A BILL FOR AN ACT

RELATING TO HAWAII GOOD AGRICULTURAL PRACTICES.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. Hawaii's farms and farmers reflect the heritage
2 and diversity of many cultures and people. They are the
3 cornerstones of the State's goals for food security,
4 sustainability, and self-sufficiency and are essential for
5 producing local food for local consumption.

6 The number of small farms in Hawaii has grown substantially
7 during the last ten years, reflecting a changing agricultural
8 model from plantations to smaller farms with diverse cropping
9 and marketing systems that create new local food sources and
10 significantly increased employment. There is also a renewed
11 interest in school gardens and in children being able to eat and
12 enjoy the food they grow, contribute to their school cafeteria
13 system, and learn economic, science, and cultural lessons
14 through an agriculture-based curriculum.

15 These trends necessitate the development of Hawaii good
16 agricultural practices that are science-based guidelines for the
17 reduction of potential food product contamination on farms. The
18 guidelines would provide support for farm practices regarding

1 field management, proper hygiene, water quality for irrigation
2 and produce rinse, agricultural chemicals, and the use of animal
3 manure.

4 At the national level, the Food Safety Modernization Act of
5 2011 authorizes the Food and Drug Administration to develop
6 science- and risk-based criteria for preventing food borne
7 illnesses and encourages states to establish similar intra-state
8 criteria for the safe production, distribution, and consumer
9 handling of food.

10 The Hawaii constitution mandates both the preservation and
11 protection of agricultural resources. However, the department
12 of agriculture's use of existing third party food safety
13 certification audit systems is costly and impractical for many
14 of Hawaii's farmers. The current food safety certification
15 procedure has reduced farmers' access to local markets, thereby
16 reducing local consumers' access to local produce, and possibly
17 discouraging the development of farms that contribute to food
18 sustainability for the State. It also prevents children from
19 having reasonable access to school gardens and undermines
20 government programs that encourage food self-sufficiency and
21 economic development.

1 The purpose of this Act is to establish a Hawaii good
2 agricultural practices program for farms growing local
3 agricultural food products.

4 SECTION 2. Chapter 147, Hawaii Revised Statutes, is
5 amended by adding a new section to be appropriately designated
6 and to read as follows:

7 "§147- Hawaii good agricultural practices program. (a)

8 There is established the Hawaii good agricultural practices
9 program to be administered by the department. The purpose of
10 the program is to develop and support good agricultural
11 practices for Hawaii farms growing agricultural food products.

12 (b) Notwithstanding any provision of law to the contrary,
13 the Hawaii good agricultural practices program shall:

14 (1) Develop science- and risk-based good agricultural
15 practices that reasonably reduce the potential for on-
16 farm food borne illness and include specific
17 considerations and methodologies for farm sizes,
18 practices, techniques, materials, and crops;

19 (2) Develop and implement programs to educate and train
20 Hawaii farmers to learn and implement good
21 agricultural practices in a cost-effective and
22 efficient manner;

1 (3) Provide procedures for voluntary verification of on-
2 farm implementation of good agricultural practices and
3 subsequent issuing of state compliance certification;
4 and

5 (4) Develop a consumer information program for publication
6 and broadcast to teach home practices for the
7 treatment and handling of fresh and processed
8 agricultural food products.

9 (c) The department shall consult as necessary with the
10 department of health, the University of Hawaii college of
11 tropical agriculture and human resources, and other state and
12 federal agencies to develop and implement the Hawaii good
13 agricultural practices program.

14 (d) The department may adopt rules under chapter 91 to
15 facilitate the implementation of this section."

16 SECTION 3. There is appropriated out of the general
17 revenues of the State of Hawaii the sum of \$ or so much
18 thereof as may be necessary for fiscal year 2014-2015 for the
19 implementation of the Hawaii good agricultural practices
20 program.

21 The sum appropriated shall be expended by the department of
22 agriculture for the purposes of this Act.

1 SECTION 4. New statutory material is underscored.

2 SECTION 5. This Act shall take effect on July 1, 2014.
