
A BILL FOR AN ACT

RELATING TO OCEAN MANAGEMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that President Barack
2 Obama issued Presidential Proclamation 9478 on August 26, 2016,
3 expanding the Papahānaumokuākea Marine National Monument to
4 provide critical protections for more than seven thousand marine
5 species, including whales and sea turtles listed under the
6 Endangered Species Act and the longest-living marine species in
7 the world - black coral, which have been found to live longer
8 than four thousand five hundred years. Additionally, as ocean
9 acidification, warming, and other impacts of climate change
10 threaten marine ecosystems, expanding the monument will improve
11 ocean resilience, help the region's distinct physical and
12 biological resources adapt, and create a natural laboratory that
13 will allow scientists to monitor and explore the impacts of
14 climate change on these fragile ecosystems.

15 The expanded monument area also contains resources of great
16 historical and cultural significance. The expanded area,
17 including the archipelago and its adjacent waters, is considered

1 a sacred place for the Native Hawaiian community. It plays a
2 significant role in Native Hawaiian creation and settlement
3 stories, and is used to practice important activities like
4 traditional long-distance voyaging and wayfinding.
5 Additionally, within the monument expansion area, there are
6 shipwrecks and downed aircraft from the Battle of Midway during
7 World War II, a battle that marked a major shift in the progress
8 of the war in favor of the Allies.

9 The legislature further finds that Proclamation 9478
10 directs federal agencies to work together with the State to
11 create a joint management plan by August 26, 2019, and adopt
12 implementing regulations, as appropriate, that address any
13 further specific actions necessary for the proper care and
14 management of the monument.

15 The legislature further finds that to improve the
16 resilience of corals and ensure their continued benefit to the
17 State, local stressors that are within our control, including
18 sediment and nutrient runoff from land, invasive species, and
19 illegal and unsustainable fishing, need to be effectively
20 managed. The State's commitment to effectively manage thirty
21 per cent of Hawaii's nearshore waters by 2030 should be echoed

1 throughout all state and county agencies that manage coastal
2 zones.

3 The purpose of this Act is to:

4 (1) Statutorily establish a goal to effectively manage
5 thirty per cent of nearshore waters by 2030; and

6 (2) Establish the Papahanaumokuakea Marine National
7 Monument program to coordinate and fulfill the State's
8 role and responsibilities in co-managing the
9 Papahanaumokuakea Marine National Monument.

10 SECTION 2. Section 205A-63, Hawaii Revised Statutes, is
11 amended to read as follows:

12 "[+]§205A-63[+] Agency duties to coordinate related
13 programs. All agencies managing marine and coastal resources,
14 shall:

15 (1) Actively work toward the goals, objectives, and
16 policies established by this chapter[+], including by
17 establishing a goal of achieving effective management
18 of thirty per cent of nearshore waters by 2030; and

19 (2) Coordinate the development of the state or county
20 agency's programs with the plan.

1 For the purposes of this section, "effective management" means
2 adaptive management approaches balancing sustainable use,
3 restoration, and conservation measures."

4 SECTION 3. The Hawaii Revised Statutes is amended by
5 adding a new chapter to be appropriately designated and to read
6 as follows:

7 "CHAPTER
