airports, harbors, and highways.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1042, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1042, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, 1 (Hemmings). Excused, 1 (Taniguchi).

SCRep. 101 (Joint) Transportation and International Affairs and Intergovernmental and Military Affairs on S.B. No. 1048

The purpose of this measure is to enhance traffic safety statewide by requiring that, whenever construction or repair work that requires the use of steel plates is performed on a public highway by the State, a political subdivision, or a private contractor, motorists be warned with appropriate signage of the presence of steel plates in the roadway.

Your Committees received testimony in support of this measure from the Department of Transportation, Street Bikers United Hawaii, the Maui Chapter of Street Bikers United Hawaii, and the Oahu Chapter of Street Bikers United Hawaii.

Your Committees find that steel plates placed in the roadway during construction or repairs can pose a threat to motorists and their vehicles. Steel plates can be hazardous because of the raised edge presented to oncoming traffic. They can also be dangerous for motorcyclists even in the best weather and are especially hazardous for motorcyclists in wet conditions.

The State lacks a uniform policy to warn motorists of the presence of steel plates in the roadway during construction or repairs. While the Department of Transportation adheres to the standards of the Manual on Uniform Traffic Devices, these standards do not address the use of steel plates. The County of Maui has recently adopted a policy requiring the use of signs to warn motorists whenever steel plates are used. However,

the County of Hawaii has no policy requiring placement of warning signage, the County of Kauai believes that existing road construction signage is sufficient, and the City and County of Honolulu allows contractors to determine what signage is necessary.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1048 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Taniguchi).

SCRep. 102 Health on S.B. No. 667

The purpose of this measure is to allow students who graduated from an accredited mental health counselor program prior to July 1, 2007, to be licensed under the original licensure standard and to make licensure of mental health counselors permanent.

Your Committee received testimony in support of this measure from Kaiser Permanente regarding making mental health licensure permanent, Chaminade University, the Alliance for Professional Counselor Licensure, Hawaii Rehabilitation Counseling Association, Sestak Rehabilitation Services, Lokahi Treatment Centers, and ten individuals. Your Committee received testimony in opposition to this measure from the Department of Commerce and Consumer Affairs.

Your Committee finds that Act 14, Session Laws of Hawaii 2006 (Act 14), raised the requirements for licensure of mental health counselors. Your Committee further finds that Act 14 resulted in the unintended consequence of prohibiting individuals from licensure who had pursued licensure under the original standard that existed prior to the enactment of Act 14.

In addition, your Committee finds that this measure, while having the effect of grandfathering in students who graduated prior to the enactment of Act 14, also sets aside the requirement specific to mental health studies and experience, an integral part of the new qualifications for licensure and consumer protection.

It is the intent of your Committee to accomplish the purpose of this measure by permitting individuals that have graduated from an accredited mental health counselors program before July 1, 2007, to apply for licensure. However, your Committee believes that the current requirements that focus on experience in the mental health setting are important for consumer protection. It is the further intent of your Committee to allow the Auditor to conduct a review of the program prior to December 2008, in order to evaluate the effectiveness of the licensure requirements and the implementing agency.

Accordingly, your Committee amended this measure by removing the language that permits licensure for applicants who:

- (1) Have a degree in counseling or a field related to the practice of mental health counseling;
- (2) Completed the required hours of intern and post-graduate experience in counseling with supervision by a person who holds an advanced degree in counseling; and
- (3) Have passed the National Counselor Examination for Licensure and Certification.

Your Committee further amended this measure by requiring an applicant who graduated from the specified program before July 1, 2007, to have experience that is specific to mental health counseling or the equivalent by requiring that:

- (1) The required academic terms, graduate credit hours, supervised client contact, and certification shall be verified by written certification by an official of the institution of higher education attesting that the practicum intern experience has been completed and is equivalent to a mental health graduate level program; and
- (2) The required three thousand hours of post-graduate experience in the practice of mental health counseling with one hundred hours of face-to-face clinical supervision shall be verified through written certification by an officer of the employing agency and the clinical supervisor attesting to the completion of the post-graduate experience.

Your Committee further amended this measure by deleting the language that would repeal the sunset date; thereby, preserving the sunset date in section 26H-2, Hawaii Revised Statutes, to ensure an Auditor's review of the licensure program.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 667, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 667, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 103 Health on S.B. No. 257

The purpose of this measure is to preclude controlled substances from being sold on the streets by preventing the improper prescribing and dispensing of pharmaceuticals in the State.

Your Committee received testimony in support of this measure from the Department of Public Safety and Kaiser Permanente.

Your Committee finds that pharmaceutical controlled substances are being fraudulently prescribed by practitioners through the Internet, telephone, and mail without a proper medical reason or examination.

Your Committee intends to accomplish the purpose of this measure by:

- (1) Enabling the Department of Public Safety to bring an administrative action against a controlled substance registrant for violations of Chapter 329, Hawaii Revised Statutes;
- (2) Adding the definition of "bona fide practitioner-patient relationship" to establish minimum guidelines that must be met prior the administering, prescribing, or dispensing of controlled substances;
- (3) Clarifying the requirements for oral prescriptions issued to a pharmacy and record keeping requirements for all controlled substances;

- (4) Clarifying that it is a violation of state law to pre-sign blank prescriptions to facilitate the fraudulent obtaining of controlled substances; and
- (5) Enabling the Department of Public Safety to conduct administrative inspections of pharmacies and deleting the requirement for administrative inspection warrants.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 257 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 104 Public Safety on S.B. No. 52

The purpose of this measure is to make better use of our federal law enforcement resources.

Specifically, this measure extends the power to arrest under Hawaii law to include agents of the Federal Bureau of Investigation; Drug Enforcement Administration; Bureau of Alcohol, Tobacco, Firearms and Explosives; United States Secret Service; and United States Marshal Service. This measure provides for the continuation of the authority to arrest of agents in the Customs Service and the Citizenship and Immigration Service. Additionally, by eliminating the specific mention of the "Immigration and Naturalization Service," this measure will also reflect the reorganization of the federal immigration and naturalization agency, currently referred to as the United States Citizenship and Immigration Service under the Department of Homeland Security.

The Department of the Attorney General and one individual submitted testimony in support of this measure.

Your Committee finds that granting the power to arrest under state law to these federal agents who are trained in law enforcement, the Legislature will not only aid the federal agencies in conducting their investigations, but will also make better use of our federal resources in combating crime. Federal agents often come into contact with state fugitives or witness criminal activities while carrying out their duties. However, they frequently do nothing to pursue the state criminal because of concern that they lack authority and could be held liable.

Your Committee further finds that extending the power to arrest under state law to these additional federal agencies, would in no way diminish the authority of our state law enforcement agencies, rather one hundred fifty agents would be added to the law enforcement presence in our communities.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 52 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 105 Public Safety on S.B. No. 855

The purpose of this measure is to reduce the recidivism rate in the state correctional facilities.

Specifically, this measure appropriates funds for a cognitive restructuring and transition pilot program to be established in the County of Hawaii at Kulani Correctional Facility and the Hale Nani Reintegration Center.

Testimony in support of this measure was submitted by The Department of Public Safety, the Mayor of the County of Hawaii, Community Alliance on Prisons, Going Home Task Force of the Island of Hawaii, Goodwill Industries Hawaii – Job Connections in Hilo, Hawaii Substance Abuse Coalition, and four individuals.

Your Committee finds that cognitive restructuring has proven to be a cost-effective means of reducing recidivism and thereby reducing criminal justice costs. It has been proven to be an effective means for treating substance abusing offenders and is currently used in our correctional facilities, including Hale Ola Ho'opono program at Kulani Correctional Facility and the Level II substance abuse treatment programs provided by the Salvation Army by contract at many of the State's correctional facilities.

Your Committee further finds that cognitive restructuring aids offenders in their reentry into the community. For example, those who have had cognitive skills training are more successful in finding and maintaining employment.

Your Committee finds that an appropriation of \$33,000, for each year of the 2007-2009 fiscal biennium for a cognitive restructuring and transition pilot program to serve the County of Hawaii at the Kulani Correctional Facility is a wise investment of state resources.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 855 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 106 Public Safety on S.B. No. 912

The purpose of this measure is to further the rehabilitation of incarcerated offenders, better prepare them for reentry into society, and to help empower and heal the victims of the offender's actions.

Specifically, this measure appropriates funds for each year of the 2007-2009 fiscal biennium to expand the restorative circles pilot program, currently in place at the Waiawa and women's correctional facilities, to correctional facilities statewide.

Testimony in support of this measure was submitted by the Department of Public Safety; the Hawaii Paroling Authority; Community Alliance on Prisons; TJ Mahoney & Associates' Ka Hale Ho'ala Hou No Na Wahine; and three individuals.

Your Committee finds that the restorative circles program, based on restorative justice methodology, is an effective means of rehabilitation and a transformative process in which offenders restore their relationships with their families, their community, and their victims. It is also an effective healing methodology for the victims, empowering them to make decisions about how to repair the harm caused by their offenders.

Your Committee is proud to report that Hawaii is the world leader in intertwining restorative justice circles with reintegration planning, which is fitting for a culture that includes the practice of ho'oponopono. This innovative, voluntary rehabilitation program includes offenders, family members, mentors and, victims, in a safe, facilitated process that is ultimately healing to all who participate. First, there is a discussion about the offense, how to repair the harm, and how to move on. Then, when appropriate, the group assists the offender in developing a reintegration program consisting of suggestions regarding housing, employment, financial security, continuing education, and other ideas for staying physically and emotionally healthy. Of the thirty circles that have taken place, there has been a one hundred per cent satisfaction rate reported by the one hundred fifty participants.

Your Committee finds that the expansion of this pilot program is merited by its success, important to the public interest, and that a minimum appropriation of \$200,000 for each year of the 2007-2009 fiscal biennium should be considered.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 912 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 107 Public Safety on S.B. No. 914

The purpose of this measure is to remedy the inadequacies in the mental health care of incarcerated persons in state correctional facilities.

Specifically, this measure proposes an appropriation of \$500,000 for each year of the 2007-2009 fiscal biennium to be expended by the Department of Public Safety to improve mental health care for offenders incarcerated at state prisons and address the concerns noted in communications with the federal Department of Justice. The measure requires the Department of Public Safety to report to the Legislature by November 1, 2007, regarding its plan and progress in meeting the mental health needs of our incarcerated population.

Testimony in support of this measure was submitted by the Department of Public Safety, the Office of the Attorney General, Community Alliance on Prisons, the Hawaii Disability Rights Center, the National Alliance on Mental Illness Oahu, and three individuals.

Your Committee finds that there are alarming deficiencies in the mental health treatment of incarcerated persons with mental illness in our state correctional facilities. These deficiencies are due to a lack of adequate funding, high turn over rates of mental health staff, and a drastic increase of offenders with co-occurring disorders (mental health issues along with substance abuse problems). According to the 2004 Annual Report of the Department of Public Safety:

The department's mental health staff is only able to provide episodic mental health care that focuses on stabilizing the patient's mental health condition through medication. The segment of the inmate population with mental health problems is expected to grow and require increases in the department's already limited mental health service resources. (Page 35)

Your Committee finds that the mental health services of the health care division of the Department of Public Safety is significantly understaffed, needing at least an additional three psychologists and several more social workers. There is a problem with the recruitment and retention of mental health workers at our correctional facilities because of the difference in pay and working conditions, including an elevated risk to the mental health worker that comes from working in a correctional facility and with offender populations.

Your Committee finds that a fifty-cent per hour "risk pay" is insufficient to offset the increased risk and the pay and work environment discrepancies are a reflection of the perception that mental health is not a "real" program of the Department of Public Safety. These labor issues directly affect the ability of the Department of Public Safety to recruit and maintain mental health professionals and adequately treat the mentally ill offenders in our correctional facilities.

Your Committee further finds that the nontreatment of mentally ill offenders can make their condition worse. Many of these incarcerated individuals need intensive medical intervention, which is more cost effective than a lifetime of reoffense, rearrest and reincarceration.

Your Committee finds that a written action plan from the Department of Public Safety that is to be made open to the public should be submitted to the Legislature by November 1, 2007. This plan is to include the Department's existing resources and staffing that is in place, what additional resources and staffing is needed to be up to standard, and what will be needed in the future. Alternative services, such as the use of telemedicine should be considered in the Department's action plan to improve mental health services, the completion of its training and policy manuals, and the updating of its record keeping system.

Your Committee has requested that the Department of Public Safety update its report on the feasibility of expanding the Hawaii State Hospital to include an offender wing so as to be able to adequately treat mental health patients who are incarcerated. This study was being done by the Departments of Health and Public Safety a few years ago.

Your Committee amended the measure to reflect that the Oahu Community Correctional Center is the only facility in Hawaii that the State has been informed was under an investigation relating to mental health services. The measure was also amended to reflect that no official "findings" have been issued by the Department of Justice as of January 30, 2007, but rather concerns were brought to the attention of the Department of Public Safety by experts retained by the federal Department of Justice. The measure was further amended to require that the Department of Public Safety commence its reports to the Legislature on its actions taken to improve mental health care for offenders prior to the convening of the 2008 Regular Session, rather than the 2009 Regular Session. Technical, nonsubstantive changes have been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 914, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 914, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 108 Public Safety on S.B. No. 919

The purpose of this measure is to require the mainland branch of the Department of Public Safety's Corrections Division to monitor and report on the condition of Hawaii resident inmates housed in mainland prisons under the Interstate Corrections Compact.

Testimony in support of this measure was submitted by Community Alliance on Prisons and two private individuals. The Department of Public Safety submitted testimony in opposition.

Your Committee finds that it is unfortunate that the State is forced to send Hawaii residents to the mainland for incarceration due to the lack of local facilities that are able to accommodate the volume and special needs of our inmate population. Incarcerating inmates on the mainland puts a great distance between families and friends as well as our own corrections agency, making the monitoring of the incarcerated person's health, progress in rehabilitation, and other concerns very difficult.

Your Committee further finds that the correctional facilities housing Hawaii resident inmates under the Interstate Corrections Compact are state run facilities that are subject to the laws and standards of the respective states. This does not, however, relieve the State of Hawaii of its ultimate responsibility for monitoring Hawaii inmates' conditions at these facilities.

Your Committee further finds that although there are reporting requirements under the Interstate Corrections Compact, reporting is inconsistent as to frequency and content. Currently there are twelve Hawaii residents incarcerated at six different Interstate Corrections Compact facilities. Some of these facilities report on a quarterly basis, while others report only annually.

This measure has been amended to require the Department of Public Safety to submit a standardized, quarterly report on each Hawaii resident incarcerated under the Interstate Corrections Compact. The report must contain information regarding the incarcerated person's health, behavioral or disciplinary issues, progress in rehabilitative programs, and any complaints filed by the incarcerated person and how the complaint has been resolved.

This measure was further amended by removing the requirement for quarterly onsite visits to each of the inmates and deleting the appropriation suggested for such visits. Technical nonsubstantive changes have been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 919, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 919, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 109 Public Safety on S.B. No. 1174

The purpose of this measure is to maintain and strengthen the bond between a child and the child's incarcerated parent.

The measure accomplished this purpose by expanding parent-child programs that teach appropriate interactions and bonding between incarcerated parents and their children at state correctional facilities. These programs are known to reduce the negative impact incarceration has on the offenders' children, reducing abuse and neglect and decrease the occurrence of recidivism. The measure also appropriates an unspecified sum to expand the SKIP program.

The Department of Public Safety, the Office of Hawaiian Affairs, Child and Family Service, Community Alliance on Prisons, Hawaii Youth Services Network, Keiki O Ka Aina Family Learning Centers, Nurturing Fathers of Hawaii, Strengthening Keiki of Incarcerated Parents Partnership, and four individuals submitted testimony in support of the measure.

As important as the SKIP program is for the relationship between incarcerated parents and their children, your Committee finds that it is just as important to intervene with nonincarcerated offenders and their children to prevent further deterioration of the parent-child relationship and repetitive offenses of the parent or child. Limiting funding to these programs to state correctional facilities would prevent our support of earlier intervention with the nonincarcerated offender community.

Your Committee further finds that it is important to recognize the programs that are already in existence and their need for continued funding, that there should be more flexibility for the use of the funds appropriated, including the ability to purchase parent-child interaction programs.

Your Committee also finds that the collection of accurate data on the children of incarcerated adults is important and such information should be kept confidential, except as to needed service providers. Since the Department of Public Safety relies on self-reporting, obtaining accurate data is very difficult. Incarcerated persons tend to under report or inaccurately report for various reasons. Therefore, the Department of Public Safety should only be required to make reasonable efforts to ensure that the data it collects is accurate.

Your Committee has amended the measure by:

- (1) Amending the purpose of the measure to clarify the Legislature's support for programs that are already in place;
- (2) Providing the Department of Public Safety with greater flexibility to use the appropriation so that the department may assist nonincarcerated offenders and their children;
- (3) Imposing more realistic data collection standards on the Department of Public Safety and ensuring that the information remains confidential; and
- (4) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1174, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1174, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 110 (Joint) Transportation and International Affairs and Tourism and Government Operations on S.B. No. 1039

The purpose of this measure is to prohibit the future binding of the State to government procurement rules contained in an international trade agreement without legislative action.

Your Committees received comments on this measure from the Department of Business, Economic Development, and Tourism.

Your Committees find that a number of today's international free trade agreements contain policy obligations and restrictions that would take precedence over state and local government provisions relating to state purchasing laws and preferences. These trade agreements may contain provisions that undermine provisions of the State's public procurement code and other state preference and set-aside policies established to promote and protect various sectors and groups of our local economy. However, questions relating to the State's public procurement code or decisions relating to state preference and set-aside policies are within the legislative domain and should require legislative action.

Your Committees note that the Governor vetoed H.B. No. 2199, C.D. 1, 2006, relating to international trade agreements. This measure addresses those veto considerations to the extent possible by legislative action.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1039 and recommend that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, 2 (Inouye, Taniguchi).

SCRep. 111 (Joint) Human Services and Public Housing and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1917

The purpose of this measure is to:

- (1) Provide funding for various homeless shelters and transitional housing programs and services;
- (2) Require the Hawaii Finance and Development Corporation to create an affordable housing inventory registry to identify state and county lands that may be used for affordable housing;
- (3) Extend the sunset date for the allocation of fifty per cent of conveyance tax revenues to the rental housing trust fund to June 30, 2009; and
- (4) Provide funding for various affordable and public housing programs.

The Office of the Governor, the Hawaii Housing Finance and Development Corporation, the Hawaii Public Housing Authority, and the City and County of Honolulu Department of Community Services submitted testimony in support of the intent of this measure. The Hawaii Association of Realtors, the Hawaii Family Forum, Catholic Charities Hawaii, the Affordable Housing and Homeless Alliance, the Waikiki Health Center, Hawaii Habitat for Humanity Association, and two individuals submitted testimony in support of this measure.

Your Committees find that the homeless and affordable housing crises continue to be one of the State's most significant and challenging social problems. Meaningful solutions to Hawaii's housing and homeless problems must be found. Several testifiers noted that the conveyance tax is a good source of revenues, with a sensible nexus, to facilitate the development of affordable rental housing, and opined that the percentage of the tax allocated to the rental housing trust fund should be increased to sixty-five per cent.

One testifier noted that the federal government discourages the construction of additional public housing communities that encompass a single income population, and instead favors mixed-use communities. Another testifier noted that the Hale Kokua program screens and places homeless individuals in private homes to assist in the care of elderly or infirm individuals, and that this is a challenging practice that may pose a risk if there is a mismatch.

It is the Committees' intent to improve access to shelter and support services for the homeless, and to improve and increase the available public housing and affordable housing inventory.

Upon further consideration, your Committees have amended this measure by:

- (1) Adding additional language regarding the affordable housing issue to the findings section;
- (2) Requiring the affordable housing inventory registry to also include affordable housing projects, and state and federal public housing projects, statewide;
- (3) Allocating sixty-five per cent of conveyance tax revenues to the Rental Housing Trust Fund;
- (4) Extending the sunset date for the allocation of the conveyance tax revenues to the Rental Housing Trust Fund to June 30, 2012;
- (5) Clarifying that the appropriation to the Hawaii Public Housing Authority is for capital improvement projects, as well as for the repair and maintenance of existing federal and state public housing buildings;
- (6) Deleting the appropriations for:
 - (A) The construction of public housing in communities and the assistance of nonprofit organizations in development and management of the communities; and
 - (B) The Hale Kokua Program; and
- (7) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

Your Committees note that while the appropriation amounts are blank, they recommend that the following be considered:

- (1) \$2,000,000 for homeless facilities, emergency shelters, and transitional shelters;
- (2) \$8,000,000 to provider agencies that offer outreach or support services, or both, to unsheltered homeless, at-risk homeless, and individuals residing in homeless facilities;
- (3) \$50,000,000 to the Rental Housing Trust Fund for the planning, development, and construction of affordable housing;
- (4) \$50,000,000 to the Dwelling Unit Revolving Fund for the planning, development, and construction of four thousand affordable housing units. The Committees further recommend that the appropriation be made out of the general revenues as cash instead of issuing general obligation bonds;

- (5) \$40,000,000 in general obligation bonds to the Hawaii Public Housing Authority for capital improvement projects;
- (6) \$10,000,000 for the repair and maintenance of existing federal and state public housing buildings out of the general revenues as cash, instead of issuing general obligation bonds; and
- (7) \$15,000,000 for the repair and maintenance of elevators in existing federal and state public housing buildings.

Also, your Committees further recommend that the Committee on Economic Development and Taxation explore a request that was made to include an appropriation for Shelter Plus Care.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1917, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1917, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Ihara).

SCRep. 112 Health on S.B. No. 967

The purpose of this measure is to minimize financial burdens of individuals who choose to save the life of others by becoming living organ donors.

The measure attempts to accomplish this purpose by enabling organ donors to deduct up to \$10,000 in travel and lodging expenses and lost wages from their adjusted gross income.

Your Committee received testimony in support of this measure from the American Liver Foundation, the Organ Donor Center of Hawaii, and four individuals. The Tax Foundation of Hawaii submitted comments.

Your Committee strongly supports the principle that human organs should not be bought or sold. However, your Committee finds that organ donations should not be a financial burden to families or donors.

Your Committee amended this measure by clarifying that the tax deduction may carry over to the taxable year following the year of organ donation when the expenses incurred in the following year are a direct result of the organ donation.

Your Committee further amended this measure to include lost income of individuals that are self-employed as a deductible expense.

Your Committee did not receive a fiscal impact statement on this measure from the Department of Taxation or any other state agency.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 967, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 967, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 113 Economic Development and Taxation on S.B. No. 708

The purpose of this measure is to create a tax credit for the rehabilitation of historic properties, and to authorize the transfer of the credits by a nonprofit taxpayer.

Testimony in support of this measure was received from Historic Hawai'i Foundation, Haleiwa Main Street, the Society for Hawaiian Archaeology, and three individuals. The Department of Taxation and the Department of Land and Natural Resources submitted comments. The Department of Taxation also opposed the transfer of tax credit language contained in the measure.

Your Committee finds that similar tax credits are in use at the federal level and by over half of the states. While details vary from state to state, they have proven effective, particularly when used with the twenty per cent federal historic tax credit.

Your Committee further finds that a considerable community revitalization benefit could accrue from nonprofits being able to transfer credits. However, it may be prudent to start with a smaller-scaled approach and assess the results before authorizing transfer credits for nonprofits.

Accordingly, it is the intent of your Committee to support a tax credit for the rehabilitation of historic properties; provided that the credit shall be one hundred per cent recaptured under certain conditions.

Your Committee has amended this measure by:

- (1) Deleting all references to nonprofits and the transfer of credits;
- (2) Clarifying that the amount of the tax credit shall be twenty-five per cent of the excess of qualified expenditures over \$10,000;
- (3) Deleting provisions that would have required the Director of Taxation to provide an opinion on whether the planned improvements were qualified;
- (4) Adding new language regarding the conditions when a credit may or may not be one hundred per cent recaptured;
- (5) Making the tax credit applicable to taxable years after December 31, 2007; and
- (6) Making technical amendments for the purpose of clarity.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, as introduced, would result in a revenue loss to the State of \$16,800,000 per year. Their methodology is as follows:

There are approximately six hundred properties on the historic register. However, the bill allows new properties to be designated as historical properties for purposes of the credit and is being advertised as a means of promoting urban renewal in some old districts. For purposes of the revenue estimate, it was assumed that fifteen per cent of the properties take advantage of the credit per year, that the average of the renovations is

\$150,000, and that as many as three thousand properties may be, or may become eligible. The revenue cost is therefore estimated to be $3,000 \times 0.15 \times \$150,000 \times 0.25 = \$16,800,000$ per year.

The amended draft of this measure now reflects the two departments' concurrence on this historic preservation credit. Your Committee therefore notes that the Department of Taxation's fiscal impact analysis can be offset by restricting the scope of the credit.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 708, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 708, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 114 Economic Development and Taxation on S.B. No. 1315

The purpose of this measure is to re-enact and codify sections of Act 292, Session Laws of Hawaii 2000, to make the Access Hawaii Committee permanent and to authorize the committee to provide oversight of the State's Internet portal manager.

Your Committee received testimony in support of this measure from the Department of Accounting and General Services, State Procurement Office, Department of Commerce and Consumer Affairs, Office of Information Practices, High Technology Development Corporation, the Judiciary, and the County of Kauai.

Your Committee finds that Act 292, Session Laws of Hawaii 2000, established the Access Hawaii Committee as a mechanism for oversight of the State's Internet portal manager, and authorized setting charges for electronic services. This Act contained a sunset date of June 30, 2003. Act 110, Session Laws of Hawaii 2003, extended the sunset date to June 30, 2005, but it was not subsequently extended and the committee ceased to exist at that date.

Your Committee has heard from a broad range of governmental agencies about the importance of the committee and its oversight of the State's portal manager. Public expectations about Internet access to government information continue to increase at a rapid pace, and agencies must be able to meet these demands in a coordinated, efficient, and timely manner.

It is the intent of your Committee to support the permanent establishment of the Access Hawaii Committee and to expand its membership.

Your Committee has amended this measure accordingly, to:

- (1) Increase the membership of the committee from eleven to thirteen, and add the Administrative Director of the Judiciary and a representative of the Legislature's data management system; and
- (2) Make technical, nonsubstantive amendments to conform to the preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1315, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1315, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 115 Economic Development and Taxation on S.B. No. 1497

The purpose of this short form bill is to amend Hawaii's income tax law to conform to changes to the Internal Revenue Code.

Your Committee finds that this bill would bring Hawaii tax law into compliance with the following federal acts, which were enacted in 2006, and amended the Internal Revenue Code:

- (1) The Tax Increase Prevention and Reconciliation Act of 2005. (P.L. No. 109-222; May 17, 2005);
- (2) The Heroes Earned Retirement Opportunity Act of 2006. (P.L. No. 109-227; May 29, 2006);
- (3) The Pension Protection Act of 2006. (P.L. No. 109-280; August 17, 2006);
- (4) An Act to Complete the Codification of Title 46, United States Code, "Shipping", as positive law. (P.L. No. 109-304; October 6, 2006); and
- (5) The Tax Provisions of the Tax Relief and Health Care Act of 2006. (P.L. No. 109-432; December 20, 2006).

Your Committee has amended this bill by amending section 235-2.3(a), Hawaii Revised Statutes, to replace the date December 31, 2005, with December 31, 2006.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1497, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1497, S.D. 1, and be recommitted to the Committee on Economic Development and Taxation, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Espero).

SCRep. 116 Education on S.B. No. 7

The purpose of this measure is to appropriate funds for two instructor positions for the establishment of a Junior Reserve Officers' Training Corps program at Lahainaluna High School.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Teachers Association, and one individual.

Your Committee finds that the Junior Reserve Officers' Training Corps (JROTC) program was established by the United States Congress in 1916 to instill in our youth the values of citizenship, community service, and personal responsibility. Your Committee further finds that JROTC

programs provide our youth with positive alternatives to participation in gangs, the opportunity to give back to the community, and a sense of belonging; promote physical fitness, teamwork, and respect for authority; and teach leadership skills and self-motivation. A recent study by the Center for Strategic and International Studies indicated that JROTC programs strengthen our youth, communities, and the nation by nurturing individualism in the service of a common goal.

Currently in Hawaii there are twenty-three JROTC programs, one of which exists on the island of Maui. A federal requirement for the establishment and existence of a JROTC program is that the school must employ two retired military personnel. Therefore, additional funding for Lahainaluna High School is needed to hire the necessary personnel for the JROTC program. Your Committee believes in the virtues of JROTC programs, believes that the establishment of a JROTC program at Lahainaluna High School will positively serve the students, community, and the State, and determines that the existence of two programs on Maui will allow the participants to benefit from increased opportunities for participation in JROTC activities.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 7, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 7, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 117 Education on S.B. No. 91

The purpose of this measure is to expand the State's nursing education capacity.

Specifically, the measure appropriates funds for nursing workforce development as follows:

- (1) Appropriate funds for the University of Hawaii to hire additional nursing faculty and support positions at campuses throughout the State;
- (2) Appropriate funds for the University of Hawaii for the establishment of nursing scholarship and loan programs;
- (3) Appropriate funds for the University of Hawaii to conduct facility planning and development; and
- (4) Appropriate funds for the University of Hawaii Statewide Nursing Consortium to provide for distance learning.

Testimony in support of this measure was submitted by the Hawaii State Center for Nursing of the University of Hawaii, the Hawaii Health Systems Corporation, the Hawaii Primary Care Association, the Healthcare Association of Hawaii, two representatives from the Hawaii Association of Professional Nurses, the Hawaii Government Employees Association, The Queen's Medical Center, the University of Hawaii Statewide Nursing Consortium, and five individuals. Comments on the measure were submitted by the University of Hawaii System.

Your Committee finds that the current shortage of nurses nationwide is projected to increase to a twenty per cent shortfall by the year 2020. In Hawaii, it is estimated that thirty-one per cent of Hawaii's nursing workforce will retire by 2015, with sixty-one per cent expected to retire by 2020. The demand for nurses exceeds the current supply and the gap will continue to grow as nurses retire and our population continues to age. The health of our residents and the quality of care that they can expect to receive is in jeopardy, and measures must be taken to thwart the ongoing problem.

Your Committee believes that the University of Hawaii can address the problem through efforts to grow the current nursing workforce by providing adequate faculty and staff for the nursing programs at campuses throughout the State, developing nursing loan and scholarship programs to encourage individuals to pursue nursing careers, expanding current facilities to enhance and improve the nursing program at the University of Hawaii at Manoa, and developing and utilizing distance learning throughout the State. Your Committee is also concerned, however, that although the demand for faculty and staff within the nursing programs throughout the State is high, the supply of qualified, willing applicants may not equal the demand. Therefore, your Committee believes that the appropriation of funds for 46.5 positions for fiscal year 2007-2008 is appropriate at this time. Thereafter, however, the nursing program needs to provide feedback regarding these new positions and vacancies to allow for the reevaluation of the request for additional positions and moneys for fiscal year 2008-2009.

Accordingly, your Committee has amended this measure by:

- (1) Removing the appropriation of funds for faculty and staff positions within the nursing programs of the University of Hawaii at Manoa, the University of Hawaii at Hilo, Kapiolani Community College, Maui Community College, Hawaii Community College, and Kauai Community College for fiscal year 2008-2009; and
- (2) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 91, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 91, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 118 Education on S.B. No. 604

The purpose of this measure is to promote the long-term physical health of public school students.

Specifically, this measure requires the Department of Education to:

- (1) Emphasize guiding students to make a commitment to lifelong physical activity and decreased sedentary behavior;
- (2) Develop a developmentally appropriate course of study for physical education instruction for grades kindergarten through six to be taught by at least one licensed physical education teacher;
- (3) Implement physical education instruction that complies with the Nation Association for Sports and Physical Education standards; and
- (4) Allow high school principals to grant physical education credit to students participating in after-school athletic or co-curricular activities.

Testimony in support of this measure was submitted by the American Heart Association, the Hawaii State Teachers Association, and eleven individuals. Testimony in opposition to this measure was submitted by two individuals.

Your Committee finds that childhood and adolescent obesity is at an all-time high and can lead to the development of life-long health problems. Your Committee further finds that physical activity can have beneficial effects on one's long-term mental and physical health. Studies have indicated that individuals who lead physically active lives as children are more likely to continue a pattern of physical activity into adulthood and are also associated with having higher levels of academic achievement. Your Committee believes that our public schools must provide our students with appropriate physical activities and programs that promote a commitment to lifelong physical activity. Such programs should include after-school and summer programs, taught by licensed physical education teachers, to continue to emphasize physical activity and active lifestyles outside of school hours.

Additionally, your Committee recognizes that appropriate physical education instruction is necessary for students in grades kindergarten through six and should be taught by licensed physical education teachers to ensure proper implementation and successful results. For students in grades seven and eight, there has been a lack of standardized physical education instruction being followed. The National Association for Sports and Physical Education has established appropriate standards, with which the Department of Education should be in general accordance. Finally, your Committee recognizes that the benefits of physical education instruction can be realized in less than formal physical education instruction settings. Your Committee determines that participation in after-school athletics or other co-curricular activities can have great value and provide additional ways for students to pursue physical health and activity.

Accordingly, your Committee has amended this measure by:

- (1) Requiring the Department of Education to establish programs and activities that promote a commitment to lifelong physical activity, including after-school and summer programs taught by licensed physical education teachers;
- (2) Clarifying that physical education instruction for grades six and seven should be generally in accordance with the National Association for Sports and Physical Education standards;
- (3) Specifying that high school principals may grant credit to students for participation in after-school athletics and other co-curricular activities; provided that a licensed physical education teacher shall certify that the activity is generally in accordance with the Department's physical education instruction standards; and
- (4) Making an appropriation for after-school and summer programs and activities, to be taught by licensed physical education teachers.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 604, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 604, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 119 Education on S.B. No. 688

The purpose of this measure is to appropriate funds for the development and initiation of plans by the Hawaii P-20 Initiative Council for education in Hawaii for the coming century.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii P-20 Initiative attached to the University of Hawaii System, and Good Beginnings Alliance.

Your Committee finds that planning for education in the new century is a complex endeavor that must take into account early childhood, primary, secondary, and post-secondary education, as well as career and workforce training. Your Committee further finds that a clear vision must be established and a plan for achieving that vision must be developed and initiated as soon as possible. The Hawaii P-20 Initiative is a consortium of public and private educators, governmental officials, including representatives from the University of Hawaii and the Department of Education, and community leaders who work together to improve academic achievement in the State. Your Committee believes that the Hawaii P-20 Initiative Council is the appropriate body to develop and initiate plans for education in Hawaii for the new century by ensuring that we produce responsible and productive citizens from an education system that contemplates a comprehensive vision that promotes lifelong learning from early childhood education to career and workforce preparation.

Accordingly, your Committee has amended this measure by:

- (1) Clarifying that funds appropriated shall be expended by the University of Hawaii for the purposes of this Act; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 688, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 688, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 120 Education on S.B. No. 867

The purpose of this measure is to require the Department of Education to conduct a study on the feasibility of converting hard cover textbooks to e-books for use in public schools.

Testimony in support of this measure was submitted by the Department of Education and one individual.

Your Committee finds that Hawaii currently suffers from a textbook shortage, which adversely affects students' abilities to learn in the classroom and study and complete homework assignments at home. Your Committee further finds that the costs associated with providing an adequate number of textbooks, and even more specifically up-to-date textbooks, to all students is a costly endeavor. Your Committee believes that in this new age of technology, the State must explore creative and innovative options for assuring proper learning materials are provided to students and teachers. E-books, or electronic books, are text documents that have been converted to a digital format that can be accessed on

computers or other electronic devices. They are user-friendly and provide greater options for students, as opposed to traditional textbooks. However, as the use of e-books over traditional textbooks is a new approach for the schools, your Committee determines that a feasibility study should be conducted to ascertain the true costs and benefits associated with the purchase of e-books for use in public schools.

Your Committee has amended this measure by making technical, nonsubstantive measures for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 867, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 867, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 121 Education on S.B. No. 1131

The purpose of this measure is to appropriate funds to the Office of Technology Services of the Department of Education for the continued implementation of student information systems, student support systems, additional requirements, and infrastructure enhancements.

Testimony in support of this measure was submitted by the Department of Education (DOE) and the Hawaii Government Employees Association. Comments on the measure were submitted by one individual.

Your Committee finds that the DOE needs to streamline its processes and increase productivity, assist principals in managing their schools' academic financial plans, and provide data to support students and increase accountability and transparency. Your Committee further finds that additional funding is necessary to ensure that these objectives are accomplished and a comprehensive information technology system is established. The DOE has further requested funding to establish regional support centers to deliver support services and provide data to establish a fee for service structure on the islands of Maui and Hawaii. Additionally, the DOE seeks funding for a facilities management system to enable the department to link the facilities' inventory with a condition assessment of those facilities' major components and track and prioritize major and minor repairs to those facilities. Your Committee determines that these additional requests for funding are necessary and proper for the provision of information technology services for public schools in the State.

Accordingly, your Committee has amended this measure by:

- (1) Including an appropriation to establish regional support centers to provide technology support services to schools on the islands of Hawaii and Maui; provided that the pilot program established in section 2 of the measure shall also evaluate the effectiveness of the delivery of support services and provide data to establish a fee for service structure;
- (2) Including an appropriation for a facilities asset management system to enable the DOE to link the facilities' inventory with a condition assessment of those facilities' major components and to track and prioritize major and minor repairs to those facilities; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1131, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1131, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 122 Education on S.B. No. 1932

The purpose of this measure is to provide adequate facilities for our public school students.

Specifically, this measure:

- (1) Appropriates funds for the Department of Education's repair and maintenance projects;
- (2) Authorizes the issuance of general obligation bonds and general revenues for the University of Hawaii's repair and maintenance projects; and
- (3) Provides public land and facilities for early childhood education programs.

Testimony in support of this measure was submitted by the Department of Education (DOE), the University of Hawaii (UH), and Kamehameha Schools.

Your Committee finds that a significant backlog of repair and maintenance projects exists in our public schools, including the University of Hawaii system. The DOE estimates a current backlog of \$341,000,000, and the UH system estimates a current backlog of \$165,000,000. Your Committee further finds that in 2001, the Legislature appropriated funds to the DOE to reduce the existing repair and maintenance backlog, which at the time was estimated at \$640,000,000. Your Committee believes that additional funding is necessary to help to alleviate the current backlog of repair and maintenance projects within the DOE and the UH system to attempt to lower them to manageable levels. However, your Committee believes that the bifurcation of funding from general revenues and general obligation bonds is necessary to provide a clear picture of how these figures can be successfully reduced over time.

Additionally, your Committee finds that there is a need for early childhood education facilities within the State. Increased efforts should be made to utilize existing public school facilities and public school lands for early childhood education programs. This measure also requires priority to be given to land or facilities on sites with sufficient space for three or more classrooms to be renovated or constructed. However, no funds are appropriated for those purposes. Therefore, your Committee has included appropriate funding for land or facilities for early childhood education programs as provided in the measure.

Accordingly, your Committee has amended this measure by:

- (1) Specifying that funding in each year of the 2007-2009 fiscal biennium to decrease the DOE repair and maintenance backlog shall be as follows:
 - (A) \$95,000,000 in general obligation bonds; and

- (B) \$35,000,000 in general revenues;
- (2) Specifying that funding in each year of the 2007-2009 fiscal biennium to decrease the UH system repair and maintenance backlog shall be as follows:
- (A) \$50,000,000 in general obligation bonds; and
- (B) \$18,000,000 in general revenues;
- (3) Including a general fund appropriation of \$5,000,000 for each year of the 2007-2009 fiscal biennium for land or facilities for early childhood education programs; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1932, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1932, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 123 Human Services and Public Housing on S.B. No. 426

The purpose of this short form measure is to amend the law relating to human services.

Your Committee has amended this measure by replacing its contents with language that appropriates funds for a statewide interpreter referral service for public and private agencies and for persons who are deaf, hard of hearing, or deaf-blind.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 426, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 426, S.D. 1, and be recommitted to the Committee on Human Services and Public Housing, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Ihara).

SCRep. 124 Human Services and Public Housing on S.B. No. 427

The purpose of this short form measure is to amend the law relating to human services.

Your Committee has amended this measure by inserting language that increases state supplemental payments for certain domiciliary care and requires a portion of the payment to be retained by the recipient for personal use.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 427, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 427, S.D. 1, and be recommitted to the Committee on Human Services and Public Housing, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Ihara).

SCRep. 125 Human Services and Public Housing on S.B. No. 428

The purpose of this short form measure is to amend the law relating to human services.

Your Committee has amended this measure by inserting language that appropriates funds for the Blueprint for Change project to continue to deliver diversion and child protective services to target families, and for additional neighborhood places in Waimanalo, Oahu, and Kauai.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 428, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 428, S.D. 1, and be recommitted to the Committee on Human Services and Public Housing, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Ihara).

SCRep. 126 (Majority) Human Services and Public Housing on S.B. No. 258

The purpose of this measure is to establish a long-term care income tax to pay for long-term care benefits and a long-term care income tax credit for long-term care insurance premiums.

The Policy Advisory Board for Elder Affairs, Kokua Council, and International Longshore and Warehouse Union Local 142 submitted testimony in favor of this measure. The Department of Taxation and the Association of Insurance and Financial Advisors submitted testimony in opposition. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that this measure proposes a gradually increasing flat tax to be paid by all taxpayers that will provide a gradually increasing benefit for caregivers. The benefit will provide caregivers with a modest income to enable them to care for a qualifying individual in the home. The measure also provides a tax credit to encourage individuals to purchase a supplemental private long-term care insurance plan.

It is the Committee's intent to support caregivers and encourage the provision of long-term care coverage for Hawaii residents.

Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

Your Committee notes the Department of Taxation's fiscal impact for the tax credit for the purchase of long-term care insurance is \$1.9 million to \$5.5 million for tax years 2010 to 2017. No methodology for determining the revenue loss was furnished.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 258, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 258, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, 1 (Hemmings). Excused, 1 (Sakamoto).

SCRep. 127 Human Services and Public Housing on S.B. No. 624

The purpose of this measure is to provide a tax credit to individual taxpayers who purchase long-term care insurance premiums.

The Department of Taxation, the Healthcare Association of Hawaii, and the Association of Insurance and Financial Advisors submitted testimony in support of this measure. The Kokua Council submitted testimony in opposition.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in an annual revenue loss to the State of \$2,700,000 for fiscal year 2009, and \$5,400,000 for fiscal year 2010 and subsequent fiscal years. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that the future of long-term care for Hawaii's senior and adult disabled population is one of the most critical health issues facing Hawaii in the twenty-first century. Persons sixty years of age and older presently account for nearly one-fifth of the adult population of the State. By 2020, they will account for more than one-fourth of Hawaii's adult population. The rapid growth of the elderly and disabled populations will result in extraordinary demands on the delivery of long-term care services. Most people have not financially prepared themselves for the costs of long-term care services, which can be substantial. As the testifiers noted, the average cost of institutionalized long-term care can be upwards of \$75,000 per year. This measure will assist low- and moderate-income taxpayers to purchase long-term care insurance by providing a tax credit for a portion of the long-term care premiums.

It is the Committee's intent to encourage the provision of long-term care coverage for Hawaii residents.

Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 624, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 624, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 128 Human Services and Public Housing on S.B. No. 704

The purpose of this measure is to exempt amounts received by trusts, the sole beneficiaries of which are blind, deaf, or disabled, from up to \$2,000 in income and to limit the general excise tax collected from the trusts to one-half per cent.

Two individuals submitted testimony in support of this measure. The Department of Taxation and the Tax Foundation of Hawaii submitted comments.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$150,000 per year. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that this measure will include a trust, the sole beneficiary of which is blind, deaf, or disabled within the current general excise tax relief. According to the testimony, currently, the general excise tax rate on the business income of individuals who are blind, deaf, or totally disabled, and corporations owned by individuals who are blind, deaf, or totally disabled is one-half per cent. The first \$2,000 of business income received by these individuals is also exempt from general excise taxation.

It is the Committee's intent to extend the same general excise tax treatment to trusts the sole beneficiaries of which are blind, deaf, or disabled.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 704 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 129 Human Services and Public Housing on S.B. No. 901

The purpose of this measure is to establish exemptions from the income tax and general excise tax for certified adult foster homes.

The Hawaii Coalition of Care Home Administrators and two hundred and thirty-five individuals submitted testimony in support of this measure. The Hawaii Centers for Independent Living submitted testimony in opposition. The Department of Taxation and the Department of Health submitted comments.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$11,200,000 per year. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that certified adult foster homes play an important role in the care of developmentally disabled and mentally retarded individuals, and enable developmentally disabled and mentally retarded individuals to stay in the community. Certified adult foster homes provide low-cost health care and other services that alleviate the expense to the State and the federal government of more costly care alternatives. However, reimbursement for the services that certified adult foster homes provide is low and as a result, certified adult foster homes experience operational and financial hardship. As the voluminous testimony reveals, community care foster family homes are in the same situation.

It is the Committee's intent to exempt certified adult foster homes and community care foster family homes from the income tax and general excise tax. Upon further consideration, your Committee has amended this measure by:

- (1) Exempting community care foster family homes from the income tax and general excise tax, as well; and

- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 901, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 901, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 130 Human Services and Public Housing on S.B. No. 1182

The purpose of this measure is to establish a needs allowance for residents of care homes and long-term care facilities.

The Department of Human Services submitted testimony in support of the intent of this measure. The State Long Term Care Ombudsman, the Mayor of Hawaii County, the National Association of Social Workers, the Hawaii Disability Rights Center, the Healthcare Association of Hawaii, the National Alliance on Mental Illness Oahu, Opportunities for the Retarded Inc., and over thirteen hundred individuals submitted testimony in support of this measure. The Hawaii Coalition of Care Home Administrators submitted testimony in opposition. The Department of Taxation submitted comments.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$512,000 for fiscal year 2008. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that a personal needs allowance is intended to pay for the clothing, toiletries, bus fare, personal postage, snacks, and other incidental expenses of day-to-day living of Social Security recipients in certain institutional care settings. The federal government raised the minimum personal needs allowance to \$30 back in 1988. Since that time, most states have raised the minimum allowance beyond \$30 to reflect rising costs. However, a few states, including Hawaii, still remain at the \$30 minimum set nearly twenty years ago.

As the multitude of testifiers indicated, the current personal needs allowance is insufficient to provide for their daily needs and does not afford them any discretion to make purchases that would enhance their quality of life, such as recreational activities or meals out. Testifiers noted the difficulty in affording co-payments and unreimbursed medical and dental expenses, such as dentures and hearing aid batteries, all of which have become more costly over the years.

It is the Committee's intent to raise the personal needs allowance. Further, your Committee notes that it is intended that the funds to increase the personal needs allowance be expended by the Department of Human Services directly to the individuals and not to the facility operators.

Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1182, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1182, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 131 Human Services and Public Housing on S.B. No. 1197

The purpose of this measure is to establish an income tax credit for taxpayers who make modifications to their homes to increase accessibility for individuals with disabilities.

The Disability and Communication Access Board, AARP Hawaii, and the Hawaii Aging Advocates Coalition submitted testimony in support of this measure. The Department of Taxation submitted comments.

Your Committee finds that enabling elderly individuals to age-in-place, in their own or their families' homes, will allow them to live happier, healthier lives. However, caring for an elderly individual in the home often necessitates that accommodations or modifications be made to increase accessibility and facilitate caregiving responsibilities. For instance, ramps may be necessary for wheelchair accessibility or grab-bars may be necessary in a bathtub. These types of home modifications can be costly. However, it would be more costly to move an elderly or disabled individual to a facility, and facility accommodations are limited.

It is the Committee's intent to avoid enabling a taxpayer to deduct the cost of retrofitting a home as a medical expense for both Hawaii and federal income tax purposes. So, upon further consideration, your Committee has amended this measure by:

- (1) Providing that if a taxpayer claims a similar tax credit or deduction for state or federal income tax purposes, no tax credit can be claimed under this measure; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

The Department of Taxation testified that it was unable to determine the fiscal impact of the measure since the amount of the tax credit is unspecified.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1197, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1197, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 132 Human Services and Public Housing on S.B. No. 1199

The purpose of this measure is to provide a tax credit to caregivers who care for qualified care recipients.

The Hawaii Aging Advocates Coalition provided testimony in support of the intent of this measure. The Policy Advisory Board for Elder Affairs and the International Longshore and Warehouse Union Local 142 submitted testimony in support of this measure. The Department of Taxation provided comments.

As one testifier noted, home and community-based care is increasingly the preferred method of providing long-term care to care recipients, as it avoids institutionalization and enables care recipients to remain in their homes and communities. However, caregivers are often family members who must forego employment and experience other financial sacrifices to care for their loved ones. Your Committee finds that a tax credit to caregivers who care for qualified care recipients will help defray some of the cost of providing this invaluable service.

It is the Committee's intent to help ease the financial burden on caregivers who care for qualified care recipients.

Upon further consideration, your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

The Department of Taxation testified that, since the tax credit base has been left unspecified in the measure, it was unable to determine the fiscal impact of the tax credit.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1199, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1199, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 133 Human Services and Public Housing on S.B. No. 1919

The purpose of this measure is to provide a comprehensive set of asset building opportunities for Hawaii's low- and moderate-income families by:

- (1) Establishing a self-sufficiency standard that will determine the assistance of allowance;
- (2) Establishing a refundable state earned income tax credit;
- (3) Providing financial education to Temporary Assistance for Needy Families applicants and recipients;
- (4) Expanding the provision of individual development accounts; and
- (5) Appropriating funds for these purposes.

Hawaii Women Work, the National Association of Social Workers, the Hawaii Alliance for Community-Based Economic Development, 3Point, Asset Building Initiative of Hawaii, Aloha United Way, and one individual submitted testimony in support of this measure. The Department of Taxation submitted testimony in opposition. The Department of Human Services submitted comments.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$24,000,000. No methodology for the calculation was provided.

Your Committee finds that economic stability does not arise solely from income. Financial assets, such as cash savings, stocks, bonds, and home and business equity, are a critical component of economic security. Financial assets offer individuals a viable and hopeful future, stimulate development of human and other capital, and enhance the welfare of children. Income-based policies should be complemented with asset-based policies because, while income-based policies ensure that consumption needs, such as food, clothing, child care, and health care, are met, asset-based policies provide the means to achieve greater independence and economic well-being.

It is your Committee's intent to help provide asset building opportunities for Hawaii's low- and moderate-income families.

Your Committee has amended this measure by:

- (1) Adding language to the amendment to section 201-3(a)(6), Hawaii Revised Statutes, in part II of the measure, that states that the self-sufficiency standard shall be based on existing established models that fully incorporate the items essential to attain economic self-sufficiency;
- (2) Requiring the Department of Business, Economic Development, and Tourism to:
 - (A) Establish the first annual self-sufficiency standard pursuant to section 2 by December 1, 2007; and
 - (B) Report to the Legislature and the Department of Human Services on the self-sufficiency standard no later than twenty days prior to the convening of the Regular Session of 2008, and thereafter at annual intervals;
- (3) Requiring the Department of Human Services to:
 - (A) Submit a budget request to the Legislature identifying the amount of general and federal funds required to implement the self-sufficiency standard no later than twenty days prior to the convening of the Regular Session of 2009; and
 - (B) Report to the Legislature with information on the number of persons exiting public assistance, food stamp, and medical assistance programs for work, utilizing the annually adjusted self-sufficiency standard, no later than twenty days prior to the convening of the Regular Session of 2010, and thereafter at annual intervals;
- (4) Making section 5 effective on July 1, 2009; and
- (5) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

Also, your Committee urges the Committee on Ways and Means to consider increasing the current Temporary Assistance For Needy Families cap on work support programs by \$500,000 to enable the Department of Human Services to access the funds to provide financial education to applicants for and recipients of Temporary Assistance For Needy Families in lieu of an appropriation.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1919, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1919, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 134 Human Services and Public Housing on S.B. No. 926

The purpose of this measure is to establish a Task Force on the Department of Aging to determine programs and services that will be under the jurisdiction of a new Department of Aging.

The Policy Advisory Board for Elder Affairs, Hawaii Pacific Health, and Hawaii Centers for Independent Living submitted testimony in support of this measure. The Department of Health submitted testimony in opposition.

Your Committee finds that in 2000, there were over two hundred seven thousand adults age sixty years and older in Hawaii, comprising seventeen per cent of Hawaii's population. This group is expected to comprise one third of Hawaii's population by the year 2020. Currently, the array of publicly funded programs and services for elders in such areas as Medicaid, Medicare, long-term care, and insurance are distributed across many state agencies and can be challenging for individuals to navigate. This measure would establish a task force to investigate whether it is more effective to focus state resources and services for Hawaii's older population under one department.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 926 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 135 (Joint) Human Services and Public Housing and Health on S.B. No. 812

The purpose of this measure is to appropriate the funds necessary, in addition to the Department of Health's biennium budget request, for the continued maintenance and operation of developmental disabilities domiciliary homes and developmental disabilities apartment complexes.

The State Council on Developmental Disabilities, Disability and Communication Access Board, the Arc in Hawaii, the Arc of Kona, Opportunities for the Retarded Inc., Responsive Caregivers of Hawaii, and Family Voices of Hawaii submitted testimony in support of this measure. The Department of Health submitted comments.

Your Committees find that developmental disabilities residential services providers perform a vital service to the State. Current reimbursement rates for residential services have not kept pace with the cost of providing quality services and operating in a fiscally efficient manner. Numerous developmental disabilities domiciliary homes have closed over the past several years as a result of operational deficits. The developmental disabilities population is in great need as they cannot live independently and need the services that an assisted living environment provides. In addition, many of the residents of developmental disabilities domiciliary homes and developmental disabilities apartment complexes are aging and require more costly care and services. Additional funding will maintain their community-based placement and avoid premature institutionalization.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 812 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Ihara).

SCRep. 136 (Joint) Human Services and Public Housing and Health on S.B. No. 979

The purpose of this measure is to preserve and protect the lives of Hawaii's children and young adults by establishing a Youth Suicide Early Intervention and Prevention Program.

The Department of Education submitted testimony in support of the intent of this measure. The Suicide Prevention Steering Committee and Task Force; Mental Health America of Hawaii; the National Alliance on Mental Illness, Oahu; the Hawaii Suicide Prevention, Education, Awareness, Research Foundation; and four individuals submitted testimony in support of this measure. The Department of Health submitted comments.

Your Committees find that suicide is a serious public health tragedy that affects many young people in Hawaii. Data indicates that children and teenagers between the ages of ten and nineteen years experience the highest death rates in Hawaii, making suicide the second leading cause of death for this age group. Information, education, and training are essential components to preventing suicide.

It is the Committees' intent to appropriate funds for the establishment of a Youth Suicide Early Intervention and Prevention Program.

Your Committees have amended this measure by:

- (1) Providing that the Department of Health shall develop and submit proposals, where appropriate, for funding from federal agencies and private organizations; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

Your Committees note that while the appropriation amount has been left unspecified, in light of the testimony provided, they recommend \$100,000.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 979, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 979, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Ihara).

SCRep. 137 Human Services and Public Housing on S.B. No. 1184

The purpose of this measure is to amend the Adult Protective Services Law by:

- (1) Deleting the definition of "dependent adult";

- (2) Extending protections to persons between eighteen and seventy-four years of age if they meet the definition of a "vulnerable adult";
- (3) Adding a definition of "elder" to extend protections to persons seventy-five years or older;
- (4) Enabling the Department of Human Services to investigate and the court to have jurisdiction when reason exists to believe that an elder or a vulnerable adult has been abused or is threatened with imminent abuse; and
- (5) Making conforming amendments for clarity, consistency, and style.

The Policy Advisory Board for Elder Affairs, Healthcare Association of Hawaii, Child and Family Service, the National Association of Social Workers, Catholic Charities Hawai'i, Kokua Council, Hawaii Centers for Independent Living, and six individuals submitted testimony in support of this measure. The Department of Human Services and the American Civil Liberties Union of Hawaii submitted testimony in opposition.

Your Committee received a fiscal impact statement from the Department of Human Services that this measure, if passed, would cost the State approximately \$4,942,207 for the first year and \$4,316,282 per year thereafter. The Department of Human Services also estimated an additional cost per year of \$724,532 for contracted services and other direct services to alleviate crisis situations.

Your Committee finds that citizens of Hawaii who are elder or are mentally or physically disabled constitute a significant and identifiable segment of the population and are particularly subject to risks of abuse, neglect, and exploitation. Hawaii's elders are the fastest growing segment in the State. There are just over 84,000 elders that are seventy-five years or older. National estimates of the frequency of abuse towards this population range from five to ten per cent. This suggests that there may be 4,000 or more cases of abuse in Hawaii each year. However, the Department of Human Services indicates that in 2006 it investigated 514 cases. This suggests a large gap between those receiving services and those possibly experiencing abuse.

Under the current law, unless abuse has already occurred and a dependent person is threatened with imminent abuse, Adult Protective Services is unable to offer protective services to the victim. While providing an age component to the law would ensure that certain elders would automatically be included by virtue of their age, some testifiers objected to the possibility of unwarranted government intrusion or intervention.

It is the Committee's intent to extend the protections while placing the fewest possible restrictions on personal liberty. Your Committee has amended this measure by:

- (1) Deleting the definition of "elder";
- (2) Appropriating an unspecified sum of general funds for the Department of Human Services to hire staff and contract services to implement this measure;
- (3) Making the measure effective on July 1, 2008; and
- (4) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1184, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1184, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 138 Education on S.B. No. 95

The purpose of this measure is to repeal the section of the law that provides for the reallocation of vacant positions in the Department of Education; provided that the reallocations are made to redirect resources from the state and district offices to the individual schools and learning support centers.

Testimony in support of this measure was submitted by the Department of Education (DOE). Comments on the measure were submitted by the Hawaii Government Employees Association (HGEA).

Your Committee finds that pursuant to Act 51, Session Laws of Hawaii 2004, as amended (Act 51), the DOE was established as a separate jurisdiction of the State and was also thereby granted the authority to transfer positions within the DOE, obviating the need for section 302A-1115, Hawaii Revised Statutes. In addition, with the advent of the weighted student formula, the schools are now allowed to determine the number and type of positions required by the schools. However, your Committee is mindful of the concerns expressed by the HGEA regarding the repeal of the reporting requirement by the DOE to the Department of Budget and Finance on personnel reallocations. Your Committee understands that there is a continuing need for the DOE to be accountable for its personnel actions; however, your Committee determines that the DOE is already required to report such actions to the Department of Budget and Finance under Act 51.

Your Committee has amended this measure by making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 95, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 95, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 139 (Joint) Health and Intergovernmental and Military Affairs on S.B. No. 246

The purpose of this measure is to ensure the health and safety of individuals in an emergency situation with the fastest emergency response time possible.

The measure accomplishes this purpose by authorizing the respective counties, with the approval of the Department of Health, to enact ordinances to permit the use of motorcycles operated by emergency rescue workers to respond to emergency rescue calls. The measure also authorizes the counties to identify and use other appropriate response vehicles.

Your Committees received testimony in support of this measure from Street Bikers United Hawaii and three individuals.

Your Committees find that emergency response time is often inhibited in rescue operations by intervening factors such as traffic congestion and rescue locations that are inaccessible to automobiles and ambulances. Your Committees intend to accomplish the purpose of this measure by enabling counties to permit the use of motorcycles, and other appropriate vehicles permitted by the counties, operated by emergency rescue workers to respond to emergency rescue calls.

As affirmed by the records of votes of the members of your Committees on Health and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 246 and recommend that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Menor).

SCRep. 140 Intergovernmental and Military Affairs on S.B. No. 1968

The purpose of this measure is to allow active duty National Guard personnel stationed in Hawaii to deposit their paychecks by electronic transfer to their personal banking accounts.

Testimony in support of this measure was submitted by the Department of Defense, the Hawaii Army National Guard, the National Guard Association of Hawaii Insurance Trust, Hawaii National Guard Association, the Hawaii National Guard Enlisted Association, the Chamber of Commerce of Hawaii, and one individual.

Your Committee finds that allowing service members to deposit their paychecks by electronic transfer is more efficient and reduces the workload of manually processing and distributing paychecks to military personnel. It also reduces the possibility of paychecks becoming lost and allows service members to receive their paychecks more quickly without processing delays, and boosts the overall morale of our service members and their families.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1968 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 141 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1540

The purpose of this measure is to ensure the representation on the Board of Land and Natural Resources by a member selected by the Office of Hawaiian Affairs by requiring the Governor to appoint one member from a list of three nominees submitted by the Office of Hawaiian Affairs.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs, the Native Hawaiian Legal Corporation, Oahu Council of the Association of Hawaiian Civic Clubs, and two private individuals. Testimony in opposition to this measure was submitted by the Department of Land and Natural Resources, and the Department of the Attorney General.

Your Committee heard testimony presented from the Department of Land and Natural Resources and the Department of the Attorney General that essentially objected to allowing the Office of Hawaiian Affairs to designate a member of the Board of Land and Natural Resources. Your Committee is not entirely persuaded by the reasons given for their objections; however, your Committee believes that in lieu of a designated member, that the Board of Land and Natural Resources should be required to have one or more members with knowledge, experience, or expertise in Native Hawaiian rights that are customarily and traditionally exercised for subsistence, cultural, and religious purposes as expressed in Article XII, Section 7, of the State Constitution. The Board of Land and Natural Resources, with its responsibilities over land use, coastal zone management, ocean usage, and the management and use of all other natural resources of the State, should seriously take into consideration in its decisions and deliberations, the protection of Native Hawaiian rights that are customarily and traditionally exercised for subsistence and cultural purposes.

Accordingly, your Committee has amended this measure by:

- (1) Deleting language that requires the Governor to appoint one member of the Board of Natural Land and Resources from a list of three nominees submitted by the Office of Hawaiian Affairs, and replacing it with specific language that requires at least one member on the Board of Land and Natural Resources have substantial experience and expertise in traditional Native Hawaiian land, coastal, and ocean management techniques, usage, and practices; and
- (2) Making technical, nonsubstantive amendments for the purposes of clarity and style.

Your Committee believes that the amended measure fulfills the intent of the measure to provide and ensure the observation and consideration of Native Hawaiian traditional and cultural land, coastal, and ocean management techniques, uses, and practices on the Board of Land and Natural Resources.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1540, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1540, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Slom).

SCRep. 142 Ways and Means on S.B. No. 25

The purpose of this measure is to appropriate funds to provide for the expenses of the Legislature and its service agencies.

More specifically, this measure provides for the expenses of the Legislature, the Office of the Auditor, the Legislative Reference Bureau, the Office of the Ombudsman, the State Ethics Commission, the Legislative Information System, and the Legislative Broadcast System.

Testimony in support of the measure was submitted by the Office of the Auditor, the Legislative Reference Bureau, the Office of the Ombudsman, the State Ethics Commission.

Your Committee notes that S.B. No. 638, S.D. 1, was passed by the Legislature earlier this session. That measure also contained an appropriation to cover the expenses of the Legislature, the Office of the Auditor, the Legislative Reference Bureau, the Office of the Ombudsman, the State Ethics Commission, the Legislative Information System, and the Legislative Broadcast System. Unfortunately, the constitutionally-mandated declaration that the general fund expenditure ceiling for the 2006-2007 fiscal year had been exceeded was inadvertently omitted from that measure. Your Committee has included such a declaration in this measure to reflect that the appropriations out of the current fiscal year that are contained in this measure will exceed the general fund expenditure ceiling for fiscal year 2006-2007 by an additional \$21,339,523, or an additional 0.40 per cent. In all other aspects regarding content, this measure is identical to S.B. No. 638, S.D. 1.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 25, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 25, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 9. Noes, none. Excused, 2 (Fukunaga, Menor).

SCRep. 143 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1032

The purpose of this measure is to ensure continued access by sea to Hana by authorizing the issuance of general obligation bonds to appropriate funds for the completion of improvements to the Hana boat ramp.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources.

During and following severe weather, the Hana community can become severed from the rest of the island of Maui due to road closures and the suspension of airline service. It is during these times that sea access is critical for the residents of Hana to obtain any necessary emergency supplies and assistance. The Department of Land and Natural Resources is currently in the design phase to renovate existing infrastructure and install a new loading dock. Your Committee finds that authorizing the issuance of general obligation bonds to appropriate funds for the completion of the improvements to the Hana boat ramp fulfills the intent of this measure, which is to ensure continued access by sea to Hana.

Your Committee has amended this measure by deleting the dollar amount and leaving it blank for determination by the Committee on Ways and Means.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1032, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1032, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 144 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1242

The purpose of this measure is to promote the maritime industry in Hawaii by appropriating funds for Honolulu Marine, Inc., to relocate the Kewalo Shipyard from Kewalo Basin to a proposed site at Keehi Lagoon.

Testimony in support of this measure was submitted by Honolulu Marine, Inc., the Hawaii Boaters Political Action Association, and one individual. The Department of Land and Natural Resources, the Department of Transportation, and the Hawaii Community Development Authority submitted comments.

The Kewalo Shipyard has been a fixture for the State's maritime industry for many years. During its early years, the Shipyard supported the local commercial fishing fleet and then expanded into government contract work. While the Shipyard still provides services for the commercial fishing fleet, Honolulu Marine, Inc., which obtained the lease for the facility in 1984, has aggressively pursued other commercial and government contracts. Honolulu Marine, Inc., employs a shipyard staff of up to seventy personnel who are involved in the maintenance and repairs of various sized vessels. The Shipyard averages \$1,500,000 to \$3,000,000 per year in new construction orders with a projected forecast of \$3,000,000 to \$4,000,000 in new construction orders for 2008. Due to development plans at its present location at Kewalo, the Shipyard needs to relocate its facilities. Your Committee finds that the Shipyard's proposed site at Keehi Lagoon is an unimproved and vacant lot, which will need additional funds to install port security infrastructure, grade and level the property, and construct a finger pier, sea retaining walls, and bulkheads.

Your Committee has amended this measure by deleting the dollar amount and left it unspecified for determination by the Committee on Ways and Means, and made technical amendments for accuracy.

Furthermore, your Committee notes that in the comments submitted by the Department of Land and Natural Resources, the Department of Transportation, and the Hawaii Community Development Authority, these agencies all deferred to another agency as the expending agency for the appropriation. Your Committee believes that this matter merits further discussion by the Committee on Ways and Means.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1242, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1242, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 1 (Hee).

SCRep. 145 Economic Development and Taxation on S.B. No. 323

The purpose of this short form bill is to amend the law relating to high technology.

Your Committee has amended this bill by inserting provisions related to the High Technology Development Corporation to:

- (1) Amend section 206M-15.5, Hawaii Revised Statutes, to provide that the High Technology Special Fund shall not be used to fund general administrative and fiscal positions, which shall be funded through the general revenues of the State; and to delete the \$3,000,000 cap in the special fund;
- (2) Amend section 206M-53, Hawaii Revised Statutes, to clarify that the High Technology Innovation Corporation is authorized to operate bank accounts that are necessary for the conduct of its business in addition to its out-of-state offices, at both in-state and out-of-state bank locations; and

- (3) Continue current funding levels for the Hawaii Small Business Innovation Research Grant Program and the Hawaii Small Business Technology Transfer Program.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 323, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 323, S.D. 1, and be recommitted to the Committee on Economic Development and Taxation, for further consideration.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Espero).

SCRep. 146 Economic Development and Taxation on S.B. No. 773

The purpose of this measure is to establish the Hawaii Ingenuity Corporation Charter, a private, for profit, non-stock, membership, corporation.

Testimony in support of this measure was received from the Professional Inventors Alliance, Vivalog Technologies, and three individuals. The Department of Budget and Finance submitted testimony in opposition.

Your Committee has heard that the establishment of a Hawaii Ingenuity Corporation would greatly assist innovation companies that create intellectual property on an ongoing basis, but would like to have increased opportunities to develop intellectual property and protect it from infringement. Such a corporation would contribute to the diversification of Hawaii's economy and the enhancement of the business climate for emerging technology industries.

Your Committee understands the concerns raised regarding the respective roles of the private and public sector in the proposed language, and believes that continuing discussion of the concept should be encouraged.

It is the intent of your Committee to forward this measure in order to continue dialog on the concepts of a Hawaii Ingenuity Corporation.

Your Committee has amended the measure accordingly, by:

- (1) Inserting an effective date of July 1, 2050; and
- (2) Making technical, nonsubstantive amendments for the purposes of clarity.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 773, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 773, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 147 (Majority) Economic Development and Taxation on S.B. No. 675

The purpose of this measure is to propose a constitutional amendment to require the Tax Review Commission to meet every ten years instead of five years.

Testimony in support of this measure was received from the Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO and one individual. The Department of Taxation opposed this measure. The League of Women Voters submitted comments.

Your Committee finds both proponents and opponents of this measure have raised interesting points regarding the merits of appointing a Tax Review Commission every ten years instead of every five years, and believes further discussion is warranted.

Your Committee also finds that many of the comments by the League of Women Voters, which call for wider dissemination of the commission's findings to the public, have considerable merit.

Under Article VII, Section 3, of the State Constitution, the commission is charged with "...an evaluation of the State's tax structure..." and to "recommend revenue and tax policy..." These are issues of considerable importance to Hawaii residents, yet it is unlikely that many of Hawaii's citizens have reviewed the commission's evaluations and recommendations, or are even aware of the commission's role in state tax policies.

The League of Women Voters suggests annual or biennial reports, public educational sessions, television programs, a speakers' bureau, and other creative means of telling the public about tax law - and what it really means for each of us. While this is not the purview of the Tax Review Commission, or of this measure with its restrictive title, these are recommendations your Committee urges the Director of Taxation to consider as part of the department's role in educating the public about its tax obligations and how these obligations in turn benefit the taxpayer.

In addition, it is the intent of your Committee to continue the legislative discussion on the merits of the proposed constitutional amendment contained in this measure.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 675 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, none.

SCRep. 148 (Joint) Economic Development and Taxation and Intergovernmental and Military Affairs on S.B. No. 1342

The purpose of this measure is to clarify that an appeal by a taxpayer to the Tax Appeal Court from a Board of Review decision, or the decision of an equivalent county administrative body, must be served on the Director of Taxation or County Clerk within thirty days of the date of the final assessment to properly confer jurisdiction over the appeal.

Testimony in support of this measure was received from the Department of the Attorney General, the Department of Taxation, and the City and County of Honolulu Department of Budget and Fiscal Services. The Tax Foundation of Hawaii submitted comments.

Your Committees find that the proposed language in this measure would clarify provisions that have been interpreted in a conflicting manner by Hawaii's legal community. In addition to the proposed amendments, your Committees have heard requests from the Attorney General and the City and County of Honolulu for additional changes and conforming amendments.

It is the intent of your Committees to support these additional recommendations, which have been agreed to by both the state and county.

Specifically, your Committees have amended this measure by:

- (1) Making comparable amendments to section 232-16, Hawaii Revised Statutes, which relates to an appeal to the Tax Appeal Court;
- (2) Further clarifying that in the case of a county, the relevant agency is the real property assessment division of the county involved;
- (3) Adding references to the Director of Taxation, where appropriate; and
- (4) Making technical amendments to conform the measure to the preferred drafting style.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1342, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1342, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Hemmings).

SCRep. 149 Transportation and International Affairs on S.B. No. 1273

The purpose of this measure is to require all motor vehicles having an alarm system to have a device to electronically notify the owner that the alarm has been activated for more than three consecutive minutes.

Your Committee received testimony in support of this measure from Waikiki Area Residents Association, Citizens Against Noise, and one individual. Testimony in opposition was received from the Alliance for Automobile Manufacturers, Hawaii Automobile Dealers Association, Hawaii Motorcycle Dealers Association, and one individual.

Your Committee finds that motor vehicle alarm systems are of limited utility if the owner does not know that the alarm system has been activated. A passerby may take notice, but alarms may go off without any actual theft taking place. Your Committee believes that car alarm systems have a legitimate purpose in warning of auto thefts, but the continuous sounding of an alarm does not seem to deter theft.

This measure is intended to reduce the incidents of annoying car alarm systems that go off and stay on continuously. The problem is particularly acute in the Waikiki area, with its dense population of high rise residences. Waikiki residents and hotel guests are subject to a constant bombardment of emergency vehicle noise, noisy trucks and buses, back-up beepers, and car alarms.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1273 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Inouye, Taniguchi).

SCRep. 150 Transportation and International Affairs on S.B. No. 782

The purpose of this measure is to require all moped drivers to wear safety helmets while operating a moped.

Your Committee received testimony in support of this measure from the Department of Transportation, Department of Health (DOH), and State Farm Mutual Automobile Insurance Company. Testimony in opposition was received from Street Bikers United Hawaii.

Your Committee finds that helmet use while driving a moped significantly reduces the likelihood of serious or fatal injuries. Drivers of mopeds are particularly vulnerable to head injuries in accidents. Head injuries commonly result in permanent injury or death or in profound and disabling physical and mental effects which can be costly. Unhelmeted moped riders of all ages are at risk for head injury, a leading cause of death and disability in moped crashes. According to the DOH, an average of five moped riders are killed each year in Hawaii, and another 266 are involved in major crashes. From 2001 to 2005, twenty-four riders who did not wear helmets were killed and nearly two-thirds of the 250 other injuries sustained a traumatic brain injury. Of the moped drivers admitted to Queen's Medical Center, traumatic brain injury was nearly twice as likely among those not wearing helmets compared to those wearing helmets.

The intent of this measure is to protect the health and safety of a population susceptible to avoidable crippling injuries. Act 63, Session Laws of Hawaii 2006, required drivers of mopeds who are less than eighteen years of age to wear a safety helmet while driving. Your Committee believes that all persons, not just those who are under the age of eighteen, should be required to wear a safety helmet when operating a moped.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 782 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 151 Human Services and Public Housing on S.B. No. 1495

The purpose of this measure is to:

- (1) Provide an additional personal exemption for any dependent age eighteen and younger for households with \$200,000 or less in federal adjusted gross income;
- (2) Increase the dependent care employment-related expense credit expenditure ceiling to \$5,000 per dependent; and
- (3) Make several amendments to section 235-55.6, Hawaii Revised Statutes, to conform to the Internal Revenue Code.

The Governor and the Department of Taxation submitted testimony in support of this measure.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$25,900,000 each year. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that many families in Hawaii face the dual challenge of raising children while taking care of aging parents. This measure will provide individuals with tax relief to help defray the financial cost of dependent care.

Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1495, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1495, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 152 Human Services and Public Housing on S.B. No. 1496

The purpose of this measure is to exempt the sale of food qualifying under the Women, Infants, and Children Program administered by the federal Food and Nutrition Service of the United States Department of Agriculture from the general excise tax.

The Governor and the Department of Taxation submitted testimony in support of this measure.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$15,000,000 for the first year and \$40,000,000 per year thereafter. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that undertaking the exemption of foods from any tax is a daunting task because of the indeterminate definition of the term "food." However, as one testifier noted, the United States Department of Agriculture already requires grocery stores that participate in the Women, Infants, and Children Program to exempt the eleven food groups that it identified as essential foods from local and state taxes. Therefore, most, if not all, grocery stores are prepared to accommodate the exemption of the foods on the list. The types of groceries that will be exempt from the food tax include milk, eggs, cheese, canned salmon and tuna, carrots, peanut butter, juices, cereals, beans, peas and lentils, as well as infant formula and infant cereal.

Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1496, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1496, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 153 (Joint) Transportation and International Affairs and Energy and Environment on S.B. No. 1285

The purpose of this measure is to exempt liquid fuels from the general excise tax, and to raise the fuel tax.

Your Committees received comments on this measure from the Department of Taxation (DOTAX).

Your Committees find that the general excise tax of four per cent is imposed on gasoline in addition to the fuel tax. Although crude oil prices are momentarily declining, the price of gas in Hawaii remains well above mainland retail prices. While most motorists have learned that Hawaii has one of the highest fuel tax rates in the nation, when the state and local fuel tax rates are combined, and that the general excise tax is imposed on gasoline, most do not know that the fuel oil purchased by Hawaii's electric companies is also subject to the general excise tax, and at the full retail rate of four per cent.

Given that energy use is so much a part of daily life, the rising cost of fuel oil along with the attendant general excise tax will make living and doing business in Hawaii all that more expensive. While the State cannot control the cost of fuel oil, it can control the taxes paid on the purchase of that fuel oil.

The intent of this measure to keep energy costs at a reasonable level is crucial to the economic future of Hawaii as businesses factor in all of the costs of doing business when making a decision to locate or continue to do business in Hawaii. If soaring energy costs make Hawaii goods and services uncompetitive on the world market, it is unlikely that those businesses and the jobs they create will remain in Hawaii.

The DOTAX estimates the fiscal impact will reduce general excise tax revenues by \$0.1 million annually and increase revenues to the State Highway Fund by about \$9.2 million annually. No methodology was furnished to indicate how these figures were developed.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1285 and recommend that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, 5 (Ihara, Inouye, Kokubun, Taniguchi, Tsutsui).

SCRep. 154 Economic Development and Taxation on S.B. No. 709

The purpose of this measure is to require the Department of Business, Economic Development, and Tourism (Department) to investigate, collect, analyze, and publish research and data to track economic progress and aid in the development and economic health of emerging growth industries.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism and 3Point. The Hawaii Science and Technology Council submitted comments.

Your Committee finds that new and revised economic data, such as outlined in this measure, is needed if Hawaii is to accurately assess its success in expanding and diversifying economic opportunities.

Your Committee has heard that the proposed requirements may be too specific, given rapid changes in emerging industries, and that the Department already has a broad mandate to collect and assess economic data. Members of your Committee are concerned, however, that despite that mandate, the collection and analysis of critical economic data is not always available in a timely manner. This is particularly true for emerging industries, which may require new or revised data in order to assess growth rates in comparison to traditional industries.

Your Committee acknowledges the vacancies and workforce reductions that have hampered the Department's efforts, but believes this data collection is vitally important in determining how best to provide support, financial or otherwise, to new industries.

It is the intent of your Committee to support both the concepts in this measure and to provide needed financial resources.

Your Committee has amended this measure accordingly, to:

- (1) Refine and focus the language throughout; and
- (2) Appropriate an unspecified amount for fiscal years 2007-2008 and 2008-2009.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 709, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 709, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 155 Economic Development and Taxation on S.B. No. 896

The purpose of this measure is to:

- (1) Authorize the High Technology Development Corporation, with assistance from the Department of Business, Economic Development, and Tourism, to negotiate with the developers, on terms acceptable and satisfactory to the corporation's board of directors and the Director of Finance, a lease agreement and lease guaranty for a period of ten years for approximately ninety-nine thousand square feet of laboratory and office space in the Asia Pacific International Research Center in Kakaako; and
- (2) Appropriate \$150,000 for fiscal year 2007-2008 for the purposes of this Act.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism; High Technology Development Corporation; Hawaii Community Development Authority; University of Hawaii John A Burns School of Medicine; Hawaii Science and Technology Council; Pacific Resource Partnership; Kamehameha Schools; KUD International and Phase 3 Properties; Hawaii Crop Improvement Association; Cardax Pharmaceuticals, Inc.; Hawaii Biotech, Inc.; Honolulu Seawater Air Conditioning, LLC; PanThera Biopharma LLC; and OceanTek Inc.

Your Committee has heard widespread support for the state-of-the-art facilities that would be provided in the Asia Pacific International Research Center in Kakaako. Members are well aware of the shortage of incubator and specialized laboratory space, particularly near the medical school.

Your Committee members are concerned, however, about potential costs to the State related to the ten-year lease guaranty. Your Committee heard that should lease projections not be met for specialized laboratory space, the space could be leased for office or other general facilities use. If alternative lease options do not generate the same level of income, however, the State would likely face ongoing requests for additional operational and other funds. This is an issue of a potentially large-scale commitment that the lead agency may not be able to fulfill financially.

It is the intent of your Committee to continue legislative discussions on this bill, should further information be available regarding potential long-term costs and contingency plans developed to respond to short-falls in lease projections.

Accordingly, your Committee has amended this measure by:

- (1) Replacing all references to the named developers of the complex with the generic term "developers";
- (2) Replacing all references to the "Asia Pacific International Research Center" with "life sciences research complex" and clarifying that the State's portion would be for a "high technology incubator and innovation center" in Kakaako;
- (3) Replacing the \$150,000 appropriation for fiscal year 2007-2008 with a blank appropriation for both years of the biennium;
- (4) Changing the effective date to 2050; and
- (5) Making technical amendments for clarity and to conform to the preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 896, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 896, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 156 Economic Development and Taxation on S.B. No. 1365

The purpose of this measure is to expand economic diversification opportunities and promote innovation across the State's economy.

Specifically, this measure:

- (1) Establishes the Hawaii Innovation Investment Fund, a professionally managed fund of funds, and allows the Employees' Retirement System to invest up to \$100,000,000 in Hawaii venture capital;
- (2) Improves the State's ability to collect and assess data on new economic initiatives;

- (3) Supports the operations and programs of the Asia Pacific International Research Center in Kakaako through a ten-year lease guaranty by the High Technology Development Corporation for technology incubator and innovation center space located in the Center;
- (4) Establishes a local incubator facility for digital media infrastructure for film and TV productions and interactive game development;
- (5) Establishes a music and enterprise learning experience (MELE) program at Honolulu Community College, in conjunction with Belmont University in Nashville, Tennessee;
- (6) Enhances the ability of the University of Hawaii's (UH) Office of Technology Transfer and Economic Development to enter into a partnership with a private sector entity to increase commercialization of UH discoveries; and
- (7) Appropriates funds for the above purposes.

Testimony in support of this measure was received from the Governor; Department of Business, Economic Development, and Tourism; Hawaii Strategic Development Corporation; National Defense Center of Excellence for Research in Ocean Sciences; University of Hawaii'i System and Community Colleges; Hawaii Venture Capital Association; Hawaii Science and Technology Council; Kamehameha Schools; KUD International; 3Point; PacifiCap Group; IMS, Inc.; and ten individuals. The Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO expressed concerns. The Employees' Retirement System has not yet taken a position on this measure.

Your Committee finds that this measure would support a broad range of programs to enhance Hawaii's economic opportunities, particularly those in emerging industries. Many of these concepts have been debated by previous legislatures and members of your Committee welcome the opportunity for further discussions.

Your Committee also notes that the Board of the Employees' Retirement System (ERS) will review this bill at its next meeting on February 12, 2007. Their comments and recommendations will be critical to the final outcome of the proposed ERS language, and it is the intent of this Committee to consider fully the Board's comments and any other relevant information in determining the final form of the bill.

Your Committee recognizes the importance of Hawaii's emerging, innovative industries for the enormous potential they hold. For that reason, it is the intent of your Committee to delete certain provisions and incorporate those provisions in other measures. While the proposals contained in this bill are all related in some manner to an "innovation economy", your Committee believes that the programs would be most effectively considered under separate measures involving additional committees. In that way, the merits of each may be reviewed in context with other comparable bills.

Your Committee has amended this measure accordingly, to:

- (1) In Part I, amend the findings to reflect subsequent changes;
- (2) In Part II, delete the two new sections proposed for Chapter 211F, Hawaii Revised Statutes, related to the Hawaii Innovation Fund, and streamline the amendments to section 88-119, Hawaii Revised Statutes;
- (3) Delete the language in Part III, relating to the collection and assessment of economic data, and incorporate these concepts in S.B. No. 709, S.D. 1;
- (4) Delete the language in Part IV, relating to the Asia Pacific International Research Center and the High Technology Development Corporation's ten-year lease guaranty, and incorporate these concepts in S.B. No. 896, S.D. 1;
- (5) Delete the language in Part V, relating to the digital media incubator facility, and incorporate these concepts in S.B. No. 1922, S.D. 1;
- (6) Delete the language in Part VI, relating to the music and learning experience program (MELE), and incorporate these concepts in S.B. No. 1922, S.D. 1;
- (7) In Part VII, delete the relevant appropriations and change those remaining appropriations to unspecified amounts;
- (8) Insert a deferred effective date to promote further discussion; and
- (9) Make technical amendments for the purposes of clarity and to conform to the preferred drafting style.

As amended, this measure focuses on the core issue of funding an innovation economy through enhanced venture capital and increased commercialization opportunities. Your Committee strongly supports expanded venture capital and commercialization initiatives; and believes further work on these initiatives will be time well spent.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1365, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1365, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 157 Economic Development and Taxation on S.B. No. 1499

The purpose of this measure is to bring Hawaii tax law into conformance with federal tax law relating to tax administration and criminal tax enforcement.

Specifically, the bill imposes civil penalties on:

- (1) Any tax return preparer that makes understatements of liability based on unrealistic positions;
- (2) Any person who promotes an abusive tax shelter; and
- (3) Any person required to collect, account for, or pay over taxes who wilfully fails to do so.

Testimony in support of this measure was received from the Department of Taxation. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that this measure would strengthen state and county compliance tools by establishing penalty provisions that mirror federal statutes. In its comments, however, the Tax Foundation of Hawaii also expressed a concern that the definition of "tax return preparer" was very broad in the understatement of taxpayer's liability language. Your Committee agrees with this concern and the Department of Taxation has recommended further changes to address this.

It is the intent of your Committee to pass this measure with the revised definition.

Your Committee has amended this measure accordingly, to:

- (1) Amend the definition of "tax return preparer" to mean a professional who prepares, employs, or supervises one or more persons who prepare a tax return or a claim for a tax refund, for payment; and to clarify that a professional includes an enrolled agent, certified public accountant, attorney, or other person paid for preparation of a tax return or claim for tax refund; and
- (2) Make technical, nonsubstantive amendments to conform to the preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1499, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1499, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 158 Economic Development and Taxation on S.B. No. 1688

The purpose of this measure is to establish a supplemental grant program of \$10,000,000, for follow-on research and development project funding for Hawaii-based small businesses that received federal funding in fiscal year 2007 through the Hawaii Technology Development Venture or the National Defense Center of Excellence for Research in Ocean Sciences.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism; High Technology Development Corporation; National Defense Center of Excellence for Research in Ocean Sciences; University of Hawaii Office of Technology Transfer and Economic Development; Hawaii Science and Technology Council; Hawaii Venture Capital Association; Ambient Micro; Applied Marine Solutions; Archinoetics, LLC; Cellular Bioengineering, Inc.; Concurrent Analytical, Inc.; HR Biopetroleum, Inc.; Kuehnle AgroSystems Company, LLC; Kona Labs Inc.; BDI Maritime; Navatek, Ltd.; NovaSol; Oceanit; Pacific LightNet; Pipeline Communications and Technology, Inc.; Referentia Systems Incorporated; SEE/RESCUE Corporation; Technical Research Associates, Inc.; and Williams Aerospace, Inc.

Your Committee has heard that both the Hawaii Technology Development Venture (HTDV) and the National Defense Center of Excellence for Research in Ocean Sciences (CEROS) support technology-based companies in Hawaii, providing both funding and business services that fledgling businesses need to succeed. Both are rigorous programs that solicit, evaluate, and select for funding ten to twenty projects annually from scores of ideas submitted for consideration. Competition is intense, but the rigorous selection process assures quality results and real growth of technical capacity.

Your Committee has also heard from many of the companies funded through HTDV and CEROS, and about their struggles to move from research and development into the commercialization stage. This middle stage is often the most critical in determining long-term success, but it is also the phase with very limited sources of outside funding.

Your Committee finds that the program proposed in this measure would contribute significantly to Hawaii's emerging technology-related industries, and at the same time, leverage federal funding and private investments in Hawaii companies.

Your Committee notes that the issues raised during the hearing, such as ensuring companies stay in Hawaii, are addressed in the amended language of the bill. It is the intent of your Committee to support this measure and to encourage continued discussion.

Your Committee has amended this measure accordingly, by:

- (1) Adding language in the findings and purpose section regarding federal funding of Hawaii companies;
- (2) Deleting the \$10,000,000 appropriation throughout or changing it to an unspecified amount;
- (3) Changing the expending agency from the Department of Business, Economic Development, and Tourism to the Hawaii Strategic Development Corporation;
- (4) Deleting the requirement that a project that received funding through HTDV or CEROS shall have received funding in 2007;
- (5) Changing "grant" to "award" throughout and clarifying that the purpose of the awards shall be for technology development, transition, and commercialization;
- (6) Requiring HTDV and CEROS to subcontract with selected companies and provide program oversight;
- (7) Requiring a company receiving an award to perform a substantial portion of the funded work in Hawaii;
- (8) Deleting the cost-plus-fee budget requirements and specifying that the budgets shall be submitted under parameters set forth by HTDV and CEROS;
- (9) Requiring agreements with companies to be in accordance with existing HTDV and CEROS contracting requirements;
- (10) Clarifying that from the unspecified appropriations in each fiscal year:
 - (A) HTDV shall expend \$500,000, for project oversight of its awardees, and for technical and business support for awardees of HTDV and CEROS; and
 - (B) CEROS shall expend \$200,000, for project oversight of its awardees; and
- (11) Requiring HTDV and CEROS to submit reports to the Hawaii Strategic Development Corporation, which shall in turn submit them to the Legislature, beginning in 2008, and annually thereafter until all moneys are expended.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1688, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1688, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 159 Judiciary and Labor on S.B. No. 677

The purpose of this measure is to increase the daily fees for all witnesses and the per diem paid to the witnesses who travel from out of state or inter island to attend court proceedings.

The current witness fee of \$20 per day is inadequate to make our criminal justice system work. This bill will increase the witness fees to \$55 per day. For witnesses traveling from out of state, the daily fee would increase from \$110 per twenty four hour day to \$160 for each day's attendance. This increase will also cover witnesses traveling from any island and required to stay overnight.

Your Committee heard testimony in support of this bill from the Department of the Prosecuting Attorney of the City and County of Honolulu and from the Public Defender's Office. Your Committee also received testimony from the Department of Budget and Finance commenting that the financial impact would be \$670,000 per year.

Your Committee amended the bill to include an appropriation provision to allow the expenditure of funds from the Department of Budget and Finance.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 677, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 677, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 160 Transportation and International Affairs on S.B. No. 251

The purpose of this measure is to require all authorized insurers to implement a rate reduction of not less than ten per cent for any policyholder who has satisfactorily completed an accident prevention course or a refresher course provided under the Department of Transportation's accident prevention program.

Your Committee received testimony in support of this measure from AARP Hawaii and Hawaii Transportation Association. Testimony in opposition was received from the Hawaii Insurers Council, State Farm Insurance Companies, and Property Casualty Insurers Association of America. Comments were received from the State Insurance Commissioner.

Your Committee finds that thirty-five other states and the District of Columbia currently provide premium discounts for eligible graduates of approved driver safety programs. The AARP testified that its driver safety program, in a 2005 survey, produced positive results in the behavior of drivers who took its course.

Your Committee has amended this measure by deleting its contents and inserting provisions of S.B. No. 1183, a similar measure applicable to persons at least fifty-five years of age. This measure, as amended, is a version of S.B. No. 1183, that, as recommended by the State Insurance Commissioner, has been revised to:

- (1) Be permissive rather than mandatory; and
- (2) Apply to all drivers, regardless of age.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 251, as amended, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 251, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 161 Transportation and International Affairs on S.B. No. 827

The purpose of this measure is to cover motorcycles under the State's motor vehicle express warranty enforcement law (lemon law).

Your Committee received comments on this measure from the Department of Commerce and Consumer Affairs (DCCA). Testimony in opposition was received from the Hawaii Motorcycle Dealers Association and Motorcycle Industry Council.

According to testimony of the DCCA, motorcycles are covered in lemon laws in approximately eight states. The approximate annual number of lemon law cases involving motorcycles in these states range from three in Connecticut to thirteen in Texas. In Hawaii, there have been only about three to four inquiries within the last several years involving lemon law coverage of motorcycles.

However, your Committee believes that in Hawaii there could well be a significant number of lemon law type complaints involving motorcycles that have gone unreported because motorcycles are not covered. Your Committee recalls the oral testimony of an individual who stated that he had to bring his new motorcycle back to the dealership at least four times over a several month period for repair of a defect that would have been covered by the lemon law.

Testimony of the DCCA indicated that motorcycles can be easily accommodated into the lemon law without much more administrative burden.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 827 and recommends that it pass Second Reading and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 162 (Joint) Transportation and International Affairs and Intergovernmental and Military Affairs on S.B. No. 830

The purpose of this measure is to establish a photo red light imaging detector program.

This measure also:

- (1) Allows counties to implement the photo red light imaging detector systems program;
- (2) Authorizes fines collected under county programs to be deposited into a general fund account; and
- (3) Authorizes counties to expend funds from this general fund account for the establishment, operation, management, and maintenance of the photo red light imaging detector systems program.

Your Committees received testimony in support of this measure from the Department of Transportation (DOT), Honolulu Prosecuting Attorney, Honolulu Department of Transportation Services (DTS), Mothers Against Drunk Driving Hawaii, State Farm Mutual Automobile Insurance Company, Hawaii Insurers Council, and one individual. Testimony in opposition was received from the Public Defender and two individuals. Comments were received from the Judiciary.

Your Committees find that the prevalence of drivers violating Hawaii's traffic laws, especially on the island of Oahu, has become intolerable, particularly drivers who run red lights. These violations endanger the lives of motorists and pedestrians and compound the already hazardous conditions on Hawaii's roads and highways. It has become increasingly common to hear reports of hit-and-run drivers who have run over children or the elderly. Disregarding traffic signals has also been the common denominator in many recent, highly-publicized motor vehicle crashes that have claimed a number of lives. Testimony indicated that the Insurance Institute for Highway Safety reports that red light cameras reduce red light running by about forty per cent.

Your Committees have amended this measure by:

- (1) Making the program a pilot program for three years for any county with a population in excess of 500,000;
- (2) Clarifying upon the recommendation of the Prosecuting Attorney of the City and County of Honolulu, the measure to mitigate legal challenges by:
 - (A) Changing the term "operator" to "registered owner";
 - (B) Changing the time period to answer the summons from forty-eight hours to seventy-two hours;
 - (C) Prohibiting unauthorized disclosure of information obtained from the program; and
 - (D) Allowing the registered owner an opportunity in court to rebut the identification by the cameras;
- (3) Make an appropriation to the county for implementation and operation of the pilot program; and
- (4) Changing the effective date to July 1, 2050.

Your Committees note the concerns of the Chair of the Committee on Transportation and International Affairs to the effect that the Chair has great reservations about this measure and would prefer that more planning be done to facilitate the adoption of a photo red light imaging detector program. Specifically, there are issues involving changes to statutes, ordinances, and rules, as well as whether federal funding would be available. The DOT and DTS should have undertaken appropriate plans and studies prior to the enactment of any measure in order to estimate the effects of any legislation, including assessment of similar systems in other jurisdictions.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 830, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 830, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 3 (English, Hooser, Tsutsui). Noes, none. Excused, 1 (Taniguchi).

SCRep. 163 (Joint/Majority) Transportation and International Affairs and Intergovernmental and Military Affairs on S.B. No. 1041

The purpose of this measure is to provide for the transfer of all state highway functions to the counties, make each county responsible for highways that are located in that county, and transfer funding for state highways to the counties.

Your Committees received testimony in support of this measure from the Honolulu Councilmember of District IV and one individual. Testimony in opposition was received from the Department of Transportation, Honolulu Department of Transportation Services, and Hawaii Highway Users Alliance. Comments were received from the Legislative Reference Bureau and the Hawaii State Association of Counties.

Your Committees find that jurisdiction over highways are basically a county function. The intent of this measure is to transfer jurisdiction over highways on Oahu and in the County of Maui as soon as possible, while highways in the other counties would be transferred over a five-year phase-in period.

Your Committees have amended this measure by:

- (1) Including all counties in the transfer over a five-year period; and
- (2) Changing the effective date to July 1, 2050.

Your Committees note the concerns of the Chair of the Committee on Intergovernmental and Military Affairs to the effect that the Chair has great reservations about this measure and would prefer that more planning be done to facilitate the transfer. Specifically, there are issues involving changes to statutes, ordinances, and rules, as well as federal funding concerns.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1041, as amended herein,

and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1041, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Ayes with Reservations, 1 (Inouye). Noes, 1 (Gabbard). Excused, 1 (Taniguchi).

SCRep. 164 Public Safety on S.B. No. 1485

The purpose of this measure is to exempt inmates participating in work, education, and vocational training programs from statutorily-mandated employee benefits.

Specifically, this measure adds “services performed by an inmate or any person committed to a penal institution” to the list of services excluded from the definition of “Employment” in the Hawaii Revised Statutes provided in section 383-7, the State’s Unemployment Insurance Law.

Testimony in support of this measure was submitted by the Department of Public Safety.

Your Committee finds that employment and training programs are important to an incarcerated person’s rehabilitation. However, these programs were not intended to give the incarcerated person a basis for claiming unemployment benefits once completing the programs. In fact, the increase in unemployment insurance costs that would result if incarcerated persons were included could make these programs cost prohibitive.

Your Committee finds the amendments proposed in this measure are wise and would comport with the provisions of the Federal Unemployment Tax Act. Your Committee further finds that in keeping with the gender neutral nature of the Hawaii Revised Statutes, it is appropriate to amend section 383-7(5), relating to services excluded from the definition of “employment” by substituting the terms “child” for “son, daughter” and “parent” for “father or mother”.

Technical, nonsubstantive amendments were made to add missing statutory language, reflect recommended drafting conventions, and to make the gender neutral changes discussed above.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1485, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1485, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 165 Public Safety on S.B. No. 672

The purpose of this measure is to expand reintegration programs for offenders exiting state correctional facilities and reduce the rate of recidivism.

Specifically, this measure appropriates funds for a grant to the Maui Economic Opportunity, Inc., for the development and maintenance of community-based reintegration programs.

The Department of Public Safety, Office of Hawaiian Affairs, a Maui County Council member, Community Alliance on Prisons, Hawaii Substance Abuse Coalition, Maui Economic Opportunity, Inc., TJ Mahoney & Associates Ka Hale Ho’ala Hou No Na Wahine, and eleven individuals submitted testimony in support of this measure.

Your Committee finds that the Maui Economic Opportunity, Inc., BEST (Being Empowered and Safe Together) is a nationally recognized project that has dramatically and effectively reduced the recidivism rate of the offenders who successfully complete the program. While the statewide recidivism rate is around eighty per cent, the recidivism rate for BEST Program participants was only fifteen per cent over the last two years. The BEST program involves the offenders’ families, community, and the cultural values of Native Hawaiians in providing a seamless continuum of care, training, and treatment. The incorporation of Native Hawaiian cultural components has proved effective in healing and building the self-esteem of offenders, which has significantly contributed to the offender’s successful reentry into the community.

Your Committee further finds that additional benefits to successful reintegration programs are reduced costs of incarceration and a general increase in public safety.

Your Committee further finds that an appropriation for a grant to fund the continuation and expansion of the Maui Economic Opportunity, Inc., BEST Program is a wise investment of state resources.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 672 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 166 Public Safety on S.B. No. 910

The purpose of this measure is to better prepare incarcerated persons for reentry into the community and reduce overcrowding in state correctional facilities.

Specifically, this measure appropriates an unspecified amount of general funds in each year of the 2007-2009 fiscal biennium to establish a pilot project for a day reporting center. The center will be under the Department of Public Safety and will be available to serve two-hundred offenders with six months to one year left on their sentences. Offenders assigned to the day reporting center shall live at home, but be required to report to the center for training, supervision, counseling, and other skills development programs as deemed necessary. This measure also requires a written report on the pilot program from the Director of Public Safety no later than twenty days prior to the start of the 2009 Regular Session.

Testimony in support of this measure was submitted by the Department of Public Safety and the Hawaii Substance Abuse Coalition.

Your Committee finds that recidivism can be greatly diminished if offenders exiting our correctional facilities are provided with transitional counseling and skills. Federal agencies, including the Substance Abuse Mental Health Services Administration, suggest transitional programs as best practices in addressing criminality. Inadequate transition planning, on the other hand, can result in the placement of the offender in the same

situation that brought about the criminal behavior, increasing the odds of relapse, rearrest and a further compromise of public safety. Given the high percentage of offenders with substance abuse problems and mental illness, these transitional programs should include substance abuse treatment, family counseling and mental health counseling as well as the typical vocational and job skills training.

Your Committee further finds that a secondary benefit of the day reporting center would be a reduction in the overcrowding problems at our state correctional facilities. By allowing qualified offenders to live at home during their last six months to one year of their sentence, up to two hundred beds will be freed up for offenders who pose a risk to public safety and require more restrictive environments.

Your Committee also finds that past attempts at day reporting centers in Hawaii have been unsuccessful due to lack of funding and space. Therefore, it is appropriate to make an appropriation sufficient to carry out the functions of the proposed day center pilot program.

Your Committee has amended this measure to extend the pilot program from a one-year to a two-year program and to correct typographical errors.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 910, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 910, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 167 Public Safety on S.B. No. 911

The purpose of this measure is to remedy the overcrowding problem at Hawaii's minimum security prisons, Waiawa Correctional Facility and Kulani Correctional Facility.

Specifically, this measure requires the Department of Public Safety to undertake a feasibility study for three locations for additional minimum security prisons. This study is to be completed by December 15, 2007, and a report to the Legislature is due no later than January 1, 2008.

Testimony in support of this measure was submitted by the Department of Public Safety, the Hawaii Substance Abuse Coalition, and one individual. The Community Alliance on Prisons submitted concerns.

Your Committee finds that low-risk, non-violent offenders are over crowding our prisons, taking up space needed for high-risk offenders. Minimum security environments are quite different from high-risk facility environments and are more conducive to rehabilitation needs of low-risk offenders. Furthermore, it is important to keep the low-risk offenders separated from the high-risk offenders to prevent negative influences and an increased likelihood of recidivism.

Your Committee further finds that Hawaii has outgrown its minimum security facility capacity and is in great need of additional minimum security space. This need has been confirmed by the Department of Public Safety's 2004 Annual Report which found forty-one per cent of male and forty-four per cent of female inmates fall into the minimum security of community custody level of security needs.

Your Committee further finds that a study of the feasibility of locating three additional minimum security facilities is greatly needed and should be able to be completed within the time allotted by this measure.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 911 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 168 Public Safety on S.B. No. 913

The purpose of this measure is to promote the effective reintegration of incarcerated persons into society upon their release.

Specifically, the measure allows the Hawaii Paroling Authority to parole incarcerated persons to counties in the State where they have the most community and familial support, even if that county does not meet the minimum population requirement and was not the county of the incarcerated person's permanent residence or occupation or employment prior to incarceration.

Testimony in support of this measure was submitted by the Hawaii Paroling Authority, Office of Hawaiian Affairs, Community Alliance on Prisons, Maui Economic Opportunity, Inc., and an individual.

Your Committee finds that allowing an incarcerated person to be paroled in the county where that person has the most familial and community support is important to the incarcerated person's successful reintegration into society, reducing the likelihood of relapsing into criminal activity, and reducing the likelihood of reincarceration. Under existing law, the committed person is limited to parole in the county where that person had a permanent residence or occupation or employment prior to incarceration, unless the committed person will reside in a county with a population exceeding 800,000, or will immediately leave the State. This prevents many inmates from rejoining their families and other supporters and from being able to participate in valuable reentry programs located outside of Honolulu, including the Being Empowered and Safe Together Program on Maui.

Your Committee further finds that in relocating the qualified incarcerated person to their county of most support, the incarcerated person's rehabilitation and training programs, such as work furlough, should not be interrupted. These programs are important to the incarcerated person's successful reintegration into society and the prevention of reincarceration.

Your Committee further finds that the expense of the relocation of the incarcerated person to the alternate county should be at the expense of the incarcerated person. This would be in line with current policy of relocation of a formerly incarcerated person once that person is finished with parole and ready to go back to their county of choice.

This measure was amended to provide the Department of Public Safety and the Hawaii Paroling Authority with notice and opportunity to review the incarcerated person's request, make any required adjustments to the incarcerated person's sequential phasing process, and provide that the incarcerated person be responsible for relocation expenses.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 913, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 913, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 169 Public Safety on S.B. No. 916

The purpose of this measure is to study the feasibility of selling the Oahu Community Correctional Center and using the proceeds gained from such a sale to construct a new facility in order to accommodate and manage the continued growth of the Hawaii inmate population.

Testimony in support of the measure was submitted by one individual. The Department of Public Safety submitted testimony supporting the intent of the measure.

Your Committee finds that the Oahu Community Correctional Center was originally designed and constructed to have a much smaller inmate population. Due to this fact and Hawaii's growing incarcerated population, the facility has a history of overcrowding. Your Committee believes that it is appropriate to review options to finance and construct a larger facility with proceeds derived from other uses of the Oahu Community Correctional Center.

Your Committee has amended this measure to include consideration of leasing the Oahu Community Correctional Center rather than selling it in consideration of concerns regarding the sale of state land. Amendments also provide that the proceeds from any sale or lease of the facility are to be used to finance the construction of new facilities, or to pay off bonds made to finance such construction. Technical, nonsubstantive amendments have been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 916, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 916, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 170 Public Safety on S.B. No. 917

The purpose of this measure is to return female Hawaii prisoners incarcerated on the mainland to Hawaii for the remainder of their incarceration.

Specifically, this measure would appropriate funds to the Department of Public Safety to develop a plan by January 1, 2008, and to return all female Hawaii prisoners incarcerated in mainland facilities back to Hawaii by July 1, 2009.

The Department of Public Safety; Office of Hawaiian Affairs; Community Alliance on Prisons; Government Efficiency Teams, Inc.; Hawaii Substance Abuse Coalition; Hawaii Youth Services Network; TJ Mahoney & Associates' Ka Hale Ho'ala Hou No Na Wahine; and three individuals submitted testimony in support of this measure.

Your Committee finds that sending incarcerated offenders to the mainland creates a wider rift in the family than incarcerating the offender in-state, since the cost of phone calls and video conferencing can be prohibitive. With regard to women prisoners who are mothers, this separation creates another victim, their children. There is a growing amount of evidence that children whose parents are incarcerated are more likely to have socialization problems and exhibit deviant behavior.

Your Committee further finds that separating mothers from their children compounds the problems that brought the offender to the correctional facility in the first place. The federal Substance Abuse and Mental Health Services Administration has noted that the different rehabilitation needs of women requires emphasizing relationship issues, such as engaging in family therapy in which children are present with their offender mothers. Additionally, children are a great motivating factor in the rehabilitation of their offender mothers as evidenced by the fact that incarcerated women who are involved with their children have fewer write ups and are more engaged in their rehabilitation programs.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 917 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, 1 (Sakamoto).

SCRep. 171 Public Safety on S.B. No. 1484

The purpose of this measure is to expand financial responsibility of an incarcerated person for results of that person's actions.

Specifically, this measure expands the sources of moneys that can be garnished from an inmate to include moneys received through a judgment or settlement. This measure also expands the purposes for which an incarcerated person's moneys can be garnished to include court ordered crime victim compensation fees.

The Crime Victim Compensation Commission and the Department of the Prosecuting Attorney submitted testimony in support of this measure. The Office of the Public Defender submitted testimony in opposition of this measure.

Your Committee finds that many victims of crime depend on financial assistance from the Crime Victim Compensation Fund and that financial recovery also has an effect on their emotional and psychological recovery. The Crime Victim Compensation Fund is financed by mandatory crime victim compensation fees required to be imposed against the offender by the court under existing state law. However, there is no authority for garnishing inmate wages or other earnings to comply with the court order.

Your Committee finds that should an offender benefit financially from a money judgment or settlement, that money should be available for garnishment to pay the court ordered victim compensation fee and other financial obligations required by law. Therefore, expanding garnishment sources to include money judgments and settlements, and expanding garnishment purposes to include a court ordered victim compensation fee is a fair and reasonable amendment of the Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1484 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 172 Public Safety on S.B. No. 1489

The purpose of this measure is to increase the resources of the Hawaii Paroling Authority.

Specifically, this measure converts the two part-time board members of the Hawaii Paroling Authority to full-time and provides the Governor with the authority to set the salary of the Chair and board members with the guidance of the most current report of the Executive Salary Commission available. This measure also makes an appropriation to cover the increase in salaries and any equipment and supplies needed as a result of the increase in work hours.

Testimony in support of this measure was submitted by the Department of Human Resources Development and the Hawaii Paroling Authority.

Your Committee finds that the Hawaii Paroling Authority has not had an increase in membership since it was created in 1976 with one full-time and two part-time members. Meanwhile, the parole population of the State of Hawaii has grown from 437 to 2,340 individuals over the last twenty-six years. In fiscal year 2006 alone, there were approximately 5,594 parole hearings. The magnitude of the increase in the parole population and the number of parole hearings merits the increase proposed in this measure. Furthermore, increasing the part-time members to full-time is appropriate, since they have in reality been working full-time on part-time compensation in order to get the work put before them done.

Your Committee further finds that the Governor should have some discretion in determining the salaries of the chairperson and members of the Hawaii Paroling Authority in order to recruit and retain qualified people to carry out the important public interest role the Authority provides.

Technical, nonsubstantive changes have been made for the purposes of grammatical accuracy, clarity, and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1489, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1489, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 173 Public Safety on S.B. No. 1491

The purpose of this measure is to provide a revenue source to fund investigations and the operation of an independent forensic drug laboratory for narcotics enforcement.

Specifically, this measure expands the permitted use of funds from the Controlled Substance Registration Revolving Fund to include offsetting the cost of investigation of violations and funding the Department of Public Safety Narcotics Enforcement Division's forensic drug laboratory facility.

Testimony in support of this measure was submitted by the Department of Public Safety and the Honolulu Police Department.

Your Committee finds that an independent forensic drug laboratory is necessary to maintain the integrity of investigations and keep up with the ever-expanding role of the Narcotics Enforcement Division in investigations involving controlled substances and the associated requirements of subsequent forensic drug analysis.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1491 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 174 Education on S.B. No. 100

The purpose of this measure is to provide flexibility in the teacher licensing process to ensure that the infusion of qualified teachers into Hawaii schools is not disrupted.

This measure accomplishes this objective by authorizing the Hawaii Teacher Standards Board to temporarily suspend rules when extenuating circumstances exist and to amend or set licensing-related and other fees and charges related to the performance of its duties.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawaii, the Hawaii Teacher Standards Board, and the Hawaii Association of Independent Schools. Testimony in opposition to this measure was submitted by one individual.

Your Committee finds that, based on the recommendations of the Hawaii Policy Group of the National Commission on Teaching and America's Future, the Legislature, in 2001, transferred the authority to issue licenses and renewals to teachers to the Hawaii Teacher Standards Board. Since that time, the Hawaii Teacher Standards Board has been responsible for licensing and regulating those wishing to teach in schools within the State. Your Committee further finds that the Hawaii Teacher Standards Board has experienced at least one circumstance when the need to suspend its rules arose, yet it was unable to do so because the law did not specifically authorize such suspension. The Hawaii Teacher Standards Board seeks expanded authority under the law to help expedite the ability to perform its duties. This measure also provides for the authority to set and amend fees and charges related to the Hawaii Teacher Standards Board's duties and function.

Your Committee understands the Hawaii Teacher Standards Board's desire to more efficiently and effectively carry out its duties through the expansion of its authority under the law. However, your Committee is concerned with the difficulties the Hawaii Teacher Standards Board currently exhibits in attempting to perform its existing duties and is unclear as to whether the expanded authority will be beneficial or detrimental to the board's operations. Therefore, your Committee believes that the expansion of authority should be permitted for a period of two years to assess the value of providing the Hawaii Teacher Standards Board with increased authority.

Accordingly, your Committee has amended this measure by:

- (1) Changing the effective date the Act to July 1, 2050, to facilitate further discussion on the measure;
- (2) Repealing the authority of the Hawaii Teacher Standards Board to suspend its rules and amend its fees on July 1, 2009; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and to reflect preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 100, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 100, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 175 (Joint/Majority) Education and Commerce, Consumer Protection and Affordable Housing on S.B. No. 614

The purpose of this measure is to provide affordable housing to public school teachers through the establishment of an affordable housing program and a Second Mortgage Revolving Trust Fund and to appropriate funds for that purpose.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Teachers Association, and one individual. Testimony in opposition to this measure was submitted by the Department of Budget and Finance.

Your Committees find that the ability to recruit and retain qualified teachers for our public school system is a challenging endeavor, particular during times of teacher shortages. The high cost of living in Hawaii, including the high cost of housing and the lack of available housing especially in geographically isolated areas, all conspire to exacerbate the teacher shortage problem. Your Committees are committed to growing and investing in a qualified teacher workforce and believe that innovative ideas must be entertained to recruit and retain qualified teachers. The provision of assistance to public school teachers to obtain affordable housing provides a highly desirable incentive that would demonstrate the State's commitment to providing qualified teachers for our schools.

This measure provides deferred-interest second mortgages to qualified teachers for the purchase of a home in an amount not to exceed \$125,000. Eligible teachers are required to be actively employed as full-time teachers in the public school system, who purchase property as their primary permanent residence, and who do not own any other real property. A revolving trust fund is also established to provide for these mortgages.

Your Committees understand that the responsibility for existing teacher housing will be transferred to the Department of Education on July 1, 2008, and that repair and maintenance for such housing must also be executed thereon. This measure also provides funding for the assessment on and repair and renovation of existing teacher housing. Additionally, in light of the impending transfer of existing teacher housing in 2008, your Committees believe that delayed commencement of the program established under this Act may be appropriate to allow the Department of Education to be prepared to fully assume all responsibilities associated with its teacher housing programs.

Accordingly, your Committees have amended this measure by:

- (1) Changing the effective date of the Act to July 1, 2008; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 614, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 614, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, 1 (Slom). Excused, 4 (Chun Oakland, Hee, Ige, Ihara).

SCRep. 176 Education on S.B. No. 686

The purpose of this measure is to appropriate funds for an educational assistants' career ladder program within the Department of Education.

Testimony in support of this measure was submitted by the Hawaii Government Employees Association and one individual.

Your Committee finds that a career ladder program for educational assistants was contemplated prior to the transfer of education positions and employees, including educational assistants, from the jurisdiction of the Department of Human Resources Development to the Department of Education (DOE) pursuant to Act 253, Session Laws of Hawaii 2000. However, to date, the DOE has not established a career ladder program, which would provide a salary structure for educational assistants based on specific job requirements such as training, job performance, and years of experience. Your Committee believes in the merits of establishing a career ladder program for educational assistants; however, it is concerned with the lack of information currently being provided. The DOE has indicated that implementation of a career ladder program will require funding of \$22,000,000. In the past, significantly lower amounts were anticipated, thus making the true costs unknown. With fiscal prudence in mind, your Committee is apprehensive about appropriating funds in that magnitude when it is unclear as to the true cost impact.

Therefore, your Committee believes that the DOE should report to the Legislature on a career ladder program to be established for educational assistants, including relevant information on the employees affected, and the true costs of implementing a program. Your Committee notes that it will continue to move this measure forward, including a blank appropriation and not the \$22,000,000 requested by the DOE. However, should further information be provided during the session, your Committee believes that the Legislature should consider appropriating an appropriate amount of funds to implement a career ladder program.

Accordingly, your Committee has amended this measure by requiring the DOE to submit a report to the Legislature on a career ladder program for educational assistants that includes:

- (1) Class levels under a career ladder program and other career ladder enhancements;
- (2) The number of affected employees under a career ladder program; and
- (3) The cost impact of implementing a career ladder program for educational assistants.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 686, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 686, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Taniguchi).

SCRep. 177 Education on S.B. No. 690

The purpose of this measure is to determine the cost effectiveness of closing or consolidating public schools.

Specifically, the measure requires the Department of Education to conduct a cost-benefit analysis to determine the expected cost savings associated with school closures or consolidation.

Testimony in opposition to this measure was submitted by the Department of Education (DOE). Comments on the measure were submitted by the Hawaii Government Employees Association and the Land Use Research Foundation of Hawaii.

Upon review of the measure and the testimony submitted, your Committee has amended the purpose of this measure to establish a task force on school closures or consolidation to conduct a cost-benefit analysis to determine the cost savings, compensation, and a process for school closures or consolidation and to appropriate funds for that purpose.

Your Committee finds that school closures or consolidation are of great concern to the students, families, and communities affected. Due consideration must be given to economic and non-economic costs and benefits of school closures or consolidation to ensure that any action taken is not only cost-effective and efficient, but also that such action is beneficial to the stakeholders, particularly the students. Your Committee believes that some type of compensation or assurances should be provided to the affected students of school closures or consolidations; however, testimony provided indicated concern over the provision in the measure that provided fifty per cent of the fiscal savings realized through a school closure or consolidation would be retained by the new configuration of affected schools. Your Committee has addressed these concerns by establishing a task force to conduct a study on the costs and benefits of school closures or consolidation and to make recommendations on how to appropriately compensate affected students and schools and establish a permanent process for school closures or consolidation in the future.

Accordingly, your Committee has amended this measure by:

- (1) Deleting the new section requiring the DOE to conduct a cost-benefit analysis to determine the expected cost savings of a school closure or consolidation and requiring fifty per cent of the fiscal savings realized through a school closure or consolidation to be retained by the new configuration of affected schools;
- (2) Establishing a task force on school closures or consolidation that is tasked with:
 - (A) Conducting a cost-benefit analysis to determine the cost savings of each school closure or consolidation, taking into account both economic and non-economic costs and benefits;
 - (B) Recommending provisions to ensure affected students are appropriately compensated, including through receiving access to additional programs or services as a result of a school closure or consolidation; and
 - (C) Making recommendations for a permanent process for evaluating and determining which schools are appropriate for closure or consolidation, including criteria for, timelines for, and who should conduct the evaluations; and
- (3) Making an appropriation to support the operations of the school closure or consolidation task force.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 690, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 690, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Chun Oakland, Nishihara, Taniguchi).

SCRep. 178 Education on S.B. No. 693

The purpose of this measure is to provide support for transition services for students at military-impacted schools.

The measure accomplishes this purpose by appropriating an unspecified amount in each fiscal year of the 2007-2009 biennium to expand the transition services program for military dependent students initially established at Radford High School to all military-impacted schools.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Teachers Association, and the Chamber of Commerce of Hawaii.

Your Committee finds that students from military families, as well as others from different countries and cultures, experience unique academic and social challenges when transiting into schools in the State. Beginning in the 2002-2003 school year, Radford High School initiated the development of a transition assistance program to create a system for integrating new students into the school community. This program has enjoyed great success in aiding the transition of military students into public schools in Hawaii and serves as a model for other schools seeking to implement similar programs. Your Committee believes the transitioning of military and other new students into our school communities is important to the creation of positive learning environments that allow all students to achieve academic success.

Your Committee also believes that all schools, not only military-impacted schools, can benefit greatly from transition programs and has extended this measure to provide funding for all schools. Additionally, in order to ensure that funding for transition programs does not adversely impact funds allocated under the weighted student formula, your Committee believes that funding should be accomplished outside of the weighted student formula allocation. Your Committee understands that an estimated 14,744 students could benefit from transition services in schools throughout the State, which have been estimated to cost approximately \$200 per student. Your Committee believes that an appropriation based on these figures is appropriate.

Accordingly, your Committee has amended this measure by:

- (1) Including an appropriation in the amount of \$3,000,000 for each fiscal year of the 2007-2009 biennium;

- (2) Extending the funding to support transition programs in all schools in the State; and
- (3) Specifying that funding to support transition programs shall be treated as follows:
 - (A) The determination of costs associated with providing transition programs for students shall be calculated under the weighted student formula on a per student basis; and
 - (B) Funding for the provision of transition programs for students shall be funded outside of the allocation provided according to the weighted student formula.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 693, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 693, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Chun Oakland, Nishihara, Taniguchi).

SCRep. 179 Education on S.B. No. 886

The purpose of this measure is to appropriate funds for the establishment of business managers for each school complex area within the Department of Education.

Testimony in support of this measure was submitted by the Department of Education (DOE), the Hawaii State Teachers Association, and the Hawaii Government Employees Association.

Your Committee finds that schools, complexes, and complex areas are becoming increasingly responsible for added financial responsibilities that require specialized knowledge in finance and business management. The fulfillment of these duties often detracts the focus from the conventional concerns of a school, including the curriculum and the promotion of student achievement. According to the DOE, the business and district fiscal officer positions that may have been helpful in assisting the schools, complexes, and complex areas in addressing financial issues no longer exist. Your Committee further finds that with the advent of the weighted student formula, and the increased control provided to school administrators, the assistance of highly qualified individuals with business backgrounds will empower the schools, complexes, and complex areas to more efficiently and effectively manage their finances and operations.

Your Committee determines that the duties of the complex area business managers should remain within the purview of the DOE and should reflect those duties that are specified in the purpose section of the measure.

Accordingly, your Committee has amended this measure by:

- (1) Deleting references in the law to district and business fiscal officer positions within the DOE, as the positions no longer exist;
- (2) Specifying that the powers and duties of the complex area business managers shall be as prescribed by the DOE; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 886, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 886, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 180 (Joint/Majority) Education and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1150

The purpose of this measure is to provide affordable housing to public school teachers.

Specifically, the measure establishes an affordable housing program that allows an eligible teacher to purchase an interest in residential real property to be used as the teacher's primary residence.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii Public Housing Authority, the Hawaii State Teachers Association, and one individual.

Your Committees find that the ability to recruit and retain qualified teachers for our public school system is a challenging endeavor, particular during times of teacher shortages. The high cost of living in Hawaii, including the high cost of housing and the lack of available housing, especially in geographically isolated areas, all conspire to exacerbate the teacher shortage problem. Your Committees are committed to growing and investing in a qualified teacher workforce and believe that innovative ideas must be entertained to recruit and retain qualified teachers. Providing assistance to public school teachers to obtain affordable housing is a highly desirable incentive that would demonstrate the State's commitment to staffing public schools with qualified teachers.

This measure allows an eligible teacher to purchase an interest in residential real property at a fraction of the property's fair market value. Eligible teachers are required to be actively employed as full-time teachers in the public school system, who purchase property as their primary permanent residence, and who do not own any other real property. Upon termination from employment with the public school system, the property will be sold back to the State and the teacher will receive twenty per cent of the fair market value of the property, based on the price at the time of purchase or at the time of sale, depending upon the duration of the teacher's time in service.

Your Committees understand that the responsibility for existing teacher housing will be transferred to the Department of Education on July 1, 2008. In light of the impending transfer, your Committees believe that delayed commencement of the program established under this Act may be appropriate to allow the Department of Education to be prepared to fully assume all responsibilities associated with its teacher housing programs.

Accordingly, your Committees have amended this measure by:

- (1) Changing the effective date of the Act to July 1, 2008; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1150, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1150, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, 1 (Slom). Excused, 4 (Chun Oakland, Hee, Ige, Ihara).

SCRep. 181 Human Services and Public Housing on S.B. No. 1691

The purpose of this measure is to amend the definition of “caregiver” under section 28-94, Hawaii Revised Statutes, to include compensated or uncompensated family members or other relatives.

Child and Family Service submitted testimony in support of this measure.

Your Committee finds that many of our elders who are aging-in-place are often assisted by family members or other relatives. However, this measure recognizes that elder abuse can occur in any setting and ensures that elder abuse in any setting is penalized.

It is the Committee’s intent to encourage further discussion of this issue. Therefore, your Committee has amended this measure by:

- (1) Changing the effective date to July 1, 2050; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1691, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1691, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 182 Human Services and Public Housing on S.B. No. 1205

The purpose of this measure is to appropriate funds for the Executive Office on Aging to develop and implement a volunteer-hours exchange pilot program in two communities.

The Department of Health, the Policy Advisory Board for Elder Affairs, the International Longshore and Warehouse Union Local 142, and two individuals submitted testimony in support of this measure.

Your Committee finds that over two hundred forty thousand Hawaii residents are age sixty or older. Family caregivers provide care for a large percentage of these older adults, who overwhelmingly prefer to live and receive care in their homes. However, there are also many older adults who need care, but do not have family living in Hawaii who can assist them.

Many Hawaii residents volunteer their time for the benefit of others, and a structured program that offers credit to them for their volunteered caregiving hours could substantially increase the level of caregiving services available to older adults. Volunteers receive a credit for each volunteer hour provided. Accumulated volunteer-hours can then be used by the caregiver for services that the caregiver needs or donated by the caregiver to another person. Programs that encourage volunteer reciprocity among residents have been successful at over two hundred fifty time banks in the United States.

It is the Committee’s intent to encourage and support family caregivers by requiring the Executive Office on Aging to develop and implement a volunteer-hours exchange pilot program in Hawaii.

Your Committee has amended this measure by:

- (1) Adding additional language regarding volunteer-hours exchange programs to the purpose section; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1205, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1205, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 183 (Joint/Majority) Human Services and Public Housing and Education on S.B. No. 1185

The purpose of this measure is to establish five additional faculty positions at the Center on Aging Research and Education to assist in the fulfillment of its mission.

The University of Hawaii System, the Policy Advisory Board for Elder Affairs, the Hawaii Aging Advocates Coalition, Kokua Council, Hawaii Centers for Independent Living, and five individual submitted testimony in support of this measure.

Your Committees find that the mission of the Center on Aging Research and Education is to assure the well-being of the State’s older population by stimulating and coordinating gerontological and aging instruction, research, and community services. There is currently an urgent need to actively engage in gerontological research given the rapidly aging population in Hawaii. Given proper staffing levels, the Center on Aging Research and Education can become a viable research and training center and support the development of relevant social and economic policies pertaining to Hawaii’s elder population.

It is the Committees’ intent to support the proper staffing of the Center on Aging Research and Education.

Your Committees have amended this measure by adding additional language to the purpose section to better articulate the importance of the Center on Aging Research and Education and the broad impact it can have on preparing this State to meet the challenges of its rapidly aging population.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1185, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1185, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, 1 (Hemmings). Excused, 3 (Hee, Nishihara, Taniguchi).

SCRep. 184 (Joint/Majority) Human Services and Public Housing and Education on S.B. No. 1193

The purpose of this measure is to appropriate funds to Kapiolani Community College to fund its Long-Term Care Resource Program to train a workforce to care for the State's elder population.

The University of Hawaii System, the Policy Advisory Board for Elder Affairs, the Occupational Therapy Association of Hawaii, and the International Longshore and Warehouse Union Local 142 submitted testimony in support of this measure.

Your Committees find that family caregivers have a complex responsibility and often report that they are not prepared for their caregiving role. A family caregiver's need for information changes throughout the course of the care recipient's illness or condition. Family caregivers need appropriate, timely, and ongoing education and training in order to successfully meet their caregiving responsibilities. In addition, family caregivers and their loved ones need an affordable, well-qualified, and sustainable caregiving workforce. Kapiolani Community College's Long-Term Care Resource Program provides training and education to caregivers.

Your Committees note that, according to the testimony, last year the Legislature authorized 2.5 positions and appropriated \$206,913 to establish the Long Term Care Resource Program at Kapiolani Community College. The appropriation provided funds for nine months of salary for the new positions. The Executive Biennium Budget for fiscal years 2007-2008 and 2008-2009, for the University of Hawaii includes a budget item for an additional \$32,012, to fully fund the positions appropriated last year.

Your Committees urge the Committee on Ways and Means to keep the item in the budget for an additional \$32,012, to fully fund the Long-Term Care Resource Program positions at Kapiolani Community College.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1193 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, 1 (Hemmings). Excused, 3 (Hee, Nishihara, Taniguchi).

SCRep. 185 (Joint) Human Services and Public Housing and Intergovernmental and Military Affairs on S.B. No. 1198

The purpose of this measure is to appropriate funds to each county to design a family caregiver grant program in each county to provide grants to non-paid caregivers who are caring for persons who are aged, infirm, or disabled.

The City and County of Honolulu Department of Community Services, the Maui County Office on Aging, the Hawaii Aging Advocates Coalition, and the Policy Advisory Board for Elder Affairs submitted testimony in support of this measure.

Your Committees find as the testifiers noted, family caregivers often experience financial strains due to the cost of caring for loved ones, as well as the loss of income due to caregiving's impact on a family caregiver's employment. Many family caregivers must reduce their work hours or forgo work completely to care for loved ones. This measure would provide grants to each county to design a family caregiver grant program that would help defray some of the financial sacrifices that family caregivers make to care for their loved ones in the home.

It is the Committees' intent to help support family caregivers.

Upon further consideration, your Committees have amended this measure by:

- (1) Clarifying that eligibility requirements for grant recipients include non-paid caregivers;
- (2) Adding a definition for the term "family caregiver"; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1198, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1198, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 1 (Sakamoto).

SCRep. 186 (Joint) Human Services and Public Housing and Intergovernmental and Military Affairs on S.B. No. 1204

The purpose of this measure is to appropriate funds to the counties to financially assist caregiving programs that receive federal funding cuts.

The City and County of Honolulu Department of Community Services, the Hawaii Aging Advocates Coalition, and the Policy Advisory Board for Elder Affairs submitted testimony in support of this measure.

Your Committees find that due to a shortage of care providers in Hawaii, family caregiving has become a critical component to the provision of long-term care in Hawaii. Federal funds for programs that provide services to family caregivers were reduced in the latest reauthorization of the Older Americans Act. The counties in Hawaii have been the recipient of these funds and have developed important and necessary programs for family caregivers, including support groups, conferences, and training. This measure will ensure that these programs continue despite the reduction in federal support.

Your Committees received a statement from the City and County of Honolulu Department of Community Services that their caregiving programs would experience a shortfall of approximately \$164,023.

Your Committees note that the remaining counties are expected to provide the Committee on Ways and Means with similar shortfall information stemming from the cuts in federal funding to programs that provide services to caregivers in those counties.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1204 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 1 (Sakamoto).

SCRep. 187 (Joint) Human Services and Public Housing and Judiciary and Labor on S.B. No. 245

The purpose of this measure is to appropriate funds to provide treatment services for child victims of sexual abuse, including psychological treatment and case management services for child victims and their families.

The Judiciary submitted testimony in support of the intent of this measure. The Attorney General, the Department of Human Services, the City and County of Honolulu Police Department, Child & Family Service, The Sex Abuse Treatment Center, Friends of the Children's Justice Center of Maui, Catholic Charities Hawaii, and six individuals submitted testimony in support of this measure.

Your Committees find that child sexual abuse cases are often the most difficult cases to manage and the victims often have the most difficult time accessing services and treatment. Victims and supportive family members who receive appropriate support are better able to cooperate with the criminal justice system, which enables the system to prosecute these cases more effectively and efficiently. In addition, child sexual abuse is a crime that frequently results in serious long-term mental health problems for victims and their families. Providing treatment services for the victims and their families is crucial to ameliorating the mental health problems.

Your Committees understand that the Judiciary has a balance of unspent funds in the amount of approximately \$4,000,000 for the 2006-2007 fiscal year, and that as this savings is attributed to a large amount of vacant positions, it is likely that this savings will be realized in the 2007-2008 fiscal year, as well.

Therefore, your Committees urge the Committee on Ways and Means, by budget proviso, to utilize \$416,000 of existing Judiciary budget funds to support the appropriation request of \$208,000 for fiscal year 2007-2008, and the same sum for fiscal year 2008-2009.

It is the Committees' intent that the provisoed funds be used to provide treatment services for child victims of intrafamilial sexual abuse and sexually reactive children who are not covered under the child protective services system of the Department of Human Services, including psychological treatment and case management services.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 245 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Sakamoto).

SCRep. 188 Education on S.B. No. 650

The purpose of this measure is to allow public school teachers to receive credit towards an incremental or longevity step salary increase for any degree or coursework completed, regardless of the relevance of the degree or coursework to teaching.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association and one individual. Testimony in opposition to this measure was submitted by the Department of Education (DOE) and one individual.

Your Committee finds that, according to testimony provided, in years past, the DOE provided credit to teachers upon hiring for credits in addition to their bachelor's or master's degrees, as appropriate. However, in recent years, the DOE has abandoned this practice and only provides salary enhancements based upon coursework or degrees earned during employment as an incentive to ensure teachers continue to pursue professional development. Your Committee further finds that it is unclear as to the number of and the extent to which newly hired teachers are being adversely impacted under the DOE's current policy. Furthermore, it is unclear whether this policy serves its intended purpose or if it fails to provide adequate incentives to recruit qualified teachers and appropriately compensate them based upon their training and experience.

Therefore, your Committee believes that further information is required to ascertain the extent of the problem and determine how to best serve the interests of the DOE, in saving money and encouraging its current teachers to continue to pursue professional development, and the new teachers, in enticing them to teach in our public schools by appropriately compensating them based on their academic achievements and training.

Accordingly, your Committee has amended this measure by:

- (1) Removing the provision requiring the DOE to allow teachers to receive credit for any degree or coursework completed, regardless of the relevance of the degree or coursework to teaching; and
- (2) Requiring the DOE to conduct a study and report to the Legislature on:
 - (A) The number of newly hired teachers with a start date of August 1, 2007, or later, who possess either bachelor's or master's degrees and credits in excess of those degrees for which they will not receive credit from the DOE in determining their salary or position classification;
 - (B) Information on the types of credits earned;
 - (C) The number of credits in excess of degrees earned;
 - (D) The subject matter areas of the credits earned;
 - (E) The relevance of the credits earned to teaching; and
 - (F) The cost impact of providing compensation to those teachers with excess credits.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 650, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 650, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 189 Judiciary and Labor on S.B. No. 1956

The purpose of this measure is to add a new chapter to the Hawaii Revised Statutes to enact an interstate compact, the Agreement among the States to Elect the President by National Popular Vote, to enable the winner of the presidential election to be determined by national popular vote.

The compact would take effect only upon adoption by states collectively possessing a sufficient number of electoral votes to elect the president. Each member state would conduct a general election in which votes are cast for slates of candidates for president and vice president of the United States. The chief election officer of each member state would report to each other member state the number of votes cast for each presidential slate. The "national popular vote total" for each presidential slate would be tallied. All of each member state's electoral votes would be awarded to the slate with the highest national popular vote total.

Your Committee received testimony in support of this measure from FairVote, National Popular Vote, and a concerned individual.

Your Committee finds that a national popular vote system addresses a deep concern among many of Hawaii's citizens about an electoral college system that can, and has, let our nation's leader be someone other than the individual most voters selected.

Your Committee is mindful that all states must adopt this interstate compact in substantially identical form. Accordingly, your Committee is passing this measure unamended, with the understanding that as this measure moves through the legislative process, it may be appropriate to include additional language to enact the compact into law, and to amend section 14-24, Hawaii Revised Statutes, to require the chief election officer's compliance with election procedures in the compact.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1956 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 190 Public Safety on S.B. No. 1486

The purpose of this measure is to provide corrections with more options in obtaining uniforms.

Specifically, this measure authorizes the Administrator of the Department of Public Safety's Correctional Industries to sell uniforms and uniform accessories to state-employed adult corrections officers.

Testimony in support of this measure was submitted by the Department of Public Safety.

Your Committee finds that this measure will allow adult correctional officers to purchase uniforms at their own expense to make necessary replacements or for the officers' convenience. Under existing law, officers are not able to purchase additional uniforms and are only issued an initial four uniforms upon commencement of employment with the Department of Public Safety and one replacement uniform in each year of employment thereafter.

Your Committee also finds that a correctional officer may need to replace more than one uniform in a year's time, or may want additional uniforms for convenience. This measure will allow officers to purchase additional uniforms at the officers' expense. A secondary, positive result of this measure is the potential for additional work opportunities for incarcerated persons through the vocational rehabilitative program, Correctional Industries, which is the sole manufacturer and provider of these uniforms.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1486 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 191 (Joint) Transportation and International Affairs and Intergovernmental and Military Affairs on S.B. No. 776

The purpose of this measure is to clarify that county fire chiefs are not responsible for conducting fire inspections at state-owned airport facilities.

Your Committees received testimony in support of this measure from the Department of Transportation and Department of Labor and Industrial Relations.

Your Committees find that the state airports have their own fire fighting units that should be responsible for fire inspections of state airport facilities. Existing law in section 132-6(b), Hawaii Revised Statutes, gives the State the responsibility to conduct fire and safety inspections at all state-owned airport facilities at least once a year. However, the county fire chiefs have been doing the inspections under its purview authority over all fires and fire hazards within the counties.

Your Committees note that existing law in section 132-6(b), Hawaii Revised Statutes, requires the State to conduct fire and safety inspections at all state-owned airport facilities at least once a year. Your Committees have been informed that the state airport fire unit at Honolulu International Airport and the Fire Department of the City and County of Honolulu, have worked well together to coordinate and assist in their efforts to inspect the airport, which is the most critical in terms of size of all state airports. Your Committees recommend that this amicable cooperation continue in the interest of public safety, notwithstanding this measure.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 776 and recommend that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 192 Transportation and International Affairs on S.B. No. 1513

The purpose of this measure is to change the minimum headlamp height requirement from twenty-four to twenty-two inches, and to delete the requirement that a license plate be attached at no lower than twelve inches above the ground.

Your Committee received testimony in support of this measure from the Department of Transportation.

Your Committee finds that some new vehicles are manufactured with headlamps that are less than twenty-four inches but not less than twenty-two inches above the road surface. Lowering the height requirement will legalize the operation of these new vehicles without compromising the required visibility at night. Your Committee further finds that the height requirement for license plates is not necessary as long as the plates are clearly visible and reasonably clean as required by current law.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1513 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Inouye, Taniguchi).

SCRep. 193 (Joint) Public Safety and Human Services and Public Housing on S.B. No. 1112

The purpose of this measure is to expand gender-responsive community-based programs for female offenders.

Specifically, this measure appropriates \$750,000, to the Department of Public Safety and \$100,000, to the Office of Youth Services in fiscal year 2007-2008, for the expansion of gender-responsive community-based programs for women and girls in state correctional facilities.

Testimony in support of this measure was submitted by the Department of Public Safety, Office of Youth Services, Hawaii State Commission on the Status of Women, American Civil Liberties Union of Hawai'i, Community Alliance on Prisons, the Drug Policy Forum of Hawaii, Hawaii Women Work!, O'ahu County Committee of the Democratic Party of Hawai'i, Planned Parenthood of Hawai'i's Action Network, TJ Mahoney & Associates' Ka Hale Ho`āla Hou No Nā Wāhine, and three individuals.

Your Committees find that to reduce the recidivism rate of female offenders, we must recognize that their path to criminality and their rehabilitation needs are different from those of their male counterparts. This has been confirmed by numerous studies, including the 2003 report, "Gender Responsive Strategies: Research, Practice, and Guiding Principles for Women Offenders," prepared for the National Institute of Corrections. The fact that rehabilitation programs designed for male offenders does not work is apparent in the dramatic increase in females in our state correctional facilities, the majority of whom are low-level offenders and are incarcerated for parole or probation revocation or violation.

Your Committees further find that programs that have been successful for women offenders are those that deal with issues of victimization, substance abuse, reestablishing relationships with children and family, and reintegration into the community. These programs take into account the fact that the majority of our female offenders have been victims of abuse and the majority of our adult female offenders are mothers.

Your Committees find that given the fact that community-based programs are less costly than incarceration and have a ripple effect on the female offenders' families and the community as a whole, the appropriations made for gender-responsive community-based programs by this measure are a wise investment of State resources.

As affirmed by the records of votes of the members of your Committees on Public Safety and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1112 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 1 (Nishihara).

SCRep. 194 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1279

The purpose of this measure is to protect the property rights of real property owners by requiring that government entities granted with the power of eminent domain offer to resell any real property taken by eminent domain to the original property owner if the property taken is not used for the purpose for which it was condemned.

Testimony in support of this measure was submitted by the Hawaii Association of Realtors, Kamehameha Schools, the National Federation of Independent Businesses, the Hawaii Farm Bureau Federation, and the Maui County Farm Bureau. Testimony in opposition to this measure was submitted by the Department of the Corporation Counsel, City and County of Honolulu.

There are two constitutional requirements for the exercise of eminent domain. The property taken must be for a public purpose and the property owner is entitled to receive just compensation. There are many instances where condemned property sits idle for years until plans are realized. If the purported public purpose of the condemned property is never realized, the government may sell the property to the highest bidder, which is usually not the original owner of the condemned property.

Your Committee finds that condemnation actions should occur only when necessary and when a viable plan is in place for the condemned property. Despite being entitled to just compensation, owners of condemned property still incur financial and emotional stress from losing their property rights and being forced to relocate their homes or businesses. This stress is heightened when the condemned property sits idle for years because a viable plan for the property is not available, or when the condemned property is sold to someone else who placed the highest bid. Requiring a government entity after five years to offer the right of first refusal to the owner of the condemned for resale at the current appraised value, or condemnation price plus remediation or improvement costs if the property taken is not used for the purpose for which it was condemned will prevent condemned property from sitting idle.

Your Committee has two concerns regarding the language in this measure that it believes needs further clarification. First, your Committee finds that the language referring to "condemnation resolution or other legislation or declaration authorizing the condemnation" needs further clarification as to which documents are included in this phrase. Second, your Committee believes that the sixty-day notice requirement of the right of first refusal needs further clarification as to what actual point the notice requirement is triggered. While your Committee has these concerns, it believes that dialogue should be continued by the Committee on Judiciary and Labor, where these matters can be more appropriately addressed. Furthermore, your Committee hopes at that time, the Department of the Attorney General will also provide testimony and input regarding this measure.

The Hawaii Association of Realtors indicated to your Committee that allowing property owners to request a judicial declaratory ruling on the purported purpose prior to the condemnation action will provide an additional mechanism to ensure that properties are condemned only for public purposes. Furthermore, a declaratory ruling will also serve as a benchmark in the future, if the condemned property fails to be used or developed for a public purpose.

Accordingly, your Committee has amended this measure by:

- (1) Adopting the suggestion made by the Hawaii Association of Realtors and including additional language to allow a property owner or an individual with an interest in the property to be condemned to request a declaratory ruling to determine if the condemnation action by a government entity is for public use; and
- (2) Making technical and nonsubstantive amendments for the purposes of style and consistency.

Your Committee believes that the amended measure will assist in leveling the playing field for real property owners and protect their real property interests, which fulfills the intent of this measure.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1279, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1279, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 195 Public Safety on S.B. No. 932

The purpose of this measure is to establish an offender reentry system to assist adult and juvenile offenders in preparing for release and reintegration back to the community under the Department of Public Safety.

This measure also establishes an interagency committee and appropriates funds for demonstration projects.

Testimony in support of this measure was submitted by the Department of Public Safety, American Civil Liberties Union of Hawaii, Community Alliance on Prisons, The Drug Policy Forum of Hawaii, Hawaii Substance Abuse Coalition, Maui Economic Opportunity, Inc., The Salvation Army, TJ Mahoney & Associates, and eight individuals. The Department of the Attorney General, Office of Youth Service, and the Department of Labor and Industrial Relations submitted testimony with concerns. The Department of Taxation submitted testimony in opposition. The Hawaii Paroling Authority submitted comments.

Your Committee finds that preparing incarcerated persons for reentry into the community is essential in their successful rehabilitation and for the prevention of recidivism. A system that ensures offenders exiting our prisons have acquired the skills and treatment necessary to reenter the community will enhance public safety. Limiting reentry preparation to educational programs is insufficient. Life skills development workshops, including budgeting, nutrition, exercise, substance abuse treatment, and parenting and job skills are also necessary. Such a reentry program will be cost-effective since the cost of incarceration greatly outweighs the cost of preparing incarcerated offenders for becoming productive members of society. Furthermore, research has shown that the continuing treatment and membership this measure provides for through the reentry program is essential to ensure the released offenders have the support they need to be successful.

Your Committee further finds that the special needs of juvenile offenders makes the inclusion of a juvenile reentry program under the Department of Public Safety inappropriate. A mere duplication of an adult reentry program is not sufficient for preparing our youth to transition back into society. Juvenile needs would be best assessed and served through the Departments of Education and Health.

Your Committee disagrees with the testimony of the Department of Public Safety concerning its abilities to interpret the "best interest of the family" weighed with public safety and security considerations when determining the placement of parent inmates in correctional facilities as required in section 5(b)(1) of the proposed Comprehensive Offender Reentry System. Your Committee believes that accessibility to family members for visitation is important for many reasons and that the Department of Public Safety is capable of taking family needs into account in making a determination of placement of the offender.

Your Committee further finds that the functions intended for the proposed Interagency Committee are important to ensure integration of the various training, skills, and assistance necessary, but may be better served through a stakeholders committee. The stakeholders committee should bring together the Departments of the Attorney General, Public Safety, Health, Labor and Industrial Relations, and Education with the Hawaii Paroling Authority, service providers, and stakeholders relevant to the committee's work. The stakeholders committee should meet on a minimum of a quarterly basis, be responsible for monitoring and reviewing reentry programs, and make recommendations to the Department of Public Service and to the Legislature.

Your Committee further finds that given the creation of the stakeholders committee, there is no need for a separate, duplicative reentry task force.

This measure was amended to exclude juvenile offenders from the proposed Offender Reentry Programs and Services under the Department of Public Safety and to omit the proposed reentry task force. The requirement for proposing tax incentives to employers who hire formerly incarcerated individuals was changed from the Department of Taxation to the Department of Public Safety with the assistance of the Department of Taxation and the Department of Labor and Industrial Relations. Technical, nonsubstantive changes have been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 932, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 932, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 196 Economic Development and Taxation on S.B. No. 907

The purpose of this measure is to:

- (1) Amend Chapter 201, Part V, Hawaii Revised Statutes, to change the name of the Office of Space Industry to the Office of Aerospace Development and to clarify the duties of the office; and
- (2) Appropriate sums for various activities of the Office of Aerospace Development.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism (DBEconomic Development and Taxation), the Chancellor and three members of the faculty and staff of the University of Hawaii at Hilo, Enterprise Honolulu, Hawaii Island Economic Development Board, Japan-United States Science, Technology, and Space Applications Program, Rocketplane Kistler Inc., Japan Manned Space Systems, a former Governor of the State of Hawaii, the Senator representing Hawaii's twelfth senatorial district; a faculty member of the Center for Space Resources Colorado School of Mines, the Director of the Space Research Institute of Auburn University, the Director of Space Portal NASA Ames Research Center, and one additional individual.

Your Committee finds that DBEconomic Development and Taxation maintained an Office of Space Industry from 1988 through 1995, but for the past twelve years has operated in an "ad hoc" manner to identify and promote aerospace related opportunities in Hawaii. The changes proposed in this measure would formalize and strengthen these activities and expand the Office's role in serving as a catalyst in the further development of aerospace opportunities for Hawaii.

Your Committee is supportive of the overall concept of this measure and particularly the promise of the Pacific International Space Center for Exploration Systems. However, many of the details may be more appropriately added at a later time in the restructuring of the agency and its duties. Your Committee also has concerns regarding the establishment of a commercial spaceport, which has generated considerable community opposition in the past.

Your Committee believes that one of the most important outcomes of this measure should be enhanced workforce development opportunities and support for Hawaii's emerging industries. Hawaii has many fine educational programs, from the middle school and high school level multidisciplinary Project EAST to the cutting edge work being done at the University of Hawaii. Creating jobs to keep Hawaii students in Hawaii is critical to the successful diversification of the State's economic opportunities.

It is the intent of your Committee to support the broader concepts of an Office of Aerospace Development by streamlining the language in this measure.

Specifically, your Committee has amended this measure to:

- (1) Add language in the findings and purpose section on the recent successes of a University of Hawaii small satellite development program;
- (2) Delete all references to a commercial space launch, international spaceport, and the appropriation for a spaceport;
- (3) Consolidate the proposed language for the powers and duties under section 201-73, Hawaii Revised Statutes;
- (4) Change the expending agency from the Office of Aerospace Development to DBEDT; and
- (5) Make technical amendments for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 907, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 907, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 197 Economic Development and Taxation on S.B. No. 707

The purpose of this measure is to create a new markets tax credit equal to an applicable percentage of the amount paid to a qualified community development entity for a qualified equity investment.

Testimony in support of this measure was received from the Chamber of Commerce of Hawaii; Hawaii Science and Technology Council; Chun, Kerr, Dodd, Beaman and Wong; KUD International; and Phase 3 Properties. The Department of Taxation and the Tax Foundation of Hawaii submitted comments.

Your Committee finds that this measure would provide for conformity with the federal new markets tax credit, which is designed to attract private-sector capital investment to low-income areas in order to finance community development projects, stimulate growth, and create jobs.

Your Committee further finds that the federal tax credit was adopted in 2000, as part of the Community Renewal Tax Relief Act, and that it is equal to thirty-nine per cent of the qualified equity investment and can be claimed over seven years. Administered by the United States Treasury Department, credits are allocated on a competitive basis.

Your Committee supports this measure as a means of attracting investments in Hawaii's low-income areas, and contributing to the diversification of the State's economic opportunities.

Your Committee has amended this bill by:

- (1) In the new section being added to chapter 235, Hawaii Revised Statutes (HRS);
 - (A) Clarifying that the new markets tax credit shall be one hundred per cent of the applicable percentage of the amount paid to a qualified community development entity located in Hawaii, for a qualified investment in Hawaii, and specifying that a qualified community development entity shall be as defined in section 45D(c) of the Internal Revenue Code, relating to federal new markets tax credits;
 - (B) Requiring the taxpayer to have received an allowance of credit under section 45D of the Internal Revenue Code;
 - (C) Deleting the provision that the allocation of the credits shall be made on a first-come, first-served basis; and
 - (D) Adding annual reporting requirements for the Director of Taxation;

- (2) Adding a new section in chapter 241, HRS, that the new markets income tax credits shall be operative under this chapter;
- (3) Adding a new section in chapter 431:7, HRS, that new markets income tax credits shall be operative under this chapter and may be claimed against the tax imposed under section 431:7-202; and
- (4) Amending section 235-2.45, HRS, to add allocations of new markets tax credits among partners.

Your Committee notes that the Department of Taxation stated the revenue impact of this measure is indeterminate at this time because of the unspecified maximum tax credit allowed in the original bill.

Your Committee believes that requiring the taxpayer to have received an allowance of credit under section 45D of the Internal Revenue Code will lessen the potential revenue impact.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 707, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 707, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 198 Judiciary and Labor on S.B. No. 625

The purpose of this measure is to require the Judiciary to implement a certification program and to appoint and use certified court interpreters in legal proceedings.

Presently, federal law requires states to provide language interpretation services to court users with limited English proficiency. However, Hawaii is one of three states that have yet to implement court interpreter certification in any language. As a result, anyone can become a registered interpreter with the Judiciary merely by obtaining a general excise tax license and submitting a court interpreter application form, regardless of language ability and interpreting skills. Such a situation invites an applicant pool of untrained and untested interpreters which can compromise the judicial process and creates inefficiency. More importantly, it jeopardizes the constitutional and civil rights of non-English speaking individuals.

Your Committee received testimonies from 23 individuals, mostly court interpreters in support of the bill. Your Committee also received one testimony from a representative of the Judiciary in opposition to the bill. He testified that the Judiciary has been working to implement a certification program and updated the Committee with the progress of the Judiciary program.

Your Committee concurred that there is a need for a certification program and that the Judiciary proceed with their plans in establishing the program. Your Committee amended the bill with the language submitted by the Judiciary which would allow for the certification program to be implemented in accordance with court rules created by the Judiciary.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 625, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 625, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 199 Judiciary and Labor on S.B. No. 891

The purpose of this measure is to appropriate funds to pay for collective bargaining cost items relating to contributions to the Hawaii employer-union health benefits trust fund for state employees in units 2, 3, 4, 6, 8, 9, and 13, and for officers and employees excluded from collective bargaining.

Your Committee received testimony from HGEA and the State Department of Human Resources Development in support of this bill.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 891 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 200 Judiciary and Labor on S.B. No. 892

The purpose of this measure is to appropriate funds to pay for salary increases and collective bargaining cost items for employees in units 2, 3, 4, 6, 8, 9, and 13, and for officers and employees excluded from collective bargaining.

Your Committee received testimony from HGEA and the State Department of Human Resources Development in support of this bill.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 892 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 201 Judiciary and Labor on S.B. No. 1281

The purpose of this measure is to appropriate funds for salary increases and make other cost adjustments for state officers and employees who are excluded from collective bargaining.

Your Committee received testimony from the Hawaii State Ethics Commission, HGEA, the Legislative Reference Bureau and the Office of the Ombudsman State of Hawaii in support of this bill.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1281 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 202 Judiciary and Labor on S.B. No. 1381

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 1 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Judiciary, the State Department of Human Resources Development and HGEA.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1381 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 203 Judiciary and Labor on S.B. No. 1382

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 2 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Judiciary, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1382 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 204 Judiciary and Labor on S.B. No. 1383

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 3 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Judiciary, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1383 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 205 Judiciary and Labor on S.B. No. 1384

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 4 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Judiciary, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1384 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 206 Judiciary and Labor on S.B. No. 1385

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 5 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1385 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 207 Judiciary and Labor on S.B. No. 1386

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 6 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1386 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 208 Judiciary and Labor on S.B. No. 1387

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 8 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1387 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 209 Judiciary and Labor on S.B. No. 1388

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 9 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the State Judiciary, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1388 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 210 Judiciary and Labor on S.B. No. 1389

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 10 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for the fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1389 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 211 Judiciary and Labor on S.B. No. 1390

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 11 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium 2007-2009.

Your Committee received testimony in support of this bill from the Hawaii Fire Fighters Association, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1390 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 212 Judiciary and Labor on S.B. No. 1391

The purpose of this measure is to authorize and appropriate funds for collective bargaining cost items for Unit 13 and their excluded counterparts, including the cost of salary adjustments negotiated between the State and the bargaining unit representative for fiscal biennium.

Your Committee received testimony in support of this bill from the State Judiciary, HGEA and the State Department of Human Resources Development.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1391 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 213 Intergovernmental and Military Affairs on S.B. No. 1425

The purpose of this measure is to help ensure that there is an adequate supply of licensed contractors available to perform the necessary repairs and reconstruction work during a state of emergency or disaster.

Testimony was submitted in support of this measure by the Department of Defense, State Farm Insurance Companies, the Contractors License Board, and the Subcontractors Association of Hawaii.

Your Committee finds that if a natural disaster should strike, the demand for contractors may exceed the supply of Hawaii licensed contractors and workers available to perform the necessary repair and reconstruction work and this would be exacerbated with the current tight labor market. To protect consumers from unscrupulous and inexperienced individuals seeking to profit from the urgent need of repairs that would follow a disaster like hurricanes Iniki and Katrina, your Committee believes that complete exemption from the contractor licensing requirements is inappropriate and may lead to additional harm and heartache. Allowing out-of-state contractors licensed in other jurisdictions to perform work in Hawaii under an emergency license represents a reasonable balance between the need for more contractors and the need to protect consumers.

To that end, your Committee amended the measure by clarifying language that the emergency contractor must show proof of liability and property damage insurance and requiring emergency contractors to pay the state general excise tax.

It is the intent of your Committee to ensure that there is an adequate supply of licensed contractors available to perform the necessary repairs and reconstruction work during a state of emergency or disaster and putting requirements in place to ensure public and consumer safety.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1425, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1425, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 214 Intergovernmental and Military Affairs on S.B. No. 1332

The purpose of this measure is to add the offense of theft of copper, add special requirements for the purchase of copper by scrap dealers, and hold scrap dealers accountable for violations of section 445-233, Hawaii Revised Statutes, in order to curb the recent rise in costly copper thefts.

Your Committee received testimony in support of this measure from the Department of Attorney General, the Honolulu Police Department, the Department of the Prosecuting Attorney of the City and County of Honolulu, the Department of the Prosecuting Attorney of the County of Maui, and Hawaiian Electric Company, Inc. Testimony in opposition to this measure was submitted by Okuda Metal, Inc.

Your Committee finds that the price of copper has increased dramatically over the past few years and as a result, copper theft has become a serious and rapidly growing crime. This new type of theft has devastating effects on the entire community.

Your Committee notes that it received testimony from Hawaiian Electric Company, Inc. stating that the sheer volume of copper wire purchased and installed throughout their system makes it virtually impossible to accurately track wire location with the material information required. Therefore, on passing this measure out, your Committee asks that the Committee on Judiciary and Labor consider exempting public utilities from the sellers' requirements contained in this measure.

Your Committee has amended this measure to make technical, nonsubstantive changes for the purposes of clarity and style, and added an effective date of upon approval.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1332, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1332, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 215 (Joint) Intergovernmental and Military Affairs and Transportation and International Affairs on S.B. No. 1046

The purpose of this measure is to require the counties to deposit all fees for temporary and replacement disabled parking placards into the state general fund.

Testimony in support of the measure was received from the City and County of Honolulu, the Disability and Communication Access Board, and one individual.

Your Committees find that moneys collected by the counties for temporary and replacement placards should be returned to the state general fund. Currently, the State reimburses the counties at a rate of \$12 per placard. This measure clarifies that the moneys collected would be returned directly to the State and eliminates the paperwork required for requesting remittance, thus allowing for smoother quarterly transactions.

To this end, your Committees amended the measure by inserting the word "state" before the words "general fund" in sections 1, 2, and 3, to provide clarity and to avoid confusion between the state general fund and the general funds of the respective counties.

It is the intent of your Committees to require the counties to deposit all fees for temporary and replacement disabled parking placards into the state general fund.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Transportation and International Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1046, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1046, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Taniguchi).

SCRep. 216 (Joint) Intergovernmental and Military Affairs and Tourism and Government Operations on S.B. No. 795

The purpose of this measure is to require the Department of Accounting and General Services to establish and implement a statewide building code.

This measure appropriates \$500,000, for fiscal year 2007-2008, for the operations of the State Building Code Council, including technical assistance services, and training and administrative assistance as required to be expended by the Department of Accounting and General Services.

Testimony in support of this measure was submitted by the Department of Defense, the Department of Accounting and General Services, the Fire Council, the Structural Engineers Association of Hawaii, and State Farm Insurance Companies. The Council of the American Institute of Architects submitted comments on the measure.

Your Committees find that the State has traditionally allowed the individual counties to establish their own building codes. The counties have adopted various portions of the Uniform Building Code, but building codes differ from county to county. The status of the fragmented building requirements in Hawaii is of serious concern to those involved in building ownership, design, construction, and insurance. Over forty states have adopted some form of a statewide building code. The adoption of a uniform set of statewide building codes applicable to one and two family dwellings, all other residential uses, and commercial and industrial buildings, and state buildings would make it possible for building owners, designers, contractors, and code enforcers within the State to apply consistent standards. The health and safety considerations related to the codes are of statewide interest, especially relating to emergency disaster preparedness.

Your Committees amended this measure by requiring that all council members be appointed by either the Governor, Senate President, Speaker of the House, Mayor of each respective county, the Fire Chief of the respective counties, and each council member serve staggered six-year terms. Your Committees also amended this measure to include language that the State Building Code shall include the latest edition of the State Fire Code as adopted by the State Fire Council and that the State Building Code shall also include the latest edition of the Uniform Plumbing Code as copyrighted and published by the International Association of Plumbing and Mechanical Officials.

The intent of your Committees is to require the Department of Accounting and General Services to establish and implement a statewide building code to provide for the implementation of consistent standards throughout the State of Hawaii.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 795, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 795, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, none.

SCRep. 217 Intergovernmental and Military Affairs on S.B. No. 31

The purpose of this measure is to require the Office of Veterans' Services to provide an alternative to current procedures regarding funerals and transportation of remains for certain Filipino veterans of World War II.

Specifically, this measure provides that upon the request of an eligible Filipino veteran's survivor or an interested party, the Office of Veterans' Services shall provide funeral and burial services and transport remains to the Philippines; provided that the amount disbursed shall not exceed \$2,500 per person.

This measure also appropriates an unspecified amount of money for burial grant funds for deceased Filipino veterans.

Your Committee received testimony in support of this measure from the United Filipino Council of Hawaii; the Filipino Coalition for Solidarity; the National Federation of Filipino American Associations Region 12; the Oahu Filipino Community Council; Nursing, Advocates and Mentors, Inc.; the Congress of Visayan Organizations; and the Asian American Network for Cancer Awareness Research and Training.

Comments were submitted by the Office of Veteran Affairs of the Department of Defense.

The measure would only apply in situations where a deceased Filipino veteran's survivor or an interested party has already paid for services rendered on behalf of the deceased veteran, or in situations where the deceased veteran may have purchased a pre-paid funeral and burial plan. During World War II, 142,000 Filipino forces joined the U.S. Armed Forces in the Far East, serving as an integral part of the U.S. Military. Since 1992, approximately, 3,000 of these World War II Filipino veterans are residents of the State of Hawaii. Approximately eighty per cent of these 3,000 World War II Filipino veterans presently reside on Oahu.

Your Committee finds that, under the program established pursuant to this measure, the Office of Veterans' Services should provide direct disbursement for funeral services and transportation of remains for eligible Filipino veterans, rather than require veterans' survivors and interested parties to pay out-of-pocket for these expenses and wait to be reimbursed.

The intent of this measure is to provide direct disbursement, up to \$2,500 per person, to eligible Filipino veterans' survivors and interested parties for the cost of funeral services and transportation of veteran's remains to the Philippines.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 31 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 218 Intergovernmental and Military Affairs on S.B. No. 85

The purpose of this measure is to reduce flood losses, facilitate accurate insurance ratings and promote awareness of flood insurance.

Specifically, this measure requires each county to adopt an ordinance to participate in the community rating system of the National Flood Insurance Program and appropriates an unspecified amount of funds to each county to assist in the implementation of this measure.

Testimony in support of this measure was submitted by the Department of Defense and the Hawaii Association of Realtors. Testimony in opposition of this measure was submitted by the Department of Planning and Permitting of the City and County of Honolulu.

Your Committee finds this measure will help protect property rights and secure safe and livable communities throughout our State. Participation in the National Flood Insurance Program will ensure more informed consumers and, in some cases, will provide discounts on flood insurance policy premiums to homeowners.

This measure was amended to make the appropriate changes in section 46-1.5, Hawaii Revised Statutes, needed to reflect the repeal of chapter 201G, Hawaii Revised Statutes. In addition, technical, nonsubstantive changes were made for the purposes of clarity and accuracy.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 85, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 85, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 219 Intergovernmental and Military Affairs on S.B. No. 621

The purpose of this measure is to make an appropriation for the Hawaii Civil Air Patrol to repair the roof hangar at the Hawaii wing headquarters.

Your Committee received testimony in support of this measure from the Department of Defense and Hawaii Civil Air Patrol.

Your Committee finds that maintenance and repair projects are a necessity for successful rescue missions and the Hawaii Civil Air Patrol depends on state funding to meet its basic needs.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 621 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 220 Intergovernmental and Military Affairs on S.B. No. 622

The purpose of this measure is to make an appropriation to help defray the operational expenses of the Hawaii Civil Air Patrol (Hawaii CAP).

Your Committee received testimony in support of this measure from the Department of Defense, Hawaii CAP, and two individuals.

Your Committee finds that Hawaii CAP provides necessary disaster relief, search and rescue, homeland security, and medical emergency transport services to local and national organizations. Since the early 1950s, the Hawaii CAP has provided tsunami warning services to the State. The Hawaii CAP flies more than ninety-five per cent of the nation's inland search and rescue missions. The Hawaii CAP also plays a vital role in disaster relief. Volunteer members fly disaster relief officials to remote locations and support local, state, and national disaster relief organizations with experienced pilots and personnel. The Hawaii CAP transports time-sensitive medical materials, blood products, and body tissue.

Your Committee further finds that the civil air patrol depends on state funding to defray its operational expenses, but past budget restrictions have hampered its ability to carry out necessary operations.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 622 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 221 Intergovernmental and Military Affairs on S.B. No. 699

The purpose of this measure is to authorize counties to waive the fees for special number license plates to veterans and directs the Office of Veteran Services to reimburse the counties for the waived fees.

This measure also appropriates moneys for fiscal year 2007-2008, and fiscal year 2008-2009, for the reimbursement of costs to the City and County of Honolulu for the issuance of special number license plates to veterans.

Testimony was submitted in support of this measure by the Advisory Board on Veterans Services, the Office of Veterans Services, the Hawaii National Guard Association, the National Guard Association of Hawaii Insurance Trust, and the Hawaii National Guard Enlisted Association. Testimony in opposition to the reimbursement of previously paid fees by the counties was submitted by the City and County of Honolulu.

Your Committee finds that the military specialty license plates program was authorized in 1992 and since that time, the counties have issued thousands of military specialty license plates to eligible applicants, processed many license plate replacements for license plates that were lost, stolen, or defaced, and transferred numerous vehicles from one eligible applicant to another eligible applicant. Your Committee further finds that this program serves as an important acknowledgement to our veterans, recognizing their sacrifice and service to our nation.

Your Committee also finds that it would be an insurmountable task to require the Office of Veteran Services to reimburse the counties for the license plate fees that have been previously paid and ensure that the reimbursement is provided to the person that originally paid the fee.

Your Committee amended this measure to remove the requirement that the Office of Veteran Services reimburse the City and County of Honolulu for the amount of the waived license plate fees previously charged and to remove the appropriation for this purpose.

It is the intent of your Committee to continue to honor our veterans by waiving the fees for special number license plates for veterans.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 699, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 699, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 222 Intergovernmental and Military Affairs on S.B. No. 725

The purpose of this measure is to appropriate \$102,000 for fiscal year 2007-2008, and \$50,800 for fiscal year 2008-2009, for the repair and maintenance of the Kauai Veterans Cemetery.

Testimony was received in support of this measure by the Advisory Board on Veterans Services and the Navy League of the United States, Kauai Council.

Your Committee finds that the Kauai Veterans Cemetery is in need of repair and maintenance. The State has made a commitment to honor our decedent veterans and continued maintenance and repair of the Kauai Veterans Cemetery is needed to ensure that the cemetery remains a well kept memorial to them. However, your Committee notes that the cost estimates and appropriated amounts in this measure are considered to be the minimum amounts required to adequately bring the Kauai Veterans Cemetery up to building standards and codes and to prevent further deterioration.

Your Committee amended this measure by removing the appropriation amounts. Your Committee recommends that additional cost estimates be discussed and researched in order to determine the appropriate amounts required to care for the cemetery.

It is the intent of your Committee to determine appropriate funding for fiscal year 2007-2008, and beyond, for the repair and maintenance of the Kauai Veterans Cemetery to ensure that the memorial is a well-kept tribute to our veterans.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 725, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 725, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 223 Intergovernmental and Military Affairs on S.B. No. 792

The purpose of this measure is to make an appropriation to the Department of Defense for continuous staffing at the state civil defense emergency operating center.

Your Committee received testimony in support of this measure from State Civil Defense.

Your Committee finds that funding is needed to sustain the state emergency operating center warning section. According to State Civil Defense, over the past year, personnel have been recruited and trained to perform a twenty-four hour, seven days a week threat analysis and early warning capability. This capability must be sustained with continued funding.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 792 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 224 Intergovernmental and Military Affairs on S.B. No. 794

The purpose of this measure is to make an appropriation to the Department of Defense for the State Civil Defense Emergency Supply Program.

Your Committee received testimony in support of this measure from State Civil Defense, Disability and Communication Access Board, and State Council on Developmental Disabilities.

Your Committee finds that the State Civil Defense needs funding to purchase equipment for emergency shelters that will be designated for individuals with special health needs, including persons with disabilities. This measure would increase the number and dispersion of community emergency shelters to provide augmented health support for individuals with ongoing enhanced special health needs requiring a heightened level of attention.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 794 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 225 Intergovernmental and Military Affairs on S.B. No. 796

The purpose of this measure is to appropriate funds to add urgently needed civil defense siren warning systems throughout the State.

Your Committee appropriated \$2,500,000 in each year of fiscal biennium 2007-2009, for the purpose of installing additional sirens to the state civil defense warning systems.

Testimony in support of this measure was submitted by the Department of Defense.

Your Committee finds that Hawaii is vulnerable to a tsunami or hurricane disaster and recognizes the importance of remaining vigilant in protecting its residents and guests from these disasters. In view of lessons learned from the 2004 tsunami in South East Asia and Hurricane Katrina in Florida in 2005, and because these natural disasters pose a great potential to cause vast devastation to Hawaii, the Legislature deems it vitally important to ensure that the State is adequately prepared to deal with these disasters. While the State and related private agencies have made great strides in becoming capable of handling a tsunami or hurricane disaster, more resources are needed to upgrade equipment and decrease coverage gaps in the existing warning systems.

To this end, this measure was amended by your Committee to consolidate other measures related to civil defense as follows:

- (1) Senate Bill No. 86, which allows the Governor, upon the declaration of an emergency, to release up to ten per cent of the moneys appropriated from the Emergency and Budget Reserve Fund to provide assistance to residents and businesses that have sustained damage during or immediately after a natural disaster;

- (2) Senate Bill No. 786, which appropriates \$1,000,000 in each year of the 2007-2009 fiscal biennium for the Department of Defense to stock for emergency supply caches to support disaster victims and communities that may become isolated due to natural disasters;
- (3) Senate Bill No. 788, which appropriates \$1,500,000 in each year of the 2007-2009 biennium for the Department of Defense for the State Civil Defense Major Disaster Fund;
- (4) Senate Bill No. 791, which appropriates \$150,000 in each year of the 2007-2009 biennium for the Department of Defense for continued funding of non-declared disaster activation and response; and
- (5) Senate Bill No. 1797, which appropriates a blank amount to the Ethnic Education Foundation of Hawaii to assist in disseminating information to the non-English speaking and English as a second language population in the event of a disaster or emergency to be expended by the Department of Defense.

The intent of your Committee, in consolidating these bills, is to provide necessary resources to prepare the State of Hawaii for disaster preparedness and recovery issues. Specifically, the intent is to authorize general obligation bonds to fund the installation of additional sirens to the State Civil Defense warning system; allow the Governor to order the release of up to ten per cent of moneys appropriated from interest earnings in the Emergency and Budget Reserve Fund to provide assistance after a natural disaster; appropriate moneys for emergency supply caches, to the State Civil Defense Major Disaster Fund for non-declared disaster activation and response; and appropriate moneys to the Ethnic Education Foundation of Hawaii to assist them in disseminating information in the event of a disaster.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 796, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 796, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 226 Intergovernmental and Military Affairs on S.B. No. 806

The purpose of this measure is to provide additional clerical support for the Office of Veterans Services by establishing one full-time permanent clerk typist II position within the Office of Veterans Services.

The measure appropriates \$33,230 for each fiscal year of the biennium, to fund the establishment of one permanent full-time clerk typist position.

Testimony in support of this measure was submitted by the Advisory Board on Veterans Services and the Office of Veterans Services.

Your Committee finds that the Office of Veterans Services is the principal agency in the State responsible for the development and management of policies and programs for veterans and their families. The Office also acts as a liaison between the Governor and the veterans groups and organizations and serves as an intermediary between the Department of Veterans Affairs and veterans and their family members. The continuous return of troops from the Middle East and the eventual discharge of once-active military personnel in Hawaii have caused a huge backlog of unprocessed documents that is expected to continue if not immediately addressed. An additional clerk is needed to augment the limited support staff to allow the Office of Veterans Services to handle the growing number of discharge documents requiring immediate action.

Your Committee further finds that in order for the Office of Veterans Services to better serve the neighboring islands, it is necessary to provide funding for a travel allowance shortfall for the counselor position that was created in last year's operating budget.

Your Committee amended this measure to appropriate \$8,000 for fiscal year 2007-2008, for a travel allowance shortfall for the counselor position created in last year's operational budget.

It is the intent of your Committee to continue to support the Office of Veterans Services by establishing one full-time permanent clerk typist II position within the Office of Veterans Services and provide funding for a travel allowance shortfall for the counselor position created last year.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 806, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 806, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 227 Intergovernmental and Military Affairs on S.B. No. 1427

The purpose of this measure is to adjust the Civil Defense Vice-Director's salary pay scale to align with the federal general pay tables in order to commensurately compensate the Vice-Director for responsibilities of the position.

Testimony in support of this measure was submitted by the Department of Defense, and the Department of Human Resources Development.

Your Committee finds that providing an increase in salary for the Vice-Director of Civil Defense based on a percentage of the salary of the Director of Human Resources Development is not commensurate with the duties and responsibilities that are associated with the position. Since the attack on September 11, 2001, the State Civil Defense was tasked with responsibilities to coordinate with a multitude of federal, military, state, county, and civilian organizations in order to spearhead the development and updates of contingency plans for force protection of critical infrastructures and disaster response. The State Civil Defense is the sole agent for the State to receive, manage, coordinate, disburse, and expend Homeland Security grants totaling over \$80,000,000 in federal funds. Based on these increased responsibilities and duties, the compensation for the Vice-Director within the salary range of a federal General Schedule 15 or a military Colonel is fair. Currently, the mid-range salary is approximately \$105,000 per year.

Your Committee amended this measure by adding language to further clarify that the Vice-Director's salary pay scale aligns with the federal general pay tables.

The intent of your Committee is to establish the Vice-Director's salary pay scale to align with the federal general pay tables.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1427, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1427, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 228 Intergovernmental and Military Affairs on S.B. No. 1431

The purpose of this measure is to make an emergency appropriation for emergency relief operations in the counties of Hawaii, Maui, Kauai, and the City and County of Honolulu as a result of the October 15, 2006, Kiholo Bay earthquake disaster.

Testimony in support of this measure was submitted by the Department of Defense, the Department of Education, the County of Hawaii, and the Daughters of Hawaii.

Your Committee finds that additional funding is required to continue the Department of Defense's disaster relief efforts and to cover the twenty-five per cent cost share of the Federal Emergency Management Agency's Public Assistance Programs as required by the Robert T. Stafford Disaster and Emergency Assistance Act. Without this appropriation, state agencies will be at risk of losing federal funding for the repair and restoration of damaged government facilities. The general fund recommendation included in this measure has been made in accordance with the statutorily defined appropriation ceiling for the Executive Branch pursuant to section 37-92, Hawaii Revised Statutes. Funding requested in this measure will assure continued assistance and relief for the October 15, 2006, Kiholo Bay earthquake disaster.

To this end, your Committee amended this measure to further clarify that this measure will allow the expenditure of funds for all earthquake disaster recovery projects, which would include the twenty-five per cent non-federal cost share for earthquake disaster recovery projects made eligible under the Federal Emergency Management Agency's Public Assistance Program.

It is the intent of your Committee to ensure continued assistance and relief for the State's victims of the October 15, 2006, Kiholo Bay earthquake.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1431, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1431, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 229 Intergovernmental and Military Affairs on S.B. No. 1561

The purpose of this measure is to make an appropriation for development of a non-emergency reporting system, known as 3-1-1.

Your Committee received testimony in support of this measure from the Department of Defense, Honolulu Customer Services Department, Honolulu Police Department, and American Heart Association. Comments were submitted by Cingular Wireless.

Your Committee finds that a 3-1-1 system is necessary to protect the public health, safety, and welfare, while providing better access to public services. The City and County of Honolulu proposes to develop a 3-1-1 system to better serve the residents of the State. The City and County of Honolulu, through the Mayor's office and the Customer Services Department, is currently defining requirements for a 3-1-1 system, working together with first responders and neighbor island counties. The City and County of Honolulu will create a model of 3-1-1 that can be designed to allow any county to participate and also provide support for state functions.

Initially, this system can be used to relieve the 9-1-1 system of non-emergency phone calls that number over one million calls annually. Subsequently, the services could expand to include all of the services offered by each county.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1561 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 230 Intergovernmental and Military Affairs on S.B. No. 781

The purpose of this measure is to appropriate \$150,000 to develop a feasibility study for a Hawaii state fire and emergency training facility.

Your Committee received testimony in support of this measure from the State Fire Council, the Honolulu Fire Department, and the Kauai Fire Department.

Your Committee finds that fire fighters and other emergency first responders must be able to fully respond to natural and manmade disasters. The development of a Hawaii state fire and emergency training facility will help ensure that fire fighters and emergency first responders are able to meet the needs of the public in the case of such disaster.

Your Committee has amended this measure to include a separate, related appropriation for a public campaign on natural disaster preparedness. The amount of the appropriation for the public campaign has been left unspecified to encourage further discussion.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 781, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 781, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Ayes with Reservations, 2 (Inouye, Tsutsui). Noes, none. Excused, 1 (Hemmings).

SCRep. 231 Education on S.B. No. 684

The purpose of this measure is to require public disclosure of proposed compensation or compensation changes for administrative positions in the University of Hawaii System.

Testimony in support of this measure was submitted by the University of Hawaii Professional Assembly. Testimony in opposition to this measure was submitted by the University of Hawaii.

Your Committee finds that currently, the Board of Regents is not required to disclose to the public the proposed salary of a candidate for an administrative position or a proposed change in the salary of an administrator. Instead, disclosure is only necessary after the Board of Regents has already taken action on a salary proposal. Your Committee understands that interested parties may wish to gain knowledge of proposed salary information prior to action being taken in order to provide comments on such proposed action. However, your Committee is also mindful of the fact that the disclosure of sensitive information, such as proposed salaries, can be detrimental to the balance of power involved in negotiations during the hiring process.

Additionally, testimony provided raised questions regarding the constitutionality of requiring public disclosure of proposed actions by the Board of Regents. Your Committee believes that this issue requires further consideration and investigation into the merits of the legal issues raised.

Accordingly, your Committee has amended this measure by changing the effective date of the Act to July 1, 2050, to facilitate further discussion on the measure.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 684, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 684, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Taniguchi).

SCRep. 232 Education on S.B. No. 1268

The purpose of this measure is to increase the number of local residents attending institutions of higher education.

Specifically, this measure establishes a college savings account program that provides a sliding-scale tax credit for contributions made to college savings accounts, the maximum of which would be \$500.

Testimony in support of this measure was submitted by the Department of Taxation, the University of Hawai'i, Hawaii Association of Independent Schools, and one individual.

Your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of approximately \$6.3 million dollars per year, assuming the maximum tax credit of \$500. No methodology was provided by the Department of Taxation.

Your Committee finds that a college savings account tax credit will provide an additional incentive to encourage Hawaii taxpayers to take advantage of Hawaii's TuitionEDGE 529 program and, thereby, lower the cost of administering the fund and increase the participants' savings for college tuition.

Your Committee further finds that a college savings account program tax credit for Hawaii residents is an important state investment, given our high cost of living, and can contribute to an increase of college graduates in Hawaii, including those in the socioeconomic and ethnically underrepresented groups.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1268 and recommends that it pass Second Reading and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Taniguchi).

SCRep. 233 (Joint) Education and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 885

The purpose of this measure is to support and enhance the agriculture and culinary arts industries by ensuring the continued supply of qualified individuals for each industry.

Specifically, this measure establishes an agricultural and culinary education pilot program that teaches students healthy eating habits and encourages the culinary arts, farming, diversified agriculture, and related industries such as market development and science and technology, as long-term career goals. This measure also provides reporting requirements and funding to effectuate the program.

Testimony in support of this measure was submitted by the Department of Agriculture, the Hawaii State Teachers Association, the Hawaii Farm Bureau Federation, Ka'ala Farm, Inc., and the Maui County Farm Bureau. Testimony in opposition to this measure was submitted by the Department of Education.

Your Committees find that the development of a diversified agriculture industry and related industries is essential to addressing the State's long-term sustainability goals. The education of our youth is a key component in meeting these goals, and the provision of programs to foster both professional and vocational careers is also necessary to ensure economic and socioeconomic prosperity in Hawaii. Your Committees further find that in order to ensure the continued supply of qualified individuals to support and maintain the agriculture and related industries, the State must invest in growing an informed and skilled workforce to meet the needs of these industries.

This measure establishes an agricultural and culinary education pilot program that teaches students healthy eating habits and encourages the culinary arts, farming, diversified agriculture, and related industries as long-term career goals. Your Committees also heard a related measure, Senate Bill No. 90, which establishes a comprehensive vocational agriculture and landscape education program in the public schools to also address the issue of supplying qualified agricultural and landscaping workers to the agriculture and related industries in Hawaii. Your Committees believe in the value of teaching our youth the importance of food security, the agricultural sector and workforce, and sustainability efforts and believe this program will spawn a future qualified workforce for the agriculture, culinary arts, landscaping, and other related industries.

Accordingly, your Committees have amended this measure by:

- (1) Including in the measure the concept espoused in Senate Bill No. 90, to expand the vocational agriculture education program to develop a comprehensive agriculture and landscape education program in the public schools;

- (2) Including appropriations for and appropriate reporting requirements by the Department of Agriculture, in consultation with the Department of Education and the University of Hawaii, on the implementation of the comprehensive agriculture, culinary arts, and landscaping educational program; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 885, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 885, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, 1 (Fukunaga).

SCRep. 234 (Joint) Education and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 611

The purpose of this measure is to allow the Department of Education to own and control all of the lands and facilities being used for public schools in Hawaii.

Specifically, this measure transfers all public lands and facilities used for public schools to the Department of Education and empowers the Board and the Department of Education to acquire, sell, lease, transfer, hypothecate, develop, and enter into agreements for the improvement of lands and facilities under its control for the support of the public schools.

Testimony in support of this measure was submitted by the Department of Education (DOE), the City and County of Honolulu, and the Land Use Research Foundation of Hawaii. Testimony in opposition to the measure was submitted by the Department of Land and Natural Resources and the Office of Hawaiian Affairs.

Your Committees find that the DOE is tasked with ensuring the provision of quality education in appropriate facilities to students throughout the State. This task is difficult, at best, when attempting to balance the interests of teachers and students and working within budgetary constraints. As a result, the State must explore additional alternatives to increased funding to provide adequate public schools and public school facilities in Hawaii.

Your Committees further find that many western states utilize a system whereby lands provided for public schools are managed in a trust to benefit or generate revenues for the public schools. Your Committees believe that authorizing the DOE and the Board of Education (Board) to manage public school lands and facilities would allow the DOE to leverage underutilized land assets for redevelopment, joint venture, revenue production, or other related opportunities. Increased authority over public school lands and facilities will allow the DOE to better utilize its assets to provide for current and future needs, including the construction of new schools, expansion of teacher housing, or improving school facilities.

Your Committees recognize the concerns raised by the testimony provided, including the fact that the measure also encompasses ceded lands and revenues from ceded lands in contradiction of the Admission Act. In addition, the measure would allow public lands under the DOE's control to be sold or exchanged or transferred for private lands, thus diminishing the public lands that are held in trust not only for the public schools. Lands under the DOE's control should be managed, but not disposed of when such lands, including those which the DOE is not utilizing, should be returned to the public trust for other important uses.

Accordingly, your Committees have amended this measure by:

- (1) Removing the Board's authority to sell, exchange, or transfer public school lands under its control;
- (2) Requiring the Board to transfer any surplus or unused public school lands to the Department of Land and Natural Resources for inclusion in the inventory of public lands in the public land trust;
- (3) Changing the effective date of the Act to July 1, 2050, to facilitate further discussion on the measure; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 611, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 611, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 235 Education on S.B. No. 613

The purpose of this measure is to provide support and incentives to early childhood education programs in the State.

Specifically, this measure:

- (1) Establishes an early education incentive program to provide funding for professional development in early childhood care and education;
- (2) Requires the Department of Education to identify unused public school land or facilities for use by early childhood education program and appropriate funds therefor; and
- (3) Appropriates funds to provide for a student to teacher ratio in junior kindergarten programs of fifteen-to-one.

Testimony in support of this measure was submitted by the Department of Education, the Workforce Development Council, the Hawai'i Teacher Standards Board, Kamehameha Schools, the Early Learning Education Task Force, the Center on Disability Studies, the Childcare Business Coalition, and one individual. Testimony in opposition to this measure was submitted by one individual.

Your Committee finds that a critical teacher shortage problem persists in Hawaii. The need to recruit and retain qualified individuals is only surpassed by the need to grow a qualified teacher workforce. This is true at all levels of public school education, but of particular importance at the early childhood education level. The State has made great strides to improve early childhood education by developing and making available kindergarten and junior kindergarten programs. Research indicates that early childhood education is instrumental in lifelong success and your

Committee believes that the State must endeavor to promote, enhance, and support programs and initiatives that address the needs of our young children.

Your Committee further finds that the Legislature, pursuant to Act 259, Session Laws of Hawaii 2006, established the Early Learning Education Task Force to develop a five-year plan for a coherent, comprehensive, and sustainable early learning system for children from birth to age five. The task force found five key elements to increasing early educator capacity in the State. This measure addresses these key factors by establishing a program to provide incentives to early education professionals and those seeking degrees in the field. Your Committee believes that we must invest in our future teachers and assist them in achieving high academic levels and to grow a highly-qualified early education workforce.

Upon further review of the measure and the testimony provided, including the recommendations by the Early Learning Education Task Force, your Committee believes that the measure can be refined to include scholarships and wage supplementations for individuals in the early care and education workforce and those pursuing post-secondary degrees in early education. Additionally, testimony provided also highlighted the need to capture and assist younger individuals interested in pursuing early education careers, including those at the high school level. Your Committee believes that all efforts should be explored to ensure the establishment of a qualified and sustainable early educator workforce.

Your Committee also determines that additional improvements to the early education system can be accomplished through the provision of land and other facilities for early childhood education programs and by reducing the student-to-adult ratio in the classrooms to an appropriate level for optimal learning.

Accordingly, your Committee has amended this measure by:

- (1) Removing subsection (d) of the newly created section in chapter 302A, Hawaii Revised Statutes, that specified the amount of funds to be provided to each early education school and the purposes for which the funds could be used;
- (2) Including language that establishes criteria and guidelines for providing scholarship and wage supplementation incentives to:
 - (A) Residents of the State who are currently caring for or employed to care for three or more unrelated children in private, public, or not-for-profit settings while pursuing an associate's degree or bachelor's degree in early childhood education or teaching certification, including certification in special education, at a college or university within the University of Hawaii system; and
 - (B) Staff of licensed and licensed-exempt settings serving a minimum of three unrelated children;
- (3) Requiring dual credit to be given to high school students under the Running Start Program for Professional and Career Education for Early Childhood (PACE) courses offered in the University of Hawaii system;
- (4) Specifying that funds are being appropriated to junior kindergarten programs to ensure an appropriate student-to-adult ratio of ten to one;
- (5) Including an appropriation for the Department of Education to provide subsidies to private early childhood education providers who accept special education students and to hire early childhood education intervention specialists to provide direct services to the private providers;
- (6) Changing the effective date of the Act to July 1, 2050, to facilitate further discussion on the measure; and
- (7) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 613, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 613, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 236 Education on S.B. No. 691

The purpose of this measure is to require the Department of Education to provide suitable transportation to and from school and for educational field trips for all children in grades kindergarten to twelve and in special education classes.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association and the Hawaii School Bus Association. Comments on the measure were also submitted by the Department of Education (DOE).

Your Committee finds that part of providing a proper education to public school students throughout the State includes the provision of safe and reliable transportation to and from school and for educational excursions. Currently, the DOE provides transportation services to students living outside of Honolulu proper, with some exceptions, and those living beyond a mile away from school. Many other students may not require transportation services because they live in areas that are serviced by the City and County of Honolulu bus system, are attending schools under a geographic exemption, or do not proceed directly home after school. Your Committee understands that to require the DOE to provide transportation services to all public school students could be a costly endeavor and a huge undertaking. Your Committee is most concerned with ensuring that the current level of transportation services provided to students is not diminished, or, if necessary, that such changes are not executed without input from interested parties, including parents. The establishment of a process to allow stakeholders to participate in changes to current policies and procedures will help to ensure that the transportation needs of the students are being met.

Accordingly, your Committee has amended this measure by:

- (1) Removing language mandating the DOE to provide transportation to and from school and for educational field trips for all children in grades kindergarten to twelve and in special education classes;
- (2) Including the requirement that the DOE establish a process for allowing stakeholder participation when contemplating changes to the DOE's current policies, procedures, and programs regarding transportation services for students;
- (3) Changing the effective date of the Act to July 1, 2008, to provide the DOE time to establish new procedures for implementation of the Act; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 691, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 691, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 237 Education on S.B. No. 1126

The purpose of this measure is to increase the educational capital of the State.

Specifically, this measure appropriates the sum of \$150,000, for fiscal year 2007-2008, for the Center on the Family at the University of Hawaii. This measure also requires the University of Hawaii to report to the Legislature prior to the 2008 Regular Session on its actions taken pursuant to this measure.

Testimony in support of this measure was submitted by the Office of Youth Services; the University of Hawai'i; the Center on the Family; the Homeless Programs Branch of the Department of Human Services; Aloha United Way; American Lung Association of Hawaii; Assisted Living Options Hawaii; Catholic Charities Hawai'i; Hawaii Women Work!; Hawaii Youth Services Network; Health Mothers, Healthy Babies Coalition of Hawai'i; Honolulu Community Action Program; Institute for Human Services, Inc.; Ka Hale Pomaika'i; PATCH; Project Dana; Read to Me International Foundation; Save the FoodBasket, Inc.; Springs of Living Water; Windward Homeless Coalition; and nine individuals.

Your Committee finds that the Center on the Family at the University of Hawai'i is an extremely valuable resource that provides important data regarding Hawaii's children, families, and elderly. This data is made available to the public through its on-line Data Center and is used by numerous nonprofits and governmental agencies serving the less advantaged groups in our State.

Your Committee further finds that the appropriation made in this measure is a wise investment of the State's resources and will help many organizations in providing their valuable services to our less advantage populations.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1126 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 238 Education on S.B. No. 1931

The purpose of this measure is to establish an Educational Workforce Working Group to address and examine workforce needs in Hawaii and how these needs are being and can be met.

This measure also requires the preparation of five-year plans by the Department of Education and the University of Hawaii to ensure optimal use of technology for administration, data collection, and data sharing related to educational and workforce needs, and to create individualized student learning plans that will have a direct link to economic and workforce needs.

Testimony in support of this measure was submitted by the Department of Education and the Department of Business, Economic Development, and Tourism. Comments on the measure were also provided by the University of Hawaii (UH) System.

Your Committee finds that current workforce needs in the State are not being adequately met and it is unclear as to whether comprehensive, focused, and concerted efforts for workforce development are being undertaken by the DOE and the UH System. Your Committee further finds that, although other entities currently exist to address workforce development issues, there is still a lack of understanding as to where the needs are, how they are being met, and what can be done to better meet the current and future workforce needs of the State. This measure establishes a working group to explore the aforementioned and other issues and to report to the Legislature so that focused efforts can be made in the future to address workforce needs. Your Committee determines that in order to cull relevant information from other existing entities involved in workforce development, the composition of the working group members should be reconsidered.

Additionally, this measure requires the DOE and the UH to develop five-year plans for optimizing technology, collecting data, and developing individualized student plans to address workforce needs. Testimony provided expressed confusion over the use of the term individualized plans, believing that this referenced individualized education programs required for special education students. However, this was not the intent of the measure; instead, the intent was that personalized plans be developed for students to address workforce needs. Testimony provided by the UH System also indicated that the development of a five-year plan by the UH would not comport with its current strategic planning requirements. Therefore, your Committee believes that the UH should provide other relevant information on the UH's efforts to address workforce development needs and its plans for improving those efforts in the future.

Your Committee also heard a related measure, Senate Bill No. 225, which appropriated funds for a workforce academy liaison in the Department of Education. The workforce academy liaison would be responsible for coordinating workforce development efforts with the academies to provide students with career exploration, awareness, and mentoring. Your Committee believes that a comprehensive approach should be taken to coordinate and expand workforce development efforts in the State to meet the current and future needs of both the public and private sectors. These efforts will require additional staff to address and facilitate workforce development that utilizes resources in and meets the needs of the public and private sectors.

Accordingly, your Committee has amended this measure by:

- (1) Changing the composition of the Education Workforce Working Group;
- (2) Replacing the reference to "individualized student learning plans" with "personalized student learning plans";
- (3) Deleting the requirement that the UH create a five-year plan on educational and workforce needs;
- (4) Requiring the UH to report to the Legislature on workforce development programs and plans for addressing current and future workforce demands, which shall include but not be limited to the following:
 - (A) Current workforce development programs of the University of Hawaii community college system, detailing how these programs are structured to meet current and future workforce needs within the State;

- (B) Efforts of the University of Hawaii community college system to target specific workforce area needs;
 - (C) Current priorities for addressing workforce shortage areas, including how priorities are determined; and
 - (D) Plans for improving workforce development efforts through the development of personalized student learning plans that will have a direct link to economic and workforce needs; and
- (5) Including an appropriation for two workforce development liaison positions and one support staff position to coordinate workforce development efforts between the Department of Education and departments, agencies, businesses, and organizations in the State.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1931, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1931, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 239 Education on S.B. No. 1152

The purpose of this measure is to facilitate enhanced teaching environments through the policy of establishing of smaller learning communities and early childhood education learning facilities over executing school closures or consolidation.

Testimony in support of this measure was submitted by the Office of School Redesign of the University of Hawaii at Manoa, Good Beginnings Alliance, and the Hawai'i Educational Policy Center. Comments on the measure were submitted by the Department of Education and the Land Use Research Foundation of Hawaii.

Your Committee finds that the proper utilization of schools and school facilities is necessary to ensure that adequate learning environments and facilities are provided to students within the State. Given the current budgetary restraints, the Department of Education must explore innovative solutions to difficult problems, including alternatives in lieu of school closures or school consolidation. Your Committee further finds that smaller learning communities provide great benefits to teachers, students, and parents, including allowing teachers to establish more personalized relationships with students, which in turn fosters increased academic success. The establishment of smaller learning communities as an alternative to school closure or consolidation is a positive policy that can allow existing schools and school facilities to be efficiently and effectively utilized.

However, your Committee understands that concerns exist as to adopting a strict policy of establishing smaller learning environments over school closures. Therefore, your Committee determines that the institution of specific criteria for the smaller schools or schools-within-schools to satisfy for the establishment of a smaller learning community will help to assure that the smaller learning communities will provide a successful approach to high student achievement.

This measure also adopts the policy that the sale of public school land that is not being utilized should not be sold unless the land is without any potential for being used for educational purposes. This will ensure that redevelopment or alternative options will be considered and can be facilitated before public school lands are returned to the Department of Land and Natural Resources. In line with the foregoing philosophy, the measure also requires the Department of Education to identify unused public school facilities that may be used for early childhood education programs before considering school closures or consolidation.

Accordingly, your Committee has amended this measure by:

- (1) Removing from the purpose section, language relating to project-based learning;
- (2) Establishing criteria for the creation or maintenance of smaller learning communities, including requiring smaller schools or schools-within-schools to:
 - (A) Select and operate under a school specialty status, including magnet, academy, or other specialty;
 - (B) Develop personalized plans for each student; and
 - (C) Create and maintain portfolios for each student.
- (3) Requiring funds derived from shared facilities usage by smaller schools or schools-within-schools in a smaller learning community to be used to augment funds allocated according to the weighted student formula;
- (4) Clarifying that each school district is required to expand its current use of e-learning; and
- (5) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1152, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1152, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Taniguchi).

SCRep. 240 Education on S.B. No. 767

The purpose of this measure is to appropriate funds to cover the costs of public high school students participating in high school graduation ceremonies.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association.

Your Committee finds that although high school graduation is an auspicious and momentous event for students and their families, the high costs associated with participating in not only graduation ceremonies but also other graduation-related activities can deter participation. Your Committee further finds that high school graduation signifies an important achievement and is a memorable time for many students, particularly those who do not continue to pursue post-secondary education. Your Committee believes that assistance should be provided to public high school seniors to participate in graduation ceremonies or other graduation-related activities that they would otherwise be unable to participate in due to financial issues.

Your Committee heard a related measure, Senate Bill No. 833, which provides funding for Project Graduation events throughout the State. Your Committee understands that the graduation ceremonies and other related activities planned, such as Project Graduation events, can vary significantly in degree and expense. In the interest of fairness, your Committee believes that it is appropriate to provide an equal amount of funds for each graduating high school senior that can be used for any and all graduation activities, regardless of the actual expense of the graduation activities planned for any school.

Accordingly, your Committee has amended this measure by:

- (1) Changing the language throughout the measure to provide funds to assist public high school seniors in covering costs associated with high school graduations and related activities; and
- (2) Specifying that the amounts provided to schools shall be calculated based on the total number of high school seniors estimated to be graduating that school year on a per student basis.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 767, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 767, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 241 Education on S.B. No. 692

The purpose of this measure is to appropriate funds to the University of Hawaii for distance training in public health.

Your Committee received testimony in support of this measure from the John A. Burns School of Medicine of the University of Hawaii.

Your Committee has amended this measure to clarify that the appropriation is for the public health distance training program of the Department of Public Health Sciences and Epidemiology.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 692, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 692, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 242 Education on S.B. No. 1177

The purpose of this measure is to provide funds for the establishment of a Global Youth Center in Hawaii to provide youth from around the world the opportunity to discuss and be educated on major global issues.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawaii, Parents and Children Together, the East-West Center, the Hawaii-based All Believers Network, the United Nations Association, McCandless International, the International Student/Young Pugwash, the Pugwash Conferences on Science and World Affairs, and twelve individuals.

Your Committee finds that the world in which we live is increasingly developing into a global community. Today's issues span countries and cultures and require global thinking that addresses the needs and concerns of a multitude of diverse political, religious, economic, and socioeconomic views. Your Committee further finds that to achieve world peace, sustainability, and productivity for future generations, collaborative efforts must be made now to educate and prepare the youth of the world. In response to the Millennium Youth People's Congress, held in Hawaii in 1999, the Legislature adopted House Concurrent Resolution No. 151, H.D. 1 (2005), which recognized the need for a Global Youth Center to provide a forum for youth to be educated on and address major global issues and further recognized the role that Hawaii should play in establishing such a center.

Your Committee determines that continued support of a Global Youth Center in Hawaii will provide the framework for youth from around the world to become actively engaged in discussing issues related to and influencing the international community today, which in the long run will be of great benefit to everyone. Your Committee believes that the Global Youth Center should also endeavor to provide Hawaii students, particularly public school students, opportunities to become more involved in international dialogue and interaction.

Accordingly, your Committee has amended this measure by:

- (1) Including language that the Global Youth Center should ensure that Hawaii students, particularly public school students, are provided with opportunities to participate in programs and activities to increase awareness of global issues and to address these issues through a variety of activities including meetings and forums;
- (2) Specifying that funds appropriated should be expended by the East-West Center through the University of Hawaii; and
- (3) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1177, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1177, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Hee, Taniguchi, Gabbard).

SCRep. 243 Education on S.B. No. 681

The purpose of this measure is to appropriate funds to programs at the University of Hawaii that provide support to individuals from underserved or disadvantaged populations in pursuit of post-secondary education.

Testimony in support of this measure was submitted by the University of Hawaii, the Asian American Network for Cancer Awareness, Research and Training, the Filipino Coalition for Solidarity, the Oahu Filipino Community Council, the United Filipino Community Council, and twenty-three individuals.

Your Committee finds that with the multitude of disciplines and degrees offered by the University of Hawaii, certain ethnic and low-income groups are often underrepresented in undergraduate, graduate, and professional degree programs. Representation is particularly low in the fields of science, technology, engineering, and mathematics. The Graduate Professional Access Program and the Health Careers Opportunity Program at the University of Hawaii provide pipelines to higher education for disadvantaged students and students from underrepresented populations and support services to ensure successful graduation and employment rates. Continued funding of these programs will support an increased number of qualified faculty and professionals in the workforce, particularly from disadvantaged and underrepresented communities in underrepresented fields.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 681, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 681, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Hee, Taniguchi, Gabbard).

SCRep. 244 Education on S.B. No. 1156

The purpose of this measure is to provide continuing funding for the B Plus Scholarship Program to encourage Hawaii residents to pursue post-secondary education.

This measure also includes additional scholarship eligibility criteria for the B Plus Scholarship Program.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawai'i System, the Workforce Development Council, GEAR UP Hawaii, the United Filipino Community Council, the Oahu Filipino Community Council, and eight individuals.

Your Committee finds that pursuant to Act 57, Session Laws of Hawaii 2005, the Legislature appropriated funds for the establishment of the B Plus Scholarship Program to promote higher learning among low-income populations through the provision of scholarships to eligible students. In 2006, the Legislature amended Act 57 to provide additional funding and to clarify financial eligibility guidelines. The B Plus Scholarship Program has enjoyed great success; and this year the University of Hawaii has awarded two hundred fifty-two B Plus Scholarships to public high school graduates entering University of Hawaii campuses. This measure provides the necessary funding to allow the program to continue, scholarships to be renewed, and new scholarships to be granted. In order to continue to provide an attractive incentive to eligible high school students, your Committee believes the eligibility criteria should be further refined and complemented.

Accordingly, your Committee has amended this measure by:

- (1) Clarifying that eligibility for the B Plus Scholarship Program requires the completion of a rigorous high school curriculum;
- (2) Specifying that priority for scholarships shall be given to a student who has pledged, via an early intervention program, to meet the requirements of the B Plus scholarship program; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1156, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1156, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 245 Education on S.B. No. 607

The purpose of this measure is to appropriate funds to expand experiential learning opportunities in the State.

Specifically, this measure appropriates funds for the research and development of a statewide web-based database of experiential learning opportunities and for a study to identify barriers to businesses or organizations voluntarily providing experiential learning opportunities.

Testimony in support of this measure was submitted by the Department of Education, the Department of Business, Economic Development, and Tourism, the University of Hawaii, the Workforce Development Council, and one individual.

Your Committee finds that the State is currently experiencing workforce shortages in various areas and fields. Increased efforts are necessary to not only recruit and retain qualified and skilled workers, but also to grow a highly skilled and knowledgeable workforce to meet the needs of the State. Your Committee further finds that experiential learning opportunities provide a manner by which businesses and organizations can benefit from additional assistance and workforce development and our students can benefit from the opportunities to learn and gain experience in various fields. Experiential learning consists of learning through actual experience, allowing students to test academic theories through real world applications. Your Committee believes that experiential learning will afford students with invaluable opportunities to relate their studies to real world experiences.

This measure seeks to expand experiential learning opportunities throughout the State by providing funding to develop a statewide web-based database of experiential learning opportunities. Additionally, this measure commissions a study to identify barriers to businesses and organizations providing experiential learning opportunities to students. Your Committee believes that these efforts will help to increase experiential learning opportunities for students and, in turn, strengthen the development of a skilled and knowledgeable workforce.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 607, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 607, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 246 Transportation and International Affairs on S.B. No. 946

The purpose of this measure is to allow a person whose driver's license has been revoked for life to reapply and be reissued a driver's license upon specified conditions and procedures.

Your Committee received testimony in support of this measure from the Office of the Public Defender, Mothers Against Drunk Driving Hawaii, the Bridge Church, Church of the Nazarene, St. Stephen's Episcopal Church, and one individual. Testimony in opposition was received from the Honolulu Police Department and the Honolulu Prosecuting Attorney. Comments were received from the Driver's License Revocation Office.

Your Committee finds that a lifetime suspension of a driver's license, though warranted when imposed, eventuates in an inequality after a driver becomes rehabilitated from substance abuse. A driver's license is an everyday necessity to commute to work and earn a living, among other ordinary daily affairs requiring transportation. After a ten-year period and if certified as not needing substance abuse treatment, a person should be deemed eligible to drive again.

Your Committee is cognizant that the Administrative Driver's License Revocation Office (ADLRO) requested funding in the current fiscal year to implement the new program under this measure. However, your Committee notes that the effective date is January 1, 2009, and suggests to the office that it seek funding in the 2008-2009 fiscal year rather than this year. In the meantime, your Committee requests that the office arrive at a figure and work with your Chair to include that amount in a 2008 measure.

The ADLRO testified that it prefers the courts to handle the restoration proceedings, but it is not adverse to handling such cases if it can be done administratively in an efficient and streamlined process. The ADLRO has concerns that its present case load would become even more overwhelming with another adjudicatory procedure. Your Committee believes that the ADLRO should handle these types of proceedings to enable eligible persons to try to regain their license without having to hire an attorney and go to court again many years later.

Accordingly, on the recommendation of ADLRO, your Committee has amended this measure to enact a new subpart in the administrative revocation process to clearly separate the two very different functions of the ADLRO, that of revocation and of restoration.

The intent of this measure is to provide fairness and equity in the driver's license revocation process. The law should account for rehabilitation under certain safeguards as contained in this measure. However, this measure should not be construed as forgiving the offending driver. The driver must still live with the consequences of the past. Your Committee recommends passage of this measure out of compassion for those who have paid the debt of their past indiscretions.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 946, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 946, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 247 (Joint) Transportation and International Affairs, Education and Energy and Environment on S.B. No. 983

The purpose of this Act is to make an appropriation for an energy efficiency transportation strategies study.

Your Committees received testimony in support of this measure from the Hawaii Energy Policy Forum (Forum) of the University of Hawaii at Manoa. Comments were received from the Department of Business, Economic Development, and Tourism.

Your Committees find transportation is responsible for an inordinate amount of fuel consumption, including fuel used in motor vehicles, busses, and jet planes. Your Committees further find that reducing the demand for fuel in transportation modalities would greatly reduce our dependence on oil.

Under this measure, the Hawaii Energy Policy Forum, a part of the Social Sciences Public Policy Center at the University of Hawaii at Manoa, proposes to conduct a study on energy efficient transportation strategies in conjunction with the Department of Business, Economic Development, and Tourism. In 2005, the Forum adopted a comprehensive "10 Point Action Plan" which serves as a framework for meeting the State's preferred energy and vision goals. However, no current energy efficient strategy is in place for the transportation sector.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Education and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 983 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 11. Noes, none. Excused, 5 (Hee, Ihara, Inouye, Kokubun, Tsutsui).

SCRep. 248 Transportation and International Affairs on S.B. No. 152

The purpose of this measure is to require the expenditure of at least two per cent of eligible federal moneys in the State Highway Fund to establish bike paths and bike lanes in the State's Master Bicycling Plan.

This measure also requires the Department of Transportation (DOT) to include the bicycling community in a public involvement process to plan bikeways, and requires an allocation of highway maintenance funds to ensure the safety of bikeways.

Your Committee received testimony in support of this measure from the City and County of Honolulu Department of Transportation Services, Hawaii Bicycling League, PATH, Sierra Club, Hawai'i Chapter, Maui Bicycle Alliance, AARP Hawaii, and fourteen individuals including the oral support of a State Representative. Testimony in opposition was received from the Department of Transportation.

Your Committee finds that bikeways are urgently needed to encourage commuters, particularly on Oahu, to take advantage of the opportunities Hawaii's ideal weather and gentle terrain provide for comfortable and healthy traveling via bicycle between home and workplace.

The intent of this measure is to increase the number of bike paths and bike lanes by ensuring a minimum allocation of funds for bicycling projects, as well as to increase the safety of bicyclers by including them in the planning stages of bikeways and increasing the maintenance of bikeways.

Your Committee has amended this measure to accommodate the desires of the Hawaii Bicycling League, Department of Transportation, and the State Representative by:

- (1) Clarifying that State Highway Fund moneys, whether state funds or federal funds, shall be expended on bikeways on new or existing highways, roads, and streets, whenever practicable, in the process of design and planning;
- (2) Requiring at least two per cent of eligible federal funds, and in addition, other state highway fund moneys as available, to be expended on establishing bike paths and to install signage and safety devices along bicycle lanes and bicycle routes, upon consultation with the bicycling community; and
- (3) Requiring that mass transit systems plans shall include safe, dedicated bikeways, bike lanes, and bike paths and may include a requirement that bicycle racks be installed and utilized on mass transportation vehicles.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 152, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 152, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 249 Transportation and International Affairs on S.B. No. 774

The purpose of this measure is to create a senior vanpool Hawaii program as a two-year pilot project.

Your Committee received testimony in support of this measure from the Department of Transportation, AARP Hawaii, and two individuals.

Your Committee finds that senior citizens are most in need of ordinary daily transportation. Currently, public transportation is limited to the public bus or the handi-van service. Yet, many seniors may prefer not to ride the bus or may not otherwise qualify for the handi-van. It is this gap group of the population who would benefit from a vanpool type arrangement with volunteer drivers. Such a program would be patterned after the vanpool arrangement for commute-to-work. For example, a senior citizen could utilize a vanpool for transportation to locations within the community, including food establishments, adult day care, shopping centers, markets, and recreational centers. The proposed senior vanpool Hawaii program is similar to the City and County of Honolulu's Handi-Van service.

The intent of this measure is to increase the quality of life for senior citizens who are not handicapped and yet have difficulty commuting on their own. This is the gap group that is underserved by public transportation.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 774 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 250 Transportation and International Affairs on S.B. No. 1191

The purpose of this measure is to require the Department of Transportation to conduct a pilot study to identify intersections where the time to cross the intersection is insufficient for elderly pedestrians, and to appropriate funds for the implementation of the pilot study.

Your Committee received testimony in support of this measure from the Department of Transportation (DOT), the City and County of Honolulu Department of Transportation Services (DTS), Kokua Council, Hawaii Bicycling League, and AARP Hawaii.

Your Committee finds that Hawaii's elderly pedestrians should not have to rush to cross the street. The length of a flashing indication should be sufficient for elderly pedestrians to cross the street safely. A 2004 Elderly Pedestrian Integration Report prepared by SMS Research & Marketing Services, Inc. for the DOT indicated that there are approximately five hundred sixty pedestrian injuries in Hawaii each year, and that an average of twenty-eight pedestrians die each year after being struck by a car. Elderly pedestrians, age sixty-five and older, constituted the highest number of pedestrian fatalities when compared to all other age groups in Hawaii.

The intent of this measure is to protect pedestrians of all ages while they are in a crosswalk. Adjusting the timing of crosswalk signal indicators is the first step in this direction.

Your Committee has amended this measure on the recommendation of the DOT by:

- (1) Adding to the study the impacts on current traffic volumes when pedestrian walk times are lengthened;
- (2) Allowing the DOT to involve the DTS, since city streets are quite likely to be affected;
- (3) Deleting reference to AARP Hawaii data in the interests of conducting an independent study;
- (4) Allowing the DOT to contract out the study to a consultant;
- (5) Delaying the final reporting requirement by one year and requiring that an interim report be submitted to the Legislature prior to the 2008 Regular Session; and
- (6) Inserting an appropriation of \$1,000,000 for the study.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1191, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1191, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 3 (Inouye, Taniguchi, Gabbard).

SCRep. 251 Energy and Environment on S.B. No. 839

The purpose of this measure is to ensure public safety by requiring that individuals who use restricted pesticides are properly licensed.

The measure accomplishes this purpose by defining structural pest control applicator as a person who holds a license pursuant to chapter 460J, Hawaii Revised Statutes, and by making it illegal for a dealer to sell restricted use pesticides to structural pest control applicators whose license is more than one hundred twenty days delinquent.

Your Committee received testimony in support of this measure from the Hawaii Pest Control Association. The Department of Agriculture submitted comments on this measure.

Your Committee finds that formerly licensed pest control operators have continued to use restricted chemicals without proper licenses. Your Committee further finds that it is important to protect the public's health and safety, that individuals who use these often lethal chemicals are appropriately licensed to ensure the proper usage and application of these chemicals.

Your Committee amended this measure by deleting the reference to structural pesticide applicators. Your Committee has further amended the measure by clarifying that the pesticide applicator is also responsible for the unlicensed use of restricted use pesticides by requiring that a pesticide applicator be licensed pursuant to chapter 460J, Hawaii Revised Statutes, or under the supervision of persons certified in commercial pest control, unless the certified applicator or persons under their supervision are directly employed or supervised by a person licensed under chapter 460J, Hawaii Revised Statutes, and whose license is valid within one hundred twenty days of the purchase date.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 839, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 839, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Ihara, Kokubun).

SCRep. 252 Energy and Environment on S.B. No. 1364

The purpose of this measure is to facilitate environmental cleanups.

Specifically, this measure repeals the sunset date on the Hawaii Brownfields Cleanup Revolving Loan Fund.

Testimony in support of this measure was submitted by the Office of Planning and the Department of Health.

Your Committee finds that this measure will enable the State to continue to offer low-cost loans to innocent landowners and prospective purchasers of contaminated properties to cleanup of contaminated properties. Repealing the sunset date will also ensure the continuation of federal funding for brownfield cleanup.

This measure was amended to take effect on June 29, 2007, rather than upon approval, to ensure the amendment takes place before the provisions are repealed on June 30, 2007.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1364, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1364, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 253 (Majority) Energy and Environment on S.B. No. 1000

The purpose of this measure is to encourage community participation in the State's recycling program.

Specifically, this measure requires redemption centers to compute the refund value per container at the request of the redeemer for up to two hundred containers.

Testimony in opposition to this measure was submitted by the Department of Health, Reynolds Recycling, and RRR Recycling Services Hawaii.

Your Committee finds that this measure will reduce the underpayment that results when refunds are based on weight rather than by individual container unit, thereby providing a larger incentive for individuals and organizations to recycle.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1000 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Trimble). Excused, 1 (Kokubun).

SCRep. 254 Energy and Environment on S.B. No. 1375

The purpose of this measure is to authorize the Public Utilities Commission to consider the need for increased renewable energy use in exercising its authorities and duties under chapter 269, Hawaii Revised Statutes.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism; Public Utilities Commission; Division of Consumer Advocacy, Department of Commerce and Consumer Affairs; Hawaiian Electric Company, Inc.; Sierra Club, Hawai'i Chapter; Hawaii Solar Energy Association; Hawaii Renewable Energy Alliance; Haiku Design and Analysis; and Honolulu Seawater Air Conditioning, LLC.

Your Committee finds that intensifying worldwide competition for oil heightens the risk to the State's economy due to the continuing price volatility, and persistent likelihood of sudden, severe crude oil price spikes. Moreover, Hawaii is increasingly reliant on oil from the Middle East. From 1992 to 2004, Hawaii's crude oil imports from the Middle East averaged less than one per cent annually. In 2005, the total percentage was twenty-five per cent.

It is the intent of your Committee to support the increased development of renewable energy resources and reduce the State's reliance on imported oil by requiring, rather than permitting, the Public Utilities Commission to consider the need for increased renewable energy.

Your Committee has amended this measure to make the Public Utilities Commission consideration of the need for increased renewable energy mandatory and by making a nonsubstantive amendment for the purpose of style.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1375, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1375, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 255 Energy and Environment on S.B. No. 1627

The purpose of this measure is to appropriate funds for grants-in-aid to the counties to eradicate and control coqui frogs.

Testimony in support of this measure was received from the Department of Agriculture; Department of Land and Natural Resources; the Chair and two members of the Maui County Council; Maui Invasive Species Committee; Maui Outdoor Circle; The Nature Conservancy; Hawaii Audubon Society; Hawaii Association of Realtors; The Ritz-Carlton, Kapalua; Hula Girl Garden and Gallery; and five individuals.

Your Committee finds that despite coordinated efforts by federal, state, and county government, as well as the private sector, there are coqui frog populations on all the main Hawaiian islands. Additional funding at the county level, as proposed in this measure, would support the comprehensive statewide effort outlined in "Hawaii's Coqui Frog Management, Research, and Education Plan", developed by key stakeholders in 2006.

It is the intent of your Committee to support the ongoing efforts to control the coqui frog population, and to keep this invasive species from spreading further throughout the islands.

Your Committee has amended this measure to appropriate \$300,000 to be expended by the County of Kauai, as specified in S.B. No. 719. Your Committee notes that the \$2,000,000 appropriation contained in this measure, and to be expended by the County of Hawaii, is identical to the appropriation in S.B. No. 1595. Your Committee has left the appropriated amounts unspecified for the County of Maui and the City and County of Honolulu, awaiting further information from the respective counties.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1627, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1627, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 256 Energy and Environment on S.B. No. 1718

The purpose of this measure is to support the development of renewable and efficient energy systems in the State.

Specifically, this measure authorizes the Department of Budget and Finance to issue special purpose revenue bonds for the construction of a biodiesel refinery on Maui with primary production volumes designated as fuel for electrical generation in which BlueEarth Maui Biofuels, LLC is involved.

Testimony in support of this measure was submitted by the Department of Business, Economic Development and Tourism, Hawaiian Electric Company, Maui Electric Company, Hawaii Electric Light Company, and BlueEarth Maui Biodiesel. The Department of Budget and Finance submitted comments.

Your Committee finds this measure will help meet the goals of the State's Renewable Portfolio Standard and Alternate Fuels Standard. Your Committee further finds that by increasing the availability of locally grown biofuels, the state will not only increase its energy security and mitigate greenhouse gases, but will encourage a viable, local agricultural industry. It will also result in the reduction of imported livestock feed since the by-products of biodiesel are an excellent alternative.

Your Committee finds that the issuance of special purpose revenue bonds under this measure is in the public interest and for the public health, safety, and general welfare.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1718 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 257 Energy and Environment on S.B. No. 1720

The purpose of this measure is to reduce industrial waste in our landfills.

Specifically, this measure authorizes the Department of Budget and Finance to issue up to \$100,000,000 in special purpose revenue bonds for the purpose of assisting Jacoby Development, Inc., for acquisition of lands and the planning, designing, constructing, and equipping of a plasma municipal solid waste processing system on the island of Oahu.

Testimony in support of this measure was submitted by Geoplasma LLC, a subsidiary of Jacoby Development, Inc., Nanakuli Hawaiian Homestead Community Association, Wai'anae Hawaiian Homestead Community Association, Waianae Kai Homestead Association, and two individuals.

Your Committee finds that the island of Oahu is facing critical problems regarding municipal waste disposal from industrial sources.

Your Committee further finds that, given our limited space, the State must embrace cutting edge technology that can not only address our waste problems in the future, but also improve our existing environmental issues. Authorizing special purpose revenue bonds for this purpose will allow us to do so while not incurring any expense to the State.

Your Committee further finds that the Jacoby Development, Inc. Plasma Municipal Solid Waste Processing System has the strong support of the Native Hawaiian Homestead Associations.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1720 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 258 Energy and Environment on S.B. No. 1947

The purpose of this measure is to make an emergency appropriation for the State's Deposit Beverage Container Program.

Your Committee received testimony in support of this measure from the Department of Health.

Your Committee finds that this measure provides sufficient moneys to meet the increased expenses of the Deposit Beverage Container Program by making an emergency appropriation. Increased container numbers plus the current redemption rate of about sixty-eight per cent results in more deposits to refund and more redemption center handling fees. Refunds and handling fees may exceed \$52,000,000. There are sufficient moneys in the Deposit Beverage Container Special Fund to support the proposed appropriation increase.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1947 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 259 (Joint) Energy and Environment and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 890

The purpose of this measure is to reduce the State's dependency on fossil fuels.

Specifically, this measure appropriates \$450,000, for fiscal year 2007-2008, for the University of Hawaii Center for Conservation Research and Training to develop comprehensive agricultural management practices to facilitate the sustainable production of crops through the long-term enhancement of soil quality using ecologically-responsible means.

Testimony in support of this measure was submitted by the University of Hawai'i System, Garden Island Resource Conservation and Development, Inc., Hawaiian Mahogany, Inc., Joule Junction, LLC, Kauai County Farm Bureau, and two individuals.

Your Committees find that this measure provides for a critical sustainable agriculture strategies and education program that would allow Hawaii to increase both our food and energy production while reducing atmospheric carbon dioxide levels and increasing state employment. This measure will support local farmers and provide for a potential alternative crop, thereby reducing Hawaii's dependence on off island food and energy providers.

Your Committees find these are important goals for the public interest and that the appropriation made by this measure is a good use of state resources.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 890 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Fukunaga).

SCRep. 260 Education on S.B. No. 605

The purpose of this measure is to accelerate the process by which the State may infuse qualified teachers into Hawaii's educational system.

Specifically, the measure authorizes the Hawaii Teacher Standards Board to issue Hawaii teaching licenses to teachers from other states whose licensing standards are equivalent to or higher than Hawaii's.

Testimony in support of this measure was submitted by the Department of Education. Testimony in opposition to this measure was submitted by the University of Hawaii, the Hawaii Teacher Standards Board, the Hawaii State Teachers Association, and one individual.

Your Committee finds that Hawaii's schools and their students can benefit greatly from the licensure of qualified teachers from outside of the State. The ability to license qualified teachers from outside of Hawaii is particularly important during times of teacher shortages. Under existing law, the Hawaii Teacher Standards Board is required to pursue full teacher license reciprocity with the mid-Atlantic states, as well as with California, Colorado, Illinois, Michigan, New York, Oregon, and Washington. This measure, as received by your Committee, removes the requirement to pursue reciprocity and instead requires the automatic licensure of teachers with licenses issued by the aforementioned list of seven states and any other state whose licensing standards are not lower than Hawaii's.

Your Committee recognizes the concerns presented on the difficulty the board would have in defining and implementing a standard to allow the issuance of a Hawaii teaching license to a teacher who is licensed by a state other than the seven listed states without any criteria to determine whether that state's standard is lower than Hawaii's.

Accordingly, your Committee has amended this measure by:

- (1) Adding language to clarify the need for and intent of the measure;
- (2) Removing the requirement that the Hawaii Teacher Standards Board issue a Hawaii teaching license to a teacher with a license issued by any state whose licensing standards are not lower than Hawaii's;
- (3) Requiring the Hawaii Teacher Standards Board to pursue full teacher license reciprocity with all other states; and
- (4) Making a technical, nonsubstantive amendment for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 605, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 605, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 261 Judiciary and Labor on S.B. No. 155

The purpose of this bill is to expand public internet access of convicted sex offenders.

Currently, public access to registration information of sex offenders is provided through on-site public access and internet public access. The on-site public access is at the Hawaii Criminal Justice Data Center and at designated police stations in each county. The internet public access is only provided for the most serious offenses and does not disclose all registered sex offenders. This bill will provide for expanded public internet access of all registered sex offenders.

Your Committee heard testimony from several concerned citizens and the Executive Director of Hawaii Family Forum in support of expanding the list of sex offenders to be included on the internet. Your Committee heard testimony from the Attorney General and the Public Defender against the expansion of sex offender information on the internet. However your Committee found that the public interest in expanding the public access on the internet was more compelling in safeguarding public safety. It is important that the public has ready access to the sex offender registration information.

Act 230, Session Laws of Hawaii 2006, enacted two new sex offenses as class A felonies. These two felonies were not included in the registration statute. One of the new class A felony is §707-730(1)(d) which prohibits a person from knowingly subjecting to sexual penetration another person who is mentally defective. The other new class A felony is §707-730(1)(e) which prohibits a person from knowingly subjecting to sexual penetration another person who is mentally incapacitated or physically helpless as a result of the influence of a substance that the actor knowingly caused to be administered to the other person without the other person's consent. The bill was amended to include the two class A felonies in the definition of "aggravated sexual offenses" and "sexual offenses" under Chapter 846E, Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 155, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 155, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 262 Judiciary and Labor on S.B. No. 959

The purpose of this measure is to provide that bench warrants, with the exception of grand jury bench warrants in class A and B felony cases, shall expire five years after issuance and for extension of the expiration period upon a showing of good cause.

There exist a backlog of approximately 74,000 bench warrants that have not been served. Of the total amount, approximately 51,000 warrants are traffic warrants and approximately 20,000 are misdemeanor warrants. This amounts to 71,000 or 96% of the unserved warrants.

The 2006 Legislature mandated the creation of a task force of the responsible agencies involved with the warrants. Beside a request for more money to hire more personnel, the task force identified that the agencies needed to refocus its priorities to serving the warrants if it expects to diminish the backlog. The task force also identified that there is a need to develop a centralized database system that will be more efficient and useful for the affected agencies. Most of the problems identified can be corrected administratively by the agencies. Your Committee is hopeful that this bill will prompt the agencies to respond more quickly to the backlog if it is a priority. If not, then this bill will eliminate the warrants that are not a priority for the agencies.

Your Committee received testimonies in support from the Hawaii Paroling Authority and from the Public Defender's Office. Your Committee heard testimonies from the prosecuting attorneys offices in Honolulu and Maui and from the Attorney General's Office in opposition to the bill. The Judiciary took no position on the bill.

Your Committee amended the bill to resolve the concerns articulated by the Honolulu Prosecutor's Office, the Hawaii Paroling Authority, and the Attorney General's Office. Your Committee provided for the exemption of all felony cases, domestic violence cases, and parole warrants from the expiration mandate. Your Committee further amended the bill to refer to warrants generally so that there is no semantic dispute with bench warrants, arrest warrants, and retake warrants.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 959, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 959, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 263 Judiciary and Labor on S.B. No. 945

The purpose of this measure is to require state justices and judges to file public financial interest disclosure statements with the Hawaii State Ethics Commission.

Currently, state justices and judges are required to file annual financial disclosure statements on a form approved by the Hawaii Supreme Court. Rule 15 of the Rules of the Supreme Court establishes financial disclosure requirements nearly identical to those established for enumerated state officials under HRS Chapter 84. Presently, public access is gained by going to the Supreme Court Clerk's office. This bill does not change that practice but merely require that financial disclosures be filed with the State Ethics Commission where the information is more accessible to the public. Simply filing a copy of the same documents at another agency will not unduly burden the justices and judges. This will ensure that the State Ethics Commission is the central repository for all state financial disclosures.

Your Committee heard testimony for Daniel Mollway of the State Ethics Commission in support of the bill. Your Committee also heard testimony from Susan Pang-Gochros, representing the Judiciary, in opposition to the bill. Your Committee finds that this bill does not violate any constitutional separation of powers since Article 14 of the Hawaii State Constitution provides that the Legislature shall adopt a code of ethics

which shall apply to appointed officers and employees of the State which, by definition, includes the justices and judges. It should also be pointed out that Congress enacted a very detailed financial disclosure law for federal judges.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 945 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 264 Economic Development and Taxation on S.B. No. 711

The purpose of this measure is to establish a ten-year statute of limitations on tax collections, and to clarify that the three-year statute of limitations on tax assessments for the general excise tax, use tax, and other period taxes begins at the filing of each periodic return.

Testimony in support of this measure was received from The Chamber of Commerce of Hawaii; Hawaii Society of Certified Public Accountants; Volunteer Legal Services Hawai'i; Chun, Kerr, Dodd, Beaman & Wong; Horwath Kam & Company; and three individuals. The Department of Taxation (Department) opposed the measure. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that under existing law, Hawaii has no statute of limitations on the collection of delinquent taxes, unlike the federal government, which has a ten-year statute of limitations. Your Committee has heard the concerns of the Department, that the federal government is far more adequately funded and staffed to collect delinquent taxes within the ten-year period. However, members noted that the Department has also recently announced record levels of delinquent tax collections, and has requested substantially increased funding in the current budget cycle for additional staff and technological resources to be used in part for collection of past due taxes.

With regard to the three-year statute of limitations on assessment of periodic returns, your Committee finds that the existing law is confusing, and leaves law abiding taxpayers vulnerable to misinterpretation of their responsibilities in filing. Your Committee members believe clarification would be in the best interests of both taxpayers and the State in its efforts to administer Hawaii tax law in a judicious and efficient manner.

Your Committee received a revenue impact statement from the Department that the proposal could cost \$50,000,000 annually in lost tax revenues.

In its methodology, the Department states that the effect of the ten-year statute of limitations is uncertain, as it could speed up the Department of Taxation collections on accounts that are long overdue. According to the Collections Division, in the six-month period ending December 31, 2005, the Department collected about \$4,500,000 in delinquent taxes from accounts more than ten years old. However, that amount represented less than one per cent of the total tax collections of \$4,600,000,000 in fiscal 2005. According to estimates from the Department's Audit Division, the change in the statute of limitations for periodic returns for the general excise tax might have cost \$40,000,000 in lost revenues in fiscal year 2006.

Your Committee has considered the concerns of the Department, but believes that these projections are based on optimal collections of delinquent taxes, as opposed to actual collections, as stated above. In addition, your Committee notes that the revenue loss does not fall in any one year, but would be spread over a number of years.

Further, your Committee believes that the testimony by the Department is somewhat overstated. The Department's statement that the Internal Revenue Service (IRS) is better staffed and funded, fails to note that the computers used by IRS are substantially out of date compared to the Department's computer system. The Department has all the tools that the IRS has to collect before the three or ten year limitation period; those include levy, attachment, and execution. In addition, the Department states that where there are large tax liabilities, it may take decades for a taxpayer to accumulate sufficient wealth to be able to pay their tax bill. If the Department is operating correctly, the taxpayer should be on a payment plan and already paying off their tax liability. These plans generally require a down payment and only run, at the most, for a few years. Your Committee notes that the Department also keeps aging records and thus would know when the three or ten year period is about to be triggered.

After careful review, your Committee finds that the provisions in this measure will provide needed conformity with federal tax law, as well as ensure clarity for Hawaii taxpayers in meeting their tax obligations in a timely manner.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 711 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 265 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 663

The purpose of this measure is to protect near shore and reef fisheries by authorizing the Department of Land and Natural Resources to conduct administrative inspections of bags and containers used to transport aquatic life.

Specifically, this measure amends section 187A-15, Hawaii Revised Statutes, by:

- (1) Authorizing Division of Conservation and Resources Enforcement officers to conduct administrative inspections of bags or containers that could be used to transport aquatic life;
- (2) Repealing the probable cause requirement to conduct examinations or searches of bags or containers that could be used to transport aquatic life; and
- (3) Directing the Department of Land and Natural Resources to create an administrative inspection scheme to enforce its aquatic rules.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources; the Nature Conservancy; the Ocean Law and Policy Institute of the Pacific Forum CSIS; the Sierra Club, Hawaii Chapter; the Hawaii Audubon Society; and three private individuals.

Hawaiian commercial and recreational marine life stocks are depleted, over-utilized, and in danger of irretrievable exhaustion. Although management tools have been enacted, fishery assessment depends on the voluntary cooperation of those who harvest these resources. While most

fishers are willingly cooperative, increasing stock scarcity has led to conspicuous instances of obstruction of the efforts by Division of Conservation and Resources Enforcement officers to inspect catch.

Your Committee finds that the current probable cause provision under section 187A-15, Hawaii Revised Statutes, does provide a degree of constitutional protection while at the same instance, may unduly hinder enforcement officers by preventing them from inspecting containers that may be used to transport fish and other aquatic life. Thus, this greatly weakens the effect of fisheries management measures, such as bag and size limits. While your Committee recognizes the seriousness of repealing the probable cause requirement from section 187A-15, Hawaii Revised Statutes, establishing an administrative inspection scheme will enable Division of Conservation and Resources Enforcement officers to better inspect and enforce the State's fishing laws.

Your Committee has amended this measure by:

- (1) Adopting language suggested by the Department of Land and Natural Resources and the Ocean Law and Policy Institute of the Pacific Forum CSIS by:
 - (A) Adding fishing registrations along with fishing licenses and permits to conform better with the new federal fisheries regulations that mandate the registration of recreational saltwater anglers;
 - (B) Adding that section 187A-13, Hawaii Revised Statutes, relating to petty misdemeanor penalties will not apply to violations of section 187A-15;
 - (C) Adding provisions that require owners of fishing licenses, permits, or registrations to physically possess their paperwork when engaged in fishing activities, show their paperwork and allow for an inspection when asked by a Division of Conservation and Resources Enforcement officer, and agree to comply with all terms, conditions, laws, rules, and regulations applicable to the fishing license, permit, or registration;
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

Your Committee recognizes that repealing the probable cause requirement under section 187A-15, Hawaii Revised Statutes, may pose a constitutional issue. Your Committee believes that this issue merits further discussion by the Committee on Judiciary and Labor.

Your Committee believes that this measure, as amended, will provide a valuable tool for Division of Conservation and Resources Enforcement officers who are charged with enforcing the State's natural resource laws, and fulfills the intent of this measure, which is to protect near shore and reef fisheries.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 663, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 663, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Hee).

SCRep. 266 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 659

The purpose of this measure is to support efforts to achieve a more efficient means of consolidating, processing, distributing, and marketing of agricultural products from the neighbor islands by establishing a terminal market pilot program on the island of Hawaii.

Specifically, this measure:

- (1) Appropriates \$200,000 for the planning of a terminal market pilot program on the island of Hawaii;
- (2) Appropriates \$50,000 for the Department of Agriculture to hire a consultant to assist in the planning of terminal markets;
- (3) Requires the consultant to coordinate with the Department of Agriculture to form a committee relating to terminal markets; and
- (4) Authorizes \$3,000,000 in general obligation bonds to finance the construction of and equipment for a terminal market and vacuum cooling plant for the island of Hawaii.

Testimony in support of this measure was submitted by the Department of Agriculture and the Hawaii Farm Bureau Federation.

Currently, Hawaii farmers are hindered from selling their agricultural products due to their inability to consolidate, process, and ship marketable quantities of food. Inter-island shipping costs can be economically unfeasible for farmers and can inhibit them from expanding their agricultural production. Your Committee finds that establishing a terminal market pilot program will aid local agricultural producers, regardless of the size of their agricultural operations, to meet the fresh food requirements of the military sector, the public, and for export to the mainland.

Your Committee has amended this measure by making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 659, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 659, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Fukunaga, Tokuda).

SCRep. 267 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 662

The purpose of this measure is to establish incentives and protections for important agricultural lands pursuant to chapter 205, part III, Hawaii Revised Statutes, by authorizing the Director of Finance to guaranty loans relating to agricultural projects on important agricultural lands.

Testimony in support of this measure was submitted by the Department of Agriculture, the Hawaii Farm Bureau Federation, the Maui County Farm Bureau, and the Hawaii Agriculture Research Center.

The Legislature enacted Act 183, Session Laws of Hawaii 2005, to establish standards, criteria, and mechanisms to identify important agricultural lands and implement the intent and purpose of Article XI, section 3, of the Hawaii State Constitution. However, incentive and protection programs must be established before the Land Use Commission can begin to designate lands as important agricultural lands.

Financing is a critical component of the long-term viability of farmers to sustain their agricultural businesses. Your Committee finds that establishing a guaranty loan program for agricultural projects on designated important agricultural lands will provide better security for agricultural producers to meet their financial requirements and sustain their businesses. Although agriculture loans are often viewed as high risk ventures, your Committee believes that authorizing the Director of Finance to guaranty agriculture loans for projects on designated important agricultural lands will provide commercial lenders the assurance that their loans will be backed by the State.

Your Committee was concerned with the absence of testimony from the Department of Budget and Finance as this measure applies to the Director of Finance. Specifically, your Committee had concerns with the risk and liability this measure may impose on the State and whether a principle amount loan ceiling may be necessary for better implementation of this measure. Thus, your Committee requested that the Hawaii Farm Bureau Federation consult with the Department of Budget and Finance for its input and any recommendations relating to this measure. The Hawaii Farm Bureau Federation was able to consult with the Department of Budget and Finance and provided your Committee with additional information.

Accordingly, your Committee has amended this measure by:

- (1) Deleting language that allows the loan guaranty to be up to one hundred per cent of the principle amount of the loan and replacing it with language that allows the loan guaranty to be up to eighty-five per cent of the principle amount of the loan to encourage private commercial lenders to be more diligent in reviewing and approving agriculture loans;
- (2) Adding language that authorizes the Director of Finance to guaranty a qualified agriculture loan with a principle amount of up to \$2,500,000; and
- (3) Making technical, nonsubstantive amendments for clarity and style.

Your Committee believes that establishing a guaranty loan program will provide an incentive mechanism that will encourage farmers and landowners to designate their lands as important agricultural lands under chapter 205, part III, Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 662, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 662, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 268 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 837

The purpose of this measure is to promote Hawaii's diversified agricultural industry and protect its agricultural lands for long term agricultural activities by authorizing the Agribusiness Development Corporation to purchase and lease privately owned agricultural lands in Kunia.

Specifically, this measure:

- (1) Authorizes the Agribusiness Development Corporation to issue revenue bonds to purchase privately owned agricultural lands in Kunia;
- (2) Appropriates funds to the Agribusiness Development Corporation for the purchase of agricultural lands in Kunia that are owned by private entities;
- (3) Enables the Agribusiness Development Corporation to contract with banks for lease management services; and
- (4) Allows the Agribusiness Development Corporation to lease the Kunia agricultural lands under its control for up to fifty-five years.

Testimony in support of this measure was submitted by the Agribusiness Development Corporation; the Department of Planning and Permitting, City and County of Honolulu; the Hawaii Crop Improvement Association; Hawaii Farm Bureau Federation; Maui County Farm Bureau; the Hawaii Agriculture Research Center; and one individual. Testimony in opposition to this measure was submitted by the International Longshore and Warehouse Union (ILWU) Local 142.

Protecting agricultural lands is fundamental to Hawaii's future agricultural industry and sustainable food supply. Growing food locally improves Hawaii's food security, and conserves and protects green, open spaces. The agricultural lands in Kunia are one of the best and most productive agricultural lands in the State, but it is also located in an area that has a great demand for residential and urban development.

Your Committee finds that enabling the Agribusiness Development Corporation to purchase agricultural lands in Kunia, and then lease those lands for up to fifty-five years will ensure that these lands will remain for agricultural production. Your Committee believes that the purchase of strategic parcels of agricultural lands, such as the parcels in Kunia, will ensure that these lands will remain in agriculture in perpetuity.

Your Committee has amended this measure by:

- (1) Adopting language suggested by the Hawaii Agriculture Research Center to provide that, along with purchasing, accepting, and maintaining permanent conservation easements, the Agribusiness Development Corporation may also transfer the permanent conservation easement to a qualified land trust; and
- (2) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

Your Committee believes that this measure, as amended, fulfills the intent of this measure, which is to ensure that the agricultural lands in Kunia will remain for agricultural activities, and promote a viable and diversified agricultural industry in Hawaii.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 837, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 837, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 269 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 934

The purpose of this measure is to promote Hawaii's diversified agricultural industry and protect its agricultural lands for long term agricultural activities by authorizing the Agribusiness Development Corporation to issue revenue bonds to purchase land in Central Oahu from the Galbraith Trust.

Specifically, this measure:

- (1) Authorizes the Agribusiness Development Corporation to issue revenue bonds to purchase agricultural lands in Central Oahu and owned by the Galbraith Trust;
- (2) Appropriates funds to the Agribusiness Development Corporation for the purchase of agricultural lands in Central Oahu and owned by the Galbraith Trust;
- (3) Enables the Agribusiness Development Corporation to contract with banks for lease management services; and
- (4) Allows the Agribusiness Development Corporation to lease these agricultural lands under its control for up to fifty-five years.

Testimony in support of this measure was submitted by the College of Tropical Agriculture and Human Resources, University of Hawaii; the Agribusiness Development Corporation; the Department of Planning and Permitting, City and County of Honolulu; and the Hawaii Farm Bureau Federation. Testimony in opposition to this measure was submitted by Bank of Hawaii as Trustee of the Galbraith Trust. The Department of Budget and Finance submitted comments.

Protecting agricultural lands is fundamental to Hawaii's future agricultural industry and sustainable food supply. Growing food locally improves Hawaii's food security, and conserves and protects green, open spaces. The agricultural lands in Central Oahu owned by the Galbraith Trust are some of the best and most productive agricultural lands in the State, but it is also located in an area that has potential for residential and urban development. Bank of Hawaii, as Trustee of the Galbraith Trust indicated that dissolution of the Galbraith Estate has been initiated and hence, the sale of the Galbraith Estate holdings may soon be forthcoming.

However, your Committee finds that enabling the Agribusiness Development Corporation to purchase agricultural lands owned by the Galbraith Trust, and then lease those lands for up to fifty-five years will ensure that these lands will remain for agricultural production. Your Committee believes that the purchase of strategic parcels of agricultural lands, such as the parcels owned by the Galbraith Trust, will ensure that these lands will remain in agriculture in perpetuity, and should be pursued with haste.

Your Committee has amended this measure by making technical, nonsubstantive amendments for the purposes of consistency and style.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 934, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 934, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 2 (Fukunaga, Tokuda).

SCRep. 270 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 939

The purpose of this measure is to encourage and assist Native Hawaiian homestead owners and residents to participate in the strengthening and developing the community in which they live, by establishing a Hawaiian Home Lands Community Development Fund with revenue-sharing from commercial development projects to be used for community and cultural programming in Hawaiian homestead communities.

Testimony in support of this measure was submitted by the State Council of Hawaiian Homestead Associations, the Council for Native Hawaiian Advancement, the Wai'anae Valley Homestead Community Association, the Wai'anae Kai Hawaiian Homestead Association, the Nanakuli Hawaiian Homestead Community Association, the Ahupua'a of Maui, and one individual. Testimony in opposition to this measure was submitted by the Department of Hawaiian Home Lands.

The intent of the Hawaiian Homes Commission Act of 1920, as amended, is to return lands to the Native Hawaiians and allow them to participate in building their own communities, which observe their culture and way of life. The growth of Hawaiian homestead communities leads to the development of skills and expertise, which are needed for self-governance and self-determination. Native Hawaiian homestead community organizations have a mission to improve the conditions of their communities, however, a majority of these associations lack the expertise and resources to implement programs and services that would improve the life conditions in the homestead communities.

Commercial development of Hawaiian Home Lands can be an important tool in the administration of the Hawaiian Home Lands Trust. Your Committee finds that setting aside a percentage of the revenues earned into a Hawaiian Home Lands Community Development Fund will provide funding for community development efforts and cultural programming. Your Committee believes that establishing a community development fund fulfills the intent of this measure, which is to encourage and assist Native Hawaiian homestead owners and residents to participate in the strengthening and development their homestead communities.

Your Committee has a concern that establishing the Hawaiian Home Lands Community Development Fund is creating a special fund under the Hawaiian Homes Commission Act of 1920, and believes that this concern merits further discussion by the Committee on Ways and Means.

Your Committee has amended this measure by adding language that declares any amendments made to the Hawaii Homes Commission Act of 1920 be severable.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 939, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 939, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Slom). Noes, none. Excused, none.

SCRep. 271 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 940

The purpose of this measure is to encourage and assist Native Hawaiian homestead beneficiaries to finance the purchase or construction of homes on Hawaiian Home Lands by amending the Hawaiian Homes Commission Act of 1920, as amended, to require the Department of Hawaiian Home Lands to consult the trust beneficiaries prior to implementing any policies and agreements that will lower the allowable loan limits for mortgage products designed for Hawaiian Home Lands Trust properties.

Testimony in support of this measure was submitted by the State Council of Hawaiian Homestead Associations, the Council for Native Hawaiian Advancement, Hawaiian Community Assets, Waianae Kai Hawaiian Homestead Association, the Wai'anae Valley Homestead Community Association, the Nanakuli Hawaiian Homestead Community Association and a private individual. Testimony in opposition to this measure was submitted by the Department of Hawaiian Home Lands.

The Department of Housing and Urban Development (HUD) administers Federal Housing Administration (FHA) loan guaranty programs to promote home ownership and increase access to capital to Americans. HUD administers the FHA 247 program, which is a loan guaranty program for Native Hawaiian beneficiaries of the Hawaiian Home Lands Trust to promote home ownership on Hawaiian Home Lands properties. The FHA 247 program allows borrowers to access their equity from the value of their homes, and requires borrowers to pay mortgage insurance fees into a reserve fund, which is used by the State to cover delinquent loans. The FHA 247 program has resulted in successful home ownerships on Hawaiian Home Lands by making loans more readily available for lower and moderate income families through its mortgage insurance program. Furthermore, the program has allowed families to access their equity through refinance options.

In 2006, the State made a policy change at the administrative level to request from HUD a new FHA agreement that would lower the loan-to-value ratio from ninety-five per cent to seventy-five per cent on mortgage loans under the FHA 247 loan product program to lower the Hawaiian Home Lands Trust's loan loss risk of its FHA 247 portfolio. Your Committee finds this policy change has a direct impact on the beneficiaries of the trust and reduces the availability of capital available to the Hawaiian Home Lands residents. Requiring the Department of Hawaiian Home Lands to consult with the beneficiaries of the trust prior to agreeing to lower allowable loan amounts will allow the beneficiaries the opportunity to provide input in actions that directly impacts their ability to sustain home ownership. Your Committee believes that amending the Hawaiian Homes Commission Act of 1920, as amended, fulfills the intent of this measure, which is to encourage and assist Native Hawaiian Home Lands beneficiaries to finance the purchase or construction of homes on Hawaiian Home Lands.

Your Committee has amended this measure by:

- (1) Adding language that declares any amendments made to the Hawaiian Homes Commission Act of 1920 be severable; and
- (2) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 940, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 940, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, none.

SCRep. 272 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1853

The purpose of this measure is to preserve and sustain Native Hawaiian indigenous resources management practices by creating an Aha Moku Council System that will provide advisory assistance to the Department of Land and Natural Resources on all matters regarding the management of the State's natural resources.

Specifically, this measure amends chapter 187A, Hawaii Revised Statutes, to add a new section that:

- (1) Establishes an Aha Moku Commission to assist in the formation of regional Aha Moku Councils, which will serve in an advisory capacity on all matters regarding the management of the State's natural resources; and
- (2) Requires the Department of Land and Natural Resources to seek advisory assistance from the Aha Moku Councils in developing a comprehensive set of best practices for natural resources management.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs; the State Council of Hawaiian Homestead Associations; the Association of Hawaiian Civic Clubs; the Oahu Council, Association of Hawaiian Civic Clubs; Ko'olaupoko Hawaiian Civic Club; Princess Ka'iulani Hawaiian Civic Club; the Nature Conservancy; the Pacific Islands Resource Management Institute; a petition with twenty-nine signatures of Maui residents; written testimony of four private individuals; and several private individuals offering oral testimony. The Department of Land and Natural Resources submitted comments.

For thousands of years, Native Hawaiians have used traditional indigenous knowledge that has been passed on for generations to protect Hawaii's environment and sustain its abundance of resources. As Western sciences overshadowed Native Hawaiian practices and traditions relating to land and ocean use, evidence of environmental deterioration began to appear, such as over-development of the coastline, alteration of fresh water streams, destruction of watersheds, decimation of coral reefs, and the decline of endemic marine and terrestrial species.

Today, many Hawaiian communities are becoming revitalized by using the knowledge of cultural practitioners that has been passed down through kupuna and experienced farmers and fishers. This knowledge has allowed communities to engage in and enhance sustainability and self-sufficiency. Furthermore, many Hawaiian communities are interested in and willing to advise government agencies, organizations, and other interested groups in integrating traditional knowledge and ahupua'a management practices.

At the Ho'ohanohano I Na Kupuna Puwalu Series, all thirty-seven moku came together for the first time. The puwalu resulted in a unanimous consensus that a proactive approach is necessary to protect Hawaii's natural resources and ecosystems, and to sustain the traditional Native Hawaiian practices. Your Committee finds that developing an Aha Moku Council System that incorporates and represents all thirty-seven moku statewide will enable the development of a comprehensive set of best practices for natural resources management, which will reflect and sustain traditional Native Hawaiian practices.

Although there was overwhelming testimony in support of establishing an Aha Moku Council System, there were concerns that the means and structure of the Council System and its administrative Aha Moku Council Commission were too broad and cumbersome to effectively achieve its objectives and carry out its purposes. Your Committee, however, recognizes that the traditional Native Hawaiian practices relating to resources management are becoming a dying art as the number of kupuna and Native Hawaiian practitioners are dwindling. Your Committee further

recognizes that the kupuna and Native Hawaiian practitioners have directly sought out the assistance of the Legislature on this matter. Thus, your Committee strongly believes that these traditional practices and methods need to be preserved and sustained, but recognizes that there needs to be additional time allotted to coordinate and examine the structure and selection of members to the Aha Moku Councils and Commission to ensure that the Council System, upon its establishment, will successfully achieve its goals and objectives.

Accordingly, your Committee has amended this measure by:

- (1) Deleting the new section added to chapter 187A, Hawaii Revised Statutes, and replacing it with language that creates an Aha Moku Council System Advisory Committee to:
 - (A) Explore, examine, and derive best practice models for the creation of an Aha Moku Council System and Aha Moku Council Commission;
 - (B) Explore best practice models to establish an administrative structure, including member criteria and selection, for the creation of an Aha Moku Council Commission to oversee an Aha Moku Council System;
 - (C) Establish goals and objectives for an Aha Moku Council Commission and Aha Moku Councils to accomplish, including benchmarks for long-term planning;
 - (D) Establish a feasible operational budget for an Aha Moku Council Commission;
 - (E) Submit written reports of its findings and recommendations, including any legislation, to the Legislature prior to the convening of the 2008 and 2009 Regular Sessions;
- (2) Deleting the blank appropriation amount and replacing it with an appropriation of \$111,000 for each year of the 2007-2009 fiscal biennium for the administrative costs of the Aha Moku Council System Advisory Committee and for allowing each of the thirty-seven moku statewide to participate in the discussion on the creation of an Aha Moku Council System; and
- (3) Making technical, nonsubstantive amendments for the purposes of style and clarity.

Your Committee believes that these amendments fulfill the intent of this measure, which is to preserve and sustain the Native Hawaiian indigenous resource management practices.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1853, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1853, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 273 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1925

The purpose of this measure is to support and further the efforts in achieving a sustainable future for Hawaii by developing and establishing sustainable communities in the State.

The measure proposes to establish a new chapter within Title 13, Hawaii Revised Statutes, the purpose of which is to maintain and preserve a healthy quality of life and environment for Hawaii's future generations. The measure requires the State, in a combined effort with all state departments and agencies to develop and maintain sustainable communities that will:

- (1) Generate at least fifty per cent of all of its energy requirements for the entire community under development, including but not limited to, residential homes and areas and services for and used by the entire community under development;
- (2) Implement a comprehensive recycling program that will enable the community to divert at least seventy-five per cent of its solid waste from the landfills;
- (3) Implement an extensive community wastewater recycling and treatment management system that would enable the community under development to treat and recycle all of its wastewater for landscaping water requirements onsite of the community and any agricultural water irrigation requirements offsite of the community;
- (4) Protect and preserve open space by designating at least fifty per cent of the entire tract of land for the residential community for open space; provided that:
 - (A) Open space shall not include areas designated for golf courses; and
 - (B) Open space shall include the shoreline, if the planned community abuts and includes shoreline space;
- (5) Promote and encourage visitation to any nearby cultural or historical sites, public beaches, shores, trails, and other outdoor recreational areas by not restricting public access to these areas; and
- (6) Provide affordable housing units by designating and reserving at least forty per cent of all of its residential units within the planned community for affordable housing units for residents to enable them to stay in Hawaii and provide shelter for their families.

Testimony in support of this measure was submitted by the Hawaii Association of Realtors and the Sierra Club, Hawaii Chapter. Testimony in opposition to this measure was submitted by the Department of Health and the Office of Planning. Comments were submitted by the Department of Business, Economic Development, and Tourism, Life of the Land, and the Land Use Research Foundation of Hawaii.

Hawaii is a unique and beautiful State that is largely dependent on the importation of fuel, food, and supplies to sustain its economy and communities. In 2005, the Legislature enacted Act 8, Special Session Laws of Hawaii 2005, to establish the Hawaii 2050 Sustainability Task Force. The interest in the concept of sustainability has grown through the efforts of the Task Force; state and county departments and agencies; branches of the United States military; local businesses and community groups; and community engagement programs and projects. Private industries and developers have introduced technology and concepts that can assist communities in their efforts to become more sustainable and independent with minimal detrimental effects to the environment and the economy.

Of particular note, the soldier and family housing developments at Schofield Barracks in Wahiawa has merged the concept of sustainability with community development. The residential developments that are currently being constructed are able to generate thirty per cent of its energy operation requirements, and its construction plans have incorporated leadership in energy and environment design (LEED) principles. Furthermore, the wastewater treatment system of the residential developments is designed to R1 control zone standards, and ninety-seven per cent of the materials from the demolition of the previous residential homes have been recycled.

Your Committee finds that sustainability has transformed from the conceptual stage to an actual lifestyle that can be achieved, but only through a comprehensive joint effort with the government and the community. Establishing and supporting the development of sustainable communities in the State fulfills the intent of this measure, which is to support and further the efforts in achieving a sustainable future for Hawaii.

Your Committee has amended this measure by making technical, nonsubstantive amendments for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1925, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1925, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 274 Intergovernmental and Military Affairs on S.B. No. 1053

The purpose of this measure is to limit a governmental entity's authority to exercise its power of eminent domain.

Specifically, this measure prohibits a governmental entity from taking private property and transferring the property to another private entity for development purposes where the receiving private entity had earlier expressed an interest in developing the condemned property.

Testimony in support of this measure was submitted by the Hawaii Association of Realtors and the National Federation of Independent Businesses in Hawaii. Testimony in opposition to this measure was submitted by the City and County of Honolulu, Department of the Corporation Counsel; the City and County of Honolulu, Department of Planning and Permitting; and the County of Hawaii, Office of Corporation Counsel.

Your Committee finds that there has been a growing concern that the need for urban renewal or economic development may be cited as justification for allowing government to condemn private property and transfer the property to the benefit of another private person or entity. Your Committee believes that it is important to limit the power of eminent domain to take private property and transfer the property to another private entity for development purposes.

Your Committee amended this measure by amending section 2 to include an exception for the condemnation of development tracts so that the City and County of Honolulu, if needed, can use its power of eminent domain to acquire real property along its proposed mass transit route if any of the property is used by entities for non-governmental activities in connection with mass transit. In addition, your Committee has amended this measure by inserting an effective date of July 1, 2050, to ensure ongoing discussion on this issue. Your Committee further amended this measure by making technical amendments by updating chapter references in the Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1053, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1053, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 275 Intergovernmental and Military Affairs on S.B. No. 1602

The purpose of this measure is to require any State agency that receives county assistance, services, or permission to use county property, to indemnify the county.

Testimony in support of this measure was submitted by the City and County of Honolulu, Department of the Corporation Counsel; the County Council, County of Maui; the County of Hawaii; the County of Hawaii, Office of the Corporation Counsel; the County of Hawaii, Department of Parks and Recreation; and one individual. Testimony in opposition to this measure was submitted by the Department of the Attorney General.

Your Committee finds that, in an effort to maximize optimum beneficial use of public facilities and recognizing that the State does not have sufficient facilities for all its activities and programs, that the counties should cooperate with the State by allowing State agencies the use of county facilities for State events, including high school graduations and athletic competitions, and that the State should indemnify and defend the counties when the State agencies use county facilities.

Your Committee further finds, however, that mandating that the State indemnify the counties raises a serious concern by potentially exposing the State to significant liability without any review by the Attorney General, approval by the Governor, or opportunity for the Comptroller to determine whether the State has sufficient insurance to cover the potential liability, or that it is not in the State's best interest to obtain such insurance coverage. Mandating such a requirement could substantially and unnecessarily interfere with interactions between the State and the counties in a number of unintended circumstances. Therefore, it is important that this measure allow, but not mandate, the State to defend or indemnify a county, but instead require the State and the respective counties to determine when it is necessary and appropriate for the State to defend or indemnify a county.

To this end, your Committee amended this measure to allow the State and the respective counties to determine when the State should defend or indemnify a county.

It is the intent of your Committee to require any State agency that receives county assistance, services, or permission to use county property, to indemnify the county, but that the State and the respective counties will determine when the State should defend or indemnify a county.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1602, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1602, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 276 Intergovernmental and Military Affairs on S.B. No. 1641

The purpose of this measure is to extend the statute of limitation for actions against a county for damage or injury from six months to two years.

The measure permits the counties to identify, by charter, the person to whom claimants should give notice of a claim for injuries or damages sustained on public property, or as a result of the negligence of a county official or employee.

Testimony in support of this measure was submitted by the Consumer Lawyers of Hawaii and by one individual. Testimony in opposition to this measure was submitted by the Department of the Attorney General and by the City and County of Honolulu, Department of the Corporation Counsel.

Your Committee finds that, until recently, claims against all levels of government have been subject to a two-year statute of limitations. In May 2004, the Hawaii Supreme Court ruled that there was a six-month limitation for claims against a county in its *Kahale* decision. The *Kahale* decision was based on a six-month notice requirement in section 46-72, Hawaii Revised Statutes. This measure amends section 46-72, Hawaii Revised Statutes, to provide for a two-year limitation consistent with federal and state law. The Hawaii Supreme Court ruled in 1973 that counties were subject to the same, two-year limitation as the state and federal governments in its *Salavea* decision. For the next thirty-one years, all levels of government operated under the same two-year limitation, until the *Kahale* decision. This measure will bring county claims in conformity with all other government and private sector claims and the reasonable expectations of the public.

It is the intent of your Committee that this measure should extend the statute of limitation for actions against a county for damage or injury from six months to two years.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1641 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 277 Intergovernmental and Military Affairs on S.B. No. 769

The purpose of this measure is to provide county governments with the flexibility to allow the director of finance of each county to invest county moneys involving commercial paper and bankers acceptances with an A1/P1 or equivalent rating by any national securities rating service.

Testimony in support of this measure was submitted by the Finance Department of the County of Hawaii, a member of the Maui County Council, Central Pacific Bank, and First Hawaiian Bank.

Your Committee finds that this measure will allow the counties within the State the same flexibility for its investments that are afforded the State, giving them the opportunity to maximize their investment returns while ensuring the safety of the principle invested. Therefore, your Committee finds this measure to be in the public's interest.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 769 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 278 Intergovernmental and Military Affairs on S.B. No. 997

The purpose of this measure is to increase public safety.

Specifically, this measure makes an appropriation of an unspecified sum for each year of the 2007-2009 fiscal biennium as a grant-in-aid to the City and County of Honolulu for a citizens' police training program to be conducted at least once a year on Oahu.

Testimony in support of this measure was submitted by the Honolulu Police Department.

Your Committee finds that volunteer training and the cooperation of local residents are important elements in a law enforcement agency's ability to succeed in reducing and preventing drug and crime problems. The Citizens Police Academy Program conducted by the Honolulu Police Department is an effective program that educates concerned community residents about firearms, police communications, report writing, vehicle operations, domestic violence, crime scene investigation, and community policing. Citizens who participate in this kind of training become active in their neighborhood, providing a valuable resource to their local police departments.

Your Committee further finds that such training programs should be made available to communities across Oahu.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 997 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 279 Intergovernmental and Military Affairs on S.B. No. 1044

The purpose of this measure is to authorize the issuance of general obligation bonds and to appropriate the proceeds thereof to the Department of Defense for a veterans center on the island of Molokai.

This measure appropriates \$2,746,000 in general obligation bond revenues in fiscal year 2007-2008, for the design, construction, and equipping of the Molokai Veterans Center.

This measure also appropriates \$2,965,000 in general revenues for fiscal year 2007-2008 for the Molokai Veterans Center.

Testimony in support of this measure was submitted by the Department of Defense and the Maui County Council.

Your Committee finds that there are approximately six hundred veterans currently residing on the island of Molokai. Some of these veterans have just returned from deployment where they served honorably with the 29th Infantry Brigade of the Hawaii National Guard. The existing Molokai Veterans Center is located in Kaunakakai in a small aging commercial building next to a food establishment. The Molokai Veterans Caring for Veterans leases this small space to allow its veterans to meet and discuss important issues. A permanent facility will allow Molokai veterans to receive important programs and services regarding their benefits without requiring them to travel to another island.

It is the intent of your Committee to appropriate funding for a veterans center on the island of Molokai to ensure that the veterans have access to information and services regarding their benefits.

Your Committee recommends, for the purposes of clarity and style, that the Committee on Ways and Means amend the measure by replacing the last sentence in section 3 to read as follows: "The sums appropriated in sections 1 and 2 shall be expended by the department of defense for the purposes of this Act."

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1044 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 280 Intergovernmental and Military Affairs on S.B. No. 1597

The purpose of this measure is to make an appropriation for the Puna District police station in Kea'au, Hawai'i.

Your Committee received testimony in support of this measure from the Office of the Mayor of the County of Hawaii and the County of Hawaii Police Department.

Your Committee finds that the district of Puna is one of the fastest growing districts in the State. The existing police station in Kea'au, Hawai'i cannot meet the needs of the growing community. The intent of this measure is to appropriate funds for the planning, design, and construction of a new facility for the Puna District police.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1597 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 281 Education on S.B. No. 84

The purpose of this measure is to establish salaries for members of the Board of Education and appropriate funds therefor.

Testimony in support of this measure was submitted by the Board of Education. Testimony in opposition of this measure was submitted by the Department of Budget and Finance.

Your Committee finds that the members of the Board of Education provide a valuable public service to the people of Hawaii, and, over the years, their duties and responsibilities have become more extensive, including increased jurisdiction such as responsibilities relating to the public charter schools. Your Committee further finds that the provision of appropriate compensation is a necessity for these hard-working individuals. However, your Committee determines that their positions do not necessarily require the provision of a salary, as would be warranted for a full-time employee of the State. Therefore, your Committee believes that an increase in the current compensation rate is a suitable approach to addressing the issue at this time.

Accordingly, your Committee has amended this measure by:

- (1) Removing language that provides an annual salary and related benefits to members of the Board of Education; and
- (2) Increasing the current rate of compensation for members of the Board of Education from the current \$100 per day to \$120 per day for each day's actual attendance at meetings.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 84, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 84, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 282 (Joint) Education and Judiciary and Labor on S.B. No. 608

The purpose of this measure is to appropriate funds for the establishment of a statewide web-based interactive searchable database for the provision of workforce training information.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawaii, and the Workforce Development Council.

Your Committees find that the future of our State is dependent upon the growth of a knowledgeable and qualified workforce. Efforts to grow such a workforce must include comprehensive measures for providing access to information on the workforce training needs of employers and the availability of programs and courses to meet those and other training needs. This measure seeks to address the needs of employers, employees, and workforce training providers by facilitating the receipt and transmission of relevant information for the support and development of a qualified workforce in Hawaii.

Testimony provided indicated that an existing system, Hawaii Resource Exchange, a web-based system that is maintained pursuant to a collaborative effort of the Department of Education and the University of Hawaii, may already provide similar information and resources or may be able to support the type of information contemplated under the current measure. Your Committees believe that the Hawaii Resource Exchange system may be an appropriate alternative to the creation of a new system and that the diversion of funding, if necessary, may also be appropriate.

However, your Committees determine that this measure warrants further consideration and believe that as the measure proceeds through the session, the interested parties should work together to determine the appropriate system and the true funding needs to support the system.

Accordingly, your Committees have amended this measure by:

- (1) Clarifying the language regarding the purpose of the measure to indicate that a statewide web-based interactive searchable database should be established to provide comprehensive workforce training information to employers, employees, and training providers; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 608, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 608, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 4 (Chun Oakland, Hee, Inouye, Taniguchi).

SCRep. 283 (Joint) Education and Judiciary and Labor on S.B. No. 887

The purpose of this measure is to support workforce development through the establishment of a pilot program within the Department of Education to provide pre-apprenticeship programs in the public high schools.

Testimony in support of this measure was submitted by Honolulu Community College, the Hawaii State Teachers Association, and the Pacific Resource Partnership. Testimony in opposition of this measure was submitted by the Department of Education.

Your Committees find that workforce development is a major issue facing our State today. Efforts to grow a highly qualified and highly skilled workforce are required to meet the workforce needs of businesses within the State. In 2006, the Legislature established the Construction Academy within the Honolulu Community College to provide pre-apprenticeship programs in an attempt to meet workforce deficiencies in the construction industry. Testimony indicates that approximately one thousand public school students are participating in Construction Academy courses in twenty-seven public high schools. Your Committees believe that the same concept can be expanded to address workforce training needs in other industries.

Your Committees note that the Department of Education raised concerns about the provisions of this measure due to the infancy of the Construction Academy program, the lack of data on that program's effectiveness, and how it can be improved. Your Committees believe that continued efforts to develop programs and training for workforce development should not be delayed. The establishment of a five-year pilot program to provide trade pre-apprenticeship programs in public high schools can benefit from the example set by the Construction Academy and should serve as a complement to the Construction Academy program and emphasize applied and experiential learning.

Accordingly, your Committees have amended this measure by:

- (1) Including language to indicate that the trade pre-apprenticeship programs established in public high schools should emphasize applied and experiential learning;
- (2) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 887, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 887, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 4 (Chun Oakland, Hee, Inouye, Taniguchi).

SCRep. 284 (Joint) Education and Public Safety on S.B. No. 1140

The purpose of this measure is to support the successful reintegration into the community of prison inmates upon release through transition programs provided by the Department of Education.

Testimony in support of this measure was submitted by the Department of Education, the Department of Public Safety, and Kumulipo.

Your Committees find that the cost of housing a prison inmate is approximately \$70 to \$400 per day, varying based upon the level of security necessary for the incarceration. Your Committees further find that the high rate of recidivism of former prison inmates can be very costly to the State and its residents, both economically and socially in the form of increased criminal activity. The money spent on housing recidivists would be better spent on programs to educate and prepare prison inmates for positive and productive lives upon release. Your Committees believe that these efforts must be initiated while individuals are incarcerated and must also continue after release to be successful in truly combating recidivism.

Your Committees are aware that although some inmates may pursue their general education development diplomas or other education or training while incarcerated, many fail to continue with such education upon release. This may be attributed to a difficulty in assimilating into established adult education programs in the community after being incarcerated. Your Committees determine that separate programs and schools for former inmates would provide a more comfortable environment for these individuals to continue their education and training and, thus, improve the chances for successful reintegration into the community. Additionally, to ensure continuity of purpose, the Departments of Education and Public Safety should work together in formulating a comprehensive approach to beginning to educate and, most importantly, shepherding the continued education of inmates while in prison through their transition into the community to achieve the greatest success. Therefore, funding for both departments is appropriate to allow each department to integrate the components necessary to establish a system that will benefit the inmates as well as the people of this State.

Accordingly, your Committees have amended this measure by:

- (1) Including an appropriation to the Department of Public Safety for the development of portions of what will be a comprehensive approach to successful prison inmate reintegration into the community through the establishment of educational programs, including distance learning programs, and a tracking system for prison inmates and their successful outcomes;

- (2) Clarifying the responsibilities of the Department of Education in developing educational programs and schools for shepherding prison inmates in their education during incarceration through to release and developing a tracking system for prison inmates and their successful outcomes;
- (3) Including a reporting requirement for the Departments of Education and Public Safety on the programs established under the measure; and
- (4) Making a technical, nonsubstantive change for purposes of clarity and to conform to preferred drafting style.

As affirmed by the records of votes of the members of your Committees on Education and Public Safety that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1140, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1140, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 3 (Chun Oakland, Nishihara, Taniguchi).

SCRep. 285 Education on S.B. No. 1146

The purpose of this measure is to establish, at the University of Hawaii, scholarship programs in honor of Senator Hiram L. Fong and Senator Oren E. Long, and appropriate funds therefor.

Testimony in support of this measure was submitted by the Department of Education, the University of Hawaii, and the Hiram L. Fong Commission.

Your Committee finds that Senator Hiram L. Fong was a champion of civil rights, labor rights, and immigration reform. He was a respected legislator whose achievements are great in number and who espoused timeless philosophies. Your Committee further finds that Senator Oren E. Long was also a distinguished leader who devoted over forty years of his life to public service and worked successfully in collaboration with Senator Fong on many initiatives, including the establishment of the East-West Center. Based upon recommendations from the Hiram L. Fong Commission, established under Act 117, Session Laws of Hawaii 2005, this measure establishes the Hiram L. Fong Scholarship Program and the Oren E. Long Scholarship Program at the University of Hawaii. Your Committee believes that the establishment of these scholarships are a fitting tribute to these great leaders.

Your Committee also finds that, based on the testimony provided, the University of Hawaii Foundation is unauthorized to receive funds appropriated from the general revenues of the State. Instead, moneys must be deposited into an endowment trust from which the scholarship funds can be provided.

Accordingly, your Committee has amended this measure by:

- (1) Changing the language throughout the measure to specify that the scholarship programs shall be administered by the University of Hawaii with proceeds from endowment trusts that shall receive initial funding by appropriations out of the general revenues of the State;
- (2) Removing the appropriation from the University of Hawaii Scholarship and Assistance Special Fund; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1146, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1146, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 286 Transportation and International Affairs on S.B. No. 1515

The purpose of this measure is to raise the fine from \$10,000 to \$27,500 for each violation of the State's harbors law (chapter 266, Hawaii Revised Statutes), any administrative rule adopted thereunder, or any lawful command of any harbor master, harbor agent, or harbor district manager.

Your Committee received testimony in support of this measure from the Department of Transportation.

Your Committee finds that the current fine of \$10,000 needs to be raised to \$27,500, the amount that federal environmental laws impose for fines by landowners for violations of its environmental regulations. As the landowner of harbor facilities and lands, the Department of Transportation may be held liable by the federal government for the violation of federal environmental laws committed by harbor users or tenants. Your Committee also finds that the measure will allow for a full recovery of fines imposed on the Department of Transportation, as the landowner, for violations of federal and state air and water pollution laws committed by harbor users and tenants.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1515, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1515, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 287 Transportation and International Affairs on S.B. No. 1238

The purpose of this measure is to add motor scooters to the list of vehicles that are prohibited from having a noisy muffler.

Your Committee received testimony in support of this measure from three individuals. Testimony in opposition was received from Street Bikers United Hawaii.

Your Committee finds that loud noise generated by motorcycles, mopeds, and motor scooters are a constant annoying source of irritating noise, particularly in Waikiki. Testimony indicated that there is nothing more disturbing, jolting, and obnoxious than to hear the loud "varoom" in the middle of the night. There is no justifiable reason for the loud muffler noise.

Your Committee has amended this measure by making a technical, nonsubstantive amendment for purpose of clarity.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1238, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1238, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 288 Transportation and International Affairs on S.B. No. 1522

The purpose of this measure is to require that traffic abstracts include all unadjudicated traffic allegations, unsatisfied judgments, certain judgments against the person arising from the operation of a motor vehicle, and administrative revocations of driver's license.

Your Committee received testimony in support of this measure from the Judiciary.

The intent of this measure is to limit the time period for reporting moving violations on a traffic abstract, and thereby provide an incentive for individuals to resolve outstanding cases and pay judgments.

The Judiciary proposed an amendment to this measure that would address the complications that have arisen with the use of multi-charge citations by law enforcement officers, on which your Committee would defer to the Committee on Judiciary and Labor.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1522 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 289 Transportation and International Affairs on S.B. No. 1528

The purpose of this measure is to clarify that all traffic offenses and violations under the statewide traffic code are treated as traffic violations, not convictions.

Your Committee received testimony in support of this measure from the Judiciary and Kauai Safety Agency.

Your Committee finds that this measure would affirm that traffic offenses are infractions, and therefore are deemed civil rather than criminal matters. According to testimony of the Judiciary, this measure is in keeping with Hawaii appellate case law.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1528 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 290 Transportation and International Affairs on S.B. No. 1529

The purpose of this measure is to clarify the civil adjudication of civil traffic infractions.

Specifically, this measure:

- (1) Establishes that the district court may adjudicate civil traffic infractions charged against minors;
- (2) Applies the civil standard of proof for civil traffic infraction trials;
- (3) Remedies difficulties encountered by certain district courts in complying with concurrent scheduling requirements for civil and related criminal proceedings;
- (4) Protects a defendant's privilege against self-incrimination;
- (5) Promotes consistency in processing and adjudicating moving and non-moving civil traffic infractions; and
- (6) Permits the use of electronic citations.

Your Committee received testimony in support of this measure from the Judiciary and Kauai Safety Agency. Comments were received from Catrala-Hawaii.

Your Committee finds that this measure would provide clear, unambiguous, and consistent methods of processing traffic infractions in a more expedient and less burdensome manner, while ensuring protections against self-incrimination for defendants.

Your Committee notes the concerns of Catrala-Hawaii to the effect that this measure may make car rental companies responsible for all moving and parking violations. U-drive companies would become liable for the wrongdoings of their renters who operate the vehicle at the time of the infraction. Catrala-Hawaii offered suggested amendments to this measure, on which your Committee would defer to the Committee on Judiciary and Labor.

Your Committee has made technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1529, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1529, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 291 Transportation and International Affairs on S.B. No. 1569

The purpose of this measure is to clarify that the penalties imposed against violations of state motor vehicle operation and equipment laws and rules include the violation of any related rules for which a penalty is not specified.

Your Committee received testimony in support of this measure from the Prosecuting Attorney and Police Department of the City and County of Honolulu.

Your Committee finds the existing law that applies monetary fines for committing traffic violations is ambiguous in that it does not expressly provide that the monetary fines contained in that section apply to other sections of law that establish a traffic violation but do not specifically include a fine.

As affirmed by the record of votes of the members of your Committee on Transportation and International Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1569 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hooser, Taniguchi).

SCRep. 292 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1422

The purpose of this measure is to provide additional sanctions for violations by mortgage brokers and solicitors against elders.

Your Committee received testimony in support of this measure from the Regulated Industries Complaint Office of the Department of Commerce and Consumer Affairs and the Department of the Attorney General.

Your Committee finds that the Department of Commerce and Consumer Affairs has received numerous complaints against mortgage brokers for conduct harmful to elderly customers. There is concern that if left undeterred, this conduct will increase. The intent of this measure is to authorize sanctions for mortgage brokers and solicitors who violate chapter 454 or 436B, Hawaii Revised Statutes, when the violations include conduct that is directed towards, targets, or is committed against elders.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1422 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 293 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1414

The purpose of this measure is to amend the sentencing of repeat offender provisions in the penal code to include insurance fraud offenses found in chapters 386, 431, 432, and 432D, Hawaii Revised Statutes (HRS).

Testimony in support of this measure was submitted by the Department of Commerce and Consumer Affairs and the Department of the Attorney General (AG).

Your Committee finds that the intent of this measure is to enhance criminal penalties for persons who commit insurance fraud by including felony insurance fraud as one of the felony violations that can increase the sentence of a repeat offender. Specifically, this measure includes workers' compensation, private health insurance, motor vehicle insurance, mutual benefits societies, and health maintenance organization fraud penalty statutes among the list of felonies that triggers the enhanced sentencing of repeat offenders in section 706-606.5, HRS.

Your Committee, upon recommendation by the AG, has amended this measure so that the descriptions of the insurance felonies added to section 706-606.5, HRS, track the statutory language of their respective sections in the HRS.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1414, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1414, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ige).

SCRep. 294 Commerce, Consumer Protection and Affordable Housing on S.B. No. 66

The purpose of this measure is to make tampering with for-profit entertainment games, such as for-profit coin- or dollar bill-operated entertainment machines and arcade games, an unfair and deceptive trade practice.

Your Committee received testimony in support of this measure from two individuals.

Your Committee finds that no business should profit from unfair or deceptive trade practices and the public should be protected from these types of business practices. The intent of this measure is to ensure that for-profit entertainment games, such as coin- or dollar bill-operated games and arcade games, are not tampered with to the detriment of consumers.

Your Committee has amended this measure by significantly delaying the effective date to encourage further discussion on this issue.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 66, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 66, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 295 (Majority) Commerce, Consumer Protection and Affordable Housing on S.B. No. 1016

The purpose of this measure is enact the Uniform Athlete Agents Act and to protect student-athletes and education institutions from potential harm caused by unscrupulous athlete agents.

Your Committee received testimony in support of this measure from the University of Hawaii and the Commission to Promote Uniform Legislation. The Professional and Vocational Licensing Division of the Department of Commerce and Consumer Affairs (PVL) submitted testimony in opposition to this measure.

Your Committee notes that the Office of the State Auditor has conducted a sunrise analysis regarding regulating athlete agents as required by section 26H-6, Hawaii Revised Statutes, and pursuant to House Resolution No. 112, Senate Draft 1, of the 2006 Regular Session. Although the Office of the State Auditor concluded that regulation of athlete agents in Hawaii is unnecessary at this time, Hawaii is one of twelve states that does not have any type of law to regulate athlete agents and that the State should not wait until unscrupulous acts of athlete agents becomes a problem and causes significant damage to student athletes and educational institutions in the State. Your Committee further notes that the testimony of the PVL indicated that the impact of regulating athlete agents to both taxpayers and consumers would be minimal.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1016 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 2 (Ihara, Sakamoto).

SCRep. 296 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1397

The purpose of this measure is amend and update chapter 489D, Hawaii Revised Statutes (HRS), governing the licensing and regulation of money transmitters, in order to address and remedy inadvertent errors or omissions in that chapter as originally enacted during the 2006 Regular Session.

This measure also specifically adds foreign banks that are licensed under the laws of the United States or any other state to the list of financial institutions that are exempt from chapter 489D, HRS.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs. The Hawaii Financial Services Association provided comments on this measure.

Your Committee finds that this measure contains primarily housekeeping amendments that will enhance and strengthen the safe and secure operation of the money transmitter industry and protect the public interest.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1397 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 297 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1398

The purpose of this measure is to revise and update the law regarding escrow depositories.

Specifically, this measure:

- (1) Clarifies which escrow transactions are covered by the statute and which are not;
- (2) Updates the statute to adequately reflect the present day size of the transactions routinely handled by the escrow industry;
- (3) Provides for more flexibility in supervising and regulating the industry; and
- (4) Ensures adequate protection for the consumer.

The Department of Commerce and Consumer Affairs testified in support of this measure.

Your Committee finds that chapter 449, Hawaii Revised Statutes, which governs the licensing and regulation of escrow depositories, needs to be updated to reflect changes in the industry and to protect consumers.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1398 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 298 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1399

The purpose of this measure is to amend the Code of Financial Institutions (Code), chapter 412, Hawaii Revised Statutes (HRS), to reduce regulatory burden when consumers' interests are not adversely affected.

This measure also updates the Code to recognize changes in the industry and make clarifications to the existing law.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs (DCCA). Testimony in opposition to this measure was received from the Hawaii Financial Services Association and the Hawaii Bankers Association.

Your Committee finds that the intent of this measure is to reduce regulatory burdens by eliminating obsolete requirements and improving procedures of licensing and regulation of financial institutions within the State.

Your Committee has amended this measure, based upon an agreement reached between the DCCA and financial institutions representatives, to:

- (1) Delete the addition of new definitions to section 412:3-112(a), Hawaii Revised Statutes, relating to various loan products, found in section 2 of this measure;
- (2) Delete the addition of new definitions of section 412:9-100, Hawaii Revised Statutes, relating to security breaches, found in section 6 of this measure; and

(3) To make technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1399, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1399, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 299 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1424

The purpose of this measure is to make an emergency appropriation of \$250,000 to allow the Division of Consumer Advocacy of the Department of Commerce and Consumer Affairs to investigate the power outages that occurred throughout the State following the October 15, 2006, earthquakes.

Your Committee has received testimony in support of this measure from the Public Utilities Commission and the Division of Consumer Advocacy of the Department of Commerce and Consumer Affairs.

Your Committee finds that, following the power outages that occurred on the islands of Oahu, Maui, and Hawaii after the earthquakes of October 15, 2006, an investigation was opened by the Division of Consumer Advocacy to examine whether the electrical utilities that experienced island-wide power outages acted in a reasonable manner prior and subsequent to the outages. This measure will provide an emergency appropriation to the Division of Consumer Advocacy for the hiring of a consultant to investigate the power outages and will assist the Division of Consumer Advocacy in meeting its mandate to represent consumers' interests.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1424 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 300 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1402

The purpose of this measure is to release \$2,000,000 for fiscal year 2007-2008 from the Loss Mitigation Grant Fund to provide grants for wind resistive devices.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs and the Hawaii Lumber Products Association. Comments were submitted by the State Department of Defense on this measure.

Your Committee finds that, based on the testimony provided, this Administration Package measure will provide grants to single and multi-family residential owners and former policyholders of the Hawaii Hurricane Relief Fund for the installation of wind resistive devices to reduce losses resulting from a wind hazard. Previous appropriations made out of the Loss Mitigation Grant Fund lapsed and it is necessary to appropriate moneys out of the fund for the 2007-2008 fiscal year to continue this important program.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1402 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ige).

SCRep. 301 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1408

The purpose of this measure is to make various amendments to the existing law governing insurance licensing.

Specifically, this measure:

- (1) Re-establishes the limited line motor vehicle rental company producer's license fee at \$1,000, and the "all services" fee at \$600 per year;
- (2) Mandates that adjusters and independent bill reviewers' place of business be where the licensee principally conducts transactions under the license; and
- (3) Changes the exemption from the education and examination requirements for producers previously licensed for same lines of authority in another state by allowing receipt of resident producer license applications for the State within ninety days of cancellation of the applicant's out-of-state resident license.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs.

Your Committee finds that the housekeeping amendments made to certain provisions of the Insurance Code will improve the Department of Commerce and Consumer Affairs' operations.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1408 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ige).

SCRep. 302 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1409

The purpose of this measure is to establish a cap of \$200,000 on the annual premium tax paid by captive insurance companies licensed by the Department of Commerce and Consumer Affairs.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs and one individual. The Tax Foundation of Hawaii provided comments.

Your Committee finds, based upon the testimony provided, that the current tax structure provides for a descending rate that is applied to the amount of annual premiums written by a captive licensee. This measure, which establishes a \$200,000 cap on the premium tax, will encourage the creation of more captive insurance companies in Hawaii and will make Hawaii's captive tax structure comparable to several other jurisdictions.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1409 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ige).

SCRep. 303 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1420

The purpose of this measure is to provide the Department of Commerce and Consumer Affairs' Professional and Vocational Licensing Division (PVLD) with the flexibility to offer licensing discounts in an expedited manner.

Specifically, this measure amends section 92-28, Hawaii Revised Statutes, by extending the authority of the PVLD to decrease and increase fees to thirty additional licensing laws that fall under the purview of the PVLD.

Your Committee received testimony in support of this measure from the Professional and Vocational Licensing Division of the Department of Commerce and Consumer Affairs. Testimony in opposition to this measure was submitted by the Occupational Therapy Association of Hawaii.

Your Committee finds that the intent of this Administration Package bill is to increase the types of licenses that can receive a discount from the PVLD for renewing their licenses through the PVLD's online renewal system and provide the PVLD with greater flexibility in this regard. Your Committee notes that it is not the intent to give the PVLD the authority to increase fees on the thirty additional licensing laws that are included in this bill. Your Committee finds that the bill as currently drafted does not specifically provide for that distinction.

Therefore, your Committee has amended this measure by specifying that the amendments made to section 92-28, HRS, by section 1 of this measure shall only apply to the decreasing of fees for professions and vocations under the purview of the PVLD. Your Committee has also significantly delayed the effective date of this measure in order to promote further discussion.

The intent of this measure, as amended, is to only provide the PVLD with the flexibility to authorize discounts for licensing and not to provide the PVLD with authorization to increase fees on these thirty professions and vocations.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1420, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1420, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ige, Sakamoto).

SCRep. 304 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1712

The purpose of this measure is provide for the regulation of mixed martial arts by the Department of Commerce and Consumer Affairs (DCCA). This measure also prohibits no rules combat, extreme or ultimate fighting, and similar contests.

Your Committee received testimony in support of this measure from the Professional and Vocational Licensing Division of the DCCA and the Office of the Auditor. The Regulated Industries Complaints Office of the DCCA provided comments on the measure.

Your Committee finds that mixed martial arts events are one of the fastest growing sporting events in the country. In Hawaii, the events are currently permitted under an exemption from the prohibition against no rules combat, or extreme fighting and without any type of regulations in place, there is the potential for fraudulent events which is detrimental to both participants in the sport and the general public.

During the 2006 legislative session, the Legislature passed Senate Concurrent Resolution No. 37, Senate Draft 1, to request the Office of the Auditor, pursuant to section 26H-6, Hawaii Revised Statutes, to evaluate proposals to regulate mixed martial arts events. Two options were proposed to the Office of the Auditor for regulating mixed martial arts. The first proposal was to create a Mixed Martial Arts Commission and the second proposal was to expand the jurisdiction of the Boxing Commission to include mixed martial arts.

In February 2007, the Office of the Auditor issued its report recommending a third alternative which, in part, suggested the creation of a regulatory program to be placed directly under the Director of Commerce and Consumer Affairs.

Your Committee has amended this measure by:

- (1) Providing the DCCA with statutory authority to establish an advisory committee to assist with the implementation of the new regulations;
- (2) Requiring licensing for judges;
- (3) Requiring certain fees from promoters based upon certain percentages of their gross proceeds;
- (4) Requiring promoters to submit to a background check prior to obtaining a license;
- (5) Including language that specifies that the costs of furnishing a medical report and the results of an HIV and hepatitis test are to be borne by the promoter;
- (6) Including language that specifies that the costs of determining compliance with the ban on the use of stimulants and banned substances are to be borne by the promoter;
- (7) Excluding amateur events from the DCCA's oversight;
- (8) Providing the DCCA with the option of using the existing national mixed martial arts registry rather than creating one of its own;
- (9) Including language requiring licensees to renew their licenses on a biennial basis similar to other regulated professions and vocations and requiring updated medical records and criminal background checks prior to a contest and at the time of license renewal;

- (10) Including language to promote uniformity with rulemaking provisions from other licensing chapters;
- (11) Amending language related to the Director's power to revoke and suspend licenses in order to create uniformity with other licensing chapters;
- (12) Deleting the review and enforcement fee, as the measure already provides for a licensing fee that is earmarked for enforcement;
- (13) Defecting the effective date of the measure to promote continued discussion;
- (14) Including language that will allow for the measure to sunset three years after becoming effective; and
- (15) Making technical, nonsubstantive changes for the purposes of clarity and style.

While your Committee has made numerous amendments to this measure, the intent to regulate the sport of mixed martial arts to protect both participants in the sport and the general public remains consistent.

As this measure is passed out, your Committee asks that the Senate Committee on Ways and Means consider a mechanism to allow DDCA adequate time for rule making on this matter, while providing a specific effective date to provide persons covered by the measure certainty as to when they must comply with the new regulation requirements.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1712, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1712, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 305 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1352

The purpose of this measure is to make technical and housekeeping amendments to various sections of the Hawaii Revised Statutes (HRS) and the Session Laws of Hawaii 2006, relating to the Hawaii Housing Finance and Development Corporation's programs.

Your Committee received testimony in support of this measure from the Hawaii Housing Finance and Development Corporation (HHFDC) and three members of the Maui County Council.

Your Committee finds that this measure is a housekeeping matter that will correct inadvertent mistakes that occurred following the repeal of chapter 201G, HRS, and the transfer of the enabling laws of the HHFDC to chapter 201H, HRS.

Upon the recommendation of the HHFDC, your Committee has amended this measure by deleting the new definition of "elder or elderly" and adding the definition for "elderly housing project," in order to comply with existing federal law. Your Committee also amended the effective date to make this measure effective upon approval, rather than, upon approval, having its provisions retroactively apply from July 1, 2006.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1352, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1352, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 306 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1859

The purpose of this measure is to appropriate \$700,000 for fiscal year 2007-2008 and an additional \$700,000 for fiscal year 2008-2009 to Hawaii Habitat for Humanity as a grant-in-aid to build two hundred self-help ownership homes in the State.

Your Committee received testimony in support of this measure from the Hawaii Habitat for Humanity Association and two individuals.

Your Committee finds that Hawaii Habitat for Humanity and its affiliates contribute a great public service to the community by providing zero interest affordable housing to low-income families. The service that Hawaii Habitat for Humanity and its affiliates provides helps to prevent more of Hawaii's low-income families from becoming homeless.

Your Committee has amended this measure by deleting the specific amounts appropriated to encourage further discussion.

The intent of this measure is to assist Hawaii Habitat for Humanity and its affiliates with building more affordable housing in the State.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1859, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1859, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 307 (Majority) Commerce, Consumer Protection and Affordable Housing on S.B. No. 1987

The purpose of this measure is to authorize the issuance of general obligation bonds in the sum of \$55,000,000 to acquire an interest in Kukui Gardens.

Your Committee received testimony in support of this measure from the Hawaii Housing Finance and Development Corporation and the Housing Committee of Faith Action for Community Equity.

Your Committee finds that this measure will assist in maintaining the long-term use of Kukui Gardens as affordable rentals by authorizing the issuance of general obligation bonds to allow the State to acquire an interest in Kukui Gardens. Your Committee recognizes the housing crisis that the State is currently facing and this measure will serve as one mechanism in attempting to mitigate this crisis.

Your Committee has amended this measure by including a purpose section to specify that the general obligation bonds are for the purpose of purchasing real estate, by deleting the specific amount, and by changing the effective date to July 1, 2050, to encourage further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1987, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1987, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, 1 (Ihara).

SCRep. 308 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 838

The purpose of this measure is to exempt certain private property acquired through gift or exchange by the Board of Land and Natural Resources from the requirements of conservation district, land use, coastal zone management and county zoning laws, and any county subdivision regulations.

Testimony was submitted in opposition to this measure by the City and County of Honolulu, Department of Planning and Permitting. Comments were submitted by the Department of Land and Natural Resources.

Your Committee finds that there is a continued need to ensure that sufficient amounts of land are available to accommodate the outdoor recreational and education needs of Hawai'i's people. To that end, the State and counties have acquired private land in order to ensure that these needs are met. However, continued encouragement of public and private initiatives and facilitation of the conversion of private land that is adjacent to public land, is necessary to ensure that adequate amounts of land become and remain available for Hawai'i's people.

Your Committee amended this measure by making a technical amendment to the proposed subsection (f), by removing the reference to Hawaii Revised Statutes as unnecessary.

It is the intent of your Committee to exempt land acquired or gifted to the Board of Land and Natural Resources for public recreational and educational uses in conjunction with adjoining public land, from the requirements of conservation district, land use, coastal zone management and county zoning laws, and any county subdivision regulations.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 838, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 838, S.D. 1, and be referred to the Committee on Intergovernmental and Military Affairs.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 309 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1723

The purpose of this measure is to make a housekeeping amendment to section 674-18, Hawaii Revised Statutes, relating to the scope of judicial relief that may be awarded to an aggrieved Native Hawaiian trust beneficiary.

Testimony in opposition to this measure was submitted by the Department of the Attorney General.

Your Committee finds that making a technical, nonsubstantive amendment to section 674-18, Hawaii Revised Statutes, will provide clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1723 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, none.

SCRep. 310 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1891

The purpose of this measure is to make a violation of chapter 171, Hawaii Revised Statutes (HRS), relating to public lands, and rules adopted pursuant to chapter 171, HRS, a petty misdemeanor.

Your Committee received testimony in support of this measure from the Department of Land and Natural Resources and twenty-one individuals.

Your Committee finds that currently, under chapter 171, HRS, persons who violate that chapter or the administrative rules adopted pursuant to that chapter are only subject to civil actions. This measure will authorize the use of criminal citations or arrest in order to prosecute an individual found to be in violation of this chapter. This measure will also allow for an increase in penalties for persons who are repeat offenders, while preserving the Department of Land and Natural Resources right to seek restitution and recover damages in a civil process.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1891 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 311 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1094

The purpose of this measure is to authorize the use of the Land Conservation Fund for the acquisition of agricultural easements and for the payment of debt service on bonds issued for acquisitions using the fund.

Your Committee received testimony in support of this measure from the Department of Agriculture, the Department of Land and Natural Resources, and the Hawaii Agriculture Research Center.

Your Committee finds that this measure broadens the type of public purpose that the Land Conservation Fund can be used for and specifies agricultural easements as an appropriate means to acquire interests or rights in agricultural land. Allowing the purchase of agricultural conservation easements is a tool that may encourage more landowners to consider this program and keep important agricultural lands in production, rather than allowing them to be converted to suburban or high density areas.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1094 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 312 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1644

The purpose of this measure is to mitigate the adverse effects of the March 2006 mudslides on the residents of Maunaloa, Oahu.

The measure accomplishes this purpose by:

- (1) Establishing a Maunaloa Infrastructure Development Special Fund and a Maunaloa Housing Revolving Fund to assist Maunaloa residents in rebuilding their homes; and
- (2) Authorizing the Department of Land and Natural Resources to transfer leases at Maunaloa, Oahu, in the event of damage due to adverse acts of nature that occurred between January 1 and April 1, 2006.

This measure also appropriates an unspecified amount for lease transfer costs for fiscal year 2007-2008, and appropriates an unspecified amount to the Maunaloa Infrastructure Development Special Fund for fiscal year 2007-2008, and requires a report to the 2008 Legislature regarding any lease transfers made.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the Office of Hawaiian Affairs, the Maunaloa Valley Community Association, two individuals, and one individual who submitted a petition with over sixty signatures. Testimony in opposition to this measure was submitted by the Department of Budget and Finance.

Your Committee finds that in March 2006, record-breaking heavy rains on Oahu caused recurring mudslides in the Round Top-Tantalus area, eventually forcing families in one small neighborhood to evacuate after residents at the end of the cul-de-sac watched mud rush down the hill between their homes. Within a half an hour, an entire section of the hillside was gone – what was once a slope became a gorge in minutes. After the slide, mud covered the road leading up to the last three homes in Maunaloa Valley where about twenty-five people live in the three houses. Down the hill on Maunaloa Road, several other neighbors faced erosion from the rushing water, mud, and debris. While many of the immediate needs of the Maunaloa residents were met in the days and weeks following the flooding, the landslides created unstable conditions for some of the lessees, making repairs and rebuilding difficult, if not impossible.

Your Committee further finds that the lessees of Maunaloa Valley have resided there for many decades, and the leases executed under Act 225, Session Laws of Hawaii 1981, as amended by Act 40, Session Laws of Hawaii 1982, are intended to meet a moral obligation to provide long-term stability and land tenure for these families.

Your Committee amended this measure by clarifying that the Department of Land and Natural Resources shall report to the 2008 Legislature regarding any lease transfers made, and by making technical amendments for the purpose of clarity.

It is the intent of your Committee to establish two funds, the Maunaloa Infrastructure Development Special Fund, and the Maunaloa Housing Revolving Fund and to authorize the Department of Land and Natural Resource to transfer leases at Maunaloa, Oahu, to mitigate the damage caused by adverse acts of nature that occurred between January 1 and April 1, 2006.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1644, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1644, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Tokuda).

SCRep. 313 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1716

The purpose of this measure is to authorize the issuance of general obligation bonds to fund the building of a Hawaiian community center facility in Kapolei by the Department of Hawaiian Home Lands (DHHL).

Your Committee received testimony in support of this measure from the Department of Hawaiian Home Lands and the Association of Hawaiian Civic Clubs.

Your Committee finds that this measure will provide for the planning, design, and construction of a new Hawaiian community center that will be available for use by the entire West Oahu community.

Your Committee notes the testimony of DHHL with regard to the Attorney General's concern as to whether DHHL is the appropriate expending agency for the general obligation bonds appropriated in this measure. Your Committee also notes DHHL's concerns regarding assuming debt service and management responsibilities for the community center.

Upon passing this measure out, your Committee requests that the Committee on Ways and Means work with DHHL and the Attorney General to determine whether DHHL is the proper expending agency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1716 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 314 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1221

The purpose of this measure is to achieve the long-term agricultural viability and use of important agricultural lands by creating an incentive for farmers to designate their lands as important agricultural lands.

Specifically, this measure establishes an agricultural business investment tax credit that:

- (1) Creates a nonrefundable tax credit that is equal to one hundred per cent of the aggregate investments made in a qualified agricultural business, including agricultural business investments made by the agricultural business itself;
- (2) Staggers the payment of the tax credit over a five-year period;
- (3) Provides a partial recapture if the investment is withdrawn or sold during that five-year period or if the business no longer qualifies as a qualified agricultural business; and
- (4) Caps the total credit to be generated in a particular tax year at \$2,500,000.

Testimony in support of this measure was submitted by the Agribusiness Development Corporation; the Hawaii Farm Bureau Federation; the Maui County Farm Bureau; the Hawaii Crop Improvement Association; the Land Use Research Foundation; Alexander and Baldwin, Inc.; Hawaiian Commercial and Sugar Company; and Kauai Coffee, Inc. The Department of Taxation submitted comments.

In 2005, the Legislature enacted Act 183, Session Laws of Hawaii 2005, to preserve and protect agricultural lands, promote diversified agriculture, increase agricultural self-sufficiency, and assure the availability of agriculturally suitable lands. Furthermore, the Legislature acknowledged that agricultural viability is a vital component of a diversified agricultural industry, and established a process to identify incentives to encourage farmers and landowners to designate their lands as important agricultural lands. Your Committee finds that establishing a tax credit incentive program for agricultural businesses on important agricultural lands will assist in enhancing the agricultural viability on important agricultural lands.

The Department of Taxation and the Agribusiness Development Corporation indicated and your Committee recognizes that the language in this measure is vague in connection with important agricultural lands. Furthermore, there were many questions raised regarding how the tax credit would be calculated, and how the capped tax credit amount would be applied to the aggregate investments. The Department of Taxation and the Agribusiness Development Corporation also requested further clarification on their roles in providing and monitoring the investment tax credit.

Of particular note, your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of \$50,000,000. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated or whether the stated amount was calculated as a one-time loss or on an annual basis.

Accordingly, your Committee has amended this measure by deleting its contents and inserting language from S.B. No. 1220, which establishes an important agricultural land agricultural business tax credit that creates a nonrefundable tax credit that grants a one hundred per cent credit for qualified agricultural costs incurred in Hawaii during the taxable year. This tax credit is reduced by the amount of funds received by an agricultural business during the taxable year from the irrigation repair and maintenance special fund under section 167-24, Hawaii Revised Statutes.

With respect to S.B. No. 1220, the Department of Taxation also raised concerns in its testimony regarding the definition of "qualified agricultural costs". Furthermore, the Department of Taxation and the Agribusiness Development Corporation requested clarification on their roles in providing and monitoring the tax credit. Thus, your Committee requested that the Hawaii Farm Bureau Federation work with the Department of Taxation to address the Department's concerns and questions.

Of particular note, your Committee received a fiscal impact statement from the Department of Taxation that this measure, if passed, would result in a revenue loss to the State of \$75,000,000. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated or whether the stated amount was calculated as a one-time loss or on an annual basis.

Accordingly, your Committee has further amended this measure by:

- (1) Clarifying the roles of the Agribusiness Development Corporation and the Department of Taxation in determining the types of information that is necessary on an annual basis to enable a quantitative and qualitative assessment of the outcomes of the tax credit;
- (2) Requiring the taxpayer to submit information to the Agribusiness Development Corporation prior to the last day of the taxable year following the close of the taxpayer's taxable year in which qualified costs were expended;
- (3) Requiring that any taxpayer failing to submit information to the Agribusiness Development Corporation will not be eligible to receive the tax credit, and any tax credit already claimed for that taxable year will be recaptured in total and added to the taxpayer's liability for the taxable year in which the recapture occurs;
- (4) Clarifying further the definition for "agricultural business" and "qualified agricultural costs";
- (5) Providing an appropriation for the Department of Taxation and the Agribusiness Development Corporation to cover the costs to administer the important agricultural land agricultural business tax credit; and
- (6) Making technical, nonsubstantive amendments for the purposes of consistency and style.

The Hawaii Farm Bureau Federation indicated and your Committee recognizes that the definition for "qualified agricultural costs" merits further discussion and believes that the dialogue should be continued by the Committee on Economic Development and Taxation and the Committee on Ways and Means.

Your Committee believes that this measure, as amended, fulfills the intent of this measure, which is to achieve the long-term agricultural viability and use of important agricultural lands.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1221, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1221, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Tokuda).

SCRep. 315 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1923

The purpose of this measure is to preserve and protect state lands by requiring legislative approval of any exchange of lands under the control of any state department or agency for private lands.

Specifically, this measure requires that a state department or agency:

- (1) Obtain approval of the Legislature by at least two-thirds majority vote of the members of each house prior to the exchange of land; and
- (2) Submit a concurrent resolution with specific information on the land and the action proposed for introduction to the Legislature for its review prior to the exchange of land.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs. Testimony in opposition to this measure was submitted by the Department of Land and Natural Resources and the Department of Transportation. The Department of Hawaiian Home Lands submitted comments.

Various state departments and agencies are authorized to exchange land under their control for private land. Your Committee finds that although these state departments and agencies have the authority to enter into contracts for the exchange of land, seeking legislative approval prior to exchanging land will ensure that state land will be used and remain for public purposes and benefits.

Your Committee has amended this measure by:

- (1) Deleting the new section under chapter 27, Hawaii Revised Statutes, and inserting a modified version of the new section under chapter 171, Hawaii Revised Statutes, as this chapter relates to public lands; and
- (2) Clarifying the scope of public lands that are subject to the new section under chapter 171, Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1923, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1923, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 316 Ways and Means on H.B. No. 1073

The purpose of this measure is to exclude legislative session employees from membership in the Employees' Retirement System throughout their employment as session employees.

No testimony was submitted.

As affirmed by the record of votes of the members of your Committee on Ways and Means that is attached to this report, your Committee is in accord with the intent and purpose of H.B. No. 1073, and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 5 (Chun Oakland, English, Hooser, Kim, Menor).

SCRep. 317 Education on S.B. No. 14

The purpose of this measure is to enact implementing legislation in compliance with the ratification of the Hawaii State Constitutional Amendment regarding the selection process for the Board of Regents of the University of Hawaii.

Specifically, this measure:

- (1) Establishes the Candidate Advisory Council to screen and propose candidates for appointment to the Board of Regents of the University of Hawaii;
- (2) Increases the membership of the Board of Regents from twelve to fifteen members, requiring a specified number of members to represent different geographic locations;
- (3) Prohibits Board of Regents members from serving more than two consecutive five-year terms;
- (4) Requires the Senate to consider the question of an incumbent member's confirmation for a second term at least one hundred twenty days prior to the conclusion of the member's first term; and
- (5) Allows a Board of Regents member to continue to serve until the member's successor has been appointed and confirmed by the Senate.

Testimony in support of this measure was submitted by the Hawaii Government Employees Association, the Faculty Retirees Association University of Hawaii, and one individual. Testimony in opposition of this measure was submitted by the University of Hawaii and the Association of Governing Boards of Universities and Colleges. Comments on this measure were submitted by the Office of Information Practices.

This measure reflects the Senate's efforts to address the concerns raised by Hawaii's voters, through their approval of a constitutional amendment regarding the composition of the Board of Regents of the University of Hawaii and other related provisions of the law. Through this measure, the Senate endeavors to ensure that the law reflects the spirit of the constitutional amendment that was approved by the people of Hawaii. The public has called for change, and we must see to it that the change is real, meaningful, and productive. The University of Hawaii plays a vital role in the State, the economy, and the larger community that includes Hawaii's Pacific neighbors. Its autonomy and effectiveness deserve every protection the Legislature can offer. These are issues that rise above partisanship, political agendas, and individual interests. They are issues that go to the very heart of the community and the promises the Legislature makes to future generations. Your Committee believes that it has fallen on the Legislature to heed the call of Hawaii's people, to recognize the vital role of the University of Hawaii, and to provide leadership in supporting its autonomy and continued success.

As a result, your Committee finds that during the November 7, 2006, election, the voters ratified an amendment to Article X, Section 6, of the Hawaii State Constitution, which requires the Governor to appoint members to the Board of Regents of the University of Hawaii from pools of qualified candidates presented by the Candidate Advisory Council. This measure establishes the Candidate Advisory Council for the Board of Regents of the University of Hawaii. Your Committee further finds that it was the people's desire that the Governor not be solely responsible for the appointment of members on the Board of Regents, thus, the Governor also should not be solely responsible for appointing a separate body that qualifies and presents candidates for appointment to the Board of Regents.

Your Committee determines that the Candidate Advisory Council should present two to four candidates for each seat on the Board of Regents within a specified number of days of a vacancy occurring. The Governor will then choose one nominee from those presented for possible membership on the Board of Regents, upon advise and consent of the Senate. Members for the Candidate Advisory Council will be appointed by the Governor, the Senate President, the Speaker of the House of Representatives, as well as various other organizations representing constituencies with interests relative to the public university system.

Your Committee believes that although members of the Candidate Advisory Council shall be appointed by these groups, this does not mean that the groups must, although they may, appoint members from their own constituencies. Instead, individuals may be appointed so long as they are individuals who are widely viewed as having placed the broad public interest ahead of special interests, having achieved a high level of prominence in their respective professions, and respected members of the community. Additionally, to allay concerns of executive council or board members of certain constituencies exerting undue influence over appointments, an individual who is or has served within the last five years on the executive council or board for the University of Hawaii Alumni Association or the All Campus Council of Faculty Senate Chairs of the University of Hawaii shall not be eligible for membership on the Candidate Advisory Council. The five-year moratorium will provide necessary distance, but also ensure that an individual is not too far removed from understanding the issues and qualifications necessary for council members. These requirements support the intent behind the composition of the Candidate Advisory Council to ensure that it is comprised of knowledgeable individuals representing diverse interests and concerned parties relative to the University of Hawaii System from throughout the State.

Testimony was provided seeking further detail on the qualifications necessary for candidates to be presented to the Governor for membership on the Board of Regents, which included the following:

- (1) A record of institution building;
- (2) Knowledge of the differences between a business model institution and a service institution;
- (3) Understanding that the principal work of a university is improving the quality of higher education through teaching, research, and public service;
- (4) Understanding of the connection between academic freedom and the constitutional guarantees of the Bill of Rights;
- (5) Commitment to the provisions of the State Constitution limiting their roles to policymaking and not micromanagement; and
- (6) Experience in raising money for endowments and other nonprofit purposes.

Your Committee believes that these are important criteria for qualification for the Board of Regents and believes that the Candidate Advisory Council should consider each criterion as well as any other relevant information in determining if an individual is qualified for service on the Board.

Your Committee also determines that, to ensure adequate representation of the diverse interests from throughout the State, membership on the Board of Regents should be increased and should include a specified number of individuals from each county.

Your Committee believes that expediency is required in implementing the law, as required by the constitutional amendment. Therefore, the Candidate Advisory Council should convene and attend to its duties as expeditiously as possible, including developing selection criteria and the application process for the Board of Regents seats and presenting candidates for existing and upcoming vacancies. Your Committee also believes that provisions should be made for reasonable deadlines for members of the Candidate Advisory Council to be appointed, for the Candidate Advisory Council to convene, and for the Candidate Advisory Council to make necessary presentations of candidates for open seats and seats for members whose terms have expired or will expire in the near future. Additionally, provisions should be instituted to require staggered terms for Board of Regents members and to allow for the presentation of candidates for multiple seats to be addressed in an efficient manner.

Your Committee determines that it is necessary to clarify that it was not the intent of the Legislature in proposing the constitutional amendment that the existing Board of Regents be abolished, but instead that members continue to serve until the appropriate implementing legislation can be enacted. Therefore, current appointments that have or will soon expire will be extended until such time as the Candidate Advisory Council can convene and appointment and confirmation can be accomplished. Finally, due to the increase in membership on the Board of Regents, interim quorum requirements are necessary to allow the Board of Regents to continue to function until full membership is achieved.

Accordingly, your Committee has amended this measure by:

- (1) Including a purpose section that clarifies the intent of the Legislature that existing Board of Regents members serve their full terms of office and, upon expiration of their terms, be replaced by a member from a list of candidates presented by the Candidate Advisory Council;
- (2) Requiring the Candidate Advisory Council, within sixty days of first convening, to make its presentation of candidates for vacant seats;
- (3) Requiring the Candidate Advisory Council to submit a specified number of candidates for filling multiple seats on the Board of Regents;
- (4) Clarifying that appointments to the Candidate Advisory Council by the organizations listed in the measure shall be selected from the general public and may include members of their own constituencies, as long as the appointees satisfy the requirements for appointment provided in the measure; provided that individuals who are or have served as members of the executive councils or boards of the University of Hawaii Alumni Association and the All Campus Council of Faculty Senate Chairs of the University of Hawaii within a five-year period immediately preceding the establishment of or vacancy on the Candidate Advisory Council shall not be eligible for membership on the Candidate Advisory Council;
- (5) Providing that if a Candidate Advisory Council member has not been appointed within one hundred eighty days of the effective date of the measure, the sitting members shall make an interim appointment to fill the vacant seat until the appropriate appointing authority makes an appointment;
- (6) Requiring the Candidate Advisory Council to convene its first meeting after thirty days of the appointment of the members or upon the appointment of a majority of its members if not all of the members have been appointed within thirty days of the effective date of the measure;

- (7) Clarifying that the Candidate Advisory Council meetings shall be exempt from the Sunshine Law, part I of Chapter 92, Hawaii Revised Statutes;
- (8) Clarifying that if the Senate is not in session within one hundred twenty days of the completion of a member's first term, the member may continue to serve until the Senate next convenes in regular session or in a special session during which the Senate is authorized to consider the Board of Regents member's reconfirmation for a second term;
- (9) Increasing the number of members on the Board of Regents representing the county of Oahu from five to seven; and
- (10) Specifying that seven members shall constitute a quorum of the Board of Regents until at least fourteen of the fifteen seats are filled, at which time a majority shall constitute a quorum.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 14, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 14, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 7. Ayes with Reservations, 1 (Gabbard). Noes, none. Excused, none.

SCRep. 318 Economic Development and Taxation on S.B. No. 1882

The purpose of this measure is to establish a food income tax credit in an unspecified amount.

Testimony in support of this measure was received from the Department of Taxation (Department). The Tax Foundation of Hawaii submitted comments.

Your Committee finds that the food tax credit, first adopted in 1987, was cut in half in 1995, and repealed by Act 157, Session Laws of Hawaii 1998, which also established a low-income refundable tax credit.

Your Committee notes that the Department stated in testimony that the estimated revenue loss was indeterminate because the amount of the credit is not specified. However, the Department subsequently submitted an estimated revenue loss of \$30,700,000.

The Department stated that according to the 2004 tax credit data, there were a total of 1,023,724 qualified exemptions, if the credit amount was \$30 multiplied by the number of qualified exemptions, the revenue loss would be \$30,700,000. However, with adjusted gross income restrictions, and tax credits given on a sliding scale, such as the Low-Income Refundable Tax Credit, the revenue loss would be smaller. In 2004, there were a total of 289,944 qualified exemptions for the low-income tax credit, and the total amount of low-income credits claimed for 2004 was \$8,100,000.

In its methodology, the Department noted that the Low-Income Refundable Tax Credit is determined by the taxpayer's Hawaii adjusted gross income: Under \$10,000, a tax credit of \$35 per qualified exemption; \$10,000 to \$15,000, a tax credit of \$25 per qualified exemption; \$15,000 to \$20,000, a tax credit of \$10 per qualified exemption; over \$20,000, a tax credit of \$0. However, minor children, who cannot be claimed as dependents by another taxpayer; and receive more than half their support from public agencies, such as the State Department of Human Services, are eligible for the maximum \$35 tax credit amount.

It is the intent of your Committee to support further discussion of this measure as part of an overall approach to economic legislation designed to improve the sustainability of Hawaii's citizens.

Your Committee has amended this measure accordingly, by inserting an effective date of January 1, 2030, for the purposes of further discussion.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1882, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1882, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 319 (Joint) Intergovernmental and Military Affairs and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1596

The purpose of this measure is to make an appropriation for a grant-in-aid to the County of Hawaii for water source development in Kona, Hawaii.

Your Committees appropriated \$6,000,000 for fiscal year 2007-2008 and the same sum for fiscal year 2008-2009.

Testimony in support of this measure was submitted by the Department of Hawaiian Home Lands; the Department of Business, Economic Development, and Tourism, Hawaii Housing Finance and Development Corporation; and the County of Hawaii.

Your Committees find that there is a need for the development of new water sources and water storage improvements in North Kona, Hawaii. This measure will help ensure that adequate water capacity exists for planned State affordable housing developments in West Hawaii.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1596 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 3 (Fukunaga, Hee, Hemmings).

SCRep. 320 Intergovernmental and Military Affairs on S.B. No. 1598

The purpose of this measure is to appropriate funds to the County of Hawaii for the plans, design, and construction of the Puna recreational complex.

This measure appropriates \$8,000,000 for fiscal year 2007-2008, for a grant-in-aid to the County of Hawaii.

Testimony in support of this measure was submitted by the County of Hawai'i, Department of Parks and Recreation.

Your Committee finds that the Puna district has been the fastest growing district within Hawaii county, yet the level of service relative to public recreational facilities has not been able to keep pace with the increasing demand. Ever increasing home and land values in the State and Hawaii County have transformed the Puna district into one of the last and most attractive affordable real estate markets on the island. The proposed Pahoia recreational complex will include a full gym, ball fields, and numerous other amenities. The complex will be located adjacent to the county's new Pahoia police and fire stations currently under design and is envisioned to be a tremendous asset to the Puna district as a new multi-purpose park. The location of the new site will allow for easy ingress and egress directly on to the Keaau-Pahoia highway, making access to the site safe, quick, and convenient for all of the district's population.

The intent of your Committee is to appropriate funds to the County of Hawaii for the plans, design, and construction of the Puna recreational complex.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1598 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 2. Noes, none. Excused, 1 (Hemmings).

SCRep. 321 (Joint) Intergovernmental and Military Affairs and Education on S.B. No. 1969

The purpose of this measure is to broaden the scope of the law that provides tuition assistance to members of the Hawaii National Guard who are students working toward a degree on any campus in the University of Hawaii system.

This measure appropriates funds in the amount of \$1,000,000 for fiscal year 2007-2008.

Testimony was submitted in support of this measure by the Department of Defense, the University of Hawaii, the Hawaii National Guard Enlisted Association, the National Guard Association of Hawaii Insurance Trust, and two individuals.

Your Committees find that upon returning from deployment, many National Guard members enroll in undergraduate and graduate programs at the University of Hawaii. It is important to provide tuition assistance and support to members of the Hawaii National Guard who seek to further their education at the University of Hawaii. This financial support shows support and commitment to our National Guard members for their continued sacrifice and service to our nation, while simultaneously acting as an important recruitment and retention tool.

Your Committees amended this measure by changing the fiscal year for which the funds are being appropriated and the effective date of the measure from July 1, 2007, to July 1, 2008, in order to allow the University of Hawaii and the Department of Defense adequate time to consider the federal tuition guidelines before the enactment of this measure. This measure was further amended by making technical changes for the purposes of clarity and style.

The intent of your Committees is to provide tuition assistance and support to members of the Hawaii National Guard who seek to further their education at the University of Hawaii.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1969, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1969, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 2 (Hee, Hemmings).

SCRep. 322 Economic Development and Taxation on S.B. No. 216

The purpose of this measure is to amend the definition of "cost" with regard to the capital goods excise tax credit, by:

- (1) Deleting the actual invoice price of the tangible personal property from the definition; and
- (2) Clarifying that the basis for the depreciation was subject to tax at the rate of four per cent under chapter 237 or 238, Hawaii Revised Statutes.

The Department of Taxation (Department) submitted comments.

Your Committee received a revenue impact statement from the Department that stated canned software would be considered capital goods. Using this as an example, the Department estimated the revenue loss on this item alone would be between \$1,000,000 and \$2,000,000. However, it is unclear whether the revenue loss was calculated on an annual basis.

Your Committee then asked the Department if installation, such as for large computer systems, would be included with the actual cost of the equipment in the capital goods credit. The Department responded that an assumption might be made that installation would be twenty-five per cent of the cost, raising the total revenue impact to \$1,250,000 to \$2,500,000, but providing no further information.

Your Committee believes that installation costs may be included under federal law, and finds this warrants further discussion as additional information is received.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 216 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 323 Economic Development and Taxation on S.B. No. 1493

The purpose of this measure is to raise the Hawaii standard deduction to seventy-five per cent of the 2005 federal standard deduction.

Testimony in support of this measure was received from the Office of the Governor and the Department of Taxation. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that in 2006, the Hawaii standard deduction was raised from approximately twenty per cent of the federal standard deduction to forty per cent, the first increase since 1989. Your Committee further finds that each Tax Review Commission since 1985 has recommended raising the Hawaii standard deduction.

Your Committee received a revenue impact statement from the Department of Taxation that the estimated revenue loss from this measure is \$30,000,000 per fiscal year.

In its methodology, the Department stated that the estimated annual revenue loss is based on the 2004 individual returns, but did not provide any additional information.

Your Committee is in strong support of tax relief for Hawaii's citizens and it is the intent of your Committee to continue the discussion in the Legislature of how best to do so.

Your Committee has amended this measure for the purposes of further review and discussion, by:

- (1) Replacing the proposed revised standard deductions with unspecified amounts; and
- (2) Inserting an effective date of July 1, 2025.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1493, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1493, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 324 Education on S.B. No. 21

The purpose of this measure is to appropriate funds for the planning, design, and construction of a second access road to serve the Leeward Community College (LCC).

Your Committee received testimony in support of this measure from the University of Hawai'i System.

Your Committee finds that the LCC campus also serves as a temporary site for the University of Hawaii West Oahu campus and is presently serviced by one access road. This access road also serves a private townhouse development. Your Committee finds that this single access road limits access to the campus, causes traffic congestion, and could cause problems in the event of an emergency.

The "Second Access Road" project at LCC, is a part of the campus' long-range development plan, that was initially identified for construction in the 1966 master plan. Your Committee also finds that the project should have been completed by 1971, when the campus became fully operational. A capital improvements project appropriation was made in 2002, but the project was never completed.

Your Committee believes that the completion of the second access road for the LCC campus is necessary to provide for the transportation needs of the LCC campus and the surrounding community.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 21 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 325 Education on S.B. No. 24

The purpose of this measure is to improve higher education in Hawaii by authorizing the issuance of general obligation bonds for design, construction, and equipment costs associated with providing temporary facilities for the University of Hawaii-West Oahu.

Testimony in support of this measure was submitted by the University of Hawaii and one individual.

Your Committee finds that although the planned development of the University of Hawaii, West Oahu (UHWO) campus in Kapolei is anticipated to begin in the near future, the UHWO campus must continue to serve the needs of existing and incoming students until the new campus' completion. The UHWO campus has been housed at Leeward Community College, but the facilities are inadequate to satisfy the current demands of the school. This measure will provide necessary funding for temporary facilities to meet the needs of the faculty, staff, and students until the new UHWO campus is completed.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 24 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 326 Education on S.B. No. 682

The purpose of this measure is to appropriate funds to the University of Hawaii for the establishment of a college preparatory online academy.

Testimony in support of this measure was received from the Department of Education and the University of Hawai'i at Manoa.

Your Committee finds that this measure will increase the opportunities for highly capable secondary students to take enriched, accelerated, college preparatory, or college level classes and enable them to meet the requirements of college and career entry.

Your Committee has amended this measure to specify that the University of Hawaii will work in full partnership with the Department of Education to establish a college preparatory online academy. Your Committee also amended this measure to make technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 682, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 682, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 327 Education on S.B. No. 1129

The purpose of this measure is to repeal the transfer of Public Health Nurses and School Health Aides from the Department of Health to the Department of Education.

Testimony in support of this measure was submitted by the Hawaii Government Employees Association, HGEA/AFSCME, Local 152, AFL-CIO. Testimony in opposition of this measure was submitted by the Department of Education and the Department of Health.

Your Committee finds that pursuant to Act 51, Session Laws of Hawaii 2004, as amended, the Department of Education was established as a separate jurisdiction of the State. As a result, the transfer of authority and personnel was accomplished as well. Included in the transfer under Act 51, as amended, are Public Health Nurse and School Health Aide positions from the Department of Health to the Department of Education, to be effective July 1, 2007. Your Committee understands that their transfer was intended to provide a coordinated school health services program within the Department of Education; however, concerns have arisen regarding the security of existing Public Health Nurse and School Health Aide positions within the Department of Education.

Under the weighted student formula, it is unclear as to whether existing Public Health Nurse and School Health Aide positions will survive. Your Committee finds that these employees are concerned for their livelihood and the situation does not reveal what will ultimately happen to each of these employees. However, representations have been made that the Interagency Working Group, created under Act 51, as amended, has been working toward the effective and efficient transfer of School Health Aides and Public Health Nurses to the Department of Education. Therefore, your Committee determines that this measure should continue to progress through the session, should it be necessary, as the Interagency Working Group continues to develop its plan for the smooth transition of positions from the Department of Health to the Department of Education.

Accordingly, your Committee has amended this measure by:

- (1) Changing its effective date to July 1, 2050; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1129, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1129, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Tokuda).

SCRep. 328 Education on S.B. No. 616

The purpose of this measure is to make an appropriation out of the general obligation bond fund of the State for planning and construction of the University of Hawaii (UH) West Oahu campus.

This measure also requires the UH to establish a teacher education program capable of annually graduating a minimum of three hundred teachers by not later than 2014.

Your Committee received testimony in support of this measure from the UH System, D R Horton Schuler Division, and two individuals. Comments were received from the Manoa Faculty Senate and one individual.

Your Committee finds that the time has come to provide the capital improvement funding for the UH's West Oahu campus. In order to expedite the planning, design, and construction of the campus, this measure appropriates the full amount requested by the university for the new campus.

Your Committee further finds that one of the most critical needs of the State of Hawaii is the capacity to train new teachers. Therefore, this measure requires the university to not only plan and construct its new West Oahu facilities, but to also expand its teacher education capacity by setting, as a goal, the creation of a West Oahu teacher education program so that, by year 2014, West Oahu will have the facilities, faculty, and other resources to graduate a minimum of three hundred future teachers on an annual basis.

Your Committee has amended this measure by deleting the amount specified in the appropriation and adding a provision that prevents the lapsing of the appropriation until June 30, 2010.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 616, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 616, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Ayes with Reservations, 1 (Taniguchi). Noes, none. Excused, none.

SCRep. 329 Education on S.B. No. 1168

The purpose of this measure is to require the Department of Education to adopt rules to prohibit school bullying and cyberbullying and to appropriate funds to the Department of Education to implement anti-bullying programs in the public schools.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association, Hawaii Youth Helping Youth, and one individual. The Department of Education submitted testimony in opposition to this measure.

Your Committee finds that bullying and cyberbullying is an increasing problem in our schools and can have detrimental effects on students. Your Committee also notes that the Board of Education has made representations in the past that it is going to implement a policy on bullying and cyberbullying, and therefore discussion on this issue should continue.

Your Committee has amended this measure to amend the effective date to encourage the Board of Education to take action on creating a policy for schools regarding bullying and cyberbullying, and to provide funding, if necessary. Your Committee has also amended this measure to make technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1168, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1168, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 330 Education on S.B. No. 1256

The purpose of this measure is to authorize the issuance of general obligation bonds and to make an appropriation for a new student services building at the University of Hawaii (UH) at Hilo.

Your Committee received testimony in support of this measure from the University of Hawai'i System and University of Hawai'i at Hilo Student Association 2006-2007.

Your Committee finds that the UH at Hilo is in desperate need of a new student services building. The programs to be housed in a new student services building are critical to the academic and personal success of students, including services in counseling, academic advising, financial aid, admissions, tutoring, career services, disabled student programs, women's programs, registrar, and business office. These services are currently dispersed throughout the campus. The current student services building is overcrowded with three or four counselors and advisors sharing offices. The essential confidentiality of communications for these sensitive services is lacking.

Bringing together similar services under one building is economical and efficient. Most other institutions of higher education have all student services under one roof. The quality of the student services building could indirectly affect accreditation of the facility.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1256 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 331 Education on S.B. No. 1267

The purpose of this measure is to appropriate an unspecified amount for the purchase of mathematics textbooks and other mathematics learning materials; professional development for teachers of mathematics and mathematics coaching; and for the use of assessments to provide appropriate mathematics interventions for individual students.

The Department of Education and the Hawaii State Teachers Association submitted testimony in support of this measure.

Your Committee finds that school complexes need textbooks and instructional materials that enable students to achieve proficiency in the Hawaii Content and Performance Standards III Mathematics Benchmarks. In addition, professional development is critical in teaching teachers how instruction in a standards-based classroom is different from instruction in the traditional classroom. Through professional learning opportunities, teachers can learn to be more effective in using formative assessments and data to personalize instruction and interventions for individual students.

It is your Committee's intent to support an appropriation for mathematics coaches and their training, as well. Your Committee has amended this measure by:

- (1) Adding mathematics coaches and their training to the purposes of the unspecified appropriation; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1267, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1267, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Tokuda).

SCRep. 332 Education on S.B. No. 1698

The purpose of this measure is to appropriate funds to the Department of Education to provide two portable rooms for the Manoa Public Library to accommodate the community and students for the library's two-year closure.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Public Library System, Friends of Manoa Library, and five individuals.

Your Committee finds that Manoa Public Library provides much needed resources to the community and its temporary closure may cause hardship to the neighborhood, including the students of Noelani Elementary School. The funds appropriated in this measure will compensate for the two-year closure by providing portable buildings to be used by the Manoa Public Library to continue its services.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1698 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Tokuda).

SCRep. 333 Education on S.B. No. 1858

The purpose of this measure is to appropriate funds to establish twenty additional permanent athletic health care trainer positions in the public schools.

This measure also appropriates funds for a part-time athletic director at Anuenue School and appropriates funds for equipment, supplies, and transportation for school athletic programs.

Your Committee received testimony in support of this measure from the Department of Education, the Department of Health, the Athletic Directors and Coaches Association, the Hawaii Government Employees Association, and one individual.

Your Committee finds as the number of athletes and sports programs has grown significantly over the years, additional athletic health care trainer positions, an athletic director at Anuenue School, and funding for equipment, supplies, and transportation are warranted. This measure will assist the State in meeting the needs of the athletic programs in the public schools.

Your Committee has amended this measure by changing the request for funding for a part-time athletic director at Anuenue School to funding for a full-time athletic director.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1858, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1858, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Tokuda).

SCRep. 334 Education on S.B. No. 1994

The purpose of this measure is to make an appropriation for capital improvement projects for the Campus Center building at the University of Hawai'i at Manoa.

Testimony in support of this measure was submitted by the University of Hawai'i at Manoa, the Associated Students of the University of Hawaii at Mānoa, and the University of Hawaii at Manoa Campus Center Board.

Your Committee finds that as campus enrollment has increased steadily over the years, the University of Hawaii at Manoa Campus Center is in need of renovations and expansion. The plans for the Campus Center expansion have received overwhelming support and approval from the students and the University of Hawaii at Manoa.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1994 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 335 (Joint) Tourism and Government Operations and Intergovernmental and Military Affairs on S.B. No. 1249

The purpose of this measure is to create a new category of liquor license for condominium hotels.

Your Committees received testimony in support of this measure from the Hawai'i Hotel & Lodging Association, Outrigger Hotels & Resorts, and the four county liquor commissions. Comments were received from the State Attorney General.

Your Committees find that the advent of the condominium hotel ownership and operating structure is a relatively new concept that has recently been gaining in popularity in the State. While many former hotel operations have converted to a condominium hotel ownership and operating structure, this new structure has created an interpretation and application problem with respect to liquor licensing laws. Specifically, the restrictive nature of the definition of "premises" contained in the existing Class 12 hotel liquor licensing requirements would require that a licensed liquor establishment be situated and operated on the hotel portion, not the condominium portion, of the condominium hotel. Such a restrictive interpretation could lead to the inconsistent application and enforcement of liquor licensing laws when trying to fit condominium hotels into the existing liquor licensing framework for hotels.

Your Committees believe that creating a new liquor licensing category to specifically address the unique ownership and operational structure of condominium hotels would promote the consistent interpretation and application of liquor licensing laws. Your Committees also believe that the establishment of a separate category for condominium hotel liquor licenses is necessary to provide adequate guidance to county liquor commissioners to ensure that the liquor licensing laws that govern the sale of liquor on such premises are uniformly interpreted and applied throughout a respective county's jurisdiction.

Your Committees have amended this measure by making technical, nonsubstantive amendments for clarity and style.

As affirmed by the records of votes of the members of your Committees on Tourism and Government Operations and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1249, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1249, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 1 (Hemmings).

SCRep. 336 (Joint) Tourism and Government Operations and Economic Development and Taxation on S.B. No. 689

The purpose of this Act is to appropriate moneys to plan, design, and construct phase 2 of the Pacific Aviation Museum at Pearl Harbor's facilities.

Your Committees received testimony in support of this measure from the Pacific Aviation Museum and The Chamber of Commerce of Hawaii.

The Pacific Aviation Museum is in the process of developing a portion of Ford Island into a world class aviation museum that will honor the patriotism, valor, and sacrifice made by aviators and their ground support personnel in the defense of freedom in the Pacific. The new museum includes exhibits depicting World War II, the Korean War, the Cold War, the Vietnam Conflict, and current American air power. It will feature diorama exhibits, period and reproduction aircraft, an aviation education center, a flight simulation center, a theater, a museum store, a food service area, and a library.

The museum opened to the public on December 7, 2006, after a construction phase of approximately nine months. The museum has been widely acclaimed as an excellent addition to the USS Arizona, USS Missouri, and USS Bowfin memorials.

Your Committees find that additional state funds are necessary to provide the foundation for phase 2 of the museum to be housed in hangar 79 on Ford Island. Phase 2 development will include the planning, designing, and construction to improve and restore hangar 79, which comprises 85,000 square feet. The current cost to complete phase 2 is estimated at \$33,000,000. Phase 2 exhibits will encompass the remaining campaigns of World War II, together with an introduction to the Korean War and the Vietnam Conflict. The museum will complete its fundraising in Hawaii

over the next six months and will then launch a national campaign to fund the balance of phase 2. Your Committees find that the State's ongoing support is extremely important in demonstrating to potential mainland funding sources the State's strong backing of the expanded museum.

To date, the museum has raised \$13,200,000 in federal, state, and private funds for phase 1, and \$1,800,000 for phase 2. The 2004 Legislature appropriated a \$1,000,000 grant-in-aid for phase 1 of the museum and the 2006 Legislature appropriated \$500,000 of a requested \$2,000,000 for phase 2 of the museum. The funding was administered by the Hawaii Tourism Authority.

The intent of this measure is to preserve aviation history and honor those who fought for our freedom.

Your Committees have amended this measure by deleting the specific appropriated amount and by making a technical, nonsubstantive amendment for the purpose of clarity.

As affirmed by the records of votes of the members of your Committees on Tourism and Government Operations and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 689, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 689, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (English, Tsutsui).

SCRep. 337 Tourism and Government Operations on S.B. No. 1929

The purpose of this measure is to allow the Chief Procurement Officer (CPO) to assess administrative fines for noncompliance with the Hawaii Public Procurement Code.

Your Committee received testimony in support of this measure from the State Procurement Office (SPO). Comments were received from the Department of Accounting and General Services (DAGS).

Your Committee finds that existing law is lacking in a provision for the assessment of administrative fines for noncompliance with procurement laws. While criminal sanctions exist that apply to providers of service and vendors of goods, such as termination of the contract, re-bid, debarment, and suspension, there are no administrative sanctions for anyone whose actions may not warrant criminal prosecution.

On the recommendation of the CPO, your Committee has amended this measure by deleting its contents and inserting an amendment to the penalties provision of the Hawaii public procurement code, and to make a conforming statutory amendment.

Your Committee notes the concerns of the DAGS to the effect that an appropriation for additional staff and consulting services is necessary to implement this measure and that public hearings are also necessary to adopt the rules required to effectuate this measure. While these concerns are noted, your Committee does not believe that any additional funding is necessary since this measure, as amended, keeps costs to a minimum. Your Committee believes that the adoption of administrative rules should not be difficult for DAGS, which has much experience in rule making. Nor does your Committee believe that revisions to other chapters of the Hawaii Revised Statutes are necessary since the violations are confined to the provisions of the procurement code.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1929, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1929, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, none.

SCRep. 338 Tourism and Government Operations on S.B. No. 1930

The purpose of this measure is to establish commissions to review state government operations.

Your Committee received testimony in support of this measure from the Hawaii Government Employees Association. Testimony in opposition was received from the Department of Budget and Finance. Comments were received from the Office of Information Practices.

The commissions to review state government operations are similar to those proposed in the federal Government Efficiency Act of 2006, which authorizes the establishment of federal review commissions with respect to specific aspects of federal programs and agencies. The state commissions would review state government operations to make recommendations on how to improve the operations, effectiveness, and efficiency of state programs and agencies in order to determine whether a reorganization, consolidation, abolishment, expansion, or transfer of functions of existing state programs and agencies are necessary to promote more effective management of the executive branch.

A commission could be established whenever deemed appropriate by executive order of the Governor or by concurrent resolution of the Legislature. A commission would be under the Auditor for administrative purposes, but would be independent of the Auditor, the legislative, the judiciary, and the executive branches of government. A commission would review the operations of a specified state government department, agency, or program as identified in the executive order or concurrent resolution. A commission would report findings and recommendations to the Governor and the Legislature within nine months from the issuance of an executive order or adoption of a concurrent resolution.

Your Committee finds that periodic review of a state government department, agency, or program to assess the efficiency and effectiveness of operations is warranted. Although the Auditor conducts operational and managerial reviews of departments, agencies, and programs, as requested by the Legislature, your Committee believes that a permanent mechanism should be in place to conduct the reviews on an ongoing basis to ensure that public funds are being expended properly and the public trust in government is maintained.

Your Committee has amended this measure by:

- (1) Adding a representative of a government employee organization to the membership of a commission; and
- (2) Requiring a commission to hold public meetings and public hearings pursuant to chapter 92, Hawaii Revised Statutes, relating to open meetings.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1930, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1930, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 339 Economic Development and Taxation on S.B. No. 1934

The purpose of this measure is to require the Department of Taxation to allow an individual taxpayer to request that the taxpayer's refund be electronically deposited into more than one account at financial institutions.

Testimony in support of this measure was received from The Hawai'i Alliance for Community Based Economic Development, 3Point, and one individual. The Department of Taxation submitted testimony in opposition. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that for many people, particularly lower income taxpayers, a tax refund is the only substantial amount of "discretionary" income they may receive in a year. Your Committee has heard of individuals who use the tax refund to pay down debt, access a mortgage assistance program, and make tuition payments – expenses that would not be "affordable" otherwise.

Your Committee has also heard that income splitting is a standard asset management tool for the wealthy, allowing a person to split assets into separate pools for spending and for saving. This measure would provide a similar opportunity for a Hawaii taxpayer – no matter what the income level – to split the financial asset that the tax refund represents. Doing so by electronic deposit into separate financial accounts ensures that the refund is more likely to be reserved for extraordinary expenses.

Your Committee notes that both the federal government and California allow an individual's tax refund to be electronically deposited in more than one financial account.

It is the intent of your Committee to provide Hawaii residents with refund splitting options comparable to that provided by the federal government, which allows the refund to be split into a maximum of three accounts.

Your Committee has amended this measure by allowing a taxpayer to designate up to three accounts at financial institutions for direct deposit of the taxpayer's refund.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1934, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1934, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 340 Judiciary and Labor on S.B. No. 1526

The purpose of this measure is to statutorily provide a mechanism to raise the salaries of the administrative director and the deputy administrative director of the Judiciary since these salaries are not reviewable by the Salary Commission created by the Constitutional Amendment approved by the voters of Hawai'i in November, 2006.

Your Committee heard testimony from the State Judiciary in favor of the bill which sets the salary of the Administrative Director at 89% of the Chief Justice's salary and the Deputy Administrator Director at 95% of the Administrative Director.

Your Committee amended the bill to set the Administrative Director's salary at 80% of the Chief Justice's salary.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1526, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1526, S.D. 1 and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 341 Judiciary and Labor on S.B. No. 1068

The purpose of this measure is to add a new comprehensive public funding program for candidates for the State House of Representatives in addition to existing partial public financing.

Your Committee received testimony in support of this measure from Hawaii Clean Elections, the League of Women Voters, Kokua Council, Life of the Land, and numerous concerned individuals. The Campaign Spending Commission (Commission) did not support the bill as drafted. The Department of Budget and Finance opposed \$2.5 million annual appropriations to the Hawaii Election Campaign Fund from the Unclaimed Property Trust Fund.

The bill as received adds to chapter 11, Hawaii Revised Statutes, a new subpart entitled Comprehensive Public Funding for Elections to the House of Representatives, and amends other sections in chapter 11 to reflect the changes.

Your Committee has concerns regarding the source of funds. The Department of Budget and Finance testified that funds in the Unclaimed Property Trust Fund belong to individual citizens and businesses, and should not be used for purposes other than paying claims to their rightful owners.

The Commission's written testimony lists the balance of the Hawaii Election Campaign Fund as of December 31, 2006 as \$5,567,712.09. In oral testimony, the Commission's Executive Director stated that if current law were amended to increase matching funds available to a state representative candidate from ten to fifty per cent, it appears the Hawaii Election Campaign Fund would have sufficient resources to provide matching funds to one state representative candidate per seat in the 2008 election. The Executive Director could not predict how many candidates would apply, but current law allows the Commission to cease paying matching funds if the payment would deplete the Hawaii Election Campaign Fund.

To keep discussion of this proposal moving forward, your Committee has amended this measure by deleting its contents and inserting sections 7 and 10 of S.B. No. 1549, a Bill for an Act Relating to Campaign Spending, pertaining to partial public funding, modified to change that bill's proposed increase in matching funds available to a candidate for state representative from fourteen to fifty percent of the expenditure limit. This bill, as amended:

- (1) Amends section 11-209(a), Hawaii Revised Statutes, to:

- (a) Reinstate language that was deleted by Act 203, Session Laws of Hawaii 2005, to allow candidates for the office of prosecuting attorney to qualify for partial public financing; and
 - (b) Increase expenditure limits for candidates who voluntarily agree to limit their campaign expenditures, including candidates for the office of prosecuting attorney; and
- (2) Amends section 11-218, Hawaii Revised Statutes, to:
- (a) Increase matching funds available to a candidate for the office of the governor, lieutenant governor, or mayor from ten percent to fourteen percent of the expenditure limit;
 - (b) Increase matching funds available to a candidate for the office of state senator, county council, or prosecuting attorney from ten percent to fourteen percent of the expenditure limit; and
 - (c) Increase matching funds available to a candidate for state representative from ten percent to fifty per cent of the expenditure limit.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1068, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1068, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 342 Judiciary and Labor on S.B. No. 1518

The purpose of this measure is to increase fees for court-appointed counsel and guardian ad litem in family court cases and to require the Judiciary to provide the Department of Budget and Finance with fee related information so that the department can approve the necessary vouchers.

Your Committee received testimony from the Family Court in support of the bill. Your Committee also received testimony from the Department of Budget and Finance who took no position on the fees but opposed the transfer of payment and budget functions to Budget and Finance. The Family Court testified that they were aware of Budget and Finance's opposition to section (c) of the bill but had not been able to meet with the Department of Budget and Finance to resolve this problem. She agreed with the committee that section (c) remain in the bill.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1518 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 343 Judiciary and Labor on S.B. No. 1231

The purpose of this measure is to appropriate funds as a grant-in-aid to continue the operations of the Weed and Seed Program in the federally designated communities of Kalihi, Waipahu, and Ewa Beach on Oahu, and authorize the Attorney General to by the expending agency through a contract with the YMCA of Honolulu.

Your Committee received testimonies from the Attorney General's Office and 15 private individuals in support of this bill. Your Committee was informed of the successful efforts made by law enforcement agencies, community members, businesses, non-profit organizations, and community groups in combating crime and drug use.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1231 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 344 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1650

The purpose of this measure is to require the filing of a certificate of merit with any complaint filed against a design professional for the failure to meet the standard of care. This measure also requires the filing of a preliminary expert opinion affidavit.

Testimony in support of this measure was received from ECS, Inc.; the Coalition of Hawaii Engineering and Architectural Professionals; Sam O. Hirota, Inc.; Fukunaga & Associates, Inc.; Engineering Concepts, Inc.; Masa Fujioka & Associates; KAI Hawaii, Inc.; Consulting Structural Hawaii, Inc.; Gray, Hong, Nojima & Associates, Inc.; and the American Council of Engineering Companies. Testimony in opposition to this measure was submitted by the Department of Accounting and General Services and the Consumer Lawyers of Hawaii.

Your Committee finds that the intent of this measure is to reduce the number of frivolous lawsuits against design professionals by requiring a plaintiff or their attorney to hire a qualified professional to certify that the case being brought has merit and that there is evidence of errors, omissions, or negligence on the part of the defendant. Your Committee notes, based upon some of the testimony received, that several other jurisdictions have adopted similar requirements.

Your Committee has amended this measure to change the effective date from upon approval to July 1, 2050, to promote further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1650, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1650, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ihara).

SCRep. 345 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1392

The purpose of this measure is to authorize enhanced civil and administrative penalties for securities violations, when the violations are directed toward, target, or are committed against seniors who are sixty-two years of age and older.

This measure authorizes civil and administrative penalties of up to \$50,000 for each violation.

Testimony in support of this measure was submitted by the Department of Commerce and Consumer Affairs, the Department of the Attorney General, and AARP Hawaii. The National Association of Insurance and Financial Advisors submitted testimony in opposition to this measure.

Your Committee finds that investment fraud against seniors is a growing concern in Hawaii, as demonstrated in a recent statewide survey conducted by AARP Hawaii. This measure is directly responsive to these concerns, as it allows for greater civil and administrative penalties for violations of the State's securities laws when the violations are directed towards, target, or are committed against seniors. This measure will allow the State to be proactive in deterring investment fraud against seniors.

Your Committee has amended this measure, based upon an agreement between the Department of Commerce and Consumer Affairs and other interested parties, to provide a limited exception from the enhanced penalty provisions for registered dealers and registered broker-dealers that commit only supervisory infractions.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1392, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1392, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ihara).

SCRep. 346 Judiciary and Labor on S.B. No. 156

The purpose of this measure is to authorize a vote-by-mail system as the exclusive means for casting ballots for all federal, state and county elections, if authorized by the Chief Elections Officer.

Your Committee received testimony in support of this measure from the League of Women Voters of Hawaii and two concerned individuals. The Office of Elections and the County Clerk of the County of Kaua'i commented on this measure.

Your Committee finds that voting by mail has the potential to enhance public participation in elections. As noted in the Office of Elections testimony, absentee mail voting provides voters "a means to 'fit' voting into their busy lifestyles" and "the opportunity to fully deliberate on the votes they will cast, and the convenience of being able to consult with information on candidates and ballot questions in familiar and comfortable settings."

Your Committee notes that operational concerns raised by elections officials may need to be addressed as this measure moves through the legislative process. Your Committee has amended this measure by:

- (1) Adding "used in an election by mail" to the definition of ballot in new section -3 to conform to the definition of "absentee ballot" in section 15-1, Hawaii Revised Statutes;
- (2) Providing that the return envelope to be mailed to registered voters is to include a statement to be subscribed to by the voter, instructions relating to the ballot's validity, and other information as required by rule, to follow existing requirements for absentee voting under section 15-6, Hawaii Revised Statutes;
- (3) Inserting language requiring the county clerk to mail ballot packages no later than an unspecified number of days prior to the election (the precise number to be determined as this measure moves through the legislative process); and
- (4) Making additional technical, nonsubstantive changes for clarity and style.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 156, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 156, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 347 Commerce, Consumer Protection and Affordable Housing on S.B. No. 990

The purpose of this measure is to appropriate \$300,000 for each year of the 2007-2009 fiscal biennium to be deposited into the Petroleum Industry Monitoring, Analysis, and Reporting Special Fund, to promote petroleum product pricing transparency.

Your Committee received testimony in support of this measure from one individual. The Public Utilities Commission and the Western States Petroleum Association submitted comments on this measure.

Your Committee finds that Act 78, Session Laws of Hawaii 2006 (Act 78), requires the Public Utilities Commission to establish the Petroleum Industry Monitoring, Analysis, and Reporting Program. In addition, Act 78 created the Industry Monitoring, Analysis, and Reporting Special Fund.

The intent of this measure is to provide consumers with true and effective transparency of the petroleum industry by appropriating funds to the Industry Monitoring, Analysis, and Reporting Special Fund.

Your Committee has amended this measure by deleting the specific amounts appropriated to promote further discussion, by changing the effective date to July 1, 2007, to conform with the fiscal calendar, and by adding a section to clarify and strengthen the Public Utilities Commission's powers with regard to the monitoring, evaluation, or investigation of the petroleum industry so that the Public Utilities Commission will have the funds and authority necessary to accomplish its statutory duties.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 990, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 990, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 348 Commerce, Consumer Protection and Affordable Housing on S.B. No. 823

The purpose of this measure is to authorize the issuance of special purpose revenue bonds to build infrastructure for low- and moderate-income housing projects.

Testimony in support of this measure was received from the National Alliance on Mental Illness-O'ahu and the Hawaii Association of Realtors.

Your Committee finds that this measure is one mechanism that will assist in increasing the supply of affordable housing for low- and moderate-income families. This measure specifically adds the infrastructure of a low- and moderate-income housing projects to the types of projects for which the use of special purpose revenue bonds is allowed under part IX, chapter 39A, Hawaii Revised Statutes.

Your Committee has amended this measure to change the effective date to July 1, 2050, to encourage further discussion on this issue.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 823, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 823, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 1 (Ihara).

SCRep. 349 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1837

The purpose of this measure is to create a condominium commission to ensure a smooth transition into the provisions of chapter 514B, Hawaii Revised Statutes (HRS), and generally implement and enforce policies relating to condominiums in the State.

This measure also clarifies various provisions of the condominium law.

Testimony in support of this measure was submitted by the Hawaii Council of Associations of Apartment Owners, Hawaii Independent Condominium & Cooperative Owners, Friends of Waikiki Banyan, and nine individuals. The Real Estate Commission, the Hawaii Chapter of the Community Associations Institute, and one individual submitted testimony in opposition to this measure.

Your Committee finds that the number of people living in condominiums in Hawaii has grown tremendously over the years and this measure seeks to address important issues facing condominium owners and to provide clarity in the current law. Specifically, this measure seeks to address these issues by creating a condominium commission, by giving the board of directors of a condominium association the authority to change or cancel management agreements, by clarifying who is considered a "unit-owner" for purposes of being a board member, by clarifying that payment for assisted living services are only charged against owners who actually receive those services, and by re-enforcing the rights of owners to participate in board meetings.

Your Committee has amended this measure by:

- (1) Removing the creation of the condominium commission, as this requires a sunrise analysis by the State Auditor;
- (2) Removing language requiring that changes made with regard to the use of condominium property regimes under section 541B, HRS, also apply to condominiums under chapter 514A, HRS;
- (3) Removing language stating that limiting member participation in board meetings based upon concerns that it will extend the time of the meeting does not constitute "good cause" for limiting member participation;
- (4) Removing the appropriation to the condominium commission; and
- (5) Changing the effective date to July 1, 2050, to encourage further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1837, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1837, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ihara).

SCRep. 350 (Majority) Commerce, Consumer Protection and Affordable Housing on S.B. No. 1103

The purpose of this measure is to appropriate funds to allow Kukui Gardens to remain an affordable housing development.

Your Committee received testimony in support of this measure from the Hawaii Housing Finance and Development Corporation and the Housing Committee of Faith Action for Community Equity.

Your Committee finds that this measure will assist in maintaining the long-term use of Kukui Gardens as affordable rentals by appropriating funds to cover any financial gap the State may have in utilizing other means of preserving Kukui Gardens, such as tax credits and other sources of funding. Your Committee recognizes the housing crisis that the State is currently facing and this measure will serve as one mechanism in attempting to mitigate this crisis.

Your Committee has amended this measure by clarifying that the funds being appropriated are for the purpose of purchasing real property. Your Committee also amended this measure to change the effective date to July 1, 2050, to promote further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1103, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1103, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, 1 (Ihara).

SCRep. 351 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1848

The purpose of this measure is to allow the Department of Commerce and Consumer Affairs to provide additional funding to support public, educational, and governmental cable television access.

Specifically, this measure authorizes the Director of Commerce and Consumer Affairs to use funds in the Compliance Resolution Fund for the purpose of supporting public, educational, and governmental access facilities, equipment, and operations pursuant to the standards and conditions adopted in accordance with section 440G-15, Hawaii Revised Statutes.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs.

Your Committee finds that there is strong public interest in public, educational, and governmental access television. By making public, educational, and governmental access television available, the State assists in providing a forum for free expression for the people of Hawaii.

Your Committee has amended this measure, upon the recommendation of the Department of Commerce and Consumer Affairs, to:

- (1) Earmark the additional funds for public, educational, and governmental access facilities, equipment, and operations in underserved areas; and
- (2) Clarify that the use of funds from the Compliance Resolution Fund for public, educational, and governmental access facilities, equipment, and operations shall only be allowed if there are available funds over and above the funds needed for the operation of the Department of Commerce and Consumer Affairs' cable television administration.

The intent of this measure, as amended, is to provide additional funding for public, educational, and governmental access facilities, equipment, and operations in areas such as the neighbor islands, which are underserved by the current public, educational, and governmental access system.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1848, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1848, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ihara).

SCRep. 352 Economic Development and Taxation on S.B. No. 331

The purpose of this measure is to continue state and private efforts to protect a person's vital information from identity theft by:

- (1) Prohibiting all governmental agencies of the State and county from displaying an individual's social security number contained in any record or document available for public inspection that is collected, created, or maintained by an agency; and
- (2) Appropriating funds to the Office of the Auditor for research and support services necessary to develop additional deterrents for identity theft, and in particular, those related to the compromise of electronic data and information.

Testimony in support of this measure was received from the Hawaii Financial Services Association. The Judiciary, Department of Land and Natural Resources, City and County of Honolulu, and Retail Merchants of Hawaii submitted testimony expressing concerns. The Consumer Data Industry Association opposed the bill. The Office of Information Practices submitted comments.

Your Committee finds that protecting electronic data and information from unauthorized use or disclosure is supported by all concerned.

Reservations about this measure are focused on section 2 of this measure, which would prohibit all state and county governmental agencies from displaying an individual's social security number contained in any record or document available for public inspection that is collected, created, or maintained by an agency.

In addition to the broad scope of the prohibition, several testifiers expressed concern at the implementation date of January 1, 2008. Act 137, Session Laws of Hawaii 2006, imposed restrictions on business and government to ensure the protection of social security numbers, effective July 1, 2007. The private sector is working toward meeting these requirements, but noted it is an enormous undertaking, and businesses that do not comply are subject to civil action, while governmental agencies are not.

Your Committee would also like to point out that while this measure was distributed to the Identity Theft Task Force, its members have not taken a position on the language in question. The next meeting of the Identity Theft Task Force is March 1, 2007, and the proposed legislation will be discussed at that time.

In response to the concerns expressed, your Committee finds that it may be more appropriate to request the Office of the Auditor to review the issue of social security numbers contained in governmental records or documents, as part of the Auditor's research for the Task Force.

It is the intent of your Committee to support the Office of the Auditor's ongoing research and support services necessary to develop additional deterrents for identity theft, particularly the compromise of electronic data and information.

Your Committee has amended this measure by:

- (1) Deleting section 2, relating to public records and social security numbers; and
- (2) Adding the issue of social security numbers in public records to the research tasks of the Office of the Auditor.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 331, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 331, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 353 Economic Development and Taxation on S.B. No. 1497

The purpose of this measure is to bring Hawaii tax law into compliance with changes to the Internal Revenue Code, by amending section 235-2.3(a), Hawaii Revised Statutes, to replace the date December 31, 2005, with December 31, 2006.

Testimony in support of this measure was received from the Department of Taxation.

Your Committee finds that five federal laws enacted in 2006 would affect Hawaii tax law. The Department of Taxation has provided Committee members with digests for:

- (1) The Tax Increase Prevention and Reconciliation Act of 2006. (P.L. No. 109-222; May 17, 2006);
- (2) The Heroes Earned Retirement Opportunity Act of 2006. (P.L. No. 109-227; May 29, 2006);
- (3) The Pension Protection Act of 2006. (P.L. No. 109-280; August 17, 2006);
- (4) An Act to Complete the Codification of Title 46, United States Code, "Shipping", as positive law. (P.L. No. 109-304; October 6, 2006); and
- (5) The Tax Provisions of the Tax Relief and Health Care Act of 2006. (P.L. No. 109-432; December 20, 2006).

It is the intent of your Committee to provide for additional time to review the information related to these federal acts.

Your Committee has amended this measure accordingly, by inserting an effective date of July 1, 2060, for the purposes of further discussion.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1497, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1497, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 354 Economic Development and Taxation on S.B. No. 1007

The purpose of this measure is to require an investment broker and agent who share compensation for their services to pay the general excise tax on only that portion of the compensation retained by each.

Your Committee received testimony in support of this measure from the National Association of Insurance and Financial Advisors Hawaii, Linsco/Private Ledger Corporation, SunAmerica Securities Inc., and one individual.

Your Committee received comments on this measure from the Department of Taxation and the Tax Foundation of Hawaii.

Your Committee finds that this measure would extend the general excise tax (GET) provisions on commissions, which are currently available to insurance agents and real estate brokers and salespeople, to securities professionals who sell a commissionable product.

Your Committee received a revenue impact statement from the Department of Taxation that the proposal is estimated to cost \$1,400,000 annually.

In its methodology, the Department of Taxation stated that data on GET collected on non-insurance commissions was used to make the estimates, with adjustments made to remove real estate and other commissions.

Your Committee is in support of this measure to "level the playing field" regarding the payment of GET on certain commissions. Your Committee notes that in a case on this subject before the Oahu Board of Tax Appeals, the Department of Taxation lost and the Board found that the general excise tax on commissions should be only on the portion retained by the broker and by the agent.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1007, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 355 (Majority) Economic Development and Taxation on S.B. No. 1506

The purpose of this measure is to maintain the rental motor vehicle surcharge at \$3 a day and to appropriate funds out of the State Highway Fund for operational costs, maintenance, and capital improvements on the State highway system.

Your Committee received testimony in support of this measure from the Department of Taxation and the Department of Transportation. Catrala Hawaii, Avis Rent A Car, Budget Rent A Car, Dollar Rent A Car, Enterprise Rent-A-Car, and Thrifty Car Rental submitted testimony in opposition to this measure. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that the rental vehicle surcharge tax is a major revenue source for the State Highway Fund, contributing approximately \$14,000,000 annually into the fund for each \$1 of the daily surcharge. Originally enacted as a temporary measure, the additional \$1 surcharge has contributed significantly to highway repair and maintenance throughout the State since it was enacted in 1999. Reverting to the \$2 per day surcharge on September 1, 2007, will represent a loss of about \$14,000,000 in 2008, and \$16,000,000 annually in coming years.

Your Committee has heard the recommendation from the rental motor vehicle industry that this surcharge should be assessed on all vehicles. However, the title of this measure, Relating to Rental Motor Vehicle Surcharge Tax, does not allow for any amendments regarding other vehicles.

It is the intent of your Committee to continue discussion on this measure by the Legislature, and to note that other measures may provide options for additional resources for the Department of Transportation's highway projects.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1506, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (English).

SCRep. 356 Economic Development and Taxation on S.B. No. 967

The purpose of this measure is to encourage organ donation.

Specifically, this measure provides a tax deduction of up to \$10,000, for expenditures incurred in relation to donating organs.

Testimony in support of this measure was submitted by Hawai'i Coalition on Donation, Hawaii Living Donor Council, Minority Organ Tissue Transplant Education Program, Oahu Filipino Community Council, and the Organ Donor Center of Hawaii. The Department of Taxation and Hawaii Coalition of Care Home Administrators submitted comments.

Your Committee finds that this measure will ease the financial difficulties that are incurred by people wishing to donate their organs. While the waitlist for transplantable organs continues to grow, there may be many potential donors wishing to help save the lives of their loved ones who are prevented from doing so because of financial issues. Your Committee believes this measure will help ease those financial burdens.

Your Committee received a revenue impact statement from the Department of Taxation in its comments, indicating a revenue loss of an estimated \$15,000, for fiscal year 2008 and increases in unspecified amounts in the years thereafter. The Department did not provide the methodology with which they made this estimate.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 967, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 357 Economic Development and Taxation on S.B. No. 11

The purpose of this measure is to exempt physician services, hospital charges, nursing services, and rehabilitation services from the county surcharge on state tax.

Testimony in support of this measure was received from the Healthcare Association of Hawaii, Hawaii Society of Clinical Oncology, three physicians, and one individual. The Department of Taxation (Department) and the Tax Foundation of Hawaii submitted comments.

Your Committee finds that rising health care costs are a critical issue for Hawaii residents, particularly since medical costs may literally be a matter of life and death, and certainly a quality of life issue.

Your Committee has received a revenue impact statement from the Department that, should the proposal take effect on July 1, 2007, the annual general fund non-tax revenue loss is estimated at \$900,000 for fiscal year 2008 and after.

In its methodology, the Department stated that in 2002, business receipts from health and care services amounted to about \$2,000,000,000. By applying the inflation rate, business receipts are estimated to be \$2,500,000,000 in fiscal year 2008. The Department further estimated the business receipts generated on Oahu to be \$1,700,000,000, or seventy per cent of the total business receipts. By applying the 0.5% county surcharge rate, the total collection for county surcharge is about \$9,000,000. The State receives ten per cent of the county surcharge collection, or \$900,000. The net county surcharge collection is \$8,100,000.

Your Committee believes any measure that makes healthcare more affordable deserves continuing discussion. In addition, it is the intent of your Committee to narrow the focus of this tax exemption.

Your Committee has amended this measure accordingly, by:

- (1) Deleting nursing home and nursing facility services; and
- (2) Changing the effective date to July 1, 2007, and repealing the tax exemption June 30, 2009.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 11, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 11, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 358 Economic Development and Taxation on S.B. No. 704

The purpose of this measure is to provide additional tax exemptions for persons with disabilities.

Specifically, this measure exempts up to \$2,000 of income received by a trust whose sole beneficiary is blind, deaf, or disabled, from the general excise tax and limits any general excise tax (GET) collected from these trusts to 0.5%.

The Department of Taxation (Department) and the Tax Foundation of Hawaii submitted comments.

Your Committee finds that trusts whose sole beneficiaries are blind, deaf, or disabled, should be treated the same with regard to the general excise tax as the business income of blind, deaf, or disabled individuals.

Your Committee has received a revenue impact statement from the Department that indicates an annual revenue loss of \$150,000.

In its methodology, the Department used data from the HIP Individual Report 2004, which notes a total of fifty disabled resident returns reporting estates and trusts incomes of \$4.3 million. By applying the current GET rate of 4%, total GET collected from disabled residents amounts to \$171,000. Assuming all disabled resident returns qualify for the \$2,000 exemption, the total taxable income comes to \$4.2 million. By applying the 0.5% GET rate proposed in this measure, the total GET collected from disabled residents would be \$21,000. The Department did not have data on estates and trusts income received by part-year residents and non-residents who are disabled.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 704 and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 359 Economic Development and Taxation on S.B. No. 1182

The purpose of this measure is to raise the needs allowance for persons in institutional care settings.

Specifically, this measure establishes a needs allowance of up to fifty dollars, to be increased annually in an amount equal to the social security income benefit increase for persons residing in community care homes and other long-term care facilities.

Testimony in support of this measure was submitted by the Department of Human Services, the Mayor of the County of Hawaii, Hawaii Disability Rights Center, Healthcare Association of Hawaii, Kokua Council, National Association of Social Workers, and two individuals. The Department of Taxation, Hawaii Coalition of Care Home Administrators, and Tax Foundation of Hawaii submitted comments.

Your Committee finds that the current needs allowance of thirty dollars is insufficient and has not been raised since 1988. This allowance is intended to pay for clothing, toiletries, bus fare, personal postage costs, snacks, and other incidental expenses of day-to-day living. Your Committee finds this amount is too low to meet basic necessities for a minimally acceptable daily quality of life. Therefore, it is fitting to raise the needs allowance for individuals living in long-term care facilities and community care home residents.

Your Committee has received a revenue impact statement from the Department of Taxation (Department) that indicates a revenue loss of an estimated \$512,000, for fiscal year 2008, and an increase in general fund expenditures by an unspecified amount of monies in fiscal year 2008.

In its methodology, the Department used data from the Data Center on Hawaii's Aging for the Executive Office on Aging. The number of beds provided by long-term care facilities was (8,524) multiplied by the annual allowance (\$600), resulting in \$5.1 million per year. The Department then calculated the income tax exemption to be \$307,000, applying the average income tax rate of six per cent, and the GET exemption, to be \$205,000, applying the GET rate of four per cent. These exemptions total \$512,000.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1182, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 360 Economic Development and Taxation on S.B. No. 805

The purpose of this measure is to benefit Hawaii residents serving in the various branches of the military and National Guard.

Specifically, this measure provides an exemption from vehicle taxes and registration fees for members of the National Guard, Reserves, and other active duty military, including the Coast Guard who are in good standing and claim Hawaii as their home of record.

Testimony in support of this measure was submitted by the Hawaii State Departments of Defense, Taxation, and Transportation. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that it is important to show appreciation to those serving in our military and reserve forces for their commitment to our country. This incentive will also help in influencing our highly trained and experience soldiers to remain in reserve components and assist in the military's recruitment programs. This measure is reasonable, especially given that many vehicles go unused when they are called to service.

Your Committee has received a revenue impact statement from the Department of Taxation (Department) that indicates a revenue loss of \$407,000 to the State Highway Fund per year, if the measure were limited to National Guard and reserves. There will be no revenue loss to the general fund.

In its methodology, the Department estimated the average weight per passenger vehicle to be 4,560 lbs. By applying the \$0.01 per pound state tax rate and adding the \$20.00 registration fee, the average tax and fee per vehicle is \$65.60. Applying this exemption to all 6,200 members of the National Guard and reserves, the result is a \$407,000 loss.

No statement has been provided detailing the impact of expanding the measure to include other resident active duty personnel, including the Coast Guard.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 805, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 361 Economic Development and Taxation on S.B. No. 750

The purpose of this measure is to ensure stricter compliance of transient accommodations tax requirements from vacation rentals and bed and breakfast establishments by requiring the Department of Taxation to:

- (1) Review the forms and process for collecting the transient accommodations tax from vacation rentals and bed and breakfast establishments and report revenues received from them;
- (2) Work with the Hawaii Tourism Authority and the counties to identify owners operating vacation rentals and bed and breakfast establishments and enforce transient accommodations tax compliance; and
- (3) Clarify the duties of Hawaii Tourism Authority.

Testimony in support of this measure was received from Keep it Kailua!. The Department of Taxation (Department), City and County of Honolulu Department of Planning and Permitting, Hawai'i Tourism Authority (HTA), and Tax Foundation of Hawaii submitted comments. The Windward Ahupua'a Alliance and seventeen individuals submitted testimony in opposition to one component of the bill.

Your Committee finds that the number of undocumented vacation rentals and bed and breakfast establishments continues to expand, despite efforts to determine the scope of the problem and implement practical solutions.

Your Committee has heard that identifying these enterprises is very time consuming, since many that advertise on the Internet do not provide addresses or other locating factors. Complaints by neighbors are one means of locating a vacation rental or bed and breakfast establishment, but this is sporadic at best.

Your Committee believes that the provisions of this measure begin to address the issue. It is the intent of your Committee to further clarify and strengthen the proposed language.

Your Committee has amended this measure by:

- (1) Adding language to the purpose section to reflect the following changes;
- (2) Requiring the Department to provide to the counties the location of vacation rentals or bed and breakfast establishments subject to the taxes under chapter 237D, Hawaii Revised Statutes; provided that the Department shall not release any information regarding the taxes collected;
- (3) Requiring the Department to include any proposed state and county enforcement and compliance initiatives in its report to the Legislature;
- (4) Appropriating funds to the Department for additional investigation of undocumented vacation rentals and bed and breakfast establishments, in coordination with the counties and the HTA.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 750, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 750, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 1 (English).

SCRep. 362 Economic Development and Taxation on S.B. No. 798

The purpose of this measure is to create a one-time tax credit for victims of the October 15, 2006, earthquakes; provided that the tax credit shall not exceed:

- (1) \$30,000 per individual taxpayer; and
- (2) \$250,000 per trust, estate, partnership, association, company, or corporation

Testimony in support of the intent of this measure was received from the State Department of Defense. The Department of Taxation submitted comments.

Your Committee finds that, according to the most recent information available, the Federal Emergency Management Agency has approved an average of \$3,626 in assistance to owners of homes damaged in the October 2006 earthquakes off the Island of Hawaii. In contrast, the County of Hawaii has estimated that home repairs will cost an average of \$50,000. As of February 9, 2006, the United States Small Business Administration had approved six hundred ninety-eight applications for low-interest loans totaling \$25,300,000.

Your Committee finds that, clearly, there is considerable need for additional financial assistance to those who suffered damage as a result of the earthquakes and aftershocks.

Your Committee received a revenue impact statement from the Department of Taxation that this measure would cost \$17,100,000 in fiscal year 2008.

The Department of Taxation's methodology states that it has been estimated that the earthquake has caused \$200,000,000 in damages. Based on preliminary reports, it is estimated that ten per cent of the total damage was to homes, fifteen per cent was to businesses, and the remainder was to public buildings and structures, including roads, bridges, and harbors. It is assumed that homeowners recouped twenty-five per cent of damages from insurance and that businesses recouped fifty per cent of damages from insurance. It further assumed that all home damages are under \$30,000, that twenty per cent of business damages are under \$30,000, and the average for the remaining businesses is \$100,000. It is also assumed that businesses are able to absorb all of the credit in the first year and that homeowners are able to absorb seventy per cent in the first year.

The Department of Taxation expressed concerns that despite the strictest standards, the credit will be subject to very substantial abuse, as it is a self-reporting tax system. The fear is that many taxpayers will include damages that predated the earthquake in their claim for a tax credit.

Your Committee has taken these concerns into account, and believes that further information on the impact is needed from state and county civil defense agencies, affected property owners, and other public agencies.

Your Committee has amended this measure accordingly, by inserting an effective date of January 1, 2035 for the purposes of receiving and evaluating additional information.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 798, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 798, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 363 Economic Development and Taxation on S.B. No. 1034

The purpose of this measure is to exempt common carriers from the general excise and use taxes for fuel sold from a foreign trade zone to common carriers for use in intrastate transportation.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism; The Chamber of Commerce of Hawaii; Hawaii Fueling Facilities Corporation; International Association of Machinists and Aerospace Workers; Transport Workers Union; Hawaiian Airlines; Airline Pilots Association; Aloha Airlines; Aloha Airlines Pilots' Union; and March of Dimes. The Department of Taxation and the Tax Foundation of Hawaii submitted comments.

Your Committee finds that fuel costs have increased dramatically in recent years and have become one of the biggest operating costs of the air transportation industry. As both Hawaii residents and visitors alike depend heavily on the air transportation system, support for the local air transportation industry is critical to the Hawaii economy.

Your Committee received a revenue impact statement from the Department of Taxation (Department) that the measure would result in a revenue loss of \$12,800,000 annually.

In their methodology, the Department stated that in calendar year 2006, there were 108,000,000 gallons of fuel sold to airlines on Oahu subject to the general excise and use taxes. This amount would presumably be eligible for the exemption. However, an additional 104,000,000 gallons sold on neighbor islands were subject to the tax, and some of this might represent fuel sold to inter-island airlines that would be purchased on Oahu if the legislation passes. Using a price of \$2 per gallon, a low estimate would be 108,000,000 gallons X \$2 per gallon X 0.04 = \$8.6 million; whereas a high estimate would be 212,000,000 (108,000,000 gallons + 104,000,000 gallons) X \$2 per gallon X 0.04 = \$17,000,000. Using a midpoint in this range yields a revenue estimate of about \$12,800,000.

Your Committee also notes that the revenue impact from this bill has not been taken into consideration in the Administration's General Fund Financial Plan.

It is the intent of your Committee to support the provisions of this measure.

Your Committee has amended the measure by referencing the amendments made by this measure to section 212-8, Hawaii Revised Statutes (HRS), in two additional chapters:

- (1) Section 237-24.75, HRS, relating to additional exemptions from the general excise tax; and
- (2) Section 238-3, HRS, relating to exemptions from the use tax.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1034, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1034, S.D. 1.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 364 Economic Development and Taxation on S.B. No. 1222

The purpose of this measure is to establish that all energy technology systems must be installed and placed in service in the State of Hawaii to obtain the State's income tax energy tax credit.

Testimony in support of this measure was received from the Hawaii Energy Policy Forum. The Department of Taxation and the Tax Foundation of Hawaii submitted comments.

Your Committee finds that this measure would clarify provisions that may have been open to misinterpretation. Your Committee believes this tax credit has had a positive impact on increasing solar energy use in Hawaii, and it is the intent of your Committee to support the clarification of this measure.

Your Committee has amended this measure by deleting the word "resident" from section 235-12.5(a), Hawaii Revised Statutes (HRS), and reinserting the word "resident" in section 235-129(a), to correct a drafting error.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1222, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1222, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 365 (Majority) Economic Development and Taxation on S.B. No. 1500

The purpose of this measure is to make an emergency appropriation of \$5,000,000, for fiscal year 2006-2007 to the Department of Taxation to reimburse it for costs incurred in implementing and administering the county surcharge on the state general excise tax, including the costs of the computer vendor.

Testimony in support of this measure was received from the Department of Taxation (Department) and the City and County of Honolulu Department of Budget and Fiscal Services.

Your Committee notes that in information presented at the legislative hearing on February 8, 2007, the Department of Taxation listed total first year operational costs of \$1,708,518, and total vendor costs of \$2,791,482, for total costs of \$4,500,000. In addition, the Department stated that future contingencies are materializing, which led to the request to increase the appropriation to \$5,000,000.

Your Committee finds, however, that the Department has not provided details on the additional \$500,000 request.

It is the intent of your Committee to reserve a decision on the final amount of the appropriation until more detailed information is received from the Department of Taxation.

Your Committee has amended this measure accordingly, by:

- (1) Decreasing the appropriation to \$4,500,000, the amount in the original measure; and
- (2) Adding a new section to the bill stating that the appropriation contained in this Act will cause the state general fund expenditure ceiling for fiscal year 2007-2008 to be exceeded by \$, or per cent; and the reasons for exceeding the general fund expenditure ceiling are that the appropriation made in this Act is necessary to serve the public interest and to meet the needs provided for by this Act.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1500, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1500, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (English).

SCRep. 366 Economic Development and Taxation on S.B. No. 1504

The purpose of this measure is to authorize the Department of Taxation, by rule adopted pursuant to chapter 91, Hawaii Revised Statutes (HRS), to require the electronic, telephonic, or optical filing of tax returns under certain conditions.

Testimony in support of this measure was received from the Department of Transportation (Department). The Tax Foundation of Hawaii submitted comments.

Your Committee finds that electronic filing would begin with a small subset of taxpayers, such as those submitting fuel tax returns, tobacco tax returns, high technology credit claims, and other applications of special tax credits. In addition, because the Department is required to adopt rules for electronic filing, the public would have ample opportunity to comment, and would be given substantial notice before the requirement is implemented.

Your Committee supports this effort to increase the use of electronic filing by the taxpayer, and to increase the efficiency of the Department as a result. Your Committee believes that one additional way to encourage increased electronic filing is to require that no service fee be charged for electronic filing.

Your Committee has amended this measure accordingly, by:

- (1) Requiring the Department, by rule adopted pursuant to chapter 91, HRS, to require electronic filing; and
- (2) Providing that no service fee is required.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1504, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1504, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 367 Economic Development and Taxation on S.B. No. 898

The purpose of this measure is to require the Department of Taxation to report annually on qualified high technology businesses and related tax incentives to properly evaluate their effectiveness.

Testimony in support of this measure was received from the Department of Taxation, High Technology Development Corporation, Hawaii Science and Technology Council, Oceanit, and PacifiCap Group. The Tax Foundation of Hawaii submitted comments.

Your Committee finds that this measure would address an ongoing concern that the State is unable to properly account for the use and revenue impact of the various high technology related tax credits. For example, in its 2005-2007 report, the Tax Review Commission stated that due to a lack of current data, definitive results could not be calculated for the high technology business investment tax credit, one of the credits currently offered by the State.

Your Committee believes that the high technology tax credits provide incentives vital to the continued growth of Hawaii's technology and innovation industries. But they must be awarded, administered, and reported on in such a way as to establish a strong sense of trust that the public is getting "good value" for the loss of tax revenues.

Your Committee received information from the Department of Taxation (Department) that the measure would not directly affect tax revenues. The Department stated that the proposal would add to the Department's duties, but without additional resources. As such, your Committee notes that a similar Administration measure appropriated \$250,000 in each year of the biennium to conduct a comprehensive review of the effectiveness of the Hawaii credits and to report regularly on its findings.

It is the intent of your Committee to provide for greater transparency and evaluation of high technology tax incentives as a means of ensuring that the credits meet their intended outcomes.

Your Committee has amended this measure accordingly, by:

- (1) Requiring the Department of Taxation to report on information collected as of July 1, 2004, and annually thereafter, and to delete redundant language; and
- (2) Appropriating unspecified amounts for the biennium, for additional resources as may be necessary to prepare reports on information collected as of July 1, 2004, and annually thereafter, pertaining to qualified high technology businesses and related tax incentives provided under sections 235-7.3, 235-9.5, 235-110.51, 235-110.9, and 235-110.91, Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 898, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 898, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 368 (Joint) Education and Health on S.B. No. 50

The purpose of this measure is to appropriate funds for the Hawaii AIDS Clinical Research Program.

The University of Hawaii John A. Burns School of Medicine, the Life Foundation, the Maui AIDS Foundation, The Center Hawai'i, and twenty-four individuals submitted testimony in support of this measure.

Your Committees find that the Hawaii AIDS Clinical Research Program of the University of Hawaii John A. Burns School of Medicine is a world-class organization whose mission is to develop clinical research capabilities to evaluate optimal therapies for HIV-1 infection and AIDS-associated complications; provide access to clinical research trials and studies for all HIV-1 patients in Hawaii; and to facilitate the transfer of research findings to clinical care that will ultimately improve the lives of patients with HIV-1 infection.

The Hawaii AIDS Clinical Trials Unit is part of the Hawaii AIDS Clinical Research Program and provides basic infrastructure for the program. The unit has been notified by the National Institutes of Health that it will no longer be funded.

It is the Committees' intent to provide funding to ensure that the basic infrastructure of the entire Hawaii AIDS Clinical Research Program can remain viable and productive.

Your Committees have amended this measure by deleting the \$1,200,000 appropriation to make it an unspecified sum of general funds to the University of Hawaii for the Hawaii AIDS Clinical Research Program.

As affirmed by the records of votes of the members of your Committees on Education and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 50, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 50, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, 3 (Hee, Nishihara, Taniguchi).

SCRep. 369 (Joint) Education and Health on S.B. No. 976

The purpose of this measure is to:

- (1) Stabilize the Family Medicine Residency Program and access to primary care services in central and northern Oahu for the next two years while further program transition is occurring;
- (2) Develop the Hawaii Island Family Medicine Rural Training Track to expand the number of family physicians training in the State; and
- (3) Appropriate funds for this purpose.

The Department of Health, the University of Hawai'i System, Hawaii Pacific Health, and Hawaii Medical Service Association submitted testimony in support of this measure.

Your Committees received a fiscal impact statement from the Department of Health that this measure, if passed, would cost the State approximately \$660,000 for fiscal year 2007-2008, and the sum of \$735,000 for fiscal year 2008-2009. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated. Your Committees note that the sum of \$660,000 for fiscal year 2007-2008, and the sum of \$735,000 for fiscal year 2008-2009, were originally requested for the purposes of this measure.

Your Committees find that the University of Hawaii John A. Burns School of Medicine Family Medicine Residency Program conducts the only civilian family medicine residency program in the State. The program's mission is to provide well-trained primary care doctors to meet the needs of rural and underserved areas of Hawaii and over eighty per cent of its graduates meet this mission.

The current base Family Medicine Residency Program trains eighteen residents in a program that trains six residents per year for three years. Wahiawa General Hospital supports the salaries of eighteen residents but receives Graduate Medical Education funding from the Centers for Medicare and Medicaid Services for only fourteen residents. The salary shortfall adds to the financial strain on Wahiawa General Hospital. To attain a successful model of family medicine training to meet the health workforce needs of the State, the base program on Oahu must be stabilized.

When the Hawaii Island Family Medicine Rural Training Track is fully developed on the island of Hawaii, there will be eight residents living and working on the island that include rotations to other neighbor island sites. The first graduates would enter practice in 2011. The aim is to replicate a rural training track on Kauai once the Hawaii Island model is successfully implemented.

It is your Committees intent to provide funding to stabilize the University of Hawaii John A. Burns School of Medicine Department of Family Medicine and Community Health rural primary health care services on Oahu and expand workforce development to the island of Hawaii. Your Committees have amended this measure by:

- (1) Deleting the specific amounts appropriated for the purposes of this measure; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Education and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 976, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 976, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, 3 (Hee, Nishihara, Taniguchi).

SCRep. 370 (Joint) Education and Judiciary and Labor on S.B. No. 610

The purpose of this measure is to enable the State to fulfill its possible financial obligations with regard to three class action lawsuits.

Specifically, this measure makes an appropriation of an unspecified amount for each year of the 2007-2009 fiscal biennium for retroactive salary adjustments for part-time and substitute teachers of the public schools for the purpose of settling three pending class action lawsuits, namely Garner v. Department of Education, Klitternick v. Hamamoto, and Kawashima v. Department of Education.

Testimony in support of this measure was submitted by the Hawaii Carpenters Union, Local 745, the Hawaii State Teachers Association, Alston Hunt Floyd & Ing, the attorneys for the substitute teachers in Garner v. Department of Education and Klitternick v. Hamamoto, and four individuals. Testimony in opposition to this measure was submitted by the Department of the Attorney General and the Department of Education.

Your Committees find that the declining teacher morale, distrust, and attrition of needed employees call for prompt action to resolve the conflict that has become the subject of these pending class action lawsuits. Substitute and part-time teachers are vital to the functioning of our public education system.

Your Committees note that several teachers testified with the suggestion of amending the measure to provide for health care benefits for substitute teachers. While your Committees believe this suggestion should be considered further, the Committees are not convinced the measure should be amended at this time. Moreover, S. B. No. 943, Relating to Health Insurance, provides a vehicle to address this concern.

As affirmed by the records of votes of the members of your Committees on Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 610 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 4 (Chun Oakland, Hee, Inouye, Taniguchi).

SCRep. 371 Education on S.B. No. 683

The purpose of this measure is to increase the financial support provided to families of underrepresented college student populations by the Running Start Program and ensure participating students earn credit toward their high school and college degrees upon successful completion of qualifying University of Hawaii courses.

Testimony in support of this measure was submitted by the Department of Education (DOE), the University of Hawaii (UH), the College of Education of the University of Hawaii, the Hawaii State Teachers Association, GEAR UP Hawaii, and two individuals.

Your Committee finds that the Running Start Program, a joint program of the DOE and the UH, helps to prepare high school students of underrepresented populations for college entry. Eligible high school students can enroll in qualified UH courses and earn credits for high school graduation and college simultaneously. Running Start provides many students with the motivation, preparation, and opportunity to explore and pursue post-secondary education, which would otherwise be unavailable or unaffordable. Since the program was established in 2002, Running Start has provided scholarships totaling \$260,000 to eight hundred fifty low-income students in Hawaii. Your Committee believes that additional funding is necessary to allow the Running Start Program to keep pace with increased participation in the program and interest in college entry.

Your Committee received testimony that indicated that although GEAR UP Hawaii has been awarding scholarships to Running Start recipients, federal funds allotted for the GEAR UP programs cannot be commingled with state funds for the Running Start Program. Therefore, funding for the program needs to be channeled through a different fund to assure propriety of the financial operations of the programs involved.

Additionally, to further underscore the intent of the program, your Committee determines that clarification is necessary to ensure that credit for college courses completed will be appropriately accepted.

Accordingly, your Committee has amended this measure by:

- (1) Specifying that college courses completed shall satisfy the graduation requirements for the DOE for the corresponding high school requirement category and that all successfully completed courses at the one hundred level and above shall be included in the students' records;
- (2) Changing the funding source of the Running Start scholarships from funds appropriated to and out of the GEAR UP Hawaii Scholarship Trust Fund to the University of Hawaii Scholarship and Assistance Special Fund;
- (3) Specifying that the University of Hawaii shall be the expending agency for the appropriation; and
- (4) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 683, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 683, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 372 Education on S.B. No. 1145

The purpose of this measure is to provide for the repair and maintenance of Hawaii public schools.

Specifically, this measure:

- (1) Makes an appropriation of \$60,000, for each year of the 2007-2009 fiscal biennium for a position within the Department of Education to coordinate the public and private efforts between the Department of Education and Hawaii 3R's; and
- (2) Makes an appropriation of \$400,000, for each year of the 2007-2009 fiscal biennium as a grant pursuant to Hawaii 3R's for the repair and maintenance of public schools.

Testimony in support of this measure was submitted by the Department of Education and Hawaii 3R's.

Your Committee finds that through the Hawaii 3R's program the State has saved millions of dollars in obtaining necessary repairs and maintenance of the State's public school facilities. Your Committee further finds that numerous repair and maintenance needs have gone unmet due to the large backlog and limited State resources. The Hawaii 3R's program involves local communities, including churches, union and trade associations, businesses, civic clubs, parents, teachers, and all of the military branches, in the transformation of their local schools through their hours of volunteer work. Additionally, Hawaii 3R's obtains federal funding from various sources. However, not all of the State's public schools qualify for federal funding, and the amount of federal funding received is not sufficient to meet the public schools' needs.

Your Committee, therefore, finds that the appropriations made in this measure are in the public's interest and their benefits will have even greater implications, as the financial assistance will be met with volunteer power and a wide network of expertise.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1145 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Tokuda).

SCRep. 373 Education on S.B. No. 1648

The purpose of this measure is to expand applied and experiential learning opportunities to public school students throughout the State.

Specifically, this measure establishes:

- (1) Applied learning high school academies that will link the curriculum of a school to the mission of a particular agency or University of Hawaii campus and the private sector workforce; and
- (2) A tax credit for businesses providing experiential learning opportunities to students.

Testimony in support of this measure was submitted by the Department of Education, the Department of Business, Economic Development, and Tourism, the Workforce Development Council, and CTA Solutions. Comments on the measure were also submitted by the Department of Taxation and the Hawaii State Teachers Association.

Your Committee finds that the State needs to focus efforts and resources on developing a highly qualified and skilled workforce to meet the changing needs of the State. The establishment of smaller learning communities, including schools within schools and applied learning academies, present an effective method for addressing specific areas of student interest and workforce needs in the community. Your Committee further finds that these types of programs require both government and community support to succeed and be of benefit to not only students, but also the State as a whole. However, the Department of Education has indicated that there are currently several smaller learning communities initiatives in existence within the public schools, but the funding necessary for these programs is tenuous. The applied learning high school academies established by this measure shall become a comprehensive applied learning program that can support and enhance other programs including the Construction Academy as well as agriculture and landscaping career academies.

Additionally, your Committee heard a related measure that touched on ideas similar to those encompassed in the applied learning academies portion of this measure. Your Committee believes that it is appropriate to include alternative initiatives into this measure to provide for increased development of science, technology, engineering, and math (STEM) skills, and to ensure preparedness of students for post-secondary education and beyond. As such, portions of the current measure have been replaced to provide for the establishment and funding of new STEM academy programs and initiatives.

Accordingly, your Committee has amended this measure by:

- (1) Deleting the experiential learning opportunities tax credit provision;
- (2) Establishing the Hawaii Excellence through Science and Technology (HiEST) Academy Program to increase preparedness for post-secondary education and the workforce;
- (3) Establishing the Robotics and Space Contextual Learning Program to develop science, technology, engineering, and math (STEM) skills;
- (4) Establishing the Business/Education Internship and Mentorship Program to increase opportunities for high school and college students to gain work experience;
- (5) Appropriating funds for the HiEST Academy Program;
- (6) Appropriating funds for the Robotics and Space Contextual Learning Program;
- (7) Appropriating funds for the Business/Education Internship and Mentorship Program; and
- (8) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1648, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1648, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 374 Human Services and Public Housing on S.B. No. 1737

The purpose of this measure is to define “long-term care facilities” and include care in long-term care facilities as part of a service business that may qualify for beneficial treatment within an enterprise zone.

The Department of Business, Economic Development, and Tourism submitted testimony in support of this measure.

Your Committee finds that there is an increasing demand and need for long-term care facilities. According to the testimony, many hospitals are unable to accept ambulance patients because of the large number of long-term care patients occupying hospital beds. Including long-term care facilities in the list of businesses within the State Enterprise Zone statute that are eligible for seven years of tax credits and exemptions will help to reduce the long-term care facilities’ operating costs and hopefully encourage the development of new and the expansion of existing long-term care facilities.

It is your Committee’s intent to support the inclusion of care in long-term care facilities as part of a service business that may qualify for beneficial treatment within an enterprise zone. Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1737, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1737, S.D. 1, and be referred to the Committee on Economic Development and Taxation.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 375 Human Services and Public Housing on S.B. No. 1162

The purpose of this measure is to provide notice of permanent plan hearings to a child who has reached the age of fourteen.

The Department of Human Services, Legal Aid Society of Hawaii, the Hawaii Foster Youth Coalition, and three individuals submitted testimony in support of this measure.

Your Committee finds that this measure will improve the quality of services provided to foster youth. As noted by the Legal Aid Society of Hawaii, the presence of foster youth at permanent plan review hearings will give the foster youth a direct voice in the proceedings affecting them, and also provide a greater level of accountability to the court for social workers and guardians ad litem that are assisting the foster youth.

It is the Committee's intent to support foster youth having notice of and greater involvement in the court decisions that affect their futures. Your Committee has amended this measure by:

- (1) Requiring the Department of Human Services to arrange for transportation of the child to court instead of requiring that the Department of Human Services provide transportation to court for the child; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style, including changing the effective date from July 1, 2007, to upon approval.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1162, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1162, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 376 Human Services and Public Housing on S.B. No. 1164

The purpose of this measure is to establish guiding principles for foster children.

The Hawaii Foster Youth Coalition, the Legal Aid Society of Hawaii, Volunteer Legal Services Hawaii, and twenty-one individuals, many of which are former foster youth, submitted testimony in support of this measure. The Department of Human Services submitted testimony in support of the intent of this measure.

Your Committee finds that establishing guiding principles for foster children is an appropriate step towards ensuring that foster children receive fair and equal treatment while in care. The measure also establishes a level of accountability to the foster children by the individuals and agencies that are responsible for their care.

It is the Committee's intent to ensure that foster children are treated with dignity while in foster care. Your Committee has amended this measure by:

- (1) Requiring the Department of Human Services to provide a child with a copy of the guiding principles when the child is placed in foster care;
- (2) Permitting the Family Court to issue any necessary orders, as it deems appropriate or on motion of the guardian ad litem, to the Department of Human Services and the Department of Health, in addition to the Department of Education, to ensure that the guiding principles are upheld; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1164, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1164, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 377 (Joint) Human Services and Public Housing and Health on S.B. No. 242

The purpose of this measure is to expand coverage under Medicaid and QUEST to include comprehensive dental care coverage for eligible persons twenty-one years of age or older and to appropriate funds to provide the additional coverage.

The State Council on Developmental Disabilities, Hawai'i Primary Care Association, Kokua Council, and Mental Health America of Hawaii submitted testimony in support of this measure. The Department of Human Services submitted comments.

Your Committees find that current dental coverage for eligible recipients age twenty-one years and older does not include coverage for endodontic, root canals, crowns, elective procedures, or periodontal surgery. Since the adults in question are indigent, they cannot pay for any services that they may need if they are not covered benefits. Dentists, therefore, may not even start services if they cannot deliver full treatment for the patient or if they will not be paid for the care. An expansion of services would defray the greater costs that would otherwise likely occur from poor dental care.

Your Committees received testimony from the Department of Human Services that this measure, if passed, would cost the State approximately \$27,144,853 for fiscal year 2007-2008.

It is the Committees' intent to improve access to dental care for this population of Medicaid and QUEST recipients. Your Committees have amended this measure by:

- (1) Appropriating an unspecified sum of general funds, instead of \$30,000,000, to expand coverage under Medicaid and QUEST so that it includes comprehensive dental care coverage for persons twenty-one years of age or older; and
- (2) Making the Act effective on July 1, 2008, rather than July 1, 2007.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 242, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 242, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 3 (Menor, Hemmings, Whalen).

SCRep. 378 Human Services and Public Housing on S.B. No. 1101

The purpose of this measure is to establish a task force to coordinate resources for homeless children, and to establish and appropriate funds to a special fund.

The Department of Education, Legal Aid Society of Hawaii, Hawaii Family Forum, the Hawaii Youth Services Network, and two individuals submitted testimony in support of this measure.

Your Committee finds that children, particularly young children, are the most vulnerable during, and at times victimized by, homelessness. While many children develop some resiliency to their situation and are able to overcome the ravages of homelessness, the deficits of homelessness often lead to poor health, exposure to violence, poor academic performance, and a lack of positive social interactions. This measure will minimize the negative impact of homelessness on children by establishing a task force to coordinate resources to benefit children who are homeless.

The Department of Education noted in its testimony that the homeless coordinator, as established in this measure, should participate in the membership of the Hawaii Statewide Interagency Council on Homelessness. Furthermore, it was recommended by the Hawaii Youth Services Network, that at least one representative of an organization serving runaway and homeless youth serve on the task force.

It is the Committee's intent to ensure that there is some accountability for the programs that the task force chooses to endorse. Your Committee has amended this measure by:

- (1) Requiring the task force to include an accounting of the effectiveness of the endorsed programs, as well as any suggestions for preventing children from becoming homeless, in its reports to the legislature; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1101, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1101, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 379 Human Services and Public Housing on S.B. No. 1163

The purpose of this measure is to require the State to provide independent living programs to foster children at age fourteen.

The Department of Human Services, submitted testimony in support of the intent of this measure. The Legal Aid Society of Hawaii, Hale Kipa, the Hawaii Foster Youth Coalition, and three individuals submitted testimony in support of this measure.

Your Committee finds that it is important to ensure that, beginning at age fourteen, foster youth are provided with appropriate opportunities to learn the basic life skills that they will need as they become adults. According to the testimony of the Legal Aid Society of Hawaii, at age eighteen, many foster youth exit their foster homes with little more than a bag of their possessions and no particular destination. Many do not know how to obtain employment or housing, or how to access public or other benefits that may assist them in their transition out of care. As a result, many former foster youth become homeless, enter the criminal justice system, or are victims of drugs and violence.

Your Committee notes that the Department of Human Services requested that the Legislature increase the budget cap on federal Temporary Assistance for Needy Families funds for child welfare services to provide foster youth with the appropriate life skills to make a successful transition to self-sufficiency, in lieu of a State general fund appropriation. This will provide additional support to the Department of Human Services' existing programs related to independent living services.

It is the Committee's intent to balance the need to provide older foster youth with appropriate opportunities to learn basic life skills with the understanding that the Department of Human Services cannot mandate these foster youth to attend the proffered programs. The Committee has amended this measure by:

- (1) Requiring that, beginning at age fourteen, the permanent plan of all foster youth who are in permanent custody or foster custody include an age appropriate independent living program instead of requiring the foster youth to participate in the program;
- (2) Appropriating or authorizing money from Temporary Assistance for Needy Families funds to the Department of Human Services for the independent living program; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1163, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1163, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 380 Human Services and Public Housing on S.B. No. 1170

The purpose of this measure is to appropriate funds for the Healthy Start Program, including Enhanced Healthy Start, hiring of additional staff, and training.

The Department of Human Services submitted testimony in support of the intent of this measure. Catholic Charities Hawaii, the Hawaii Family Support Institute, Parents and Children Together, Good Beginnings Alliance, and two individuals submitted testimony in support of this measure. The Department of Health submitted testimony in opposition.

Your Committee finds that for over twenty years, the Healthy Start Program has been an evolving resource for Hawaii's families by identifying families at risk of abuse and neglect, and by providing voluntary home-based child abuse and neglect prevention services. In response to a concern that certain families facing substance abuse, domestic violence, and mental health issues were not being effectively enrolled in the program, the Enhanced Healthy Start Program was established to serve families at threatened harm levels of risk, as well as, infants and toddlers confirmed as being subject to abuse or neglect.

According to the testimony, the Healthy Start Program is at the cusp of making programmatic changes that will substantially increase the opportunities to make positive changes in the lives of many children.

According to the Department of Health, the Administration has requested funding for the Healthy Start Program and for the Enhanced Healthy Start Program through the Department of Human Services. The testifiers indicated that it is more beneficial to increase the current Temporary Assistance for Needy Families cap for the purpose of this measure instead of a state general fund appropriation.

It is the Committee's intent to support the request to increase the current Temporary Assistance for Needy Families cap for the purpose of this measure in lieu of a state general fund appropriation. Your Committee has amended this measure by:

- (1) Appropriating or authorizing money from Temporary Assistance for Needy Families funds to the Department of Human Services for the Healthy Start Program, including Enhanced Healthy Start, the hiring of a child development specialist or clinical specialist, and provider training;
- (2) Increasing the appropriated or authorized sum from \$2,300,000 to \$3,200,000; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1170, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1170, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 381 Human Services and Public Housing on S.B. No. 1173

The purpose of this measure is to appropriate funds to continue the pilot perinatal clinic for women with a history of substance abuse on Oahu.

The Department of Human Services submitted testimony in support of the intent of this measure. The University of Hawaii John A. Burns School of Medicine, the Drug Policy Forum of Hawai'i, the Hawaii Substance Abuse Coalition, the Hawaii State Commission on the Status of Women, and two individuals submitted testimony in support of this measure.

Your Committee finds that the pilot perinatal clinic provides appropriate health care services to pregnant women who are substance abusers in an effort to help them deliver healthy babies. The pilot perinatal clinic provides substance abuse treatment, prenatal care, and follow-up services in a supportive, rather than punitive, environment. Given the high percentage of drug use among women involved with child welfare services and the criminal justice system, it is important to continue to support the pilot perinatal clinic.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1173 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 382 Human Services and Public Housing on S.B. No. 1188

The purpose of this measure is to ensure delivery of long term care to the State's elderly and disabled.

Specifically, this measure appropriates \$370,000, for fiscal year 2007-2008, and \$230,000, for fiscal year 2008-2009, to supplement the development of the aging and disability resource center being developed by the Executive Office on Aging, the Hawaii County Office of Aging, and the City and County of Honolulu Elderly Affairs Division.

Testimony in support of this measure was submitted by the Department of Health, State Council on Developmental Disabilities, Hawaii County Office of Aging, Center on the Family, Hawaii Aging Advocates Coalition, Hawaii Pacific Health, Hawaii Long Term Care Coalition, Healthcare Association of Hawaii, Hospice of Hilo, Kokua Council, Project Dana, and two individuals.

Your Committee finds the delivery of long term care in Hawaii has been uncoordinated, resulting in difficulty for consumers to obtain information about options and services. Community resource centers for the elderly and disabled will help empower our residents to make informed choices, which can be very difficult given the multiple agencies and organizations involved. These centers will streamline access to in-home care, community-based programs, and institutional services available to meet their needs.

Your Committee, therefore, finds the appropriations made in this measure are important to the public's interest and will enable the continuation and expansion of services begun under the federal Department of Health and Human Services 2005 grant.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1188 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 383 Human Services and Public Housing on S.B. No. 1189

The purpose of this measure is to assist grandparents who provide care for and raise their grandchildren.

Specifically, this measure makes an appropriation of \$24,000, for the Executive Office on Aging to assess the issues facing grandparents raising their grandchildren in Hawaii and their needs.

Testimony in support of this measure was submitted by the Department of Health, two representative of Hawaii Aging Advocates Coalition, Kokua Council and five individuals.

Your Committee finds that a growing number of grandparents are primary caregivers for their grandchildren.

Your Committee further finds that the State lacks adequate data to formulate policies that would better support grandparent caregivers. This data is vital to ensure proper programming and assistance is made available and that the State collects reliable data with which to obtain a fair share of federal funding.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1189 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 384 Human Services and Public Housing on S.B. No. 1195

The purpose of this measure is to appropriate funds for the Sage PLUS program to expand services to the neighbor islands and to support the program's operating costs.

Your Committee received testimony in support of this measure from the ILWU Local 142, the Policy Advisory Board for Elder Affairs, the Kokua Council, and two individuals. Testimony in opposition to this measure was submitted by Hawaii Centers for Independent Living. The Department of Health submitted comments on this measure.

Your Committee finds that the Sage PLUS program provides assistance to people receiving Medicare and Medicaid benefits, as well as their families, caregivers, and people on the verge of retirement. This measure seeks to expand the Sage PLUS program and support its operating costs so that those in need can continue to benefit what the program offers.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1195 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 385 Human Services and Public Housing on S.B. No. 1196

The purpose of this measure is to make an appropriation to the Executive Office on Aging (EOA) to continue to coordinate a statewide system of family caregiver support.

Your Committee received testimony in support of this measure from the Department of Health, the EOA, Hawaii Pacific Health, Hawaii Aging Advocates Coalition, Policy Advisory Board for Elder Affairs, Kokua Council, and one individual.

Your Committee finds that families, rather than institutions, are the primary providers of long-term care for older adults in the State. According to the EOA, in 2003, approximately twenty-one per cent of Hawaii's adult population provided care or assistance to a person age sixty or older. Caregivers are motivated to provide care to family members because of their family-oriented values, the preference of the elderly to remain at home with their families, and the high cost of institutional long-term care.

Under Act 262, Session Laws of Hawaii 2006, the EOA is required to coordinate a statewide system of caregiver support services. Act 262 also appropriated \$80,000, to the EOA to coordinate a statewide system of family caregiver support services. This measure would similarly enable the continuance of those support services.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1196 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 386 Human Services and Public Housing on S.B. No. 1203

The purpose of this measure is to require the Department of Human Services (DHS) to develop and implement a cash and counseling pilot program, and to make an appropriation therefor.

Your Committee received testimony in support of this measure from DHS, Child and Family Service, ILWU Local 142, Hawaii Aging Advocates Coalition, and Kokua Council.

Your Committee finds that Cash and Counseling is a national program sponsored by the Robert Wood Johnson Foundation, the United States Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation; and the Administration on Aging. Under the program, recipients of Medicaid personal care services or home- and community-based services receive a flexible monthly allowance and decide who to hire and what services they want to receive.

The program's innovative approach enables participants to direct and manage their personal assistance services according to their own specific needs. Participants receive counseling and financial advice to help them manage their allowance and responsibilities. Participants can choose a family member or friend, in lieu of an agency worker, to provide the services. This enables family caregivers to receive a level of financial recognition and support for their efforts and offsets some of the financial sacrifices that family caregivers make to care for loved ones.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1203 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 387 Human Services and Public Housing on S.B. No. 1206

The purpose of this measure is to provide respite care for caregivers of our elderly population.

Specifically, this measure appropriates an unspecified sum for each year of the 2007-2009 fiscal biennium, for the development and implementation of a pilot program to provide emergency and evening respite care for adults aged sixty and older with physical or cognitive disabilities.

Testimony in support of this measure was submitted by the Department of Health and the Executive Office on Aging, and Hawaii Aging Advocates Coalition.

Your Committee finds that respite care provides much needed temporary relief to caregivers to reduce the individual and family strain they experience on a daily basis. Respite care provides time for caregivers to attend to their own needs, attend classes to learn caregiving skills, participate in support groups, and attend to other business or unexpected emergencies.

Your Committee further finds that, respite services are short in supply and can be inaccessible to families due to eligibility requirements, social and cultural issues, and geographic and economic barriers.

Your Committee further finds that the benefits of keeping families together and the growing number of our elder population merit the funding for the pilot program provided by this measure.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1206 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 388 Human Services and Public Housing on S.B. No. 1209

The purpose of this measure is to appropriate moneys for emergency domestic violence shelters.

The Formerly Battered Women's Caucus of Hawai'i; the Hawaii Family Forum; Hawai'i Primary Care Association; the Hawaii State Coalition Against Domestic Violence; Parents and Children Together; Child & Family Service; Turning Point for Families, Inc.; Hale Lokomaika'i Women Helping Women; Blueprint for Change; Hale Ho'omalua; Na Loio; and fifteen individuals submitted testimony in support of this measure.

Your Committee finds that the State needs to continue to fund emergency domestic violence shelters in order to provide safe havens for women and their children made homeless due to domestic violence. The State began funding emergency domestic violence shelters statewide in 2004. The state funds awarded to each of the service areas has remained fixed since 2004, even though the cost of conducting business has increased severely. Each of the eight shelters has paid the increased expenses with the 2004 funds and as a result, the shelters are experiencing financial difficulties statewide.

In addition, consumer needs have increased and impacted service delivery. Families and individuals entering shelter placement are affected by issues such as substance use and addiction, mental health, child abuse and neglect, homelessness, loss of income, lack of employable skills, lack of parenting skills, and lack of medical and dental care. Domestic violence advocates must be thoroughly trained to meet the varying needs of the consumer base so that a consumer may move from shelter placement to a non-abusive living environment.

This measure will appropriate moneys for emergency domestic violence shelters to continue to serve the needs of families and individuals impacted by domestic violence statewide.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1209 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 389 Human Services and Public Housing on S.B. No. 1672

The purpose of this measure is to amend the law pertaining to the Medicaid Fee Schedule to require an annual adjustment for inflation; appropriate funds to retroactively adjust for inflation, payments made to fee-for-service providers for fiscal year 2001-2002 and bienniums 2003-2005 and 2005-2007; and change the Medicaid Fee Schedule to one hundred per cent of the 2006 Medicare Fee Schedule.

Kaiser Permanente; Hawaii Chapter, American Physical Therapy Association; and Hawaii Pacific Health submitted testimony in support of this measure. The Department of Human Services submitted testimony in opposition.

Your Committee received a statement from the Department of Human Services that this measure, if passed, would cost the State approximately \$40,619,356 for the Medicaid Fee-For-Service Program and \$29,557,498 for the Medicaid QUEST Program each fiscal year. According to the Department of Human Services, the rates for the QUEST health plans are based on the prevailing Medicaid Fee Schedule, and any increases to the Medicaid fees will also increase the QUEST fees.

Your Committee finds that inadequate payment and reimbursement from Medicaid have compromised access to medical care not only for the uninsured and those covered by Medicaid, but also for those individuals who have private employer-based health insurance. Hawaii's hospitals in particular have been detrimentally affected by the inadequacy of Medicaid reimbursements and payments that are far below cost.

It is your Committee's intent to try and meet rising health care costs and ensure that Hawaii's residents have continued access to quality health care. Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1672, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1672, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 390 Human Services and Public Housing on S.B. No. 1779

The purpose of this measure is to establish a two-year statewide task force to evaluate and make recommendations regarding the State's system responses to cases of child sexual assault and exploitation, and appropriate funds for the task force.

The Department of Human Services, the City and County of Honolulu Police Department, and Friends of the Children's Justice Center on Maui submitted testimony in support of this measure. The Judiciary submitted testimony in support of the intent of this measure.

Your Committee finds that there is a need to develop a coordinated, organized system in our State that can appropriately respond to cases of child sexual abuse, assault, and exploitation; sexually reactive children; youth who sexually offend; and related minor-to-minor incest. The creation of a statewide task force will enable the various agencies to work together and hopefully achieve consensus on how to best develop a coordinated response.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1779 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 391 Human Services and Public Housing on S.B. No. 1916

The purpose of this measure is to strengthen the support of family caregivers by:

- (1) Extending and expanding the responsibilities of the Joint Legislative Committee on Family Caregiving;
- (2) Requiring the Executive Office on Aging to conduct a comprehensive assessment of care recipients' needs and the needs of their family caregivers; and
- (3) Appropriating funds to expand Kupuna Care Services for care recipients and their family caregivers.

The Department of Health submitted testimony in support of the intent of this measure. The Policy Advisory Board for Elder Affairs, Hawai'i Alliance for Retired Americans, Occupational Therapy Association of Hawaii, Hawaii Aging Advocates Coalition, the International Longshore and Warehouse Union Local 142, and Child and Family Service submitted testimony in support of this measure.

Your Committee received a fiscal impact statement from the Department of Health that this measure, if passed, would cost the State approximately \$500,000 for fiscal year 2007-2008, and \$500,000 for fiscal year 2008-2009, for the Kupuna Care Program; and an unspecified appropriation of general funds for fiscal year 2007-2008 to conduct the comprehensive needs assessment. However, the fiscal impact statement submitted did not specify the methodology by which the fiscal impact was calculated.

Your Committee finds that, due to a shortage of care providers in Hawaii, family caregiving has become a critical element of our health and long-term care system. By 2020, more than one in four individuals is expected to be sixty years old or older. The need for personal care assistance due to physical, sensory, cognitive, and self-care disabilities increases with age. As Hawaii's population ages, many more families will be providing higher levels of long-term care to frail and disabled older adults at home. A comprehensive public policy to strengthen support for family caregivers is essential.

It is the Committee's intent to strengthen the support of family caregivers. Your Committee has amended this measure by:

- (1) Clarifying that the Family Caregiver Support Program offers services for family caregivers;
- (2) Changing the expending agency in section 5 of the measure from the Department of Health to the Senate and the House of Representatives to expedite the allocation of the appropriated funds for the Executive Office on Aging to conduct a comprehensive needs assessment;
- (3) Increasing the appropriation to expand the Kupuna Care Services Program's in-home and access services from \$500,000 to \$750,000;
- (4) Appropriating the sum of \$300,000, for fiscal year 2007-2008, and the same sum for fiscal year 2008-2009, for the Family Caregiver Support Program; and
- (5) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1916, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1916, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 392 Human Services and Public Housing on S.B. No. 1937

The purpose of this measure is to require the Department of Human Services to develop and implement a micro-credit pilot program and appropriate funds for that purpose.

The Department of Human Services, the Hawai'i Alliance for Community-Based Economic Development, and 3Point submitted testimony in support of this measure.

Your Committee finds that the State should help its residents build assets as assets are a critical component of financial security and integral to overcoming poverty. Micro-credit is the extension of small loans to the unemployed, to poor entrepreneurs, and others who are "pre-bankable" or not otherwise qualified for traditional loans. This financial innovation originated in developing countries where it successfully engaged extremely impoverished people in self-employment projects that enabled them to generate an income. According to the testimony, there are approximately six hundred domestic loan funds across the United States that practice micro-credit as described in this measure.

Your Committee notes that the Department of Human Services testified that it estimates that an appropriation of \$300,000 is needed to contract out the development and implementation of a micro-credit pilot program, and it requested that the Legislature increase its current Temporary Assistance for Needy Families cap on work support programs for this purpose in lieu of a State general fund appropriation.

It is the Committee's intent to support the Department of Human Services' request to increase the current Temporary Assistance for Needy Families cap on work support programs in lieu of a State general fund appropriation. Your Committee has amended this measure by:

- (1) Appropriating or authorizing money from Temporary Assistance for Needy Families funds to the Department of Human Services to develop and implement the micro-credit pilot program; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1937, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1937, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 393 Human Services and Public Housing on S.B. No. 1938

The purpose of this measure is to eliminate the asset limits for households with minor dependents' applications for medical assistance and appropriates funds for this purpose.

The National Association of Social Workers, Hawaii Women Work, the Hawai'i Alliance for Community-Based Economic Development, and 3Point submitted testimony in support of this measure. The Department of Human Services submitted comments.

Your Committee finds that asset limits put low-income families in a position of spending down or depleting their assets to low levels so that they can receive help. According to the Department of Human Services, the current maximum allowable asset retention limit for adults in both the QUEST and the Fee-For-Service Medicaid Program is \$2,000 for a single person, \$3,000 for a two person household, and an additional \$250 for each additional family member in the household. By spending down or depleting their assets to these low levels, low-income families are actually prevented from building sufficient assets to move towards self-sufficiency. Therefore, the asset limits actually serve as a barrier to escaping poverty as many individuals are forced to choose between attempting to build assets and the need for services.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1938 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 394 (Joint/Majority) Economic Development and Taxation and Tourism and Government Operations on S.B. No. 1288

The purpose of this measure is to promote Hawaii's indigenous holistic healing practices and promote Hawaii's host culture worldwide.

Specifically, this measure makes an appropriation of \$125,000, for fiscal year 2007-2008, to bring the Healing Spirit Worldwide conference to Hawaii in 2010.

Testimony in support of this measure was submitted by the Department of Business, Economic Development, and Tourism and Papa Ola Lokahi.

Your Committees find that hosting the 2010 Healing Our Spirit Worldwide conference is a great opportunity to raise the prestige of the State and benefit economically. Hosting the conference will strengthen the State's position as a world leader in indigenous health and wellness practices. Additionally, the State will benefit financially from the expenditures of the expected 5,000 participants from throughout the Pacific, Pacific Rim and Asia.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1288 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Ayes with Reservations, 1 (Trimble). Noes, 1 (Slom). Excused, 3 (English, Ige, Tsutsui).

SCRep. 395 Health on S.B. No. 49

The purpose of this measure is to require the Board of Examiners in Naturopathy to adopt a formulary, qualifications, and rules allowing naturopaths to administer natural medicines by injection.

Your Committee received testimony in support of this measure from the Board of Examiners in Naturopathy (Board), Hawaii Society of Naturopathic Physicians, and nineteen individuals. Testimony in opposition was received from the Department of Health (DOH) and Hawaii Medical Association.

Testimony from the Board indicates that the administration of natural medicines using injections is within the scope and practice of naturopathy. The use of injections is taught in naturopathic colleges. The licensure exam includes questions on intravenous, intramuscular, and subcutaneous injection and vaccination. This measure does not include the authority to inject prescription drugs.

Your Committee notes that the Governor vetoed a similar measure in 2006, H.B. No. 1155, H.D. 1, S.D. 2, that would have provided for the adoption of a formulary and qualifications for administering natural medicines by injection.

Your Committee further notes the objections of the DOH that the measure does not sufficiently define which substances are and are not included in "natural medicines." The DOH testified that last year's bill contained a provision to establish a temporary advisory committee on the administration of natural medicines by injection, to make recommendations for a formulary of natural medicines as well as qualifications to administer such substances by injection.

Your Committee believes that more discussion is necessary before this measure passes the Legislature. Therefore, your Committee has amended this measure by changing the effective date to July 1, 2050, to facilitate further discussion on its merits.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 49, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 49, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 396 Health on S.B. No. 53

The purpose of this measure is to ensure that individuals and families in need of mental health and drug and alcohol dependence services are able obtain the appropriate treatment.

Your Committee received testimony in support of this measure from Hawaii County Council- Council member for District 6, Hawaii Association for Marriage and Family Therapy, Chaminade University, Hawaii Psychological Association, Mental Health Kokua, Argosy University, Aloha House Maui, Hale Ipu Kukui Alakai, Ka Hale A Ke Ola Homeless Resource Center, The Salvation Army - Addiction Treatment Services, Mental Health America of Hawaii, and seventy-two individuals. The Department of Commerce and Consumer Affairs submitted testimony with comments on this measure.

Your Committee finds that mental health disorders and alcohol and drug dependency negatively affect the entire family. Your Committee further finds that Hawaii has a severe shortage of mental health care providers.

Your Committee intends to accomplish the purpose of this measure by including licensed marriage and family therapists as a covered benefit under the mental health and alcohol and drug abuse treatment insurance benefits.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 53 and recommends that it pass Second Reading and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, none.

SCRep. 397 Health on S.B. No. 1675

The purpose of this measure is to increase survival rates from cardiac arrest in Hawaii by encouraging the use of automated external defibrillators.

This measure accomplishes this goal by updating existing law by changing "automatic" to "automated". In addition, it establishes Good Samaritan limited immunity for rescuers and program facilitators and removes the requirement for physician approval or involvement in the administration of automated external defibrillators.

Your Committee received testimony in support of this measure from the Department of Health. The American Heart Association submitted testimony in support of the intent of this measure with recommended amendments.

Your Committee finds that every minute counts in the emergency response to an individual suffering from cardiac arrest. Automated external defibrillators have been developed that enable a shorter response time for first responders and the public. Your Committee further finds that removing physician involvement from the requirement for automated external defibrillator programs will encourage more businesses to implement the program.

Your Committee has adopted the recommendations of the American Heart Association and amended this measure by deleting the training requirement for persons who use an automated external defibrillator. Your Committee further amended this measure by:

- (1) Leaving physicians in the measure as in the original statute, in order to provide physicians with liability protection if they volunteer their services to assist a non-profit organization; and
- (2) Amending other sections of law in which the term "automatic external defibrillators" appears to reflect the change in terminology from "automatic" to "automated".

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1675, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1675, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 398 Health on S.B. No. 852

The purpose of this measure is to expand the availability of medical care on the island of Hawaii.

Specifically, this measure charges the Department of Health with establishing a pilot program in cooperation with emergency medical services, the Hawaii Fire Department, Hawaii Health Systems Corporation, and community clinics in the Ocean View and Volcano communities of the island of Hawaii to provide additional urgent care services and appropriates an unspecified amount of money in each year of the 2007-2009 fiscal biennium for that purpose.

Testimony in support of this measure was submitted by the mayor of the County of Hawaii. Testimony in opposition to this measure was submitted by the Department of Health.

Your Committee finds that the island of Hawaii is experiencing a health care crisis, due largely in part to its rural nature. The proposed pilot program will assess the efficacy of alternative service delivery, such as mobile medical vans, determine the availability of staff, assess feasibility and cost-benefit ratios, recommend appropriate legislation, and involve the appropriate community stakeholders in addressing the urgent care needs of these communities. Your Committee finds this pilot program is necessary to determine the best way to meet the health and medical needs of the Ocean View and Volcano residents.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 852 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 399 Health on S.B. No. 971

The purpose of this measure is to increase the ability of nonprofit health care providers to care for the general public.

Specifically, this measure extends the sunset date for the issuance of special purpose revenue bonds for The Queen's Health System to assist with financing costs of construction, improvements, and equipment of health care facilities from June 30, 2008, to June 30, 2013.

Testimony in support of this measure was submitted by The Queen's Medical Center and Healthcare Association of Hawaii.

Your Committee finds that The Queen's Medical Center plays a vital role in the health care of our residents and visitors. To ensure it can continue to do so, The Queen's Health System must be able to maintain its facilities and equipment. Special purpose revenue bonds will allow The Queen's Health System to finance necessary capital projects at a lower cost while not requiring any state funds.

Your Committee finds that extending the sunset date for the issuance of special purpose revenue bonds will enable The Queen's Health System to maintain the health of our community.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 971 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 400 Health on S.B. No. 977

The purpose of this measure is to address the primary health care workforce shortage and improve access to health care in rural areas of the State.

Specifically, this measure makes an appropriation to the Department of Health to develop a statewide rural training model by placing primary care physicians who are in their final years of training, in the underserved areas of this State.

Your Committee received testimony in support of this measure from Hawaii Health Systems Corporation, Hawaii Primary Care Association, Hawaii Medical Service Association, and one individual. The John A. Burns School of Medicine, University of Hawaii at Manoa submitted testimony in support of the intent of this measure. The Department of Health submitted comments on this measure.

Appropriations in the amount of \$870,000 in fiscal year 2007-2008 and \$1,890,000 in fiscal year 2008-2009 have been recommended to accomplish the purpose of this measure.

Your Committee finds that action must be taken to address the primary health care workforce shortage in the rural areas, particularly on the neighbor islands of our State. Expanding the family medicine residency program sponsored by the John A. Burns School of Medicine and Wahiawa General Hospital will enable physicians to complete their final two years of clinical training while providing improved access to health care for residents living in the underserved areas of Hawaii.

Your Committee amended this measure by removing the appropriation amount and by making the John A. Burns School of Medicine, University of Hawaii at Manoa the expending agency instead of the Department of Health.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 977, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 977, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 401 Health on S.B. No. 1036

The purpose of this measure is to ensure that individuals and families in need of mental health and drug and alcohol dependence services are able to obtain the appropriate treatment.

The measure accomplishes this purpose by including licensed Marriage and Family Therapists as a covered benefit under mental health and alcohol and drug abuse treatment insurance benefits.

Your Committee received the following testimony for S.B. No. 53, which also applies to this similar measure. Therefore, supporting testimony was received from Hawaii County Council-Council member for District 6, Hawaii Association for Marriage and Family Therapy, Chaminade University, Hawaii Psychological Association, Mental Health Kokua, Argosy University, Aloha House Maui, Hale Ipu Kukui Alakai, Ka Hale A Ke Ola Homeless Resource Center, The Salvation Army-Addiction Treatment Services, Mental Health America of Hawaii, and seventy-two individuals. The Department of Commerce and Consumer Affairs submitted testimony with comments on this measure.

Your Committee finds that mental health disorders and alcohol and drug dependency negatively affect the entire family. Your Committee further finds that Hawaii has a severe shortage of mental health care providers.

Your Committee believes that having such services covered as a health insurance benefit would facilitate their afflicted use, resulting in more persons seeking assistance.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1036 and recommends that it pass Second Reading and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, none.

SCRep. 402 Health on S.B. No. 1282

The purpose of this measure is to address the shortage of mobile intensive care technicians and paramedics in Hawaii.

Specifically, this measure makes an appropriation of \$300,000, for the 2007-2008 fiscal year to establish the emergency medical technician training stipend program.

Testimony in support of this measure was submitted by the Department of Health.

Your Committee finds that there is a shortage of qualified mobile intensive care technicians and paramedics in Hawaii. The State needs a minimum of an additional fifty mobile intensive care technicians or paramedics. The lack of local training programs has exacerbated the problem, especially on the neighbor islands. Additionally, the difficulties in job advancement due to the financial cost of training have resulted in a high attrition rate. Given the anticipated system growth and attrition, this shortage will only worsen in the coming years.

Your Committee finds that it is in the public's interest to ensure local training programs are available. Therefore, your Committee finds the appropriation made by this measure to be a necessary and valuable use of the State's resources.

This measure was amended to make a grammatical correction.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1282, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1282, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 403 Health on S.B. No. 1456

The purpose of this emergency appropriation measure is to ensure the continuation of services provided by the Adult Mental Health Division of the Department of Health.

Specifically, this measure makes an emergency appropriation of \$8,377,698, for fiscal year 2006-2007, for ongoing services of the Adult Mental Health Division of the Department of Health.

Testimony in support of this measure was submitted by the Adult Mental Health Division of the Department of Health.

Your Committee finds that the number of patients has dramatically increased over the last four years from approximately 4,500 to over 12,000 in fiscal year 2006. This increase is primarily due to the expansion of services required by a settlement agreement resulting from United States v. State of Hawaii. Although the State successfully exited the settlement agreement, additional funds are needed to maintain these services to the adults with severe and persistent mental illness provided by the Adult Mental Health Division.

Your Committee finds, therefore, that the appropriation made by this measure is an important use of the State's financial resources.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1456 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 404 Health on S.B. No. 1457

The purpose of this measure is to make an emergency appropriation for the Developmental Disabilities Division of the Department of Health (DOH).

Your Committee received testimony in support of this measure from the DOH, State Council on Developmental Disabilities, and Family Voices of Hawaii.

Your Committee finds that this measure would enable the DOH to meet state-approved target numbers under the current Medicaid home and community-based service waiver program, in order to reasonably admit individuals with developmental disabilities or mental retardation into the program. This would enable the DOH to fulfill its developmental disabilities obligations under a settlement agreement reached pursuant to HDRC v. State, U.S. District Court, Civil No. 03-00524 HG-KSC (Makin II), requiring the State to comply with the U.S. Supreme Court's *Olmstead* decision.

Your Committee further finds that a large portion of the current \$4,980,523 shortfall resulted from a supplemental budget that the Developmental Disabilities Division received that was less than originally requested. In addition, this fiscal year has seen a large increase in admission of individuals into the program.

Your Committee notes that with the funding in this measure, the DOH should be able to obtain additional federal matching funds at the 57.7 per cent match.

Your Committee has amended this measure by:

- (1) Deleting the specific amount appropriated; and
- (2) Adding a provision that declares that the general fund expenditure ceiling has been exceeded.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1457, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1457, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 405 Health on S.B. No. 1458

The purpose of this measure is to make an emergency appropriation to the Department of Health for the Emergency Medical Services and Injury Prevention System Branch.

Your Committee received testimony in support of this measure from the Department of Health, State Department of Defense, and Healthcare Association of Hawaii.

Your Committee finds that the requested appropriation is required to pay for \$1,900,000 emergency aeromedical services on Oahu for fiscal year 2006-2007. The additional funds are necessary to cover the reimbursement costs associated with the delivery of service by the Hawaii Army National Guard in providing emergency aeromedical services that were previously provided by the United States Army.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1458 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 406 Health on S.B. No. 1459

The purpose of this measure is to ensure that infants and toddlers from birth to age three years with or at risk for developmental delays receive early intervention services.

Specifically, this measure provides an emergency appropriation in the amount of \$5,299,809 in general funds to cover the costs of early intervention services provided by the Department of Health's Early Intervention Section during the 2006-2007 fiscal year.

Your Committee received testimony in support of this measure from the Department of Health, the State Council on Developmental Disabilities, County Council- County of Maui, Hawai'i Early Intervention Coordinating Council, Center on Disability Studies, Hawaii Chapter American Physical Therapy Association, Waianae Coast Early Childhood Services, Inc., Imua Family Services, Easter Seals Hawaii, and four individuals.

Your Committee finds that the Department of Health has the responsibility to ensure that all children from birth to age three years with a developmental delay or biological or environmental risk and their families receive early intervention services as mandated under Part C of the Individuals with Disabilities Education Improvement Act of 2004.

Your Committee further finds that every year, the Early Intervention Section of the Department of Health requests an emergency appropriation for additional funding due to the insufficiency of each respective year's current appropriation. Your Committee further finds that federal law mandates that these services be provided and waiting lists are not permitted. As a result, providers are not being compensated for their services in a timely manner and have to endure undue financial burdens. It is the intent of your Committee to encourage the Department of Health to work towards alleviating this yearly problem.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1459 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 407 Health on S.B. No. 1463

The purpose of this emergency measure is to increase the expenditure ceiling of the Health Systems Special Fund.

Specifically, this measure makes an emergency appropriation of \$41,000,000, for fiscal year 2006-2007, to cover the increasing costs of providing quality health care, including:

- (1) Staff hired for the conversion of Kula, Kale Ho'ola Hamakua, and Samuel Mahelona Memorial Medical Hospitals to critical access hospital status;
- (2) Hospitalist programs at Hilo Medical Center, Maui Memorial Medical Center, and Kona Community Hospital;
- (3) The operation of the medical/surgical wing at Maui Memorial Medical Center;
- (4) The staffing of the imaging departments; and
- (5) To provide physicians for specialty coverage.

Testimony in support of this measure was submitted by Hawaii Health Systems Corporation and People United to Support a Second Hospital.

Your Committee finds that this measure is necessary to ensure Hawaii Health Systems Corporation will be able to continue providing quality health services to Hawaii residents throughout the remainder of this fiscal year, the cost of which has exceeded the current fiscal year budget as anticipated.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1463 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 408 Health on S.B. No. 1629

The purpose of this measure is to authorize the issuance of revenue bonds to assist Hawaii Health Systems Corporation (HHSC) or any of its regional subsidiary corporations.

Your Committee received testimony in support of this measure from HHSC, Healthcare Association of Hawaii, and Maui Memorial Medical Center. Comments were received from the State Attorney General.

Your Committee finds that significant public benefit will be realized through the planning, construction, improvement of, and purchase and replacement of equipment for the facilities of the HHSC or any of its regional subsidiary corporations that provide healthcare services and facilities for all residents. Your Committee finds that the issuance of revenue bonds is in the public interest and for the benefit of public health, safety, and welfare.

The proceeds of the bond sale under this measure would be applied to construction, improvement, and equipment for a new heart, brain, and spine center on Maui. Your Committee believes that the expansion of cardiology and neurology services at Maui Memorial Medical Center will have a tremendous positive impact on the health and wellness of all residents of Maui and the State, especially since there is a critical need on

Maui to develop additional healthcare services, particularly cardiovascular and neurovascular services. Furthermore, the revenue generated by the proposed services would be a profitable service line so as to help defray the cost of the proposed center and other hospital services.

Your Committee has amended this measure on the recommendation of the Attorney General by designating the HHSC as the issuing agency, since it has the power to issue revenue bonds, and making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1629, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1629, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 409 Health on S.B. No. 1679

The purpose of this measure is to ensure public safety by enabling Emergency Medical Services providers to respond to emergencies with the necessary equipment that is safe and reliable.

Specifically, this measure appropriates funds to the Department of Health for two fully-equipped ambulance vehicles per year and two lifepak 12 defibrillators per year for the Emergency Medical Services on Oahu.

Your Committee received testimony in support of this measure from the City and County of Honolulu Emergency Services Department, and three individuals. The Department of Health submitted testimony in opposition to this measure.

Your Committee received an estimated appropriation recommendation in the amount of \$776,000 for the 2007-2009 fiscal biennium to fund two fully-equipped ambulance vehicles and two lifepak 12 defibrillators at a cost of \$388,000 per year.

Your Committee finds that the State's Emergency Medical System needs to be able to respond to the increasing numbers of emergencies that are occurring with appropriate, safe, and reliable, equipment. Your Committee further finds that the equipment presently available and used by emergency responders is severely inadequate and unsafe. Your Committee finds that this appropriation is not only necessary, but overdue and imperative to protect the public when emergency situations occur.

Your Committee amended this measure to clarify that the appropriation amount is for two fully-equipped ambulance vehicles per year and two lifepak 12 defibrillators per year.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1679, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1679, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 410 Health on S.B. No. 1724

The purpose of this measure is to provide for the continuation of 24-hour a day emergency care services to residents of Waianae.

Specifically, this measure appropriates \$1,500,000, for each year of the 2007-2009 fiscal biennium to the Waianae Coast Comprehensive Health Center as a grant pursuant to chapter 42F, Hawaii Revised Statutes.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs, Hawai'i Primary Care Association, and the Waianae Coast Comprehensive Health Center.

Your Committee finds that the Waianae Coast Comprehensive Health Center is the only full service medical center on the Waianae coast. The Health Center is a vital resource for our State emergency preparedness with respect to natural disasters, pandemics and other disasters. It provides an essential staging area to fly patients in trauma to Queen's Medical Center. Its emergency room is one of the most heavily utilized on Oahu.

Your Committee finds the Waianae Coast Comprehensive Health Center serves primarily low-income, uninsured and under insured patients and expends a great deal of its resources caring for the large number of homeless people in the area.

Your Committee further finds that without adequate funding, the Waianae Coast Comprehensive Health Center may have to eliminate essential emergency, lab, and radiology services, leaving community residents vulnerable to life threatening health situations. Therefore, your Committee finds that the appropriations made by this measure are an important use of state resources.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1724 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 411 Health on S.B. No. 1991

The purpose of this measure is to provide housing and care options to the State's aging population.

Specifically, this measure authorizes the issuance of special purpose revenue bonds for the purpose of assisting the Craigsid Retirement Residence, a Hawaii nonprofit health care facility, with the purchase of land, planning, design, and construction of a senior housing community.

Testimony in support of this measure was submitted by Arcadia Retirement Residence, Craigsid Retirement Residence, and Hawaii Long Term Care Association.

Your Committee finds that it is in the public interest to encourage the development of senior housing communities in the State of Hawaii. The authorization of the issuance of special purpose revenue bonds for the Craigsid Retirement Residence will help keep project costs down and, therefore make the residence more affordable to the State's seniors living with moderate incomes.

It is your Committee's understanding that the Attorney General believes this is an allowable use of special purpose revenue bonds. Craigsid Retirement Residence is a health care facility, providing a full continuum of care. The development proposes to provide one hundred seventy-one

apartments with independent and assisted living options. It will also have a forty-bed full service nursing facility. Your Committee finds this facility is needed to meet the demands of the State's aging population.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1991 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 412 (Joint) Health and Human Services and Public Housing on S.B. No. 1798

The purpose of this measure is to make psychotropic drugs more readily available to the residents of Hawaii who need them.

Specifically, this measure adds advanced practice registered nurses to the list of persons who can prescribe psychotropic medication under section 346-59.9, Hawaii Revised Statutes.

Your Committees received testimony in support of this measure from Hawaii Psychiatric Medical Association and eight individuals. The Department of Human Services submitted testimony supporting the intent of this measure with recommendations.

Your Committees find that the Hawaii Administrative Rules give advanced practice registered nurses prescriptive authority under a "collegial" agreement with a physician. Your Committees further find that this measure will give advanced practice registered nurses full prescriptive authority for psychotropic medications without a "collegial" agreement. This will enable patients in need of psychotropic medications to receive them in a timely manner, eliminating the lengthy and complicated process that the current pre-authorization requirement necessitates.

To ensure equal access to psychotropic medications for all Medicaid clients, your Committees have adopted the recommendations of the Department of Human Services and amended this measure by removing section 3, which excluded QUEST medical plans from this measure.

Your Committees further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1798, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1798, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Whalen).

SCRep. 413 (Joint) Health and Human Services and Public Housing on S.B. No. 817

The purpose of this measure is to reduce the cost of prescription medications to participants of the Hawaii Rx Plus program.

Specifically, this measure directs the Governor to establish Hawaii's participation in the I-SaveRx prescription drug program to provide residents with increased access to affordable prescription medication.

Your Committees received testimony in support of this measure from the Policy Advisory Board for Elder Affairs and the Kokua Council. The Department of Health submitted testimony supporting the intent of this measure with recommendations. The Pharmaceutical Research and Manufacturers of America submitted testimony in opposition to this measure. The Department of the Attorney General submitted comments on this measure.

Your Committees find that the I-SaveRx is a prescription reimportation program that allows consumers to refill brand-name prescription drugs at affordable prices from pharmacies in Canada and the United Kingdom.

Your Committees amended this measure by changing the effective date to encourage further discussion.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 817, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 817, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Ihara).

SCRep. 414 (Joint) Health and Human Services and Public Housing on S.B. No. 816

The purpose of this measure is to provide affordable prescription medicines while maintaining high quality prescription drug therapies.

Specifically, this measure establishes a pharmacy best practices and cost control program, in which any public and private health plan may participate. It includes a prescription drug preferred list and prior authorization review process and requires drug manufacturers to disclose economic benefits of \$25 or more provided to persons who prescribe, dispense, or purchase prescription drugs.

Your Committees received testimony in support of this measure from Policy Advisory Board for Elder Affairs and the Hawaii Alliance for Retired Americans. Your Committees received testimony in opposition to this measure from the Pharmaceutical Research and Manufacturers of America. The Department of Health and the Office of Information Practices submitted comments on this measure.

Your Committees find that prescription drugs have become the most expensive component of health care, accounting for approximately two-thirds of health care costs. This is often an unmanageable financial burden, particularly for the elderly population.

Your Committees find that on January 1, 2006, the state Medicare part D state pharmacy assistance program was created. The state Medicare part D program covers the co-payments for Medicare and Medicaid dual eligible clients to ensure a smooth transition of prescription drug coverage from Medicaid to Medicare. In addition, the federal Medicare Modernization Act of 2005 also provides special relief for qualified state pharmacy assistance programs.

Your Committees further find that the Hawaii Rx plus program and the state Medicare part D program are recognizable under federal law as state pharmacy assistance programs and, if they are combined under an umbrella program and approved as a single federally recognized program, could receive enhanced benefits from the federal Centers for Medicare and Medicaid Services.

Accordingly, your Committees amended this measure by removing its contents and inserting the contents of S.B. No. 1145, which creates a Hawaii state pharmacy assistance program by merging the current state pharmacy assistance program, which coordinates the Medicare part D drug benefit and the Hawaii Rx plus program under a single comprehensive Hawaii state pharmacy assistance program umbrella.

In addition, the measure in its amended form includes an appropriation to the Department of Human Services for the purposes of conducting a study to gather information on the size of the target population, utilization data, and other information as needed in order for the department to identify the amount of the appropriation needed to implement the secondary discount price and other costs of the program.

The Department of Human Services estimates that an appropriation in the amount of \$50,000 will be necessary to carry out the study.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 816, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 816, S.D. 1, and be referred to the Committees on Commerce, Consumer Protection, and Affordable Housing and Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 3 (Menor, Hemmings, Whalen).

SCRep. 415 (Joint) Health and Human Services and Public Housing on S.B. No. 820

The purpose of this measure is to extend the law that requires the Department of Health to provide community residential alternatives for persons with developmental disabilities or mental retardation in a setting of the person's choice; provided that certain conditions are met.

The measure accomplishes this purpose by extending the repeal date of Act 303, Session Laws of Hawaii 2006, from June 30, 2008, to June 30, 2009, in order to extend the repeal date of amendments made to section 333F-2(c)(9), Hawaii Revised Statutes, and to provide the Department of Health (DOH), State Council on Developmental Disabilities (SCDD) with more time to complete a report required under that Act.

Your Committees received testimony in support of this measure from the DOH, SCDD, and Hawaii Disability Rights Center.

Your Committees support the right of the developmentally disabled and mentally retarded to live in residences of their own choice. However, your Committees also understand that providing a framework under which such a program is to be administered is a daunting task. To this end, Act 303, Session Laws of Hawaii 2006, relating to developmental disabilities, required the SCDD to submit a preliminary report to the Legislature for the 2007 Regular Session. Due to the complex nature of this issue, the SCDD was unable to complete that report, and Act 303 sunsets on June 30, 2008. This measure would extend the reporting date and the sunset by one year.

Your Committees find that, due to the complexities of the issues involved, including federal mandates, the extension of the time period Act 303 remains in force is necessary to adequately examine the issues and obtain consensus among stakeholders.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 820 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Ihara).

SCRep. 416 (Joint) Health and Human Services and Public Housing on S.B. No. 970

The purpose of this measure is to ensure that quality dental care services are provided to QUEST-eligible adults and children, individuals with developmental disabilities, and the uninsured.

The measure accomplishes this purpose by appropriating funds to the Hawaii Primary Care Association to establish or expand community-based dental health clinics operated by federally-qualified health centers to serve QUEST-eligible adults and children, individuals with developmental disabilities, and the uninsured.

Your Committees received testimony in support of this measure from the State Council on Developmental Disabilities, Hawaii Primary Care Association, O'ahu's Voice on Mental Illness, the Kokua Council, the Waikiki Health Center, and two individuals.

Hawaii Primary Care Association submitted an estimated appropriation amount of \$8 million for the biennium, \$4 million per year for two years.

Your Committees find that inadequate dental care is a serious matter and has been identified as one of the major health concerns for low-income adults and children, individuals with developmental disabilities, and the uninsured. Your Committees further find that community health centers have the capability to serve the target population.

Your Committees have amended this measure by deleting the language that requires that the appropriation be expended as a grant-in-aid executed pursuant to chapter 42F, Hawaii Revised Statutes.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 970, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 970, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Menor, Whalen).

SCRep. 417 (Joint) Health and Human Services and Public Housing on S.B. No. 241

The purpose of this measure is to facilitate the placement of all individuals in need of care in a community-based residential setting.

Specifically, this measure directs the Department of Health and the Department of Human Services to maintain an inventory of all community-based care facilities and community care foster family homes.

Your Committees received testimony in support of this measure from the Hawaii Coalition of Care Home Administrators and the Hawaii Disability Rights Center. The State Council on Developmental Disabilities submitted testimony in support of the intent of this measure with comments. The Department of Health and the Department of Human Services submitted comments on this measure.

Your Committees find that it is increasingly difficult for social workers and health care professionals to find suitable community placements for patients being discharged from hospitals and other health care facilities. A central database with an up-to-date inventory of vacancies would streamline and expedite the placement process.

The Department of Human Services estimates that an appropriation in the amount of \$139,700 is necessary to develop the inventory program and contract for services.

Your Committees adopted the recommendation of the State Council on Developmental Disabilities by including adult foster homes in the inventory.

Your Committees further amended this measure by including appropriations that would enable the Department of Human Services to contract out for services needed to maintain the inventory.

In addition, your Committees amended this measure by changing the effective date so that the inventory will be implemented and available beginning July 1, 2008, though, the appropriations will become effective on July 1, 2007, in order for the department to have the funds necessary for development of the inventory program.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 241, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 241, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Ihara, Whalen).

SCRep. 418 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Energy and Environment on S.B. No. 639

The purpose of this measure is to prohibit the importation and sale of noxious weeds and any new plant species without first having the Department of Agriculture conduct an inspection and issue its approval.

In addition, this measure requires the Department of Agriculture to update its noxious weed list every two years and appropriates funds for the revision and review of the noxious weed list.

Your Committees received testimony in support of this measure from the Department of Land and Natural Resources, the Conservation Council for Hawaii, the Sierra Club, and one individual. Testimony in opposition was submitted by the Department of Agriculture. The Department of the Attorney General submitted comments.

Your Committees find that conservation organizations in the State are fighting to slow the invasion of alien plants that are spreading from home and commercial landscapes into native forests. Your Committees further find that the introduction of new plants into Hawaii can contribute to the growing number of invasive species that are crowding out native plants and covering open fields.

Your Committees note the concern that the prohibition of the importation of any new plant species without first acquiring the approval of the Department of Agriculture may prove burdensome and may be over-restrictive. However, your Committees find that there is a need to improve the State's response to noxious weeds and to proactively address the importation of new invasive species.

Your Committees have amended this measure by:

- (1) Requiring the Department of Agriculture to annually review and, as necessary, update the list of plants designated as noxious weeds, rather than requiring an update every two-years;
- (2) Removing the requirement that the Department of Agriculture inspect and approve new plant species before their sale or importation; and
- (3) Prohibiting the offer for sale and the sale of noxious weeds in the State.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 639, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 639, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Tokuda).

SCRep. 419 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Health on S.B. No. 1234

The purpose of this measure is to increase and improve health care for Native Hawaiians by establishing a state designation of Native Hawaiian Health Centers in Hawaii pursuant to the federal Native Hawaiian Health Care Improvement Act.

The measure also appropriates an unspecified amount of general funds to effectuate the state designation of Native Hawaiian Health Centers.

Testimony in support of this measure was submitted by Papa Ola Lokahi and the Native Hawaiian Healing Center at the Waianae Coast Comprehensive Health Center. Testimony in opposition to this measure was submitted by the Department of Health.

The health status of Native Hawaiians continues to be far below that of the general population of the United States. There are currently four health care centers in Hawaii that meet the criteria of the federal definition of a Native Hawaiian Health Center under the Native Hawaiian Health Care Improvement Act, Title 42 United States Code sections 11701-11714. These health care centers are located in communities with a large percentage of Hawaiian homestead residents and Native Hawaiians, and serve these communities to address the unmet health needs of the Native Hawaiians. The federal Native Hawaiian Health Care Improvement Act, which is currently pending reauthorization, recognizes Native Hawaiian Health Centers. Your Committees find that establishing a corresponding designation under chapter 321, Hawaii Revised Statutes, will provide state recognition of Native Hawaiian Health Centers.

Your Committees have amended this measure by:

- (1) Deleting the criteria for a Native Hawaiian Health Center and replacing it with criteria from the Native Hawaiian Health Care Improvement Act so that the language in federal and state laws will properly coincide with each other;

- (2) Clarifying that the Department of Health will coordinate with the Papa Ola Lokahi to oversee the implantation of state health programs resulting from the designation of Native Hawaiian Health Centers;
- (3) Deleting unnecessary language that directs the Department of Health to follow the criteria established under the federal Native Hawaiian Health Care Improvement Act; and
- (4) Making technical, nonsubstantive amendments for the purposes of consistency and style.

Your Committees believe that this measure, as amended, will aid in increasing and improving health care for Native Hawaiians, which fulfills the intent of this measure.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1234, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1234, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, none.

SCRep. 420 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Intergovernmental and Military Affairs on S.B. No. 1603

The purpose of this measure is to ensure the continued public safety at state and county recreational areas by repealing certain sunset dates of laws that provide the state and county governments with liability protection for public use of certain state and county recreational areas.

Specifically, this measure:

- (1) Repeals the sunset date of Act 190, Session Laws of Hawaii 1996;
- (2) Repeals the sunset date of Act 170, Session Laws of Hawaii 2002; and
- (3) Repeals the sunset date of Act 82, Session Laws of Hawaii 2003.

Testimony in support of this measure was submitted by the Department of the Attorney General; the Department of Land and Natural Resources; the Department of Labor and Industrial Relations; the Office of Hawaiian Affairs; the Mayor, County of Hawaii; the City and County of Honolulu Department of the Corporation Counsel; the Honolulu Emergency Services Department, City and County of Honolulu; two Council Members of the Maui County Council; one Council Member of the Hawaii County Council; the Fire Department, County of Kauai; the Hawaii State Association of Counties; and the Hawaiian Lifeguard Association. Testimony in opposition to this measure was submitted by the Consumer Lawyers of Hawaii.

Millions of residents and visitors use Hawaii's public beaches and parks for recreational purposes on a yearly basis. Unfortunately, drownings and other serious injuries have occurred due to these recreational activities, which leave the counties and State with the task of dealing with any liability that may arise from the injuries and any resulting lawsuits.

In response to this problem, the Legislature enacted Act 190, Session Laws of Hawaii 1996, to establish a process by which a legally adequate warning system could be developed at public beach parks. As a result of Act 190, the public warning signs were designed and made more uniform throughout the State. Furthermore, Act 190 also provided the State and counties with protection from potentially unlimited liability for incidents occurring in the ocean. In 2002, the Legislature enacted Act 170, Session Laws of Hawaii 2002, to provide liability protection for lifeguard services on the beach and in the ocean, except for gross negligence, wanton acts, or omissions. Act 170 created a climate in which lifeguard services could be provided by the counties with less fear of unlimited liability, thus, further ensuring public safety. In 2003, Legislature enacted Act 82, Session Laws of Hawaii 2003, to establish a risk assessment group to review the design and placement of warning signs to provide the State and counties protection from liability arising out of recreational activities on public lands.

Your Committees find that liability protections can reduce the exposure of the state and county governments to substantial damages, and, as a result, can enable the state and county governments to keep recreational areas with potentially dangerous conditions open to the public. Furthermore, an effective warning sign system can promote public safety by informing users of the recreational areas of potentially dangerous conditions.

Your Committees recognize, however, that the repeal dates under Act 190, Session Laws of Hawaii 1996, and Act 170, Session Laws of Hawaii 2003, have been extended under previous legislation. The Consumer Lawyers of Hawaii indicated to your Committees that sunset dates were written into all three Acts to allow for the opportunity to collect sufficient data to be presented to the Legislature so that its members could make a reasonable and informed decision as to whether these laws worked and were still working in the way that was intended by the Legislature. The Consumer Lawyers of Hawaii indicated, and your Committees recognize, that there is currently a lack of sufficient data that indicates the effectiveness and adequacy of these laws. Furthermore, it was indicated that, with respect to the warning signs for public recreational areas, these warning signs had not been finalized and approved by the Board of Land and Natural Resources. Thus, your Committees further find that more time is needed to assess the adequacy and effectiveness of Act 190, Session Laws of Hawaii 1996; Act 170, Session Laws of Hawaii 2002; and Act 82, Session Laws of Hawaii 2003, before these laws become permanent.

Accordingly, your Committees have amended this measure by:

- (1) Extending the sunset date of Act 190, Session Laws of Hawaii 1996, to June 30, 2010;
- (2) Extending the sunset date of Act 170, Session Laws of Hawaii 2002, to June 30, 2010;
- (3) Extending the sunset date of Act 82, Session Laws of Hawaii 2003, to June 30, 2010;
- (4) Creating a task force to:
 - (A) Collect data on and examine the effectiveness of providing lifeguards conditional liability protection for lifeguard services at State beach parks;
 - (B) Collect data on and examine the effectiveness and adequacy of warning signs at public beach parks, and protecting the State and counties from unlimited liability with regard to activities in the ocean and at public beaches;

- (C) Collect data on and examine the effectiveness and adequacy of warning signs at public recreational lands, and protecting the State and counties from unlimited liability arising out of recreational activities on public lands;
 - (D) Submit a written report of its findings and recommendations, including any proposed legislation, to the Legislature prior to the 2008 Regular Session; and
- (5) Making technical, nonsubstantive amendments for the purposes of consistency and style.

Your Committees believe this measure, as amended, fulfills the intent of this measure, which is to ensure the continued safety at state and county beaches and recreational areas.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1603, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1603, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 3 (Fukunaga, Hee, Hemmings).

SCRep. 421 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1756

The purpose of this measure is to establish a State Agricultural Land Protection Program for the voluntary acquisition of agricultural easements on lands designated as important agricultural lands.

This measure is of great importance for several reasons:

- (1) It essentially provides for the purchase of development rights with respect to important agricultural lands;
- (2) It provides an opportunity for farmers whose farms represent their entire life's equity investment and potential retirement to remain in productive agricultural activity by the State acquiring an agricultural easement on the lands; and
- (3) It establishes a program that will be administered by the Agricultural Land Protection Foundation and funded through the Agricultural Land Protection Fund.

The measure accomplishes this purpose by establishing an Agricultural Land Protection Foundation to utilize moneys appropriated by the Legislature and other sources to acquire important agricultural lands and assist the counties in identifying, financing, and preserving important agricultural lands. The measure also establishes an Agricultural Land Protection Fund and, among other things, states that landowners who sell or donate an agricultural easement on important agricultural lands will be eligible to receive tax incentives enacted to protect important agricultural lands.

Testimony in support of this measure was received from the Department of Agriculture, Castle & Cooke Hawaii, the Maui County Farm Bureau, the Hawaii Farm Bureau Federation, and the Hawaii Agriculture Research Center. Testimony in opposition was submitted by the Department of Budget and Finance. The Department of Taxation provided comments on this measure.

Your Committee notes that the Department of Taxation submitted testimony stating that the revenue impact of this measure is indeterminate because there are no specific tax incentives that have been enacted to promote the long-term use of important agricultural lands.

Your Committee finds that important agricultural lands are critical to the long-term viability of Hawaii's agriculture and self-sufficiency. This measure will assist the State in fulfilling its constitutional mandate to conserve and protect agricultural lands, promote diversified agriculture, increase agricultural self-sufficiency, and assure the availability of agriculturally suitable lands.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1756 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 422 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1838

The purpose of this measure is to mitigate the detrimental consequences of the increase in residential development in the Kakaako district area by providing an opportunity for input from real property owners and small businesses in the area, and providing financial assistance to area schools that are affected by the increase in residents.

Specifically, this measure:

- (1) Establishes a Kakaako Central Small Business District;
- (2) Requires the Hawaii Community Development Authority to confer with and obtain consensus from the real property owners and small business owners within the Kakaako area on any proposed public facility prior to undertaking any public facility as part of a district-wide improvement program;
- (3) Establishes the Kakaako District Schools Special Fund, and requires the transfer of revenues collected from any assessments made from 2001 to 2005, to the special fund; and
- (4) Requires the modification of the Queen Street realignment project between Kamakee Street and Cooke Street, in conjunction with recommendations made by the Kakaako Mauka Plan and rules revisions.

Testimony in support of this measure was submitted by the Principal of McKinley High School; a representative from Queen Kaahumanu Elementary School; U. Okada and Co., Ltd.; and seven individuals. Testimony in opposition to this measure was submitted by the Department of Budget and Finance, the Hawaii Community Development Authority, and one individual. The Department of Education submitted comments.

In early 2007, the Hawaii Community Development Authority began the Queen Street Widening Project, referred to as ID-11. Although the project included features that would benefit the community-at-large, the widening project also posed potential serious impacts for the small

businesses located along the Queen Street area between Kamakee Street and Ward Avenue. The project was confronted with heavy opposition from area residents and small businesses, and subsequently experienced a lack of necessary funding. Thus, the project was eventually cancelled.

During 2005-2006, small businesses affected by the increase in residential development in the Kakaako area were invited to participate in the Kakaako Mauka Plan and Rules revision project along with the Hawaii Community Development Authority, and state and county officials. One of the proposals included that no new improvement district projects in the central Kakaako area be programmed unless initiated or supported by the small business community and landowners of the area. Furthermore, it was also proposed that fee assessments, parking, and business disruption issues be resolved before the initiation of a new improvement district project.

The schools surrounding the district area have also been impacted by the increase in residential development. Development results in an increase in residents who will rely on the Kakaako district schools to provide the educational needs of the community. Due to budgetary constraints, these schools are not able to deal with the increase in students and the other problems resulting from the increase in residential density.

Your Committee finds that providing an opportunity for input from real property owners and small businesses in the Kakaako area, and providing financial assistance to area schools that are affected by the increase in residents will fulfill the intent of this measure, which is to assist in mitigating the detrimental consequences of the increase in residential development in the Kakaako area.

The Department of Budget and Finance indicated to your Committee its concerns with creating a special fund to financially aid Kakaako district schools. Furthermore the Department of Education commented that, unlike for residential development in other parts of the State, the Department of Education is not able to collect fair-share contributions from the hundreds of residential units about to be completed in the Kakaako area because the Hawaii Community Development Authority is not statutorily required to contribute the revenues received from any assessments made for public facilities as part of a district-wide improvement program under section 206E-6, Hawaii Revised Statutes. The Hawaii Community Development Authority testified that between July 1, 2000, and June 30, 2005, the Authority had collected assessments for public facilities, including schools, that totaled approximately \$5,000,000.

Accordingly, your Committee has amended this measure by:

- (1) Deleting language that establishes the Kakaako District Schools Special Fund;
- (2) Adding language under section 206E-16, Hawaii Revised Statutes, to require the Hawaii Community Development Authority to transfer an amount equal to any receipts and revenues from any assessment made for a public facility as part of a district-wide improvement plan received between July 1, 2000, and June 30, 2005, to the Department of Education; and
- (3) Making technical, nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1838, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1838, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 423 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1924

The purpose of this measure is to preserve and protect state lands by requiring legislative approval of the sale of any lands under the control of any state department or agency.

Specifically, this measure requires that a state department or agency:

- (1) Obtain approval of the Legislature by at least two-thirds majority vote of the members of each house prior to the sale of land; and
- (2) Submit a concurrent resolution with specific information on the land and the action proposed for introduction to the Legislature for its review prior to the sale of land.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs. Testimony in opposition to this measure was submitted by the Department of Land and Natural Resources, the Department of Transportation, and the Hawaii Housing Finance and Development Corporation.

Various state departments and agencies are authorized to sell land under their control to a private entity. Your Committee finds that although these state departments and agencies have the authority to enter in to land sale agreements, seeking legislative approval prior to the sale of land will ensure that state land will be used and remain for public purposes and benefits.

Your Committee has amended this measure by:

- (1) Deleting the new section under chapter 27, Hawaii Revised Statutes, and inserting a modified version of the new section under chapter 171, Hawaii Revised Statutes, as this chapter relates to public lands; and
- (2) Clarifying the scope of the public land that are subject to the new section under chapter 171, Hawaii Revised Statutes.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1924, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1924, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 424 Education on S.B. No. 1147

The purpose of this measure is to evaluate and facilitate the teaching licensure standards in the State to ensure that effective teachers from outside the State receive Hawaii teaching licenses.

Specifically, this measure creates a Teacher Education Coordination Committee, established by the College of Education of the University of Hawaii to review the licensure worthiness of teachers who:

- (1) Possess out-of-state teaching licenses;
- (2) Are from states without full licensure acceptance by the Hawaii Teacher Standards Board; and
- (3) Received either national or state awards for teaching excellence, such as a national certification or a teacher of the year award, or provide evidence of a minimum of five years of excellent or exceptional teacher evaluations and a professional portfolio.

Testimony in opposition to this measure was submitted by the Department of Education, the University of Hawai'i, the Hawaii State Teachers Association, the Hawaii Association of Independent Schools, and the Hawaii Teacher Standards Board.

Your Committee finds that Hawaii's schools and their students can benefit greatly from the licensure of qualified teachers from outside of the State. The ability to license effective teachers from outside of Hawaii is particularly important during times of teacher shortages. Your Committee further finds that the Hawaii Teacher Standards Board has indicated that it has been conducting public hearings on proposed changes to its licensing requirements with regard to the licensing of out-of-state teacher-applicants. Your Committee expresses concern that the Hawaii Teacher Standards Board has made similar representations in the past that action would be undertaken to license teachers with out-of-state licenses in Hawaii without ensuing results.

However, in light of the foregoing, your Committee believes that this measure should be amended to focus on those out-of-state teachers not contemplated in the Hawaii Teacher Standards Board's proposed changes, but who should be licensed based on other criteria. Your Committee finds that due consideration should be given to teachers who have received national or state awards for teaching excellence or have otherwise demonstrated a record of excellent or exceptional teacher evaluations. These teachers would also be subject to the same license renewal requirements as all other teachers licensed in Hawaii. A separate body should be established within the Department of Education and comprised of teachers and principals who have themselves demonstrated a record of teaching excellence through recognition by state or national organizations such as the Milken Family Foundation. With regard to the testimony submitted in opposition to this measure, your Committee determines that the provisions of this measure should be repealed in five years to help ensure that the program will be reevaluated.

Accordingly, your Committee has amended this measure by:

- (1) Changing the name of the committee to the Exceptional Teacher License Recognition Committee;
- (2) Requiring the Department of Education to establish the Exceptional Teacher License Recognition Committee to review and deliberate on licensure worthiness of teachers who are licensed outside of Hawaii and have received either national or state awards for teaching excellence, or provide evidence of a minimum of five years of excellent or exceptional teacher evaluations and a professional portfolio;
- (3) Deleting provisions requiring the Exceptional Teacher License Recognition Committee to consider the licensure of teachers who:
 - (A) Possess out-of-state teaching licenses; or
 - (B) Are from states without full licensure acceptance by the Hawaii Teacher Standards Board;
- (4) Requiring the Exceptional Teacher License Recognition Committee to be comprised of at least five teachers and principals, appointed by the Superintendent of Education, who have received state or national recognition for having demonstrated exceptional educational talent;
- (5) Providing for the repeal the Exceptional Teacher License Recognition Committee on July 1, 2012; and
- (6) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1147, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1147, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 425 Judiciary and Labor on S.B. No. 948

The purpose of this measure is to propose a constitutional amendment to reduce the number of nominees presented to the Governor and the Chief Justice for various judicial vacancies from four to six nominees to three nominees.

Your Committee felt that reducing the amount of nominees would minimize the politicization of the appointment process and would allow for the most qualified to be selected.

Your Committee received testimony from the Public Defender and the Attorney General's Office opposing the bill.

Your Committee amended the bill to remove the minimum amount and to set the amount to a finite number of three nominees. The bill initially did not set a maximum amount.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 948, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 948, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 426 Judiciary and Labor on S.B. No. 1665

The purpose of this measure is to create a new offense of aggravated cruelty to pet animals and to provide appropriate penalties.

Your Committee finds that violence, whether against humans or animals, must not be tolerated in our community. Evidence suggests that there is a link between animal abuse and the commission of violent acts against humans. This bill will make it a class C felony for cruelty to pet animals. In addition to the penalty, any person convicted shall be ordered to attend counseling.

Your Committee heard testimony in support of the bill from the Honolulu Prosecuting Attorney's Office, Hawaiian Humane Society and 35 individuals, including several members of the Maui and Kaua'i Humane Societies. The Attorney General submitted testimony in support with

comments. Your Committee heard one testimony against the bill from the Public Defender's Office, testimony from the Judiciary taking no position and

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1665 and recommends that it pass Second Reading and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Gabbard). Noes, none. Excused, 1 (Nishihara).

SCRep. 427 Judiciary and Labor on S.B. No. 1954

The purpose of this measure is to require public disclosure of disciplinary sanctions imposed on any justice or judge of the State of Hawaii along with the findings and recommendations by the Commission on Judicial Conduct.

Currently, Rule 8 of the Rules of the Supreme Court regulates judicial discipline. The rules indicate that the Commission shall submit a report containing its findings and recommendations to the Supreme Court. However, when an allegation of misconduct has been proven and sanctions have been imposed, there is no requirement that such result be disclosed to the public. Your Committee finds that it is imperative that public confidence in the Judiciary be maintained and that disciplinary disclosures would achieve this result.

Your Committee heard testimony from the Public Defender who commented that disclosure of judicial discipline was not a bad idea and that the mode of discipline should be classified according the seriousness of the misconduct.

Your Committee amended the bill to correctly reference the Commission on Judicial Conduct and not refer to it as the Judicial Disciplinary Commission.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1954, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1954, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 428 Judiciary and Labor on S.B. No. 1957

The purpose of this measure is to amend the code of ethics for elected officers and public employees of the State of Hawaii by requiring "members of every state board or commission whose original terms of office are for periods exceeding one year and whose functions are not solely advisory" to submit public, rather than confidential, financial interests disclosure statements submitted to the Hawaii State Ethics Commission.

Your Committee received testimony in favor of this measure from a concerned individual. The Hawaii State Ethics Commission and the League of Women Voters of Hawaii commented on this bill.

Testimony submitted by the State Ethics Commission included the following:

Currently, almost all state boards and commissions, other than the Board of Education and the Office of Hawaiian Affairs, file "confidential" financial interests disclosure statements with our office. The filing of confidential disclosure statements by members of boards and commissions derives from Article XIV of the Constitution of the State of Hawaii. Article XIV created the Hawaii State Ethics commission, and with respect to financial interests disclosure statements, provides that the Legislature in its own discretion can determine which individuals file "public" financial interests disclosure statements and which individuals file "confidential" financial interests disclosures statements. The pertinent language in Article XIV of our State Constitution reads as follows:

*The financial disclosure provisions shall require all elected officers, all candidates for elective office and such appointed officers and employees as provided by law to make **public** financial disclosures. Other public officials having significant discretionary or fiscal powers as provided by law shall make **confidential** financial disclosures. [Emphasis added.]*

Thus, Article XIV of the Constitution of the State of Hawaii allows the Legislature to determine which state officials shall file public or confidential financial interests disclosure statements. Since board and commission members now file confidential disclosure statements, it is evident that in the past the Legislature determined that the disclosure statements filed by board and commission members should be confidential. There are legitimate reasons for this. Almost all members of boards and commissions serve on their respective boards and commissions without compensation and as "community service." If the members of boards and commissions are required to file public disclosures, it is certainly reasonable to assume that many individuals will be dissuaded from serving on boards and commissions since their financial interests will become a matter of public record. Since board and commission members are not compensated for their service, having public disclosures may tip the balance in terms of dissuading dedicated and public-spirited citizens from participating on boards and commissions. The work that boards and commissions in the State do can be demanding, and it is in the interest of the State to attract the best citizens to provide service to the various state boards and commissions. The Legislature, in the past, appears to have followed this logic in providing for confidential disclosure statements for board and commission members.

On the other hand, having confidential disclosures keeps the public in the dark with respect to the work of board and commission members and their potential conflicts of interests. While the confidential disclosure statements are received by the Hawaii State Ethics Commission and are reviewed by the Hawaii State Ethics Commission, the Hawaii State Ethics Commission is generally not aware of the issues that the 150 or so boards and commissions deal with on a day-to-day basis. No doubt the individuals who deal with these boards and commissions are in the best position to determine whether board or commission members have conflicts of interests, and thus there appears to be good reason to have public disclosure statements, particularly so that those who deal with or appear before boards and commissions can assure themselves that board or commission members have no conflicts of interests, or, if they do, that they are properly "recusing" themselves from taking action.

When disclosure statements are kept confidential, suspicion can be quickly generated with regard to a board or commission member's possible conflicts of interests. To this extent, public disclosure statements go a long way to assure the public that there are in fact no apparent ethics problems or conflicts of interests. This weighs strongly for having board and commission members file public disclosures.

. . . . [H]aving only the Hawaii State Ethics Commission see confidential disclosures may not satisfy the public, or the oversight responsibilities of the Legislature itself. In order to enhance public confidence in state government, having public disclosures would no doubt serve to further public confidence in state government. Again, however, the disadvantage to this is that competent and wise board and commission members may be dissuaded from serving on boards and commissions if their financial interests are made a matter of public record.

Your Committee finds it to be in the best interest of the public for members of the following entities with significant discretionary and fiscal powers to make public financial disclosures: the Board of Agriculture, the Hawaii Community Development Authority, the Board of Trustees of the Employees' Retirement System, the Hawaiian Homes Commission, the Board of Land and Natural Resources, the Land Use Commission, the Public Utilities Commission, the Board of Directors of the Research Corporation of the University of Hawaii, and the Hawaii Tourism Authority. Accordingly, your Committee has amended this measure by narrowing its application from members of "every" board and commission to members of those entities.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1957, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1957, S.D. 1, and be placed on the calendar for Third Reading.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 429 Intergovernmental and Military Affairs on S.B. No. 807

The purpose of this measure is to allow an employee to use family leave during any calendar year to provide family care and support during the military deployment of the employee's child, spouse, or reciprocal beneficiary.

Testimony in support of this measure was submitted by the Department of Defense, the Department of Labor and Industrial Relations, the Hawaii National Guard Association, the Hawaii National Guard Enlisted Association, the National Guard Association of Hawaii Insurance Trust, and the Chamber of Commerce of Hawaii. The Department of Human Resources Development submitted comments on this measure.

Your Committee finds that it is important to address the hardships that military families often face when service members are deployed. This measure allows employees to use family leave to address many of these important issues such as, family care, and legal and financial issues directly related to or resulting from the impending military deployment of the employee's child, spouse, reciprocal beneficiary, or parent to a hostile or hazardous combat and peacekeeping zone.

Your Committee further finds that it is not only important that the employee provide the employer with a copy of the military orders verifying the military deployment, as is required in this measure, but it is equally important to verify that the family leave taken by the employee is taken in connection with addressing family care, legal, and financial issues that directly relate to or resulting from an impending military deployment.

To this end, your Committee amended this measure by clarifying the definition of 'military deployment' and by adding a new definition illuminating the parameters of what constitutes family care.

It is the intent of your Committee to allow an employee to use family leave during any calendar year to provide family care and support during the military deployment of the employee's child, spouse, or reciprocal beneficiary, and to ensure that the military deployment is verified and used appropriately in connection with family care as it is defined in this measure.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 807, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 807, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, none.

SCRep. 430 (Joint) Intergovernmental and Military Affairs and Health on S.B. No. 1708

The purpose of this measure is to provide access for military personnel to a health screening test for exposure to depleted uranium and to establish a task force to study the health effects associated with exposure to depleted uranium, which requires an environmental impact study on the storage and disposal of depleted uranium munitions on Oahu.

This measure appropriates an unspecified amount for fiscal year 2008-2009, for the purposes of conducting an environmental study of the scope and adequacy of depleted uranium storage and disposal in Hawaii and compiling a report on the training received by members of the military on exposure to depleted uranium.

Testimony was submitted in support of this measure by KAHEA: The Hawaiian-Environmental Alliance; Americans for Democratic Action, Hawai'i Chapter; Maui Peace Action; CodePINK Hawai'i Women For Peace; and nine individuals. Testimony in opposition to this measure was submitted by the Department of Defense and the Department of Health.

Your Committees find that the chemical and radiological toxicity of depleted uranium has been a reported cause of kidney dysfunction, lung damage, neurological disorders, liver infection, and high miscarriage rates among military personnel. These health problems have been reported from military personnel who have served in designated combat zones where depleted uranium munitions and armor have been used, including the 1991 Gulf War and during the three years since the 2003 invasion of Iraq.

Your Committees further find that the military use and disposal of depleted uranium munitions are capable of having a significant environmental impact, and depleted uranium has been found in contaminated ground surfaces that lead to food and ground water contamination. To that end, your Committees find that it is necessary to provide military personnel who may have been exposed to depleted uranium with access to health screening tests to test for depleted uranium exposure and to take steps to evaluate the scope and adequacy of storage and disposal of depleted uranium munitions on Oahu.

Your Committees further find that the task force appointed in this measure should include one representative from the Air Force, one from the Army, one from the Navy, and one from the Marine Corps. Your Committees further find that the use of language in this measure referring to military personnel should be standardized and the effective dates for the task force report, the operation date, and appropriation effective dates should be changed to provide adequate preparation time to meet the requirements of this measure. To this end, your Committees have amended the measure to reflect these changes.

It is the intent of your Committees to safeguard the health of military personnel by providing access to a health screening test for exposure to depleted uranium and establishing a task force to study the health effects associated with exposure to depleted uranium.

As affirmed by the records of votes of the members of your Committees on Intergovernmental and Military Affairs and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1708, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1708, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Hemmings).

SCRep. 431 Intergovernmental and Military Affairs on S.B. No. 732

The purpose of this measure is to appropriate funding for salaries and benefits for lifeguards for the islands of Maui and Kauai in areas under the jurisdiction of the Department of Land and Natural Resources, subject to county matching funds.

This measure appropriates an unspecified amount for fiscal year 2007-2008, for salaries and benefits for lifeguards for the island of Maui, and appropriates an unspecified amount for fiscal year 2007-2008, for the island of Kauai, for the same purpose.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the Hawaiian Lifeguard Association, and the Friends of Kamalani and Lydgate Park.

Your Committee finds that the State does not employ its own lifeguards, but instead contracts with the counties for its lifeguard services at select state park beaches. Currently, the City and County of Honolulu and the County of Hawaii provide lifeguards at two State park beaches. The Counties of Kauai and Maui have not participated in the program for some time due to liability concerns.

Your Committee further finds that this measure provides the necessary funding for lifeguards at Makena Beach on the island of Maui and Ke'e Beach on the island of Kauai. Serious spinal cord injuries and drownings have occurred at Makena Beach. Ke'e Beach is the gateway to the beaches along the beautiful, but dangerous Na Pali Coast and claims the lives of many visitors and residents each year. The closest lifeguard stations and emergency responders are stationed at Hanalei Beach Park and most response calls in this area result in body recovery operations.

Your Committee amended this measure by leaving the appropriation figures unspecified and by inserting language in section 4 to clarify the reference to the appropriation sections.

It is the intent of your Committee to help ensure public safety at State beach parks by appropriating funding for the salaries and benefits for lifeguards for the islands of Maui and Kauai in areas under the jurisdiction of the Department of Land and Natural Resources.

As affirmed by the record of votes of the members of your Committee on Intergovernmental and Military Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 732, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 732, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, none.

SCRep. 432 (Joint) Education and Human Services and Public Housing on S.B. No. 606

The purpose of this measure is to enact the Blind Persons' Literacy Rights and Education Act.

Your Committees received testimony in support of this measure from the Department of Human Services, Disability and Communications Access Board, and four individuals. Testimony in opposition was received from the Department of Education and one individual.

This measure establishes standards for Braille proficiency and instruction. Braille should be a fundamental part of a blind or visually impaired person's education that teaches independence through access to printed information. Every blind or visually impaired child in public school should be taught to read in a format that is accessible to the individual child, whether it is in print or Braille, to foster independence.

Your Committees have amended this measure by:

- (1) Deleting the instructional materials provision, which is covered by the federal Individuals with Disabilities Education Improvement Act of 2004 and the Hawaii Teacher Standards Board;
- (2) Deleting the certification provision, which would discourage the recruitment of Braille teachers; and
- (3) Adding an appropriation for the training of Braille teachers, to increase their competency.

As affirmed by the records of votes of the members of your Committees on Education and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 606, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 606, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 433 (Joint) Education and Intergovernmental and Military Affairs on S.B. No. 696

The purpose of this measure is to establish a process for determining and assessing school impact fees for financing new or expanding existing public schools or facilities when new residential subdivisions are contemplated.

Comments on the measure were submitted by the Land Use Research Foundation of Hawaii. Testimony in opposition to this measure was submitted by the Department of Education.

Your Committees find that the School Impact Fee Working Group was established pursuant to Act 246, Session Laws of Hawaii 2005, and was tasked with, among other things, submitting proposed legislation to the Legislature on its recommendations for determining school impact fees within identified school impact districts. The School Impact Fee Working Group transmitted its report to the Legislature in December 2006, which contained recommendations for two separate approaches. This measure represents the School Impact Fee Working Group's recommendation for requiring school impact fees to be calculated based on the appropriate student generation rates for each growth area. This approach presents a more narrowly tailored option for better assessing the true cost impact for each school impact district by considering the

relationship between the amount of the school impact fees and the actual impact of the new housing. However, because detailed student generation data may not be readily available for many areas of the State, use of this approach could present challenges.

Your Committees recognize and appreciate the collaborative effort and work that the School Impact Fee Working Group has provided, but understands that this measure is a work-in-progress, which requires further discussion and analysis to determine what is the best approach for determining the manner by which to calculate school impact fees and how that approach should be implemented.

Accordingly, your Committees have amended this measure by:

- (1) Clarifying the intent of the measure to require developers to provide the land for new schools and a percentage of the cost of building new classrooms needed to serve new residential developments;
- (2) Clarifying the definition of a "greenfield school impact district" to encompass any largely undeveloped, formerly agricultural area where anticipated growth will create the need for new schools in the area to serve the new housing development;
- (3) Removing the requirement that payment of assessment impact fees shall be a condition precedent to the issuance of a building permit;
- (4) Clarifying that prior to the designation of a greenfield school impact district, the Department of Education shall analyze the need for the construction of one or more schools in the area, not limited to only elementary and high schools;
- (5) Requiring the Department of Education to analyze the need to construct or expand school facilities in the area within the next twenty-five years, instead of ten years, prior to the designation of a non-greenfield school impact district;
- (6) Clarifying that the owner or developer of property, if requested by the Department of Education, shall designate the proposed area of land to be dedicated for one or more schools in determining whether the dedication of land or payment of a fee in lieu is required;
- (7) Clarifying that, when land dedication is required, the land shall be conveyed to the State upon completion of the subdivision improvements and any offsite infrastructure necessary to serve the land;
- (8) Clarifying that the fee in lieu of land dedication for residential subdivisions of fifty acres or more shall be based on the value of the improved land, as if contained in a single parcel, zoned for residential use, suitable for school construction, and serviced by roads, utilities, and drainage;
- (9) Requiring the Department of Education to pay the developer a per-acre amount for the excess acreage at a per acre value if the Department of Education needs a parcel larger than the size the developer is required to dedicate;
- (10) Clarifying that school impact fees shall be based on the costs per student of new classroom construction in the Honolulu assessment district;
- (11) Requiring the Department of Education to update the costs per student of new classroom construction every three years, assuming twenty-five students per classroom in an eight-classroom building with appurtenant restrooms;
- (12) Providing that the updated cost per student shall replace the cost applicable to classroom buildings built in 2006;
- (13) Deleting the calculated elementary, middle, and high school costs per student in the Honolulu assessment district;
- (14) Specifying that the calculation of revenue credits shall be made in the manner used to determine revenue credits in the Hawaii School Impact Fee Study; and
- (15) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 696, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 696, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, 1 (Hemmings).

SCRep. 434 Education on S.B. No. 15

The purpose of this measure is to establish a grant program in the Department of Education to develop K-12 lesson plans, curriculum, and other education materials to promote civil responsibility.

This measure also appropriates funds to the Department of Education for the grant program and for social studies textbooks.

Your Committee received testimony in support of this measure from the Department of Education and the Hawaii State Teachers Association.

Your Committee finds that it is important for Hawaii's students to understand the basic concepts of civic responsibility, including the knowledge of the fundamental process of American democracy, to allow them to fully participate in the democratic process.

Your Committee has amended this measure by adding a representative from the Judiciary to the membership of the grant award panel and by making technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 15, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 15, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 435 Education on S.B. No. 150

The purpose of this measure is to appropriate \$12,000,000 for each fiscal year of the 2007-2009 biennium to install an air conditioning system at James Campbell High School.

Your Committee received testimony in support of this measure from the Department of Education; James Campbell High School; and Haseko (Ewa), Inc.

Your Committee finds that the State should ensure that all public school classrooms have proper learning environments. For classrooms in certain geographical areas, a proper learning environment requires air conditioning to overcome stifling climate conditions. James Campbell High School is located in a geographical area that suffers from long spells of hot weather and the non-air-conditioned classrooms hinder the academic performances of both students and faculty members. The intent of this measure is to alleviate the negative environmental conditions found in the classrooms of James Campbell High School in order to provide faculty and students with proper learning environments.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 150 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 436 Education on S.B. No. 227

The purpose of this measure is to assist nonprofit private schools that serve the general public.

Specifically, this measure authorizes the issuance of special purpose revenue bonds for the purpose of assisting Hanalani Schools in financing and refinancing the planning, acquisition, construction, and improvement of its facilities.

Testimony in support of this measure was submitted by the Hawaii Association of Independent Schools and Hanalani Schools.

Your Committee finds that Hanalani Schools serve everyday families from all walks of life. Many of the students receive financial aid to defray the cost of tuition. Hanalani Schools serves an important public purpose by helping to prepare the next generation of young people to become well-educated, purposeful, and engaged citizens willing to contribute to the greater good.

Your Committee further finds that issuing special purpose revenue bonds do not divert funds away from public schools. Instead, it will help Hanalani Schools meet the educational needs of the State's children.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 227 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Nishihara).

SCRep. 437 Education on S.B. No. 620

The purpose of this measure is to assist nonprofit private schools that serve the general public.

Specifically, this measure authorizes the issuance of special purpose revenue bonds for the purpose of assisting Hawaii Preparatory Academy in financing and refinancing the planning, construction, and improvement of its facilities.

Testimony in support of this measure was submitted by the Hawaii Association of Independent Schools and Hawai'i Preparatory Academy.

Your Committee finds that Hawaii Preparatory Academy serves everyday families from all walks of life. Many of the students receive financial aid to defray the cost of tuition. Hawaii Preparatory Academy serves an important public purpose by helping to prepare the next generation of young people to become well-educated, purposeful, and engaged citizens willing to contribute to the greater good.

Your Committee further finds that issuing special purpose revenue bonds do not divert funds away from public schools. Instead, it will help Hawaii Preparatory Academy to provide quality education in an environment that is safe and conducive to learning.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 620 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Nishihara).

SCRep. 438 Education on S.B. No. 660

The purpose of this measure is to appropriate funding to Hana High and Elementary School and Ka'u High School to purchase vans for student transportation.

In all, this measure appropriates \$100,000 for fiscal year 2007-2008 for this purpose.

Testimony in support of this measure was received by the Department of Education.

Your Committee finds that there is an urgent need to provide transportation for students attending Hana High and Elementary School and Ka'u High School on the island of Maui to various field trips, athletic events, and to other activities. It is the intent of your Committee to provide one van for Hana High and Elementary School and one van for Ka'u High School.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 660 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 439 Education on S.B. No. 664

The purpose of this measure is to authorize the issuance of special purpose revenue bonds for the construction and improvement of education facilities at Sacred Hearts Academy, a not-for-profit private sectarian school.

Your Committee received testimony in support of this measure from Sacred Hearts Academy and the Hawaii Association of Independent Schools.

According to Sacred Hearts Academy's testimony, the special purpose revenue bonds under this measure will finance the construction of several structures to provide adequate facilities for its programs and to enhance the education it provides for its students. The plan is to build an

eighteen thousand square foot performing arts building that will house and expand its current performing arts courses, including band, chorus, dance, and drama. Sacred Hearts Academy also intends to replace the current cafeteria, built fifty years ago, with a new multi-purpose student center where students can gather for lunch, interact with peers, and collaborate on community service projects.

Your Committee further finds that the issuance of special purpose revenue bonds under this measure is in the public interest and for the public's general welfare.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 664 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 440 Education on S.B. No. 759

The purpose of this measure is to make needed repairs and improvements to state public schools.

Specifically, this measure makes an appropriation for capitol improvement projects for public schools located in the Ninth Senatorial District.

Testimony in support of this measure was submitted by Ali'iolani Elementary, and WM. P. Jarrett Middle School, two members of the Jarrett Middle School Community Council, and two teachers of Jarrett Middle School. The Department of Education submitted testimony supporting the intent.

Your Committee finds that the repair and improvements to state public schools is essential for the health and well being of the State's public school students. Your Committee finds that the appropriations made by this measure are an important use of the State's resources.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 759 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 441 Education on S.B. No. 1027

The purpose of this measure is to appropriate \$1,645,000 in general obligation bond revenues to the Department of Education for a new science building at Moloka'i High School.

Your Committee received testimony in support of this measure from the Department of Education and a council member of the County Council of Maui County.

Your Committee finds that Moloka'i High School is in need of science classrooms that are designed to support the specialty needs of the high school science curriculum. This measure will authorize general obligation bonds to meet that need.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1027 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 442 Education on S.B. No. 1092

The purpose of this measure is to provide for the repair and maintenance of Hawaii public schools.

Specifically, this measure extends the lapse date on the appropriation made in Act 246, Session Laws of Hawaii 2006, for the repair and maintenance of Department of Education school facilities from June 30, 2007, to June 30, 2008.

Testimony in support of this measure was submitted by the Department of Education and the Hawaii State Teachers Association.

Your Committee finds that the sum appropriated was allotted in December 2006, giving the Department of Education a mere six months to encumber the \$40 million. This expenditure is necessary for the repair and maintenance of the State's public schools. Extending the lapse date to June 30, 2008, would help the Department fulfill the purposes of the Act and meet the needs of the State's public school facilities.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1092 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Nishihara).

SCRep. 443 Education on S.B. No. 1130

The purpose of this measure is to improve the two-tier junior kindergarten and kindergarten program within the Department of Education by providing appropriate curriculum and faculty for each tier.

Specifically, this measure:

- (1) Prohibits the movement of junior kindergarten and kindergarten students between tiers;
- (2) Prohibits a junior kindergartener from directly graduating to first grade;
- (3) Ensures that a separate curriculum is established for the junior kindergarten program;
- (4) Requires the Department of Education to staff junior kindergartens with qualified preschool teachers and preschool teacher aides;
- (5) Requires the Hawaii Teacher Standards Board to develop standards for teachers and teacher aides assigned to junior kindergarten classrooms; and
- (6) Appropriates funds for the implementation of a junior kindergarten program that achieves a 10:1 student to teacher ratio.

Testimony in support of this measure was submitted by the Hawaii Teacher Standards Board, the Hawaii Association of Independent Schools, Kamehameha Schools, the Hawaii Educational Policy Center, and one individual. Testimony in opposition to this measure was submitted by the Department of Education (DOE). Comments on the measure were also submitted by Good Beginnings Alliance and one individual.

Your Committee finds that pursuant to Act 219, Session Laws of Hawaii 2004, a two-tier junior kindergarten and kindergarten program was established within the DOE. Act 219, provided for the development of a program that maintained separate curriculum appropriate for each tier and was flexible enough to allow for movement between tiers. However, a separate curriculum has not been clearly established for junior kindergarten and movement between tiers and between junior kindergarten and first grade is extremely fluid and without determinative criteria. Your Committee determines that a clear separation between the junior kindergarten and kindergarten tiers must be established, through the development of separate curricula for each tier and the provision of adequate funding and requirements for teaching and support staff for junior kindergartens.

Upon further review of the measure and the testimony provided, your Committee believes that prohibiting any movement between tiers may be too restrictive and that some movement may be appropriate, but under more specific conditions. Transition between grades should be determined through appropriate assessments. However, your Committee determines that the DOE may require time to find successful models. Therefore, in the interim, the DOE can rely on the expertise of teachers who have backgrounds and experience in early childhood education and may allow movement if a school currently utilizes appropriate tests on a child's academic, physical, social, and emotional abilities. Finally, as it is not currently within the purview of the Hawaii Teacher Standards Board to develop standards for teacher aides, the responsibility should be removed from the measure.

Accordingly, your Committee has amended this measure by:

- (1) Allowing movement between junior kindergarten and kindergarten when the decision is based on appropriate assessments determined by:
 - (A) The professional judgment and experience of a qualified teacher with an early childhood education background and experience; or
 - (B) The testing of a student's academic, physical, social, and emotional abilities;
- (2) Requiring the DOE to report to the Legislature on information on successful models and a plan for using appropriate assessments for placement and decision making on movement between the junior kindergarten and kindergarten tiers and first grade beginning with the 2008-2009 school year;
- (3) Requiring the DOE to incorporate the Hawaii preschool content standards for four-year olds in developing the curriculum for junior kindergarten;
- (4) Removing the requirement that the Hawaii Teacher Standards Board develop standards for preschool teachers and preschool teacher aides;
- (5) Clarifying that funds are being appropriated to require the DOE to achieve a student to teacher ratio of 10:1 and not greater than 15:1;
- (6) Including an appropriation for a permanent educational specialist to focus on early childhood education and be responsible for policies, curriculum, and assessments relating to kindergarten, junior kindergarten, and other pre-kindergarten programs; and
- (7) Making technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1130, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1130, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 444 Education on S.B. No. 1143

The purpose of this measure is to require collaboration between school principals, faculty, and school community councils in the development of school academic and financial plans.

Additionally, this measure:

- (1) Appropriates funds for the reduction of kindergarten class sizes;
- (2) Appropriates funds for establishing new teacher advisors/peer assistance mentors in schools; and
- (3) Clarifies the manner by which teacher representation on school community councils is determined.

Testimony in support of this measure was submitted by the Department of Education and the Hawaii State Teachers Association. Testimony in opposition to this measure was submitted by the Hawaii Government Employees Association.

Your Committee finds that collaboration is a key component to developing a successful school academic and financial plan. Under the existing law, school principals are tasked with the development of academic and financial plans for review and approval by the school community councils. This measure contemplates the development of academic and financial plans collaboratively by the principal and the school's faculty, as well as specifies further limitations on a principal's authority over the implementation of the academic and financial plan. Upon further review of the measure and the testimony provided, your Committee believes that the process currently supports adequate collaborative efforts, while also providing for clear accountability on the part of school principals in the development and implementation of a school's academic and financial plan.

Your Committee further finds that the manner by which teachers are selected for representation on school community councils requires clarification and flexibility to allow the exclusive representative for the employee organization to determine an appropriate process. This measure addresses that concern. Your Committee is also mindful that selection of a student representative at the primary school level should contemplate situations where no formal student council exists to provide student representation.

Additionally, this measure addresses your Committee's concerns that kindergarten class sizes should be reduced to ensure that our students are receiving adequate attention in the classrooms and that a mentoring program is necessary to provide advice and assistance to new teachers. Your Committee believes that kindergarten classes should be reduced to reach an eighteen-to-one student to teacher ratio and that junior kindergarten classes should also be reduced to achieve a ten-to-one student to teacher ratio. Furthermore, your Committee determines that the new teacher advisors/peer assistance mentors should be established to provide mentoring services to the new teachers at the complex area level.

Accordingly, your Committee has amended this measure by:

- (1) Removing the provisions regarding the principal's authority to develop and implement the school's academic and financial plan;
- (2) Including language that allows a school principal to determine the selection process for student representation on the school community council when no student council exists;
- (3) Specifying that kindergarten class size should be reduced to an eighteen-to-one student to teacher ratio;
- (4) Specifying that junior kindergarten class size should be reduced to a ten-to-one student to teacher ratio;
- (5) Specifying that the establishment of new teacher advisors/peer assistance mentors should be done with the target of achieving a ratio of fifteen new teachers to one new teacher advisor/peer assistance mentor within each school complex area;
- (6) Making the appropriations in the measure applicable for both years of the 2007-2009 fiscal biennium; and
- (7) Making technical, nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1143, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1143, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Taniguchi).

SCRep. 445 Education on S.B. No. 1149

The purpose of this measure is to improve statewide performance standards for the Department of Education schools.

Specifically, this measure:

- (1) Updates membership and reporting schedules for the Performance Standards Commission;
- (2) Removes references to specific federal laws and the current testing grades in anticipation of possible changes in the federal laws;
- (3) Requires greater focus on the use of alternative assessments based on student performance;
- (4) Requires a more concerted effort for the development of a "growth model" for Hawaii public schools; and
- (5) Appropriates funds for the Hawaii Educational Policy Center to take the lead in the development of alternative assessments and to continue to provide expert analyses and commentary to assist policy makers.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Teachers Association, and the Hawai'i Educational Policy Center.

Your Committee finds that the education of Hawaii's children is of the utmost importance to the future of the people of Hawaii. The State must endeavor to provide keiki with not only an education, but with the highest quality education that can be provided that meets their needs accordingly. Your Committee further finds that, currently, the Department of Education may not be utilizing the most appropriate assessment tools necessary to meet the specific needs of the students in Hawaii. To address the issue, the Performance Standards Review Commission was convened in 1997 to assess the effectiveness and implementation of performance standards every four years. In its most recent report to the Board of Education, the Performance Standards Commission determined that the current performance standards did not require modification at this time.

Your Committee determines the assistance of an independent organization to analyze and spearhead the development of appropriate assessments is necessary to truly benefit the students of Hawaii. A collaborative effort should be undertaken by interested parties, including the Department of Education, to develop a more comprehensive "growth model" for Hawaii public schools.

Accordingly, your Committee has amended this measure by:

- (1) Removing amendments made to the Performance Standards Review Commission's composition and reporting duties;
- (2) Deleting provisions removing references to specific federal laws and the current testing grades;
- (3) Removing the provision requiring greater focus on the use of alternative assessments based on student performance;
- (4) Clarifying that funds are appropriated for the Hawaii Educational Policy Center to work with the Department of Education and other educational research organizations to develop alternative assessment tools, including a comprehensive "growth model"; and
- (5) Authorizing the Hawaii Educational Policy Center to contract with appropriate professionals to assist in the development of alternative assessment tools.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1149, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1149, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 446 Education on S.B. No. 1214

The purpose of this measure is to authorize the issuance of special purpose revenue bonds for Le Jardin Academy for the construction, improvement, and equipping of its educational facilities.

Le Jardin Academy and the Hawaii Association of Independent Schools submitted testimony in support of this measure.

Your Committee finds that Le Jardin Academy intends to construct a new administrative building along with new classrooms that will include science laboratories. These classrooms will be used by both middle and high school students. A gymnasium and an arts center will also be constructed that will benefit all students in pre-kindergarten through grade twelve. Your Committee further finds that the issuance of special purpose revenue bonds under this measure is in the public interest and for the public's general welfare.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1214 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 447 Education on S.B. No. 1265

The purpose of this measure is to support the education and professional development of teachers in the public schools, through funding and improvements to programs under the Department of Education and the University of Hawaii.

Specifically, this measure:

- (1) Changes the Performance Standards Review Commission membership and reporting schedule;
- (2) Clarifies the intended purpose of the Hawaii Educator Loan Program and amends the program's loan forgiveness incentive provisions; and
- (3) Appropriates funds to the University of Hawaii for various programs and objectives, including the Office of School Redesign, teacher education and professional development, the Master of Education in Teaching degree program, additional staff for the Hawaii Educational Policy Center, and the Hawaii Educator Loan Program.

Testimony in support of this measure was submitted by the Office of the Governor, the Department of Education, the University of Hawaii'i, the Office of School Redesign of the University of Hawaii, and the Hawaii'i Educational Policy Center.

Your Committee finds that Hawaii is experiencing a critical teacher shortage that jeopardizes the education of the students in the public school system. Recruitment and retention of qualified teachers also poses a real problem for the public schools. The College of Education of the University of Hawaii plays a significant role in growing and developing a qualified teaching workforce through its education of future teachers, continued professional development of educators, and programs that lead to licensing, certificate programs, mentoring of teachings, educational research, and policy studies.

In recent years, the need for a qualified workforce possessing science, technology, engineering, and mathematics (STEM) skills has become a key issue for the public schools. The development of skills and knowledge in the STEM disciplines has been lacking in the public schools, and the proper education and training of teachers is necessary to ensure that students are appropriately educated and ready to pursue post-secondary education or careers in those areas. Increased initiatives and resources must be channeled to programs that will provide enhanced professional development in STEM subjects for educators in Hawaii.

Your Committee believes that the appropriate funding and placement of professional development programs is important to developing a qualified teaching workforce to help prepare Hawaii's students for entry into college and the workforce.

Additionally, your Committee determines that provisions of this measure regarding current statewide performance standards, the Performance Standards Review Commission, and reporting schedules have been addressed in another measure passed by this Committee. Therefore, they should be deleted from this measure to further focus the attention on issues relating to the education and professional development of teachers.

Accordingly, your Committee has amended this measure by:

- (1) Deleting changes to the statewide Performance Standards Review Commission composition, the requirement for the development of assessments, and reporting requirements;
- (2) Removing the appropriation for the Hawaii Educational Policy Center;
- (3) Establishing the Research Experiences for Teachers program to support the development of middle school teacher STEM skills and knowledge and develop middle school curriculum for STEM subjects and providing funding therefor;
- (4) Establishing a professional development program to provide practicing elementary, middle, and high school teachers of science and mathematics with opportunities to increase their knowledge and understanding in STEM subjects and providing funding therefore; and
- (5) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1265, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1265, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 448 Education on S.B. No. 1615

The purpose of this measure is to appropriate funds for the repair and/or replacement of swimming pools in the County of Hawaii located at Honoka'a, Konawaena, and Laupahoehoe High Schools.

Your Committee received testimony in support of this measure from the Department of Education, the Office of the Mayor of the County of Hawaii, and the Department of Parks and Recreation of the County of Hawaii'i.

Your Committee finds that county swimming pools located at or immediately adjacent to public high school campuses and utilized by the school for physical education classes, swim teams, and even the general public, are old and in need of repair and renovation. The intent of this measure is to provide funding for the repair and/or replacement of swimming pools in the County of Hawaii.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1615 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 449 Education on S.B. No. 1820

The purpose of this measure is to authorize the Department of Education to enter into financing agreements without the approval of the Director of Budget and Finance or the Comptroller, and to create a separate account within the State Education Facilities Improvements Special Fund to be called the Lease Payments for Schools Account.

The Director and the President of the Kihei Community Association, and one individual submitted testimony in support of this measure. The Department of Education submitted testimony in support of the intent of this measure. The Department of Budget and Finance submitted testimony in opposition.

Your Committee finds that public schools in Hawaii are suffering from severe overcrowding, which negatively impacts the learning potential of students. An alternate way of financing new school projects without using general obligation bonds needs to be implemented. Partnerships between public schools and private developers are a cost-effective and timely way to finance new school construction to help alleviate overcrowding.

This measure will provide the Board of Education with more autonomy in the acquisition of new school design and construction projects by establishing a separate account that is subject to legislative approval for the payment of lease-purchase agreements.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1820 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 450 (Joint) Health and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1676

The purpose of this measure is to ensure quality health care services by providing access to affordable medical malpractice and hospital professional and general liability coverage to our state hospital system.

Specifically, this measure authorizes and provides initial funding for the establishment of a domestic captive insurance company five-year pilot project, by the Hawaii Health Systems Corporation, to provide medical malpractice and hospital and general liability coverage to the corporation and the physicians serving the entity.

Your Committees received testimony in support of this measure from Hawaii Health Systems Corporation. The Department of Commerce and Consumer Affairs submitted comments on this measure.

Your Committees find that actuarial studies need to be conducted in order to accurately recommend an appropriation amount.

Your Committees find that the cost of hospital professional and general liability coverage continues to rise. Further, your Committees find that there is a lack of insurers willing to provide coverage in Hawaii, and the policies offered have decreased limits of available coverage and restrictions on what liability exposures are covered. Your Committees find that a captive insurance company to provide hospital malpractice coverage is a good alternative, and according to the Insurance Commissioner's testimony, is almost the only alternative available at this time.

Your Committees have adopted the recommendations of the Department of Commerce and Consumer Affairs and amended this measure by removing the "carve out" language in section 3 due to sufficient authority in existing captive statutes that would allow the Insurance Commissioner to license a captive for Hawaii Health Systems Corporation's pilot project.

Your Committees further amended this measure by changing the effective date to encourage further discussion.

As affirmed by the records of votes of the members of your Committees on Health and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1676, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1676, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 3 (Ihara, Sakamoto, Whalen).

SCRep. 451 (Joint) Health and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1678

The purpose of this measure is to provide quality health care services and increase the number of physicians in Hawaii by ensuring that adequate resources are provided to cover the true costs of providing care.

The measure attempts to accomplish this purpose by requiring all mutual benefit societies to reimburse health care providers, hospitals, and nursing facilities one hundred per cent or more of current Medicare Resource Based Relative Value Scale for Hawaii.

Your Committees received testimony in support of this measure from the Occupational Therapy Association of Hawaii. Testimony in support of the intent of this measure with recommendations was submitted by the Department of Human Services, Hawaii Pacific Health, and Kaiser Permanente. Your Committees received testimony in opposition to this measure from Hawaii Medical Service Association. The Department of Commerce and Consumer Affairs submitted comments on this measure.

The Department of Human Services did not submit a recommended appropriation amount for Part II of this measure.

Your Committees find that Hawaii is facing a serious health care crisis. This is partly due to the inadequate number of health care providers willing to provide care to Medicaid and Medicare insured consumers. Your Committees find that health care providers are not getting reimbursed

the full amount of the cost of providing care to these individuals. Reimbursement levels need to be raised and updated yearly to remain current to ensure quality health care is provided to all residents of Hawaii.

Accordingly, your Committees amended this measure by:

- (1) Removing the application of the Medicare Resource Based Relative Value Scale system for rate determination and replacing it with the requirement that reimbursement rates not less than one hundred per cent of the Medicare reimbursement amount that is in effect for fraternal benefit societies (chapter 432, Hawaii Revised Statutes), accident and sickness insurance (chapter 431:10A, Hawaii Revised Statutes), and health maintenance organizations (chapter 432D, Hawaii Revised Statutes) for the current year and updated for each calendar year thereafter;
- (2) Removing the application of the Medicare Resource Based Relative Value Scale system for rate determination and replaced it with the requirement that reimbursement rates for hospitals and nursing facilities be one hundred ten per cent of the Medicaid or Medicare reimbursement rate in effect for the current year and updated for each calendar year thereafter for health services paid by the Department of Human Services;
- (3) Including Health Maintenance Organizations in the reimbursement requirement, and by including outpatient hospital services, but not emergency room services, in the rate of payment requirement that is based upon the Hawaii Medicaid Fee Schedule; and
- (4) Changing the effective date to encourage further discussion.

As affirmed by the records of votes of the members of your Committees on Health and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1678, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1678, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 3 (Ihara, Sakamoto, Whalen).

SCRep. 452 (Joint/Majority) Health and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1739

The purpose of this measure is to prevent deaths caused by colorectal cancer and to increase public awareness about the importance of colorectal cancer screening by colonoscopy.

Specifically, this measure requires health insurance policies to cover screening for colorectal cancer by colonoscopy every ten years, beginning at age fifty.

The Department of Commerce and Consumer Affairs, Hawaii Medical Service Association, and American Family Life Assurance Company submitted comments on this measure. Your Committees received testimony in opposition to this measure from Kaiser Permanente, and Aloha Care.

Your Committees find that colorectal cancer is the second leading cancer killer in the United States in individuals age fifty and older. Hawaii has the highest rates of colorectal cancer in the nation. Your Committees further find that it is also one of the most preventable types of cancer. Regular screening tests can find precancerous colorectal polyps so they can be removed before they turn into cancer.

Your Committees find that requiring colorectal screening by colonoscopy is not appropriate for certain types of supplementary health insurance, such as limited benefit insurance policies.

Accordingly, your Committees amended this measure by removing limited benefit insurance policies from the requirement to cover colonoscopies for colorectal cancer screening, and placed the new provision for accident and health insurance in the more appropriate section 431:10A-116, Hawaii Revised Statutes, which provides for coverage for specific services.

As affirmed by the records of votes of the members of your Committees on Health and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1739, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1739, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, 1 (Slom). Excused, 3 (Ihara, Sakamoto, Whalen).

SCRep. 453 (Joint) Health and Education on S.B. No. 1283

The purpose of this measure is to support the new medical school facility in Kakaako.

The measure accomplishes this goal by authorizing the use of the Tobacco Settlement Special Fund, created by Act 304, Session Laws of Hawaii 1999, to help pay annual operating expenses incurred by the new medical school facility.

Your Committees received testimony in support of this measure from one individual. The University of Hawaii John A. Burns School of Medicine submitted testimony supporting the intent of this measure. Your Committees received testimony in opposition to this measure from the Department of Health, the Department of Budget and Finance, the Coalition for a Tobacco Free Hawai'i, and the American Heart Association.

Your Committees find that the new medical school facility in Kakaako may require additional funding to ensure its successful operation. Your Committees further find that the Legislature appropriated funds for the initial set-up of the new medical facility, with the understanding that the school would be self-supporting thereafter.

Thus, your Committees request that the University of Hawaii John A. Burns School of Medicine supply the Committees with information justifying the funding requested in this measure.

Your Committees amended this measure by changing the effective date to encourage further discussion, and by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Health and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1283, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1283, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 10. Ayes with Reservations, 1 (Gabbard). Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 454 (Joint) Health and Intergovernmental and Military Affairs on S.B. No. 153

The purpose of this measure is to appropriate funds to the Department of Health to assess the structural integrity of all hospitals and nursing homes in Hawaii to determine their ability to withstand different types of natural disasters.

The Healthcare Association of Hawaii and the Structural Engineers Association of Hawaii submitted testimony in support of this measure. The Department of Health submitted testimony in opposition to this measure. The Department of Defense submitted comments.

Your Committees received a statement from the Structural Engineers Association of Hawaii recommending that the Committees support the total funding amount necessary to conduct an assessment study of approximately \$2,000,000. According to the Structural Engineers Association of Hawaii, the assessment study would encompass approximately forty-seven skilled or intermediate care nursing facilities and twenty-four hospitals statewide.

The Office of Domestic Preparedness within the Office of Homeland Security issued a directive to each state requiring them to assess their ability to evacuate and shelter residents in the event of a disaster. Of particular concern are the special populations served by hospitals and long term care facilities. The evacuation of nursing home residents should be considered only after all other options have been considered. Enabling nursing homes to "shelter in place" their residents and staff is the preferred alternative because it eliminates any risks resulting from transportation and does not use scarce emergency shelter resources. However, this option requires confidence in the structural integrity of the nursing homes.

It is your Committees' intent to require the Department of Health to assess the structural integrity of hospitals and nursing home facilities in Hawaii. Your Committees have amended this measure by:

- (1) Appropriating an unspecified sum instead of \$2,000,000;
- (2) Changing the effective date from July 1, 2007, to July 1, 2020; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Health and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 153, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 153, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Hemmings).

SCRep. 455 (Joint) Health and Human Services and Public Housing on S.B. No. 973

The purpose of this measure is to ensure that uninsured and under-insured individuals have access to quality health care.

The measure accomplishes this goal by:

- (1) Establishing a process by which federally qualified health centers and rural health centers receive supplemental Medicaid payments;
- (2) Providing for prospective payment system rates to be adjusted for any adjustment in the scope of services; and
- (3) Appropriating funds for federally qualified health centers and rural health centers to provide health care services to uninsured residents of Hawaii.

Your Committees received testimony in support of this measure from the Hawai'i Primary Care Association; Healthcare Association of Hawaii; the Waikiki Health Center; Kalihi-Palama Health Center; the West Hawaii Community Health Center, Inc.; Ho'ola Lahui Hawai'i; the Community Clinic of Maui; Hamakua Health Center; Waianae Coast Comprehensive Health Center; Kokua Kalih Valley; Moloka'i Community Health Center; Waimanalo Health Center; and seven individuals. The Department of Human Services submitted testimony supporting the intent of this measure. The Department of Health and Hawaii Primary Care Association submitted comments on this measure.

Your Committees find that federally qualified health centers and rural health centers are the most effective system for ensuring that quality health care services are provided to individuals who are uninsured or under-insured. Your Committees further find that these community health centers have continued to experience an increase in the number of patients and families in need of health care services.

Your Committees also find that, to ensure the viability of community health centers, subsidies are necessary to care for the uninsured. In addition, changes to the Med-QUEST preferred payment system rules are imperative to ensure that community health centers receive timely and adequate compensation.

Your Committees have amended this measure by:

- (1) Changing the time requirement, for the Department of Human Services to review reports and notify rejections, from ninety days to within one hundred twenty days;
- (2) Clarifying that federally qualified health centers or rural health centers proposed projected rate shall be calculated based on a consolidated basis, where the federally qualified health center or rural health center takes all costs for the facility that would bring in both the costs included in the base rate as well as the additional costs for the change, as long as the federally qualified health center or rural health center had filed its baseline cost report based on total consolidated costs;
- (3) Providing that the Department of Human Services may disallow a per cent of the rate increase, to account for cost increases associated with normal inflation increase of costs included in the base rate;
- (4) Including dental hygienist in the definition of health professional;

- (5) Including as reimbursable services those provided to a patient that has one or more visits for other services such as dental, behavioral health, or optometry. Medicaid will pay for a maximum of one visit per day for each of these services in addition to one medical visit;
- (6) Clarifying the requirement that all payments owed by the Department of Human Services shall be made within two hundred ten days from the department's initial receipt of the report for final settlement as specified in the sections above;
- (7) Changing the effective date to July 1, 2020, to encourage further discussion; and
- (8) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 973, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 973, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Menor, Hemmings).

SCRep. 456 (Joint) Health and Human Services and Public Housing on S.B. No. 1115

The purpose of this measure is to provide comprehensive perinatal care on the island of Oahu to women who have a history of methamphetamine and other substance abuse.

Specifically, this measure authorizes the carryover of funds in the amount of \$200,000 that were originally appropriated under Act 248, Session Laws of Hawaii 2006, for the 2006-2007 fiscal year to continue the funding for the operation of the perinatal pilot clinic at the John A. Burns School of Medicine at the University of Hawaii at Manoa during the 2007-2008 fiscal year.

Your Committees received testimony in support of this measure from the Hawaii State Commission on the Status of Women, the John A. Burns School of Medicine at the University of Hawaii at Manoa, Hawaii Medical Association, the Drug Policy Forum of Hawaii, and one individual. The Department of Human Services submitted comments on this measure.

Your Committees find that providing perinatal care to pregnant women with a history of substance abuse is vital to ensure the health of the child and the mother. Your Committees further find that one of the barriers to women seeking perinatal care is fear of prosecution. This program recognizes the importance of applying a public health approach to the issue of pregnant women who are substance abusers.

Your Committees amended this measure by replacing the John A. Burns School of Medicine University Clinical Educational and Research Associates Program at the University of Hawaii Department of Obstetrics, Gynecology, and Women's Health with the Department of Human Services as the expending agency.

Your Committees further amended this measure by changing the effective date to June 30, 2007, for budgetary purposes.

As affirmed by the records of votes of the members of your Committees on Health and Human Services and Public Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1115, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1115, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Ihara).

SCRep. 457 Energy and Environment on S.B. No. 642

The purpose of this measure is to clarify when supplemental environmental impact statements should be conducted.

Specifically, this measure provides for the preparation of a supplemental environmental impact statement when:

- (1) There are changes proposed in a project;
- (2) Substantial changes occur with respect to circumstances under which a project is being undertaken; or
- (3) New information becomes available that was not known at the time the environmental impact statement was accepted.

Testimony in support of this measure was submitted by the Office of Environmental Quality Control; the Mayor of the County of Maui; Hawaii's Thousand Friends; Keep the North Shore Country; Kuli'ou'ou/ Kalani Iki Neighborhood Board #2; O'ahu County Committee of the Democratic Party of Hawaii; Office of Hawaiian Affairs; Sierra Club, Hawai'i Chapter; Windward Ahupua'a Alliance, and one individual. Testimony in opposition to this measure was submitted by the Land Use Research Foundation of Hawaii and Kuilima Resort Company. The Department of the Attorney General submitted comments.

Your Committee finds that communities need to know what environmental impacts developments will have. Furthermore, your Committee recognizes that changes occurring in the community over the period of time that a long development is taking place can result in different impacts than were foreseen in the planning stages of the development. Your Committee finds that requiring supplemental impact statements is not unduly burdensome on developers and are essential for getting the necessary information regarding the impacts on the community so that mitigation measures can be considered if necessary.

Your Committee notes that by basing the requirement for supplemental statements on whether there have been "substantial changes" does not set an arbitrary time limit. Rather, it serves the needs of communities while limiting the requirement on developers to cases where real changes in impacts are likely to have occurred. Your Committee notes that several testifiers mentioned the expansion of the Turtle Bay Resort in Kahuku, which was approved over twenty years ago, as an example of how long developments can take and the resulting changes or changes in understanding regarding cultural, environmental, and community issues.

Your Committee believes this measure will help decision makers make informed decisions about whether or not a project should go forward, and how to balance those going forward with protecting the State's natural and cultural resources.

This measure has been amended to:

- (1) Substitute "environmental impact statements" for "environmental impact reports", for accuracy and consistency with the terminology used in the statute and regulations;
- (2) Substitute "accepted" for "certified as complete", for accuracy and consistency with the terminology used in the statute and regulations;
- (3) Provide a definition for "substantial changes"; and
- (4) Amend section 343-5(g), Hawaii Revised Statutes, which provides that no additional statement shall be required once a statement is accepted, to provide an exception to conform to the new section provided in this measure.

Technical, nonsubstantive changes have also been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 642, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 642, S.D. 1, and be referred to the Committees on Water, Land, Agriculture, and Hawaiian Affairs and Intergovernmental and Military Affairs.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Ihara, Kokubun).

SCRep. 458 (Joint) Energy and Environment and Health on S.B. No. 651

The purpose of this measure is to require recycling receptacles to be housed in all state offices and buildings.

Testimony in opposition to this measure was submitted by the Department of Health.

Your Committees find that recycling should be made available in all state office buildings for aluminum cans, glass bottles, plastic containers, white and colored paper, and newspaper.

Your Committees further find that the purchase and maintenance of the recycling receptacles should be included in recycling service contracts and that recycling companies providing the pick-up service of the recyclable material should provide the receptacles as part of their service. To this end, your Committees amended this measure to provide for this change. Your Committees have also deleted the appropriation section contained in the measure since the Department of Health, under the amended provisions of this measure, would no longer be responsible for purchasing recycling receptacles.

It is the intent of your Committees to make recycling receptacles available in all state buildings and to require the pick-up service company to provide the recycling receptacles, which will allow the recycling companies to select the most appropriate and efficient receptacles for each building.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 651, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 651, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, 1 (Kokubun).

SCRep. 459 (Joint) Energy and Environment and Education on S.B. No. 1669

The purpose of this measure is to appropriate funds for various renewable energy projects in Hawaii.

This measure appropriates \$3,000,000 for fiscal year 2007-2008, for the research and development of a five-acre pilot project, to be located at the Natural Energy Laboratory of Hawaii, to produce biodiesel from marine algae.

This measure also appropriates \$5,250,000 for fiscal year 2007-2008, to establish the Hawaii Renewable Energy and Biofuel Center in Maui, to equip the University of Hawaii at Hilo, College of Agriculture, Forestry and Natural Resources Management with an oil and feedmill building to house existing equipment to be used in processing oilseed and for research and demonstration of a germplasm collection.

Testimony in support of this measure was submitted by the University of Hawaii at Manoa, the University of Hawaii at Hilo, Hawaiian Electric Company, Inc., the World Business Academy, Enterprise Honolulu, Hawaii Biodiesel Consortium, the Sierra Club, Hawaii Chapter, Aloha Green, and Oceanic Institute.

Your Committees find that while ethanol can be used in cars, biodiesel or bio-jet fuel is needed for heavy transportation, ships, and jetliners. One means with excellent potential for producing biodiesel fuel is to extract it from algae, especially salt water or marine algae. Algae can produce vastly more biofuel oil per acre than any other source. Using current technology for producing marine algae, six thousand gallons per acre of biodiesel from algae is a realistic production target. This compares to a fuel yield of only fifteen hundred gallons per acre for sugarcane ethanol produced using the Brazilian method. Algae uses no fresh water and far less land than any other biofuel crop, and can be grown on any land that is near the ocean. Algae from sea water would have the added benefit of consuming excess carbon dioxide as an aid to algae growth, reducing a harmful greenhouse gas that contributes to global warming.

Your Committees further find that Maui county has declared that its top priority in renewable energy and biodiesel production is a facility to house the concerted research and demonstration activities needed for feedstock development. The facility would also be home to the development of supporting related technologies that will truly create a sustainable biofuel industry in the State of Hawaii.

Your Committees further find that while this measure, in part, appropriates funding for the research and development of a five-acre pilot project, to be located at the Natural Energy Laboratory of Hawaii in order to produce biodiesel from marine algae, private funding exists for this purpose. To this end, your Committees amended this measure by removing this appropriation and amending the purpose section to reflect this deletion.

It is the intent of your Committees to appropriate funds to establish the Hawaii Renewable Energy and Biofuel Center in Maui, to equip the University of Hawaii at Hilo, College of Agriculture, Forestry and Natural Resources Management with an oil and feedmill building to house existing equipment to be used in processing oilseed, and providing funding for research and demonstration of a germplasm collection.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1669, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1669, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 4 (Chun Oakland, Hee, Kokubun, Taniguchi).

SCRep. 460 Energy and Environment on S.B. No. 1612

The purpose of this measure is to improve the environmental quality of the State by reducing greenhouse gas emissions.

Specifically, this measure establishes a greenhouse gas emissions reduction program in which the Department of Health is required to establish greenhouse gas emission limits and emission reduction standards to achieve the maximum technologically feasible and cost-effective reductions by January 1, 2008, regularly report and verify statewide greenhouse gas emissions, and monitor and enforce compliance. This measure authorizes the adoption of market based compliance mechanisms and requires the adoption of a statewide greenhouse gas emissions limit equivalent to the statewide levels in 1990 to be achieved by 2020.

Testimony in support of this measure was submitted by the Conservation Council for Hawai'i; Hawaii Solar Energy Association; Honolulu Seawater Air Conditioning, LLC; Life of the Land; Respiratory and Environmental Disabilities Association of Hawaii; Sierra Club, Hawai'i Chapter; Windward Ahupua'a Alliance; and twenty-three individuals. Testimony in opposition to this measure was submitted by the Department of Health and Western States Petroleum Association. Covanta Energy Group, operator of HPOWER; Hawaiian Electric Company, Inc.; Hawaii Electric Light Company, Inc.; and Maui Electric Company, Inc. One individual submitted comments.

Your Committee finds that, given our precious and finite resources, it is essential that Hawaii continue its tradition of environmental leadership by moving forward in efforts to reduce emissions of greenhouse gases. In doing so, Hawaii will not only serve as an example, but will also position the State's economy, technology centers, financial institutions, and businesses to benefit from national and international efforts to reduce emissions of greenhouse gases.

Your Committee further finds that it is important to reduce greenhouse gas emissions and its global warming effect for the sake of preserving our native flora, fauna, and our community health. Failing to take action now could result in natural catastrophes in the not too distant future, including rising sea levels, salination of the State's aquifers, and other, as of yet unforeseen problems.

This measure was amended to:

- (1) Give the new chapter added by the bill the title of "Global Warming Solutions Act of 2007;"
- (2) Provide more information in the purpose section, including the recent predictions on the rise in sea level as per the United Nations Panel on Climate Change;
- (3) Require the Director of Health to consult with the Department of Business, Economic Development, and Tourism in making the determination of the 1990 greenhouse gas emissions level and for ongoing reporting of reduction plans, in order to ensure accuracy and consistency;
- (4) Postpone all start dates an additional six months, in order to give the State five full years to prepare for the new rules and regulations, and to push back the early action reduction items and scoping plan an additional six months accordingly;
- (5) Reflect the fact that, given the existing policies and rules that are in place, some duplication will be unavoidable with regard to the scoping plan, by changing the non-duplication requirement to one of minimizing duplication;
- (6) Provide an appropriation of an unspecified sum for each year of the 2007-2009 fiscal biennium for the purposes of carrying out this measure, including the hiring of any necessary staff;
- (7) Delete the establishment of the environmental justice and technological advisory committees;
- (8) Delete the section regarding the adoption of methodologies since these methodologies can be captured under the market mechanisms section; and
- (9) Postpone the effective date to July 1, 2020, to provide for further discussion of the measure.

Technical, nonsubstantive changes have also been made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1612, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1612, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 461 Education on S.B. No. 97

The purpose of this measure is to appropriate funds for the purchase of science textbooks and other teaching resources for public primary and secondary schools.

Testimony in support of this measure was submitted by the Department of Education (DOE) and the University of Hawaii System.

Your Committee finds that our public schools are in dire need of new science textbooks at the primary and secondary levels. In 2006, the Legislature appropriated \$2 million for school complex areas to purchase science textbooks and other related instructional materials pursuant to Act 160, Session Laws of Hawaii 2006. However, the fifteen complex areas subsequently requested moneys from the DOE for the purchase of science textbooks totaling approximately \$6 million.

Your Committee recognizes that a deficiency exists in the current funding and the current need for science textbooks throughout the public school system. Your Committee believes that additional funding is necessary to provide adequate learning materials for science courses in public schools throughout the State. Additionally, funding should only be provided to those schools that demonstrate the existence of a K-12 articulated science curriculum to ensure that students are able to achieve appropriate levels of knowledge and skills in science with respect to each grade

level. Your Committee further finds that to promote economic efficiency, the DOE should be required to take advantage of discounts for bulk purchases, when possible, and benefit from professional development support provided by vendors or publishers.

Your Committee is also concerned about monitoring the progress of students to ensure academic achievement and progress. Therefore, your Committee believes, that funding is necessary to provide for teacher assessments of the students' progress to determine their weaknesses as well as methods and resources that will help to ensure increased student learning and academic achievement.

Accordingly, your Committee has amended this measure by:

- (1) Requiring the DOE to utilize discounts available through bulk purchasing;
- (2) Requiring the DOE to utilize professional development support provided by vendors or publishers;
- (3) Appropriating \$750,000 to assist public school teachers in conducting assessments of their students to determine their progress and areas of weaknesses, and to identify methods or resources necessary to support academic achievement and development; and
- (4) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 97, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 97, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 462 Education on S.B. No. 1614

The purpose of this measure is to improve teacher recruitment and licensing by appropriating funds for the implementation of a new human resource management model for Waianae High School and its feeder elementary and middle schools.

Testimony in support of this measure was submitted by the Department of Education, the Hawaii State Teachers Association, the Hawaii Teacher Standards Board, Waianae High School, and three individuals.

Your Committee finds that a critical teacher shortage currently exists in Hawaii. The State must focus on efforts to grow and develop a teacher workforce, as well as recruit and retain qualified teachers in the public schools today. The issue of recruitment and retention of qualified teachers is most apparent at Waianae High School where only slightly more than half of the teachers are fully licensed. Your Committee further finds that Waianae High School currently serves approximately two thousand students with only one hundred fifty teachers. Many of the students in Waianae are living at or below the poverty level, and the academic achievement of most Waianae public schools demonstrates a lack of learning.

Your Committee recognizes the need for action in the Waianae public schools and believes that the utilization of a human resource management model could be beneficial to the school, its students, and the community at large. However, your Committee notes that several other measures have been introduced this session that address the teacher shortage problem and provide incentives and programs to increase qualified teacher recruitment and retention. Your Committee believes that, to the extent that these alternative initiatives would duplicate similar efforts provided under this measure, any funding received by Waianae High School and its feeder elementary and middle schools to achieve similar results in increasing teacher proficiency should be off-set by the appropriation made in this measure.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1614 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Nishihara, Gabbard).

SCRep. 463 Education on S.B. No. 1933

The purpose of this measure is to improve public school accountability for financial and academic performance.

Specifically, this measure:

- (1) Appropriates funds for complex area business managers, the purchase of business services, school community council training, arts education, physical education, and mathematics and science learning materials;
- (2) Establishes and appropriates funds for Applied Learning High School Academies within the Department of Education;
- (3) Appropriates funds for teacher preparation and professional development programs at the University of Hawaii;
- (4) Amends the law relating to statewide performance standards, the performance standards review commission composition, and assessment and reporting requirements;
- (5) Clarifies and amends provisions relating to the Hawaii Educator Loan Forgiveness Program;
- (6) Establishes and appropriates funds for an Early Educator Incentive Program;
- (7) Authorizes the issuance of general obligations bonds and makes appropriations to the University of Hawaii and the Department of Education for repair and maintenance projects; and
- (8) Appropriates funds for mathematics learning materials, professional development for math teachers, math coaching, and math assessments.

Testimony in support of this measure was submitted by the University of Hawaii, the College of Education of the University of Hawaii, the Hawaii Teacher Standards Board, the Hawaii State Teachers Association, the Hawaii Educational Policy Center, Kamehameha Schools, and the Early Learning Educational Task Force. Comments on the measure were also submitted by the Department of Education and the Department of Taxation.

Your Committee finds that the obligations and, in turn, the needs of schools and administrators have changed dramatically over the years, particularly with the advent of the No Child Left Behind Law and the Reinventing Education Act of 2004, Act 51, Session Laws of Hawaii 2004,

as amended. In this new environment, schools and school administrators are tasked with increased responsibilities for ensuring the provision of quality education and appropriate services to public school students. Your Committee further finds that these demands require the need for increased funding to provide greater autonomy within complex areas, to develop a more qualified teaching workforce, to improve and enhance early childhood education programs, and to address disciplines of import in the new millennium, including science, technology, engineering, and math (STEM) subjects.

This measure contains several components to address all of the foregoing needs. Many, if not all, of these components have been discussed and provided for in different measures which are also proceeding through the session. Your Committee is committed to the objectives of professional and workforce development for teachers, providing appropriate services and funds to maximize financial and academic efficiency and effectiveness in schools, and ensuring the provision of appropriate learning materials and resources. As a result, your Committee has included versions of simultaneously heard measures in this measure and removed other provisions from this measure that have already been provided for in other vehicles in its effort to meet its intended purpose.

Accordingly, your Committee has amended this measure by:

- (1) Amending the provisions establishing Applied Learning High School Academies;
- (2) Removing provisions establishing and funding complex area business manager positions;
- (3) Deleting changes to the statewide Performance Standards Review Commission composition, the requirement for the development of assessments, and reporting requirements;
- (4) Removing the appropriation for the Hawaii Educational Policy Center;
- (5) Establishing the Research Experiences for Teachers program to support the development of middle school teacher STEM skills and knowledge and develop middle school curriculum for STEM subjects and providing funding therefor;
- (6) Establishing a professional development program to provide practicing elementary, middle, and high school teachers of science and mathematics with opportunities to increase their knowledge and understanding in STEM subjects and providing funding therefor;
- (7) Amending provisions of the Early Educator Incentive Program to provide for criteria for scholarships and wage supplements;
- (8) Requiring dual credit to be given to high school students under the Running Start Program for Professional and Career Education for Early Childhood (PACE) courses offered in the University of Hawaii system;
- (9) Removing provisions authorizing the issuance of general obligation bonds and appropriating funds for the University of Hawaii and the Department of Education repair and maintenance projects;
- (10) Adding mathematics coaches and their training to the purposes of the unspecified appropriation; and
- (11) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1933, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1933, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 464 (Joint) Education and Judiciary and Labor on S.B. No. 96

The purpose of this measure is to ensure the safety of our public school students by requiring criminal background checks for all providers, subcontractors, and trainees from institutions of higher education.

This measure also:

- (1) Authorizes the Department of Education to pass along the fees charged for background checks to the individual being reported on; and
- (2) Removes the authority of the Department of Education to either refuse to issue or revoke a teaching or other educational certificate if it is discovered that the individual has been convicted of a crime that poses a risk to the safety of children.

Testimony in support of this measure was submitted by the Department of Education. Testimony in opposition to this measure was submitted by the University of Hawaii.

Your Committees find that the safety and well being of our children is of the utmost concern, particular within the Department of Education. Your Committees further find that when our children are at school, they should be provided with a healthy, safe, and positive environment to support high levels of academic achievement and success. Currently, the law requires criminal history background checks to be completed on all employees and prospective employees of the Department of Education. However, the law fails to contemplate other adults who may also come in direct contact with the children in public schools through the provision of other services necessary for the operations of the school system. This measure addresses certain individuals who may pose a danger to our students, should these individuals be found to possess criminal backgrounds.

Your Committees recognize that this measure covers trainees from an institution of higher education who may be placed within the public schools. Testimony was received that indicated that these individuals should be excluded from the criminal background check requirement because the University of Hawaii currently conducts extensive screening of individuals prior to their selection as teacher trainees. These trainees are also required to submit to fingerprint checks prior to their clearance to work in the public schools. Your Committees understand that the criminal history record checks for the teacher trainees by the Department of Education may not be necessary, but believe that they may also be warranted under certain circumstances depending upon the degree and length of contact the trainees will be having with the students. Thus, your Committees believe that the teacher trainees should remain a subject of this measure and, as the measure continues to proceed through the session, the Legislature can consider and the parties can confer to determine the necessity of their continued inclusion.

Additionally, your Committees find that the current language of the measure would seem to include entire organizations in its requirements and similarly preclude entire organizations from providing services to the Department of Education based on one individual's negative background

check. Your Committees determine that such application is too broad and the measure should be narrowed to apply only to those individuals who are providing services. Similarly, individuals that will not have direct contact with the children as part of their work should also not be made subject to the requirements of this measure.

Accordingly, your Committees have amended this measure by:

- (1) Amending the definition of "trainee from an institution of higher education" to mean only students in an institution of higher education training program that require public school observation, participation, or direct contact with children;
- (2) Amending the definition of "provider" to mean an individual that intends to or is employed by an organization that intends to enter into a contract with the Department of Education to provide services involving direct contact with children;
- (3) Amending the definition of "subcontractor" to mean an individual that enters into or is employed by an organization that enters into a contract or agreement with a provider to provide services involving direct contact with children;
- (4) Changing the effective date of the Act to July 1, 2050, to facilitate further discussion on the measure; and
- (5) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 96, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 96, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 4 (Chun Oakland, Hee, Inouye, Taniguchi).

SCRep. 465 (Joint) Education and Judiciary and Labor on S.B. No. 1139

The purpose of this measure is to ensure the health and safety of our children in public schools by requiring employees of the Department of Education to be subject to random drug testing.

Testimony in support of this measure was submitted by three individuals. Testimony in opposition of this measure was submitted by the Department of Education (DOE), the Hawaii State Teachers Association, the Drug Policy Forum of Hawaii, the Drug Policy Action Group, and one individual.

Your Committees find that substance abuse is one of the most severe problems that plagues our society today. The existence of drug abuse in the workplace poses a particularly harmful threat to the safety and security of employees, customers, and, in the case of the public schools, our children. Your Committees further find that individuals in certain positions require a higher level of scrutiny to ensure public safety and security.

Your Committees find that the safety and well being of our children is of great concern to the Legislature and should always be a priority in developing policies and legislation that affect them. Children today face many dangers, including the dangers of crime, violence, and illegal drug use. Parents and teachers play a huge role in influencing our youth to lead positive, productive, and drug-free lives. The exposure of our children to negative influences, particularly in the schools, is counterproductive to other home and community efforts to ensure a nurturing, safe, and drug-free environment. Your Committees are committed to providing our youth quality education in drug-free environments.

Similarly, our residents have placed their safety, liberty, economic well being, trust, and confidence in elected officials of the State. These individuals are authorized to determine public policy, including policies regarding the prohibition of and punishment for illegal drug use. Accordingly, these individuals must be highly scrutinized. Your Committees heard a related measure, Senate Bill No. 211, which addressed the need for drug testing for elected officials in Hawaii and believe that the inclusion of its provisions would be appropriate in this measure as they involve similar issues.

Your Committees entertained discussion on the potential costs to the State of conducting random drug testing of DOE employees. Although an estimate of up to \$2,000,000 was proffered by the DOE, your Committees believe that this may be an inflated cost that could be alleviated through the use of less costly and less-invasive or non-invasive tests and procedures.

Your Committees understand that constitutional issues may be raised regarding the use of random drug testing in situations where no systemic drug abuse problem currently exists. However, your Committees believe that the overriding concern regarding the health and safety of children in our public schools constitutes a compelling state interest that warrants drug testing of DOE employees, especially the teachers. Your Committees also understand that, based on testimony by the DOE, certain employees are subject to or will soon be subject to drug testing requirements provided under collective bargaining agreements. Additionally, a representative from the Hawaii State Teachers Association indicated that the issue is also currently being negotiated by that organization with the DOE. Your Committees believe that to the extent the issue is provided for through collective bargaining may be sufficient to address the concerns over those affected employees. Nonetheless, this measure should continue to proceed through the session to facilitate further discussion and to serve as a motivational factor to spur continued collective bargaining negotiations to address the issue, a fact that, your Committees note, was acknowledged as an appropriate action by the Hawaii State Teachers Association.

Accordingly, your Committees have amended this measure by:

- (1) Inserting the provisions of Senate Bill No. 211, requiring elected officials to be tested for illegal drugs and be subject to disqualification for or forfeiture of office upon testing positive for illegal drugs;
- (2) Exempting DOE employees from the random drug testing policy if they are already subject to drug testing requirements under collective bargaining agreements; and
- (3) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1139, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1139, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Ayes with Reservations, 2 (Nishihara, Tokuda). Noes, none. Excused, 3 (Chun Oakland, Inouye, Taniguchi).

SCRep. 466 (Joint) Education and Tourism and Government Operations on S.B. No. 79

The purpose of this measure is to repeal the transfer of duties and functions from the Department of Budget and Finance to the Department of Education pursuant to Act 51, Session Laws of Hawaii 2004, as amended (Act 51, as amended).

Testimony in support of this measure was submitted by the Department of Education, the Department of Budget and Finance, the Hawaii Government Employees Association, and one individual.

Your Committees find that pursuant to Act 51, as amended, the Department of Education was established as a separate jurisdiction of the State. As a result, the transfer of certain duties and functions from different departments to the Department of Education became necessary. Act 51, as amended, also established the Interagency Working Group, which was tasked with the responsibility of overseeing the transfers to the Department of Education. Your Committees further find that since the enactment of Act 51, as amended, the Interagency Working Group has been working towards the efficient transfer of duties and functions and recommended to the Legislature in its report that the transfer to the Department of Budget and Finance be repealed. In 2006, the effective date of the transfer of duties, functions, and personnel was extended to July 1, 2007.

In addition, the Interagency Working Group has facilitated the execution of a Memorandum of Understanding (MOU), effective June 28, 2006, between the Department of Education and the Department of Budget and Finance. The MOU allows the responsibility for funding of collective bargaining and the administration of federal funds to remain with the Department of Budget of Finance, but also provides for an improved capitol improvement projects allotment process and for the deposit of funds into the State Educational Facilities Improvement Special Fund. Your Committees appreciate the work that has been done by the Interagency Working Group and believes that it should honor the agreement forged between the departments by repealing the transfer of duties and functions from the Department of Budget and Finance. However, as no transfer has yet occurred under the law, it is currently unnecessary to require the return of transferred materials.

Accordingly, your Committees have amended this measure by:

- (1) Deleting Section 3 of the measure requiring the return of any materials transferred by the Department of Budget and Finance to the Department of Education under Act 51, as amended; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Education and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 79, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 79, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 3 (Chun Oakland, Hee, Taniguchi).

SCRep. 467 (Joint/Majority) Transportation and International Affairs and Economic Development and Taxation on S.B. No. 1367

The purpose of this measure is to add duties to the Office of International Affairs (Office) to facilitate international educational program links and to expand the scope of its functions to foster Hawaii's worldwide presence.

This measure also appropriates funds for the Office to hire an executive director and administrative assistant, and for program operation and expenses.

Your Committees received testimony in support of this measure from the Governor; Department of Business, Economic Development, and Tourism; Department of Education; University of Hawaii System; East-West Center; Center for Chinese Studies; Hawaii English Language Program at the University of Hawaii at Manoa; International & Exchange Programs at the University of Hawaii at Manoa; Japan-America Society of Hawaii; Center for Global Education and Exchange at the University of Hawaii at Hilo; Pugwash Conferences on Science and World Affairs; Papa Ola Lokahi; Pacific and Asian Affairs Council; Hawaii Global Youth Center; Ambient Micro, LLC; Economic Development Alliance of Hawaii; and United Nations Association of the United States of America Hawaii Division.

Your Committees find that in order to advance Hawaii's global competitiveness through education, there needs to be coordination between the State, counties, and educational institutions, as well as private agencies engaged in international affairs. This measure would designate the Office as the central point for accountability serving as a portal of information and to leverage resources.

Realization of Hawaii's longstanding desire for economic diversification and sustainability turns on applying the State's high skilled resources to the creation and adoption of innovation across the economy.

Your Committees have amended this measure by changing the effective date to July 1, 2050, to facilitate further discussion. Technical, nonsubstantive amendments were made for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1367, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1367, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, 1 (Slom). Excused, 1 (Taniguchi).

SCRep. 468 (Joint) Transportation and International Affairs and Health on S.B. No. 1683

The purpose of this measure is to provide immediate regulatory relief from aircraft noise impacts on the urban population and recreational resources within airport flight control and noise abatement areas.

Your Committees received testimony in support of this measure from the Governor's Office, Department of Transportation (DOT), Waikiki Area Residents Association, Citizens Against Noise of Hawaii, and ten individuals.

Your Committees find that, in recent years, other states have actively addressed citizen concerns about aircraft noise that disrupt normal living conditions, and that these states have adopted comprehensive noise abatement regulations to improve and restore the health, welfare, and quality of life of their urban populations, and to sustain the general public's valued experience of natural and recreational resources. In Hawaii, aircraft noise is particularly acute because most airports are located near residential areas.

Your Committees are cognizant that the testimony of the Governor's Office and the DOT indicate that this measure is unnecessary because the DOT already monitors aircraft noise. However, the vehemence of the testimony condemning aircraft noise justifies the passage of this measure in response to the public's complaints.

Your Committees have amended this measure on the recommendation of the DOT to delete some noise control and reduction methodologies that are under the jurisdiction of the Federal Aviation Administration or are otherwise redundant of current DOT powers in other statutes. Technical, nonsubstantive amendments were made for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1683, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1683, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, 3 (Menor, Taniguchi, Tsutsui).

SCRep. 469 Education on S.B. No. 82

The purpose of this measure is to appropriate funds to provide training for school community councils of Department of Education high schools.

Testimony in support of this measure was submitted by the Department of Education, the Workforce Development Council, and one individual.

Your Committee finds that pursuant to Act 51, Session Laws of Hawaii 2004, as amended, School Community Councils were established in all public schools in the State to provide advisory support on each school's academic and financial plan. School Community Councils play an important role in shaping a school's goals, priorities, programs, activities, and overall direction.

Your Committee further finds that the School Community Councils are composed of school administrators and teachers, non-certificated personnel of the Department of Education, as well as members of the community, parents, and students. Thus, many members are unfamiliar with the operations and procedures of the Department of Education and would benefit greatly from appropriate training on basic operational information and on reform and redesign initiatives for all public schools. Likewise, all members could benefit from training with other schools within a complex, which will help to ensure that schools' academic and financial plans are consistent with the educational accountability system and to assist the School Community Councils and principals in obtaining support and services from the Department of Education.

Accordingly, your Committee has amended this measure by:

- (1) Extending its application to School Community Councils for all elementary, middle, and high schools within the Department of Education;
- (2) Specifying that the School Community Councils within a complex shall be trained together;
- (3) Requiring the training programs for School Community Councils to encourage school community councils to work collaboratively within each complex and include instruction on the basics of the operations of the Department of Education, including Department of Education terminology, procedures, and priorities;
- (4) Including unspecified appropriation and allocation amounts; and
- (5) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 82, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 82, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 470 Public Safety on S.B. No. 1490

The purpose of this measure is to limit the ability of detained or incarcerated individuals to file frivolous lawsuits through state courts.

Specifically, this measure:

- (1) Makes statutory provisions for and limitations on prisoners filing in forma pauperis (without liability for court costs or fees);
- (2) Requires prisoners to exhaust administrative remedies before bringing actions with respect to prison conditions; and
- (3) Limits recovery for prisoners in civil actions for injuries suffered while incarcerated.

Testimony in support of this measure was submitted by the Judiciary of the State of Hawaii, the Department of Public Safety, and the Department of the Attorney General. Testimony in opposition was submitted by the American Civil Liberties Union of Hawai'i and one individual.

Your Committee finds that frivolous lawsuits cost the State and its taxpayers a loss of valuable resources. However, it is important to ensure the availability of the courts to all people to address violations of their rights. Therefore, your Committee finds limitations on frivolous and malicious lawsuits are reasonable as long as these limitations do not preclude valid claims from being heard.

Your Committee further finds that juveniles committed to the care and custody of the Office of Youth Services, or youth correctional or detention facilities, are especially vulnerable and should be excluded from the limitations to court actions suggested in this measure.

Your Committee finds that many of the actions dismissed for failure to state a claim are brought by indigent prisoners appearing pro se who have no legal training and limited or no access to legal counsel. Your Committee is concerned that this may result in the dismissal of some valid claims that were not properly set forth before the court.

Your Committee further finds that the requirement of a showing of physical injury would preclude valid causes of action, including sexual assault.

Accordingly, this measure was amended in the following manner to:

- (1) Expressly exclude juveniles committed to the care and custody of the Office of Youth Services, or youth correctional or detention facilities, and deleting "or adjudicated delinquent" from the definition of "prisoner" to reflect that exclusion;
- (2) Exclude dismissals of actions for failure to state a claim as a basis for precluding subsequent litigation;
- (3) Increase the number of previously dismissed malicious or frivolous actions precluding the filing of in forma pauperis actions from three to four;
- (4) Delete the provision that the failure of the State to adopt or adhere to any administrative grievance procedure as a basis of action under any other state or federal law;
- (5) Add a showing of sexual assault as a basis for initiating civil actions for mental or emotional injury suffered while in custody;
- (6) Add the imminent danger of serious mental or emotional injury to the exception of the prepayment requirement for prisoners who have previously had four actions dismissed on the basis of frivolousness or maliciousness;
- (7) Exclude the provision relating to limitations on civil actions brought by incarcerated felons, since felons are included in the section limiting civil actions brought by prisoners confined in jail, prison, or other correctional facility, and would therefore be redundant; and
- (8) Delay the effective date to January 1, 2050, to allow for further discussion of the issues.

Various technical nonsubstantive changes were also made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Public Safety that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1490, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1490, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 471 (Joint/Majority) Public Safety and Intergovernmental and Military Affairs on S.B. No. 831

The purpose of this measure is to limit the use of consumer fireworks.

Specifically, this measure prohibits the use of consumer fireworks on the Fourth of July.

Testimony in opposition to this measure was submitted by the Hawaii Food Industry Association and Legislative Information Services of Hawaii.

Your Committees find that the widespread use of consumer fireworks in densely populated areas pose several health and safety risks. These risks include fire hazards, respiratory health hazards, and the danger of physical injuries.

Your Committees find that the Fourth of July is an especially dangerous holiday, as it is the one day on which many people celebrate with consumer fireworks.

This measure was amended to limit the application of the prohibition to counties with a population of 500,000, or more. Technical, nonsubstantive changes were also made for the purposes of clarity and consistency.

As affirmed by the records of votes of the members of your Committees on Public Safety and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 831, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 831, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chairs on behalf of the Committees. Ayes, 4. Noes, 1 (Whalen). Excused, 2 (Sakamoto, Hemmings).

SCRep. 472 (Joint) Energy and Environment and Commerce, Consumer Protection and Affordable Housing on S.B. No. 988

The purpose of this measure is to reduce greenhouse gas emissions and raise public awareness of renewable energy.

Specifically, this measure establishes a photovoltaic rebate program to all grid-connected residential, community-center, and small business utility customers within electric utility service areas.

Testimony in support of this measure was submitted by DC Power Systems; Hawaii PV Coalition; Hawaii Solar Energy Association; Island Energy Solutions Inc.; ProVision Technologies, Inc.; Rising Sun Solar Electric; Sopogy, Inc.; SunEdison, LLC; The Vote Solar Initiative; and seven individuals. The Department of Commerce and Consumer Affairs, Division of Consumer Advocacy; Public Utilities Commission; and Hawaii renewable Energy Alliance submitted testimony supporting the intent of this measure. Testimony in opposition to this measure was submitted by Hawaiian Electric Company, Hawaii Electric Light Company, and Maui Electric Company.

Your Committees find that to ensure the preservation and protection of our environment and natural resources, it is necessary to foster a more widespread use of sustainable energy resources and energy efficient technology and products. One type of renewable energy that should be used more widely is photovoltaic energy. However, the initial cost of installing photovoltaic energy systems is high.

Your Committees further find that a rebate program will lower the cost and encourage home and business owners to invest in this form of renewable energy.

It is the intent of your Committees to provide certainty to the marketplace by providing additional funds in subsequent fiscal biennia.

This measure was amended to:

- (1) Designate an appropriation in the amount of \$10,000,000 for each year of the 2007-2009 fiscal biennium;

- (2) Delete the requirement that the contractor installing photovoltaic energy systems have a C-13 license, and requiring instead that the contractor must be appropriately licensed;
- (3) Delete the provision that the Public Utilities Commission adopt rules pursuant to chapter 91, Hawaii Revised Statutes, and requiring instead that the commission shall carry out the purposes of this measure "by rule or order" to allow for flexibility;
- (4) Allow the Public Utilities Commission to adjust the rebates and caps specified in this measure, to ensure the amounts are appropriate and sufficient and carry out the purposes of this measure;
- (5) Delete the requirement that Hawaiian Electric Company, Hawaii Electric Light Company, Maui Electric Company, and Kauai Island Utility Cooperative match the State's appropriation by ratepayer funding to avoid the effect of increasing utility rates for consumers; and
- (6) Delay the effective date to provide for further discussion.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 988, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 988, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 2 (Slom, Trimble). Noes, none. Excused, 3 (Hooser, Kokubun, Sakamoto).

SCRep. 473 Energy and Environment on S.B. No. 597

The purpose of this measure is to authorize the issuance of \$10,000,000 in special purpose revenue bonds to assist Sopogy, Inc. with the planning, design, construction, equipping, and operation of a solar farm power plant at the Natural Energy Laboratory of Hawaii to produce electricity from solar power.

Testimony in support of this measure was submitted by the Department of Business, Economic Development and Tourism; Sopogy, Inc.; Hawaii Renewable Energy Alliance; and Enterprise Honolulu. Comments were submitted by the Natural Energy Laboratory of Hawaii Authority.

Your Committee finds that the development of clean electricity from a renewable and abundant resource, the sun, at a price lower than the market price and independent from oil price fluctuations is in the best interest of the public. Sopogy, Inc. specializes in the development, manufacture, and distribution of its proprietary concentrated solar power systems that generate electricity. The construction of a solar farm power plant would demonstrate how electricity could be produced by using solar power systems.

Your Committee further finds that Sopogy, Inc. is an industrial enterprise, meeting the qualifications for special purpose revenue bond assistance. The special purpose revenue bonds authorized under this measure will provide low interest rate bond financing for the construction of a solar farm power plant.

Your Committee amended this measure to clarify that the project location should be located at the National Energy Laboratory of Hawaii or other suitable sites. This broader language will provide Sopogy, Inc. with the ability to construct up to ten megawatts of solar electricity at the most economical and advantageous location or locations in order to help meet Hawaii's clean energy demands.

The intent of your Committee is to authorize the issuance of \$10,000,000 in special purpose revenue bonds to assist Sopogy, Inc. with the planning, design, construction, equipping, and operation of a solar farm power plant at the Natural Energy Laboratory of Hawaii or other suitable sites to produce electricity from solar power.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 597, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 597, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 474 Economic Development and Taxation on S.B. No. 148

The purpose of this measure is to provide a mandatory tax credit to taxpayers pursuant to article VII, section 6 of the Constitution of the State of Hawaii.

Testimony in support of the concept of this measure was received from the Department of Taxation. The Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO submitted testimony in opposition.

Your Committee finds that the winter 2007 edition of "The People's Pulse" a quarterly public opinion newsletter sponsored by the Hawaii Business Roundtable and Pacific Resource Partnership reports that:

"...state residents consistently show a preference for investing the tax surplus rather than dispensing of the cash outright to tax-payers. Statistically more (65%) favor paying out part of the \$250 to \$300 cash rebate to taxpayers and investing the balance in a specific area that will benefit the public long term."

The newsletter goes on to note that this preference is consistent with past results, with over half the residents polled in winter 2006 favoring a split of the surplus between a tax credit and long term investment.

Your Committee believes that the opinions of Hawaii taxpayers should be considered in any decision on how to distribute the current surplus. Therefore, it is the intent of your Committee to continue discussion on how best to meet the constitutional mandate cited in this measure.

Your Committee received a revenue impact statement from the Department of Taxation that due to the unspecified amount of the credit in this measure, the revenue impact is indeterminate. However, if the tax credit is \$100 per qualified exemption and the bill takes effect on July 1, 2007, a projected revenue loss would be \$103,000,000 in fiscal year 2008. The Department was also asked to provide an estimate on the costs for postage and processing associated with distribution of a tax rebate, as opposed to a tax credit.

Your Committee has amended this measure by changing the applicability of the tax credit from taxable year 2006 to taxable year 2007.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 148, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 148, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 475 (Majority) Economic Development and Taxation on S.B. No. 1839

The purpose of this measure is to establish an Integrated Tax Services and Management Special Fund to receive revenues from the Integrated Tax Information Management Systems (ITIMS) post-implementation revenue-generating initiatives; provided that moneys in the fund will be used to pay for the Integrated Tax Information Management Systems.

Testimony in support of the intent of this measure was received from the Department of Taxation (Department). The Tax Foundation of Hawaii submitted comments.

Your Committee finds that Act 273, Session Laws of Hawaii 1996 (Act 273), authorized the Department to enter into a performance-based contract to acquire the ITIMS. A performance-based contract is one in which the State is liable to pay the vendor only if the promised "performance" is achieved, and in this case, the "performance" consisted of the State collecting more tax revenue than it would have collected if the vendor's services were not used.

As a result of Act 273, the Department saw an outstanding increase in the performance of Department responsibilities. The initial ITIMS initiatives were certified to have increased revenues by more than \$252,000,000 during the five-year project, a three hundred seventy-five per cent return on investment.

It is the intent of your Committee to support the continuation of ITIMS, particularly with respect to other tax collection efficiencies that can be achieved. Your Committee notes this second phase of ITIMS implementation will afford the Department of Taxation the ability to substantially upgrade its staffing capacity to provide increased customer service benefits.

Your Committee has amended this measure by:

- (1) Deleting the repeal of section 10, which refers to previous ITIMS legislation; and
- (2) Inserting an effective date of July 1, 2035, for the purposes of further discussion.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1839, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1839, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (English).

SCRep. 476 Judiciary and Labor on S.B. No. 1380

The purpose of this measure is to provide an appropriate, cost-neutral adjustment of the base monthly contributions for retiree benefit plans, in the event the EUTF Board of Trustees adopts a revised rate structure for its retiree benefit plans.

Your Committee received testimony in support of this bill from the State Department of Budget and Finance and the Employers' Union Trust Fund (EUTF). This bill will allow EUTF to adjust the contribution caps to reflect the additional retiree benefit plan approved by the Board. This would benefit both employees and the employer.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1380 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 477 Judiciary and Labor on S.B. No. 609

The purpose of this measure is to create an advisory group to recommend to the legislature improvements to the administration of the employment and training fund and provide for transfer of reverted revenues to the employment and training fund.

Your Committee received testimony in support of this bill from the Workforce Development Council of the State Department of Labor and Industrial Relations. The Hawaii Business League opposed the bill.

The Workforce Development Council stated that "Between 2003 and 2005, several WDC members participated in a National Governors' Association project that focused on Hawaii's education and workforce development needs. One of its recommendations was that the state adopt a goal to 'Implement policies and practices designed to increase the number of incumbent workers involved in post-secondary education and training by developing support for companies who encourage such opportunities for their employees, including non-management workers.' . . . The result will be larger numbers of better-prepared workers available to support and maintain Hawaii's economy. It will also mean greater opportunity, higher pay, and an improved standard of living for Hawaii's people." This bill will help achieve this goal.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 609 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 478 Judiciary and Labor on S.B. No. 16

The purpose of this measure is to appropriate \$30,000 to the Department of Labor for a grant-in-aid to the Hawaii Institute for Public Affairs (HIPA) to implement the Hawaii Construction Workforce Action Plan and requires a dollar-for-dollar private sector match.

Your Committee received testimony in support of this bill from the University of Hawai'i System and the Workforce Development Council (Department of Labor and Industrial Relations). The State Department of Labor and Industrial Relations did not oppose the measure.

This measure will assist the Hawai'i Construction Workforce Plan which was created in 2004. An Action Plan was developed consisting of the following strategies:

1. Improve the readiness of persons interested in entering apprenticeship programs and increase the proportion of applicants who are accepted into apprenticeship programs;
2. Improve apprenticeship program retention and completion;
3. Increase the number of applicants applying to apprenticeship programs in general and to targeted trades through targeted marketing and outreach campaigns; and
4. Continue and expand efforts to develop, organize, coordinate, monitor, and report on workforce development initiatives outlined in this plan.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 16 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Inouye).

SCRep. 479 Judiciary and Labor on S.B. No. 1284

The purpose of this measure is to authorize the board of trustees of the employees' retirement system to set the salary scale assumptions based on recommendations from the actuary. Increase the employers' contributions to the employees' retirement system; bans benefit enhancements until the employees' retirement system becomes fully funded; and repeals the provision that allows the employer contribution rate to be reduced if the period required to amortize the unfunded actuarial liability falls below twenty-five years.

Your Committee received testimony in support of this bill from the State Department of Budget and Finance and the Employees' Retirement System. The Hawaii State Teachers Association supported the majority of the provisions in this bill that will allow the ERS to become fully funded except the provision that bans benefit enhancements until the ERS becomes fully funded.

This measure was amended by deleting the provision that "bans benefit enhancements until the ERS becomes fully funded." Your Committee believes that this decision is a legislative prerogative and as such should not be abrogated as a general matter. Therefore, the Legislature should not relinquish this responsibility to justify one issue while another may be left to flounder. Whether the Legislature uses this prerogative is a matter that should be left for the Legislature to decide on a case by case basis.

Your Committee also made one non-substantive technical change recommended by the Legislative Reference Bureau.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1284, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1284, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 480 Judiciary and Labor on S.B. No. 1106

The purpose of this measure is to appropriate moneys for the Hawaii state commission on the status of women for programming, travel, and office expenses.

Your Committee received testimony in support of this bill from the Commission on the Status of Women, Kokua Council, the Sex Abuse Treatment Center, and a private individual.

The Commission on the Status of Women explained that these funds were not included in the Executive budget but would provide funds to continue successful programs such as Women's Health Month which began in 1994, the Oral History Project, Women's History Month, Ready 2 Run to help women understand the political process. All of these programs are directed at helping women achieve economic self-sufficiency, the Commission's number one priority.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1106 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Inouye).

SCRep. 481 Judiciary and Labor on S.B. No. 1833

The purpose of this measure is to allow an employee to elect to use accrued paid leave, including vacation, personal, or family leave, for any part of the four-week period of family leave provided under the law.

Your Committee heard testimony in support of the bill from Hawaii Family Forum, the Roman Catholic Church in the State of Hawaii, HGEA, International Association of Aerospace Workers, ILWU, International Association of Machinist Union – Local Lodge 1979, and Hawaii State AFL-CIO. Those opposing the bill were the Chamber of Commerce of Hawaii and Retail Merchants of Hawaii. The Department of Labor and Industrial Relations did not oppose the bill at this time.

Hawaii has the highest longevity among all of the 50 States. Due to this distinction, employees with elderly family members are constantly called to provide emergency care for them as they age. This bill will allow employees to use their accrued paid leave to care for the elderly relatives in emergency situations. This will enable family caregivers to keep their elderly relatives at home and from seeking assistance from government programs and services. In the long run, we will all benefit from this measure.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1833 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Inouye).

SCRep. 482 Judiciary and Labor on S.B. No. 1950

The purpose of this measure is to authorize the rehiring of retired state or county employees in critical-to-fill or labor shortage positions without affecting the receipt of retirement benefits and without accruing additional credit or benefits.

Your Committee heard testimony in support of this bill from the State Judiciary, Department of Human Resources Development, HGEA, County of Hawai'i, SHOPO, County of Hawai'i Police Department, County of Maui. The Superintendent of the Department of Education submitted supporting testimony with amendments to conform with Act 51, SLH 2004. The Employees Retirement System submitted comments and concerns.

The Judiciary echoed the problem that all public employers are facing now and in the future.

The Judiciary, like all other public employers, is charged with providing essential, uninterrupted services to the public. In order to effectively discharge our responsibility, we need a qualified and stable workforce to accomplish our mission. In the face of a robust economy which has brought unprecedented low unemployment, coupled with an aging workforce, we are in critical need of additional tools to manage our staffing and human resource requirements.

At the present time, 49 percent of the Judiciary's workforce will be eligible to retire within the next five to ten years. This is a staggering number when considering the challenges we will be facing to recruit and train qualified replacements.

Your Committee has recognized the changing times and has amended this bill as a preventive measure rather than to wait until the situation is at its worse. We agree with the HGEA where "the future of civil service depends upon active recruitment of those applicants with the skills, abilities and commitment to a government career . . . current employees who should be considered for promotional opportunities under the civil service merit system. Reliance upon retirees will not encourage the recruitment and promotion of these career employees."

Finally, the Employees Retirement System's actuary recommended requiring the employer to make retirement contributions on all positions filled by retirants. This will help reduce the ERS' \$5.1 billion unfunded liability and eliminate any adverse actuarial impact. This may also encourage the employer to continue their efforts to recruit new employees. Comments were also included to avoid any conflict with other existing statutes.

In consideration of the foregoing, your Committee has amended the bill with the following:

1. Enlarged the vacant position pool by deleting references to "critical-to-fill or labor shortage occupations";
2. Added a provision to require the employer to continue to make retirement contributions for all positions filled by retirants;
3. Cited appropriate statutes to avoid any conflict with the statutory provision of this Act;
4. Require a retirant to have been retired for at least five consecutive years from the retirant's date of retirement before as a condition for re-employment;
5. Added "medical retirement benefits" that shall continue without penalty to the retirant;
6. Require a retirant filling an included position to join the appropriate collective bargaining unit representing that position;
7. Created two new definitions for "Jurisdiction" and "Executive State Branch" to clarify the Act;
8. Requires annual reporting by jurisdictions that fill positions pursuant to this Act to the Legislature twenty days prior to its convening to include the number of positions filled, the job title, salary and length of time that the retirant was hired and other pertinent information; and
9. Provided a sunset provision of five years.

Your Committee has also made non-substantive technical changes as recommended by the Legislative Reference Bureau.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1950, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1950, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 483 Judiciary and Labor on S.B. No. 1608

The purpose of this measure is to authorize the respective houses of the legislature to adjust employee benefits and privileges by rule of the respective houses.

Your Committee received no testimony for this bill.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1608 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Inouye).

SCRep. 484 Health on S.B. No. 1406

The purpose of this measure is to ensure that all individuals, particularly self-employed individuals and part-time employees, have access to affordable health insurance.

This measure attempts to accomplish this goal by amending the State's Insurance Code to include within the definition of "employee" individuals who work full-time, part-time, and who are self-employed. Further, it clarifies that a self-employed individual is a person operating their own business, as a sole proprietorship or in any other legally recognized manner, and who has a general excise tax license for that business.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs and the Hawaii Association of Realtors. The Chamber of Commerce of Hawaii submitted testimony supporting the intent of this measure with comments. Hawaii Medical Service Association and Kaiser Permanente submitted comments on this measure.

Your Committee finds that most health insurers do not provide a group health policy to sole proprietors unless they have become incorporated. The existing insurance statute does not clearly include the self-employed, such as sole proprietors, in the definition of "small business". Thus, many sole proprietors are without health insurance despite the fact that they are businesses just as any other business.

Your Committee has amended this measure by:

- (1) Reinstating the definition of employee to mean only those who work on a full-time basis with a normal work week of twenty hours or more;
- (2) Defining "qualifying event" as the date of issuance of a general excise tax license, the loss of a job, a reduction in hours of work, or the exhaustion of COBRA continuation coverage that results in a loss of health care coverage;
- (3) Adding an implementation date of September 1, 2007, by which issuers shall offer small group health plans to self-employed individuals;
- (4) Providing an option to group health issuers to limit periods of enrollment for self-employed individuals to a minimum of thirty calendar days; and that:
 - (A) Self-employed individuals who experience a qualifying event must enroll with a group health issuer within thirty days of the occurrence of the qualifying event; and
 - (B) Group health issuers shall be allowed to impose a one year waiting period against self-employed individuals who terminate coverage for any reason. In the event a self-employed individual terminates coverage and a one year waiting period is imposed against the individual, a group health issuer may not re-enroll the individual until the period of enrollment following the one year waiting period;
- (5) Changing the effective date to encourage further discussion and work on this measure; and
- (6) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1406, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1406, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 485 Health on S.B. No. 1407

The purpose of this measure is to impose regulatory oversight over prescription drug plans that are authorized to sell prescription drug benefits by the Centers for Medicare and Medicaid Services pursuant to Medicare Part D.

Your Committee received testimony in support of this measure from the State Insurance Commissioner and Hawaii Medical Service Association.

This measure provides for a process for licensing, establishes minimum solvency and financial reporting requirements, and allows the Insurance Commissioner to take control of an impaired plan. These are basic elements of insurance regulation to protect the public.

Your Committee finds that certain prescription drug plans are selling drugs in Hawaii pursuant to the Medicare Modernization Act, which established the drug benefit of Medicare Part D. Some companies selling drugs as prescription drug plans have a certificate of authority as a mutual benefit society, a health maintenance organization, or a for-profit insurer. However, other companies are operating solely as stand alone prescription drug plans under a limited authorization from the federal government. Under the Centers for Medicare and Medicaid requirements, these plans have a window of three years to become authorized under state law and must be licensed by December 31, 2009, unless the State chooses not to have a licensing process for prescription drug plans. In order to provide this process for authorization and to bring these entities under regulatory oversight, enabling legislation is required to license stand-alone prescription drug plans.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1407, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1407, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 486 Health on S.B. No. 1643

The purpose of this measure is to require the Board of Dental Examiners to adopt rules to establish a process for licensure based upon credentials.

Testimony in support of this measure was received from two individuals. Your Committee received testimony in opposition to this measure from the Board of Dental Examiners and one individual.

Your Committee finds that this measure would amend chapter 448, Hawaii Revised Statutes, to allow the Board of Dental Examiners to establish a procedure for licensure based upon credentials. Your Committee notes that Hawaii is one of only three other states in the United States that does not currently allow for licensure by credentials.

Your Committee has amended the effective date of this measure for the purposes of promoting further discussion.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1643, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1643, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 487 Health on S.B. No. 12

The purpose of this measure is to protect Hawaii consumers against predatory and discriminatory pricing of health insurance premiums.

The measure accomplishes this purpose by re-establishing the health insurance rate regulation program by requiring oversight by the Insurance Commissioner to ensure fair and reasonable health insurance premiums.

Your Committee received testimony in support of this measure from the Department of Commerce and Consumer Affairs, Summerlin Life and Health Insurance Company, Hawaii State Teachers Association, Retail Merchants of Hawaii, the Kokua Council, and the Hawaii Coalition for Health. Your Committee received testimony in opposition to this measure from Hawaii Medical Service Association and Kaiser Permanente.

Your Committee finds that health insurance premiums continue to increase, making health insurance progressively more unaffordable, particularly for individuals and small businesses. Your Committee further finds that as of June 30, 2006, the Insurance Commissioner no longer had oversight over health insurance rules due to the sunset of Act 74, Session Laws of Hawaii 2002. As a result, the health insurance market may lapse into a period of very limited competition, which allows for excessive insurance premiums.

Your Committee further finds that reinstating health insurance rate regulation would encourage more health insurance carriers to enter the Hawaii market and enable them to compete, offering more choices for the residents of Hawaii. Most importantly, it would protect consumers against unfair business practices, such as predatory and discriminatory health insurance premiums.

Your Committee further finds that this measure will enable the Commissioner to be proactive in preventing insurer insolvencies by setting premiums at levels that will completely cover costs of health care, plus a reasonable rate of return, to ensure that insurance carriers will be able to pay claims when they come due.

Your Committee amended this measure by:

- (1) Clarifying that rates shall be reasonable in relation to the costs of the benefits provided;
- (2) Removing the language referencing the Commissioner's discretionary authority to keep filings confidential and adding a requirement that rates shall be open to public inspection upon filing with the Commissioner; provided that supporting and supplementary rating information filed with the Commissioner shall be treated as confidential, proprietary information and shall not be subject to public inspection;
- (3) Including a requirement that rates shall be established in accordance with actuarial principles, based on reasonable assumptions, and supported by adequate supporting and supplementary rating information;
- (4) Deleting the requirement that managed care plans shall provide the Commissioner with the information necessary for the calculation of investment income and accuracy of loss reserves;
- (5) Deleting the language that required all managed care plans to file initial rates within thirty days of the effective date of this measure;
- (6) Deleting the section regarding reserves that required managed care plans to return moneys in excess of fifty per cent of its annual net worth to enrollees or to apply excess to stabilize or reduce rates;
- (7) Deleting the provisions relating to third party administrator services, prepaid dental insurance offered by managed care plans, prepaid vision insurance offered by managed care plans, and disability insurers licensed under chapter 431;
- (8) Including a provision that for managed care plans with rates based totally or in part on the individual group's claims experience, insurers shall submit for Commissioner's approval descriptions of the methodology to be used in creating rates and every modification thereof that it proposes to use and that complete supporting and supplementary rating information for rates shall be maintained and made available to the Commissioner upon request;
- (9) Including provisions for interim rates that require the Commissioner, within ten days of disapproval, to specify interim rates sufficient to protect the interests of the managed care plan and its enrollees, ensure the solvency of the managed care plan, maintain the plan's health care delivery, and prevent any impairment of enrollees' health care benefits; provided that the interim rate shall be no less than the median between the existing rate and the disapproved rate;
- (10) Establishing that, when a new rate becomes legally effective and the new rate is higher than the interim rate, the Commissioner shall allow the managed care plan to exact a surcharge on premiums retroactive to the time when the interim rate was first imposed. If the new rate is lower than the interim rate, the Commissioner may order that the difference be applied to stabilize future rates or be refunded to current enrollees of the managed care plan; and
- (11) Changing the effective date to encourage further discussion.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 12, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 12, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Menor). Noes, none. Excused, none.

SCRep. 488 Health on S.B. No. 1421

The purpose of this measure is to clarify the regulatory law regarding osteopathy.

Specifically, this measure, among other things, would:

- (1) Allow the Board of Medical Examiners (BME) to issue an educational teaching license to an osteopathic physician who is not licensed in this State and who is invited by the chief of service of a clinical department of a hospital to provide and promote professional education;
- (2) Allow the BME to issue a limited or temporary license to an osteopathic physician to maintain patient services for the purpose of substituting for another licensed osteopath in this State who is participating in specialized training at an out-of-state fully accredited medical teaching institution;
- (3) Require every osteopathy physician attending or treating certain wounds caused by violence or sustained in a suspicious or unusual manner or in certain motor vehicle collisions, or whenever the case is treated in a hospital, clinic, or other institution the manager, superintendent, or person in charge, to report to the county chief of police certain information about the person sustaining the injury and the nature of the injury;
- (4) Allow a pathologist or any licensed osteopathic physician to conduct a postmortem examination upon written consent of specified persons who have custody of the body for purposes of burial;
- (5) Allow abortions to be performed by licensed osteopathic physicians in a licensed hospital; and
- (6) Make other clarifying amendments to the regulated profession of osteopathy.

Your Committee received testimony in support of this measure from the Board of Medical Examiners and the Hawaii Medical Association.

Your Committee finds that the regulatory laws of osteopathy should be very similar to the regulatory laws of physicians and surgeons, inasmuch as both professions are alike in the scope of practice. This measure accomplishes that parallelism.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1421, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1421, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 489 Health on S.B. No. 1171

The purpose of this measure is to make it easier for minors without support to obtain medical care.

Specifically, this measure allows a minor who is at least fourteen years old and not under the care, supervision, or control of a parent, custodian, or legal guardian, to consent to primary medical care and services.

Testimony in support of this measure was submitted by Community Clinic of Maui, Hale Kipa, Hawaii Medical Association, Hawai'i Primary Care Association, Hawaii Youth Services Network, Kaiser Permanente Hawaii, The Queen's Medical Center, Volunteer Legal Services Hawai'i, Waikiki Health Center, and six individuals. The Hawaii Medical Service Association submitted comments.

Your Committee finds this measure will allow the approximately 1,000 youth living on their own to obtain needed medical care for acute illness or injury. This group of minors is very vulnerable and many of them are homeless, running away from abusive situations or drug addicted parents. Under existing law, these youths are unable to obtain medical care because physicians and clinics require parental consent for the treatment of minors because of concerns about liability.

Your Committee finds that the measure provides clear definitions and a clear explanation of the scope and nature of medical care to which the minor can consent to and under what circumstances.

Your Committee notes that the subject of physician liability in situations where a minor misrepresents that the minor is living on their own was raised in testimony at the hearing. Your Committee suggests that the Committee on Judiciary and Labor may want to explore that issue further.

Your Committee amended this measure to provide for a process for handling the minor's information when submitting claims for treatment to a health care plan. Technical nonsubstantive changes were also made for the purposes of clarity and consistency.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1171, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1171, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 490 Health on S.B. No. 813

The purpose of this measure is to encourage open communication between physicians and patients to improve patient safety and protect health care providers in medical malpractice actions.

The measure attempts to accomplish this goal by adding a new rule to the Hawaii Rules of Evidence that makes expressions of sympathy or benevolence by a health care provider inadmissible as evidence of an admission of liability in a civil court proceeding.

Your Committee received testimony in support of this measure from the Department of the Attorney General, Healthcare Association of Hawaii, The Queen's Medical Center, Kaiser Permanente, Hawaii Association of Health Plans, Consumer Lawyers of Hawaii, the Medical Insurance Exchange of California, Hawaii Medical Association, and seven individuals. The Department of Commerce and Consumer Affairs submitted testimony supporting the intent of this measure. The Judiciary of the State of Hawaii submitted comments on this measure.

Your Committee finds that it is imperative that the health care system in Hawaii be built on trust. Physicians and patients need to be able to communicate openly with each other without the fear of legal proceedings. Your Committee finds that this measure would encourage health care providers to express sympathy and engage in humane conduct at a time when the patient or the patient's family most need emotional support, without fear that such benevolent conduct will be used against them as an admission of liability.

Your Committee notes that the Judiciary raised concerns that a general apology bill that governed apologies and benevolent gestures by "individuals, corporations, or government entities" would be more inclusive and would cover "health care providers" as stated in this measure. In addition the Judiciary's testimony suggested that the common expressions of condolence: "I apologize" and "I am sorry" need to be classified in the law.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 813 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 491 Health on S.B. No. 1326

The purpose of this measure is to add law enforcement officers to the list of persons who are considered to have a direct and tangible interest in public health statistic records so that they may more efficiently conduct criminal investigations.

Your Committee received testimony in support of this measure from the Department of the Attorney General, the Department of Public Safety, the Honolulu Police Department, and the Hawai'i Police Department.

Your Committee finds that permitting law enforcement officers to have access to public health statistic records in certain situations would allow for more timely criminal investigations, while protecting the privacy of those records. In addition, your Committee notes that allowing law enforcement officers to have access to these records may assist with the back log of arrest warrants.

Your Committee has amended this measure, upon the recommendation of the Department of the Attorney General, to add language to specify that law enforcement officers will not be required to pay fees when requesting certified copies of vital statistic records. Your Committee has also amended this measure to make technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1326, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1326, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 492 Health on S.B. No. 1487

The purpose of this measure is to amend Hawaii's controlled substance schedules to conform to changes made in federal law.

Specifically, this measure clarifies the definition of schedule II depressants and adds pregabalin as a schedule V depressant.

Your Committee received testimony in support of this measure from the Department of Public Safety.

Your Committee finds that the Hawaii controlled substances schedule II and schedule V need to be updated to conform to federal laws. Your Committee further finds that the Federal Combat Methamphetamine Epidemic Act of 2005 did not exempt liquid and gel capsule forms of pseudoephedrine products from the reporting and recording requirements.

Accordingly, your Committee amended this measure by removing the exemption of pseudoephedrine products in liquid, liquid capsule, or gel capsule form from the reporting and record keeping requirement.

Your Committee further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1487, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1487, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 493 Health on S.B. No. 1802

The purpose of this measure is to provide an exception to the confidentiality of mental health records and to allow disclosure if it is made by the patient's healthcare provider to another healthcare provider for the purpose of continued treatment or care.

Testimony in support of this measure was submitted by Kaiser Permanente Hawaii, the Health Information Management Association of Hawaii, Hawaii Pacific Health, The Queen's Medical Center, the Hawai'i Primary Care Association, and one individual. The Hawaii Association of Health Plans submitted comments on this measure.

Your Committee finds that the existing law does not permit the disclosure of information for the continued care of a patient being treated for a mental illness unless the patient consents to the disclosure. Often times, this can have negative consequences for the patient because doctors do not have all the information they need to continue the patient's treatment. This measure will provide an exception to the consent requirements if the disclosure is made from one healthcare provider to another for the continued treatment or care of the patient.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1802 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 494 Health on S.B. No. 1329

The purpose of this measure is to clarify that the deadline for the Attorney General to review and either approve or disapprove an application for the acquisition of a hospital is ninety days after the submission of a complete application.

Your Committee received testimony in support of this measure from the Attorney General.

Your Committee finds that section 323D-75(c), Hawaii Revised Statutes, currently requires that the Attorney General to decide to either approve or disapprove an application for the acquisition of a hospital within ninety days of receiving the application. If the Attorney General does not decide within ninety days, the application is deemed approved. This creates a problem when the Attorney General receives an incomplete application. This measure will clarify that the Attorney General has ninety days to decide whether to approve or disapprove an application after receiving a complete application.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1329 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 495 Health on S.B. No. 1346

The purpose of this measure is to restore the statutory provision allowing pre-sentence mental or medical examinations of defendants for the purposes of sentencing.

Your Committee received testimony in support of this measure from the Department of the Attorney General and the Department of the Prosecuting Attorney for the City and County of Honolulu.

Your Committee finds that the intent of this measure is to restore language that was previously codified in section 706-603, Hawaii Revised Statutes, authorizing a court to order pre-sentence mental or medical examinations of defendants. This authorization was inadvertently repealed by Act 112, Session Laws of Hawaii 2005, and should be restored.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1346 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 496 (Joint) Health and Education on S.B. No. 1437

The purpose of this measure is to alleviate the nursing shortage.

Specifically, this measure would:

- (1) Establish a Geriatric Nursing Institute at the University of Hawaii at Manoa School of Nursing and Dental Hygiene;
- (2) Establish a University of Hawaii statewide nursing consortium to implement and evaluate a program to support educational mobility between the community colleges and four-year degree university programs; and
- (3) Increase the undergraduate faculty and academic support capacity at the University of Hawaii Manoa School of Nursing and Dental Hygiene to increase the number of nursing graduates.

Your Committees received testimony in support of this measure from the Governor's Office, Department of Health, University of Hawaii System, Hawaii State Center for Nursing, Healthcare Association of Hawaii, The Queen's Medical Center, Hawaii Medical Service Association, Hawaii Pacific Health, Leahi Hospital, and eleven individuals.

Your Committees find that Hawaii's nurses are the primary providers of hospital patient care and deliver much of the State's long term and community-based care. An investment in nursing is an investment in the health and well-being of the State.

Health statistics indicate that older adults consume the majority of health care services, comprising fifty-seven to sixty-three per cent of the physician visits, fifty per cent of hospital expenditures, eighty per cent of home health care visits, and ninety per cent of long term care. Ironically, many of the aging baby boomers are nurses, and it is projected that by 2020, sixty-one per cent of Hawaii's nursing workforce will have retired.

Your Committees have amended this measure by deleting the specific amounts appropriated, but urge the Committee on Ways and Means to restore the original appropriated amounts for each fiscal year of \$675,000 to establish a University of Hawaii Statewide Nursing Consortium; \$275,000 to establish a nursing workforce development initiative; and \$550,000 to increase the number of nursing graduates by twenty-five. Technical, nonsubstantive amendments were made for purposes of clarity, style, and to conform to preferred drafting conventions.

As affirmed by the records of votes of the members of your Committees on Health and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1437, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1437, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, 3 (Hee, Nishihara, Taniguchi).

SCRep. 497 (Joint/Majority) Health and Tourism and Government Operations on S.B. No. 1253

The purpose of this measure is to provide quality health care in the State's community hospital system by enabling Hawaii Health Systems Corporation to operate efficiently and autonomously.

The measure attempts to accomplish this purpose by exempting Hawaii Health Systems Corporation from the Procurement Code.

Your Committees received testimony in support of this measure from Hawaii Health Systems Corporation and one individual. Your Committees received testimony in opposition to this measure from the Department of Accounting and General Services, the State Procurement

Office, the Coalition of Hawaii Engineering and Architectural Professionals, Diagnostic Laboratory Services, Inc., and the American Institute of Architects.

Your Committees find that the Hawaii Health Systems Corporation public health facilities provide essential safety-net hospital and long term care services throughout the State and are often the only hospitals in many rural communities. Conflicts between the current required Procurement Code process and federal laws and regulations hinder the ability of Hawaii Health Systems Corporation to receive the full benefits of federal healthcare reimbursements. Your Committees further find that Hawaii Health Systems Corporation must have the authority to operate with appropriate flexibility and autonomy in order to remain viable and respond to the needs of the specific communities served.

As affirmed by the records of votes of the members of your Committees on Health and Tourism and Government Operations that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1253 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 1 (Kim). Noes, 1 (Trimble). Excused, none.

SCRep. 498 Health on S.B. No. 900

The purpose of this measure is to expand mental health services available in Hawaii.

Specifically, this measure establishes a psychiatric health services pilot project to enable psychiatrists to collaborate with primary care physicians at federally qualified health centers to provide patients with needed psychiatric health care. The pilot project is to provide up to four psychiatric residents for Oahu and one psychiatrist in each of the following areas: East Hawaii, West Hawaii, Maui County, Kauai, and Oahu. This measure makes an appropriation of an unspecified amount for the 2007-2008 fiscal year.

Testimony in support of this measure was submitted by the Counseling Center at the University of Hawaii, Hilo; Hamakua Health Center; Hawaii Disability Rights Center; Hawai'i Primary Care Association; Hawaii Psychiatric Medical Association; National Alliance on Mental Illness-O'ahu; and five individuals. The Department of Health and the Department of Human Services submitted testimony supporting the intent of this measure. The Waianae Coast Comprehensive Health Center submitted testimony in opposition.

Your Committee finds that mental health is an essential component of the overall health and well-being of every resident of the State. Your Committee notes there is a shortage of mental health specialists available, especially in rural communities and neighbor islands. The result is that many people do not get treatment or do not stick with their treatment. Another consequence is that primary health care providers are forced to deal with issues that require the help of a specialty in psychiatry.

Your Committee suggests that the appropriation for the fiscal year be in the amount of \$200,000, and used to fund one position for East Hawaii and another position for West Hawaii. Your Committee recommends to your Committee on Ways and Means an appropriation of \$500,000, for the 2008-2009 fiscal year to continue the two positions on the island of Hawaii and one additional position in each of the following areas: Maui, Kauai, and Oahu.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 900 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 499 Health on S.B. No. 1050

The purpose of this measure is to ensure the continued viability of Hana Health.

Specifically, this measure appropriates \$2,200,000 for fiscal year 2007-2008, and \$2,200,000 for fiscal year 2008-2009, for operational expenses and commercial kitchen equipment and installation costs at Hana Health.

Your Committee received testimony in support of this measure from Hana Health, Hawaii Primary Care Association, and one hundred two individuals.

Your Committee finds that Hana Health is a vital part of the Moku of Hana. It has provided culturally sensitive health care, social services, employment training, and economic development projects to the community, which has been federally designated as a medically-underserved population. Sixty-two per cent of Hana's residents are Native Hawaiian and many other residents are underserved due to financial, cultural, and geographic barriers. Your Committee further finds that providing financial support to Hana Health is necessary to ensure quality health, social, and economic conditions of this fragile community.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1050 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 500 Health on S.B. No. 1038

The purpose of this measure is to ensure continuing health care services for the people of Moloka'i.

Specifically, this measure appropriates \$2,000,000, in each year of the 2007-2009 fiscal biennium for the operating expenses of Moloka'i General Hospital.

Testimony in support of this measure was submitted by a member of the Maui County Council, Hawai'i Primary Care Association, Healthcare Association of Hawaii, and Moloka'i General Hospital.

Your Committee finds that Moloka'i General Hospital, the only hospital on the island of Moloka'i, is a critical resource to approximately 7,500 residents of that island as well as visiting tourists. It is the only twenty-four-hour medical emergency facility on the island that provides essential health care services meeting a wide variety of patients' needs.

Your Committee further finds that medical costs are increasing while hospitals are experiencing reductions in health care payments from both government programs, such as Medicaid and Medicare, and health care insurance plans. This financial strain is most felt in rural communities

where patient volume and revenues do not necessarily meet the financial needs of the facility so that it may maintain the broad array of services and retain community health and hospital accreditation. Therefore, your Committee finds the appropriation made by this measure is an important and valid use of State resources.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1038 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Menor).

SCRep. 501 Health on S.B. No. 1817

The purpose of this measure is to make various appropriations for the provision of palliative care.

Specifically, the measure appropriates:

- (1) \$60,000 for each year of the 2007-2009 fiscal biennium to integrate palliative care into long-term care settings;
- (2) \$75,000 for fiscal year 2007-2008, and \$50,000 for fiscal year 2008-2009, to implement statewide physician orders for life-sustaining treatment;
- (3) \$75,000 in fiscal year 2007-2008, and \$50,000 in fiscal year 2008-2009, to implement a hospice and palliative care resource center demonstration project; and
- (4) \$15,000 for fiscal year 2007-2008 to implement a statewide assessment of benchmark indicators to follow up on surveys dealing with end of life issues and indicators.

Your Committee received testimony in support of this measure from Healthcare Association of Hawaii; Hawaii Medical Service Association; Hawaii Long Term Care Association; Hawaii Family Forum; Roman Catholic Church in the State of Hawaii; Hawaiian Islands Hospice Organization; Hospice Hawaii; Policy Advisory Board for Elder Affairs; Kōkua Mau; and five individuals.

Your Committee finds that skilled and empathetic palliative and end-of-life care are essential components of quality long-term care. This measure would be of immeasurable value to providers of palliative care and those to whom they minister. Partnering to optimize palliative care competency in long-term care settings and having available a hospice and palliative care resource center, augment the concept of “quality of care, quality of life.”

Hawaii citizens have the longest life expectancy in the nation, and the fastest growing population of elders. The rapidly aging community forces the State to confront and address the challenge of providing the best end-of-life care to elders.

Your Committee has amended this measure by deleting the amount appropriated, but recommends to the Committee on Ways and Means that the original amounts be appropriated.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1817, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1817, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 502 Health on S.B. No. 1258

The purpose of this measure is to increase access to health care and improve the detection, prevention, treatment, and education of chronic kidney disease.

This measure accomplishes this goal by appropriating funds to support the modified home care and community health demonstration project for chronic kidney disease patients.

Your Committee received testimony in support of this measure from the Office of Hawaiian Affairs, the National Kidney Foundation, and St. Francis Healthcare System of Hawaii. The Department of Health submitted comments on the measure.

Your Committee finds that there is an increasing need for kidney dialysis services, especially on the neighbor islands and rural areas of the State. Your Committee further finds that establishing full-scale dialysis facilities within each of the communities is not cost-effective. The demonstration project to be supported by this measure will implement a modified home care and community health approach; whereby patients can place their personal dialysis machines in a common facility. Initially, two facilities will be operated, one in Kahuku on Oahu and the other in Hana on Maui. Additionally, patients living in remote areas who have available space in their homes for hemodialysis will have the opportunity to have a trained caregiver work with them.

Your Committee further finds that a recommended appropriation in the amount of \$1.9 million will support both the Kahuku facility and the Hana facility, provided that the Office of Hawaiian Affairs matches the appropriation for a total funding amount of \$3.8 million.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1258 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 503 Health on S.B. No. 753

The purpose of this measure is to develop a health plan that provides health insurance coverage to all residents of Hawaii.

This measure attempts to accomplish this goal by establishing the Hawaii Health Authority to be responsible for overall health planning for the State and for determining future capacity needs of health providers, facilities, equipment, and support services providers.

Your Committee received testimony in support of this measure from the National Association of Social Workers Hawaii Chapter, the Hawaii Government Employees Association, and four individuals. Your Committee received testimony in opposition to this measure from the

Department of Commerce and Consumer Affairs, the Department of Budget and Finance, Hawaii Medical Association, Healthcare Association of Hawaii, and State Farm Mutual Automobile Insurance Company.

Your Committee finds that nearly ten per cent of Hawaii's population is without health insurance. Your Committee further finds that a single-payer or universal health care system will be a cost-effective method of delivering quality health care to all residents of Hawaii.

However, your Committee finds that in order for this system to be effective and therefore successful, it needs to be comprehensively developed.

Accordingly, you Committee amended this measure by removing the establishment of the Hawaii Health Authority because its functions are duplicative of the State Health Planning and Development Agency.

Your Committee further amended this measure by making an appropriation for the continuation of the Hawaii health care task force created by Act 223, Session Laws of Hawaii 2005, regarding the single-payer health care concept, for an additional two years. The appropriations are to be expended by the Insurance Division of the Department of Commerce and Consumer Affairs.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 753, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 753, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, none.

SCRep. 504 Health on S.B. No. 1855

The purpose of this measure is to make an appropriation for the Organ Donor Center of Hawaii to increase the number of individuals consenting to organ and tissue donation by expanding and promoting public education and awareness programs on organ, tissue, and eye donations, including the minority organ tissue transplant education program.

Your Committee received testimony in support of this measure from the National Kidney Foundation of Hawaii; Surgical Associates, Inc.; Filipino Nurses' Organization of Hawaii; Philippine Nurses Association-Hawaii; San Manuel Pangasinan Association of Hawaii; Nursing Advocates & Mentors, Inc.; Chinese General Hospital Nursing Alumni Association International; Congress of Visayan Organizations; Hawaii Living Donor Council; Asian American Network for Cancer Awareness Research and Training; Oahu Filipino Community Council; and Minority Organ Tissue Transplant Education Program. Comments were received from the Department of Health.

Your Committee finds that there is a critical shortage of organ and tissue donors in the State. Many patients are on waiting lists for kidney, liver, heart, lung, and other organ and tissue transplants. The number of people requiring a life-saving transplant continues to rise faster than the number of available donors, especially among minority ethnic groups. As of January 5, 2007, there were more than ninety-four thousand patients awaiting transplants on the national waiting list. Every thirteen minutes, a new name is added to the waiting list and every day, an average of seventeen patients die while waiting.

In Hawaii, there are three hundred seventy eight patients waiting and for the past five years, an average of nineteen patients have died while waiting for a second chance at life. For various reasons, minority ethnic groups appear to be at increased risk of suffering illnesses such as diabetes and high blood pressure that can lead to organ failure, resulting in the need for organ transplants. The success rate of organ transplants is often improved when the donor and the recipient are of the same ethnic or racial group. Therefore, a shortage of organ donors among certain minority ethnic groups may disproportionately impact patients belonging to that minority ethnic group.

Your Committee has amended this measure by deleting the amount appropriated to ensure further discussion, but your Committee recommends to the Committee on Ways and Means that the original funding in this measure of \$175,000 be restored. Technical, nonsubstantive amendments for purposes of clarity and style were also made.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1855, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1855, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 505 Health on S.B. No. 1454

The purpose of this measure is to rename the Hospital and Medical Facilities Special Fund to the Office of Health Care Assurances Special Fund (Fund) to reflect the current name of the Office of Health Care Assurances (OHCA).

In addition, this measure requires that all moneys collected by the OHCA in the form of fees and fines be deposited into the Fund and allows the moneys deposited to be used to offset the OHCA's operational expenses.

Testimony in support of this measure was submitted by the Department of Health.

Your Committee finds that there is a need to re-name the Hospital and Medical Facilities Special Fund to reflect the change in the office's name to the Office of Health Care Assurance in 1998. Your Committee further finds that allowing fees and fines to be deposited into the fund and allowing the moneys to be used for OHCA's operational expenses will allow the OHCA to continue to carry out its functions by offsetting operational costs, in lieu of annual general fund budget requests.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1454 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 506 Health on S.B. No. 1747

The purpose of this measure is to appropriate funds, in addition to the \$1,200,000 submitted in the Department of Health's 2007-2009 fiscal biennium budget request, to continue the maintenance and operation of developmental disabilities domiciliary homes and developmental disabilities apartment complexes.

Your Committee received testimony in support of this measure from the Department of Health (DOH); State Council on Developmental Disabilities; The Arc in Hawaii; Opportunities for the Retarded, Inc.; and the Arc of Kona.

Your Committee finds that providers of developmental disabilities residential services perform a vital service to the State by providing important residential services to persons with developmental disabilities or mental retardation. Section 321-15.9, Hawaii Revised Statutes, authorizes the DOH to make additional payments for residential services to the providers of developmental disabilities domiciliary homes and payments to the operators of developmental disabilities apartment complexes.

The intent of this measure is to make up for funding shortfalls in 2005 and 2006. According to the testimony, there have been closures of developmental disability domiciliary homes in the past several years due to operational funding deficits. Without additional funding, the prospect looms real for other closures, leaving the State with the prospect of diminished residential alternatives.

Your Committee has amended this measure by deleting the specific amount appropriated, but recommends to the Committee on Ways and Means that the funding for the program contained in the measure be \$600,000 in each of the next two fiscal years.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1747, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1747, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 507 (Majority) Health on S.B. No. 1804

The purpose of this measure is to provide quality health care to trauma patients by ensuring the viability of trauma centers in the State.

The measure accomplishes this purpose by:

- (1) Establishing surcharges for traffic violations, use of intoxicants while operating a vehicle, crimes of violence, and offenses related to drugs and intoxicating compounds;
- (2) Establishing surcharges for violations that result in accidents involving death or any degree of bodily injury;
- (3) Clarifying that the Trauma System Special Fund established under section 321-22.5, Hawaii Revised Statutes, consists of, among other things, trauma system surcharges, and cigarette tax revenues;
- (4) Providing the methodology used in calculating costs incurred by hospitals providing care to trauma patients takes into account:
 - (A) Physician on-call coverage that is demonstrated to be essential for trauma services within the hospital;
 - (B) Equipment that is demonstrated to be essential for trauma services within the hospital; and
 - (C) The creation of overflow or surge capacity to allow a trauma center to respond to mass casualties resulting from an act of terrorism or natural disaster;
- (5) Defining "trauma center"; and
- (6) Making appropriations to and out of the Trauma System Special Fund.

Your Committee received testimony in support of this measure from Healthcare Association of Hawaii, Kaiser Permanente, The Queen's Medical Center, and Hawaii Pacific Health. The Judiciary of the State of Hawaii, the Department of Health, and the Department of Budget and Finance submitted comments on this measure.

Your Committee finds that trauma is one of the most serious public health problems we face. Trauma is the leading cause of death of people between the ages of one and forty-four years. A comprehensive statewide trauma system built on public health principles can reduce death and disability from injuries. Therefore, your Committee finds that providing alternative funding mechanisms that will increase the trauma system special fund is necessary to ensure the viability of the State's trauma system.

Your Committee amended this measure by enabling the Department of Health to use the American College of Surgeons recommendations for guidelines in determining the levels of the trauma centers; provided that a yearly on-site verification visit is conducted by the department and for level I or level II trauma centers, an on-site verification by the American College of Surgeons every three years.

Your Committee adopted the recommendations of the Judiciary and amended this measure by implementing the surcharges as of January 1, 2008.

Your Committee further amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1804, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1804, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Whalen). Excused, none.

SCRep. 508 Health on S.B. No. 1108

The purpose of this measure is to appropriate funds to the Department of Health and the Women's Caucus of the Legislature to conduct a comprehensive educational media and speaking campaign about the causes and prevention of cervical cancer in the State.

Your Committee received testimony in support of this measure from the Department of Health and the American Cancer Society Hawai'i Pacific, Inc.

Your Committee finds that cervical cancer is the second most common cancer among women and it is fully preventable, if pre-cancerous cell changes are detected and treated early enough. Your Committee further finds that education about cervical cancer can be a significant factor in

helping with the early detection of this illness. This measure will allow the Department of Health and the Women's Caucus of the Legislature to disseminate information about the causes and methods of prevention.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1108 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 509 Health on S.B. No. 1728

The purpose of this measure is to provide funding for a two-year demonstration project at the Waikiki Health Center and the West Hawaii Community Health Center, that includes hepatitis C testing, case management, and treatment.

Your Committee received testimony in support of this measure from the Drug Policy Action Group; Philippine Nurses Association-Hawaii; United Filipino Council of Hawaii; Nursing, Advocates & Mentors, Inc.; Filipino Coalition for Solidarity; Oahu Filipino Community Council; Asian American Network for Cancer Awareness Research and Training; Waikiki Health Center; Hepatitis Prevention, Education, Treatment & Support Network of Hawaii; Hawaii Disability Rights Center; and seven individuals. Comments were received from the Department of Health.

Your Committee finds that Hawaii has the highest rate of liver cancer in the United States due to the high rate of chronic viral hepatitis in our State. There are over fifteen thousand people that have tested positive for hepatitis C in Hawaii. Hepatitis C is also the leading cause of liver transplant in the United States. Many people who are infected with this silent epidemic wait until they feel ill before being tested, when it can be more difficult, extremely expensive, or may even be too late to be treated.

Your Committee further finds that testing, early medical follow-up, and treatment are needed to save lives. Proactive public health intervention is needed to reduce costs to our public health system instead of the high costs that can occur without proactive public health intervention.

Your Committee has amended this measure by deleting the specific amount appropriated. Your Committee recommends to the Committee on Ways and Means that the original appropriation amount of \$120,000 be restored.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1728, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1728, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 510 Health on S.B. No. 1111

The purpose of this Act is to provide an integrated and comprehensive approach to family planning and contraceptive services for Hawaii's women, teens, and men by:

- (1) Providing funding for family planning and contraception services; and
- (2) Providing funding for family planning health education and outreach services.

Your Committee received testimony in support of this measure from the Department of Health (DOH); Hawaii State Commission on the Status of Women; Planned Parenthood of Hawaii; Hawaii Youth Services Network; March of Dimes Hawaii Chapter; Hawaii Primary Care Association; Bay Clinic, Inc.; Kalihi-Palama Health Center; Waianae Coast Comprehensive Health Center; Sestak Rehabilitation Services; Family Support Services of West Hawaii; Healthy Mothers, Healthy Babies Coalition of Hawaii; Hawaii State Democratic Women's Caucus; Planned Parenthood of Hawaii Action Network; and seven individuals. Testimony in opposition was received from Pro-Family Hawaii; Hawaii Right to Life; Maui Chapter of Hawaii Right to Life; Christian Voice of Hawaii; and two individuals.

In 2006, H.C.R. No. 226, H.D. 1, requested the DOH to convene a working group to determine family planning funding needs for legislative consideration. To effectively improve the State's reproductive health services and reduce unintended pregnancies in Hawaii, the working group recommended that clinical services, health education, and outreach services be expanded and upgraded as a system to improve access to these currently fragmented services.

The working group found that Hawaii reduced its state funds for publicly supported family planning services by ninety per cent in the mid nineties and has never reinstated this funding. In addition, Hawaii currently has the twelfth highest teen pregnancy rate in the nation. The working group also recommended that increased public awareness of the health benefits of planned pregnancy, use of contraceptives, child spacing, and clinic locations is crucial to reducing Hawaii's unintended pregnancy rate.

Your Committee has amended this measure by deleting the specific amount appropriated, but recommends that the original amounts of \$2,443,750, for contraceptive services and \$1,540,000, for family planning health education and outreach services be reinstated by the Committee on Ways and Means. Technical amendments were also made for the purpose of clarity.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1111, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1111, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 511 Health on S.B. No. 1119

The purpose of this measure is to provide funding for a comprehensive study to provide the information to develop effective drug policies.

Your Committee received testimony in support of this measure from the American Civil Liberties Union of Hawaii; Hawaii State Democratic Women's Caucus; the Drug Policy Action Group; the Drug Policy Forum of Hawaii; The League of Women Voters of Hawaii; Oahu County Democratic Party of Hawaii; and four individuals.

Your Committee finds that developing and implementing an effective and comprehensive drug policy is vital to improving the health and safety of the citizens of the State. Drug addiction is a public health issue and accurate data to develop effective and fiscally responsible policies have not

been available. Drug issues intersect with many other issues in the community, including homelessness, violence in the home, after-school programs, incarceration, property crime, health care, employment, foster care, and judiciary costs.

Your Committee further finds that a comprehensive state drug policy is needed. The policy should be based on accurate data and an expert assessment of the effectiveness of current programs.

Your Committee has amended this measure by deleting the specific amount appropriated and designating the Department of Health as the expending agency. Your Committee recommends to the Committee on Ways and Means that the original appropriation amount of \$88,090, be restored.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1119, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1119, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 512 Health on S.B. No. 1481

The purpose of this measure is to establish a pilot program for screening, brief intervention, and referral to substance abuse treatment.

The Lieutenant Governor, the Department of Health, Mothers Against Drunk Driving, the Hawaii Substance Abuse Coalition, and one individual submitted testimony in support of this measure. The University of Hawai'i System submitted testimony in support of the intent of this measure, provided that its passage does not replace or adversely impact priorities of the University as expressed in its Board of Regents-approved Executive Biennium Budget.

Your Committee finds that medical personnel, particularly in emergency rooms and trauma centers, regularly encounter patients who have sustained injuries, loss, or trauma resulting from the use of alcohol or other drugs. This initial point of contact in a medical setting is a recognized window of opportunity where patients are most vulnerable and open to intervention and dialogue that address their underlying alcohol or illegal drug issues.

This measure will help capitalize on this "teachable moment" in medical settings by offering screening, brief intervention, education, and, if necessary, referrals to appropriate care or treatment for individuals at risk for, or diagnosed with, alcohol and other substance use disorders.

It is your Committee's intent to establish a pilot program for screening, brief intervention, and referral to substance abuse treatment. Your Committee has amended this measure by:

- (1) Appropriating an unspecified sum instead of \$1,333,513; and
- (2) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1481, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1481, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 513 Health on S.B. No. 167

The purpose of this measure is to address the healthcare workforce shortage in Hawaii.

Specifically, this measure establishes interest-free home purchase loan programs for physicians and advanced practice registered nurses to provide them with an incentive to work in hard-to-staff rural areas.

Testimony in support of this measure was submitted by the Consumer Lawyers of Hawaii, Hawai'i Association of Professional Nurses, Hawaii Health Systems Corporation, and Hawaii Psychiatric Medical Association. The Department of Health submitted testimony supporting the intent of this measure.

Your Committee finds that the shortage of healthcare professionals in rural areas is a major problem that has a huge impact on the health of Hawaii's rural residents and communities. The high cost of obtaining a medical education prevents many professionals from being able to take positions in rural areas that usually provide lower compensation than what is generally paid in urbanized areas. Providing interest-free home loans to physicians and advanced practice registered nurses working at least forty hours a week in a rural health facility will provide meaningful incentives to bring much needed health care providers to the State's rural areas.

Your Committee notes the concern that the administration of the loan program established in this measure is not within the expertise of the Department of Health and finds the Hawaii Health Systems Corporation is a more suitable entity to oversee the program.

Your Committee amended this measure to place the loan program under the administration of the Hawaii Health Systems Corporation.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 167, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 167, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 514 Judiciary and Labor on S.B. No. 1928

The purpose of this measure is to authorize the establishment of an investigative unit within the office of the auditor to conduct investigations involving alleged or suspected government waste, fraud, abuse, or malfeasance at the request of the legislature or upon the auditor's initiative; expands the powers of the office of the auditor; appropriates funds for the investigative unit.

Article VII, Section 10, of the Hawaii State Constitution authorizes the Auditor to conduct such investigations as may be directed by the Legislature. However, the Auditor has not conducted investigations in the past and has never been provided funds for this purpose.

Your Committee found that several states have auditor's offices doing investigations as well as audits for their legislatures and two particular states, North Carolina and Delaware have had this structure for over twenty years. The United States Congress has an investigative arm called the Government Accountability Office (GAO) which does the investigative work for Congress.

Your Committee finds that there is a need for an independent agency to do investigative work for the Legislative branch of government. The Attorney General's Office is the investigative arm of the Executive Branch. This point became more evident during a review of the Ka Loko Dam investigation being done by the Attorney General's Office. It was pointed out that in a report by a special investigator that there may be some liability on the part of the state but no agency is investigating whether there is possible liability. The Attorney General does represent the state on civil liability issues or would contract legal representation. An Auditor's investigation would represent an independent and objective perspective that could be reported to the Legislature which makes decisions on funding and enactment of laws.

In addition, your Committee finds that the Auditor's Office receives many complaints and information of government fraud and abuses that go beyond the scope of a management or financial audit.

Your Committee heard testimony from the Attorney General's Office in opposition to the bill. The Department of Taxation took no position to the forming of the investigative unit but opposed allowing the Auditor to have access to confidential tax information.

Your Committee amended the bill to delete the provisions allowing for access to confidential tax information and confidential child support enforcement information.

Your Committee also amended the bill to include nonfeasance as an additional area to be investigated since government efficiency may be affected by inaction.

Your Committee further amended the bill to condition an investigation initiated by the Auditor upon concurrence of the President of the Senate or the Speaker of the House of Representative. This is to keep in conformance with the Auditor's Office being the investigative arm of the Legislature.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1928, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1928, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 515 (Joint/Majority) Tourism and Government Operations, Education and Judiciary and Labor on S.B. No. 602

The purpose of this measure is to establish a procurement preference for bids for public school repair and maintenance that include an experiential learning opportunity for students.

Your Committees received testimony in support of this measure from the Workforce Development Council. Comments were received from the Department of Accounting and General Services and State Procurement Office.

Your Committees find that there is a critical need to provide students with first hand opportunities to explore careers, and to gain a better understanding of workplace expectations. There is also an unprecedented amount of work being done on school property for repair and maintenance.

The intent of this measure is to increase the number of learning opportunities in the building trades that are available to public school students. Construction is a strong component of Hawaii's economy. The supply of building trade artisans needs to be augmented in order to meet the needs of Hawaii's growing and booming construction industry.

Your Committees have amended this measure by:

- (1) Changing the credit a bidder would receive for offering experiential learning opportunities from a preference to giving greater favorable consideration to a bid or proposal, in recognition of the complexities and inequities of estimating the costs of providing an experiential learning opportunity;
- (2) Defining "giving greater favorable consideration" as a bid or proposal that is given an advantage over a bid or proposal that does not include a learning opportunity, in the consideration of the entire bid or proposal, including but not limited to, price and quality; and
- (3) Adding students in the construction academies, as a means of strengthening the curriculum.

As affirmed by the records of votes of the members of your Committees on Tourism and Government Operations and Education and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 602, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 602, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, 2 (Inouye, Trimble). Excused, 3 (Chun Oakland, Taniguchi, Tsutsui).

SCRep. 516 (Joint) Tourism and Government Operations and Intergovernmental and Military Affairs on S.B. No. 679

The purpose of this measure is to establish procedures for the Governor to declare a tourism emergency and to establish a Tourism Emergency Trust Fund.

Your Committees received testimony in support of this measure from the Department of Business, Economic Development, and Tourism; Hawaii Tourism Authority; Hawai'i Hotels and Lodging, Association; and The Chamber of Commerce of Hawaii.

Your Committees find that a real threat exists to Hawaii's tourism industry. These threats are different in many ways from a civil defense emergency. World conflict, terrorism, natural disaster, or an outbreak of disease can pose a real and substantial detrimental economic impact on the overall financial well-being of Hawaii's tourism industry, thereby causing an adverse ripple effect across the State's entire economy.

Under this measure, the initial determination of whether a tourism emergency exists would be made by the Board of Directors of the Hawaii Tourism Authority. Upon making a determination that an emergency exists, the board would then submit a request to the Governor to declare a tourism emergency.

The Tourism Emergency Trust Fund would be used exclusively to provide for the development and implementation of emergency measures to respond and mitigate to any adverse effects on the tourism industry resulting from world conflict, terrorism, natural disaster, or an outbreak of a disease that may result in a substantial interruption of commerce and adversely affect the welfare of the people of Hawaii. The fund would hold moneys derived from unused residual revenues after the required statutory percentage allocations into the Tourism Special Fund's subaccount for a safety and security budget are made.

The intent of this measure is to be proactive and prepared to protect Hawaii's vital economic engine--tourism. As such, this measure is a wise and prudent step toward meeting the challenges of any catastrophe that has the potential to devastate the State's tourist industry and derail the State's economy. It is not the intent of your Committees that this measure effect organized labor.

Your Committees have amended this measure by:

- (1) Clarifying that the specified events must result in a substantial interruption of commerce that results from a statewide emergency in order for the Governor to declare a tourism emergency;
- (2) Excluding organized labor from the purview of emergency measures; and
- (3) Making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Tourism and Government Operations and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 679, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 679, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 1 (Hemmings).

SCRep. 517 Tourism and Government Operations on S.B. No. 17

The purpose of this measure is to amend the existing state contract requirement for an entity providing design professional services to defend the State in legal action.

Specifically, this measure:

- (1) Prohibits provisions in government procurement contracts that require the contractor to defend the governmental body; and
- (2) Allows government procurement contracts to require a contractor to indemnify and hold harmless the governmental body from the negligence, errors, omissions, and other wrongful acts of the contractor in the performance of the contractor's professional services.

Your Committee received testimony in support of this measure from the Small Business Regulatory Review Board; SSFM International, Inc.; Coalition of Hawaii Engineering and Architectural Professionals; ECS, Inc.; Engineering Concepts, Inc.; Fukunaga & Associates, Inc.; Gray Hong Nojima & Associates, Inc.; Consulting Structural Hawaii, Inc.; The Limtiaco Consulting Group; KAI Hawaii Inc.; Moss Engineering, Inc.; ACEC of Hawaii; Masa Fujioka & Associates; and Sam O. Hirota, Inc. The Department of the Attorney General testified against the measure.

This measure addresses the problems that arise from the fact that a great majority of architectural businesses are small businesses that cannot afford to absorb the unpredictable costs of defending the State against claims that could be frivolous. Testimony indicated that the existing procurement code contract requirement to defend the State survives the life of the contract and runs concurrent with the life of the building, which could last for decades. This places an onerous burden upon elderly and retired architects.

Your Committee finds that design professional service contracts are used by governmental bodies to construct public works that endure and are used by the public for a significant period of time beyond the life of these contracts. It is not uncommon for public works to survive their designers. Your Committee recognizes that design professionals have an extended period of personal liability that cannot be avoided by ways often used by other public contractors.

Testimony further indicated that obtaining professional liability insurance is a problem inasmuch as traditional errors and omissions policies cover negligence caused by the insured rather than cover the likelihood of having to defend against an unknown future claim.

Your Committee has amended this measure by:

- (1) Applying the provisions of the measure to contracts affected by this measure of less than \$5,000,000, entered into beginning July 1, 2007; and
- (2) Imposing a ten-year statute of limitations for contracts affected by this measure, entered into prior to July 1, 2007.

The intent of this measure, as amended, is to achieve an equitable compromise of competing interest in the interests of preserving and promoting the architectural and construction industries of this State.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 17, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 17, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, none.

SCRep. 518 Tourism and Government Operations on S.B. No. 1438

The purpose of this measure is to establish a Fiftieth Anniversary of Statehood Commission.

Your Committee received testimony in support of this measure from the Department of Business, Economic Development, and Tourism and one individual.

The intent of this measure is to plan and coordinate the celebration of the fiftieth anniversary of Hawaii's admission to statehood in August 1959. Your Committee finds that Hawaii has benefited greatly from statehood, particularly the rights, privileges, and protections that statehood and citizenship under the United States provide.

Your Committee has amended this measure by:

- (1) Including in the membership of the commission, the Office of Hawaiian Affairs, Hawaii Tourism Authority, and State Foundation on Culture and the Arts;
- (2) Clarifying the qualification of the members to include some knowledge about the history and culture of Hawaii, and experience in event planning and in developing community partnerships; and
- (3) Providing that, with respect to the composition of the commission:
 - (A) The selection of the chair shall be by commission members;
 - (B) Two members are to be selected by the Governor;
 - (C) The representation by the faith-based community has been deleted; and
 - (D) The process to fill a vacancy by appointment by the Governor has been deleted;

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1438, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1438, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, none.

SCRep. 519 (Joint) Tourism and Government Operations and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1052

The purpose of this measure is to require that all state and county letterheads, when newly created or reprinted, contain the accurate, appropriate, and authentic Hawaiian names and language printed above the English translations.

This measure also establishes a Hawaiian Language Interim Task Force to develop an implementation plan to achieve the aims of this measure.

Your Committees received testimony in support of this measure from one individual. Testimony in opposition was received from the Department of Accounting and General Services. Comments were received from the State Attorney General.

Your Committees find that Hawai'i is the only state in the United States that has a designated native language, Hawaiian, as one of its two official state languages. The Hawaiian language is a beautiful, flowing tongue, capturing the natural beauty of the Islands in its tones and phrases. After being suppressed for many years, the Hawaiian language is making a strong revival. The number of fluent speakers is rising dramatically, and it is not uncommon to hear Hawaiian spoken in public. Most street names and places are Hawaiian, and it is a sign of respect to the native culture to pronounce and spell Hawaiian words correctly. This measure is in recognition of that respect.

Your Committees note that existing law provides for the use of Hawaiian words in official government documents, and that the Hawaii State Constitution provides for the promotion of Hawaiian culture, history, and language. The Hawaiian language immersion schools and the Hawaiian Culture Program of the Hawaii Tourism Authority are but two of the established Hawaiian language and culture programs, in addition to the College of Hawaiian Language at the University of Hawai'i at Hilo and its Hawaiian Language Center (Hale Kuamo'o).

Your Committees view this measure as a recognition of the extent to which the Hawaiian language and culture have been reasserted in all aspects of life in Hawai'i.

Your Committees have amended this measure by:

- (1) Clarifying that the authentic Hawaiian language requirement does not apply to state artwork or to the hanging state emblems in the rotunda of the state capitol; and
- (2) Requiring the Hawaiian Language Interim Task Force to report on recommendations to expand the proper usage of the Hawaiian language in government, the community, and the greater society of Hawai'i.

As affirmed by the records of votes of the members of your Committees on Tourism and Government Operations and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1052, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1052, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 9. Noes, none. Excused, none.

SCRep. 520 Tourism and Government Operations on S.B. No. 1993

The purpose of this measure is to provide tax incentives for the development of intellectual property and performing arts, and to repeal the Ko Olina Resort and Marina and Makaha Resort tax credit.

This measure establishes an:

- (1) Income tax exemption for performing arts royalties derived from patents, copyrights, and trade secrets;
- (2) Income tax credit for performing arts investments;
- (3) Income tax credit for performing arts research activities; and
- (4) Tourism training facility tax credit.

This measure also creates a tourism training curriculum committee to be responsible for certifying the curriculum of any tourism training facility in the State that is eligible for a tourism training facility tax credit.

Your Committee received testimony in support of this measure from the Department of Business, Economic Development, and Tourism; Hawai'i Tourism Authority; Hawai'i Hotel & Lodging Association; Rigel Entertainment Corporation; and one individual. Comments were received from the Department of Taxation.

Your Committee finds that the attractions and educational facilities tax credit for Ko Olina Resort and Marina and the Makaha Resort are no longer necessary.

Your Committee further finds that the Leeward Coast of Oahu has levels of poverty in excess of twenty per cent in each of the census tracts comprising this region. This condition has existed for over forty years, despite the efforts of federal, state, and county programs to alleviate the suffering or reduce the numbers of individuals and families impacted.

The continued development of Ko Olina and the continued strength of the State's visitor industry has expanded the need for affordable workforce housing and training to prepare for the State's future economic growth. Because of the success of Ko Olina, the Ko Olina Resort is amenable to the redesignation of the tax credits, if the tax credits will continue to be used to serve and revive the Leeward Coast through affordable rental housing and visitor industry education and training opportunities within the region.

Your Committee has amended this measure by:

- (1) Deleting the:
 - (A) Income tax exclusion for performing arts royalties derived from patents, copyrights, or trade secrets, the income tax credits for performing arts investments and tax research activities; and
 - (B) Tourism training curriculum committee, and the tourism training facility tax credit; and
- (2) Establishing a Leeward Coast revitalization tax credit for affordable rental housing and educational and training facilities.

The intent of this measure, as amended, is to provide an economic stimulus to the development of the Leeward Coast, similar to the intent of Act 100, Session Laws of Hawaii 2003, which provided the Ko Olina Resort and Marina and Makaha Resort tax credit. What the Leeward Coast needs now is affordable rental housing and educational and training projects, both of which would serve to revitalize the region and provide greater employment opportunities and a higher standard of living for the region.

As affirmed by the record of votes of the members of your Committee on Tourism and Government Operations that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1993, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1993, S.D. 1, and be referred to the Committees on Economic Development and Taxation and Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Tsutsui). Noes, none. Excused, none.

SCRep. 521 Education on S.B. No. 1155

The purpose of this measure is to appropriate funds to address the teacher shortage problem in the State.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association. Comments on the measure were also submitted by the Department of Education.

Your Committee finds that a teacher shortage problem continues to plague our State. Your Committee further finds that the problem will only continue to worsen with the aging and retirement of the baby-boomer teachers. High-quality teachers are instrumental in providing for high student achievement. Therefore, increased efforts are needed to help to grow a teaching workforce. In 2005, the Legislature established the Hawaii Teacher Cadet Program to identify, support, and encourage prospective teachers while they are still in high school. Your Committee believes that continued efforts to provide incentives and support persons pursuing a teaching career will help to address the teacher shortage problem and ensure high quality education for our children.

Accordingly, your Committee has amended this measure by:

- (1) Deleting portions of the purpose section to clarify the intent of the measure to provide funding for the Hawaii Teacher Cadet Program;
- (2) Making an appropriation of general revenues to the Hawaii Teacher Cadet Program Fund; and
- (3) Making an appropriation out of the Hawaii Teacher Cadet Program Fund for the Hawaii Teacher Cadet Program to provide programs to encourage students to become teachers.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1155, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1155, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 522 Education on S.B. No. 603

The purpose of this measure is to improve the public charter school system by clarifying duties, functions, and roles of the charter schools system and the Board of Education.

Testimony in support of this measure was submitted by the Charter School Administrative Office, the College of Education of the University of Hawaii, Kamehameha Schools, the Hawaii Charter Schools Network, Ho'okako'o Corporation, Connections Public Charter School, The League of Women Voters of Hawaii, Hale Kipa, Inc., Halau Ku Mana Public Charter School, Ka Waihona o ka Na'auao, Public Charter School, West Hawaii Explorations Academy, Public Charter School, Volcano School of Arts and Sciences, Voyager Public Charter School, and five individuals. Testimony in opposition to this measure was received from the Board of Education, Hawaii State Teachers Association, and one individual.

Your Committee finds that public charter schools throughout the State serve an important function by creating choices for parents and students within the public school system, while providing a system of accountability for student achievement. Charter schools encourage innovation and provide opportunities for parents to play powerful roles in shaping and supporting the education of their children. Pursuant to Act 298, Session Laws of Hawaii 2006, the Legislature sought to improve the charter school system by adopting proposals recommended by the Task Force on Charter School Governance that was established by Act 87, Session Laws of Hawaii 2005. However, additional reform is necessary to allow charter schools in the State to continue to strive for excellence through effective and efficient operations.

This measure contains several changes to the law relating to charter schools and was heard in conjunction with other charter school measures. Upon further consideration of all of the charter school measures heard, as well as the testimony provided, your Committee determines that this measure provides an appropriate vehicle to present necessary changes to the charter school system. Your Committee determines that, although providing the Charter School Review Panel and the local school boards with increased authority is reasonable, certain functions should continue to remain within the purview of the Board of Education at this time.

Additionally, your Committee believes that the Charter School Review Panel should have control over the hiring of the Executive Director of the Charter School Administrative Office, as the decision should be brought closer to its constituency. This process will also be aided by the requirement of at least two-year contracts to attract and retain qualified individuals and to promote consistency in operations. Consequently, it would be inappropriate for the Executive Director to sit as a member of the body that makes decisions on the Executive Director's position.

This measure also allows for the establishment of agency sponsored charter schools that will be co-sponsored by a state agency or University of Hawaii campus, and includes a significant contribution of land, facilities, personnel, or other resources by that agency or campus. Your Committee believes that the inclusion of these new charter schools will provide charter schools that are ensured necessary and valuable agency support.

Your Committee also heard testimony regarding the need for facilities funding for the charter schools. In an effort to address this need, your Committee determines that additional funding should be provided based on a per pupil amount that is a percentage of the Department of Education's averaged debt service to offset facility, infrastructure, and repair and maintenance costs, and other requested amounts.

Accordingly, your Committee has amended this measure by:

- (1) Removing changes to the definitions of "charter school", "charter school review panel" or "panel", and "detailed implementation plan";
- (2) Amending the definition of "local school board" to include the authority to enter into long-term lease agreements;
- (3) Authorizing local school boards to enter into long-term lease agreements;
- (4) Changing the composition of the Charter School Review Panel to eleven members;
- (5) Removing the Executive Director of the Charter School Administrative Office from the Charter School Review Panel;
- (6) Removing changes that authorized the Charter School Review Panel to approve or deny charter applications and its corresponding appeal process;
- (7) Clarifying that agency sponsored charter schools shall be subject to the limit on the authorization for new charter schools;
- (8) Authorizing the establishment and procedures for the establishment of agency sponsored conversion charter schools;
- (9) Requiring the Charter School Administrative Office to include in its annual budget request, in addition to the per pupil allocations for all charter schools:
 - (A) Costs associated with administrative and staff support for the Charter School Review Panel; and
 - (B) A per pupil allocation to offset facility, infrastructure, and repair and maintenance costs, and other requested amounts;
- (10) Including an appropriation for the estimated costs of accrued vacation and sick leave for transferring employees, substitute teachers, adjustments to enrollment, arbitration, costs associated with administrative and staff support for the charter school review panel, and a per pupil allocation to offset facility, infrastructure, and repair and maintenance costs, and other requested amounts; and
- (11) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 603, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 603, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Taniguchi). Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 523 Education on S.B. No. 93

The purpose of this measure is to appropriate funds to expand and establish healthcare workforce simulation resource laboratories throughout the University of Hawaii system for healthcare workforce development and training.

Testimony in support of this measure was submitted by the Hawaii State Center for Nursing of the University of Hawaii, the Hawaii Health Systems Corporation, the Hawaii Primary Care Association, the Healthcare Association of Hawaii, the Hawaii Government Employees Association, the Hawaii Association of Professional Nurses, and four individuals. Comments on the measure were submitted by the University of Hawaii System.

Your Committee finds that a nursing shortage in Hawaii currently exists and is only expected to worsen as our population ages and nurses continue to retire. According to the Hawaii State Center for Nursing of the University of Hawaii, the University of Hawaii's ability to graduate a sufficient supply of nurses will continue to fall well short of the anticipated demand. The shortage is exacerbated by the shortage of nursing faculty, a lack of adequate infrastructure and facilities, and a deficiency in the availability of clinical training for students to acquire practical

knowledge, skills, and competence. Your Committee further finds that simulation learning offers nursing students additional clinical experiences, expands the teaching capacity for students, and prepares them with a hands-on learning experience without suffering real-world consequences.

Your Committee believes that although the University of Hawaii at Manoa currently supports a simulation resource laboratory, that facility should be expanded to offer greater services and to also be utilized by Kapiolani Community College students. Your Committee also believes that additional facilities should be established to provide training for students of the University of Hawaii at Hilo, Hawaii Community College, Kauai Community College, and Maui Community College. The expansion and establishment of additional healthcare workforce simulation resource laboratories will provide necessary training to nursing students and help to grow a skilled and competent healthcare workforce within the State.

Your Committee has amended this measure by making technical, nonsubstantive amendments for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 93, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 93, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 524 Education on S.B. No. 80

The purpose of this measure is to establish a revolving fund for the collection of moneys received as repayments due to the breaches of contractual agreements between the Department of Education and students who received moneys pursuant to the Felix Consent Decree recruitment and retention program.

Testimony in support of this measure was submitted by the Department of Education and the University of Hawaii. Testimony in opposition to this measure was submitted by the Department of Budget and Finance.

Your Committee finds that during the 1999-2000 academic school year, a Memorandum of Agreement (MOA) was executed between the Department of Education (DOE) and the University of Hawaii, as a result of the Felix Consent Decree. The MOA authorized the provision of tuition assistance or stipends to qualified students in pursuit of bachelor degrees in education or master's degrees in special education. Stipends were predicated on a recipient's employment with the DOE as a special education teacher for three years, for a bachelor's degree student, and five years, for a master's degree student. Your Committee further finds that if a recipient fails to fulfill the teaching requirement for the specified durations, the recipient must repay a prorated amount of the tuition assistance received.

Your Committee determines that a revolving fund should be established to collect the repayment moneys and that such funds should be used to address the current shortage of qualified special education teachers in the State. Your Committee believes that this objective is best accomplished by specifying that the funds shall be used for the provision of tuition assistance or stipends to other students under the DOE's Felix Consent Decree recruitment and retention program.

Accordingly, your Committee has amended this measure by specifying that moneys in the revolving fund shall be used to provide for the funding of stipends pursuant to contractual agreements between students and the DOE under the DOE's Felix Consent Decree recruitment and retention program, or any successor programs.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 80, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 80, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 6. Noes, none. Excused, 1 (Hee).

SCRep. 525 (Majority) Economic Development and Taxation on S.B. No. 1962

The purpose of this measure is to provide an income tax deduction to residential unit owner occupants for qualifying costs of installation of an automatic fire sprinkler system installed after December 31, 2007.

Testimony in opposition to the measure was submitted by the Department of Taxation (Department).

In its testimony, the Department stated that the revenue loss was indeterminate because the amount of the deduction was not specified. Subsequently, the Department submitted an annual revenue loss of \$602,000; \$420,000 for multi-family residential condominiums, and \$182,000 for single family residences.

In its methodology, the Department stated that there are an estimated three hundred twelve buildings that will need to be retrofitted with a sprinkler system. It is assumed that five per cent of the three hundred twelve buildings will be retrofitted with a sprinkler system per year, and that each building has one hundred units. Approximately six per cent of the units are owner-occupied. With a maximum deduction of \$7,000 applied, the total deduction is \$7,000,000. At the average tax rate of six per cent, the revenue loss is estimated to be \$420,000 for multi-family residential condominiums.

Your Committee also notes that according to the Hawaii Council of Association of Apartment Owners, the cost of retrofitting a unit in a multi-family residence is estimated to be \$8,500 to \$13,000.

Your Committee believes that fire safety is a greater issue in multi-family dwellings -- such as condominiums -- and particularly in those built before sprinkler systems were routinely installed. Therefore, it is the intent of your Committee to begin with a fire sprinkler tax deduction for units in older condominiums, and for a five-year period.

Your Committee has amended this measure accordingly, by:

- (1) Restricting the tax credit to qualifying costs of the installation of an automatic fire sprinkler system to serve the entire residential or mixed use condominium that was constructed before December 31, 1975; and
- (2) Making the tax deduction applicable for costs incurred between July 1, 2007, and June 30, 2012.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1962, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1962, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (English).

SCRep. 526 (Joint) Economic Development and Taxation and Commerce, Consumer Protection and Affordable Housing on S.B. No. 600

The purpose of this measure is to exempt from taxation, one hundred per cent of the capital gains realized during taxable years 2008-2012, from a sale of the leased fee interest in condominium units to an association of apartment owners or residential cooperative corporations.

Testimony in support of this measure was received from the Hawaii Association of REALTORS; Hawai'i Legislative Action Committee of the Community Associations Institute; Hawaii Council of Associations of Apartment Owners; Hawaii Independent Condominium and Cooperative Owners; Monarch Properties; Kuilima Estates West; Kuilima Estates East; Association of Apartment Owners at the Lauloa Condominium, and at the Diamond Head Beach Hotel and Residences Condominium; and two individuals. The Department of Taxation (Department) and the Tax Foundation of Hawaii submitted comments.

Your Committees received a revenue impact statement from the Department that the revenue loss would be approximately \$900,000 annually. However, the fiscal impact statement did not specify the methodology used to determine the loss.

Your Committees find that in 2004, the City and County of Honolulu's Leasehold Task Group was charged with finding voluntary solutions that would allow apartment owner-occupants to acquire their leased-fee interest. One of the recommendations of the Task Group was for tax legislation that would motivate lessors to sell their leased-fee interest to lessee owner-occupants, and specifically, that would exempt the lessor's sale proceeds from the capital gains tax. This would also avoid a 1031 tax-deferred exchange, which is both time consuming and expensive, and therefore out of the reach of some lessors.

Your Committees note that the Department's revenue loss is quite modest, and have heard in testimony that the State will benefit from the increased sales of leasehold property by way of increased conveyance tax fees and income taxes on commissions earned by the brokers involved in such transactions. More importantly, these sales could result in voluntary conversion of leasehold to fee simple ownership for residential lessees throughout the State, preventing the anticipated displacement of many older residents whose leasehold terms will soon expire.

Your Committees believe that this will be the only opportunity to be fee simple homeowners for many residents faced with an increasingly expensive and competitive housing market, and it is the intent of your Committees to support this modest option.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 600 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 2 (English, Ihara).

SCRep. 527 (Joint) Economic Development and Taxation and Education on S.B. No. 1922

The purpose of this measure is to create financial incentives for, and appropriate funds to, the Academy for Creative Media for plans for a permanent facility in Hawaii.

Prior to the hearing, your Committees circulated a Proposed S.D. 1.

The purpose of the Proposed S.D. 1 of this measure is to support Hawaii's creative media by:

- (1) Creating financial incentives for, and appropriating funds to, the Academy for Creative Media at the University of Hawaii to develop plans for a permanent facility in Hawaii;
- (2) Appropriating funds for a digital media incubator facility; and
- (3) Establishing and appropriating funds for the Music and Enterprise Learning Experience (MELE) program at the University of Hawaii Honolulu Community College to develop the technical business skills required by Hawaii's music artists and music industry.

Testimony in support of the Proposed S.D. 1 was received from the Department of Business, Economic Development, and Tourism; University of Hawai'i at Manoa; Honolulu Community College; the Mayor of the City and County of Honolulu; Enterprise Honolulu; International Alliance of Theatrical and State Employees Union, Local 665; Aloha Agency; COJODA Productions LLC; Ho'ike Technology; Island Insurance Company, Ltd.; Juniroa Productions; Kinetic Productions; KUD International LLC; Mountain Apple Company; Pacific Islanders in Communications; Pacific Artists Image Exchange; Searider Productions and three of its students; five faculty members and thirty-two students of the Academy for Creative Media at the University of Hawai'i at Manoa; and nine individuals affiliated with film and creative media. The Department of Taxation submitted comments.

Your Committees have heard strong support for Hawaii's dynamic creative media sector, the positive impact it has had on Hawaii's workforce, and the creative options it offers for so many of the State's students.

Combining creative media proposals from other measures into the Proposed S.D. 1, has given your Committees the opportunity to review the proposals in totality, and in doing so has raised a number of issues to be addressed.

First, Committee members applaud the Academy for Creative Media's efforts to focus on the needs of K-12 students, as its affiliations with the successful Waianae Searider Productions and other K-12 students demonstrates. Your Committees urge the University of Hawai'i to expand its planning focus to embrace Hawaii's K-12 schools in its MELE initiatives, and to consider additional ways to involve the schools in planning for and implementing new programs. In doing so, your Committees stress the importance of establishing realistic benchmarks for outcomes, with measurable timelines for these creative enterprises.

Second, your Committees strongly support the development of additional facilities and programs for the creative media. Committee members are concerned, however, that some of the approaches outlined appear to be piecemeal and may duplicate existing projects and facilities.

Committee members advise a coordinated effort by the Administration, the University of Hawai'i – both Manoa and the Community Colleges – and industry representatives to develop short-range and long-term plans and cost estimates to accomplish their goals.

It is the intent of your Committees to continue legislative discussions on these very worthwhile initiatives designed to build a creative media industry in Hawaii.

Your Committees have amended the Proposed S.D. 1, by changing all the appropriations to unspecified amounts, in anticipation of additional financial and other information, and for the purposes of further discussion.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Education that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1922, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1922, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 11. Noes, none. Excused, 1 (English).

SCRep. 528 (Joint) Economic Development and Taxation and Energy and Environment on S.B. No. 853

The purpose of this measure is to direct the:

- (1) Auditor to conduct a financial and management audit of the Natural Energy Laboratory of Hawaii Authority's (NELHA) deep sea water pumping system, and consider the establishment of a reasonable rate structure; and
- (2) NELHA to freeze the rates for pumped seawater until the audit is complete.

Testimony in support of this measure, with amendments, was received from the Office of Hawaiian Affairs. The Natural Energy Laboratory of Hawaii Authority submitted comments.

Your Committees understand that this audit would address concerns raised by NELHA tenants. As such, it would provide an important gauge in verifying and confirming costs, which would benefit both NELHA and its tenants.

It is the intent of your Committees to support this audit as a means of assisting NELHA in moving beyond divisive issues with tenants, and moving forward with its important work.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 853 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 3 (English, Hooser, Trimble).

SCRep. 529 Economic Development and Taxation on S.B. No. 188

The purpose of this measure is to clarify the Small Business Regulatory Flexibility Act, chapter 201M, Hawaii Revised Statutes (HRS).

Specifically, this Act:

- (1) Provides that a small business impact statement will be prepared and submitted to the Small Business Regulatory Review Board as early as practicable in the rule drafting process;
- (2) Provides that adopted rules affecting small business will be reviewed to determine if they are still appropriate within five years after adoption; and
- (3) Makes nonsubstantive changes to chapter 201M, HRS, to clarify the definition of a rule and to remove outdated sections of the chapter.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism; Small Business Regulatory Review Board; and The Hawaii Business League.

Your Committee finds that the Small Business Regulatory Flexibility Act, Act 168, Session Laws of Hawaii 1998, serves as a model for many other states in helping local small businesses through a fair and equitable regulatory process. It has been particularly successful in the past three years with regard to rulemaking by public agencies, and their effects on small businesses.

Your Committee is in strong support of the work of the Small Business Regulatory Review Board and believes the amendments in this measure will further assist their work.

Your Committee has considered a concern regarding the proposed changes to section 201M-8, HRS, regarding violations related to safety or environmental impact, and believes that this issue may need further review.

Your Committee has amended this measure accordingly, by:

- (1) Requiring that a petition for regulatory review under section 201M-6, HRS, and the list of rules adopted in the previous five years under section 201M-7, HRS, be sent to the Ombudsman;
- (2) Deleting the proposed changes to section 201M-8, HRS; and
- (3) Making technical amendments for the purposes of clarity and to conform the measure to the preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 188, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 188, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 530 Economic Development and Taxation on S.B. No. 1360

The purpose of this measure is to appropriate \$500,000, for grants and loans to community-based organizations on the Leeward (Waianae) Coast of Oahu for community economic development.

Testimony in support of this measure was received from the Department of Business, Economic Development, and Tourism (DBEDT) and the Office of Planning, DBEDT.

Your Committee finds that some regions, particularly in more rural areas like the Waianae Coast, are less able to take advantage of a strong economy due to remote location, lack of access to traditional business opportunities and financial capital, and limited workforce training opportunities. In addition, the people who live in these areas desire community economic development that supports their community values, which may be quite different from urban areas.

Your Committee further finds that the Community-Based Economic Development (CBED) program in DBEDT has a long history of supporting such programs, many along the Waianae Coast. And while the initiative in this measure focuses initially on the Leeward Coast of Oahu, the ultimate goal is to develop a successful partnership model that may later be adapted to work in communities throughout the State.

Your Committee is in strong support of the assistance opportunities outlined in this measure, but notes that the biennium budget request also sought additional funds for existing CBED initiatives. Your Committee has asked for detailed information from DBEDT regarding financial resources necessary for existing and new CBED programs, and it is the intent of your Committee to defer decisions on the appropriation amounts until that information is received.

Your Committee has amended this measure accordingly, by replacing the \$500,000 appropriation with an unspecified amount.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1360, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1360, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (English, Ige).

SCRep. 531 (Majority) Health on S.B. No. 1004

The purpose of this measure is to ensure that individuals living in rural areas of the State have access to appropriate mental health care services.

The measure attempts to accomplish this purpose by authorizing appropriately trained and supervised licensed medical psychologists to prescribe psychotropic medications for the treatment of mental illness.

Your Committee received testimony in support of this measure from the Hawai'i Psychological Association; the American Psychological Association; Hawaii Medical Service Association; Hawai'i Primary Care Association; Na Pu'uwai; Papa Ola Lokahi; Ho'ōla Lāhui Hawai'i; West Hawaii Community Health Center, Inc.; Moloka'i Community Health Center; Waianae Coast Comprehensive Health Center; Hamakua Health Center; Nanakuli Hawaiian Homestead Association; the Community Clinic of Maui; Waikiki Health Center; and thirty-four individuals.

Your Committee received testimony in opposition to this measure from the Department of Health; the Board of Medical Examiners; the Board of Psychology; Hawaii Psychiatric Medical Association, National Alliance on Mental Illness; Hawaii Disability Rights Center; Koolauloa Community Health and Wellness Center; Hawai'i Forensics Association, LLC.; and forty-six individuals.

Your Committee finds that allowing appropriately licensed and trained psychologists to prescribe psychotropic medications will address the urgent need for timely, appropriate, and cost-effective mental health and pharmacological services for an underserved population. Your Committee finds that the federally qualified health centers are most in need of psychologists with prescriptive authority and would achieve the largest impact for individuals in need of these services.

Your Committee further finds that the adequacy of training for psychologists to prescribe medications is a recurring concern that should be addressed in further discussions.

Your Committee amended this measure by:

- (1) Requiring psychologists holding conditional prescription certificates to be employed by and to practice the prescribing authority at a federally qualified health center;
- (2) Removing the language allowing psychologists to order and review laboratory tests, as this should be under the supervision of a physician;
- (3) Clarifying that psychologists holding prescriptive certificates shall be under the supervision of a physician either directly or through telecommunications;
- (4) Changing the effective date to continue the dialogue on this measure; and
- (5) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1004, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1004, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Menor). Noes, 1 (Whalen). Excused, none.

SCRep. 532 Health on S.B. No. 1674

The purpose of this measure is to encourage the use telecommunication technology while providing quality radiological services for Hawaii.

Specifically, this measure allows medical practitioners in radiology licensed to practice in another state, to provide radiology services by telemedicine while in Hawaii to a patient who is located in the state by which the medical practitioner is licensed to practice radiology.

The measure also makes numerous technical, nonsubstantive amendments to the laws relating to the practice of medicine and surgery and radiologic technology.

Your Committee received testimony in support of this measure from the Maui Economic Development Board, Inc. and The Pacific Resource Partnership. Your Committee received testimony in opposition to this measure from the Department of Health. The Board of Medical Examiners submitted comments on this measure.

Your Committee finds that this is a housekeeping measure that enables radiologists to practice radiology via telecommunications to patients from this State to the state of licensure. Your Committee believes that radiologists should not be required to obtain Hawaii licensure if services are not being provided to patients in the State.

Your Committee amended this measure by:

- (1) Deleting the references to “medical practitioners in radiology” and inserting “radiologists duly licensed to practice medicine”, for clarification because physicians are not licensed by specialty; and
- (2) Clarifying that “radiologist” means a doctor of medicine or a doctor of osteopathy certified in radiology by the American Board of Radiology or the American Board of Osteopathy.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1674, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1674, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 533 Health on S.B. No. 1805

The purpose of this measure is to safeguard the public health, safety, and welfare by assuring the highest degree of professional conduct on the part of genetic counselors.

The measure accomplishes this purpose by establishing a licensure program for genetic counselors to be administered by an unspecified state department.

Your Committee received testimony in support of this measure from the March of Dimes, Hawaii Community Genetics, and nine individuals. The Department of Health submitted testimony in support of this measure with suggested amendments.

Your Committee finds that genetic counselors are a vital part of the health care team that provides care to individuals throughout their lifespan. Your Committee further finds that licensure of genetic counselors is necessary to protect the public from persons unauthorized and untrained to perform these services. This measure will ensure quality health care services are provided by highly trained professionals.

Your Committee amended this measure by:

- (1) Establishing that the Department of Health shall administer the licensure program;
- (2) Removing the ability of an individual who, at the time of application, has a doctoral degree from a medical genetics training program accredited by the American Board of Medical Genetics or an equivalent training program as determined by that board to obtain a provisional license; and
- (3) Implementing the program as of July 1, 2008, with the first renewal deadline occurring on July 1, 2009.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1805, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1805, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 534 Health on S.B. No. 1636

The purpose of this measure is to broaden the definition of “substance abuse on-site screening test” to include tests used for forensic testing as a workplace testing device and approved by the Director of Health.

This measure also provides that the screening test should be conducted in accordance with the package insert that accompanies the substance abuse test that is manufactured in a facility licensed by the FDA, rather than conducted in accordance with FDA adopted guidelines.

Your Committee received testimony in support of this measure from The Pacific Resource Partnership; Hawaii Carpenters Union; General Contractors Association of Hawaii; Waiawa Ridge Development LLC; Castle & Cooke Homes Hawai‘i, Inc.; Kapolei Property Development LLC; Ralph S. Inouye Co., Ltd.; S & M Sakamoto, Inc.; Hawaiian Dredging Construction Company; Emerald Bay Consulting, LLC; Branam Medical Corporation; Hidano Construction Inc.; and Building Industry Association of Hawaii. Testimony in opposition was received from the Department of Health (DOH) and Department of Human Resources Development.

Your Committee finds that the major health and safety challenges facing Hawaii’s construction industry is drug usage. There is exposure to crystal methamphetamine and other drugs, even among construction workers. Hawaii’s construction companies are beset with workforce impairment, which results in accidents, poor artisanship, and higher workers’ compensation claims and premiums.

According to the testimony of the DOH, there is a lack of approved regulatory guidelines for forensic drug screen testing in the workplace. This measure would allow employers to use an alternative forensic testing as a workplace testing device. The FDA is currently considering approving the testing of head hair, oral fluid, and sweat specimens. This measure would allow such alternative testing. The testimony of The Pacific Resource Partnership indicates that there is a need for better and more affordable testing alternatives to urine or blood. Onsite or instant oral fluid drug screens have been widely used on the West Coast, where they have become a cost effective early detection and deterrence tool to keep job sites safe.

Your Committee has amended this measure by:

- (1) Clarifying that the testing device used must be manufactured in a facility licensed by the United States Food and Drug Administration;

- (2) Requiring that the package instruction of the FDA approved device be followed in administering the test, or if there is no such FDA instruction, then the package instruction accompanying the test kit; and
- (3) Changing the effective date to July 1, 2050, in the interests of allowing further time for more discussion.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1636, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1636, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Whalen).

SCRep. 535 Health on S.B. No. 1792

The purpose of this measure is to affirm the State's commitment to provide quality health care for the people of the State.

More specifically, this measure would:

- (1) Establish a regional subsidiary corporation of the Hawaii Health Systems Corporation for the Maui region, as a first step to more regional control for all regions of the Corporation, to be governed by a community-based regional board; and
- (2) Provide the necessary authority for regional subsidiary corporations to accomplish the goal of community-based governance.

Your Committee received testimony in support of this measure from the Chairperson of the Maui County Council, Maui Memorial Medical Center, Maui Memorial Medical Center Foundation, Chairperson and three members of the Maui Management Advisory Committee, Maui Medical Group, Inc., Roselani Ice Cream, Blaise Noto & Associates, and twenty individuals. Testimony in opposition was received from the Hawaii Health Systems Corporation (HHSC), Chief Executive Officers of the Oahu, West Hawaii, and East Hawaii Regions of the HHSC, four members of the board of directors of the HHSC, United Public Workers, and one individual. The Department of Accounting and General Services, Office of Information Practices, the State Procurement Office, and the Hawaii Government Employees Association commented.

Upon further consideration, your Committee has amended this bill by:

- (1) Clarifying the language in section 1 of the measure to better explain the purpose of this measure;
- (2) Amending the definition "regional subsidiary corporation" by renaming the term "regional affiliate corporation" to better reflect regional autonomy and substituting the term "affiliate" for "subsidiary" throughout the measure;
- (3) Inserting section designations -A, -B, -C, and -D for the four new sections in section 3 of the bill;
- (4) Deleting the description of the regional affiliate corporation as an instrumentality and agency of the State;
- (5) Clarifying membership on the regional boards;
- (6) Amending the appointment of ten Hawaii Health Systems Corporation board members to require the Governor to appoint from two lists of nominees, consisting of at least twenty candidates each, submitted by the President of the Senate and the Speaker of the House of Representatives, respectively;
- (7) Requiring each regional board to meet at least six times a year and to hold at least two public community meetings;
- (8) Amending the duties and power of the corporation and regional affiliate corporations to better reflect the original intent of the Governor's Task Force on the Establishment of an Agency for Community Hospitals to operate the community hospitals in a decentralized fashion through five regional boards, by specifying:
 - (A) Specific corporate-wide powers to the corporation, including the issuance of revenue bonds in any amount;
 - (B) Specific region-wide powers to regional affiliate corporations, including regional and facility budgeting, employment and removal of regional and facility personnel, purchasing, regional strategic and capital planning, organization, quality assurance, improvement and reporting, credentialing of medical staff, and issuing revenue bonds in an amount up to and including an unspecified amount; and
 - (C) Clarifying that regional boards shall be responsible for the carrying out of certain duties and powers, including evaluations for additional services within regions, preparing regional budgets, policies, and procedures for inclusion in the corporate-wide budget, setting regional rates and charges and limiting the corporation board's power to approving such regional rates and charges, implementing a regional personnel system; approving of regional board bylaws; credentialing activities; hiring and firing personnel; developing plans for day-to-day operations; exercising custodial control over corporation assets located in a region; and expending funds;
- (9) Clarifying, by adding four new sections 29, 30, 31, and 32, that the corporation and any regional affiliate corporations shall be exempt from the State Risk Management and Insurance Administration law (chapter 41D, Hawaii Revised Statutes), the Hawaii Public Procurement Code (chapter 103D, Hawaii Revised Statutes), the law relating to contracts for concessions on public property (section 102-2, Hawaii Revised Statutes), and the law relating to the requirement for tax clearances for contracts with the State or counties (section 103-53(e), Hawaii Revised Statutes);
- (10) Clarifying that no incumbent corporation personnel shall lose a position without affirmative action by the appropriate regional board;
- (11) Regarding fiscal provisions, requiring that operating surpluses of a regional affiliate corporation shall be reinvested in the operations of the region in any prudent manner and requiring any regional affiliate corporation to share in the surplus of any facility within its region and offset any facility deficits within its region;
- (12) Delaying the collaborative submittal of a corporation and regional affiliate corporation budget to the Legislature to the 2009-2010 fiscal year;

- (13) Adding the condition that transfers of special fund appropriations among community hospitals must be mutually agreed to by the corporation and the regional affiliate corporations;
- (14) Deleting former sections 29, 30, 31, and 32 relating to civil service provisions (sections 76-11 and 76-47, Hawaii Revised Statutes) and collective bargaining (sections 80-2 and 89-6, Hawaii Revised Statutes);
- (15) Clarifying that the intent of this measure includes transferring operational authority from the corporation to each regional affiliate corporation;
- (16) Clarifying the timetable for the transfer of governance and operational rights and functions from the corporation to regional affiliate corporations and setting the procedure for future establishment of other regional affiliate corporations without further legislative authorization;
- (17) Deleting the provision to allow a regional affiliate corporation to negotiate collective bargaining agreements upon the expiration of current agreements and inserting a requirement for regional affiliate corporation representation on the corporation's bargaining team to address regional needs for efficiency and effectiveness;
- (18) Inserting a section to direct the Revisor of Statutes to appropriately codify the four new sections added in section 3 of the measure;
- (19) Inserting a provision that the four new sections added in section 3 of the measure shall take effect on July 1, 2008;
- (20) In light of the fact that this amended draft is a product of ongoing discussions among all stakeholders, changing the effective date to July 1, 2030, for purposes of stimulating further discussion; and
- (21) Making various technical nonsubstantive amendments for the purposes of clarity and consistency.

Your Committee believes that these amendments better reflect and implement the purpose of decentralizing the operations of the community hospitals by enabling regions to attain autonomy through the establishment of regional affiliate corporations and regional boards.

As affirmed by the record of votes of the members of your Committee on Health that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1792, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1792, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 536 Education on S.B. No. 54

The purpose of this measure is to appropriate funds for capital improvement projects for the University of Hawaii.

Testimony in support of this measure was submitted by the University of Hawai'i, the College of Education of the University of Hawai'i, the Faculty of the College of Education of the University of Hawai'i, the College of Arts & Humanities of the University of Hawai'i, the American Chemistry Council, the William S. Richardson School of Law, the Center on Disability Studies, the University of Hawai'i College of Education Alumni Association, the Hawaii State Teachers Association, and one hundred nineteen individuals. The Hawaii Carpenters Union submitted testimony in opposition to this measure.

Your Committee finds that the University of Hawaii (UH) is the State's only public system of higher education, from which much of Hawaii's workforce is educated and trained. The State must ensure that adequate facilities and programs are provided to allow the UH to offer high-quality education in a positive environment that is appealing to educators and students throughout the State, the country, and the world. This measure provides the necessary funding for capital improvement projects at campuses throughout the UH system.

Your Committee understands that although this measure provides for eighteen capital improvement projects throughout the UH system, the Board of Regents of the UH actually approved twenty-seven projects, many of which were not included in the Executive Budget. Your Committee believes that all capital improvement projects approved by the Board of Regents should be appropriately considered by the Legislature and has included the additional projects in this measure.

Additionally, testimony was provided that raised concerns about the provision in the measure requiring all construction and renovation work under this measure to meet or exceed the applicable Leadership in Energy and Environmental Design silver rating standards. Your Committee understands that this requirement may be too restrictive and believes the language should instead reflect other statutory requirements regarding green building standards.

Accordingly, your Committee has amended this measure by:

- (1) Including funding for the following capital improvement projects:
 - (A) Saunders Hall, UH at Manoa;
 - (B) Campus development, University of Hawaii at West Oahu;
 - (C) Waianae Education Center, Leeward Community College;
 - (D) Native Hawaii Success Centers, UH-Systemwide;
 - (E) Science Building, Maui Community College;
 - (F) Campus Center, addition and renovation, UH at Hilo;
 - (G) Pacific Aerospace Training Center, re-roof hangar 111, Honolulu Community College;
 - (H) Gartley Hall renovation, UH at Manoa;
 - (I) Law school expansion and renovation, UH at Manoa; and
 - (J) Performing Arts facility and parking structure, UH at Manoa;

- (2) Including unspecified appropriation amounts for all projects;
- (3) Changing the method of funding for certain projects from general revenues to either federal, private, or revolving funds, as appropriate; and
- (4) Requiring all construction and renovation work under this measure to meet or exceed either the Leadership in Energy and Environmental Design silver rating system or another comparable state-approved, nationally recognized, and consensus based guideline standard, or system, except when the guideline standard or system interferes or conflicts with the use of the building or facility as an emergency shelter.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 54, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 54, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, (Hee, Nishihara).

SCRep. 537 Education on S.B. No. 1154

The purpose of this measure is to provide flexibility to the Board of Regents of the University of Hawaii in the financing and administration of capital projects within the jurisdiction of the University.

Testimony in support of this measure was submitted by the University of Hawaii (UH). Testimony in opposition of this measure was submitted by the Department of Budget and Finance and the Department of the Attorney General.

Your Committee finds that over the past several years, the UH has made great strides in gaining greater autonomy over its functions and operations. Pursuant to Act 115, Session Laws of Hawaii 1998, the UH was granted a considerable amount of flexibility in managing its resources. Since that time, the University of Hawaii has demonstrated that it possesses the capability to act reasonably and responsibly in the use of its authority in many areas, including financial strategy. However, your Committee understands that, as the UH is a state entity, which benefits from state funds, the authorization of total autonomy in financial matters may not be prudent.

To that end, the Department of the Attorney General underscored related concerns with provisions of the measure that allow the UH to take certain actions on its own, such as issue revenue bonds, which may be in contravention of the State Constitution. The Department of the Attorney General also raised concerns regarding the specific language and definitions within the measure. Your Committee recognizes that there may be merit to the concerns raised, but believes that this measure should continue to proceed through the session to facilitate further discussion and scrutiny to determine whether a workable alternative can be fashioned.

In addition, in an attempt to address some of the concerns raised by the Department of the Attorney General, the UH has provided suggested changes to the measure. Your Committee has included those changes in its amended draft.

Accordingly, your Committee has amended this measure by:

- (1) Including language that requires the UH to obtain the approval of the Governor prior to the issuance of revenue bonds;
- (2) Clarifying the definitions for the terms “network”, “university project”, and “university system”;
- (3) Removing the definition for the term “university purpose” and any references thereto;
- (4) Making technical, nonsubstantive amendments for purposes of clarity; and
- (5) Changing the effective date to July 1, 2050, to facilitate further discussion on the measure.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1154, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1154, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Ayes with Reservations, 1 (Taniguchi). Noes, none. Excused, 2 (Hee, Nishihara).

SCRep. 538 (Joint/Majority) Education and Economic Development and Taxation on S.B. No. 1354

The purpose of this measure is to create a system of science, technology, engineering, and mathematics (STEM) academies for students in middle and high school to ensure preparedness of students for post-secondary education and beyond.

Specifically, this measure:

- (1) Establishes the Hawaii Excellence through Science and Technology (HiEST) Academy Program to increase preparedness for post-secondary education and the workforce and provides funding therefor;
- (2) Establishes the Fostering Inspiration and Relevance through Science and Technology (FIRST) pre-academy program and provides funding therefor;
- (3) Establishes the Robotics and Space Contextual Learning Program to develop science, technology, engineering, and math (STEM) skills and provides funding therefor;
- (4) Establishes the Business/Education Internship and Mentorship Program to increase opportunities for high school and college students to gain work experience and provides funding therefor;
- (5) Establishes the Research Experiences for Teachers (RET) program and provides funding therefor;
- (6) Establishes a professional development program to provide practicing elementary, middle, and high school teachers of science and mathematics with opportunities to increase their knowledge and understanding in science, technology, engineering and mathematics (STEM) subjects and funding for such professional development;

- (7) Appropriates funds for STEM stipends under the U.S. Department of Labor's Transition to Teaching Program;
- (8) Establishes a STEM scholarship program and the STEM Scholarship Special Fund;
- (9) Establishes the Eminent Scholars Program; and
- (10) Establishes the State Akamai Investment Matching Special Fund and appropriates moneys therefor.

Testimony in support of this measure was submitted by the Governor of Hawaii; the Department of Business, Economic Development, and Tourism; the Department of Education; the University of Hawai'i; the College of Engineering of the University of Hawai'i at Manoa; Chaminade University; the Workforce Development Council; Hawaii Pacific University; the Hawaii Association of Independent Schools; the National Science Teachers Association; the American Chemical Society; the Maui Chamber of Commerce; 3D Innovations, LLC; Ambient Micro, LLC; Applied Marine Solutions; BDI Maritime; CTA Solutions; Hawaii Crop Improvement Association; the Hawaii Science & Technology Council; the High Technology Development Corporation; Kona Bay Marine Resources; KUD International, LLC; Phase 3 Properties, Inc.; Oceanic Imaging Consultants; SEE/RESCUE Corporation; and thirty-nine individuals.

Comments on the measure were also submitted by the Hawaii State Teachers Association and the Institute for Astronomy.

Your Committees find that to move Hawaii forward to succeed in this new millennium requires a dedication to supporting innovation and technology and growing a qualified workforce to support these areas. Competition in the fields of science, technology, engineering, and math (STEM) has escalated throughout the world, and Hawaii needs to invest in the education and training of our students to ensure that they will succeed in the workforce. Your Committees find that currently, the public school system is not graduating adequate numbers of students with basic STEM skills. Therefore, an emphasis must be placed on programs to develop skills in these areas to prepare our students for challenging careers in this global society where STEM disciplines have become prominent.

This measure addresses many aspects involved in developing a comprehensive approach to promoting the STEM disciplines, including establishing STEM academies, growing and fostering a STEM teaching workforce through the provision of stipends and scholarships, and providing additional work experience opportunities for students. This session, there are several measures that address various programs and initiatives relating to the development of STEM programs. Your Committees believe that the Legislature is committed to addressing the current need for an existing and future highly-skilled, highly-qualified workforce. As such, the Legislature must look at the different ways in which appropriate programs can be developed and funded to concentrate and maximize State resources. In order to allow for ease of consideration of the different components of this measure, your Committees determine that removing parts of this measure and placing them into other measures covering the same topics is appropriate at this time.

Accordingly, your Committees have amended this measure by:

- (1) Removing provisions that provided for the establishment of the following:
 - (A) The Hawaii Excellence through Science and Technology (HiEST) Academy Program and funding therefor;
 - (B) The Robotics and Space Contextual Learning Program and funding therefor;
 - (C) The Business/Education Internship and Mentorship Program and funding therefor;
 - (D) The Research Experiences for Teachers (RET) program and funding therefor; and
 - (E) A professional development program to provide practicing elementary, middle, and high school teachers of science and mathematics with opportunities to increase their knowledge and understanding in science, technology, engineering and mathematics (STEM) subjects and funding for such professional development; and
- (2) Making technical, nonsubstantive changes for purposes of clarity and to conform to preferred drafting style.

As affirmed by the records of votes of the members of your Committees on Education and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1354, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1354, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, 1 (Slom). Excused, 3 (English, Hee, Nishihara).

SCRep. 539 (Joint/Majority) Transportation and International Affairs and Energy and Environment on S.B. No. 1276

The purpose of this measure is to add construction of infrastructure improvements of harbor facilities to the triggers for an environmental assessment, and to clarify that the definition of "environmental impact statements" includes traffic congestion effects as a factor to consider in a proposed action.

This measure also requires the preparation of an environmental impact statement for the Hawai'i Superferry, and requires the Department of Transportation to cease further construction of improvements at Kahului Harbor and the Hawai'i Superferry to refrain from commencing operations, until a final environmental impact statement is accepted. This measure makes an appropriation to the Department of Transportation to prepare an environmental impact statement.

In an effort to bring this hearing to the people who would be affected the most, your Committees held additional hearings on Kaua'i at the Kaua'i County Council Chambers on February 10, and again on February 10 on Maui at Baldwin High School.

On O'ahu, your Committees received testimony in support of this measure from the Pacific Whale Foundation; Tropic Orchid Farm, Inc.; one Maui Councilmember (offered county council resolution in support), one Kaua'i Councilmember, one Hawai'i County Councilmember, and ninety-one individuals. Testimony in opposition was received from the Department of Transportation, State Attorney General, Hawai'i Superferry, Maui Chamber of Commerce, Expeditions, Paradise Television, Maui County Farm Bureau, and Kaua'i Chamber of Commerce. There were faxes and emails from approximately 160 individuals in support and approximately 444 were in opposition.

On Kaua'i, your Committees received a petition of at least 6,000 names in support; 116 people testified of whom 113 were in support and 2 were in opposition, and one made comments. There was a county resolution offered by the Kaua'i County Council.

On Maui, your Committees heard from 105 testifiers, of whom 102 were in support, one in opposition, and two made comments. There was a petition with at least one thousand names in support.

Your Committees find that state commercial harbor improvements that require the expenditure of large amounts of governmental funds should comply with the environmental review process. Your Committees are concerned that new maritime activities that require substantial harbor improvements, such as the Hawai'i Superferry, could have serious effects on vehicular traffic, transport of non-native species between islands, introduction of invasive plant and animal species, increased collisions with whales, and increased warehousing at the harbors, among other issues, all of which have economic and environmental consequences that come within the scope of issues to be reviewed under the environmental impact statement law.

Your Committees believe that consideration of effects of traffic congestion and infrastructure that could result from harbor improvements is necessary in order to protect Hawai'i's fragile ecosystem and delicate environment.

In addition to environmental concerns, your Committees have serious reservations about harbor and traffic congestion. Harbors on O'ahu, Maui, and Kaua'i are so congested that viability of Hawai'i's shipping industry is threatened unless harbor improvements and expansion are immediately undertaken. Hawai'i Superferry adds to the congestion. It is very conceivable that traffic congestion surrounding the harbors would worsen once the Hawai'i Superferry begins transporting vehicles for drive on and drive off service, with its 282 small car capacity and likely other types of larger vehicles and trucks.

Your Committees are concerned that decisions to excuse new maritime activities from obtaining an environmental assessment or an environmental impact statement fail to conform to environmental laws that were enacted to ensure that environmental concerns are given appropriate considerations in decision making along with economic and technical considerations. Your Committees believe that State and federal officials should have been more vigilant in the interests of protecting the environment while seeking to enhance the economy of the State.

Your Committees recognize the legal reservations about this measure as opined by the Attorney General. Nonetheless, your Committees believe that safeguarding the vital interests of its people is paramount. Such vital interests include a healthy environment as free as possible from irreparable damage from such things as offshore pollution and invasive species. Mitigating traffic congestion is also of vital interest. Your Committees find that this measure is consistent with the purpose of chapter 343, Hawaii Revised Statutes, relating to environmental impact statements. Section 343-1, Hawaii Revised Statutes, states, in pertinent part, "[t]he quality of humanity's environment is critical to humanity's well being, that humanity's activities have broad and profound effects upon the interrelations of all components of the environment ...the process of reviewing environmental effects is desirable because environmental consciousness is enhanced, cooperation and coordination are encouraged, and public participation during the review process benefits all parties involved and society as a whole."

Your Committees note that if required to conduct an environmental impact statement process, the Hawai'i Superferry would be delayed from starting up its operations, but would not be banned forever from operations. If the Hawai'i Superferry has completed most of the required elements for an environmental assessment or impact statement, or both, as it so testified, this measure would merely formalize what has already occurred.

Your Committees have amended this measure by:

- (1) Deleting the statutory amendments and the purpose section;
- (2) Inserting a new purpose section to more appropriately reflect the measure's intent;
- (3) Inserting provisions to:
 - (A) Require the preparation of an environmental impact statement pursuant to chapter 343, Hawaii Revised Statutes, for the expenditure of public funds for improvements being made to commercial harbors in the State to accommodate the operations of the Hawai'i Superferry;
 - (B) Require that the Department of Transportation implement any mitigating measures that may be recommended in the environmental impact statement and, to the extent necessary, amend its agreement with the Hawai'i Superferry to require that the Hawai'i Superferry implement any recommended mitigative measure in its operations; and
 - (C) Allow the Department of Transportation to assess the Hawai'i Superferry for all reasonable costs for the preparation of the environmental impact statement; and
- (4) Deleting the appropriation.

As affirmed by the records of votes of the members of your Committees on Transportation and International Affairs and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1276, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1276, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 2 (Espero, Gabbard). Noes, 1 (Inouye). Excused, 2 (Ihara, Kokubun).

SCRep. 540 (Joint) Energy and Environment, Education and Economic Development and Taxation on S.B. No. 1866

The purpose of this measure is to establish the Hawaii Natural Energy Institute at the University of Hawaii, with responsibilities for administering the Energy Development Special Fund.

The measure also creates the Biofuels Development Revolving Loan program to be administered by the Hawaii Strategic Development Corporation.

This measure makes four appropriations as follows:

- (1) Appropriates \$10,000,000 in general funds for fiscal year 2007-2008, for deposit into the Energy Systems Development Special Fund;
- (2) Appropriates \$10,000,000 for fiscal year 2007-2008, out of the Energy Systems Development Special Fund for the purposes of the Special Fund;

- (3) Appropriates \$10,000,000 in general funds for fiscal year 2007-2008, for deposit into the Biofuels Development Revolving Loan Fund; and
- (4) Appropriates \$10,000,000 for fiscal year 2007-2008, on to the Biofuels Development Revolving Loan Fund to be used for the purposes of providing loans in accordance with that fund.

Testimony in support of this measure was submitted by the Hawaii Natural Energy Institute of the University of Hawaii at Manoa; the College of Social Sciences, Hawaii Energy Policy Forum at the University of Hawaii at Manoa; Hawaiian Electric Company, Inc.; Hawaii Strategic Development Corporation; Hawaii Renewable Energy Alliance; and ClearFuels Technology, Inc. Testimony in opposition to this measure was submitted by the Department of Budget and Finance. Comments were submitted by the Department of Business, Economic Development and Tourism, and the Public Utilities Commission.

Your Committees find that Hawaii has struggled for approximately thirty years to develop renewable sources of energy in order to reduce its dependence on imported fossil fuels and imported sources of energy. In 1974, the Legislature passed a series of Acts that recognized the vulnerability of Hawaii's residents to the petroleum industry as a result of its reliance on imported oil for transportation fuels and power generation. Over the thirty years that followed, the Legislature has continued to enact laws and appropriate funds to further develop alternative sources of energy.

Your Committees further find, that the Legislature passed Act 240, in 2006, which was groundbreaking legislation to promote energy self-sufficiency for the State. Act 240 promoted further development of renewable energy, including increased financial incentives, mechanisms for dedicated sources of funding, and development of hydrogen as a renewable energy source. While progress has been made, there is still much to be done.

Your Committees further find, that the Legislature adopted House Concurrent Resolution No. 195, in 2006, calling for a study of the feasibility of development of biofuels as a renewable energy, primarily for electricity generation. The Legislature recognized that land-based development of crops for use in biofuels production for Hawaii would achieve the objective of energy self-sufficiency. The Legislature also recognized that complex issues relating to land acquisition, water supply, and investment risk would need to be addressed before a viable and cost effective biofuels program could be developed. The Legislature finds that an integrated approach must be undertaken to coordinate the various industries and federal and state agencies to ensure the success of any substantial investment into biofuels development.

The purpose of this Act is twofold. Part I statutorily establishes the Hawaii Natural Energy Institute of the University of Hawaii at Manoa, defines its mission, and creates the Energy Development Special Fund for the development of renewable energy. One of the roles of this Institute will be to manage the portfolio of renewable energy programs to ensure an integrated approach, use its technical expertise to advise state and federal agencies to maximize funding sources and encourage private industry investments, and evaluate Hawaii's efforts undertaken toward energy self-sufficiency.

Part II of this measure creates the Biofuels Development Revolving Loan Fund, administered by the Hawaii Strategic Development Corporation, with technical advice from the Hawaii Natural Energy Institute. The purpose of the loan fund is to provide seed financing for commercially viable biofuel development projects, pending adoption of a comprehensive plan for Hawaii's energy self-sufficiency based, in part, on biofuels.

Your Committees amended this measure by making the following amendments:

- (1) Clarifying and revising the language requiring the director of the Institute to coordinate work with the Energy Resources Coordinator (ERC);
- (2) Deleting the provision requiring technical assistance and advice relating to the use of funds administered by the Hawaii Strategic Development Corporation as unnecessary;
- (3) Removing the reference to the Energy Systems Development Special Fund receiving funding by using fifty per cent of any public benefit fees established by the Public Utilities Commission;
- (4) Removing the provision regarding monitoring state agencies charged with implementing renewable energy projects as unnecessary;
- (5) Clarifying the provision regarding the parameters in conducting an evaluation so it comports with the stated objectives of the special fund;
- (6) Adding language clarifying that the two-person panel conducting the evaluation should be appointed by the Director of Business, Economic Development and Tourism to avoid a conflict of interest;
- (7) Inserting language in the appropriation provision for the Energy Systems Development Special Fund to develop a plan of action in coordination with the ERC to promote effective prioritization and focus on efforts consistent with the State's energy programs; and
- (8) Removing the appropriation amounts to reflect unspecified amounts for further discussion and decision making in the Committee on Ways and Means.

It is the intent of your Committees to establish the Hawaii Natural Energy Institute at the University of Hawaii, with the responsibilities for administering the Energy Development Special Fund and to create a Biofuels Development Revolving Loan program to be administered by the Hawaii Strategic Development Corporation.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Education and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1866, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1866, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 11. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 6 (Chun Oakland, English, Hee, Hooser, Taniguchi, Trimble).

The purpose of this measure is to encourage the development and use of bioenergy.

Specifically, this measure creates a Bioenergy Master Plan Task Force to develop and implement policies and procedures for a bioenergy industry in Hawaii and makes an appropriation to defray the expenses of the task force.

Testimony in support of this measure was submitted by the Department of Agriculture; Department of Business, Economic Development, and Tourism; University of Hawai'i System; Hawaiian Electric Company; Maui Electric Company; Hawaii Electric Light Company; Hawaii Energy Policy Forum; and Hawaii Renewable Energy Alliance. The Sierra Club, Hawai'i Chapter submitted testimony supporting the intent of the measure. Testimony in opposition to this measure was submitted by Life of the Land and Windward Ahupua'a Alliance. The State Procurement Office and Office of Information Practices submitted comments.

Your Committees find that the State must continue in its efforts to diversify its energy systems and reduce its dependence on imported petroleum. Successful diversification is dependent on developing a comprehensive plan that addresses the complex set of issues pertaining to the technology and its resource requirements. The plan must also take measures to gain the support of public and private stakeholders.

Your Committees understand the concerns relating to biofuels, and notes that when planning, the energy expenditures in creating biofuel should be considered in relation to the decrease in emissions given off when used.

Your Committees find that by tasking the Department of Business, Economic Development, and Tourism (Department) with creating the master plan, the State can make better use its funds for necessary technical consultation.

Your Committees amended the measure to exclude the creation of the task force. Instead, the Department will have the responsibility of developing the bioenergy master plan and reporting to the Legislature. The measure was amended to require the Department to develop the master plan in consultation with representatives of diverse stakeholders. It is your Committees' strong intent that these representatives include the Hawaii Energy Policy Forum, environmental groups, and all other stakeholders. Your Committees have also eliminated the exemption from complying with chapter 103D, Hawaii Revised Statutes, the Hawaii Public Procurement Code. This was a concern mentioned by several testifiers.

The measure was further amended to change the appropriation from \$200,000, for each year of the 2007-2009 fiscal biennium to \$600,000, for the 2007-2008 fiscal year.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 982, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 982, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 3 (Hooser, Kokubun, Sakamoto).

SCRep. 542 (Joint) Energy and Environment and Intergovernmental and Military Affairs on S.B. No. 1701

The purpose of this measure is to require counties with a population of over seven hundred fifty thousand residents to establish a residential curbside recycling program.

This measure also appropriates, through grants-in-aid, funds to the counties for the purpose of establishing a curbside recycling program.

Your Committees received testimony in support of this measure from the Department of Health, the Sierra Club Hawai'i Chapter, the Sierra Club Oahu Group, Retail Merchants of Hawaii, the Hawaii Food Industry Association, a member of the City Council of the City and County of Honolulu, and six individuals. The Department of Environmental Services of the City and County of Honolulu submitted testimony in opposition to this measure.

Your Committees find that Hawaii is currently facing a solid waste crisis, with conflicts arising over landfills on all the islands and with the permit for Oahu's main landfill, Waimanalo Gulch, set to expire in 2008. Your Committees find that curbside recycling will help ease the burden on Hawaii's landfills by making recycling more convenient so that materials that can be recycled do not end up in Hawaii's landfills.

The intent of this measure is to address the solid waste problem the State is facing by requiring counties with a population of over seven hundred fifty thousand residents to establish a residential curbside recycling program and by providing the counties with grants-in-aid for that purpose.

Your Committees note that the Chair of the Committee on Intergovernmental and Military Affairs does not support having the State mandate how the counties handle recycling.

Your Committees have amended this measure by:

- (1) Adding language to amend section 342G-104, Hawaii Revised Statutes (HRS), to authorize that any grant-in-aid to a county with a population of seven hundred fifty thousand or more residents, made for the purposes of section 342G-104(b), HRS, shall be disbursed with a requirement that the county utilize a portion of the moneys to establish or maintain a curbside residential recycling program; and
- (2) Broadening the scope of the appropriation to include appropriations for grants-in-aid to each county, with the proviso that, of the moneys appropriated to the City and County of Honolulu, the City and County shall expend a portion thereof to establish and maintain a residential curbside recycling program.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1701, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1701, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Ayes with Reservations, 2 (Inouye, Tsutsui). Noes, none. Excused, 2 (Hooser, Trimble).

SCRep. 543 (Joint) Energy and Environment and Intergovernmental and Military Affairs on S.B. No. 783

The purpose of this measure is to make noise abatement laws more effective.

Specifically, this measure makes an appropriation of an unspecified sum for each year of the 2007-2009 fiscal biennium to provide incentives to the counties to develop and enforce noise abatement ordinances.

Testimony in support of this measure was submitted by one individual. Testimony in opposition to this measure was submitted by the Honolulu Police Department.

Your Committees find that noise abatement has become a critical issue, given our State's increasing population. A concerted county effort is needed to provide the organization for enforcement of noise abatement county ordinances. Such an effort was successful with the "Click It or Ticket" seat belt program.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 783 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Kokubun).

SCRep. 544 (Joint) Energy and Environment and Intergovernmental and Military Affairs on S.B. No. 991

The purpose of this measure is to further the State's policies of developing indigenous renewable energy resources and decreasing the State's dependence on imported fossil fuels.

Specifically, this measure establishes that it is the policy of state and county governments to provide priority handling and processing, and expedite action on all state and county permits required for renewable energy projects.

Testimony in support of this measure was submitted by the Department of Commerce and Consumer Affairs; Department of Land and Natural Resources; Hawaiian Electric Company, Maui Electric Company, Hawaii Electric Light Company, Hawaii Renewable Energy Alliance, Honolulu Seawater Air Conditioning, LLC; and Puna Geothermal Venture. Testimony in opposition to this measure was submitted by the Department of Planning and Permitting of the City and County of Honolulu and Sierra Club, Hawai'i Chapter. The Department of Business, Economic Development, and Tourism submitted comments.

Your Committees find that attempts at encouraging private sector development of renewable energy projects have not been successful primarily due to the impediments of obtaining permits and approvals. Given the multiple laws and rules that must be complied with, including land use, planning, and environmental laws, some existing procedures are duplicative and lack coordination.

Your Committees find that providing priority handling and processing of renewable energy project permits is necessary to decrease the financial and time costs that are prevalent in the existing system. However, your Committees are concerned that expediting decisions could have an adverse impact if environmental considerations and public input opportunities are curtailed in the effort to comply with the "expedited action" requirement.

This measure was amended to delete the provision requiring state and county agencies to expedite action on the permits.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 991, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 991, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 1 (Ihara). Noes, none. Excused, 1 (Kokubun).

SCRep. 545 (Joint) Energy and Environment and Transportation and International Affairs on S.B. No. 1943

The purpose of this measure is to encourage further production and use of biofuels in Hawaii by:

- (1) Establishing biofuel processing facilities as a permitted use in designated agricultural districts under chapter 205, Hawaii Revised Statutes;
- (2) Establishing an energy feedstock program within the department of agriculture to encourage the production of energy feedstock in Hawaii and establish a baseline percentage of energy feedstock to be grown in the State to meet the its energy requirements;
- (3) Establishing a baseline price of \$2 per gallon for the purchase of ethanol from an ethanol production facility;
- (4) Requiring rental car companies in Hawaii with fleets of fifty cars or more to purchase flexible or alternative fuel vehicles beginning January 1, 2008; and
- (5) Requiring the Department of Transportation to include biofuel storage and transmission infrastructure in all harbor improvement master plans.

Testimony in support of this measure was submitted by the Department of Agriculture; the Department of Transportation; the Department of Business, Economic Development and Tourism; Hawaiian Electric Company, Inc.; the World Business Academy; the Hawaii Crop Improvement Association; and one individual. Testimony in opposition to this measure was submitted by the Hawaii Automobile Dealers' Association, the Alliance of Automobile Manufacturers, and several individuals. Comments were submitted by Life of the Land, the Respiratory and Environmental Disabilities Association of Hawaii, and one individual.

Your Committees find that Hawaii's dependence on petroleum for about ninety per cent of its energy needs is more than any other state in the nation. This makes the State extremely vulnerable to any oil embargo, supply disruption, international market dysfunction, and many other factors beyond the control of the State. Furthermore, the continued consumption of conventional petroleum fuel negatively impacts the environment. At the same time, Hawaii has among the most abundant renewable energy resources in the world, in the form of solar, geothermal, wind, biomass, and ocean energy assets.

Your Committees also find that increased energy efficiency and use of renewable energy resources would increase Hawaii's energy self-sufficiency, achieving broad societal benefits, including increased energy security, resistance to increases in oil prices, environmental sustainability, economic development, and job creation.

Your Committees further find that the language in part III of this measure regarding establishing a baseline price for the purchase of ethanol from an ethanol production facility and a ceiling price for a portion of the ethanol re-sold by a distributor is ambiguous as to whether the re-sale price cap applies to a portion of every ethanol purchase made by every distributor, regardless of the source of the ethanol.

Your Committees further find that the time limits imposed on automobile manufacturers in part IV requiring all rental cars purchased after January 1, 2008, to be flexible or alternative fuel vehicles is not feasible since automobile manufacturers are already in the planning stages for automobiles through the year 2012.

Your Committees further find that the Department of Transportation has already started work on a Statewide Fuel Facilities Development Plan to examine the fuel facilities at commercial harbors. This study, according to the Department of Transportation's testimony, includes the examination of biofuels and the subject matter of this study is currently being addressed in another measure.

In light of these findings, your Committees amended this measure to remove parts III, IV, and V of the measure. Your Committees also amended part I by adding language to clarify that the biofuels processing facilities on agricultural lands must be compatible with other agricultural uses.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Transportation and International Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1943, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1943, S.D. 1, and be referred to the Committee on Water, Land, Agriculture, and Hawaiian Affairs.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Ayes with Reservations, 1 (Trimble). Noes, none. Excused, 3 (Kokubun, Taniguchi, Tsutsui).

SCRep. 546 Energy and Environment on S.B. No. 1026

The purpose of this measure is to reduce the amount of trash flowing into landfills and decrease the amount of litter on the beaches and in the ocean.

The measure accomplishes this purpose by amending the deposit beverage container program to require that the program accept bottles that have a capacity of up to two liters (sixty-eight fluid ounces). In addition, it requires redemption centers to remain open at least thirty hours per week, including at least five hours on Saturday or Sunday.

Your Committee received testimony in support of this measure from the Sierra Club Hawaii Chapter and the Department of Environmental Management County of Hawaii. Reynolds Recycling and Windward Ahupua'a Alliance submitted testimony in support with comments. Your Committee received testimony in opposition to this measure from the Department of Health, the Hawaii Food Industry Association, The Pepsi Bottling Group, and the Coca-Cola Bottling Company of Hawaii.

Your Committee finds that the deposit beverage container program has proven to be an overwhelming success for Hawaii's environment. Your Committee further finds that the success rates will only increase with the addition of two-liter bottles to the program and extended hours of operation for redemption centers. However, your Committee finds that extended hours may cause an undue hardship for redemption centers located in rural areas.

Accordingly, your Committee has amended this measure by:

- (1) Requiring redemption centers to be open at least thirty-five hours per week, of which not less than five hours shall be on a Saturday or Sunday and shall remain open until 7 p.m. on at least two weekdays; provided that the center is located in a high density area;
- (2) Requiring that reverse vending machines are operational and accessible during the normal business hours of the center or store where it is located; and
- (3) Making technical, non-substantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1026, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1026, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Hooser, Trimble).

SCRep. 547 Energy and Environment on S.B. No. 1066

The purpose of this measure is to establish a fee for the inspection of invasive species at State ports of entry and establish the Invasive Species Inspection, Quarantine, and Eradication Fund.

Testimony in support of this measure was submitted by the Department of the Attorney General; the Department of Land and Natural Resources; the Department of Transportation; the Conservation Council for Hawaii; Democratic Party of Hawaii; the Oahu County Committee; Sierra Club, Hawaii Chapter; Hawaii Audubon Society; Hawaii Forest Industry Association; Airlines Committee of Hawaii; and The Nature Conservancy. Testimony in opposition to this measure was submitted by the Department of Budget and Finance; Horizon Lines; Maui County Farm Bureau; Hawaii Farm Bureau Federation; and Alexander & Baldwin, Inc. and Matson Navigation Company, Inc. Comments were submitted by the Department of Agriculture.

Your Committee finds that invasive species are one of the most significant threats to the environment, culture, economy, and quality of life in Hawaii. The lack of adequate and sustainable funding is the single greatest problem that State, Federal, and private agencies face in the fight to protect Hawaii from harmful invasive species. Increased inspection at ports of entry will help prevent new invasive species from becoming established by proactively preventing their entry through enhanced vigilance. Your Committee believes that increasing inspection efforts is ultimately more cost-effective than trying to control the spread of an invasive species once they are in Hawaii.

Your Committee further finds that the fee serves as an important funding mechanism for invasive species prevention and control.

Your Committee amended this measure by eliminating the proposed definitions, inserting the term “article”, and replacing the term “invasive species” with “pest” in the proposed new sections in order to conform the language contained in the proposed new sections with existing provisions in the Hawaii Revised Statutes, and to avoid conflict or overlap with the Permit Revolving Fund, found in section 150A-6.7, Hawaii Revised Statutes, or the Microorganism Revolving Fund, found in section 150A-4, Hawaii Revised Statutes. Your Committee further amended this measure by changing the effective date to July 1, 2020, in order to encourage further discussion on this matter.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1066, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1066, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 2 (Hooser, Trimble).

SCRep. 548 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Economic Development and Taxation on S.B. No. 1585

The purpose of this measure is to protect and aid in the preservation and identification of Native Hawaiian historic sites by requiring a private landowner to notify the Department of Land and Natural Resources prior to removing, excavating, injuring, or destroying a potential Native Hawaiian historic site.

Specifically, this measure:

- (1) Amends chapter 6E, Hawaii Revised Statutes, by adding a new section that:
 - (A) Requires a private landowner to notify the Department of Land and Natural Resources prior to commencing an action that will remove, excavate, injure, or destroy a potential Native Hawaiian historic site on the landowner’s property;
 - (B) Requires the Department of Land and Natural Resources, within sixty days from receipt of notice, to review and comment upon the proposed action, and decide whether to approve the proposed action;
 - (C) Provides requirements for the landowner to adhere to if the Department of Land and Natural Resources approves or disapproves the proposed action;
 - (D) Permits the Department of Land and Natural Resources to commence condemnation proceedings, if necessary, and permits funds to be expended from the Governor’s contingency fund if the Department does not have the necessary funds available to condemn the property to protect the historic site;
 - (E) Provides penalties if a landowner knowingly violates the provisions of the new section; and
- (2) Adds a new definition for “potential Native Hawaiian historic site” under section 6E-2, Hawaii Revised Statutes.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources; the Office of Hawaiian Affairs; and the Mayor, County of Hawaii. Testimony in opposition to this measure was submitted by Kulima Resort Company, the Society for Hawaiian Archeology, and one individual. The Department of Planning and Permitting, City and County of Honolulu submitted comments.

Native Hawaiian historic properties and sites possess tremendous cultural and educational value and should be preserved for future generations. These sites possess Native Hawaiian history and are tangible and fragile remnants of the past. Your Committees find that requiring private landowners to notify the Department of Land and Natural Resources before commencing in an action that would remove, excavate, injure, or destroy a potential Native Hawaiian historic site on their property will ensure that these sites are protected and preserved.

Your Committees have amended this measure by:

- (1) Clarifying the actions that would trigger the requirement for a landowner to notify the Department of Land and Natural Resources;
- (2) Extending the period for the Department of Land and Natural Resources to review, comment, and approve the action from sixty days to ninety days as a sixty day timeframe may prove to be unfeasible for the Department to accomplish its review of the historic site and issue an approval;
- (3) Clarifying the definition for “potential Native Hawaiian historic site” by deleting the reference to the year 1850 as it is difficult to determine the exact date of the construction of a historic site, and adding a reference to “older than fifty years” to coincide with similar federal provisions relating to historic properties and sites; and
- (4) Making technical, nonsubstantive amendments for the purposes of clarity and consistency.

Your Committees recognize that this measure does not create a fool-proof system that will protect invaluable Native Hawaiian historic sites, but it will provide further opportunity to protect these sites before they are lost forever. Thus, your Committees believe that this measure, as amended, fulfills the intent of this measure, which is to protect and aid in the preservation and identification of Native Hawaiian historic sites.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Economic Development and Taxation that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1585, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1585, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 2 (Ige, Tokuda).

SCRep. 549 (Joint) Water, Land, Agriculture and Hawaiian Affairs and Transportation and International Affairs on S.B. No. 1361

The purpose of this measure is to meet the critical demand for state harbor infrastructure projects, expansion, and upgrades by establishing a formal partnership between the Aloha Tower Development Corporation and the Department of Transportation that will allow the Aloha Tower Development Corporation to assist in selected harbor projects throughout the State.

Specifically, this measure amends chapter 206J, Hawaii Revised Statutes, by adding a new section that:

- (1) Allows the Aloha Tower Development Corporation to undertake projects for commercial harbors under the control or jurisdiction of the Department of Transportation;
- (2) Requires that any payments made by the Department of Transportation to the Aloha Tower Development Corporation for the Development Corporation's administrative and operational expenses to be deposited into the Aloha Tower Fund, under a designated sub-account for the particular harbor project;
- (3) Subjects the Aloha Tower Development Corporation to legislative approval on a project-by-project basis for the funding of and participation in harbor projects; and
- (4) Allows the Aloha Tower Development Corporation to apply any revenues derived from any commercial development projects in the Aloha Tower project area to defray the costs of the harbor infrastructure improvement projects incurred within the State.

Testimony in support of this measure was submitted by the Department of Transportation; the Aloha Tower Development Corporation; the Hawaii Harbor Users Group; the Chamber of Commerce of Hawaii; Alexander and Baldwin, Inc.; Matson Navigation Company; the Maritime Consultants of the Pacific; and the Hawaii Ship Agents Association.

The State imports approximately eighty per cent of all of its goods, and of that percentage, ninety-eight per cent of these goods arrive into Hawaii through the State's commercial harbor system. If the capacity of the state harbors is constrained, adverse statewide economic effects will be experienced, including a shortage of essential goods, delays in the delivery of goods, and an increase in costs.

Although the Department of Transportation and harbor users anticipated an increase in the overall volume of cargo processed through Hawaii's commercial harbor system, the actual growth in activity has occurred at a faster rate than projected, thus, requiring the State to accelerate its efforts in implementing projects to redevelop existing harbor facilities and provide expansion for harbor use. The Department of Transportation is unable to effectively meet this increased demand because its Harbors Division is focused primarily on the essential daily management and operations of the commercial harbor system rather than on development, and there is a lack in funding to support these costly improvement projects.

Your Committees find that a failure to resolve issues relating to the expansion of state commercial harbors will eventually limit the growth in the State's economy. Thus, permitting the Department of Transportation to establish a partnership with the Aloha Tower Development Corporation that will enable the Department to expand the use of the State's commercial harbors and improve the infrastructure of the harbors.

Your Committees were concerned with the broad scope of this measure by applying to all state harbors. Although your Committees recognize that the harbors on the neighbor islands are also in need of expansion and improvement, your Committees believe that it is a misnomer for the Aloha Tower Development Corporation to assist in projects other than projects for Honolulu Harbor.

Instead, your Committees request that the Department of Transportation develop an alternative recommendation for the necessary assistance in projects for other harbor facilities. Furthermore, your Committees request that the Department submit a report to the Legislature with a prioritized list of harbor facilities that are in most dire need of expansion or improvement, and provide the scope of the improvements envisioned with the estimated costs of these improvements.

Accordingly, your Committees have amended this measure by:

- (1) Narrowing the scope of the measure from including all commercial harbors to only Honolulu Harbor; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

Your Committees believe that this measure, as amended, fulfills the intent of this measure, which is to meet the critical demand for state harbor use and expansion.

As affirmed by the records of votes of the members of your Committees on Water, Land, Agriculture, and Hawaiian Affairs and Transportation and International Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1361, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1361, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 10. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 2 (Taniguchi, Tsutsui).

SCRep. 550 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 138

The purpose of this measure is to ensure free access to the Diamond Head State Monument by prohibiting the Department of Land and Natural Resources from charging an admission fee to the Diamond Head State Monument.

Specifically, this measure amends section 6E-32, Hawaii Revised Statutes, by prohibiting the Board of Land and Natural Resources from imposing an admission or entrance fee to Diamond Head State Monument.

Testimony in opposition to this measure was submitted by the Department of Land and Natural Resources.

Diamond Head is a widely acknowledged symbol of Hawaii and visited by tourists and residents daily. Five years ago, an admission fee to the Diamond Head State Monument was imposed by the Division of State Parks of the Department of Land and Natural Resources. Your Committee finds that an imposition of a fee for access to this historic and famous landmark discourages access to Diamond Head.

The Department of Land and Natural Resources indicated to your Committee that the proceeds from the fees charged at the Diamond Head State Monument are deposited into the State Parks Special Fund. The moneys in the State Parks Special Fund are then used by the Department of Land and Natural Resources to operate and maintain state parks and state parks programs statewide. The Department further indicated that the original intent for the imposition of an admission fee was to aid in the maintenance and operation of the Diamond Head State Monument. Your Committee had concerns that the moneys generated from the admission fees were not effectively used to maintain and operate Diamond Head State Monument, and was instead deposited into the special fund to be used for all state parks, thus, defeating the original intent of imposing an admission fee.

Accordingly, your Committee has amended this measure by deleting the amendments made to section 6E-32, Hawaii Revised Statutes, and amending section 184-3.4, Hawaii Revised Statutes, relating to the State Parks Special Fund. Your Committee has amended section 184-3.4, Hawaii Revised Statutes, by:

- (1) Establishing a Diamond Head State Monument sub-account within the State Parks Special Fund into which fifty-five per cent of all proceeds collected from the admission fees charged at the Diamond Head State Monument shall be deposited; and
- (2) Requiring the Department of Land and Natural Resources to expend the moneys from the Diamond Head State Monument sub-account for the purposes of the repair, maintenance, and operation costs incurred by the State in the management of the Diamond Head State Monument.

Your Committee encourages the State Parks Division of the Department of Land and Natural Resources to complete the construction of the visitor centers located at the interior and exterior of the crater. Your Committee further requests that the Department of Land and Natural Resources submit a written report to the Legislature before the commencement of the 2008 Regular Session that includes:

- (1) The current status of the visitor center projects at the Diamond Head State Monument and the funding for these projects;
- (2) The priority of these projects within the entire context of the capital improvement projects for the Department of Land and Natural Resources;
- (3) The reasons that the Department of Land and Natural Resources have for the delay of the Diamond Head State Monument visitor center projects; and
- (4) The feasibility of using funds from a Diamond Head State Monument sub-account to complete the visitor center projects.

Your Committee believes that this measure, as amended, fulfills the intent of this measure, which is to ensure access to the Diamond Head State Monument and appropriate use of access fees.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 138, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 138, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 551 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1090

The purpose of this measure is to ensure visitors' safety and enjoyment of the Diamond Head State Monument, and reduce visitor impact on the trail by appropriating funds to improve the load distribution and carrying capacity of the trail system at the Diamond Head State Monument.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the Waikiki Improvement Association, and three individuals.

Diamond Head is a widely acknowledged symbol of Hawaii and visited by tourists and residents daily, but the trail system leading to the summit is in desperate need of repair and maintenance. Your Committee finds that the concern for public safety is foremost because the existing trail facilities do not effectively accommodate the number of visitors to this unique historic attraction. Appropriating funds to improve the load distribution and carrying capacity of the trail system fulfills the intent of this measure, which is to ensure visitor safety and enjoyment of the Diamond Head State Monument.

Your Committee has amended this measure by deleting the sum of \$2,200,000 and leaving it unspecified for the Committee on Ways and Means to determine.

Although this measure makes an appropriation from the general fund, your Committee believes that the source of funding for the appropriation merits further discussion by the Committee on Ways and Means. Your Committee questions whether a more appropriate source of funding would be from the issuance of general obligation bonds.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1090, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1090, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 552 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1306

The purpose of this measure is to establish a special fund to collect revenues from the Seal of Quality program.

Specifically, this measure requires that all revenues from the program, donations, and any appropriations made by the Legislature be deposited into this special fund. The deposited funds shall be used for costs relating to the program, including any promotional or advertising activities and materials.

Your Committee received testimony in support of this measure from the Department of Agriculture; Hamakua Macadamia Nut Company, Green Point Nurseries, Inc.; Kamiya Gold Inc.; the Hawaii Farm Bureau Federation; Alan Wong's Restaurant; the Hawaii Agriculture Research Center; the Kamaoaha Foundation; the Kona Pacific Farmers Cooperative; the Manoa Honey Company; Nalo Farms, Inc.; and Hamakua Springs Country Farms.

The Seal of Quality program is established pursuant to section 148-61, Hawaii Revised Statutes, to promote and ensure high standards of quality for fresh and processed agricultural products produced in the State. The program generates revenues through licensing and promotional use fees.

Your Committee finds that this measure establishes a special fund and requires that all revenues from the Seal of Quality program, donations, and any appropriations be deposited into the fund to be used for costs relating to the program. This measure is a positive step in creating a self-reliant Seal of Quality program that provides recognizable value to those who participate in it.

Your Committee requests that the Committee on Ways and Means explore and, if feasible, implement an alternative method to disburse revenues from the Seal of Quality program other than through the establishment of a special fund. Your Committee has concerns that too many special funds already exist in the State treasury.

Your Committee is recommending passage of this measure because it strongly believes in the Seal of Quality program, as it will help with diversifying Hawaii's agricultural industry.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1306 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (Fukunaga).

SCRep. 553 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1307

The purpose of this measure is to support the longevity of a diversified agricultural industry in Hawaii by creating a dairy and egg farm revitalization and food security program.

Specifically, this measure:

- (1) Creates a dairy and egg revitalization program to administer and disburse funds to qualified dairy and egg producers for up to fifty per cent of their feed costs; and
- (2) Appropriates \$3,300,000 in each year of the fiscal biennium, for the Department of Agriculture to disburse funds to qualified producers of milk and eggs for the costs of feed, and for the administrative costs of the revitalization program.

Testimony in support of this measure was submitted by the Department of Agriculture, the Hawaii Farm Bureau Federation, the Hawaii Egg Producers Association Cooperative, Hawaiian Fresh Egg Farm, Pacific Dairy, Cloverleaf Dairy Farms, and four individuals. Testimony in opposition to this measure was submitted by Animal Rights Hawaii and one individual. The College of Tropical Agriculture and Human Resources at the University of Hawaii and the Hawaii Pork Industry Association submitted comments.

Hawaii's livestock industry faces numerous challenges. According to the Department of Agriculture, in 2006, locally produced eggs represented approximately thirty-three per cent of the total eggs sold in the State. Furthermore, approximately thirty to thirty-five per cent of the milk consumed in the State is locally produced. Within the past year, two egg farms and one dairy farm have closed, and currently, a dairy farm and an egg farm are threatened with closure.

Your Committee finds that one of the challenges these farms face is the rising cost of feed for livestock. The decrease in operational local dairy and egg farms increases the State's reliance on the importation of food and threatens the State's food security. Thus, creating a dairy and egg revitalization and food security program will financially assist dairy and egg farmers with covering the cost of their feed requirements, enable them to remain in business, and continue to provide fresh milk and eggs for local consumption.

Your Committee recognizes that the livestock industry also includes chickens and pigs. Pork and poultry producers emphasized to your Committee that they are also threatened with closure due to rising costs for feed, and expressed interest in being included in a livestock revitalization program. Furthermore, the Department of Agriculture offered to your Committee a revised form of this measure that includes revisions to provide greater accountability in the administration of the revitalization program.

Submitted testimony indicated that for poultry farmers, the total cost of grain or feed for their livestock amounts to seventy per cent of the cost to produce one dozen eggs with fifty per cent of that cost attributed to transportation expenses for the feed. Submitted testimony from other commodity producers further represented similar concerns regarding feed costs associated with transportation costs.

Accordingly, your Committee has amended this measure by:

- (1) Expanding the scope of the revitalization program to include pork and poultry farmers as qualified producers;
- (2) Adding a new chapter to the Hawaii Revised Statutes, to establish a livestock revitalization program that:
 - (A) Provides grants to qualified producers to reimburse up to fifty per cent of feed expenses;
 - (B) Establishes conditions and qualifications for a qualified producer to receive a grant;
 - (C) Exempts the grants disbursed under this new chapter from the provisions of chapter 42F, Hawaii Revised Statutes; and
 - (D) Requires the Department of Agriculture to establish and adopt rules to implement the purposes of the livestock revitalization project; and
- (3) Changing the appropriation amount from \$3,300,000 to \$4,700,000, to enable the program to include pork and poultry producers; and
- (4) Making technical, nonsubstantive amendments for the purposes of clarity and style.

Your Committee has concerns with the longevity of the revitalization program and is concerned that this program will only provide a short-term solution when a permanent solution is needed to effectively protect the livestock industry in Hawaii. Thus, your Committee believes that this also merits further discussion by the Department of Agriculture, Hawaii Farm Bureau Federation, and the College of Tropical Agriculture and Human Resources at the University of Hawaii.

Your Committee believes that this measure, as amended, fulfills the intent of this measure, which is to support the longevity of a diversified agricultural industry in Hawaii.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1307, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1307, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 1 (Tokuda).

SCRep. 554 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1356

The purpose of this measure is to improve the government and public's abilities to make informed decisions on various public policy and operational issues by enhancing the ability of the Office of Planning to manage and coordinate a Statewide Geographic Information and Data Integration Program.

Specifically, this measure:

- (1) Creates a Statewide Geospatial Information and Data Integration Special Fund to assist in the operation and maintenance of the Statewide Geospatial Information and Data Integration Program;
- (2) Clarifies the role that the Office of Planning has in maintaining and coordinating a statewide enterprise geographic information system;
- (3) Appropriates \$200,000 from the general fund to support the implementation of a geographic information system software enterprise license agreement; and
- (4) Appropriates \$200,000 from the general fund to be deposited into the Statewide Geospatial Information and Data Integration Special Fund.

Testimony in support of this measure was submitted by the Department of Agriculture; the Department of Health; the Office of Planning; and the Mayor, County of Kauai.

The Office of Planning currently manages a statewide geographic information system that is used on a daily basis by a number of state agencies. The current geographic information system server provides state agencies open access to over one hundred fifty geospatial layers that are available on the State's central geographic information system database. This information is a helpful tool for state agencies to make informed decisions regarding policy making, long-term planning, operational issues, and emergency planning and response.

Your Committee finds that additional support is needed for the geographic information system to be updated and expanded so that the system can serve more agencies and the public. Providing funds to allow the Office of Planning to enter into a geographic information system software enterprise license agreement on behalf of all state agencies using geospatial technologies and data fulfills the intent of this measure, which is to improve the government and public's abilities to make informed decisions on various public policy and operational issues.

Your Committee was concerned with the purposes the moneys in the Statewide Geospatial Information and Data Integration Special Fund would be used for, especially with respect to investment earnings. Your Committee requested the Office of Planning to clarify this language, and the Office of Planning responded with suggested clarifying amendments.

Accordingly, your Committee has amended this measure by:

- (1) Clarifying that investment earnings under the Statewide Geospatial Information and Data Integration Special Fund are interest earned on the special funds balance, and that the special fund is not to be used as an investment fund;
- (2) Allowing county agencies to have access to and share appropriate information on the geospatial information system; provided that the costs will be assessed by and paid to the State if the geospatial information services are utilized by the county agencies;
- (3) Adding an appropriation section to allow the Office of Planning to expend an amount of \$200,000 from the Statewide Geospatial Information and Data Integration Special Fund;
- (4) Replacing the effective date of the measure with July 1, 2050, to facilitate further discussion by the Committee on Ways and Means; and
- (5) Making technical, nonsubstantive amendments for the purposes of style and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1356, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1356, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, 1 (Slom). Excused, none.

SCRep. 555 (Majority) Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1546

The purpose of this measure is to allow the Office of Hawaiian Affairs to continue to work for the betterment of the conditions of Native Hawaiians by appropriating funds to the Office of Hawaiian Affairs' fiscal biennium 2007-2009 budget.

Specifically, this measure requests an appropriation of funds for the Office of Hawaiian Affairs' operating budget and a capital improvements project for the construction of the Kakaako Culture Center and Office Building.

Testimony in support of this measure was submitted by the Office of Hawaiian Affairs.

The Office of Hawaiian Affairs was established under Article XII, section 5, of the state constitution, and created for the purposes of working for the betterment of the conditions of Native Hawaiians; to be the principal agency responsible for the development and coordination of programs and activities relating to Native Hawaiians other than those programs administered by the Department of Hawaiian Home Lands; and to be an advocate for Native Hawaiians.

The Office of Hawaiian Affairs is requesting an appropriation of moneys from the general fund for the Office to provide social services to Office of Hawaiian Affairs beneficiaries, educational enrichment programs for Native Hawaiian children in grades kindergarten to twelfth, and legal services and legal representation to Office of Hawaiian Affairs beneficiaries for quiet title actions and assistance with ahupua'a and kuleana tenant rights. Your Committee finds that appropriating funds to the Office of Hawaiian Affairs will enable the Office to serve the purposes, which are mandated in the state constitution under chapter 10, Hawaii Revised Statutes.

Your Committee has amended this measure by making technical, nonsubstantive amendments for the purposes of style and consistency.

With respect to legal services and representation, your Committee has concerns about the amount of funds in the Office of Hawaiian Affairs' conflict fund, and the effectiveness of the fund. Your Committee is concerned about the levels of services and the number of beneficiaries that the conflict fund could adequately serve. Thus, your Committee has requested that the Office of Hawaiian Affairs submit to the Legislature a written report regarding the use of moneys in the conflict fund and its effectiveness in providing legal services and representation for Native Hawaiian beneficiaries. The report is required to be submitted to the Legislature twenty days prior to the convening of the 2008 Regular Session.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1546, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1546, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Ayes with Reservations, 1 (Fukunaga). Noes, 1 (Slom). Excused, 1 (Tokuda).

SCRep. 556 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1719

The purpose of this measure is to increase the monetary limit of loans that the Chairperson of the Board of Agriculture can approve from \$25,000 to \$50,000.

Your Committee received testimony in support of this measure from the Department of Agriculture, the College of Tropical Agriculture and Human Resources at the University of Hawai'i at Manoa, the Hawaii Aquaculture Association, and the Hawaii Agriculture Research Center.

Your Committee finds that increasing the monetary limit of the loans that the Chairperson of the Board of Agriculture can approve from \$25,000 to \$50,000 will help farmers acquire the resources they need to maintain and expand their operations. Your Committee notes that the current approval limit of \$25,000 has not been increased since the authority was granted in 1982, and the agriculture, aquaculture, and bank industries have undergone tremendous changes since that time.

The intent of this measure is to provide greater authority over the amount of loans that may be approved by the Chairperson of the Board of Agriculture to take into account the rise in operating costs that farmers face.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1719 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 557 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1755

The purpose of this measure is to aid in the eradication of invasive species in Hawaii by providing government agencies and private entities limited liability immunity for injuries sustained by volunteers who are engaged in coqui frog eradication efforts.

Testimony in support of this measure was submitted by the Department of Agriculture, the Department of Land and Natural Resources, the Maui Outdoor Circle, the Kihei Akahi Association of Apartment Owners, the Hawaii Agriculture Research Center, the Hakalau Coqui Warriors, the Hele Mauna Street Neighborhood Watch, and three individuals.

The accidental introduction of the coqui frog in Hawaii has resulted in a serious problem for residents and tourists. Coqui populations have exploded in the last fifteen years from presumably a single infestation to over two hundred on the Big Island alone. They are also present on Maui, Oahu, and most recently on Kauai. The infestation of coqui frogs has forced government agencies to enlist the help of volunteers to aid in the eradication efforts. During coqui frog eradication projects, volunteers are required to move through forested areas or areas dense in vegetation, which may create hazardous conditions for or has the potential of causing injury to these volunteers. Your Committee finds that providing to government agencies and private entities limited liability immunity from injuries sustained by volunteers who are engaged in coqui frog eradication efforts fulfills the intent of this measure, which is to further aid in the eradication of invasive species in Hawaii.

Your Committee has amended this measure by adopting the suggestion made by the Department of Agriculture by replacing "non-employed volunteers" with "unpaid volunteers" to provide clarity.

The Department of Agriculture suggested expanding the scope of this measure to include the potential for other invasive species eradication efforts. However, your Committee notes that the title of this measure is specific to coqui frog eradication efforts, and therefore, while willing to accommodate this additional amendment, your Committee is unable to do so.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1755, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1755, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 558 Economic Development and Taxation on S.B. No. 1133

The purpose of this measure is to require businesses with at least fifty employees that receive school repair and maintenance, certain renovation and development, and high technology tax credits under sections 235-110.2, 235-110.3, 235-110.46, 235-110.51, 235-110.6, 235-110.8, 235-110.9, and 235-110.91, Hawaii Revised Statutes (HRS), to provide experiential learning opportunities to public school students.

The Department of Taxation (Department) submitted comments on this measure.

Your Committee finds that experiential learning is an important component of workforce development, particularly in Hawaii's growing technology related sector. One means of determining the extent of experiential learning opportunities centers on collecting data from businesses that provide these opportunities.

It is the intent of your Committee to encourage the gathering of information on experiential learning in order to support efforts to increase opportunities for Hawaii's students.

Your Committee has amended this measure by:

- (1) Deleting the proposed experiential learning tax credit in chapter 235, HRS;
- (2) Amending section 231-3.4, HRS, to authorize the Department, in its published reports on tax credits, to include information submitted on a voluntary basis to the department by a taxpayer receiving certain technology related credits, information on experiential learning opportunities provided by the taxpayer to public school students; and
- (3) Making the measure effective upon approval date and applicable to taxable years beginning after December 31, 2007.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1133, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 1133, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 559 (Majority) Economic Development and Taxation on S.B. No. 1840

The purpose of this measure is to adopt changes to Hawaii's tax law that will allow Hawaii to become a participating member of the National Streamlined Sales Tax Project.

Testimony in support of this measure was received from the Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO; Hawaii Association of REALTORS; and Retail Merchants of Hawaii. The Legislative Committee of Catrala-Hawaii testified in opposition. The Department of Taxation (Department) submitted comments.

Your Committee finds that the Streamlined Sales Tax Project (SSTP) is an effort created by state governments, with input from local governments and the private sector, to simplify and modernize sales and use tax collection and administration. SSTP proposals include tax law simplifications, more efficient administrative procedures, and emerging technologies to substantially reduce the burden of tax collection. The Project's proposals are focused on improving sales and use tax administration systems for both "Main Street" and remote sellers for all types of commerce. Forty-two states and the District of Columbia are involved in the Project.

Your Committee further finds that Hawaii has been a participating member of SSTP since 2003, and that this measure is a culmination of the efforts by both government and the private sector to identify and resolve issues necessary for SSTP compliance.

Your Committee is aware that some members are concerned that SSTP compliance is a "new tax" on Internet commerce. This is not accurate. SSTP provides a standardized means of collecting Hawaii's existing four and one-half per cent use tax on out-of-state sales. Through the SSTP effort, out-of-state sellers can voluntarily collect and remit the correct amount of Hawaii use taxes on out-of-state purchases to the Department of Taxation without imposing any new burdens on Hawaii consumers.

Ultimately, the State's participation in SSTP is premised on treating all taxpayers fairly - to afford the Hawaii-based retailer paying his or her general excise taxes today, the same tax treatment as the out-of-state retailer who sells to Hawaii consumers.

Your Committee received a revenue impact statement from the Department that this measure would increase revenue by about \$10,000,000 annually.

In its methodology, the Department stated that in a study produced for the Office of the Auditor (Auditor) in April 2006, Dr. William Fox estimated that joining the Streamlined Sales and Use Tax Agreement (SSUTA) would provide Hawaii with about \$10,000,000 in additional revenues annually. However, your Committee notes that the 2006 Auditor study was a limited one, based on tax estimates available for a single year. It did not examine Hawaii's growth in electronic or out-of-state commerce.

As such, your Committee finds that 2002 Census Bureau reports of \$1.6 trillion in e-commerce transactions, twenty-four to twenty-five per cent increases in U.S. online sales reported between 2004-2005 ("The State of Retailing Online," a Shop.org Study by Forrester Research, 2005) and a twenty per cent increase in online shopping recorded between 2005 and 2006 (Wall Street Journal, December 23, 2006) illustrate the strong growth of e-commerce in recent years. Revenue erosion is therefore a legitimate concern among state and local governments.

Your Committee notes that the Department requested a delayed effective date to give practitioners and businesses time to adjust to the changes. However, the measure has an effective date of January 2009, for all but two sections of the bill, which is well beyond the extra year the Department noted is optimal for significant changes in the Hawaii Revised Statutes (HRS).

The two sections that would take effect July 1, 2007, authorize establishment of a seven-member working committee to address technical, compliance, policy, and other issues involved in final implementation; and appropriate funds to the Auditor for technical assistance support for a working committee.

Your Committee also notes that in their testimony in opposition, the Legislative Committee of Catrala-Hawaii expressed concern regarding the effect of the legislation on the visible pass through pursuant to section 437D-8.4, HRS. Your Committee believes this may be a misreading of the bill, as the proposed language would not affect the provisions of that section and the general excise tax will continue as Hawaii's "sales" tax.

It is the intent of your Committee to support the continuing effort toward compliance with the SSUTA.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1840 and recommends that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, 1 (Slom). Excused, 1 (English).

SCRep. 560 Economic Development and Taxation on S.B. No. 1920

The purpose of this measure is to:

- (1) Recodify and rename existing motion picture, digital media, and film production tax provisions; and
- (2) Increase membership of the Hawaii Television and Film Board, enable the Board to delegate certain administrative functions to subcommittees; and appropriate funds to the Board's special fund for grants programs.

Prior to the hearing on this measure, your Committee circulated a Proposed S.D.1. The purpose of the Proposed S.D.1 is to:

- (1) Recodify and rename existing motion picture, digital media, and film production tax provisions;
- (2) Increase the motion picture, digital media, and film production tax credits from fifteen and twenty per cent to twenty and twenty-five per cent, and increase reporting requirements; and
- (3) Increase membership of the Hawaii Television and Film Board, enable the Board to delegate certain administrative functions to subcommittees, authorize the Board not to meet if no money is in its special fund or no grants are being managed, and appropriate funds to the Board's special fund for grants programs.

Testimony in support of the Proposed S.D. 1 was submitted by the Department of Business, Economic Development, and Tourism and two individuals. The Department of Taxation and the Tax Foundation of Hawaii submitted comments.

Your Committee received a revenue impact statement from the Department of Taxation that the increases to the tax credit in the Proposed S.D. 1 would cost \$7,000,000 to \$17,000,000 annually.

In its methodology, the Department of Taxation stated that preliminary figures from applications for the film credit for the period from July 1, 2006, to January 25, 2007, showed planned production expenditures of \$83,000,000, of which \$78,000,000 were on Oahu and \$5,000,000 were in the other counties. Assuming the planned expenditures materialize and that the applications continue at the same rate annually, these figures imply that increasing the credit as proposed in the bill would reduce tax revenues by about \$7,000,000 annually. This revenue loss would increase if the proposal were to bring in more film production.

For example, if the rate of production spending were to increase by the same percentage as the credit for film production in each county, the proposal would cost about \$17,000,000 annually. However, this is a static estimate and does not account for dynamic factors, such as increased economic activity in the State that would occur as a result of the credit. Your Committee notes that in its testimony for Act 88, Session Laws of Hawaii 2006, the Department of Taxation estimated a revenue gain of approximately \$13,000,000 for every \$100,000,000 in new production expenditures spent in Hawaii. Accordingly, your Committee has requested the Department of Taxation to provide a more thorough evaluation of the gains and losses associated with the credit.

With regard to the specifics of the bill, your Committee has heard a number of concerns regarding the effectiveness of the Hawaii Television and Film Development Board, due in part to the continued lack of funding. Upon review of the concerns, and the proposed changes to increase the size and scope of the Board, your Committee believes the work of the Board may more appropriately be undertaken by other entities.

Your Committee has also received a number of noteworthy recommendations regarding the tax credits and the recodification in Part I of this measure. Several of these recommendations require additional information before decisions can be reached and it is the intent of your Committee to continue this discussion.

Your Committee has amended the Proposed S.D. 1 accordingly, by:

- (1) Repealing the Hawaii Television and Film Development Board, and deleting references to the Board in the Hawaii Television and Film Development Special Fund; and
- (2) Inserting an effective date of July 1, 2040, for purposes of further discussion.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1920, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1920, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 561 Commerce, Consumer Protection and Affordable Housing on S.B. No. 58

The purpose of this measure, as received by your Committee, is to allow for the independent administration of a deceased dentist's estate.

Your Committee received testimony in support of this measure from the Board of Dental Examiners (Board), the Hawaii Dental Association (HDA), and three individuals.

Your Committee finds that seventy per cent of Hawaii's dentists are sole proprietors that do not have the benefit of the Professional Corporations Act of chapter 415, Hawaii Revised Statutes (HRS), which provides for the winding down or selling of the professional's business upon their death or disability. As a result, legal issues arise as to how a dental practice is to be handled by a dentist's estate or a dentist's legal guardian in a situation where a dentist dies unexpectedly or becomes incapacitated. The intent of this measure is to address the issues that arise under those types of circumstances by providing for the temporary, but continued, operation of the dental practice.

Your Committee has amended this measure, based upon the testimony provided by both the Board and HDA, by moving the substance of the proposed new section while maintaining the measure's original intent, to section 448-1, HRS, thus adding an exemption to the practice of dentistry for actions performed by executors and administrators of a deceased dentist's estate, as well as for actions of a legal guardian or authorized representative on behalf of an incapacitated dentist.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 58, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 58, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 2 (Ihara, Sakamoto).

SCRep. 562 (Joint) Commerce, Consumer Protection and Affordable Housing and Judiciary and Labor on S.B. No. 1229

The purpose of this measure is to prohibit scrap dealers from accepting copper from any person under the age of eighteen and from accepting fifteen or more pounds of copper from any person who is unable to supply the required identification.

This measure also requires scrap dealers to take a thumbprint of all persons selling more than fifteen pounds of copper.

In addition, this measure requires the Department of Commerce and Consumer Affairs to maintain a copper database and requires scrap dealers to submit information regarding certain copper transactions on a quarterly basis, which is to be made available to law enforcement agencies.

Testimony in support of this measure was submitted by the Department of the Prosecuting Attorney of the City and County of Honolulu. Testimony in opposition to this measure was received by the Honolulu Police Department; Okuda Metal, Inc.; and Reynolds Recycling. Comments were provided by the Department of the Attorney General.

Your Committees find that the recent increase in prices for scrap metal such as copper has caused a spate of copper thefts in the State. Recent thefts are costing resident taxpayers, public utility companies, private companies, and state entities significant revenue to replace the copper that is stolen and to repair the damage caused by these thefts. The intent of this measure is to deter copper theft by placing stricter restrictions on the acceptance of copper by scrap dealers and by requiring that the Department of Commerce and Consumer Affairs establish a database into which required scrap dealer reports will be entered and made available to law enforcement.

Your Committees note that the testimony of the Department of the Attorney General, the Prosecuting Attorney of the City and County of Honolulu, and the Honolulu Police Department all note a preference for S.B. 1332, S.D. 1, as the vehicle for addressing the growing problem of copper theft in the State.

In order to address some of the concerns raised in the testimony of the Department of the Attorney General, your Committees have amended this measure to:

- (1) Remove the language that the identification requirements only apply to persons redeeming fifteen pounds or more of copper and instead require that all persons redeeming copper, regardless of amount, be subject to the identification requirements;
- (2) Require weekly, rather than quarterly, reporting by scrap dealers; and
- (3) Specify that the database and all updates shall be made available to law enforcement agencies on a daily basis.

Your Committees have also amended this measure to make technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Commerce, Consumer Protection, and Affordable Housing and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1229, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1229, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 4 (Ige, Ihara, Inouye, Nishihara).

SCRep. 563 (Joint) Commerce, Consumer Protection and Affordable Housing and Judiciary and Labor on S.B. No. 1412

The purpose of this measure is to establish the Insurance Fraud Investigations Branch, within the Department of Commerce and Consumer Affairs, to replace the existing Insurance Fraud Investigations Unit in order to prevent, investigate, and prosecute (both civilly and criminally) insurance fraud relating to all lines of insurance, except workers' compensation insurance.

This measure also establishes administrative, civil, and criminal penalties and requires that fines and settlements resulting from successful fraud prosecutions are to be deposited into the Compliance Resolution Fund to help the Insurance Fraud Investigations Branch cover some of its costs of operation.

Your Committees received testimony in support of this measure from the Department of Commerce and Consumer Affairs, the Department of the Attorney General, the Hawaii Insurers Council, the National Association of Insurance and Financial Advisors, State Farm Insurance Companies, the Hawaii Medical Service Association, and the Hawaii Association of Health Plans. Comments on this measure were submitted by the American Council of Life Insurers.

Your Committees find that no line of insurance is immune to the problem of insurance fraud. The intent of this measure is to expand Hawaii's insurance fraud laws to include all lines of insurance, except workers' compensation, by establishing an Insurance Fraud Investigations Branch to replace the existing Insurance Fraud Investigations Unit; establishing administrative, civil, and criminal penalties for all types of insurance fraud; and requiring that fines and settlements resulting from any prosecutions be deposited into the Compliance Resolution Fund to allow the Insurance Fraud Investigations Branch to cover some of its costs.

Your Committees further find that this measure is the result of a collaborative effort between the Department of Commerce and Consumer Affairs and members of the insurance industry and this measure constitutes a consensus among the stakeholders on how to address the problem of insurance fraud in the State.

Your Committees have amended this measure, based upon the recommendation of the American Council of Life Insurers, to provide a higher standard of actual malice with regard to the reporting of insurance fraud in order to protect those reporting insurance fraud from frivolous lawsuits and to provide a greater incentive for reporting fraud.

Your Committees have also amended this measure, based upon the testimony of the Hawaii Medical Service Association, by removing the reference to insurers with regard to investigation and prosecution, and by removing the section relating to required language in health plan applications and claims forms because the language for these forms follow federal law and are provided by the Centers for Medicare and Medicaid Services.

Your Committees note that the amendments recommended by both the American Council of Life Insurers and the Hawaii Medical Service Association were agreeable to the Department of Commerce and Consumer Affairs, the Department of the Attorney General, State Farm Insurance Companies, and the National Association of Insurance and Financial Advisors.

Furthermore, your Committees note that the Insurance Commissioner stated that this measure does not include workers compensation.

Your Committees also made technical, nonsubstantive changes for the purposes of clarity and style.

As affirmed by the records of votes of the members of your Committees on Commerce, Consumer Protection, and Affordable Housing and Judiciary and Labor that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1412, as amended

herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1412, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 4 (Ige, Ihara, Inouye, Nishihara).

SCRep. 564 Commerce, Consumer Protection and Affordable Housing on S.B. No. 106

The purpose of this measure is to establish a joint legislative study group to investigate issues involved in implementing twenty-four hour insurance coverage in the State and to make an appropriation to fund the study group.

Your Committee received comments on this measure from the Office of Information Practices.

Your Committee finds that a study is needed to determine what actions the State can take to combine prepaid health care, temporary disability insurance, motor vehicle insurance, and other related insurance systems in order to prevent duplication of coverage and avoid delays in the delivery of health care. The intent of this measure is to create a study group to investigate these issues.

Your Committee has amended this measure by:

- (1) Clarifying that the study group shall be exempt from the requirements of part I of chapter 92, Hawaii Revised Statutes;
- (2) Removing the specified amount of the appropriation; and
- (3) Changing the effective date to promote further discussion.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 106, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 106, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Sakamoto).

SCRep. 565 Commerce, Consumer Protection and Affordable Housing on S.B. No. 1717

The purpose of this measure is to authorize the issuance of special purpose revenue bonds to assist public utilities with capital improvement projects for the benefit of public health, safety, and general welfare.

Your Committee received testimony in support of this measure from Hawaiian Electric Company, Inc. (HECO); Maui Electric Company, Limited; and Hawaii Electric Light Company, Inc.

Your Committee finds that the proceeds of the sale of the special purpose revenue bonds authorized by this measure will be used for the construction of facilities that will benefit ninety-five per cent of Hawaii's population. According to HECO's testimony, this type of financing will benefit the taxpayer to the extent that it will be less expensive than other types of financing, which will result in lower rates than if other types of financing are used to fund the capital improvement projects.

Your Committee, based upon the testimony provided by HECO, has made a technical, nonsubstantive amendment for the purpose of clarity.

As affirmed by the record of votes of the members of your Committee on Commerce, Consumer Protection, and Affordable Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1717, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1717, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, 1 (Ihara).

SCRep. 566 Education on S.B. No. 1136

The purpose of this measure is to ensure adequate funding for public school students and to increase the efficiency of operations within school complex areas.

Specifically, this measure:

- (1) Establishes the Weighted Student Formula Augmentation Special Fund to assist schools in transitioning to the weighted student formula based on certain criteria;
- (2) Appropriates funds to the special fund for the aforementioned purpose;
- (3) Excludes moneys for custodial services, classroom cleaners, and minor repairs and maintenance from the weighted student formula calculation; and
- (4) Provides complex area superintendents increased control over resources within the complex areas to achieve greater efficiency and cost-effectiveness.

Testimony in support of this measure was submitted by the Hawaii State Teachers Association. Testimony in opposition to this measure was submitted by the Department of Education and the Department of Budget and Finance.

Your Committee finds that the weighted student formula was established pursuant to the Reinventing Education Act of 2004, Act 51, Session Laws of Hawaii of 2004, as amended, to provide equity in funding for public school students by utilizing weighted cost factors. Since its implementation, it has become apparent that changes to this approach must be made to address funding deficiencies so that our public school students will not suffer. Although multiple methods have been broached to alleviate the burden placed on schools meeting certain criteria, more needs to be done to ensure that schools are provided adequate funding to provide students with a quality education.

Your Committee determines that students in specific categories, including students in junior kindergarten programs with classes of fifteen or fewer students, students in geographically isolated schools, students in multitrack schools, transient students, students in small schools, and non-English proficient students, require appropriate funding outside of the weighted student formula to ensure their needs are being met. Therefore, your Committee determines that additional compensation based on these factors is necessary to prevent certain schools from suffering devastating consequences. This approach, however, does not require the establishment of a special fund to augment weighted student formula allocations.

Additionally, your Committee finds that personnel and resources within schools and school complexes could be better utilized if control resided with the complex area superintendents. Increased authority would facilitate the appropriate allocation of underutilized or inefficiently utilized resources within the complex areas to achieve greater efficiency and cost-effectiveness. These efforts should also be accomplished through resources provided outside of the weighted student formula allocations to provide true assistance to the schools.

Accordingly, your Committee has amended this measure by:

- (1) Removing the provision establishing the Weighted Student Formula Augmentation Special Fund;
- (2) Removing the provisions relating to transfers from and expenses incurred by the Weighted Student Formula Augmentation Special Fund;
- (3) Removing appropriations from educational instructional support (EDN 200) and education state and district (EDN 300);
- (4) Appropriating funds for certain students in addition in weighted student formula allocations, including students in junior kindergarten programs with classes of fifteen or fewer students, students in geographically isolated schools, students in multitrack schools, transient students, students in small schools, and non-English proficient students;
- (5) Clarifying that complex area superintendents have the authority to allocate resources for complex level educational officers, teachers, and support staff;
- (6) Deleting the provision that would have removed moneys for custodial services, classroom cleaners, and minor repairs and maintenance from the weighted student formula;
- (7) Including an appropriation for complex area superintendents to allocate resources among the schools within the complex area superintendent's jurisdiction; provided that funds shall be provided at a rate of \$30 per student;
- (8) Changing the effective date of Part II of the Act to July 1, 2008; and
- (9) Making technical, nonsubstantive changes for purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Education that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1136, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1136, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 7. Noes, none. Excused, none.

SCRep. 567 Judiciary and Labor on S.B. No. 963

The purpose of this measure is to provide temporary tax relief to employers by lowering the maximum taxable wage base for calendar years 2008 and 2009, and to increase unemployment benefits for eligible individuals. The measure excludes the payment of benefits to individuals terminated from employment for wilful or wanton misconduct.

Your Committee received testimony in support of this bill from the ILWU, Hawaii State AFL-CIO, and the Hawai'i State Democratic Party. Those in opposition were the State Department of Labor and Industrial Relations, Retail Merchants of Hawaii, the Chamber of Commerce of Hawaii, the Society for Human Resource Management – Hawaii Chapter, and the Hawaii Business League.

Those opposing the measure cited the bill's lack of relief for employers contributing to an estimated \$470 million unemployment trust fund. Your Committee has amended the bill to give the employers some relief from contributing to a well funded trust fund.

The bill was amended by the following:

1. Decreased the original proposal of eighty percent to seventy-five percent of the average weekly wage;
2. Amended Section 383-63, Hawai'i Revised Statutes by redefining the term "adequate reserve fund" for calendar year 2008 by reducing the number of years that determines the highest benefit cost rate from a ten year period to a six year period; and
3. Amended Section 383-66, Hawai'i Revised Statutes by reducing the employer contribution rate to sixty-five per cent of the amount from July 1, 2007 to June 30, 2008 and to seventy-five per cent of that amount from July 1, 2008 and thereafter.

As affirmed by the record of votes of the members of your Committee on Judiciary and Labor that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 963, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 963, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Gabbard). Noes, none. Excused, 1 (Kokubun).

SCRep. 568 (Joint) Human Services and Public Housing and Health on S.B. No. 713

The purpose of this measure is to establish certification procedures for nurse aides employed in state licensed or state certified health care settings and Medicare or Medicaid facilities.

The Department of Commerce and Consumer Affairs and the Hawaii Long Term Care Association submitted testimony in support of this measure. The Department of Health and the Department of Human Services submitted testimony in support of the intent of this measure. The Health Care Association of Hawaii submitted comments.

Your Committees find that certifying nurse aides who work in nursing facilities participating in Medicare and Medicaid programs and in other state licensed and certified health care settings will enable the Department of Commerce and Consumer Affairs, the Department of Human Services, and the Department of Health to monitor and evaluate the quality and competency of the nurse aides practicing in the State.

Upon further consideration, your Committees have amended this measure by:

- (1) Removing the penalty for substantiated allegations;
- (2) Defining the terms "finding" and "medicare or medicaid certified facility";

- (3) Requiring an applicant to successfully complete training in a state-approved training program to receive Medicare or Medicaid nurse aide certification;
- (4) Permitting information to be removed from the nurse aide registry under certain circumstances; and
- (5) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 713, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 713, S.D. 1, and be referred to the Committee on Commerce, Consumer Protection, and Affordable Housing.

Signed by the Chairs on behalf of the Committees. Ayes, 6. Noes, none. Excused, 3 (Menor, Hemmings, Whalen).

SCRep. 569 Human Services and Public Housing on S.B. No. 1158

The purpose of this measure is to create a Citizen's Family Law Advisory Committee to be placed, for administrative purposes, in the Judiciary.

The National Association of Social Workers and three individuals submitted testimony in support of this measure. The Domestic Violence Clearinghouse and Legal Hotline submitted testimony in support of the intent of this measure. The Judiciary submitted testimony in opposition.

Your Committee finds that this measure creates an ongoing process within the Judiciary by which Judiciary personnel, Family Court professionals, related service providers, and the public can participate in and provide feedback about the Family Court and family law matters.

It is the Committee's intent to support openness in and public feedback about the Family Court administration and process. Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1158, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1158, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 570 Human Services and Public Housing on S.B. No. 1144

The purpose of this measure is to clarify the use of a Power of Attorney for the education of a minor.

The Department of Education and the principals of Pearl City High School, Kapolei High School, Moanalua High School, Nanakuli High and Intermediate School, and Castle High School submitted testimony in support of this measure.

Your Committee finds that under the existing law, some parents and guardians are apparently misusing a Power of Attorney to circumvent the procedure for establishing legal residency in a school's attendance area and gain access to school programs or services. Among other things, this measure requires a parent or guardian to enroll a minor in the appropriate school.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1144 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 571 Human Services and Public Housing on S.B. No. 1443

The purpose of this measure is to specify that when the Family Court determines by clear and convincing evidence that a child's parents cannot, now or in the reasonable foreseeable future, provide the child with a safe family home, the Department of Human Services may submit a permanent plan with the goal of guardianship and the court may award guardianship to an appropriate entity without termination of parental rights.

The Department of Human Services; the Attorney General; EPIC, Inc.; and two individuals submitted testimony in support of this measure.

Your Committee finds that this measure will enable a Family Court Judge, after an appropriate finding, to grant legal guardianship of a minor without terminating the parents' parental rights. As noted by the Attorney General, under other areas of the law, a guardian may be appointed for a minor even if the parents' parental rights have not been terminated. This measure will make the legal guardianship determinations resulting from a proceeding pursuant to chapter 587, Hawaii Revised Statutes, consistent with all other legal guardianships of minors.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1443 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 572 Human Services and Public Housing on S.B. No. 1161

The purpose of this measure is to require the Department of Human Services to provide a written report to the court, which the court is to provide to the parties, at least two days before a hearing in cases involving allegations of domestic abuse.

The Children's Rights Council and two individuals submitted testimony in support of this measure. The Department of Human Services and the Domestic Violence Clearinghouse and Legal Hotline submitted testimony in support of the intent of this measure.

Your Committee finds that this measure sets a time limit on the provision of the Department of Human Services' report to the court in matters involving allegations of domestic abuse, and ensures that the parties receive a copy of the report, as well.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1161 and recommends that it pass Second Reading and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 573 Human Services and Public Housing on S.B. No. 643

The purpose of this measure is to allow a person who was previously evicted from public housing to appeal the eviction under certain conditions; provided that it has been at least ten years since the eviction.

The Hawaii Public Housing Authority and Waianae Community Outreach submitted testimony in support of this measure.

Your Committee finds that state public housing rules prohibit anyone evicted from public housing after 1985 from re-applying for placement in public housing. This measure establishes an appeals process under certain conditions for previously evicted applicants who are interested in reapplying for public housing.

It is your Committee's intent to balance the need to maintain an orderly housing project with the recognition that people have the ability to reform past behavior. Your Committee has amended this measure by:

- (1) Clarifying that the Hawaii Public Housing Authority shall allow any person to appeal a denial of eligibility for public housing based on an eviction that occurred ten years or more prior to the application for public housing;
- (2) Clarifying that the Hawaii Public Housing Authority may reverse the eligibility denial, not the earlier eviction, and review, not necessarily accept, an application for public housing from the person; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 643, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 643, S.D. 1, and be referred to the Committee on Judiciary and Labor.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 574 (Joint) Human Services and Public Housing and Commerce, Consumer Protection and Affordable Housing on S.B. No. 1986

The purpose of this measure is to require that Med-QUEST and Medicaid coverage include chiropractic care.

The Hawaii State Chiropractic Association, the American Chiropractic Association, and four individuals submitted testimony in support of this measure. The Department of Human Services submitted testimony in support of the intent of this measure.

Your Committees find that Med-QUEST and Medicaid recipients would benefit from chiropractic care to the same extent as others who have medical coverage for this service. According to the testimony, chiropractic care can help improve physical health by increasing functional capacity and preventing disabling conditions. Also, it was noted that more than twenty-five other states include chiropractic care in their Medicaid programs.

Your Committees note that the Department of Human Services provided a statement that the projected cost for chiropractic services for both the QUEST and Medicaid Fee-For-Service programs is \$4,317,120, which is based on twenty-four sessions per year. Depending on whether the Department of Human Services receives approval from the federal Centers for Medicare and Medicaid Services, of the total projected cost, the federal share would be \$2,423,125 and an additional \$1,893,995 in new state general funds would be required. However, the federal and state projected costs are tentative and the Department of Human Services is still working on final figures. If necessary, it is within the purview of the Committee on Ways and Means to make an appropriation.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Commerce, Consumer Protection, and Affordable Housing that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1986 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 1 (Hemmings).

SCRep. 575 (Joint) Human Services and Public Housing and Health on S.B. No. 1740

The purpose of this measure is to appropriate funds to the Department of Health so it can continue to maintain its existing staff and hire additional professionals to provide health services and programs.

The Department of Health submitted testimony in support of the intent of this measure. Hawai'i Early Intervention Coordinating Council, Kapi'olani Child Protection Center, and twenty-one individuals submitted testimony in support of this measure.

This measure requests funds for:

- (1) Five permanent state-funded positions for a preschool developmental screening program;
- (2) The Department of Health's Family Health Services Division to hire and maintain a permanent state-funded registered nurse V position to administer and coordinate the programmatic aspects of the comprehensive primary care services program; and
- (3) The Department of Health's Injury Prevention and Control Program to hire and maintain a qualified individual (planner IV position) to be responsible for building the injury and violence prevention agenda and engaging staff and stakeholders in the process.

Your Committees find that as the state population increases, Hawaii residents' health needs also increase. The Department of Health must keep up with this increased demand for public health services and programs. This measure will provide funding to the Department of Health to maintain its existing staff and to hire additional professionals to ensure the continuation of crucial health care services and programs.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1740 and recommend that it pass Second Reading and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Menor, Whalen).

SCRep. 576 (Joint) Human Services and Public Housing and Intergovernmental and Military Affairs on S.B. No. 1447

The purpose of this measure is to correct chapter 356D, Hawaii Revised Statutes, relating to the Hawaii Public Housing Authority, to reflect the Legislature's intent to codify various acts into the chapter, and to make other necessary technical and housekeeping amendments.

The Hawaii Public Housing Authority submitted testimony in support of this measure.

Your Committees find that this measure makes necessary amendments to relevant sections of chapter 356D, Hawaii Revised Statutes, to ensure the codification of analogous amendments made in Act 24, Session Laws of Hawaii 2006.

Your Committees have amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Intergovernmental and Military Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 1447, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 1447, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 5. Noes, none. Excused, 1 (Sakamoto).

SCRep. 577 (Joint) Human Services and Public Housing and Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 858

The purpose of this measure is to require the Department of Land and Natural Resources to establish a Conservation Corps Program to help at-risk persons on Hawaii Island develop life and job skills to gain work experience.

Kealakehe Ahupua'a 2020 submitted testimony in support of this measure. The Department of Land and Natural Resources submitted testimony in support of the intent of this measure.

The Department of Land and Natural Resources testified, that while it agrees that at-risk persons could benefit from programs that build life skills and a sense of responsibility and stewardship of the land, it does not have the necessary personnel or expertise to effectively address the multiple life skill needs of the at-risk persons who are the focus of this measure.

Your Committees find that that Conservation Corps, such as Americorps and the Department of Land and Natural Resources' Youth Conservation Corps, place participants in natural resource conservation activities to help them develop a sense of stewardship and build valuable work experience through community service, training, and education. However, these programs are mainly offered as summer activities for students. A similar program for other segments of the population would greatly benefit at-risk groups who need assistance in developing life and job skills that will enable them to become responsible, self-reliant citizens and would thereby benefit the entire community.

It is your Committees' intent that the Conservation Corps Program be established to help at-risk persons develop life and job skills to gain work experience. Your Committees have amended this measure by:

- (1) Requiring the Department of Human Services to establish a Conservation Corps Program instead of the Department of Land and Natural Resources;
- (2) Requiring the Department of Human Services to collaborate with the Department of Land and Natural Resources and the Department of Education in the design and implementation of the Hawaii Conservation Corps Program;
- (3) Appropriating or authorizing money from Temporary Assistance for Needy Families funds to the Department of Human Services to establish and operate a Hawaii Conservation Corps Program on Hawaii Island; and
- (4) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Human Services and Public Housing and Water, Land, Agriculture, and Hawaiian Affairs that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 858, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 858, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 8. Noes, none. Excused, 1 (Hemmings).

SCRep. 578 Energy and Environment on S.B. No. 1915

The purpose of this measure is to further the State's transition to energy independence by defining hydrogen as a transportation tool and allocating funds for the development of Hawaii's hydrogen industry.

This measure makes four unspecified appropriations for fiscal year 2007-2008 for the following purposes:

- (1) For a hydrogen public awareness campaign, including funding for a hydrogen convention to be hosted in 2008;
- (2) For the development of geothermal hydrogen production infrastructure on the island of Hawaii;
- (3) For the construction of at least three hydrogen demonstration refueling stations across the State; and
- (4) Funding for the diversification of the State automotive fleet by leasing up to twelve hydrogen powered vehicles and purchase of two hydrogen internal combustion engine vehicles.

Testimony in support of this measure was submitted by the Hawaii Automobile Dealers' Association, and Energy Research Systems. Testimony in support of the intent of the measure was submitted by the 15th Airlift Wing, Hickam Air Force Base. Comments were submitted by the Department of Business, Economic Development, and Tourism and The Gas Company.

Your Committee finds that Hawaii has the highest dependence on petroleum for its energy needs of all the states in the country. This dependence makes the State extremely vulnerable to any oil embargo, supply disruption, international market dysfunction, and other uncontrollable factors. It also has negative environmental consequences.

Your Committee further finds that Hawaii has abundant renewable energy resources, including solar, geothermal, wind, biomass, and ocean energy resources. Making use of these natural, renewable energy resources will increase the State's energy self-sufficiency while improving the State's environmental health.

Your Committee amended this measure to add the following activities to the Hawaii Renewable Energy Program:

- (1) Hydrogen research and development infrastructure projects, related to geothermal hydrogen production on the island of Hawaii, biomass hydrogen production on Maui and Kauai, and hydrogen production on Oahu;
- (2) Integration of the State's automotive fleet with hydrogen powered vehicles, and the establishment of standards for hydrogen fuel vehicles;
- (3) Establishment of a hydrogen public awareness campaign; and
- (4) Advance the construction of hydrogen demonstration refueling stations throughout the State.

Your Committee further amended this measure to:

- (1) Substitute the requirement of integrating at least twelve hydrogen powered vehicles into the Hawaii Renewable Hydrogen Program law with a general requirement to integrate these vehicles into the State's automotive fleet, however the appropriation for the twelve vehicles remains unchanged;
- (2) Amending the definition of "hydrogen," to specify it is to be produced from renewable energy sources to make it consistent with the purposes of the program, and deleting the provision defining it as a transportation fuel.

As affirmed by the record of votes of the members of your Committee on Energy and Environment that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1915, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1915, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Kokubun).

SCRep. 579 (Joint) Energy and Environment and Health on S.B. No. 871

The purpose of this measure is to promote re-use and recycling to reduce solid and liquid wastes for environmental conservation.

The measure accomplishes this purpose by requiring any agency that serves meals in a state facility to establish a food waste recycling program that collects or separates at least fifty per cent of the food waste it generates.

Your Committees received testimony in support of this measure from Eco-feed, Inc. Your Committees received testimony in opposition to this measure from the Department of Health.

Your Committees find that food waste recycling is a safe and environmentally sustainable alternative for disposing of food products that are wasted or past their sell-by dates. Recycling food waste will reduce the amount of refuse that is congesting landfills, is cost-effective, and environmentally friendly. Your Committees further find that public facilities, such as schools, are the largest producers of food waste.

Your Committees have amended this measure by:

- (1) Deleting language that created the food waste recycling program and inserting language to establish a three-year food waste recycling pilot project in the public school system;
- (2) Allowing the Department of Education to determine which school districts are to participate in the pilot project;
- (3) Requiring the Department of Health to cooperate with the Department of Education in developing and implementing the components of the pilot project;
- (4) Requiring the Department of Education, with the assistance of the Department of Health, to submit interim reports of the pilot project to the Legislature no later than twenty days prior to the convening of the Regular Sessions of 2008 and 2009, and a final report to the Legislature no later than twenty days prior to the convening of the Regular Session of 2010;
- (5) Changing the funding source of the appropriation from the Environmental Response Revolving Fund to the Environmental Management Special Fund and requiring that the Department of Health transfer the moneys to the Department of Education for expenditure; and
- (6) Changing the effective date to encourage further discussion.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 871, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 871, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 2 (Hooser, Trimble).

SCRep. 580 (Joint) Energy and Environment and Health on S.B. No. 927

The purpose of this measure is to preserve the environment by managing the flow of electronic waste and reducing landfill refuse volume.

The measure accomplishes this purpose by establishing a Cathode Ray Tube Recycling and Reuse Program and prohibits the disposal of cathode ray tubes in landfills after January 1, 2009.

Your Committees received testimony in support of this measure from Covanta Energy Group and the Electronics Manufacturers Coalition for Responsible Recycling. Your Committees received testimony in opposition to this measure from the Department of Health, Recycle Hawaii, and the Hawaii Open Source Education Foundation.

Your Committees find that disposing e-waste into landfills threatens to overwhelm available landfill space and is toxic to the environment. Components of cathode ray tubes, cell phones and other electronics are released as the units are compacted and broken in the landfilling process. Most landfills have liners, but there is mounting concern that as the waste degrades, the toxins pose a serious threat to air and groundwater and ultimately to human health.

Your Committees find that establishing a Cathode Ray Tube Recycling and Reuse Program is a key element of environmental health and sustainability.

Your Committees amended this measure by:

- (1) Minimizing the recordkeeping requirement to require facilities accepting cathode ray tubes to maintain the number and weight of the cathode ray tubes that are received per day;
- (2) Exempting from the recordkeeping requirement, facilities that reuse the cathode ray tube equipment for charitable purposes;
- (3) Requiring the Department of Health, with the assistance of the counties, to adopt rules for a Cathode Ray Tube Special Waste Recycling Program;
- (4) Extending the period for a wholesaler accepting units in transfer from a retailer from ninety days to one hundred eighty days to remove the units from the retail point of collection;
- (5) Including a disposal surcharge to be deposited into the Environmental Management Special Fund in a separate account;
- (6) Changing the disposal in landfills date from January 1, 2009 to December 31, 2008;
- (7) Changing the effective date to encourage further discussion; and
- (8) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the records of votes of the members of your Committees on Energy and Environment and Health that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 927, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 927, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Ayes with Reservations, 1 (Whalen). Noes, none. Excused, 2 (Hooser, Trimble).

SCRep. 581 (Joint) Economic Development and Taxation and Energy and Environment on S.B. No. 801

The purpose of this measure is to establish the Natural Energy Laboratory of the Hawaii Innovation Corporation.

Comments were submitted by the Department of Accounting and General Services, and the Natural Energy Laboratory of Hawaii Authority. Testimony in opposition to this measure was submitted by the State Procurement Office.

Your Committees find that the purpose of the Natural Energy Laboratory of Hawaii Authority (NELHA) is to facilitate research, development, and commercialization of natural energy resources and ocean-related research, technology, and industry in Hawaii through retail, commercial, or tourism activities that will financially support that research, development, and commercialization.

Your Committees further find that the NELHA Innovation Corporation would be responsible for supporting and managing NELHA, and promoting and marketing Hawaii as a location for research and commercial natural energy activities.

It is the intent of your Committees to support the increased self-sufficiency for NELHA that this measure would provide.

Your Committees have amended this measure to insert an effective date of July 1, 2025, for the purposes of further discussion.

As affirmed by the records of votes of the members of your Committees on Economic Development and Taxation and Energy and Environment that are attached to this report, your Committees are in accord with the intent and purpose of S.B. No. 801, as amended herein, and recommend that it pass Second Reading in the form attached hereto as S.B. No. 801, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chairs on behalf of the Committees. Ayes, 7. Noes, none. Excused, 3 (English, Hooser, Trimble).

SCRep. 582 Economic Development and Taxation on S.B. No. 1228

The purpose of this measure is to establish the Honouliuli Internment Camp Memorial, and to appropriate funds for this purpose.

Testimony in support of this measure was received from the Department of Land and Natural Resources (DLNR), Historic Hawai'i Foundation, Japanese American National Heritage Coalition, and Japanese Cultural Center of Hawai'i.

Your Committee finds that the story of Hawaii World War II internees has remained largely unknown for many years. The passage of the Civil Liberties Act of 1988, and the subsequent search for former internees has led to an increased awareness of how Hawai'i's internees fared, and the knowledge that many of the former internment camps have disappeared or will in the near future.

Your Committee further finds that in January 2007, President Bush signed into law, a bill that creates a \$38,000,000 grant program to help communities preserve the sites where Japanese Americans and Japanese nationals were incarcerated. Development of memorials will be eligible for twenty-five per cent matching federal funds administered by the National Park Service.

Your Committee has heard that while there has been some effort made to compile information on Honouliuli and the other Hawaii internment camps, there is much left to do before any memorial can be established.

Your Committee believes this information is critical in preserving Hawai'i's cultural and military history, and that immediate efforts should focus on DLNR and the appropriate cultural organizations working together on the most appropriate means of memorializing a troubling time in American and Hawaii history.

Your Committee has amended this measure accordingly, by:

- (1) Deleting the proposed new section in chapter 6E, Hawaii Revised Statutes, regarding establishment of a Honouliuli Internment Memorial Camp;
- (2) Inserting a findings and purpose section; and
- (3) Requiring DLNR, with the assistance of appropriate cultural and historical organizations, to establish a process to determine the most appropriate means of memorializing the World War II Japanese internment camp experience in Hawaii.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1228, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1228, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Ayes with Reservations, 1 (Slom). Noes, none. Excused, 1 (English).

SCRep. 583 Economic Development and Taxation on S.B. No. 1366

The purpose of this measure is to develop a competitive workforce with the skill levels to support high skill, high wage industries by:

- (1) Establishing a lifelong learning program and tax credit in the Department of Labor and Industrial Relations (DLIR) to support upgraded training for the incumbent workforce;
- (2) Establishing a rapid response training program and revolving fund in the Department of Business, Economic Development, and Tourism (DBEDT) to facilitate rapid custom training for high priority business investments;
- (3) Establishing a state level program in DBEDT to attract former residents back to Hawaii; and
- (4) Merging certain workforce and economic development programs of DLIR and DBEDT.

Testimony in support of this measure was received from the Governor; Department of Business, Economic Development, and Tourism; Department of Labor and Industrial Relations; Workforce Development Council; Department of Taxation; University of Hawai'i Community Colleges; Hawai'i Pacific University; Hawaii Science and Technology Council; Applied Marine Solutions; AssistGuide, Inc.; Cellular Bioengineering, Inc.; CTA Solutions; and Hagadone Printing. The Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO submitted testimony in opposition to the transfer of personnel between agencies.

Your Committee finds that workforce development is an increasingly critical component in the success of Hawaii's emerging innovation industries. In addition to the knowledge gap, employers are now facing a severe shortage of workers, whether trained or not. Your Committee has heard that simply filling positions will become more difficult, because the number of potential Hawaii workers leaving school or training for the workplace is not keeping pace with the number of jobs created or as a result of turnover.

Your Committee finds merit in many of the concepts in this measure, particularly those directly related to skills upgrades through education and training, and increasing high skill employment opportunities.

Your Committee finds, however, that the concerns about division and personnel interagency transfers and merges are troubling. Given the apparent lack of communication between the various parties affected, it would be prudent to clarify these issues before proceeding. While the concepts may be exciting, the specific programs will have little chance for success if roles and responsibilities are not clearly delineated. Unfortunately, public sentiment about government programs is not generally very positive, so any new initiatives must be well grounded in the realities of implementation if they are to bring about positive change.

Your Committee has amended this measure accordingly, by:

- (1) Changing the appropriations to unspecified amounts and inserting an effective date of July 1, 2045, for the purposes of further discussion; and
- (2) Making technical amendments to conform the measure to the preferred drafting style.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1366, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1366, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 584 Economic Development and Taxation on S.B. No. 323

The purpose of this measure is to assist the High Technology Development Corporation, by:

- (1) Providing that the High Technology Special Fund shall not be used to fund general administrative and fiscal positions;
- (2) Clarifying that the High Technology Innovation Corporation is authorized to operate bank accounts that are necessary for the conduct of its business at both in-state and out-of-state bank locations;
- (3) Appropriating funds for the Hawaii Small Business Innovation Research Grant Program and the Hawaii Small Business Technology Transfer Program.

Testimony in support of this measure was received from the High Technology Development Corporation (HTDC); Ambient Micro, LLC; Kuehnle AgroSystems Company LLC; Kona Blue Water Farms; Navatek, Ltd.; Oceanit; Sunrise Capital, Inc.; and Technical Research Associates, Inc.

Your Committee finds that this measure would assist HTDC in providing services for Hawaii's technology businesses, particularly the successful Hawaii Small Business Innovation Research Grant Program and the Hawaii Small Business Technology Transfer Program. As Hawaii focuses on the economic opportunities provided by emerging and innovative industries, programs such as these are invaluable.

It is the intent of your Committee to support increased financial resources for Hawaii's high technology businesses.

Your Committee has amended this measure for the purposes of further discussion by:

- (1) Replacing the appropriations with unspecified amounts; and
- (2) Inserting an effective date of July 1, 2030.

As affirmed by the record of votes of the members of your Committee on Economic Development and Taxation that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 323, S.D. 1, as amended herein, and recommends that it be referred to the Committee on Ways and Means, in the form attached hereto as S.B. No. 323, S.D. 2.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (English).

SCRep. 585 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1030

The purpose of this measure is to require the Department of Land and Natural Resources to map and record the location of inadvertently discovered human remains and to appropriate funds therefor.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources (DLNR), the Office of Hawaiian Affairs, the Society for Hawaiian Archaeology, and one individual.

Your Committee finds that under the existing law, the management of burial sites in Hawaii that are over fifty years old falls under the purview of the Historic Preservation Division of the DLNR. The Historic Preservation Division works in conjunction with other cultural organizations when burial remains related to their specific ethnic group are discovered. There are five Island Burial Councils that are administratively attached to the Historic Preservation Division for the purpose of addressing concerns relating to Native Hawaiian burial sites.

Your Committee further finds that the maintenance of information on the location of human remains that have been inadvertently discovered, whether they are preserved in place or relocated, is necessary to ensure the provision of the additional protection for Native Hawaiian burial sites that the law currently provides. However, due to the sensitive nature of the information regarding the location of human remains, your Committee believes that such information should not be made available to the general public through recordation with the Bureau of Conveyances. Instead, the DLNR should be required to keep records of the information for disclosure to the appropriate parties. Although the DLNR is already tasked with maintaining records on the locations and descriptions of Native Hawaiian burial sites, current practices underscore the need to explicitly require the DLNR to maintain records on the location of human skeletal remains, as determined by use of a global positioning system device. This requirement will further ensure that the information will be readily available to the appropriate individuals.

Accordingly, your Committee has amended this measure by:

- (1) Removing the amendment to section 92F-14, Hawaii Revised Statutes, that categorized information on the location of inadvertently discovered Native Hawaiian burial sites as information to which there is a significant privacy interest;
- (2) Specifying that DLNR records relating to the location and description of inadvertently discovered human remains and sites of relocated burials or human remains are confidential, if deemed sensitive by an Island Burial Council;
- (3) Removing the requirement that a record of the location of burial sites be recorded with the Bureau of Conveyances; and
- (4) Requiring the DLNR to maintain records of information on the location of any inadvertently discovered human skeletal remains, as determined through the use of a global positioning system device.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1030, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1030, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 5. Noes, none. Excused, none.

SCRep. 586 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1705

The purpose of this measure is to assist in the management of the Molokai Irrigation System by expanding the Molokai Irrigation System Water Users Advisory Board and transforming the board into a governing board with the authority to manage the irrigation system.

Specifically, this measure amends section 167-23, Hawaii Revised Statutes, by:

- (1) Changing the name of the Board from the Molokai Irrigation System Water Users Advisory Board to the Molokai Irrigation System Governing Board;
- (2) Adding five additional members to the Board who will all be homestead farmer users on Molokai, and be appointed by the Governor from a list of nominees submitted by the Hoolehua Homesteaders Association, Molokai Homestead Farmers Alliance, and Hoolehua Homestead Agriculture Association; and
- (3) Permit the Board to manage the Molokai Irrigation System rather than merely advise the Department of Agriculture on matters of concern to the users of the system.

Testimony in support of this measure was submitted by a Council Member of the Maui County Council and one individual. Testimony in opposition to this measure was submitted by the Department of Agriculture. The Department of Hawaiian Home Lands and the Office of Hawaiian Affairs submitted comments.

Water is a vital component to a vibrant diversified agricultural industry. The Molokai Irrigation System that provides farmers and its other users with water has an advisory board, which advises the Department of Agriculture on matters of concern to the users of the system. Your Committee finds that due to the importance of the irrigation system to its users on Molokai, increasing the stakeholders who serve on the Board and allowing the Board to manage the irrigation system will provide a better method for the users to govern the system upon which they rely so heavily.

Your Committee recognizes the disrepair of the Molokai Irrigation System and the dire need for improvements to operate the system to its full potential in terms of its capacity realized. Improvements include the clearing of all transmission line vents and pet cock valves, repair to the generators that service the system, and the need for better vehicles to access the entire system.

Accordingly, your Committee has amended this measure by:

- (1) Amending section 167-23, Hawaii Revised Statutes, further by:
 - (A) Reducing the number of homestead farmer users on the Board from six to four members;
 - (B) Adding an additional nonhomestead farmer user on Molokai on the Board;
 - (C) Adding a designee of the Department of Agriculture on the Board;
 - (D) Allowing the Board to elect a chairperson and serve on the Board for four-year terms;
 - (E) Subjecting the board meetings to the sunshine law provisions under chapter 92, Hawaii Revised Statutes;
- (2) Establishing the Molokai Irrigation System Special Fund into which is deposited fifty-five per cent of receipts and revenues collected from the users fees of the Molokai Irrigation System and any legislative appropriations for the purpose of repair and maintenance of the Molokai Irrigation System; and
- (3) Making technical, nonsubstantive amendments for the purposes of clarity and style.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1705, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1705, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 587 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1941

The purpose of this measure is to appropriate funds for the repair and maintenance of irrigation systems and to authorize the issuance of general obligation bonds for capital improvement projects for irrigation systems throughout the State.

Specifically, this measure:

- (1) Authorizes the issuance of \$7,036,000 in general obligation bonds to the Department of Agriculture for system repair and maintenance for East Kaua'i, Waimanalo, Moloka'i, and Lower Hamakua;
- (2) Appropriates \$7,036,000 for system repair and maintenance of East Kaua'i, Waimanalo, Moloka'i, and Lower Hamakua; and
- (3) Appropriates \$11,000,000 in general obligation bonds to be deposited into the Irrigation Repair and Maintenance Special Fund for repair and maintenance of irrigation systems in East Kaua'i, Waimanalo, Moloka'i, Upcountry Maui, Ka'u, Honomalino, Wahiawa, and other privately-owned irrigation systems on former sugarcane and pineapple plantation lands that have been converted to diversified agriculture.

Your Committee received testimony in support of this measure from the Department of Agriculture, the Agribusiness Development Corporation, the Hawaii Farm Bureau Federation, the Hawaii Agriculture Research Center, and one individual.

Your Committee finds that this measure will help to ensure that irrigation water continues to be available to farms throughout the State. The repair and maintenance of these specific irrigation systems will restore the systems' ability to operate optimally and will increase the number of farms and acreage that can benefit from these existing irrigation systems.

Your Committee recognizes that the sum of \$11,886,000 was appropriated for the repair and maintenance of irrigation systems including the East Kaua'i irrigation system, the Waimanalo irrigation system, the Moloka'i irrigation system, Waimea irrigation system, and the Lower Hamakua irrigation system under Act 233, Session Laws of Hawaii 2006. Section 7 of Act 233, Session Laws of Hawaii 2006, directs that the appropriation for these capital improvement irrigation repair and maintenance projects will not lapse at the end of the 2006-2007 fiscal year and any unencumbered amounts as of June 30, 2008, will lapse. Thus, your Committee finds that these capital improvement program appropriations are still in effect.

Accordingly, your Committee has amended this measure by:

- (1) Deleting the provision that authorizes the Director of Finance to issue general obligation bonds in the sum of \$7,036,000 for the repair and maintenance of irrigation systems for the East Kaua'i irrigation system, the Waimanalo irrigation system, the Moloka'i irrigation system, and the Lower Hamakua irrigation system, and replacing it with an appropriation from general revenues;
- (2) Deleting the provision that appropriates \$7,036,000 for system repair and maintenance of East Kaua'i irrigation system, Waimanalo irrigation system, Moloka'i irrigation system, and Lower Hamakua irrigation system; and
- (2) Making technical, nonsubstantive amendments for the purposes of style and consistency.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1941, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1941, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Fukunaga).

SCRep. 588 Water, Land, Agriculture and Hawaiian Affairs on S.B. No. 1946

The purpose of this measure is to ensure the safety and maintenance of dams and reservoirs by enhancing a program for monitoring the safety and enforcing the safety provisions of dams and reservoirs throughout the State.

Specifically, this measure adopts the statutory amendments proposed in the *Report of the Independent Civil Investigation of the March 14, 2006, Breach of Ka Loko Dam* submitted by the Special Deputy Attorney General appointed to investigate the dam breach, by:

- (1) Amending chapter 179D, Hawaii Revised Statutes, to enhance, broaden, balance, and clarify the provision under chapter 179D; and
- (2) Adding a new part to chapter 179D, Hawaii Revised Statutes, which establishes a dam and reservoir safety program, including a dam safety special fund to carry out the purposes of the program.

Testimony in support of this measure was submitted by the Department of Land and Natural Resources, the Department of the Attorney General, and the Office of Hawaiian Affairs. Testimony in opposition to this measure was submitted by Kamehameha Schools.

The Kaloko Reservoir Dam collapsed on March 14, 2006, on the island of Kauai, resulting in the loss of seven lives, massive flooding, and extensive property damage. This tragic incident led to and generated concerns about the safety of Hawaii's dams and reservoirs, and questions regarding liability and the cause of this massive disaster.

The Special Deputy Attorney General Selection Committee was created under House Concurrent Resolution No. 192 (2006) to select a Special Deputy Attorney General to independently and impartially investigate the Kaloko Dam breach. The scope of the Special Deputy Attorney General's duties was limited to a civil investigation of the role and possible culpability of the State, the County of Kauai, the private landowners, and other parties. The Special Deputy was requested to submit a written report of his findings and recommendations, including any proposed legislation that could help prevent another similar tragedy from occurring, to the Legislature prior to the convening of the 2007 Regular Session.

A report was submitted to the Legislature in January 2007, which addressed the problems of the lack of maintenance and the absence of an emergency overflow at the Kaloko Dam. The report indicated that the lack of a spillway, which was filled in 1997, as well as other circumstantial evidence, was the likely cause of the dam overflowing. The report also indicated that the failure may have also been caused by internal erosion as a consequence of persistent seepage within the dam wall. Lastly, the report offered proposed amendments to chapter 179D, Hawaii Revised Statutes, and title 13, chapter 190, Hawaii Administrative Rules.

Your Committee finds that adopting the proposed legislation relating to dam and reservoir safety will enable the State to increase the effectiveness of its dam safety program under chapter 179D, Hawaii Revised Statutes, by strengthening the monitoring and enforcement measures that provide dam and reservoir safety throughout the State and creating a dam safety special fund to carry out the purposes of the program.

Your Committee has amended this measure to affect accountability by adopting several amendments suggested by the Department of Land and Natural Resources by:

- (1) Adding several definitions and deleting the definition for "dam rehabilitation loan program" under section 179-3, Hawaii Revised Statutes;
- (2) Providing a stiffer penalty for unlawful conduct under section 179D-5, Hawaii Revised Statutes, by replacing misdemeanor with a class C felony;
- (3) Expanding the powers and duties of the Board of Land and Natural Resources under section 179D-6, Hawaii Revised Statutes;
- (4) Deleting the provisions under section 179D-8, Hawaii Revised Statutes, and adding new language relating to violations, penalties, and fees under chapter 179D, Hawaii Revised Statutes;
- (5) Extending the start date in which the Department of Land and Natural Resources has to adopt the necessary rules to effectuate the purposes of chapter 179D, Hawaii Revised Statutes from February 1, 2007, to July 1, 2007;
- (6) Making amendments to the new part added to chapter 179D, Hawaii Revised Statutes, titled "Dam and Reservoir Safety" by:
 - (A) Clarifying that the State and its agents will be allowed entry upon property for the purposes of taking emergency remedial actions;
 - (B) Clarifying that the Department of Land and Natural Resources will provide coordination and assistance to the proper state or county agencies to maintain control of a dam or reservoir that has been determined to be dangerous to life or property until the danger is mitigated or abated;
 - (C) Strengthening and broadening the scope of provisions relating to the establishment and purposes of a Dam Safety Special Fund;
 - (D) Deleting the provisions that establish a dam rehabilitation loan program due to the Department of Land and Natural Resources' beliefs that the loan program will draw necessary resources and focus away from the immediate priorities of the dam safety program;
 - (E) Clarifying the types of information that are required to be included in the annual report submitted to the Legislature; and
 - (F) Adding a new section to the new part relating to the requirements and responsibilities of dam owners; and
- (7) Adding an appropriation amount of \$2,000,000 from the general fund to be deposited into the Dam Safety Special Fund;
- (8) Adding an appropriation amount of \$2,000,000 to be expended by the Department of Land and Natural Resources from the dam safety special fund to carry out the purposes of the dam and reservoir safety program; and
- (9) Making technical, nonsubstantive amendments for the purposes of style and consistency.

Your Committee believes that this measure, as amended, further ensures and emphasizes the safety and maintenance of dams and reservoirs, which fulfills the intent of this measure.

As affirmed by the record of votes of the members of your Committee on Water, Land, Agriculture, and Hawaiian Affairs that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1946, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1946, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 4. Noes, none. Excused, 1 (Tokuda).

SCRep. 589 Human Services and Public Housing on S.B. No. 428

The purpose of this measure is to appropriate funds for the Blueprint for Change Project.

One individual submitted testimony in support of this measure. The Department of Human Services submitted testimony in support of the intent of this measure.

Your Committee finds that, in response to the need for child welfare reform, Senate Concurrent Resolution No. 89, (1994), created a child welfare services reform task force, known as the Blueprint for Change Task Force, to develop a blueprint for reform in child welfare services. The task force found a need to provide coordinated and comprehensive community-based services to families at risk for child abuse and neglect.

As a result of the work of the Blueprint for Change Task Force, the Legislature enacted Act 302, Session Laws of Hawaii 1996, to create "neighborhood places" or sites around the State that enable professionals to work with families identified by the child welfare system or by community members as families at risk for child abuse and neglect. It is through the neighborhood places that families can receive necessary services before their risk level rise to the point of more costly intervention efforts within the child welfare system. Without continued funding for the Blueprint for Change Project, the Neighborhood Places Program will not be able to continue to carry out important child welfare reform and assist at-risk families

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 428, S.D. 1, and recommends that it be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 590 Human Services and Public Housing on S.B. No. 248

The purpose of this measure is to appropriate funds for the State Commission on Fatherhood to hire an executive director and staff.

The State Commission on Fatherhood, the Children's Rights Council, and two individuals submitted testimony in support of this measure.

Your Committee finds that an executive director and staffed office will provide a key point of contact that can work with policymakers, state agencies, and the public on fatherhood issues. According to the testimony, the staff will also enable the State Commission on Fatherhood to successfully accomplish its strategic plan, including the publication of an annual report on the status of fatherhood issues in Hawaii.

It is your Committee's intent to support the State Commission on Fatherhood. Your Committee has amended this measure by making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 248, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 248, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 591 Human Services and Public Housing on S.B. No. 740

The purpose of this measure is to expand the provisions of the Individual Development Accounts Law by:

- (1) Repealing the five year limitation on direct state funding to fiduciary organizations;
- (2) Requiring the State to provide technical and administrative assistance to fiduciary organizations;
- (3) Permitting qualified expenditures for auto purchases;
- (4) Raising the limitation on the amount fiduciary organizations may use to cover administrative costs;
- (5) Permitting the State to utilize federal funds for matching funds; and
- (6) Making an appropriation to the Department of Human Services for fiduciary organizations.

The Hawai'i Alliance for Community-Based Economic Development and one individual submitted testimony in support of this measure. The Department of Human Services submitted testimony in support of the intent of this measure.

According to the Department of Human Services, it supports the expansion of the Individual Development Account program with the use of Temporary Assistance for Needy Families funds, and requests that the cap on the Department of Human Services' Temporary Assistance for Needy Families expenditures be raised to implement this measure.

Your Committee finds that economic stability does not arise solely from income. Financial assets, such as cash savings, stocks, bonds, and home and business equity, are a critical component of economic security. Financial assets offer individuals a viable and hopeful future, stimulate development of human and other capital, and enhance the welfare of children.

Changes to the existing Individual Development Accounts Law could help more individuals take advantage of this asset building tool. An individual development account enables a participant to receive a match for every dollar that the participant saves. Moneys in the account can then be used for qualified expenditures such as costs associated with first homeownership, post-secondary education, vocational training, and small or micro-business capitalization.

It is your Committee's intent to help provide asset building opportunities for Hawaii residents. Your Committee has amended this measure by:

- (1) Removing the \$100,000 cap on grants to entities authorized to conduct an individual development account program;
- (2) Clarifying that the Department of Human Services is the state agency responsible for administering chapter 257, Hawaii Revised Statutes; provided that the Department of Human Services may contract with one or more agencies, as appropriate, to select, fund, and monitor fiduciary organizations in the administration of the chapter;

- (3) Appropriating or authorizing money from Temporary Assistance for Needy Families funds to the Department of Human Services to implement the chapter; and
- (4) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 740, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 740, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Hemmings).

SCRep. 592 Human Services and Public Housing on S.B. No. 1190

The purpose of this measure is to establish an Office of the Long-Term Care Ombudsman within the Executive Office on Aging, and appropriate funds for the office to hire additional staff and to support the office's operating costs to ensure adequate services on the neighbor islands.

The Department of Health submitted testimony in support of the intent of this measure. The Long-Term Care Ombudsman, the Policy Advisory Board for Elder Affairs, the National Association of Social Workers, Kokua Council, and four individuals submitted testimony in support of this measure.

Your Committee received a fiscal impact statement from the Department of Health that this measure, if passed, would cost the State approximately \$341,980 for fiscal year 2007-2008, and \$341,980 for fiscal year 2008-2009. In addition, the Long-Term Care Ombudsman provided a statement that this measure, if passed, would cost the State approximately \$311,628 for fiscal year 2007-2008, and \$236,628 for fiscal year 2008-2009.

Your Committee finds that the Executive Office on Aging's Long-Term Care Ombudsman Program is mandated by the United States Administration on Aging through the Older Americans Act. The Long-Term Care Ombudsman currently advocates for and protects the rights of residents of nursing homes, adult residential care homes, assisted living facilities, and other long-term care facilities. However, there is no statutory provision for the establishment of an Office of the Long-Term Care Ombudsman.

The program is staffed by the Long-Term Care Ombudsman, one Long-Term Care Ombudsman specialist, and one volunteer coordinator. The Long-Term Care Ombudsman Program serves over eight thousand residents in approximately seven hundred thirty-one licensed facilities statewide. The Long-Term Care Ombudsman Program needs to hire regional program specialists to better provide for residents of long term care facilities on the neighbor islands.

It is your Committee's intent to formally establish an Office of the Long-Term Care Ombudsman pursuant to the federal Older Americans Act, as amended. Your Committee has amended this measure by:

- (1) Updating provisions in accordance with the federal Older Americans Act, as amended, including:
 - (A) Making it a misdemeanor for any individual to wilfully interfere with the Long-Term Care Ombudsman or designee;
 - (B) Requiring long-term care facilities to provide brochures to their residents, and post a poster in a conspicuous location with information, regarding the Office of the Long-Term Care Ombudsman;
 - (C) Requiring the Long-Term Care Ombudsman and any designee, employee, or volunteer to be free of conflict;
 - (D) Defining "conflict of interest" and amending the definition of "long-term care facility";
 - (E) Enabling a complainant or resident, under certain circumstances, to consent orally to the disclosure of the complainant's or resident's identity; and
 - (F) Requiring the Department of Health to adopt rules, including the establishment of administrative fines or other penalties, for violation of the section pertaining to access to long-term care facilities;
- (2) Changing the appropriation sum from \$341,980 to \$311,628 for fiscal year 2007-2008, and from \$341,980 to \$236,627 for fiscal year 2008-2009; and
- (3) Making technical, nonsubstantive changes for the purposes of clarity, consistency, and style.

As affirmed by the record of votes of the members of your Committee on Human Services and Public Housing that is attached to this report, your Committee is in accord with the intent and purpose of S.B. No. 1190, as amended herein, and recommends that it pass Second Reading in the form attached hereto as S.B. No. 1190, S.D. 1, and be referred to the Committee on Ways and Means.

Signed by the Chair on behalf of the Committee. Ayes, 3. Noes, none. Excused, 1 (Sakamoto).

SCRep. 593 Human Services and Public Housing on S.B. No. 238

The purpose of this measure is to increase the reimbursement rate for Medicaid and QUEST psychiatric services according to county population, and to appropriate funds for the reimbursement rate increase.

Hawaii Medical Service Association submitted testimony in support of this measure. Kahi Mohala Behavioral Health submitted testimony in support of the intent of this measure. The Department of Human Services submitted comments.

Your Committee finds that this measure will improve the provision of mental health care in Hawaii.

It is your Committee's intent that the appropriated funds will be given to the QUEST plans to increase the psychiatrists' reimbursement. Your Committee has amended this measure by:

- (1) Adding a provision that ensures that health maintenance organizations and prepaid health plans will not be required to increase reimbursement rates for psychiatric services until the Department of Human Services makes adjustments to the rate of payment per participating recipient amounts;
- (2) Changing the rate formula to a percentage of the Medicare rates; and
