Testimony for EEP on Jan 31, 2013 08:30AM in Conference Room 325

Submitted By	Organization	Testifier Position	Present at Hearing
Karen Chun	Stop Cane Burning	Oppose	No

Comments: Dear EEP Committee, StopCaneBurning.org has almost 9,000 petition signatures asking for the end of Cane Burning which goes on nonstop on Maui for 9 months of the year. This bill should be called the "ALLOW AIR POLLUTION BILL" since it appears to be amending our air and noise quality law to be less effective. Particularly this part is a special interest provision to continue giving the people of Maui island lung disease: An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit; and" PLEASE VOTE NO!

Please note that testimony submitted less than 24 hours prior to the hearing, improperly identified, or directed to the incorrect office, may not be posted online or distributed to the committee prior to the convening of the public hearing.

Comments: Cane burning affects many residents on Maui in a very negative way and ultimately represents a transferal of production costs from a narrow commercial economic entity onto the backs of the general population with no commensurate compensation on the part of the producer. It is an injustice that only government can correct. Please do so.

January 29, 2013

Dear Energy & Environmental Protection Committee;

Please pardon my informal message. I have just received word about this and wanted to respond quickly, so I hope the content of this message will take precedence.

I was visiting Maui as a participant in the Hana Relay Race on September 8, 2012. Leaving our hotel in Kahului at 4:30 am, I witnessed black debris floating in the air and on the ground, which I later learned it was the by-product of burning cane. As my teammates and I ran our individual legs en route to Hana, we dealt with breathing the smoke that drifted from cane burning. Knowing that we had to inhale unnecessary carcinogens while being physically active frustrated us, but we had no choice.

Born and raised in Hawaii, I am aware of the traditional practices of burning cane, but am not clear as to why. Now having experienced the effects of it, I am questioning why this is still being done. With the knowledge of health risks, detrimental effects on the planet and technological advances, I was surprised to see that a healthier and more efficient way of processing cane has not yet been developed. Or is this just a cheaper way to do this at the expense of citizens and the environment?

Cheaper for the sugar company, more expensive for everyone else.

Please reconsider your decision to allow this old habit of cane burning and urge our sugar industry to establish more acceptable, healthier and safer ways to process cane.

Mahalo,
Lynn Muramaru

Comments: This bill weakens our air quality laws. Although I support agriculture on Maui, its time to stop the cane burning. The smoke and ash it causes is no longer acceptable. Living in Central Maui I can speak from experience to the negative after effects it causes me and my family.

Comments: As someone with asthma and as a single mother of children with asthma placed in the unfortunate position of being unable to move from our home in North Kihei, I oppose this measure. HB754 weakens our current air quality laws and adversely affects many keiki and kupuna during a time when respiratory illness is already on the rise. I wholeheartedly ask that you please kill this measure!

Comments: Aloha, I am in opposition to this which encourages pollution of the air we breathe! Too many suffer, for too long with the effects of cane burning. It is not necessary,only cheaper for big businesses. We all pay the real price with asthma,and the highest # of respiratory illnesses in the state! Please ensure our children fresh air that they deserve,this should be one basic human right! Mahalo nui loa a pau!

1/29/13

My name is Amie Buttke, I am a resident of Kihei, HI and I oppose this bill.

I come from an agricultural family and support farmers and agriculture 100% however, as with any industry; there are certain practices that if left unchecked can do more harm than good. Agricultural burning is one of these practices. While I understand that one of our main crops here on Maui is sugar cane and that the method we currently use for harvesting this crop is burning, I am also aware that this particular practice is archaic. The majority of sugar cane is currently harvested green and then burnt inside of the factory thereby reducing the amount of pollutants and particles emitted.

Passing this bill would prevent anyone from ever preventing agricultural burning which in my opinion would be detrimental to the health and safety of our community and visitors alike. Please accept and consider my testimony at the hearing. I oppose this bill.

Sincerely, Amie M. Buttke

Comments: The days of allowing this kind of atmospheric barbarity and willful neglect of the health of every person living near these burns is beyond comprehension. This is the work of the 1% attempting to save a few dollars while jeopardizing thousands. If you don't care about your Constituents, perhaps you might study the impact on tourism. We were on Maui in November, the acrid and terrible smoke, not to mention the impact on vegetation and the environment would make anyone viewing or experiencing it question returning.

JAN. 29, 2013

HB754~OPPOSE

Aloha Esteemed Legislators~

I strongly oppose HB754.

I am severely affected by sugar cane smoke created by HC&S. I have had respiratory problems and the inability to work due to illness. This bill weakens air quality laws and is intolerable. I am a substitute teacher and see high levels of asthma in our keiki directly from this smoke and air particulate.

Please protect air quality and KILL THIS BILL.

Mahalo~

Comments: Before passing a bill like this, you need to study impacts of agricultural burning on health, environment and property values. Otherwise, you may be passing a law to allow injury, and causing the state to assume liability for damages. Worse, you may be guilty of encouraging public injury to sustain a private enterprise, instead of encouraging smart business improvements.

Comments: By allowing for agricultural exemptions this bill significantly compromises our air quality. Vog is a natural phenomena that has significantly increased recently with the opening of the new fissure on the Big Island. Cane burn smoke is not natural and can--and must--now be controlled to protect the health of the people. Circumstances have changed. We must act to protect the people. Please kill this bill.

Comments: Please kill this bill. We on Maui are suffering with the awful air pollution and unsightly smoke and ash from the cane burning here. Please come and sample the mess before considering allowing the burning to continue. The job loss would be minimal compared to the damage to our tourism and the lungs of our locals. Let's encourage transforming the high calorie sugar production into healthy food generation. Sincerely from my family here on Maui.

Comments: The burning of sugar cane on this island represents a serious health hazard to Maui residents and should be prohibited. This bill enables and protects the practice by A&B (HC&S) of burning sugar cane without regard for the dangerous air pollution this activity causes. I urge you to oppose this bill and prevent this company from burning sugar cane. In many countries, sugar is produced from cane without burning the stalks in the field. That is the best practice and should be followed here as well.

Comments: I live in North Kihei. It is really horrible when HC&S burns cane, as it fills my home with acrid smoke. It is so bad that if I am still sleeping, I awaken, get up quickly and have to rush around closing windows. Even with the windows closed, I still get ash in my home. I cannot go outside to garden or even take a walk. HC&S burns regardless of the weather conditions, often burning when there is little wind. The smoke then hangs around for hours. I cannot believe it is healthy to breathe in this smoke. I do notice that some cane fields in Maui are harvested without burning. I wish that HC&S would do so with all their fields.

Testimony

This bill will lessen our air quality laws. We have, the air, the land and the sea and if we continue to pollute the air we will only have more health problems. Agricultural burning not only pollutes the air we breath, it is an eye sore to tourists and it makes our eyes sore. Seeing a white dog that is no longer white because he is blackened by ash is not something I want to see. I don't want children to breath ash. I don't want to breath ash. There are alternative ways to doing things. Please stop this bill.

Mahalo,

Michael Patton

Comments: This measure is terrible. Both my wife and I suffer whenever the winds bring the smoke to our house (which is often) and we can't imagine how people closer to the sugar cane handle this. Scratchy throats, headaches, dizziness, tight lungs, inflammation, sinus infections, and even sometimes itchy skin. It doesn't just deteriorate the quality of our lives, but may shorten them as well. This is a TERRIBLE, TERRIBLE bill and harmful to ALL people in Hawaii. I can't even imagine what sugar cane burning does to our children's health. This bill must be stopped it is a crime against the people of Hawaii, and to all visitors as well. Please do the right thing, and kill off this bill. It's the only way we can ALL sleep at night. Thank you very much. Michael Sandler

Comments: I oppose this because it is dangerous to the health of the people that are most vulnerable. The elderly, the youngest, those with asthma or other respiratory problems. I think this is so important to the health of the Native people, the newcomers who call Maui home, and even the tourists who could choose to travel to another island if they begin to realize they are choosing a place with the worst air pollution in the state when they spend time in Maui. I work with the elderly and with Pregnant women professionally for their health. I know women with young babies are very concerned about the cane smoke and I have seen too many elders feel quite ill and unable to be as active as they would like, due to respiratory issues when the burning is happening. Please take the health of the people into consideration. It should be a priority.

Comments: I am STRONGLY OPPOSED to this bill, or any bill that directly or indirectly exempts ANY pollutant or polluter. IN PARTICULAR, any exemption from polluting industries--such as the sugar cane production industry, which produces horrific air pollution both via the burning of cane fields and the burning of coal in its processing plant--should be vehemently OPPOSED by the legislature (since--presumably--its purpose is primarily to PROTECT THE PEOPLE OF HAWAII from harm). Please do NOT pass this bill! Aloha, -pt

Comments: This measure weakens our air quality control, allowing more pollution to accumulate around our island which should be a role model for environmental health, not a push over for some big corporation who just is trying to bully the system so they can increase their profit at the expense of our community's health.

Comments: When cane fields upwind of South Maui are burned I have to turn on a large oxygen generator and sit in my closed up apartment hooked up th the machine. It is well beyond time that cane burning is stopped. It is an archaic and very harmful practice!

Comments: One need only to cut through the vog on a day of Kona winds to realize air quality can quickly deteriorate to a point detrimental to living organisms. Allowing traditional but outdated technology to be used again on a crop that is phasing out due to the competition of world markets is irresponsible and harmful to the Hawaiian population.

Comments: The bill weakens our air quality laws. Please kill it. I have lived on Maui 29 years and cannot believe how the black snow came over my business which was Dry Cleaning and laundry. It was harmful not only to my employees breathing but also harmful to our business. Not to mention the black snow and poor air quality around our homes and schools. I know of many people whom their doctors recommended for them to move off Maui, if they were to remain alive and healthy, because of the toxic air they were breathing from the cane burns. This practice has to stop, I do not want to leave due to poor health from continuing to be exposed to this air hazard.

Comments: I oppose HB754. This bill will weaken and not strengthen our air quality laws when it comes to agricultural burning. Maui residents are and have been subjected to very diminished air quality due to agricultural burning. Asthma rates and respiratory problems persist because of the agricultural burning. Agricultural burning hurts our keiki! Please do not pass this bill.

Comments: Aloha- Please kill this bill before it slowly kills the residents from all the polluted air that we are forced to breathe as a result of open air agricultural burning. Enough is enough with putting the profits of companies before the health and safety of the citizens. What if it were your son or daughter who gets asthma from the horrific smoke they are breathing when the burning is happening? There is a reason Hawaii passed laws that we cannot smoke inside public buildings. Smoke is TOXIC. Please kill this bill and put clean and SAFE air before profits. Mahalo- Valerie Sapourn

Comments: I oppose the proposed bill. Cane burning on Maui is destructive of our already suffering air quality caused, in part, by increased vog about which we are powerless to do anything. As a Kihei resident, I am in the path of the smoke which I believe to be a contributing factor to the bronchitis with which I have been struggling for the past several months. Burning, clearly, is also bad for our planet, adding to global warming. Finally, burning is bad for our leading industry, tourism, and burning's particulates are bad for our reefs. If we were to analyze downwind, collateral costs, I am quite sure we would find they exceed the economic benefits of cane burning. We should not be laissez faire, lifting restrictions, rather we should be moving toward alternative solutions.

Comments: The burning not only causes me sinus problems, but it is hazardous to anyone in the area when they are plowing up the fields. TWICE i almost had car accidents near the corner of Hana Hwy and Haleakala Hwys because I could not see through the dust smokescreen. Additionally, tourists, who comprise the biggest revenue generators for Maui, are using the social media networks to talk badly about our island because of the negative environmental impacts this company is doing to Maui. They have poisoned all the reefs with herbicide run-off. They are affiliated with Monsanto who is also giving Maui a bad reputation with their dangerous outdoor science experiments. 800 people is NOT a lot of people to displace for the long-term health of our island. I vote we shut them down.

Comments: I lived on Maui for 6yrs, moving there in 2004. After living there for that long in Kihei, I developed increasing difficulty breathing. It started with like a "smoker's cough" and I have never smoked in my life. In 2011 I got bad enough that I sought treatment at Stanford University and the conclusion by the doctor there is that I was reacting to the environmental irritants on Maui. I have always been sensitive to any kind of smoke but after living on Maui and breathing the smoke and toxins from the burning of sugar cane I became increasingly sicker to the point where I now have to take medication to breathe. I moved here to Oahu in Jan. 2012 to avoid having to breathe such toxic air and hopefully after a few years here I won't have to take the medication anymore. I have not been sick once since I moved here last year! It is a shame what the poor air quality is doing to people there and it should not be allowed. Why bother to ban smoking from public places when they willingly pollute the air with cane smoke!!

Comments: I oppose any bill which weakens our air quality laws. I oppose agricultural burning of any sort especially cane burning. As a teacher to 2nd graders, I saw more children absent when cane was being burned.

Comments: We should be moving towards improving the quality of our air shed. This bill does the exact opposite. Just because this was allowed for years doesn't make it right or smart. This burning causes health problems, and is a blight on the beauty of the island, that is one of the main reasons tourists come here. Allowing rampant agricultural burning benefits a few at the expense of the majority. The Willamette Valley in Oregon is the largest grower of grass seed in the world. For years they said that they had to burn to be economically viable regardless of the pollution they caused. After a severe multi-car accident that killed many people caused by their smoke. The public had had enough and banned burning. Well guess what there all still in business. Please kill this Bill. Thank you for caring

Comments: Although I agree it is a great idea to create such an ordinance, any rules relating to air quality are of little efficacy if it exempts agricultural practices. Noxious smells and toxicity in the air as a result of agricultural practices must be held to the same rules and punishments as those from any other causes.

Comments: Locals who have lived on Maui for many years told me that today's sugarcane burning is far more toxic than in the past. Back then they hired workers to dig ditches to irrigate the plants. Now they use plastic pipe to irrigate, and this gets burned and turned into toxic fumes that cause respiratory illness. I am opposed to burning sugarcane unless they remove the pipes. Isn't there a way to process the sugarcane in a more environmentally friendly way that uses the leaves for feed, energy, or something?

Comments: I am a registered voter in the county of Kauai as well as my husband Donald Neil MacDonald and Maria Alalem. We believe wood burning fireplaces in subdivisions should be banned due to toxic smoke that causes health problems to other people living in subdivisions. According to the Clean Air branch guidelines 11-60.1-179 ambient air concentrations of hazardous air pollution and 11-60.1-1, "Air pollution means the presence in the outdoor air of substances in quantities and durations which may endanger human health or welfare plant or animal life or property or which may unreasonably interfere the quality of life." Well we have been poisoned by our next door neighbors fireplace for years, but especially in 2012. They even burn when it is 80 degrees outside. Not only having to close all of our doors and windows, we have to turn our 4 (FOUR) air purifiers on. We also purchased a "Dylos" Air quality monitor which frequently reads in the "very poor" range. My husband and I have been to the ER at Wilcox Memorial Hospital 6 (SIX) times in 2012, with specific diagnosis related to smoke inhalation. We have to use our inhalers chronically now, yet my Husband hadn't had asthma since he was a child. I previously have NEVER had bronchospasms, but do now. I also had a cranial aneurysm followed by a stroke, which in turn ended my long time career as a Registered Nurse. I also have recently been diagnosed with arthritis. Maria was as recently as December, put on oxygen 24 hours a day due to a dwindling oxygen supply. Her levels plummeted to 87% with normal saturations being 95-100%. She was also hospitalized from the afternoon of December 31, 2012 to January 6, 2013 due to breathing difficulties. Prior to her hospitalization, the relentless burning and barrage of smoke that we were exposed to daily was unimaginable. I KNOW that these conditions precipitated her hospitalization, as prior to, I had to administer several additional "emergency" breathing treatments along with her two scheduled treatments. It is a well studied and documented fact how smoke affects "humans, plants, animal life and property." I since have had two of my pets, a cat and a dog die from Cancer. They were both operated on and biopsied, and it couldn't be ruled out that the constant exposure to the neighbors smoke, didn't play a role in this development. We mailed a certified copy of a petition to Mayor Carvalho, Jay Furfaro council chairman, Dr. Dileep Bal, and the DOH, State Senator Ronald Kouchi, and Representative Jimmy Tokioka. Confirmation of receipt for everyone was registered on February 17, 2012. The petition had over 40 signatures of individuals residing in our subdivision. The petition stated does the smoke from xxx St. fireplace ever bother you? Make you feel ill? Have difficulty breathing? Let me once again state, that over 40 individuals placed their names to paper because the words on this document resonated with them personally. Representative James Tokioka was the only individual to assist in this matter. I want everyone to know, that legislation has truly been our last hope. Prior to this resource, we have tried numerous other means of trying to rectify the issue with our neighbor. One such way was contacting KEO to utilize their mediation services at our expense, at

which the neighbors refused to participate. We even offered a second time after another neighbor did initially, to purchase a gas conversion fireplace kit, to install the gas and pay a years worth of the expenses. Once again, we were denied. Our repeated efforts to work this out with our neighbor has been refuted. Kauai county council held a meeting on January 17, 2013, and were very receptive to the pleas by individuals to stop wood burning fireplaces in subdivisions. Currently it appears that they may not have the authority to do so according to County Attorney Maunakea Trask who testified that the responsibility lies with the State. I'm pleading with you to please enact a law that bans all future and present fireplaces wood burning fireplaces in subdivisions. Current wood-burning fireplaces could be converted to gas/electric.If we take the lead from the numerous other states who are doing this or have already done this, Hawaii could see that this isn't a far reach. I whole heartedly support HB 754 as it will be a means to address this issue. Mahalo.

Comments: Times have changed. Time to change farming practices to keep up with the changing times. We are crazy if we think allowing cane burning is a good thing because it's the way it's always been done. Farmers have had plenty of time to adapt or change their crop. If not, then think about it now.

Comments: I oppose HB754 which legalizes cane burning. I believe that diminishes our air quality and creates health problems for many people. Cane can be harvested in other ways that does not require burning, and is well worth the extra cost to save our air quality and health benefits for the people of Maui.

Comments: I am against HB754 as it effects us personally by allowing agricultural burning to go on without recourse. We live in Kihei and had to buy a IQ Air chemical air filter to take out the smoke stuff that makes it hard for my wife to breath. We keep hoping they will solve this issue as it is outmoded and a big health issue for all of us downwind.

Comments: This part of HB754 needs to be deleted §46-17 (a) "(1) An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit;" This State ordinance effectively hamstringing the County of Maui's government, its residents, and its tourist industry from doing anything to rid the air of the carcinogenic ash (soot) produced and spread into our homes and into our hotels from Cane Burning. We need the help -- not the hindrance -- of the State of Hawaii to solve this problem. The people want to move HC&S and Maui into 21st into century agricultural practice. We need your help to rid the damage done to the air, and the lives of the residents and tourist that try to enjoy Maui during the Cane Burning. Certainly the most critical problem facing our County is "Maui Snow" and the smoke that comes with the antiquated agricultural cane burning process. This process is not only completely unnecessary, it is a true danger to the people that live here. Maui Snow is carcinogenic soot recently targeted by the EPA as a great problem. Cane Burning has been replaced by newer technology that is available throughout the world using USA made machinery. Even HC&S admits that these new technologies have been tested and can be used here at somewhat higher cost for sugar yields. Importantly Maui's wonderful fields of Sugar Cane can become a two-use product, sugar and electricity, helping to turn Maui into a net energy-producing island. Rather than burning green sugar cane in the fields, the left over green material can be used to make electricity using the technology A&B and HC&S is already using. We need to cross out this section of HB745 §46-17 (a) (1) -- then pass this bill!

Comments: As our island gets more populated we need to improve the quality of the air we all breathe and stop burning of cane that introduces toxins and soot into the air that we all breathe. The industry needs to develop cleaner ways to help support our growing population instead of relying on antiquated and outdated technologies that used to support their industry. We all deserve to breathe clean air and this affects all of us living on the islands.

Comments: Cane burning is an obvious cause of many peoples health and lung ailments. Residents and visitors to the islands have the right to breath clean un polluted air. There are much better more wholesome crops to grow to sustain agriculture in the islands.. Look at Kauai who took cane out many years ago. I do not eat processed cane products and feel strongly against cane burn which effects everyone. Agricultural practices here on Maui should not be allowed to pollute our environment at all. This bill weakens our air quality laws. Please oppose any amendments that allow cane burning to continue without complaint from people who are effected greatly by it.

HB754

Submitted on: 1/30/2013

Testimony for EEP on Jan 31, 2013 08:30AM in Conference Room 325

Submitted By	Organization	Testifier Position	Present at Hearing
Arnold Kotler	Individual	Oppose	No

Comments: FORGOT TO INCLUDE TESTIMONY ONLINE YESTERDAY: I agree with Karen CHun that the following part of HB754 needs to be deleted §46-17 (a) "(1) An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit;" This State ordinance effectively hamstring the County of Maui's government, its residents, and its tourist industry from doing anything to rid the air of the carcinogenic ash (soot) produced and spread into our homes and into our hotels from Cane Burning. We need the help -- not the hindrance -- of the State of Hawaii to solve this problem. The people want to move HC&S and Maui into 21st into century agricultural practice. We need your help to rid the damage done to the air, and the lives of the residents and tourist that try to enjoy Maui during the Cane Burning. Certainly the most critical problem facing our County is "Maui Snow" and the smoke that comes with the antiquated agricultural cane burning process. This process is not only completely unnecessary, it is a true danger to the people that live here. Maui Snow is carcinogenic soot recently targeted by the EPA as a great problem. Cane Burning has been replaced by newer technology that is available throughout the world using USA made machinery. Even HC&S admits that these new technologies have been tested and can be used here at somewhat higher cost for sugar yields. Importantly Maui's wonderful fields of Sugar Cane can become a two-use product, sugar and electricity, helping to turn Maui into a net energy-producing island. Rather than burning green sugar cane in the fields, the left over green material can be used to make electricity using the technology A&B and HC&S is already using. We need to cross out this section of HB745 §46-17 (a) (1) -- then pass this bill. Thank you.

As a resident of Maui, I am writing in opposition to HB754. In particular, I oppose exception 1 listed on page 1 of the bill, which exempts agricultural burning from air quality regulations. Living in Kihei, we are continually poisoned by the cane burning activities of Hawaiian Cane and Sugar (HC&S) during the summer months and it appears

the exception in the bill above was specifically written for the benefit of HC&S.

We need our representatives to look out for the health and well being of the residents and children of Maui. Please kill HB754.

- Batuhan Ulug

Kihei, HI

Comments: There is no excuse, none whatsoever, to weaken air quality laws; or, in fact, any environmental laws. They must be rigidly maintained or, if anything, strengthened. Because of out-of-control human overpopulation, the air we breathe, not to mention the fresh water and oceans and our planet in general, the Earth and all its creatures are suffering and we, in turn, will not manage much longer in the face of pollution and a lessening of fresh water and unsullied foodstuffs and the loss of biodiversity.

Comments: Cane burning along with burning of plastics/PVC in the field for irrigation is polluting our air, it creates ashes and serious particulate matter into our lungs, there is no escaping it when a burn is on. I personally have an allergic response. There is no reason that cane cannot be harvested without burning, this is the only place in the world that burns cane as part of the harvesting process.

Comments: Please do not take away our right to oppose the "Maui snow." HC&S owns much of this island and heavily influences our politicians in Washington. This bill is another way to try to prevent Maui citizens from opposing the cane burning and forcing A&B to adapt to modern cane-cutting methods that are non-toxic. Is Money really more important than the health of our children? Please do NOT pass this bill!

Comments: Cane Burning in Hawaii is antiquated. Harmful to health of humans and pets. Dirty. Intrusive, and down right insane!!! It creates inhumane and uninhabitable living conditions. Cane Burning should be outlawed in the State of Hawaii. It is by far the worst thing about living in Paia, Maui Which by the way has been nominated and is in the running to become the Happiest Seaside Town in America. When they burn it's like living in a war zone! It's the closest thing I could imagine to Hell!!! Stop this industry from continuing to poison us. Please help us!

Testimony for EEP on Jan 31, 2013 08:30AM in Conference Room 325

Submitted By	Organization	Testifier Position	Present at Hearing
David M. Russll	Individual	Oppose	No

Comments: Do not pass this bill as it lessens our air quality laws. Maui's pollution is ridiculous, and cane burning should be a thing of the past because of our new awareness of global warming and the challenges of sustainable living.

Please note that testimony submitted less than 24 hours prior to the hearing, improperly identified, or directed to the incorrect office, may not be posted online or distributed to the committee prior to the convening of the public hearing.

Comments: I strongly oppose bill HB754 which would allow "agricultural burning" to not be subject to citizen or community complaints for EPA violations. During an agricultural burn, pesticides, pvc pipes and other harmful materials are burned, and we the people have a right to be able to file a complaint to try to achieve our right to breathe clean air. It is not fair that a company can hide it's EPA violations behind an AG burn permit. Do not pass this bill. Thank you

Comments: I am one of many people who are greatly affected in a negative way by the agricultural burning here on Maui. Many people suffer from respiratory illness, headaches, and a host of other health issues on cane burning days. This bill weakens our air quality laws and is a threat to the health of all citizens. Please do not allow it. Thank you so much for your consideration.

Dr Melissa L Yee	Individual		No

Comments: I oppose this bill as it weakens control over air quality. It mainly affects people living on Maui where cane burning is still carried out. Air pollution, whether from industrial activity or natural weather conditions such as VOG, injures those with compromised respiratory systems and sets them up for serious complications in the future. Tradewinds are insufficient to clear the air of pollutants and particulates from the smoke. Although we are living on islands, the saturation point for how much contamination the ocean, soil, and air can absorb has already been exceeded, as seen in the increased numbers of people with allergies, asthma and cancers. Please vote to kill this bill. Mahalo.
Dr Melissa L Yee

Comments: In Hawaii, where Aloha has everything to do with the sacredness of the breath, I find this legislation appalling. These types of bills only serve to continually weaken our respect for the Aina and our air quality laws. Anyone who lives in Hawaii knows how devastating cane burning is to our health and environment. This must stop once and for all.

Comments: HB754 is simply unacceptable, in particular Exception 1 (1:13-2:2). Exempting the sugar industry--surely the biggest polluter of our air--from the ordinance renders the bill toothless and worthless, protecting its narrow interests only. The health of your constituents has to come before the financial health of these companies. Please vote NO.

Aloha,

My name is Erik, I live in Piilani Villages in Kihei, Maui.

I am opposed to HB754.

The smoke and ash from burning cane causes me great discomfort and aggravation.

When I wake up on the morning of a cane burning I have to keep my windows shut because the air surrounding the home that I own is filled with smoke. I do not have an air conditioner and I need to open my windows to keep the house cool. The smoke burns my eyes, nose and throat. I find it hard to breath and it causes me to be nauseous for hours after the smoke has blown away. The burned ashes from cane burning (due to the business practices of HC&S) cover my driveway, car and yard. These ashes are up to 2 inches long and drift for miles like feathers or seeds on the wind.

This has been going on for many, many years and it need not be so. There other ways to harvest sugar that are less damaging to the quality of air on the island of Maui.

I support business on Maui and like to know that HC&S is profitable and employing people here on Maui.

HOWEVER, the success of this company should not be at the expense of the health of the citizens of Maui county (including the workers in the cane fields). Air quality is more important then the profits and success of HC&S. We are an advanced society and I believe we can have both healthy businesses and healthy citizens here on Maui.

Please take responsible steps to move us all forward.

I am opposed to HB754.

Thank you for your time.

Erik Engstrom

Comments: No where else in the civilized world still burns sugar cane. Australia quit burning sugar cane decades ago and green harvests. We have no control over the air quality with VOG. We do have control over air quality by ceasing sugar cane burning. Not only that, it would reduce health care costs for ALL residents and cane workers. How many cane workers have suffered respiratory ailments, cancer, and early deaths from their jobs? If true be known, many.

Comments: Aloha, As a 17 year resident of the islands I am opposed to this ammendment. As a business owner that serves tourists on Maui I have had direct experience with myself and my clients suffering from resperitory distress and illness resulting from the burning of sugar cane crops this past year. I am fortunate that as a tour provider I am able to relocate upwind from the fires to protect my health and that of my clients. unfortunately it is not always a windy day on the burn days, this year I lost tours on 3 seperate occassions due to the ill health of my clients who were exposed to fugitive smoke from cane burns. i also had 4 different days when i suffered head aches, nausea, dizziness, and raspy sore throat and burning eyes from the smoke from the cane burns. This has affected my livelyhood directly. Often the tourists I serve tours to are dismayed by the fct that there seems to be little oversight or consideration to the health of our island population exposed to the plastics, and toxins that are also burned with the cne crops. On numerous occassions my clients have expressed that they will consider the cane burns directly as a factor in choosing a different tropical destination for future vacations. Cane burning is bad for our tourism economy and is unneccessary. All agriculture opertions in Hawaii should step into the era of green harvesting to better protect our health and the prosperity of our touris, based economy. No burns is bett for all. Please do not pass this current resolution. mahalo

Comments: I suffer terribly from the cane burning ,sinus congestion,sore throat ,red burning eyes ,headache, lung pain to the point that we have to close every window in the house put on all the air purifiers we have and stay indoors. It makes living in a beautiful environment pretty distressing . Then there is the clean up of ash all over the house and property which becomes a big clean up job. As a caring society we must come up with better alternatives please oppose any amendments that allows cane burning to continue without complaints.

Karen Chun	Stop Cane Burning	Comments Only	No

Comments: As you can see from the flood of testimony, people want the section exempting ag burning stricken from this section. Since you are amending this section anyway, please STRIKE the following: An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit; and (2) Then all of the testifiers opposing this bill will support it WHOLE HEARTEDLY. Please don't leave Maui island people's health suffering from 9 months of daily burning of 17,000 acres/year of cane burning. A&B (owner of the cane operation HC&S) has created subdivisions all around their fields and the towns of Kihei, Maalaea, Kahului, Sprecklesville, Paia, Kuau and parts of Haiku experience the HC&S plumes collapsing onto their homes, businesses and schools frequently. We have cases where schools keep the children indoors during recess because the smoke is so thick. HC&S can (and does) harvest without burning and they have a very lucrative contract with Sugar in the Raw that made them a profit of \$21,000,000 last year. Australia and Brazil are phasing out cane burning. You folks cannot imagine how much impact to our health this is having on Maui Island. Thank you for using this opportunity to strike the above section from the law and let us breathe clean air in Hawaii.

Comments: We need to begin addressing the problem of "local area pollution". Landscape and land usage on our islands are changing due to population growth. We need to begin amending laws to improve and protect air quality. New laws should be enacted to protect air quality. New laws should be enacted to remove obsolete pollution sources that have been protected by grandfathered laws. Grandfathered air pollution sources are technological laggards that continue to pollute and degrade air quality and disperse a fallout of particulates (soot, particles, etc.). Time to be progressive to get rid of the destructive old sources and bring in new and clean sources.

Testimony for EEP on Jan 31, 2013 08:30AM in Conference Room 325

Submitted By	Organization	Testifier Position	Present at Hearing
Keith Kessler	Individual	Oppose	No

Comments: The scientific evidence is now clear: The incidence of asthma and other respiratory illness amongst Maui's children is higher than the national average, and agricultural burning is in at least part responsible. Cane burning should not be exempted from regulation; on the contrary, it should be banned altogether. The old time plantation mentality that Alexander and Baldwin / Hawaiian Cane & Sugar run these islands and that their profits take precedence over the health of residents must end now. Keith Kessler Kihei

Comments: Our ohana's most valuable asset, our health, is directly impacted by the quality of our soil, water and air. Our air is severely compromised by the archaic practice of cane burning. Kill this bill and any others that compromise our health. Care for the aina and protect our ohana.

Comments: This bill weakens our Air Quality Laws. I am asking you to kill this bill. Instead we need to strengthen the Air Quality Laws so that people like myself no longer suffer from the smoke that is generated by A&B's burning of the sugar cane. We do not have air conditioning, therefore the smoke floods our home with no warning, which severely irritates my lungs and sets off bronchial problems. Ten years ago when I contacted A&B's Public Relations spokesman, he told me that A&B was phasing out harvesting by burning. Unfortunately they have not done that--it seems that until they are forced to through legislation, they won't phase out burning. I ask you to protect our citizens and our environment by killing this bill and replacing it with a strong bill that will require A&B to replace harvesting by burning with viable options. Thank you.

Comments: This bill weakens our air quality laws. PLEASE kill it. I live on a cane field and I suffer severe migraines during burn season. I also waste much of my valuable time cleaning up after A & B. Spraying my house down, daily washing of counters and floors that become gritty dirty messes after the harvest. Even with all my windows closed and locked the filth seeps in.

Comments: We, especially on Maui, where cane burning is done at all hours, need to set standards however, H754 eliminates the present standard and in fact makes it okay to avoid our current air quality laws. Please kill it and have a re-write that strengthens the law and the inforcement of the law, including penalties for non-compliance with felony prosecution if violated. This is our health, our children's health, your parent's health. It's time to look at what is best for the citizens of the State instead of the pocketbooks of the few. Mahalo

Comments: Burning cane is a health hazard. It is also unnecessary given the alternative methods that are available for harvesting a crop that no longer is of much profit to anyone. When plastic burns it releases carcinogenic toxins that are dangerous to breath. The kind of agricultural practices that involve toxic fertilizers and pesticides are killing our reefs which are of vital importance to Island dwellers. We need to look again at our decision to allow sugar cane to devastate our environment.

Please note that testimony submitted less than 24 hours prior to the hearing, improperly identified, or directed to the incorrect office, may not be posted online or distributed to the committee prior to the convening of the public hearing.

Do not reply to this email. This inbox is not monitored. For assistance please email webmaster@capitol.hawaii.gov

Wow, this is interesting...

"the law affording the most protection to the public shall apply, with the exception that: ..." and this is where agricultural burning somehow takes precedence over protection to the public. Does anyone else see anything odd about that? As a Maui resident and US citizen, I will be deeply offended if this terribly written bill passes. We ought to know better!! "protect the citizens under law, except..." is simply unAmerican!! Not to mention all the plastic and chemicals that also get incinerated at the same time, or the toxic mercury falling into the coral reefs from burning coal, another outdated approach.

I appreciate the many acres in ag, let's face it, whatever HC&S does affects us all because they now own so much land. Going forward it will be critical to address that, and I would consider creative solutions to encourage every one of their acres staying in ag into the future (produce could be more appropriate so we could start providing our own food in Maui!).

This is simply antiquated technology. Let's move into the 21st century and get innovative with healthy options for Maui. It does not seem appropriate to use the law to protect something for all time that we know will need to change.

Looking around the real world to see precedent solutions...what I see is that as Maui residents, HC&S ought to be a forerunner and join the other sugar growers in the Green Protocol. We need to request visionary leadership from HC&S, not make excuses for this sorry approach lacking in responsibility, just because it is easy for them.

<http://sugarcane.org/sustainability/best-practices> describes what has been done on a large scale in Brazil with regard to this issue. Please visit the website or at least read the following excerpt...

"The gradual eradication of pre-harvest sugarcane field burning is key to reduce local air pollution and improve air quality.

For centuries, sugarcane fields around the world have been burned to remove sugarcane straw (the plant's tops and leaves), drive away snakes and other potentially poisonous animals, and make it easier for workers to cut the cane by hand. However, technological advances and environmental concerns have increased demand for mechanized harvesting because it eliminates the need to burn the field. Mechanization already accounts for more than 55 percent of the harvest in São Paulo, Brazil's top cane-producing state, and that proportion will grow to approximately 90 percent by 2014. It will be the only means of harvesting in São Paulo by 2017, thanks to the so-called Green Protocol.

Besides eliminating field burning, the 168 mills (out of the 178 total located in São Paulo) and 29 associations of sugarcane suppliers who signed the Green Protocol have committed to protect and recover 260,000 hectares of land alongside streams and riverbanks. Over the last three years, producers

have invested around US\$ 44 million (75 million reais), and the final figure should reach almost US\$ 80 million (135 million reais) by 2017 when the program is completed.

Compliance with the Green Protocol's directives is policed by the government, with all relevant documents and certificates made available to the public (in Portuguese). A similar protocol was applied in the State of Minas Gerais since August 2008.

Nationally, a federal decree prohibits pre-harvest field burning as of 2018 on large farms that can be mechanized. In the meantime, sugarcane producers must obtain an authorization from the State government each time they intend to burn sugarcane fields. During dry periods, sugarcane burnings are prohibited during the day to protect the health of surrounding communities.

Finally, stricter enforcement, new emission standards for bioelectricity generators and replacement of old boilers with more efficient units have contributed to an ongoing reduction of smoke stack emissions from sugarcane mills.

Thank you for rejecting this terribly conceived bill and for getting creative to envision real solutions for the future of Maui with lots of healthy ag land, jobs and food!

Submitted By	Organization	Testifier Position	Present at Hearing
Matthew Clement	Individual	Oppose	No

Comments: Bill HB754 weakens our air quality laws while giving the impression it is strengthening them. Having experienced years of cane burning on Maui, this is a real hazard to human health. Please kill this bill. Ban cane burning and diversify our agriculture for the prosperity of all.

Michael Howden	Permaculture Maui	Oppose	No

Comments: As a health practitioner and as a Permaculture Designer, I am strongly opposed to HB 754. The effects of burning cane on Maui are harmful to all our residents. Not only is sugar cane burned, but the chemicals and plastics used in the production of sugar cane are also burned, and often become aerosols which are themselves carcinogenic and have broad negative effects on respiratory systems of anyone breathing that smoke. In reality, large areas are suffused/permeated with these aerosols which are residual and long lasting. It would be shameful for the Legislature to allow HC&S immunity from prosecution when even backyard burning must be properly permitted, with far less toxic effects. Thank you for your consideration, Michael Howden

Comments: My husband and I traveled to your beautiful land this past July. One morning, up extremely early to make it to the top of Haleakala in time for sunrise, we drove past an area of dense smoke...I had to cover my mouth and nose with my sleeve because it was so difficult to breathe. It wasn't until after we were back home in NC that I realized that was sugar cane burning! We only were on the island for 10 days...I cannot even imagine how it would be to live there daily and have to endure this hazard. Please PLEASE stop the cane burning. There are alternative routes to manufacturing this sugar (for profit!) that would be better for the health of your residents and visitors! Thank you!

Comments: My two young daughters have upper respiratory duress after each sugar cane burn that pollutes our air here on the south shore of Maui. On the mornings of the burn her entire kindergarten class chooses to stay in from recess because the smoke and ash is so thick that its a hazard to be out in it. It's appalling that this act of burning is even being debated. Stop the burning and let the island community breath clean air!

January 30, 2013

Bill HB754

To Whom It May Concern:

I am opposed to HB754 as the legalization of Cane Burning will
Have a serious impact on air quality not just outside but inside my home.

The photos below should serve as proof to that.

These were taken on an otherwise clear morning.

As you can see – my bed is covered with ashes. My windows were shut.
Even with the windows shut the ashes still are able to enter my home as
well as the smoke.

Please DO NOT approve this bill.

Respectfully,

Nancy Meola

696 Hana Highway

Paia, HI 96779

My Bed

Comments: I'm not against cane per-se, but obviously harvesting by burning is creating a LOT of health problems for people. I would NOT give A&B or HC&S carte blanche to burn. I oppose this amendment on the grounds that it leaves no room for a viable discussion about alternative harvesting methods.

Hello,

I am complaining about the pollution that HC&S is responsible for in my life. The cane burning of 9/6 - 9/7, which showered Kahului with black soot and fouled the air with smoke, was typical of the health hazard that HC&S knowingly exposes me to.

When I first moved to W. Kauai Street a few years ago I assumed that the smell of smoke that I endured was second hand cigarette smoke coming from my neighbor. After my neighbor passed away I realized that all this time I've been breathing the smoke from cane fires. This is infuriating!! How can this company be granted permits to fill my evening air with second hand smoke? How can they subject me to breathing air that they've fouled without being held accountable? How can this company continue to dump its black ash on my house without having to come clean it up? If I burnt a barrel of leaves I'd receive a citation. If I blew smoke into my neighbors house I'd probably receive a visit from Maui's police department if not legal action from a lawyer. But HC&S shoves smoke up my nose and dumps soot down on my head. This is not just.

This has got to stop. I don't smoke nor do I hang around people who do. That is my choice. But with respect to HC&S and their smoke, I have no choice. For the health of the people, stop the second hand smoke and soot of HC&S.

Sincerely,

Paul De Lauretis

20 W. Kauai St.

Kahului, HI 96732

This bill will lower our air quality. Please kill this bill.

Comments: I am one of the many people who are greatly affected in a negative way by the agricultural burning here in Maui. Many people suffer from respiratory illness, headaches and a host of other health issues on cane burning days. This bill weakens our air quality laws and is a threat to the health of all citizens. Please do not allow it. Thank you for your time and consideration.

Comments: Please stop and kill this bill. Agricultural burning of sugar cane on Maui is highly detrimental to the health of people, animals, and the island. It is past time that this practice stop, as it is against federal air quality regulations, and is extremely out of date (previous centuries). Maui cannot remain a third world state forever. It is time it caught up with the rest of the world and United States. Please kill this bill. Let's instead work on cleaning up our air and water. Thanks. Sandra Cleisz

January 30, 2013

Hawaii State Legislature
Honolulu, HI

RE: HB754

I am in opposition to bill HB754 as this bill weakens our ability to ensure safe air quality laws for the People of Hawaii.

I live on the island of Maui in the city of Kihei. We experience much cane smoke and related illness from the burning of cane. I have an 11 yr old grandson who has allergies and experienced severe reaction when the cane was burning just as school started in the morning. It was so thick our homes were filled with smoke as well as Kihei and Lokelani schools.

I received a call from school nurse of his reaction to the smoke with burning red eyes, migraine headache and stuffy nose. I had to bring him home to recover. I was so upset that I called the sugar mill and left a message to which they called back stating that they had to burn at that time because Maui County would not permit earlier burning schedule due to fields along highway.

My husband and I both will wake up with headaches due particularly to night burning of cane and our home as well is damaged from the cane ash.

Please register my testimony in opposition to this bill.

Respectfully Submitted,

Shirley Christiansen

Testimony opposing HB754

Living full time on Maui since the end of 1982, I have been terrorized by the burning of sugar cane more times than I can count.

I have borderline asthma, which I believe was definitely caused if not exasperated by the episodes of burning.

The science against burning is many times stronger than it was in 1982, just this month I read that the health effect of diesel particles was much more dangerous than even last years shocking studies in Europe revealed. Cane burning particles in the past have been cited as very similar to the nano particles of diesel burning. The literature is full of studies showing that cane burning does produce nano particles.

Now we have many days of Vog to deal with and this sham of a bill will reduce the ability to control what on Maui only benefits 1 medium sized business. It is an outrage. HC&S already takes over 80% of the water of Maui and now their political favor will gain them special control over Health enforcement as well. We just this year had finally some Health Department changes against green waste burning and now we are going to lose that if this corrupt law is past.

How can a citizen have any faith in Government when these special interests take precedent over the health of the population.

If an Environmental Impact study has to be done on a simple building site, shouldn't a drastic step like exempting Agriculture from Clean Air have a study, a real study, one that looks at current international science and weighs all aspects. There are only 800 jobs talked about "saving" on Maui, at relatively small amount if it is even true that HC&S would close, if they are not allowed to burn. They have been promising us for 25 years that they would change their equipment and start harvesting without burning. They did not invest and now we are supposed to keep paying with our health and for some of us, our lives.

Steve Slater,
Maui, Hawaii

Comments: I am for cane growing and cane harvesting without burning. It doesn't make any sense to burn, dig up and replant every crop causing bad air quality with the burn and the dirt clouds that follow. Give the crop a haircut, harvest the product and you don't have to replant. Join the present day methods that the rest of the world uses.....PLEASE!!!!

Comments: Please do all you can to protect and preserve air quality in Maui/Hawaii. This seems it will weaken air quality standards! HC&S regularly, and knowingly pollutes the air, the ocean, and presents severe negative impacts to the people of Maui. Do not let this legislation strengthen their ability to do so!!!!

Comments: I oppose this amendment until we see some sort of progressive and active respect for the effects of cane-burning on the population here integrated into the regular practice, if possible. There must be a reason why cane is not burned **ONLY** at night, when most people are asleep and the trades have time to blow the ash and fumes away...but what is it? There must be a graceful solution to this issue. I once saw a local man of about 25 bent over and squatting on the floor in Lowe's on one really bad cane-burning day. When I asked him if he was alright, he was very embarrassed but said it was his reaction to the cane-burning. Personally, my eyes are permanently scratched and red from the floating particulate that happens during the burns, with lesions (scars) that are both irritated and unsightly. I also get incredibly painful sinus headaches during cane-burning and just feel completely exhausted. The only conclusion is that it is simply wrong to burn cane during the day and it must change as soon as possible. I am grateful the cane fields exist - instead of the unsightly development that threatens the future of those fields and would gladly suffer anything to preserve their beautiful, green presence here, but surely there is a way to manage the burns more healthfully? Thank you for all the work you are doing to solve this problem in a win-win way. I send prayers of support so the best decision for all can be discovered as soon as possible. Mahalo ~

DEPUTY DIRECTOR

ROSS S. TANIMOTO, P.E.
DEPUTY DIRECTOR

IN REPLY REFER TO:
WAS 13-23

January 29, 2013

The Honorable Chris Lee, Chair
and Members of the Committee on
Energy & Environmental Protection
House of Representatives
State Capitol
Honolulu, Hawaii 96813

Dear Chair Lee and Members:

Subject: House Bill 754, Relating To Health

The City and County of Honolulu's Department of Environmental Services (ENV) opposes House Bill (HB) 754, Relating to Health.

HB 754 would require the counties to investigate and notify the Department of Health (DOH) of any report of an actual or suspected source of air pollution without appropriating any funds to support this new function. The counties do not regulate air pollution and are not staffed, trained, or equipped to investigate air pollution. By creating this new program without providing funding to support these efforts, HB 754 amounts to an unfunded mandate in contravention of Art. VIII, Section 5 of the State Constitution.

Further, this bill defines "air pollution" under 342B-1 and then would require the county to investigate actual or suspected sources of "air pollution" even if they are not regulated by DOH under 342B-11. 342B-11 regulates "air pollution" and "air pollutants," with both terms defined in 342B-1. Because air pollution and air pollutants are defined in the same chapter, there would never be a situation where DOH would not be regulating the same. Thus, the bill creates a situation that would never occur, resulting in a virtually meaningless provision in the bill.

Further still, as the City is regulated by DOH for violations of the Clean Air Act, there seems to be at least the appearance of a conflict of interest in requiring the City to act as a regulator. DOH already has the authority to regulate both air pollution and nuisances. There is no need to unconstitutionally and unnecessarily duplicate DOH's

The Honorable Chris Lee, Chair
January 29, 2013
Page 2

functions by requiring the counties to conduct these investigations. The reports of an actual or suspected source of air pollution should go directly to DOH, the agency trained, equipped, and authorized under existing law to investigate and take appropriate action.

We urge the committee not to pass HB 754.

Sincerely,

A handwritten signature in blue ink, appearing to read "Lori", with a stylized flourish at the end.

Lori M.K. Kahikina, P.E.

Comments: This bill is so explicitly subjective that IT should be COMPLETELY KILLED IN ITS ENTIRETY~ Logrolling is not the way to write a bill that shows good faith and high ethical standards. The legal ramifications of your clean air bill is scary as it is way too subjective and gives the government power it should not have unless there is a "clear and present danger" that will not violate a persons right to privacy. JUST KILL HB 754 and start over. Your exclusions for agriculture is totally unacceptable as well especially considering the fact that even the CDC and NIH state that cane smoke is harmful to people and their is a causal relationship with that and Asthma. Just because somebody dropped the ball and doesn't have the air-quality meters out there to assess the poor air quality does not mean everything is okay. If you want to help the people of Hawaii why not work on passing a bill to put in place a demand for systems control of our air quality like as in cane smoke so we have a "scientific versus subjective seemingly boondoggle process"~ Shame on you~

Comments: Aloha Esteemed Legislative Representatives: Regarding Permits for Agricultural Burning and the definitions being adopted by this proposed bill, Cane burning degrades our quality of life. There has to be an alternative found that does not infringe on the entire island community health standards. If they are going to burn, they should pay to sequester the poisons they emit in the air. It is a part of every business - clean up your own mess. Haz Mat plans are put in place to prevent the spread of toxic chemicals. Require burn facilities to put in place an effective plan to mitigate the environmental damages already caused, and make public the third party study results from those actions. That is a way for legislature to support large ag areas responsibly. Have them bring you viable solutions through research and development. Support their sustained growth and business efforts with technological advances to minimize their impact on the rest of us. This will show you truly support the island people. Please do not support any proposal that will lead to a loophole of legalizing cane burning through interpretation of definition. Thank you for your kind attention: Chantal, resident of Maui County since February 1979

Comments: Agriculture burning creates health hazzards and reduces air quality. Ag burning combusts not only the plant matter but also insecticides, pesticides etc, as well as irrigation pipes and tubing. These combustion products may be more dangerous than the original materials. Agriculture burning should be stopped.

Comments: Please do not pass this bill! The sugar people should do what the rest of the world does and not burn cane. Yes they would have to add people - but - they made 22 million plus PROFIT last year. So let a million go and hire the needed people. The cane still is processed and power is generated. The "we will loose all those jobs" is just NOT true!!! They will lose a small amount of profit. I wish I could net 22 million by poluting the air and get away with it. Thanks, Lyn Lopez

Comments: I support this bill only if the provision that exempts Agricultural Burning are removed. Exempting agricultural burning will continue to greatly pollute our air. This is the provision I oppose: An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit. Thank you.

HB754 will degrade our air quality in Maui by exempting permitted agricultural burning.

Traditional agricultural burning on Maui causes an enormous nuisance on South Maui citizens due to inhalation of smoke and dust from farming operations.

Exempting the greatest source of these nuisances makes absolutely no sense!!

Please stop this bill and do not create an exemption for permitted polluters of the aina!

Comments: Cane burning is archaic and unnecessary. I am part owner of a tour boat operating out of Maalaea Harbor. Needless to say, it is very disappointing to arrive at the harbor for work and find the boat covered in cane ash that needs to be removed with a cloth and by hand before a boat charter can be carried on. And while you are at it, please address the terrible coal smoke that pours out of the Puunene mill smoke stacks during the night when they think that no one sees it.

Comments: How do we justify this amendment in the face of the many years the citizens of this community and State have discussed sustaining our environment? We can burn our garbage in our backyard. But we can burn acres of sugarcane? As lifelong resident of Hawaii, who grew up during the heyday of sugar,it's time to change and stop our old practices. I strongly oppose this bill.

Comments: The individual councils of each county can exercise self-rule if this bill is passed. The conditions that exist with majority of our citizens are primarily in urban Oahu. Those of us who reside in rural areas experience different conditions and concerns. Such examples include chronic air pollution related to wood burning fireplaces in RESIDENTIAL areas. Should this bill be passed, it would provide the individual county councils the opportunity to legally address the concerns regarding air pollution (as well as other nuisances) that is affecting the health of many individuals. As a critical care RN, I am professionally and personally familiar with the affects that air pollution, particularly from smoke, has had on my numerous patients, friends, my children and family members. Please SERIOUSLY consider passing this bill to aid in assisting those who are chronically exposed to these nuisances and well documented dangers. Mahalo!

Comments: Please kill this bill. Air quality is a huge issue globally and we should not allow our clean Hawaii pristine air to be polluted.

This part of HB754 needs to be deleted §46-17 (a) "(1) An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit;"

This State ordinance effectively hamstrings the County of Maui's government, its residents, and its tourist industry from doing anything to rid the air of the carcinogenic ash (soot) produced and spread into our homes and into our hotels from Cane Burning. We need the help -- not the hindrance -- of the State of Hawaii to solve this problem. The people want to move HC&S and Maui into 21st century agricultural practice. We need your help to rid the damage done to the air, and the lives of the residents and tourist that try to enjoy Maui during the Cane Burning. Certainly the most critical problem facing our County is "Maui Snow" and the smoke that comes with the antiquated agricultural cane burning process. This process is not only completely unnecessary, it is a true danger to the people that live here. Maui Snow is carcinogenic soot recently targeted by the EPA as a great problem. Cane Burning has been replaced by newer technology that is available throughout the world using USA made machinery. Even HC&S admits that these new technologies have been tested and can be used here at somewhat higher cost for sugar yields. Importantly Maui's wonderful fields of Sugar Cane can become a two-use product, sugar and electricity, helping to turn Maui into a net energy-producing island. Rather than burning green sugar cane in the fields, the left over green material can be used to make electricity using the technology A&B and HC&S is already using.

We need to cross out this section of HB745 §46-17 (a) (1) -- then pass this bill!

Testimony Opposing HB 754
January 30, 2013

Rep. Chris Lee, Chair, Rep. Cynthia Thielen, Vice Chair, and members of the
COMMITTEE ON ENERGY & ENVIRONMENTAL PROTECTION

I strongly oppose HB754, which attempts to amend the State's air quality laws to exempt agricultural burning from being safely regulated. Such an amendment denies public voice and the scrutiny necessary to legislate harmful hazards fairly.

On Maui, open field cane burning exposes everyone, and more so residents, to carbon particulate and suspect chemical particulate that impact respiratory health. Hawaii's unusually high asthma rates heighten concerns about the impact of cane burning as a significant health risk. Carbon emissions from large scale field burning are known to seriously impair respiratory function (Cancado, 2006).

A public health professional and Maui resident of many years, I was diagnosed with asthma 2 years after moving to Kihei, where I have been exposed to smoke from cane burning. After cane burning in our area, my local doctor sees approximately five patients with respiratory problems. He is one of five physicians in his clinic, one of many clinics in our area alone.

Cane burning is far more than a nuisance to Maui residents. More and more people are adversely affected by open field burning. Instead of trying to prevent public response and weaken air quality regulation, as HB754 proposes, the harmful health consequences of exposure to cane field burning should be investigated.

Before exempting agricultural field burning from regulatory oversight, an evaluation of air quality and of the safety of all toxicants to which we are exposed should be conducted to determine the health and environmental impacts of cane field burning. In addition, precautionary safety assessments should be conducted before any burning is permitted to continue.

Air quality monitoring and standards should be updated to examine specific emissions from cane burning. Hospital records of respiratory related admissions after cane burning should be studied, and we should study the health effects produced by current burning practices to confirm the following:

1. What is the hazard: the chemical properties and components in all the pesticides, fertilizers, herbicides, insecticides and other materials, such as all the irrigation plastic pipes and parts, that make up what we are inhaling when it is all burned?
2. What is the risk and effect of exposure/inhalation of these hazards emitted into the air from cane burning? What are the concentrations of substances in the emissions residents breathe when fields are burned?
3. A Health Impact Assessment (HIA) should be conducted to determine the extent to which repeated exposure to environmental toxicants from cane burning –carcinogens,

Testimony Opposing HB 754
January 30, 2013

neurotoxins, endocrine disruptors- is harming the public, especially the frail, such as children, the sick and the elderly?

4. What is the legally approved use of the chemical substances used on agriculture fields? Which, if any, of these toxicants is legally approved to be burned, emitted into our air, and inhaled? In what concentrations are any of these toxicants legally acceptable, and in what concentrations are we exposed during open field burnings?

5. What are the health impacts of open field cane burning on residents and industry workers involved in processing and field burns?

The public cost of illness and lost productivity is not being factored when we deny the health impacts of agricultural burning practices. I respectfully ask that you oppose this bill.

Mahalo for your consideration and your service.
Sincerely,

Joy Brann

Comments: Aloha Committee for HB754, I live in Upcountry Maui. I am writing to you asking that you oppose HB 754. This bill would allow agricultural burning, i.e. cane burning. The smoke and pollution from cane burning has become more and more severe. The health of all Maui residents is severely compromised by allowing the archaic practice of cane burning. Although I live at the 3300 foot level, when the cane is burned I can smell the smoke at my house and have difficulty breathing. For those who live in lower altitudes, the health effects of cane burning are much worse. In addition, Maui depends on the tourist trade. However, the cane burning is driving the tourists away, because it affects their health too while they are visiting this beautiful island. Who wants to come to Maui on vacation and not be able to breath or see? I urge you to vote against HB754 and not allow cane burning continue as agricultural burning. Mahalo, Martha Lind Makawao, HI

Hearing on HB 754

Requires a county to investigate and notify the Dept. of Health if a report is made about a possible nuisance involving air pollution. Defines air polluting nuisances. Give the Director of Health the authority to enter and investigate reports of air-polluting nuisances.

The Stop Cane Burning organizer Karen Chun, posted the following on their website yesterday 1/29/13. Ms. Chun's assertion that "A&B (HC&S) is now trying to amend the states air quality laws to say that no one can stop agricultural burning " is shibai, a lie, designed to inflame passions of the reader.

Verizon 3G 6:48 AM 92%

Karen Chun ► Stop Sugar Cane Burning on Maui

We suspected A&B (HC&S) might try this sneak attack on our Hawai'i Air Quality Laws and they did. We need you to go right now and submit testimony AGAINST HB754 which amends the State's air quality laws to say that no one can stop agricultural burning.

Go to: <http://capitol.hawaii.gov/submittestimony.aspx?billtype=HB&billnumber=754>

Check that you OPPOSE the bill (and put in your info)

In testimony write something like: "This bill weakens our air quality laws. Please kill it"

The section Ms. Chun would like legislature to delete from HB 754 is already in current law:

This is the link to the actual measure:

http://www.capitol.hawaii.gov/session2013/Bills/HB754_.pdf

This is the section they are trying to delete that is current law:

* (1) An ordinance shall not be effective to the extent that it is inconsistent with any permit for agricultural burning granted by the department of health under authority of chapter 342B, or to the extent that it prohibits, subjects to fine or injunction, or declares to be a public nuisance any agricultural burning conducted in accordance with such a permit; and*

Request should be that this language is important and must be retained.

This language has been in current law for many years. HC&S complies with burn permit criteria. Many states in USA allow agricultural burning by annual permit. Florida burns more cane in 2 weeks than Maui does all year.

HB 754 is a good measure to control meth labs in Hawaii, and is being hi-jacked by the anti-cane group for an unintended purpose.

We have formed an ad-hoc ("Plantation Roots" Maui) citizens group to develop a more comprehensive and positive perspective re: HC&S Plantation as a valuable long term community partner, past - present - future.

We are presently building a website which will truthfully represent facts to the greater Maui community, of which an estimated 80K (plus) persons have some generational connection to sugar or pineapple plantations' history - and who themselves are mostly interested in being fair to HC&S Plantation.

Our website will soon contain a summary of asthma surveys and reports; a list of agricultural burn states in USA; an historical presentation on plantation/community partnerships throughout 20th century to present; and future plantation evolution possibilities (I.e. current bio-fuel development project funded by military through Senator Inouye)

We pray you folks will realize that the anti-cane group are very clever in their framing of this issue re: HB 754.

We were made aware of Ms. Chun's 1/29/13 posting, only this morning, 1/30/13. We know these folks have a well developed "e-mail tree" so you will be flooded with e-mails per Ms. Chun's request and twisted presentation of the facts around HB 754. We pray you folks will be perceptive enough to see this, and allow our group to marshal our plantation supporters, whom represent a giant segment of our community.

Mahalo and aloha for your consideration of our testimony.

Plantation Roots Maui Co-ordinators:

Y.L. Sugimura

B.T. McCafferty 

W. Wong

Comments: Our family has lived in a condominium complex in Kihei for the past 10 years. And when the cane burns it is a common occurrence that our walkways, our outdoor furniture, and our stairwells get covered with the "Maui Snow". It even enters our house through our roof cap vent and coats our interior floors and countertops. During those times this black ash and burnt plant matter requires a significant effort for ourselves and our property manager to clean up. Why should we bear the cost and impact of a large company's nuisance of burning their fields and polluting our environment? They are profiting off of our misery, and it is time for this outdated practice to stop. Thank you for your consideration.

Comments: In this day and age where this is alternative sources of technology and energy, why is a government entity (State DOH) choosing to hold people living in residential areas hostage to neighbors who choose to use wood burning fireplaces. As Parents and Grandparents of severely asthmatic children and grandchildren, we are deeply saddened that their is NO governmental recourse for our family. Our family has had to seek refuge on many occasions to our home because of an individual that lives several houses down from them who burns relentlessly. We personally have experienced the stench on many occasions and have needed to return to our own home. A teenage grandson has had to spend many nights at our home to escape smoke inhalation in his upstairs bedroom, despite having all his windows closed. Our daughter was instructed by a Perinatologist to move to our home (since we were close by) for the duration of her pregnancy because of the chronic smoke exposure and resultant increased levels of Carbon Monoxide in her blood. This may not be of a concern to many of you, but for someone who has to see their family members constantly living with the daily threat of smoke exposure and respiratory stress we are pleading with you to pass this bill in this Legislative session. Their is no need for further reviews and studies on the harmful effects of chronic air pollution, as the scientific data already exists. We would invite any of you to stay at our Daughter and Son-in-laws home to more fully understand the urgency of this proposed bill. Mahalo Val & Ray Ornellas 808-634-8892

Comments: For so many reasons, including those related to the health of my children especially, PLEASE pass this bill in this Legislative session. The consistent smoke that we are exposed to has, and is detrimenting our health. We have also literally had to pay thousands of dollars in medical bills, and endured prior hospitalizations directly related to chronic smoke exposure. This is a medically documented fact. It is a nuisance that NEEDS regulation, and this bill would provide another avenue for people just like us who need help. One reading this may think, " why not move?" We've already considered this, but how does one propose having and scheduling showings when the obnoxious fumes from a fireplace is going on practically everyday despite the season. There are no differences between summer or winter. The burning is relentless. Again, in this current Legislative session, I'm pleading with you to pass this bill. Mahalo.
