
A BILL FOR AN ACT

RELATING TO FAMILY PLANNING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. In 2006, the Guttmacher Institute, a leading
2 national policy and research agency, published a report ranking
3 Hawaii fiftieth among the states in public funding for women
4 accessing contraceptive services and supplies. The Guttmacher
5 Institute report estimated that approximately sixty two thousand
6 women in Hawaii need publicly supported contraceptive services
7 and supplies because they have incomes below two hundred fifty
8 per cent of the federal poverty level or are sexually active
9 teenagers. In response to this report, Hawaii state legislature
10 in 2006 adopted H.C.R. No. 226, H.D. 1, which requested the
11 department of health to convene a working group to determine
12 family planning funding needs for legislative consideration.

13 The department of health's family planning program convened
14 a series of working group meetings, with twelve organizations
15 represented, to determine the family planning funding needs. On
16 November 20, 2006, the family planning program issued a report
17 with its findings and recommendations. To effectively improve
18 the State's reproductive health services and reduce unintended

1 pregnancies in Hawaii, the H.C.R. No. 226, H.D. 1 working group
2 recommended that clinical services, health education, and
3 outreach services be expanded and upgraded as a system to
4 improve access to these currently fragmented services.

5 The H.C.R. No. 226, H.D. 1 working group found that Hawaii
6 reduced its state funds for publicly supported family planning
7 services by ninety per cent in the mid nineties and has never
8 reinstated this funding. In addition, Hawaii currently has the
9 twelfth highest teen pregnancy rate in the nation.

10 The H.C.R. No. 226, H.D. 1 working group also recommends
11 that increased public awareness of the health benefits of
12 planned pregnancy, use of contraceptives, child spacing, and
13 clinic locations is crucial to reducing Hawaii's unintended
14 pregnancy rate.

15 The purpose of this Act is to provide an integrated and
16 comprehensive approach to family planning and contraceptive
17 services for Hawaii's women, teens, and men by:

- 18 (1) Providing funding for family planning and
19 contraception services; and
20 (2) Providing funding for family planning health education
21 and outreach services.

1 SECTION 2. There is appropriated out of the general
 2 revenues of the State of Hawaii the sum of \$2,443,750, or so
 3 much thereof as may be necessary for fiscal year 2007-2008, and
 4 the same sum, or so much thereof as may be necessary for fiscal
 5 year 2008-2009, for family planning and contraceptive services.

6 The sum appropriated shall be expended by the department of
 7 health for the purposes of this section.

8 SECTION 3. There is appropriated out of the general
 9 revenues of the State of Hawaii the sum of \$1,540,000, or so
 10 much thereof as may be necessary for fiscal year 2007-2008, and
 11 the same sum, or so much thereof as may be necessary for fiscal
 12 year 2008-2009, to: increase the family planning health
 13 educator contracts to full-time; double the number of health
 14 educators statewide; add funding for educational materials,
 15 multi-media equipment, and training; and add new and innovative
 16 outreach services of hard-to-reach populations.

17 The sum appropriated shall be expended by the department of
 18 health for the purposes of this section.

19 SECTION 4. This Act shall take effect on July 1, 2007.
