TESTIMONY ON HOUSE BILL 651  
A BILL FOR AN ACT RELATING TO ELECTRONIC PRESCRIPTIONS

By  
Ted Sakai, Director  
Department of Public Safety

House Committee on Judiciary  
Representative Karl Rhoads, Chair  
Representative Sharon E. Har, Vice Chair

Tuesday, February 26, 2013, 2:05 p.m.  
State Capitol, Room 325

Chair Rhoads, Vice Chair Har, and Members of the Committee:

The Department of Public Safety (PSD) **supports** House Bill 651 which proposes to amend Hawaii's Uniform Controlled Substances Act in Chapter 329, Hawaii Revised Statutes, by adding definitions consistent with Federal law, clarifying the conditions for electronic transmittal of prescriptions, and adding and clarifying violations of prohibited acts. House Bill 651 would update Hawaii's controlled substance laws to allow for electronic controlled substance prescriptions. The amendments being proposed are consistent with that of Federal law under 21 CFR Parts 1300, 1304, 1306, and 1311 Electronic Prescriptions for controlled substances.

Thank you for the opportunity to testify on this matter.

The Honorable Karl Rhoads, Chair  
The Honorable Sharon Har, Vice Chair

House Committee on Judiciary

Tuesday, February 26, 2013; 2:05 p.m.  
State Capitol Conference Room 325

**RE: HB 651-Relating to Electronic Prescriptions- In Support**

Chair Rhoads, Vice Chair Har and members of the Committee:

My name is Todd Inafuku and I am testifying on behalf of CVS Caremark (CVS) in support of HB 651, Relating to Electronic Prescriptions. This bill will allow practitioners, who are registered and authorized to prescribe controlled substances, to electronically prescribe and electronically convey prescriptions for controlled substances listed in Schedules II, III, IV and V to a pharmacy of the patient's choice. The electronic conveyance of prescriptions will provide practitioners with a safer, more secure, and timely means to prescribe controlled substances in addition to the traditional method of providing the patient with a handwritten prescription for controlled substances listed in Schedules II, III, IV, and V, or orally ordering or conveying a fax of a written prescription to a pharmacy for controlled substances listed in Schedules III, IV and V.

Thank you for the opportunity to testify on this matter,

Todd K. Inafuku  
Cell phone (808) 620-2288

## Testimony of Phyllis Dendle

Before:  
House Committee on Judiciary  
The Honorable Karl Rhoads, Chair  
The Honorable Sharon E. Har, Vice Chair

February 26, 2013  
2:05 pm  
Conference Room 325

**HB651       RELATING TO ELECTRONIC PRESCRIPTIONS**

Chair Rhoads and committee members thank you for this opportunity to provide testimony on HB651 which permits the use of electronic prescriptions for the dispensing of controlled substances.

**Kaiser Permanente Hawaii supports this bill.**

This bill allows another option for controlled substances prescriptions to arrive to pharmacies, in addition to the current "patient picks up prescription from their doctor and drops the prescription off at the pharmacy" option currently in use for most of these drugs. Besides making it more convenient and timely for doctors and patients, the electronic transmission of controlled substances prescriptions provides for safe and secure transfer of prescription information from prescriber to pharmacist. It eliminates the forgeries, lost prescription documents, and illegible handwriting, that contribute to medication errors, wasted time and increased frustration for patients who need these medicines. This bill also aligns the State Narcotics Enforcement Division with Federal Drug Enforcement Agency requirements to enable the electronic transmission of prescriptions for this category of drugs.

Thank you for your consideration.

**Testimony of  
Gary M. Slovin / Mihoko E. Ito  
on behalf of  
Walgreens**

DATE: February 25, 2013

RE: **H.B. 651 – Relating to Electronic Prescriptions**  
**Hearing Date: Tuesday, February 26, 2013 at 2:05 p.m.**  
**Conference Room 325**

---

Dear Chair Rhoads and Members of the Committee on Judiciary:

We submit this testimony on behalf of Walgreen Co. (“Walgreens”).

Walgreens operates more than 8,200 locations in all 50 states, the District of Columbia and Puerto Rico. In Hawai‘i, Walgreens now has 11 stores on the islands of Oahu, Maui and Hawai‘i.

Walgreens **supports** H.B. 651, which amends the Uniform Controlled Substances Act in Chapter 329, Hawaii Revised Statutes, by adding definitions consistent with federal law, clarifying the conditions for electronic transmittal of prescriptions, and adding and clarifying violations of prohibited acts.

The measure would allow practitioners to electronically prescribe controlled substances and to convey the prescription directly to the pharmacy of the patient’s choice. It will also provide practitioners with a safer, more secure, and timely means to prescribe controlled substances in addition to the conventional means of prescribing controlled substances. Passage of this legislation will continue to move forward the acceptance of e-prescribing, thus improving patient care.

Thank you very much for the opportunity to testify on this measure.

The Honorable Sharon E. Har, Vice Chair

House Committee on Judiciary

**Re: HB 651 – Relating to Electronic Prescriptions**

Dear Chair Rhoads, Vice Chair Har and Members of the Committee:

The Hawaii Medical Service Association (HMSA) appreciates the opportunity to testify on HB 651 which would conform the Uniform Controlled Substances Act to federal law and to clarify the provisions under which a pharmacist may prescribe electronically. HMSA supports this Bill.

HMSA's goal in the provision of outpatient pharmacy services is to ensure our members have access to affordable, high quality medication. HMSA believes that optimal drug therapy results in positive medical outcomes, which helps to manage overall health care costs.

This legislation benefits our members as it increases the options for providers to prescribe pain medications. More importantly, the Bill helps to ensure there are safe guards to prevent fraudulent prescription of these medications.

Thank you for allowing us to testify in support of this measure.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark K. Oto".

Mark K. Oto  
Director  
Government Relations

Re: HB 651RELATING TO ELECTRONIC PRESCRIPTIONS

Position: Strongly Support

The Hawaii Medical Association is submitting testimony in strong support of this measure.

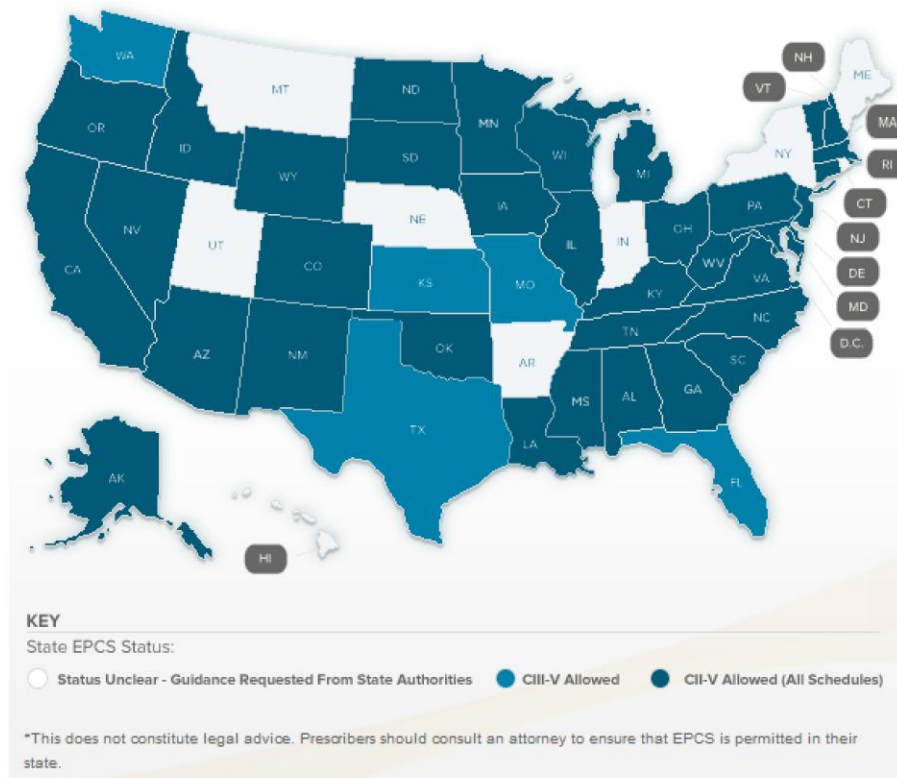

On March 31, 2010 the federal Drug Enforcement Administration (DEA) published its interim final rule on "Electronic Prescribing for Controlled Substances," revising DEA regulations and allowing pharmacies, hospitals, and practitioners to securely and safely utilize modern technology systems to electronically prescribe (e-prescribe) schedule II through V drugs (controlled substances). Since the DEA's rule went into effect in June 2010, many states have aligned their policies and regulations to facilitate e-prescribing of controlled substances; 41 states now permit e-prescribing of controlled substances and only nine states, including Hawaii, do not. [States' status relative to e-prescribing of controlled substances is depicted in the map below.]<sup>1</sup>

### OFFICERS

**PRESIDENT - STEPHEN KEMBLE, MD    PRESIDENT-ELECT - WALTON SHIM, MD**  
**SECRETARY - THOMAS KOSASA, MD    IMMEDIATE PAST PRESIDENT - ROGER KIMURA, MD**  
**TREASURER - BRANDON LEE, MD    EXECUTIVE DIRECTOR - CHRISTOPHER FLANDERS, DO**

HB 651 proposes to amend Hawaii's current Uniform Controlled Substances Act in chapter 329 to allow for e-prescribing of schedules II through V controlled substances. It is critical that Hawaii align with federal regulations for several reasons.

First, the federal requirements ensure that e-prescribing of controlled substances is secure and safe, to protect both the prescriber and the patient. The DEA requires that prescribers must: use e-prescribing software that is audited and certified for the purposes of e-prescribing of controlled substances; complete identity-proofing; and use a secure, two-factor authentication process to sign e-prescriptions for controlled substances. These privacy and security requirements protect the prescriber from the misuse of his/her credentials. It should also be noted that prescribers have the same obligations when e-prescribing controlled substances as they do when issuing traditional prescriptions orally or on paper.

Second, providers who are not able to e-prescribe controlled substances are forced to maintain separate workflows in their prescribing process – an electronic workflow for non-controlled substances and a paper process for controlled substances. The maintenance of two workflows is both disruptive and burdensome to the provider; controlled substances account for 10 to 11% of total prescriptions written in the United States.<sup>2</sup> The workflow disruptions and hassle caused by switching between paper and electronic prescribing are enough to make some physicians choose not to e-prescribe at all.

<sup>2</sup> Drug Enforcement Administration. "Electronic Prescriptions for Controlled Substances." Interim Final Rule with Request for Comment. March 31, 2010. [http://www.deadiversion.usdoj.gov/fed\\_regs/rules/2010/fr0331.htm](http://www.deadiversion.usdoj.gov/fed_regs/rules/2010/fr0331.htm). Accessed on January 30, 2013.

Third, the benefits of e-prescribing have been documented for patients, providers, and pharmacists. Major benefits include:

- **Enhanced patient safety and quality of care:** A 2010 study found 37 errors for every 100 handwritten prescriptions, compared to 7 errors for every 100 electronic prescriptions.<sup>3</sup> It was estimated that about 7% of these errors have the potential to do harm.
- **Lower costs across the healthcare system:** E-prescribing systems help prescribers select medications covered by a patient's health plan formulary that are both cost effective and therapeutically appropriate. A 2012 study estimated that e-prescribing could lead to between \$140 billion and \$240 billion in savings and improve health outcomes over the next ten years.<sup>4</sup>
- **Increases patient convenience and medication compliance:** A recent study reported a 10% increase in patients' filling or picking up of new prescriptions.<sup>5</sup> E-prescribing removes the "waiting" time from the traditional prescription filling process so that patients can easily fill medications without encountering significant wait times at the pharmacy.
- **Saves time and money for pharmacies and providers:** The National Association of Chain Drug Stores estimated that pharmacy staff make upwards of 150 million calls annually to clarify prescriptions or discuss possible errors with prescribers. This equates to as much as \$20,000 annually per physician practice that could otherwise be redirected to patient care.<sup>6</sup>

As of 2011, Hawaii ranked 39<sup>th</sup> among states in Surescripts Safe-Rx rankings due to its low adoption of e-prescribing. Hawaii prescribers, pharmacists, and patients are disadvantaged when it comes to health care quality and costs as prescribers are forced to retain two prescribing workflows. This impacts prescribers' abilities to adopt e-prescribing and, as a result, prescribers, patients and pharmacies do not receive e-prescribing's cost and safety benefits. Aligning Hawaii's laws to be consistent with DEA regulations is a critical important next step to moving Hawaii forward and supporting improved quality of care and reduced costs.

Mahalo for the opportunity to submit testimony on this important issue.
