The Whitmore Project

AGRIBUSINESS DEVELOPMENT CORPORATION
State of Hawaii

What is The Whitmore Project?

- The Whitmore Project is a detailed plan to revitalize our local ag industry by bringing farmers and the state together to **increase local food production, create jobs, engage in partnerships,** and to **provide workforce housing.** The Whitmore Project truly provides a **live, work, and play** environment.

**The
Whitmore
Project**

AGRIBUSINESS DEVELOPMENT CORPORATION
State of Hawaii

"Ag tends to be fragmented right now. **It's a cluster** made up of **distribution, processing, support, and producers** themselves. It needs to partner across these sectors to be more successful."

-Lisa Gibson
Hawaii Public Radio, 09/29/14

Public officials need to **think more proactively** about the ways they can **deliver services and food more efficiently** because the environmental cost of transportation affects communities.

-Urban Agriculture: Practices to Improve Cities
01/18/11

"There needs to be a **convergence** between **agriculture, tourism, and innovation.**"

-Lisa Gibson
Hawaii Public Radio, 09/29/14

Connecting the Whitmore Project:

- **Farmland:** 1,200 acres leased to farmers from the Agribusiness Development Corporation.
- **Office of Hawaiian Affairs:** 500 acres of farmland owned by OHA
- **Agricultural Hub:** Ag-Industrial Park will include food safety, packaging and processing facilities, and office space.
- **Warehouse:** Formally the Tamura's Warehouse, this structure will be retrofitted for additional food safety, packaging and processing, storage, and office space.
- **Workforce Housing:** A public-private partnership with the Hawaii Housing Finance Development Corporation will provide housing for farmers.

Who is the Agribusiness Development Corporation?

The fading of the sugar and pineapple industries has left the ag industry limping. Local people lost their jobs and active farmlands became inactive. To address these issues and challenges, the State established the Agribusiness Development Corporation (ADC).

The agency's main goals are to:

- Help with the transition of former plantation lands and water systems to diversify our ag industry.
- Initiate the development and support of ag facilities to assist our farmers.
- Provide solutions to issues facing our ag industry.

How does the Whitmore Project work?

The Whitmore Project provides solutions:

- Long-term lease options
- Rent credit (enhanced use lease)
- Decrease cost and time of transportation and shipping due to centralized location
- Retrofitting existing facilities to comply with the handling, preparation, and storage (Food Safety Regulations)
- Converting arable land into active land and achieving scale and diversity of products
- Providing co-op opportunities to leverage the high cost of equipment and supplies
- Providing workforce housing
- Engaging in Public-Private Partnerships

 - New Crops
 - Value-added Crops

New Crops: Value-Added Products

- Niche crops are the most sought after and revenue generating crops. Within every town in Hawaii there is a microclimate that certain niche crops thrive in. Products like Kona Coffee and Kula Lavender attract visitors to the region which in turn helps other small businesses.

- If every rural town had one crop, the State would have an inventory of value-added products creating destinations for ag-tourism bringing visitors to the islands.

August 20, 2012

Senator Donovan Dela Cruz
State Capitol, Room 202
415 South Beretania Street
Honolulu, Hawaii 96813

Dear Senator Dela Cruz:

The Wahiawa Community and Business Association (WCBA) would like thank you for taking the time to present your Whitmore Village Agricultural Development Plan (WVADP) at our June 13, 2012 board meeting.

Historically, the WCBA has been a strong supporter of agricultural base economic development in our district and we view the WVADP as having great potential. Acquiring the 24-acre parcel in Whitmore Village for packing and processing facilities is a critical component of the plan. It will allow farmers on the former Galbraith Trust Lands to be more competitive by bringing efficiency to their operations.

The board voted unanimously to support all the action items with exception to item 3, transfer of DOA Kunia parcels to ADC. It is our understanding that DOA plans to lease those Kunia parcels sometime in the near future.

We commend you for the development and your stewardship of this visionary plan for our district. We look forward to assisting you in the future as you move into the execution phase.

Respectfully,

Walter R. Benaytiz
President

Daniel S. Nakasone
1st Vice President

Wahiawa Community & Business Association, Inc.

The Honorable Malama Solomon
Senator, District 1
State Capitol, Room 207
Honolulu, HI 96813

Dea: Senators Dela Cruz and Solomon:

Thank you for sharing your vision for the Whitmore Village Agricultural Development Plan in your letters of July 6 and July 12. You will be pleased to know that there are initiatives under way by the administration to address your concerns and ideas.

I would first like to acknowledge and thank the legislature for the role it has played in the acquisition of the Galbraith Estate Lands which total 1781 acres. Funding sources for the \$25 million purchase include the State general obligation bond, the Office of Hawaiian Affairs (OHA), the Department of Defense Readiness and Environmental Protection Initiative, the City and County of Honolulu Clean Water and Natural Lands Program, the private donors through The Trust for Public Land, and coordination provided by the Agribusiness Development Corporation (ADC) and the Department of Agriculture (DOA) with the anticipation of finalizing the purchase of these lands in October. As you know, ADC has primary responsibility for developing and managing these lands and has begun the process of identifying priority actions to include: site preparation for 236 acres to be parceled out to several individual farmers, development of irrigation infrastructure to serve the entire parcel, and discussions with OHA about collaborative efforts to promote agriculture on 555 acres.

Hawaii

August 31, 2012

Mr. James J. Nakatani
Executive Director
Agribusiness Development Corporation
235 Beretania Street, Room 205
Honolulu, Hawaii 96813

Subject: Whitmore Land for State Agricultural Park program
TMK: (1) 7-1-002-099-000
Approximately 24 acres

Dear Mr. Nakatani:

This letter follows up on your letter of intent dated July 6, 2012, and related meetings with Beverly Kaku and Carleton Ching of Castle & Cooke in respect of the 24 acre Whitmore parcel.

Castle & Cooke is very interested in working with the Agribusiness Development Corporation (ADC) to promote diversified agriculture programs in the State of Hawaii. Castle & Cooke is historically one of Hawaii's major land owners, and we have served the needs of Hawaii's residents through balanced stewardship of our land assets. This includes the promotion of diversified agriculture as one of our historical, core businesses, as well as providing new homes and commercial amenities for Hawaii families, and pursuing renewable energy programs that will reduce our dependence on foreign oil.

State To Purchase Agricultural Land In Wahiawa

WAIHAWA, OAHU (HawaiiNewsNow) — The state is closer to buying the 1,723-acre Galbraith Estate lands in central Oahu, the state is ready to turn the area into an agricultural hub by inviting Hawaii farmers to come work the land.

"Wahiawa was a thriving ag community," said Sen. Donovan Dela Cruz. "Via Wahiawa, Wahiawa, Niihau, etc., one of the chief projects of the Wahiawa Village Agricultural Development Plan. Wahiawa Village employed thousands of people and nothing really took its place. We have a lot of thousands of acres between Wahiawa and the north shore and it's gotten a comprehensive plan."

... yet to be worked out, but any farmers who invest in the land as to packing and processing facilities and a stable water by Lake Wilson.

... and so of workers who would be hired would live at Wahiawa

The state acquired the 1,723-acre Galbraith Estate lands in December 2012

Special fund could help save Galbraith lands for agriculture

It is imperative that we protect valuable agricultural land. The need to preserve agricultural lands becomes even more apparent as demand for residential and other nonagricultural uses puts more agricultural land under the threat of development. With the establishment of the Clean Water and Natural Lands Fund by the voters in 2007, the Honolulu City Council has the opportunity to explore new ways to protect agricultural lands.

Money from the fund can be used to purchase or acquire real estate for land conservation to protect watersheds, forests, beaches, coastal land. The fund can also be used to purchase important land for preservation.

Heirs Preserve Hawaiian Trustee for Hundreds of Descendants to Sell In

By JIM CARLTON

Nov. 18, 2012 6:04 p.m. ET

WAIHAWA, Hawaii—The trustee for hundreds of heirs of Oahu island has agreed to sell their inheritance to the state farmland, reversing a decades-long trend of most such

The 1,750-acre tract, one of the island's largest undeveloped, George Galbraith, an Irish immigrant who acquired the

Oahu warehouse purchase ignites plan to revitalize Hawaii's agriculture industry

The long-awaited sale of the former Galbraith estate land in Central Oahu was completed last week to the Trust for Public Land, a nonprofit organization focused on environmental and preserving Native Hawaiian culture.

The group then transferred the 1,723-acre parcel to the state Agriculture Development Corporation (ADC) and the Office of Hawaiian Affairs (OHA). ADC acquired more than 1,200 acres while OHA got the remaining 523.

At an agreed-upon price of \$25 million, the amount was paid from a combination of sources, including the general obligation bonds (\$6 million), U.S. Army (\$4 million), City and County Clean Water & Natural Lands Fund (\$4 million), Office of Hawaiian Affairs (\$3 million) and D.R. Horton - Schuler Division (\$600,000). The Army's share came from the Pentagon's Readiness and Environmental Protection Initiative, which is designed to help preserve land from development around military installations. The Galbraith land is near Schofield Barracks and its training areas.

"The purchase and protection of the Galbraith land for agricultural uses is a game changing for Hawaii," said Gov. Neil Abercrombie. "This will allow us to reduce our reliance on food imports and increase our food security. Preserving agricultural land and producing our own food benefits us as a society."

George Galbraith, an Irish immigrant, acquired the land in the late 1800s, and the property was placed in a

Progress: Completed & Ongoing

Completed:

- ✓ Purchase 1,700 acres of Galbraith Estate land
- ✓ Purchase of Tamura Warehouse parcel
- ✓ Purchase of 24-acre Castle & Cooke parcel
- ✓ Public Use and Structure (Dept. of Planning and Permitting)
- ✓ Public-Public Partnerships with:
 - ✓ High Technology Development Corporation
 - ✓ Hawaii Housing Finance Development Corporation
 - ✓ Agribusiness Incubator Program
 - ✓ Dept. of Education
 - ✓ Wahiawa Community Based Development Organization

Pending:

- Purchase of 257-acre Dole Food Company, Inc. parcel
- Enter into Contractual Agreements with:
 - College of Tropical Agriculture and Human Resources
 - City & County of Honolulu –Dept. of Environmental Services

Continuing:

- Designing an planning of Ag-Tech Park
- Designing and planning of pump/irrigation systems
- Purchasing available parcels from Dole Food Company, Inc. (or land exchange)
- Identifying and collaborating with various stakeholders
