

EXECUTIVE CHAMBERS

LINDA LINGLE GOVERNOR

SENATE COMMITTEE ON WAYS AND MEANS EXECUTIVE BIENNIUM BUDGET 2009 - 2011 JANUARY 12, 2009

BUDGET TESTIMONY OFFICE OF THE GOVERNOR

The Office of the Governor strives to assure the effectiveness and efficiency of state programs and statewide initiatives by providing Executive direction, policy development, program coordination, communications, planning and budgeting.

The Office of the Governor focuses effort toward the well-being of the citizens of Hawaii by ensuring that State Government programs are effectively managed within and between departments; that executive branch policies are properly executed through laws, executive orders, policy statements, and memoranda; and that these policies are clearly and concisely articulated; and that the management of the state workforce is accomplished in a fair and equitable manner. Major Activities and funding requests for FB 09-11 for each of the Office of the Governor's Program ID/Org in GOV 100 are summarized below in Table 2.

Budget Testimony for the Committee on Ways and Means Office of the Governor (GOV) January 12, 2009

The Office of the Governor is comprised of one program: GOV 100, with 37.00 FTE permanent positions and 29.00 FTE temporary positions. There are no proposed changes or amendments to the departmental organization chart for FY 10 & FY 11.

In the current fiscal year (FY 09) the Office of the Governor has observed a \$148,493 reduction in its operating budget through restrictions on spending. Through adjustments that include the redistribution of work activities, the effect of reductions to the budget of the Office of the Governor on departments and the public will be minimized; however the FY09 and possible other future budget reductions will result in increased workloads for staff and reduced means to fulfill the mission of the Office of the Governor.

The Office of the Governor's (GOV100) Executive Biennium Budget 2009 - 2011 request is summarized in Attachment 1 & 3. There are no additional funding requests for FB 09-11. The budget reflects a reduction of \$534,660 in each year.

The biennium budget request for fiscal years 2010 and 2011 for the Office of the Governor amounts to \$3,384,162 in each year reflecting a reduction of 14%, and is in keeping with the need for the State to address decreased revenues while still continuing to meet responsibilities and priority obligations to the public. Reductions for GOV are reflected in the following table.

OPERATIONAL BUDGET

MEASURES OF EFFECTIVENESS FOR THE OFFICE OF THE GOVERNOR:

1. The well-being of the citizens as measured by standard economic benchmarks that reflect whether essential government services are continuing to be provided in an effective manner during challenging economic times. Monitoring of conditions is assessed through measurements that include gross state product, unemployment, economic growth, new business creation, immigration, per capita income, and capital formation. Budget Testimony for the Committee on Ways and Means Office of the Governor (GOV) January 12, 2009

- 2. The social well-being of the citizens as measured by standard benchmarks such as infant mortality, longevity, educational achievement, family formation, homeownership, environmental cleanliness, leisure time, charitable giving, crime statistics, and overcrowding.
- The accomplishments that can be attributed to programs and initiatives that have resulted from Departments working cooperatively across departmental divisions to deliver a public service at the lowest possible cost.
- 4. The number of bills the Executive and Legislative Branches have successfully developed and enacted for the betterment and benefit of the people and institutions of the state.
- 5. The number of successful new programs that are developed and introduced to improve lives, conditions and economic opportunities in the state.
- 6. Retention, recruitment and turnover data for State workforce programs. The success of policies and programs aimed at State recruitment and retention efforts; including operational savings derived through innovative work programs that offer quality service with greater efficiency and effectiveness through lower costs.
- 7. The settlement of collective bargaining issues, stable multi-year contracts ensuring the uninterrupted delivery of public programs and the fair and equitable treatment of the government workforce. Demonstrating that all negotiated contracts are fiscally prudent and affordable and within the financial capability of the State of Hawaii.

PROGRAM PERFORMANCE RESULTS FOR THE OFFICE OF THE GOVERNOR:

The Office of the Governor continues to meet program objectives as evidenced by the social well being of its citizens measured through such standard benchmarks as: a balanced budget, programs that sustain economic success as measured by gross domestic product; longevity of the population; the delivery of health care, education, and housing; the care of the state's natural resources, environment and cultural heritage; the care of government assets; the delivery of recreational programs and transportation programs; offering safety and security to the citizens of the state and; the implementation of plans and programs for the continuing improvement and welfare of the state and its citizens.

The Office of the Governor continues to work on improvement initiatives for home ownership, and student achievement. The Office will work with relevant members of the State Government, community, and Legislature, to develop proposals to improve performance in these measures and economic benchmarks.

The Office of the Governor successfully provided management and direction in the implementation of emergency programs and relief efforts to assist the citizens of the state resulting from or due to conditions attributed to natural and man-made disasters.

Additionally, the Administration continues to share information with the media and other public information outlets about administrative programs and policy changes.

The Office of Collective Bargaining has taken steps to open up a dialogue with all bargaining units that will be involved in collective bargaining activities in the coming biennium period. Additionally, the Office has involved the personnel directors of the other covered jurisdictions, most notably the counties, at an early stage to provide clear understanding of the issues and the fiscal situation facing the State.

The Administration has primary responsibility for managing the State's six-year fiscal plan, and for making decisions on the allocation of funds. This work impacts the State's financial health and has resulted in sustained high bond ratings despite challenging economic conditions facing the country.

The Governor's Office strives to improve the quality of life for the residents of Hawaii by: continuing efforts to improve the economic and social well-being of our citizens; continuing to foster close cooperation within and between the various State departments; continuing to manage the state budget in a manner that respects taxpayer dollars and reflects the fiscal due diligence our citizens expect; planning and implementing new programs aimed at energy self sufficiency and sustainability; and continuing to introduce and encourage enactment of legislation that supports the goal of benefit to the people of the state and conveying an accurate message of our efforts to the public via the media.

The Office of the Governor budget request reflects the decisions made by B&F and the Governor. (Attachment 4) It does not include emergency requests for funding or provide for transfers of funds between programs. (Attachments 2 & 7) As of December 1, 2008, the Office of the Governor had seven (7) vacant positions. (Attachment 5)

The FB 09-11 includes a CIP budget request to fund the Project Adjustment Fund with \$1,000 in General Obligation Bond funds for FY10 and FY11. (Attachment 8)

Overall, this budget request meets the challenging objective of reducing general fund expenditures while preserving critical functions of the Office of the Governor. We respectfully request this committee's approval of the executive biennium budget for FB 09-11 for the Office of the Governor.

Table 6 Prog ID Program Performance Results

		<u>FY07</u>	FY08	
#	Measures of Effectiveness	<u>Result</u>	Result	FY09 Plan
	The well-being of the citizens as measured by standard economic benchmarks that reflect whether essential government services are continuing to be provided in an effective manner during challenging economic times. Monitoring of conditions is assessed through measurements that include gross state product, unemployment, economic growth, new business creation, immigration, per capita income, and capital formation.			The Office of the Governor continues to meet program objectives as evidenced by the social well being of its citizens measured through such standard benchmarks as: a balanced budget, programs that sustain economic success as measured by gross domestic product; longevity of the population; the delivery of health care, education, and housing; the care of the state's natural resources, environment and cultural heritage; the care of government assets; the delivery of recreational programs and transportation programs; offering safety and security to the citizens of the state and; the implementation of plans and programs for the continuing improvement and welfare of the state and its citizens.
2	The social well-being of the citizens as measured by standard benchmarks such as infant mortality, longevity, educational achievement, family formation, homeownership, environmental cleanliness, leisure time, charitable giving, crime statistics, and overcrowding.			The Office of the Governor continues to work on improvement initiatives for home ownership, and student achievement. The Office will work with relevant members of the State Government, community, and Legislature, to develop proposals to improve performance in these measures and economic benchmarks.
3	The accomplishments that can be attributed to programs and initiatives that have resulted from Departments working cooperatively across departmental divisions to deliver a public service at the lowest possible cost.			The Administration has primary responsibility for managing the State's six-year fiscal plan, and for making decisions on the allocation of funds. This work impacts the State's financial health and has resulted in sustained high bond ratings despite challenging economic conditions facing the country.
	The number of bills the Executive and Legislative Branches have successfully developed and enacted for the betterment and benefit of the people and institutions of the state.			The Office of the Governor successfully shepherded through numerous bills that reflected the priorities of the Governor and her Administration. We are hopeful that additional measures will receive favorable consideration from the Legislature during the 2009 session.
5	The number of successful new programs that are developed and introduced to improve lives, conditions and economic opportunities in the state.			The Administration continues to share information with the media and other public information outlets about the administrative programs and policy changes it is implementing.
6	Retention, recruitment and turnover data for State workforce programs. The success of policies and programs aimed at State recruitment and retention efforts; including operational savings derived through innovative work programs that offer quality service with greater efficiency and effectiveness through lower costs.			The Administration has primary responsibility for managing the State's six-year fiscal plan, and for making decisions on the allocation of funds. This work impacts the State's financial health and has resulted in sustained high bond ratings despite challenging economic conditions facing the country.
	The settlement of collective bargaining issues that result in multi- year contracts ensuring that disruptions in the delivery of public programs are minimized. The ability to the state to adequately fund these settlements without adverse impact on the taxpayers of the State of Hawaii.			The Office of Collective Bargaining has taken steps to open up a dialogue with all bargaining units that will be involved in collective bargaining activities in the coming biennium period. Additionally, the Office has involved the personnel directors of the other covered jurisdictions, most notably the counties, at an early stage to provide clear understanding of the issues and the fiscal situation facing the State.
