#### HOUSE OF REPRESENTATIVES TWENTY-FOURTH LEGISLATURE, 2008 STATE OF HAWAII

### H.B. NO. 2821

#### A BILL FOR AN ACT

RELATING TO AGRICULTURE.

#### BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

SECTION 1. In 1978, voters approved article XI, section 3,
 of the Constitution of the State of Hawaii, which set out the
 framework for state policies to promote agriculture and the
 conservation of productive agricultural lands in the State.
 Article XI, section 3, reads as follows:

6 "The State shall conserve and protect agricultural lands,
7 promote diversified agriculture, increase agricultural self
8 sufficiency and assure the availability of agriculturally
9 suitable lands. The legislature shall provide standards and
10 criteria to accomplish the foregoing.

Lands identified by the State as important agricultural lands needed to fulfill the purposes above shall not be reclassified by the State or rezoned by its political subdivisions without meeting the standards and criteria established by the legislature and approved by a two-thirds vote of the body responsible for the reclassification or rezoning action."

1 To address the issue of important agricultural lands, Act 183, Session Laws of Hawaii 2005, was enacted. Act 183 2 3 established standards, criteria, and mechanisms to identify 4 important agricultural lands and to implement the intent and 5 purpose of article XI, section 3, of the Hawaii state 6 constitution. 7 Act 183 also recognized that while the supply of lands 8 suitable for agriculture is critical, the long-term viability of 9 agriculture also depends on other factors. These factors 10 include: 11 (1)Commodity prices; Availability of water for irrigation; 12 (2)13 Agricultural research and outreach; (3)14 (4)Application of production technologies; 15 (5)Marketing; and Availability and cost of transportation services. 16 (6) 17 Hawaii's agricultural producers face operating costs that increasingly threaten the viability of their agricultural 18 19 operations and the sustainability of agriculture in Hawaii. The 20 legislature further finds that opportunities should be made for 21 farmers and landowners with the ability to promote the long-term 22 viability of the agricultural use of land.
