

STATE OF HAWAII DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES P.O. BOX 119 HONOLULU, HAWAII 96810-0119

WRITTEN COMMENTS
OF
JAN S. GOUVEIA, INTERIM COMPTROLLER
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES
TO THE
SENATE COMMITTEE
ON
WAYS AND MEANS
AND THE
HOUSE COMMITTEE
ON
FINANCE
ON
JANUARY 6, 2012

Chairs Ige, Oshiro, and members of the Committees, thank you for the opportunity to brief you today on DAGS' Executive Supplemental Budget Request.

The Department of Accounting and General Services (DAGS) encompasses a wide diversity of operations and functions. It has nine divisions and offices that range from Accounting and Auditing to Public Works, ICSD to Land Survey, and Automotive Management to Risk Management. It also has three district offices who, together with the Central Services Division, maintains and repairs over 130 government buildings statewide, almost 90 DOE schools on the neighbor islands, and even four cemeteries. Finally, the department has ten attached agencies that range from the Aloha Stadium Authority, the State Procurement Office, and the Office of Elections. Like all of our sister departments and agencies, DAGS has lost

significant human capital through Reductions-In-Force and retirements. Our department, however, was unable to truly benefit from pooling together its resources to do more with less because of the fundamental differences in the diversity of our operations.

Despite these challenging times, DAGS has remained committed to executing its core business functions in a fiscally responsible manner. It has reviewed operations to focus on essential activities, adjusted schedules, work locations, and assignments where allowable and feasible. The department is also taking advantage of these lean times to reevaluate its work processes and is challenging itself to question whether something can be done more efficiently either through the use of technology, a change in policy, or a reorganization of work flow.

Despite our diversity, all of our divisions, offices and attached agencies face the same opportunity to embrace and practice the New Day energy and initiatives. And by so doing, we are making a commitment to positively affect the living, working, and business environments of our citizens, employees and local commerce. For example, through the sheer resourcefulness of our employees, like our Risk Manager, we are able to tout that for the first time in its 21 year existence, the Office of Risk Management purchased two layers of property insurance for the entire State of Hawaii from a local company. This not only means that our local dollars are being spent at home, it is a larger testament to the stability and financial integrity of local business.

And, through dedicated employees within our Automotive Division, we were able to take advantage of American Recovery and Reinvestment Act (ARRA) funds by procuring eight electric vehicles, contracting for and installing five electric vehicle charging stations, and even installing a solar powered parking pay station at Kinau Hale. This effort used federal funds to

finance initiatives that promotes sustainability, responds to the needs of our motoring public, and provides a more convenient method to pay for public parking.

It is with this kind of discipline that the Department of Accounting and General Services submits its 2013 supplemental budget request. Outside of the Chief Information Officer's requests, our general fund request reflects a reduction of \$3.2 million from labor savings and program review initiatives, a request for \$80,000 to hire CPAs to assist in the preparation of the State's Consolidated Annual Financial Report, and a request for \$175,000 to transfer three staff and related current expenses budgeted for Washington Place to our department from the Office of the Governor. We are also requesting an emergency appropriation for the current 2012 fiscal year for \$1.725 million for the Office of Elections to cover the State's portion of leasing voting machines for the upcoming 2012 elections.

In the Executive Supplemental CIP budget, an additional \$17 million is requested for the renovation of the Kamamalu Building, which will result in a total of \$30 million for the biennium budget; \$8 million to reseal the 5th floor of the State Capitol; and \$1 million to update the Capitol District plan to more effectively and efficiently plan for state occupied facilities. The remaining \$15 million in CIP requests will be addressed by our CIO.

With our economy still in a fragile state, we remain even more committed to finding opportunities within our department to increase skilled productivity through streamlining of work flow and paper processing. To that end, we look forward to working with the CIO as he builds our new information management and technology environment to support our business needs.

Thank you for the opportunity to brief you today.

Department of Accounting and General Services

Mission Statement

To help agencies better serve the public by providing, at best value and with integrity: superior public facilities, expert technology solutions and services, operational support, fiscal guidance, oversight of administrative services and preservation and promotion of cultural heritage.

HOUSE COMMITTEE ON FINANCE SENATE COMMITTEE ON WAYS AND MEANS TESTIMONY OF THE

TESTIMONY OF THE

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES SUPPLEMENTAL BUDGET FY 2013

January 6, 2012

Context

Since FY 2008, it has been a challenge to attain our mission critical objectives with the significant loss of positions (25% of general funded positions) as a result of fiscal action taken to address the decline in general fund revenue. Unfortunately, fiscal 2011 brought on another crisis with the March 2011 Japan Tsunami. As a result of yet another period of general fund revenue decline, hiring was suspended to lessen the projected year end deficit.

To meet our mission critical objectives, we have reviewed our operations to focus on essential activities, adjusted schedules, work locations, and assignments where allowable and feasible. Staffing our vacant positions is our immediate priority to ensure that the authorized positions we have are filled allowing us to operate at maximum operational capacity. Until the United Public Workers (UPW) labor contract was ratified, we refrained from filling our UPW vacancies to ensure our programs would be able to fund these positions in light of the 5% labor savings restriction. As the State economy suffered another setback from the effects of the March 2011 Japan tsunami, hiring was suspended between April and July of fiscal year 2011. In September 2011, the Governor delegated authority to fill positions to department heads and we have subsequently been aggressively pursuing the filling of our vacant positions. We are now faced with another challenge as the Department of Human Resources Development (DHRD) struggles to recruit applicants for departments. DHRD themselves, suffered significant loss of staff as a result of the reduction in force in 2009 which results in the current backlog for recruitment. As a result, of the 751 authorized positions (including 76 CIP funded), 140 or 20.3% are vacant at November 30, 2011.

For fiscal year 2012, 11 general funded positions were restored in the Information Communication Services Division (ICSD), but the division continues to be our largest challenge. The 11 positions restored represents 15% of the 74 (69 permanent and 5 temporary) positions or 36% of the staff which were lost in the reduction in force and abolishment of vacant positions in FY 10 and FY 11. Sustaining production capabilities with the loss of staff has been challenging and problems continue to rapidly become crisis. Staffing is not the only challenge facing ICSD, critical upgrades in hardware and software to migrate to newer technologies and more efficient equipment have not been done due to a lack of funding and as a result, the State's data processing capabilities are inadequate to leverage the benefits of the new technologies and are operating in an unstable computing environment.

On the flip side, the long term picture in the information processing area is bright. Fiscal year 2012 authorized the establishment of the Chief Information Officer (CIO) position and office which are attached to the department. In July 2011, the CIO's office was started with the hiring of the State's first

CIO. Subsequently, the CIO's office, the Office of Information Management and Technology (OIMT) has issued a report outlining the current level of resources and issues faced by the State's information technology offices. This is the foundation step in the determining the "gap" between where we are now and where we want to be in terms of both technology and business processes. In this regard, the executive supplemental budget has four (4) general funded requests from the OIMT totaling \$10.4 million which address business process and IT/IRM reengineering (\$5million), IT integration pilot projects (\$1.8 million), IT integration pilot project on digital archives (\$175,000) and technology triage initiatives to ensure operation of current mission critical systems (\$3.4 million). To address the archaic processes and aging hardware, the executive budget contains a \$15 million CIP request from the OIMT to commence the planning phase of the implementation of a statewide financial system to reengineer and transform the statewide financial management process. This project will utilize an enterprise resource planning system (ERP) architecture which will support integrated statewide financial activities. Additionally, the outcome of this phase will include the procurement requirements for the phase (development of solicitation document (s)) in the fiscal 2013 – 2015 biennium.

Outside of the CIO's requests, the department's general fund requests are a reduction of \$2.5 million from labor savings and program review initiatives, request for \$215,000 for restoration of artists in schools program (offsets reduction in program review initiative), request for \$175,000 to transfer staff (3) and related current expense budget for Washington Place to the department from the Office of the Governor and \$80,000 to hire CPAs to assist in the preparation of the CAFR.

The executive supplemental CIP budget of \$41 million, including the \$15 million CIO initiative previously mentioned contains three items, additional \$17 million for the Kamamalu Building (total \$33 million in the biennium), \$8 million to reseal the 5th floor of the State Capitol, and \$1 million to update the Capitol District plan to reduce leased space and consolidate department personnel to increase departmental efficiency and productivity while lowering costs (leasing expense).

As the economic recovery continues to be modest, we understand that the business as usual model is not affordable and realistic and we must invest in the future to leverage technology for the benefit of our citizens and employees. Our budget requests reflect that through the investment to achieve the New Day objectives.

Chair Oshiro and Chair Ige, my staff and I are available to answer any questions you and your committee members may have concerning our programs and the materials submitted for this hearing.

HOUSE COMMITTEE ON FINANCE SENATE COMMITTEE ON WAYS AND MEANS SUPPLEMENTAL BUDGET FOR FY 2013

TESTIMONY OF THE DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES January 6, 2012

Alternatives Considered

Our actions in the following areas are as follows:

1. Generating additional revenue for the state;

No action has been taken in this area because a significant amount of the operations of the department provide support for other executive branch agencies.

2. Shifting general funded costs operational costs to non general funds;

In previous years, we have converted all general funded staff in the Risk Management Office (AGS 203) and the State Foundation on Culture and the Arts to non general funded.

For the supplemental year, we have two requests which would eliminate general funded budget of the State Foundation on Culture and the Arts (AGS 881) of \$721,048 (net of program requests to eliminate \$936,332 and restore \$215,284) and replace it with \$721,048 from the Tourism Special Fund (the Fund). The Fund's revenue is from the Transient Accommodations Tax (TAT).

3. Consolidation or elimination of programs within your department; and

Our current assessment is that none of our programs should be eliminated. However, our managers do review our program activities to eliminate non mission critical functions.

4. Reduction of services.

Since fiscal year 2008 and the reduction of 25% of our general funded staff, our managers were forced to and continue to look for areas to reduce or eliminate services to allow us to focus and attain our core mission. As an example, in many of our state office

buildings, trash is not collected daily except for the restrooms. This reduction in service does not present a health issue and increases the utilization of our custodial staff.

^{*}Pursuant to HRS Section 103-10, payment shall be made no later than 30 calendar days following the date of receipt of the invoice or after the satisfactory delivery of the goods or performance of the services, whichever is later. The vendor/contractor is owned interest if they cannot be paid within this time period.

Pursuant to HR\$ 40-56, the person directly responsible for purchase order/contract signs a certification validating that goods and services have been received in good order and condition on the invoice.

^{*}Pursuant to HRS Section 103-10, payment shall be made no later than 30 calendar days following the date of receipt of the invoice or after the satisfactory delivery of the goods or performance of the services, whichever is later. The vendor/contractor is owned interest if they cannot be paid within this time period.

Pursuant to HRS 40-56, the person directly responsible for purchase order/contract signs a certification validating that goods and services have been received in good order and condition on the invoice.

L102 - KAMAMALU BUILDING ASBESTOS REMOVAL AND BUILDING RENOVATION

Project Information and Justification

a. Total Scope of Project.

Design and construction for complete renovation of the 75,000 gross square foot (61,000 net square foot) Kamamalu Building. The renovation includes asbestos mitigation of existing floor, wall, and ceiling materials and space planning to efficiently use the office building space for all future tenants. Note: This appropriation request for design and construction funds complements design funds appropriated for the project under Act 177, SLH 2002, Item K-17B, and is being made after voluntarily lapsing \$9.6 million of the \$12.6 million in construction funds appropriated for the project under Act 178, SLH 2005, Item K-9. The initial work for removal of asbestos-containing and other hazardous materials, interior demolition of flooring, ceilings, partitions, electrical, plumbing, and air conditioning systems is complete. This work reduced the possibility of dealing with unforeseen site conditions during the final renovation work. The additional funding is necessary to complete the design and construction of the core and shell and tenant improvements as one comprehensive project, rather than rushing to use the lapsing construction funds for phased completion. This will also allow our design team to benefit from increased access to previously hidden/inaccessible areas once the current abatement work is complete.

b. Identification of Need and Evaluation of Existing Situation.

This renovation project will help maintain our State facilities assets and provide more efficient use of this existing office building located within the high-demand Capital District. Complete renovation, which includes electrical, data, roofing, air conditioning and elevator upgrades/replacement, will allow proper space planning to better utilize the building's floor space by more efficiently accommodating office functions. The scope of work also includes ADA public accessibility modifications and the goal of meeting the State's Energy Star and LEED Silver certification directives, as is feasible.

c. Alternatives Considered and Impact If Project Is Denied.

- (1) Tearing down this facility and building a new State Office Building on the same site has been considered, but due to the parcel's small size and prevailing zoning restrictions, new construction would only yield an approximately 14,900 square foot facility.
- (2) If additional funding for the project is denied, the Kamamalu Building will remain vacant as an empty shell lacking essential building systems (air conditioning, electrical power, elevators, etc.) to support occupancy.
- (3) Denial of construction funds will also result in additional delay for completion of the project. This would be unfortunate as lease rent costs for private office space continue to rise in the downtown district.

d. Discuss What Improvements Will Take Place When Project Is Completed (including benefits to be derived and/or deficiencies this project will correct).

If the existing building is properly space planned and renovated, more State personnel can be placed into an efficiently right-sized building incorporating the latest sustainability, green building, and beneficial occupancy concepts that are economically feasible.

e. Impact Upon Future Operating Requirements (show initial and ongoing funding requirements by cost element, including position count, means of financing, fiscal year).

Normal repair and maintenance, custodial and utility costs will be required. Less funding will be spent on emergency "band-aid" repairs.

Additional Information:

None.

PROJECT INFORMATION AND JUSTIFICATION (use back if necessary):

a. Total Scope of Project.

Construction to upgrade waterproofing and reseal the fifth floor roof deck at the State Capitol Building. Design was included in the FY12 Lump Sum Maintenance of Existing Facilities - PWD fund. Work includes demolition and installation of a new roof deck system as well as necessary improvements to related building components to ensure the roof deck is both watertight and functional.

b. Identification of Need and Evaluation of Existing Situation.

The existing roofing/waterproofing system has aged beyond its useful life, and it is no longer feasible to patch-repair the roof. Replacement and upgrade of the existing system, including related building components, is necessary to ensure the roof is watertight for the office below, and functional as a roof deck for the fifth floor occupants.

c. Alternatives Considered and Impact If Project Is Deferred.

The alternative is to defer replacement and to continue to attempt to patch the roof when leaks are identified. This reactive approach would be more costly and less effective in the long run. Future costs to complete this work will increase exponentially as the system's rate of deterioriation accelerates with age.

d. Discuss What Improvements Will Take Place When Project Completed (including benefits to be derived and/or deficiencies this project intends to correct).

A new, warranted roofing system and improvements to the related building components would be installed to maintain the integrity of the building envelope and to allow for proper use of the roof deck for this historic facility.

e. Impact Upon Future Operating Requirements (show initial and ongoing funding requirements by cost element, including position count, means of financing, fiscal year).

Annual maintenance and repair costs in response to trouble calls would be reduced

T105 - LUMP SUM ADVANCE PLANNING, STATEWIDE

PROJECT INFORMATION AND JUSTIFICATION

a. Total Scope of Project:

Development and implementation of statewide space needs and building asset management programs to more effectively plan for State occupied facilities. Target areas include workforce space needs planning, civic center master plan development, and State office building asset management and development.

Project includes developing and implementing a statewide space needs and building management information database; updating the State Capital District Master Plan; planning for civic center facilities at DAGS-managed and new properties, such as in Liliha and Wahiawa, Oahu, Kahului, Maui, and Kona, Hawaii. The State Capital District Master Plan update includes planning for future disposition of Kinau Hale and Queen Liluokalani buildings in conjunction with the renovation of Kamamalu building, the possible demolition of AAFES, and the proposed Liliha Civic Center to meet current and future State office space needs.

b. Identification of Need and Evaluation of Existing Situation.

The space needs and building management information database will be used for planning purposes such as space reallocation and agency consolidation projects, new facilities needs analyses, equipment inventory listings, equipment inventory listings, space planning, building maintenance scheduling, and department relocation scenarios. Currently, DAGS has begun in-house updates of space allocations and development of a very limited computerized database containing information for the above purposes. Much more work to collect and verify information and to create a fully functional database remains.

Implementation of the original Capitol District Master Plan was never fully completed. This update of the master plan will be used to bring the project to completion. The civic center and State office building developments require planning studies to ensure optimal location and use of the sites. Looking forward, these efforts include identifying and pursuing alternative means of financing for design and construction, as needed and available.

c. Alternatives Considered and Impact If Project Is Denied:

There is no alternative. If the project is denied, DAGS will not be able to carry out our planning studies efficiently. This is because time will be wasted in the continued manual gathering and verification of data, locating and updating drawings, etc. A more comprehensive and functional database must also be programmed by specialists to be able to manage and fully utilize the pertinent information.

d. Discuss What Improvements Will Take Place When Project Is Completed (including benefits to be derived and/or deficiencies this project will correct):

Benefits of this project include:

- (1) Gather, generate, report and distribute planning study data more accurately and effectively.
- (2) Increase responsiveness to space/asset management and department relocation requests.
- (3) Ensure consistency and accuracy of asset inventories, personnel locations and space information data.

T105 – LUMP SUM ADVANCE PLANNING, STATEWIDE Page 2

- (4) Make more effective and strategic planning decisions by having a more comprehensive understanding of DAGS facility assets and how they are used.
- (5) Begin the planning process for new civic centers and State office building developments at target sites, which will help define project scope, occupancy, and funding alternatives.
- e. Impact Upon Future Operating Requirements (show initial and ongoing funding requirements by cost element, including position count, means of financing, fiscal year):

None.

U101 - STATEWIDE FINANCIAL SYTEM REENGINEERING (ERP)

Project Information and Justification

a. Total Scope of Project:

This request is to reengineer and transform the statewide financial management processes; identify all business requirements associated with a new integrated system to support the financial management activities within the State; and finally develop and execute the procurement actions (i.e., Request for Information, Request for Proposal and Quotation, and High-Level Project Plan for System Implementation) for an integrated financial management system for the State of Hawaii.

This project will:

- Perform business process reengineering activities in order to define and improve current processes within the Department of Accounting
 and General Services (DAGS), specifically Accounting and all related functions (e.g., payroll, central warrant writing, warrant
 reconciliation, and time and attendance) and Procurement, as appropriate; Budget and Finance (B&F); Department of Taxation
 (DOTAX); and to the extent appropriate the related processes within Department of Human Resources (DHRD);
- Apply a business process reengineering process that will provide near-term cost savings and will educate/train individuals within DAGS, B&F, DOTAX, and DHRD how to apply the business process reengineering methodology going forward;
- Identify all business requirements associated with a new integrated system to support the financial management activities within the State;
- Identify any necessary legislation to address the process requirements;
- Translate the business requirements into a systems requirements document (SRD) and ensures traceability to defined processes within each Department;
- Evaluate the utilization of integrated financial management systems within other States to understand lessons learned;
- Prepare and issue a Request for Information /Demonstration (RFI/D) of integrated financial management systems;
- Prepare the FY 2014 Biennial Budget Request for the purchase and a phased, statewide implementation of an integrated financial management system;
- Prepare and issue a Request for Proposal and Quotation (RFPQ) for a statewide integrated financial management system;
- Create a high-level project plan/approach for system implementation statewide including the initial steps for:
 - deploying the system in a modular manner within DAGS, B&F, DOTAX, and DHRD;
 - addressing cultural change management;
 - providing training plans for all Departments;
 - providing a communications plan; and,
 - supporting the transition from existing systems to the new integrated one.

b. Identification of Need and Evaluation of Existing Situation:

In general, the reason for this request includes the need for better decision making through the use of better information resources; IT modernization to replace obsolete legacy systems; and enabling the State to significantly improve constituent services through faster processes and more accurate and complete information.

U101 - STATEWIDE FINANCIAL SYTEM REENGINEERING (ERP)

Page 2

Specifically, based on the recent assessment of *State Services and Creation of the Information Technology Baseline Report*, prepared by SAIC, a number of issues and cost savings/avoidance opportunities were identified regarding the status of financial management activities across the State. Using this documented assessment and the input of the Departmental leadership statewide, the following provides the key reasons for this request:

- Current processes are paper-based and are people intensive at a time where staff reductions are negatively impacting the performance of these processes within the State;
- The State is not maximizing receipt of revenues due to process inefficiencies
- Current financial reports (e.g., monthly and year-to-date expenditures) lag behind actual expenditures for the Departments due to current processes and financial management system;
- The required level of analytical analysis to support projections and other financial management activities is not is not possible given the current financial management process and system;
- Numerous Departments have "procured" and implemented financial management packages in an effort to meet management and reporting needs (especially Federal grant reporting requirements);
- Other Departments are planning on implementing a financial management package in an effort to meet management and reporting needs;
- Inaccurate and non-timely entry of time and accounting information increases the State's payroll expenditures;
- Most Departments acknowledged that they were performing financial management with a variety of point solutions, custom systems, and hybrid spreadsheets and databases to pull and push information to/from the State's financial system;
- The current financial management/tracking system (FAMIS) is a 25+-year old system design that is COBOL/mainframe-based and does not facilitate information integration or manipulation or necessary analytics;
- Support for the current financial management systems hardware (an IBM mainframe) will not be available indefinitely from the manufacturer and it will continue to be costly, and further, individuals with the requisite COBOL skills will continue to be a staffing challenge;
- The three Departments that manage the State's financial position, DOTAX, B&F, and DAGS, operate in a non-integrated environment; and,
- Accrual-based accounting required for financial reporting (i.e., the Comprehensive Annual Financial Report) is manual intensive and cannot be produced within a reasonable (3-6 months after the close of the State's fiscal year).

c. Alternative Considered and Impact If Project Is Denied:

The alternative is for the Statewide financial system to continue to operate now, which is paper-based, people intensive, costly and ineffective to meet the current and growing needs of the State.

d. Discuss What Improvements Will Take Place When Project Is Completed (including benefits to be derived and/or deficiencies this project will correct):

This request aligns to the Governor's information technology transformation initiative. Additionally, this project will comply with the defined enterprise architecture and tactical plans that will be identified in the IT Strategic Plan, which will be delivered by the Chief Information Officer in July 2012.

U101 - STATEWIDE FINANCIAL SYTEM REENGINEERING (ERP)

Page 3

e. Impact Upon Future Operating Requirements (show initial and ongoing funding requirements by cost element, including position count, means of financing, fiscal year):

As a measure of effectiveness, the system requirements resulting from the business process reengineering will be fully aligned with the IT Strategic Plan that will be completed by Hawai i's Chief Information Officer (CIO) by July 2012. In addition, it will also comply with the defined enterprise architecture and tactical plans defined by the CIO.
