Comments:
What a waste of taxpayer money. End this beast.

Comments:

Please support this bill which would allow the temporary advisory committee to continue in their capacity to coordinate the efforts of making recommendations on developing a "night sky strategy". Man's effects on the environment extend even to where, when and the way lighting is used.

This could require environmental and scientific parties to be consulted for their recommendations, for example to maintain natural habitats.

Mahalo for your support of this bill.
