

Hawaii Solar Energy Association Serving Hawaii Since 1977

Before the House Committee on Consumer Protection & Commerce March 25, 2013, 3:00 p.m., Conference Room 325 SB 1040: RELATING TO ELECTRICAL SYSTEMS (testimony is two pages)

Aloha Chair McKelvey, Vice-Chair Kawakami, and members of the House Committee on Consumer Protection & Commerce,

On behalf of the Hawaii Solar Energy Association (HSEA), I would like to testify **in strong support for SB 1040**, which authorizes the Public Utilities Commission to consider the value of implementing advance grid modernization technology in the state.

Solar is key to our Green Energy Future

As we all know, Hawaii is dangerously dependent upon imported fossil fuels, and the cost and uncertainty of fossil fuels will only increase. Recent reports have indicated that oil may reach \$180/barrel or more by 2020, and scientists have found that climate change is occurring more quickly than generally believed, with the most current data showing that the Antarctic is warming three times the predicted rate. Transforming our electrical grid to a green energy infrastructure will bring both added security and stability to our state's economy, and also contribute to an overall reduction of greenhouse gasses for everyone.

The grid is the weak link

Hawaii has made tremendous progress in meeting its clean energy goals. In its 2011 Renewable Portfolio Standard Status Report, the Utility reports that installs from net energy metering alone were 29.7 MW, more than double 11.5 MW from 2010. 2012 will show an even larger gain. However, installation of non-utility scale PV on many circuits, especially on Maui, has become difficult as the number of renewables has reached the 15% saturation limit. Once this happens, an expensive study must be performed by the utility customer. And even then, installation is not guaranteed, in spite of relaxed standards in some areas implemented just this last year. Utility scale projects have similar concerns. Simply put, in order to move ahead with our clean energy goals, we need an updated electrical grid that can easily accept the latest technology. This bill would give a mandate to the PUC to put the question of grid upgrades front and center.

Thank you for the opportunity to testify.

<u>SB1040</u>

Submitted on: 3/24/2013 Testimony for CPC on Mar 25, 2013 15:00PM in Conference Room 325

Submitted By	Organization	Testifier Position	Present at Hearing
Mary A. Guinger	Individual	Support	No

Comments: The smart grid will not only give us energy at a cheaper cost but also bring jobs, prosperity, and have Hawaii lead the world on the use of energy.
