H.B. NO. ²⁵⁴² H.D. 2

A BILL FOR AN ACT

RELATING TO THE AUDITOR.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

SECTION 1. The legislature finds that invasive species
 arrive at United States ports of entry every day, hidden in the
 wooden crates, pallets, and shipping containers used to
 transport agricultural cargo, or concealed in the imported goods
 themselves. Failure to detect and intercept these invasive
 species imposes serious economic and social costs on all
 Americans.

8 The United States Department of Agriculture has stated that 9 foreign pests and disease already cost the United States economy 10 tens of billions of dollars annually in lower crop values, 11 eradication programs, emergency payments to farmers, and 12 increased costs for food and other natural resources.

In light of the current and potential staggering economic costs of invasive species, which fall on businesses, taxpayers, and local governments that have no way to avoid the harm, it is critical to focus on prevention, specifically improving agricultural import and entry processes.

H.B. NO. ²⁵⁴² H.D. ²

1 Economic costs are just one aspect of the severe consequences that can result from foreign pests and disease 2 3 slipping through our ports. In Hawaii, which is home to more 4 endangered species per square mile than any other area on the 5 planet, invasive species and disease could permanently devastate 6 the State's fragile ecosystem. Hawaii is ranked highest among 7 the fifty states in risk to biodiversity of plants, mammals, 8 birds, and reptiles. Over one hundred species of native plants, 9 ninety per cent of seven hundred fifty species of terrestrial 10 snails, and seventy-one of at least one hundred thirteen bird species have already been lost to extinction. While Hawaii 11 accounts for only 0.2 per cent of the landmass of the United 12 States, Hawaii is home to thirty-eight per cent of the nation's 13 14 threatened and endangered plants and forty-one per cent of the 15 nation's endangered birds. For the majority of these extinct 16 and endangered species, invasive species are a primary contributor to their decline. 17

During the attempt to expand Kahului airport in 1998, the federal Departments of Agriculture, Transportation, and Interior joined the state departments of agriculture, land and natural resources, and health in signing a memorandum of understanding

H.B. NO. ²⁵⁴² H.D. ²

that recognized that oceanic island ecosystems in general, and
 the Hawaiian islands and Maui in particular, are highly
 susceptible to damage from alien invasive species, including
 damage to the natural, agricultural, and human assets.

The record of decision for Kahului airport stated that 5 there are serious concerns about the airport as an entry point 6 7 for alien invasive species. Further, because the introduction of alien invasive species poses serious problems to the State's 8 ecosystem, any introduction of alien invasive species via the 9 airport or any other entry points may lead to significant 10 cumulative impacts. As a result, federal and state agencies 11 cooperatively devised the alien species action plan to further 12 minimize the chance of alien species introductions via aircraft 13 arriving at Kahului airport. The Federal Aviation 14 Administration made the requirement of the biological opinion 15 16 and the alien species action plan conditions of its approval. In similar fashion, in 2004, the Hawaii Superferry signed 17 an agreement to buy two nine-hundred-passenger, two-hundred-18

eighty-vehicle vessels, only to go bankrupt in 2009, because ofcostly environmental litigation.

H.B. NO. $^{2542}_{H.D.2}$

Hawaii is now the center of the United States military's 1 strategic rebalance to the Asia-Pacific region. When military 2 movements are completed, sixty per cent of the United States 3 Navy's fleet will be in the Pacific-Indian Ocean area. However, 4 the rebalance to the Asia-Pacific region not only has a military 5 component, it is also a whole-of-government approach. It 6 entails strengthening alliances and partnerships and building an 7 economic infrastructure. The Trans-Pacific Partnership 8 agreement has been signed and is expected to cover forty per 9 cent of world gross domestic product and nearly a third of world 10 exports. Hawaii must be ready for this strategic pivot that is 11 expected to shape the global order in coming decades. 12 The Hawaii biosecurity system, which was based on the alien 13 species action plan, and improved through consultation with the 14 agricultural, environmental, and transportation sectors, was 15 moving rapidly toward completion. However, the state 16 administration has continued to undermine Hawaii's quarantine 17 system, creating more gaps in the State's battle to prevent the 18 introduction of invasive pest species. Inspectors are 19 inspecting less imported cargo at the ports and their insect and 20

21 disease interception rates have dropped drastically from 3,416

HB2542 HD2 HMS 2016-2256

H.B. NO. ²⁵⁴² H.D. 2

interceptions in fiscal year 2013 to one thousand thirty-four 1 interceptions in fiscal year 2015. There is visible frustration 2 with the administration's lack of transparency in failing to 3 provide annual reports required by law for the last two years 4 and increased concerns from members of the agricultural and 5 environmental communities, and the public at-large, regarding 6 the lack of progress in continuing the implementation of the 7 8 biosecurity program.

9 The legislature further finds that the plant quarantine 10 branch of the department of agriculture is a critical component 11 in meeting the threat of invasive species entering Hawaii 12 through its ports of entry.

Accordingly, the purpose of this Act is to require the auditor to conduct an audit of the plant quarantine branch of the department of agriculture.

16 SECTION 2. The auditor shall conduct a financial and 17 performance audit of the duties and facilities of the plant 18 quarantine branch of the department of agriculture, including 19 the branch's biosecurity program and related programs.

20 The auditor shall submit a report of its findings and
21 recommendations, including any proposed legislation, to the

H.B. NO. ²⁵⁴² H.D. ²⁵⁴²

1 governor and the legislature no later than twenty days prior to

- 2 the convening of the regular session of 2017.
- 3 SECTION 3. This Act shall take effect on July 1, 2030.

H.B. NO. ²⁵⁴² H.D. 2

Report Title:

Auditor; DOA; Plant Quarantine Branch

Description:

ī.

Directs the Auditor to audit the Plant Quarantine Branch of the Department of Agriculture. (HB2542 HD2)
