BEFORE THE HOUSE COMMITTEES ON AGRICULTURE AND
ENERGEY & ENVIRONMENTAL PROTECTION

FEBRUARY 7, 2017
8:30 A.M.
CONFERENCE ROOM 325

HOUSE BILL NO. 253
RELATING TO PESTICIDES

Chairpersons Creagan and Lee and Members of the Committee:

Thank you for the opportunity to testify on House Bill No. 253. This bill seeks to ban the use of all pesticides that contain the active ingredient chlorpyrifos in the state of Hawaii to protect human health and the environment. The Department opposes this bill and provides the following comments.

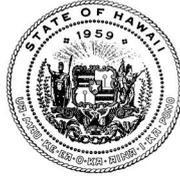

The U.S. Environmental Protection Agency (EPA) issued a tolerance revocation proposal in October 2015, proposing to revoke all food residue tolerance for chlorpyrifos, as a result of the human health risk assessment published in 2014. This was based on the finding that safe levels of chlorpyrifos exposure from food and residential exposures would be exceeded for those populations consuming drinking water where water comes from small systems in heavily farmed areas where chlorpyrifos was widely used. The EPA is reviewing and addressing all comments received for this action, including those that may provide mitigation measures to allow for retaining some of the food uses, and will issue a final decision on March 31, 2017. Any ban on a state level would be premature, as EPA has yet to make a final determination.

There are currently 25 pesticide products containing chlorpyrifos licensed in the state of Hawaii, only 13 of which have food uses that would be affected by the tolerance

revocations. There are 12 products that would still be available for use and include uses in tree plantations, turf grown for sod, ornamentals grown in nurseries and greenhouses, golf courses, and other industrial sites, as well as in ant and roach baits in child resistant packaging. The EPA's proposed tolerance revocation is an attempt to address concerns raised by the human health risk and drinking water assessments, with risks identified from dietary exposures and from drinking water. An across-the-board ban is not supported by EPA's findings and would unnecessarily prohibit the use of essential tools for the agricultural and pest control industries in integrated pest management programs. The Hawaii Department of Agriculture is aligned with the decisions and policies of the EPA on this measure. They have the expertise and the experience to regulate pesticide products and, as a result of those processes, are able to evaluate the potential health impact and assess the risk/benefit consequences when approving the uses of pesticides for use in crop/home/and garden. As such, the Department recommends relying on the EPA tolerance revocation decision in March of this year.

Thank you for the opportunity to testify on this measure.

Testimony COMMENTING on HB 842
Relating to the Health Impact of Pesticides

REPRESENTATIVE RICHARD P. CREAGAN , CHAIR
HOUSE COMMITTEE ON AGRICULTURE

Hearing Date: February 8, 2017
Time: 8:30 a.m.

Room Number: 312

1 **Fiscal Implications:** Unknown but significant

2 **Department Testimony:** H.B. 842 seeks to amend H.R.S. Chapter 321. The Hawaii
3 Department of Health (DOH) supports the concept but notes that regulating use and application
4 of pesticides is not a DOH function, and does not belong within the DOH statutes.

5 H.B. 842 asks the DOH to establish buffer zones around schools for any entity or person that
6 uses pesticides under certain circumstances. DOH believes that the health of our keiki and other
7 sensitive communities should be protected from exposure to hazardous chemicals, and believes
8 that buffer zone determinations should be data-driven and pesticide specific. However, DOH
9 does not regulate use and application of pesticides, or possess the necessary pest management
10 expertise to make regulatory decisions affecting crop protection.

11 DOH in the past has conducted stream sampling for the state for hundreds of currently used
12 pesticides, coordinated a cancer cluster evaluation for Kauai with the University of Hawaii,
13 evaluated birth defect cases for Kauai, and is currently assisting the Environmental Protection
14 Agency (EPA) with a training for physicians on recognition and management of pesticide
15 exposures. Currently, DOH is partnering with the Hawaii Department of Agriculture (DOA) and
16 the United States Geological Survey to conduct a 2-year surface water pesticide study to
17 investigate off target movement of pesticides into streams in Hawaii.

18 DOH regulates pesticide residues in food crops, surface water, groundwater, and drinking water.
19 Pesticide disposal is covered by DOH solid and hazardous waste rules. In our State Response
20 Program, DOH investigates pesticide residues in soils and groundwater to protect local
21 communities from historic impacts due to historic pesticide mixing sites. DOH also assists other
22 agencies and community members who have health and environmental concerns related to
23 pesticides and other chemical exposures. Both DOH and DOA participate in the incident

1 command system protocol for emergency response situations involving pesticides. In non-
2 emergency situations where a pesticide related release is suspected, DOA takes the lead and
3 requests assistance from DOH and other agencies, as necessary.

4 In addition, DOH does not have existing positions to implement pesticide buffer zones.
5 Establishing these functions at DOH would be duplicative, require establishment of a new
6 program within the Department and could cause confusion for pesticide applicators. Pesticide
7 notice and disclosure and buffer zones are most efficiently implemented by DOA Pesticides
8 Branch which regulates the use, sale, and distribution of pesticides in the State of Hawaii, and
9 has expert staff providing oversight, applicator education, and enforcement of proper pesticide
10 use practices.

11 DOH supports the Kauai Agricultural Good Neighbor Program, a voluntary pesticide-use
12 disclosure program on Kauai that provides monthly reports of restricted pesticide use, a 100-foot
13 buffer zone between pesticide application and sensitive communities, and pre-application
14 notification to neighboring property owners upon request. Because pesticides occur and move
15 very differently from each other in the environment, DOH believes that buffer zone
16 determinations should be data-driven and pesticide specific. For example, based on the science
17 presented in the U.S. Environmental Protection Agency's most recent human health risk
18 assessment in 2016 for chlorpyrifos, DOH supports a ban or implementation of additional
19 restrictions, including protective buffer zones to protect pregnant women and their children from
20 exposure to this pesticide. Additionally, the method of application affects the degree of off-
21 target movement.

22 DOH does have extensive expertise in collecting, analyzing, and interpreting environmental data
23 to detect off-target movement of pesticides, as well as other contaminants. The results are then
24 used to determine whether regulatory values are being exceeded and where corrective actions are
25 needed to reduce these unintended effects. We are prepared to provide scientific and technical
26 expertise to the DOA to identify data gaps needed to determine whether off-target movement of
27 pesticides requires additional state regulatory protections to protect the health and wellbeing of
28 our keiki and other sensitive communities.

29 Thank you for the opportunity to provide comments on this important measure.

30 **Offered Amendments:** none

Comments: Do you want YOUR CHILD or GRANDCHILD exposed to Chlorpyrifos? If you answer yes well then read on and see if you still think it's a good idea. "In epidemiological studies, chlorpyrifos exposure during gestation or childhood has been linked with lower birth weight and neurological changes such as slower motor development and attention problems. Exposure to organophosphate pesticides in general has been increasingly associated with changes in children's cognitive, behavioral and motor performance." Please support the ban of Chlorpyrifos use anywhere in Hawaii. Mahalo, Janet Mercer

February 7, 2017

HOUSE COMMITTEE ON AGRICULTURE
HOUSE COMMITTEE ON ENERGY AND ENVIRONMENTAL PROTECTION

TESTIMONY ON HB 253
RELATING TO RELATING TO PESTICIDES

Room 325
8:30 AM

Aloha Chairs Creagan and Lee, Vice Chairs DeCoite and Lowen, and Members of the Committees:

I am Randy Cabral, President of the Hawaii Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,900 farm family members statewide, and serves as Hawaii's voice of agriculture to protect, advocate and advance the social, economic and educational interests of our diverse agricultural community.

The Hawaii Farm Bureau opposes HB 253, which would ban the use of chlorpyrifos.

HFB respectfully opposes this bill for the following reasons:

- Chlorpyrifos is registered by the U.S. EPA after thorough vetting for safety. EPA has the expertise to evaluate pesticide products and conducts comprehensive evaluations and periodic re-evaluations of each pesticide before allowing it to be sold and used.
- The product is available to farmers to use in every state. If arbitrarily banned in Hawaii, it would put our farmers at a disadvantage compared to mainland farmers.
- Farmers in Hawaii use this product safely as part of an Integrated Pest Management program because it is effective and critical in controlling damaging insects that destroy their crops.
- Many of the claims made in this measure are inaccurate and misleading and contradict EPA's findings and regulatory standards for chlorpyrifos based on over 40 years of toxicological data.
- Monitoring studies at Waimea Canyon Middle School, and other Kauai locations, show that the air quality is well within the strict health-based screening levels established by regulatory authorities.
- The often-cited school incident at Waimea Canyon Middle School that caused students to be evacuated, was determined by state officials **not** to be caused by pesticides.

HFB is extremely concerned that the scientifically unjustified banning of chlorpyrifos will make it nearly impossible to control certain devastating invasive pests that destroy farmer's crops and make farming in Hawaii impossible.

Thank you for your careful consideration of our comments in opposition to this bill, and for your support of Hawaii's farmers and ranchers.

Dear lawmakers,

I am writing in strong support of HB253. As a farmer and agriculture researcher/educator, I recognize both the need for pesticides and the dangers of under-regulation. We desperately need to responsibly move our agriculture towards practices that reduce pesticide use (including crop rotation, planting of beneficial insectaries, planting of adapted crop varieties, etc). Thus we need the voices of those with other perspectives represented on decision-making and oversight entities. We also need to push agriculture away from the most dangerous chemicals by tightening regulations. The ecological and public health dangers of many pesticides are no longer in dispute. In the case of chlorpyrifos this is especially true: <https://theintercept.com/2017/01/14/dow-chemical-wants-farmers-to-keep-using-a-pesticide-linked-to-autism-and-adhd/> AND <https://www.nytimes.com/2017/02/03/opinion/sunday/protect-our-childrens-brains.html? r=0> We must not allow habits and entrenched financial interests drive policy in this area, but rather let science and the cautionary principle be our guide. Please strongly support the many pending legislative bills aiming to accomplish this during this session. Our keiki, our water ways, our soils, and the future of a more innovative agriculture deserve it.

Thank you for your time and work,
Jay Bost

Aloha members of the committee,

I strongly support HB253

I was one of the two physicians who served on the Joint Fact Finding task force (JFF). I am a board certified pediatrician and a former CEO of Wilcox Hospital on Kauai. Over an eighteen month period, the task force reviewed the world's literature on the issues of pesticides and health. In addition, we reviewed the medical data and the Department of Education's data concerning the Westside communities which are potentially affected by large scale pesticide spraying.

We not only looked at the health of the community but we studied several of the more controversial pesticides in depth.

Chlorpyrifos is a pesticide that clearly should be banned.

1. It works as a neurotoxin.
2. Well-respected studies from Columbia University and Berkeley have shown an alarming straight line correlation between decreases in IQ and increases in other behavioral issues in children with increases in the urinary metabolites of chlorpyrifos in the urine of pregnant women while they were carrying these children.
3. These studies looked at pregnant women living in apartments that had been sprayed (before they banned it for household use) and more recently in women who lived near sprayed agricultural fields.
4. The EPA recommended in October of 2015 that it should be banned for agricultural uses because of safety concerns, including worker safety and contamination of surface waters. According to the New

York Times, this ban has been delayed due to strong pushback by DOW Chemical.

5. In April of 2016, the EPA released a scientific position paper stating that Chlorpyrifos is likely to adversely affect 97% of endangered species and their habitats.
6. The UK banned chlorpyrifos for most agricultural uses with little notice due to “safety concerns”.
7. On Kauai we know from the JFF report that chlorpyrifos is the second most heavily sprayed restricted use pesticide and is sprayed at 1.7-5 greater amounts per acre than it is on the mainland.
8. The EPA is under attack by the current administration and our counties have clearly been told that they cannot regulate pesticides. We need the state to play a strong role in protecting our environment.

Thank you for considering my testimony.

Board of Directors:

House Committee on Agriculture

Hawai'i Alliance for Progressive Action strongly supports: HB253

Gary L. Hooser
President

Chair Creagan, Vice Chair DeCoite and members of the committee,

Andrea N. Brower
Joshua D. I. Mori
Co-Vice Presidents

My name is Anne Frederick and I am the Executive Director for the Hawai'i Alliance for Progressive Action (HAPA). HAPA is a statewide environmental, social and economic justice organization. HAPA emerged out of the community-led movement on Kaua'i to enact greater regulations around pesticide use and disclosure, which led to the passage of Bill 2491. HAPA's fair and sustainable food systems work focuses on protecting Hawai'i's environment and the health of its residents from the potentially harmful pesticide impacts. HAPA engages over 10,000 local residents annually through our work.

Ikaika M. Hussey
Treasurer

Bianca K. Isaki
Secretary

I am writing in strong support of HB 253.

This bill aims to protect our communities by banning the highly toxic insecticide, chlorpyrifos.

Paul Achitoff

Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children. Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai'i on GMO research fields.

Malia K. Chun

Bart E. Dame

Laura Harrelson

In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. Furthermore, The EPA is currently considering banning use of Chlorpyrifos on food crops.

Kim Coco Iwamoto

Katie McMillan

Walter Ritte Jr.

At least 27 schools in Hawai'i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua'i).

The Hawai'i Alliance for Progressive Action (HAPA) is a public non-profit organization under Section 501(c)(3) of the Internal Revenue Code. HAPA's mission is to catalyze community empowerment and systemic change towards valuing 'aina (environment) and people ahead of corporate profit.

In 2016 HAPA circulated a 4 point petition and collected signatures from 2,628 Hawai'i resident's calling on State Legislator's to "ban the use of all products containing the ingredient chlorpyrifos." The signed petition is attached for your review.

Given the growing body of research on the harmful effects of chlorpyrifos, I strongly encourage this committee to protect our communities and pass this measure and other related measures today.

Respectfully,

Anne Frederick, Executive Director
Hawai'i Alliance for Progressive Action

To: Governor Ige, Hawai`i State Legislators, and the Hawai`i Depts. of Agriculture and Health

From: [Your Name]

We the undersigned Hawai`i residents hereby demand that our State and County government leaders (via executive order, rule making authority or by legislative action) immediately:

1. Ban the use of all products containing the ingredient chlorpyrifos;
2. Require full disclosure of pesticide use by largest users of restricted use pesticides;
3. Require pesticide free 'protection zones' around all schools, hospitals, and homes;
4. Acknowledge and preserve the 'home rule' rights of County governments to protect the health and environment of their citizens.*

It is government's duty to protect Hawai`i's people and environment over the corporate interests of multinational corporations who are using Hawai`i's resources for their financial gain.

We demand action now on behalf of the `āina, and current and future generations.

(See attached signatures from 2,628 Hawai`i residents)

**please note: petition was circulated prior to 9th circuit court ruling*

Comments: The Environmental Protection Agency has identified Chlorpyrifos as a particularly dangerous chemical that has been found in the ambient air at Waimea Canyon Middle School in the one study paid for by the County of Kauai. It is likely in the ambient air in the surrounding areas of Kekaha and Waimea or the areas bordering the farms, in general. We need to be pro-active in our community in tight proximity and downwind of the areas being sprayed. Chronic low-level exposure is not even studied to have threshold levels to regulate and are the more realistic level being experienced through drift. Please support this bill that is consistent with the ban on the use of this chemical in other states and countries. Felicia Cowden Kilauea, Kauai

Comments: Why not join the rest of the civilized world & ban chlorpyrifos? The danger is WELL documented. Anyone who would vote against this bill is a bad human. The suffering from this particular pesticide is immense.

Tuesday, February 7, 2017, 8:30 a.m., Conference Room 325

HB253– Relating to Pesticides: Pesticides; Prohibition; Chlorpyrifos

HB1282 – Relating to Insecticide and Herbicide Use: Neonicotinoid Insecticide; Glyphosate Herbicide; Pesticides; Agriculture

TESTIMONY

Nancy Davlantes, Legislative Committee Member, League of Women Voters of Hawaii

Chairs Richard Creagan and Chris Lee, Vice-Chairs Lynn DeCoite and Nicole Lowen, committee members:

The League of Women Voters of Hawaii supports HB253 and HB1282, bills that would, respectively, prohibit the use of pesticides containing the active ingredient chlorpyrifos and prohibit the application of neonicotinoid insecticides and glyphosate herbicides after December 31, 2019, without a license or permit from the state or federal government.

When the League submitted comments to the Joint Fact Funding Study Group in April 2016, we expressed our disappointment that the Department of Agriculture declined to act on the group's recommendations, citing the lack significant evidence that pesticide use by large agricultural companies has harmed Kauai's residents or its environment. At the time, our position was that the lack of data necessary to determining the existence of significant harm put Kauai residents, and the rest of the state, for that matter in a Catch-22 situation, caught between a serious lack of data and a state agency unwilling to act to collect it.

It is therefore gratifying to see the number of pesticide-related bills that have not only been introduced but have advanced in this legislative session.

In prohibiting the application of any insecticide containing chlorpyrifos, **HB253** recognizes the concerns of the federal Environmental Protection Agency, which has determined that chlorpyrifos can over-stimulate the nervous system, causing nausea, dizziness, confusion, and, at very high exposures, respiratory paralysis and death. Extensive scientific studies show exposing children or pregnant women to chlorpyrifos in even small amounts may cause developmental delays, permanently reduced cognitive capacity, behavioral problems, and learning disabilities.

HB1282 addresses concerns two widely used products, neonicotinoid insecticides and glyphosate herbicides, because their widespread use has been shown to harm to both residents and plant and animal species. Native bees, beneficial insects of all kinds, and food chains of aquatic invertebrates, insects, birds, bats, and other pollinators in Hawaii are at risk from environmental contamination by highly-persistent neonicotinoids.

49 South Hotel Street, Room 314 | Honolulu, HI 96813
www.lwv-hawaii.com | 808.531.7448 | voters@lwv-hawaii.com

As for glyphosate, according to the EPA's own fact sheet, glyphosate, more commonly known as Roundup, is among the most widely used pesticides by volume. Since its approval some 20 years ago, resistance to glyphosate has emerged in numerous weed species. Farmers are discovering that when you spend years dousing land with a single herbicide, ecosystems adapt. Roundup-ready crops met Roundup-defying weeds, much to the detriment of Hawaii's residents, plants, animals, and natural resources.

The League has long had a position on the environment to preserve the physical, chemical and biological integrity of the ecosystem, with maximum protection of public health and the environment.

Thus we urge you to pass these bills. Thank you for the opportunity to submit testimony.

February 5, 2017

Rep. Richard P. Creagan, Chair
Rep. Lynn DeCoite, Vice Chair
Senate Committee on Agriculture

Rep. Chris Lee, Chair
Rep. Nicole E. Lowen, Vice Chair
Senate Committee on Energy and Environmental Protection

RE: HB253 **RELATING TO PESTICIDES.**
Prohibits the use of pesticides containing the active ingredient
chlorpyrifos.

DATE: Tuesday, February 7, 2017
TIME: 8:30 AM
PLACE: Conference Room 325, State Capitol
415 South Beretania Street

Aloha,

My name is Teal Sargent. I am a long term resident on the island of Kaua'i, Hawai'i. I am a mother, part-time employee and I am currently pursuing a Masters degree in Social Work at the Myron B. Thompson School of Social Work. It is great pleasure that I write today to **strongly support** HB253, which prohibits the use of pesticides with the active ingredient chlorpyrifos. There have been many tests concluding the unsafe side effects of this pesticide on the environment, the health of pregnant women and the cognitive development of a child.

As a full time student, part-time employee and long term resident and mother in Hawai'i this bill directly affects my family's future on the island. This pesticide threatens the health of my children as well as any unborn child I may have in the future. It also threatens the air quality, as well as, the ocean and river systems many residents depend on for survival. I feel so lucky to live on this beautiful island and would like to see it protected from being destroyed from harmful pesticides such as chlorpyrifos.

I strongly encourage the legislature to support HB253 as it protect the environment and our children from its very dangerous and harmful effects.

Mahalo for the opportunity to testify.

Sincerely,
Teal Sargent

February 5, 2017

RE:

Position: SUPPORT

Aloha,

My name is Andrea Nandoskar. I live in Waikiki at 440 Lewers Street. Representative Tom Brower, one of the representatives who introduced the bill, is my state rep.

I SUPPORT HB253 which prohibits the use of pesticides containing the active ingredient chlorpyrifos. Chlorpyrifos is a dangerous chemical that was prohibited for indoor home use in 2001 yet we continue to allow it to be used in agriculture which makes no sense. All chemicals indoor and out, end up in our air, water, soil and ultimately our bodies.

Here's some information on the effects of this chemical from the Pesticide Action Network:

Chlorpyrifos is an organophosphate pesticide known for its damaging effects on the human nervous system. Like all OPs, chlorpyrifos blocks an enzyme ([acetylcholinesterase](#)) that our brains need to control acetylcholine, one of the many neurotransmitters mediating communication between nerve cells. These neurological effects pose especially elevated risks for children as their brains and nervous systems develop.

Short-term symptoms of low-dose exposure may include headaches, agitation, inability to concentrate, weakness, tiredness, nausea, diarrhea and blurred vision. Higher doses can lead to respiratory paralysis and death. Pregnant women may also be more sensitive to chlorpyrifos toxicity according to the [Agency for Toxic Substances and Disease Registry](#). In addition to the immediate effects of exposure, chlorpyrifos is linked to a number of serious longer term health impacts:

Adverse effects on neurodevelopment: There is a body of work around the negative impacts of chlorpyrifos (and other organophosphates) on various aspects of cognitive development. Chlorpyrifos has been well-studied in animal models and has been shown to cause a [range](#) of neurodevelopmental effects, such as impacting genes that control essential processes in developing brain cells. Exposure to low levels of chlorpyrifos or organophosphates has been shown to negatively impact various aspects of cognitive development in humans in several studies.

Other adverse effects: reduced birth size, endocrine disruption, possible links to both lung and prostate cancer.

Why would we want to allow such a chemical to be used near our keiki, on our aina and near our moana? I support the bill which would ban this chemical and hope you will too.

Mahalo for your assistance in supporting this bill.

Aloha,

Andrea Nandoskar

Comments: I am a fierce protector of babies, as I love them, it is my work to bring them into the world, meaning i have big kuleana to do all that I can to keep them safe and help them grow and one day have healthy children and a healthy place for them to come. chlorpyrifos has broad spectrum toxicities and for humans, fish and bees. It can also interact with other compounds including common medicines to increase toxicity, including to the developing fetus. With this legislation, we begin to protect the public from the cumulative and synergistic effects of chronic exposure to pesticides. We need you all to do the right thing and keep our future generations safe and clean up the mess we already have. Mahalos for the bill

6721 Kawaihau Road
Kapaa, Hawaii 96746

To: House AGR/EEP Committee
From: John R. Gordines
Currently Tropical Flower farmer/exporter (25 years)
Retired Farm Manager of Kauai Ag Research Center, UH College of Tropical Agriculture (32 years)

Regarding:

HB 253

Measure Title: Relating to pesticides

Report Title: Pesticides: Prohibition of chloropyrifos

Description: Prohibits the use of pesticides containing the active ingredient chloropyrifos

- **I OPPOSE THIS BILL HB253**

Chloropyrifos is used around the world in about 100 nations for excellent pest control. It is a very versatile pesticide and controls a vast amount of crops, is registered with the EPA.

It is used on many Hawaii crops such as pineapple, vegetables, melons and corn. It is widely used by Hawaii farmers for integrated pest management.

Regarding drift and exposure causing health problems, government and academic air monitoring studies have consistently shown that potential exposures fall well within health-based screening levels established by regulatory authorities.

This bill to ban this important tool in our state is unjustified and would put agriculture in Hawaii at yet another disadvantage compared to mainland ag production.

These decisions should be made by the Environmental Protection Agency.

Respectfully Submitted,

John R. Gordines

Comments: Dear Representatives: Thank you for sponsoring and considering this legislation. Chlorpyrifos has broad spectrum toxicities and for humans, fish and bees. It can also interact with other compounds including common medicines to increase toxicity, including to the developing fetus. With this legislation, we begin to protect the public from the cumulative and synergistic effects of chronic exposure to pesticides. I do hope that you pass this bill, we are killing ourselves. Sincerely, Dr. Joseph Kassel N.D. L.Ac.

TESTIMONY FROM BENNETTE MISALUCHA, EXECUTIVE DIRECTOR

In Opposition to HB 253

Relating to Pesticides

Prohibits the use of pesticides containing the active ingredient chlorpyrifos

HOUSE COMMITTEE ON AGRICULTURE AND
HOUSE COMMITTEE ON ENERGY & ENVIRONMENTAL PROTECTION

February 7, 2017, 8:30 a.m.

Conference Room 325

Chairs Creagan and Lee and members of the committees:

HCIA is a Hawaii-based non-profit organization that promotes modern agriculture to help farmers and communities succeed. Through education, collaboration, and advocacy, we work to ensure a safe and sustainable food supply, support responsible farming practices, and build a healthy economy.

The Hawaii Crop Improvement Association (HCIA) **opposes HB 253**, which seeks to prohibit the use of pesticides containing the active ingredient chlorpyrifos.

There is no credible data to suggest a reason to ban chlorpyrifos in Hawaii. The U. S. Environmental Protection Agency evaluates and registers pesticides to ensure that they will not harm people, non-target species, or the environment. After years of testing and scientific studies, EPA determines if a pesticide can be sold and used.

Chlorpyrifos is registered and available to farmers in all 50 states and has been for 40 years. In Hawaii, it is a critical tool for farmers of such crops as pineapple, vegetables, and corn. In fact, chlorpyrifos is a key Integrated Pest Management tool used by pineapple growers to control mealybugs. Banning this important tool would put agriculture in Hawaii at yet another disadvantage compared to mainland agricultural production.

The EPA is currently producing an updated order outlining how chlorpyrifos may be used, and a final decision will be issued before the end of March. We believe that no statutes should be created until the EPA has ruled on the issue, as they have the expertise, a formal process of evaluation, and the authority to make these types of important decisions.

Thank you for your consideration of our comments in opposition to HB 253.

Respectfully submitted,

Bennette Misalucha
Executive Director

Comments: Thank you to the pono sponsors of this bill, working to protect our keiki and our 'āina. Please pass this bill. The vision of a sustainable, renewable, divisified agriculture system is possible in Hawaii if we would only reject the dangerous predatory practices of mono-crop agri chemical fake farmers.

Comments: THIS IS THE MOST IMPORTANT TIME IN OUR HISTORY OF MANKIND.....& HAWAII..... TO BECOME THE VOICE OUR DEMOCRACY...(is a system of government in which the citizens exercise power directly or elect representatives from among themselves to form "THE VOICE OF THE PEOPLE"... WE DEFIANTLY NEED TO "STOP"...THE "POWER AND THE CORRUPTION" CAUSED BY THESE CORRUPTED BY MONEY CORPORATIONS.... HAWAII is at a threshold....."ALLOWING MORE & MORE POISONS"...(the corporations call pesticides & herbicides)...to POLLUTE & DESTROY our daily lives has to END now...!! Its finally time to END the "OPEN AIR" EXPERIMENTING" on our lives and the Aina..... Poison (a substance with an inherent property that tends to "DESTROY LIFE".. or impair health.) THESE CORPORATIONS ARE TAKING "MONETARY ADVANTAGE" OVER OUR LIVES AND WE IN HAWAII....DEMAND THIS TO FINALLY END...!! SINCERELY DONNIE BECKER MAUI, HAWAII.

February 4, 2017

The Honorable Richard Creagan
Chair, House Committee on Agriculture

The Honorable Chris Lee
Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy &
Environmental Protection Committee

RE: HB 253, RELATING TO PESTICIDES (OPPOSE)

Dear Chairman Creagan and Chairman Lee:

On behalf of the Western Plant Health Association (WPHA), I am writing to express our **opposition** to HB 253, which would prohibit the use of pesticides containing the active ingredient chlorpyrifos. WPHA represents the interests of fertilizer and pesticide manufacturers, agricultural biotechnology providers, and agricultural retailers in Hawaii, California, and Arizona.

WPHA appreciates the author's interest in assuring the safety of the public and environment. We understand that while the intent of the bill is to protect human health and the environment, we believe this bill is unnecessary and will result in higher costs to farmers to protect their crops and likely reduce yields for farmer whose crops will be at great risk without chlorpyrifos.

WPHA also believes that the bill is unnecessary as US-EPA is mandated to issue an updated order on the legal parameters under which the product may be used. The updated order must be issued before the end of March. We believe that it would be imprudent for Hawaii to move forward prohibiting chlorpyrifos's use prior to US-EPA issuing its updated use requirements. No other state has taken action or even proposed to take an independent action ahead of the upcoming US-EPA decision.

The argument that a legally registered pesticide is unsafe is a misstatement. Before any product can be registered for sale and use in the United States, it must be approved by the U.S. Environmental Protection Agency (US-EPA). The US-EPA is the head scientific body in the United States that sets strict scientific policies and guidelines for pesticide products to ensure they can be used safely and effectively. During the registration process these products undergo hundreds of comprehensive scientific studies.

Chlorpyrifos is one of the most widely used pest control products in the world. It is used to protect virtually every crop currently under cultivation and is registered for use in about 100 nations. It is a critical tool for Hawaii farmers of crops including pineapple, melons, vegetables and corn. In pineapple, for example, chlorpyrifos is a key Integrated Pest Management tool for control of mealybugs and managing the mealybug-ant complex.

Despite allegations of air-borne exposures of bystanders from chlorpyrifos applications, extensive data collected from government and academic air monitoring studies have consistently shown – including data taken from the Waimea Canyon Middle School, which has been frequently cited – that there have been no exposures outside the highly conservative health-based screening levels established by regulatory authorities. In fact, in areas of much more extensive use like California, where chlorpyrifos could potentially be detected in air monitoring programs because of exceptional analytical capacity, none of those detections have exceeded health screening levels or demonstrated risk of chronic exposures.

WPHA believes that the legislature should allow scientific regulatory bodies like US-EPA who is responsible for the sound evaluation of chlorpyrifos to issue their updated use requirements. This will allow Hawaii's farmers continued access to an important tool in the protection of their crops and maintain a competitive opportunity. WPHA is opposed to HB 253 as we believe it is pre-mature. We thank you for your consideration of our comments.

Sincerely,

Renee Pinel
President/CEO

Comments: This pesticide along with others when used according to the label can be used safely. The incident from which this piece of legislation was derived resulted in injury because the label directions and precautions were not followed. Chlorpyrifos can be used safely and is an important tool that can help farmers combat pests that some other pesticides cannot, therefore I am against 'this bill.

Comments: Aloha House Agriculture Committee and House Energy and Environmental Protection Committee, I strongly support HB 253 asking to ban the use of the Dow insecticide Chlorpyrifos. This is an exceptionally harmful pesticide for children and reports have found that childhood exposure during the developmental years can have neurotoxic effects including loss of IQ. Our children cannot wait. We already see large numbers of children with asthma and other health ailments. A Federal ban on Chlorpyrifos was recommended by the FDA 15 months ago. They acknowledge the dangerous consequences. Please, please protect our children on the front lines, across our island chain. Residents are our eyes on the ground and their observations and experiences are very valuable, especially the parents, teachers, nurses, doctors and watermen. Their real-time history of living with acute and low level chronic exposure needs to be addressed and acted on. There are many valuable communicators that can bring important information and reference to the table for many years. I believe that citizens have been waiting too long for disclosure of chemical cocktails and environmental impacts, as well as attention to the health impacts of those living closest to these experimental, open air field tests. There have been many years where buffer zones were lacking near schools. Chlorpyrifos was sprayed adjacent to Waimea Canyon Middle School on the day of the most publicized incident, although months after months symptoms were felt daily by students and teachers nearest the pesticide resistant fields, as well as the trade winds that carry this chemical afar. We must protect the health of our keiki, endangered species habitat, our drinking water and coastal reefs. This is economically vital to our visitor industry too. 17 years has been too long for many of our residents and visitors to be exposed, while the Governor, Mayors, Representatives and the community to be kept in the dark about what is being sprayed where and when, as well as the true nature of the transgenic plant breeding tests. Please help us by supporting HB 253 to ban the use of Chlorpyrifos. Respectfully, Jeri Di Pietro, GMO Free Kaua'i

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

Please vote no on HB 253.

Testimony from Jeff Case, Senior Director Government Affairs, CropLife America

In opposition to HB253 – Relating to Pesticides

Tuesday, Feb. 7, 8:30 am – House Committees on Agriculture and
Energy and Environmental Protection

Aloha Chairs Creagan and Lee and members of the committees,

CropLife America (CLA) represents the manufactures and registrants of pesticide products that are used for agriculture production. We and our farmers are committed to using these valuable crop protection products in a manner that is safe for agricultural community as well as our neighbors. We are opposed to HB 253.

As we have testified previously – a comprehensive process is already in place for evaluating the risks of pesticide products that follow very stringent science-based protocols in order to meet current health and safety standards. Enacting HB 253 would be premature since the federal government is currently undertaking an extensive review of Chlorpyrifos, with the results expected later this year. We believe that regulatory decisions should be based on good science and not emotion to mitigate unacceptable risks while preserving valuable production tool for agriculture.

Mahalo for your consideration.

I support HB 253 for a total ban on the use of CHLORPYRIFOS. This chemical is not safe for use...especially in Hawaii where the trade winds carry spray to neighborhoods...furthermore, this chemical can get into the aquafier...how many countries ban the use of this chemical?

Dr. Cindy Goldstein, Ph.D
Aiea, Hawaii

HB 253 Relating to Pesticides and Chlorpyrifos
House AGR/EEP Committees
Tuesday, 02-07-17 8:30AM in House conference room 325

Chair Richard Creagan and Vice Chair Lynn DeCoite, Chair Chris Lee and Vice Chair Nicole Lowen,

Position: Oppose

HB 253 calling for the Hawaii legislature to make decisions to ban use of a pesticide approved for use in the United States and other countries is not warranted. Hawaii's farmers are put in a position of not being able to control pests that a farmers in the other 49 states could control with this pesticide. Enacting this legislation would put Hawaii's farmers at a disadvantage in growing their crops, in an environment with year round pests.

The EPA reviews data and studies to determine safe use of each pesticide product. Chlorpyrifos is currently under review by EPA and in the next few months their decisions will be issued. Pesticide regulation belongs with Hawaii Department of Agriculture and with federal agencies where expertise exists for conducting science based and data driven reviews.

Thank you for the opportunity to provide testimony in opposition to HB253.

Comments: Dear Committee members: The use of active-ingredient chlorpyrifos is already highly regulated and need not be banned without clear and convincing evidence from national and international authorities. A ban would harm Hawaii's agriculture industry. I advise that this bill be voted against, or permitted to die without action in committee. With respect, Boyd Ready Haleiwa

Comments: Mahalo for the opportunity to submit testimony. I stand in STRONG SUPPORT of HB 253. HB 253 will ban the use of pesticides containing the active ingredient chlorpyrifos. In 2014 the EPA issued a revised human health risk assessment showing potential risks to drinking water and human health where chlorpyrifos is used, and according to the EPA chlorpyrifos can over-stimulate the nervous system, causing nausea, dizziness and at very high exposures, respiratory paralysis or death. Scientific studies demonstrate children and pregnant women exposed to chlorpyrifos in even small amounts may cause development delays, permanently reduced cognitive capacity and learning disabilities. As a healthcare provider, I urge you to support this agent ban for the health of our children and future generations. Mahalo.

Testimony of Paul H. Brewbaker, Ph.D., CBE
 606 Ululani St.
 Kailua, Hawaii 96734-4430

Re: HB nos. 252, 253, 790, 1571, 1282

I rise to oppose House Bills numbers 252, 253, 790, 1571, 1282 because they ignore scientific consensus, ignore that restricted use pesticides are already regulated by the federal government, and generally disinform the public by misportraying—with disregard for science and the facts—beneficial agricultural uses of insecticides and herbicides as putative human health and environmental risks without benefit of research to support the presumption underlying each of their flawed legislative proposals.

The State of Hawaii will be condemned to years of litigation that it will lose for nothing seeking to deny Hawaii agriculture’s Last Man Standing, the corn seed industry, the ability to responsibly use agricultural chemicals safely, as intended, under the constraints imposed by federal regulations and regulators with way more science under their belts than the non-scientists who were the *only* members of the Joint Fact Finding schmackety-schmack not to bail on the group for sheer lack of credibility and integrity. Were these bills proposed by the Trump Administration?

It is completely disingenuous to pretend that these bills’ primary concern regards pesticides. First of all, these bills don’t *even* go after all agricultural pesticide uses, they *only* target some uses by some users, namely, three corn seed companies. Second, the bills fail to recognize that the seed industry’s uses are virtually indistinguishable from its share of Hawaii farmed acreage.¹ Third, there is no mention of industrial, residential, or non-agricultural

¹ According to the 2012 *Census of Agriculture* for Hawaii, agricultural chemical use in Hawaii of *all* kinds, including organic farms, is roughly proportionate to farm acreage. This bill ignores about three-quarters of all agricultural uses, not to mention non-agricultural uses (before the shutdown of HC&S on Maui).

	<i>Unit</i>	Total	Other	Seed*	Other as % of Total	Seed as % of Total
Farms and income						
Farms	number	7,000	6,988	12	99.8	0.2
Land in farms	acres	1,129,317	1,107,015	22,302	98.0	2.0

commercial uses of pesticides except—in one instance among the five bills to which I refer—mention of day care centers and certain other related areas implausibly associated, as a generalization, with restricted use pesticide application.

As some of you know, I have written as a consultant of the Hawaii Crop Improvement Association (HCIA) two economic impact studies on Hawaii’s seed industry, dominated by maize (corn), extending prior research conducted by my economist colleagues Dr. Tom Loudat and his collaborator Professor Pralad Kastury. One of my studies was researched at the industry’s peak, prior to 2014. The other was a follow-up, an update following the collapse of global commodity prices at the end of that that year and its consequences for the derived demand for research and development in the maize genome in Hawaii, commonly known as Hawaii’s seed industry. Hawaii’s modern seed industry began with winter maize plant-breeding research, after my father joined the University of Hawaii faculty, with his graduate students in the mid-1960s.² Several years later, inaugural gatherings of what became the HCIA comprising more than 200 seed companies, one of which was kick-started by my grandfather (also a Ph.D. geneticist and plant breeder), were held on Molokai and on Kauai. The industry is Hawaii agriculture’s largest by far today, and on Molokai has existed on former pineapple lands for longer than did the pineapple industry itself. Besides conveying my limited credentials in this regard, this paragraph is intended to provide a multi-generational context of Hawaii ohana engaged with the seed industry for more than a half century. You are talking about thousands of farmers’ and their families livelihoods, without evidence of harm from the industry.

Regarding HB 253 Relating to Pesticides

Insecticides like Dursban based on chlorpyrifos have been around for a half century and have been withdrawn from household use, but remain available to farmers and others whose rigorous professional requirements for use are a part of their broader regulation by the U.S. Environmental Protection Agency. I have no reason to believe chlorpyrifos is either under-

² J.L. Brewbaker and D.E. Hamill (1967), “Winter corn seed production on the Island of Molokai,” *Hawaii Agricultural Extension Service Technical Progress Report* **160**:11, and J.L. Brewbaker (ed.) (1969), “Corn seed production in Hawaii: Present problems and future potential,” *Proceedings of the 1st Hawaii Seed Industry Conference, Molokai, Hawaii*. Auntie Bett (Dr. Hamill) still lives on Molokai with her husband Dr. Granger.

regulated in the United States or is misused in Hawaii agriculture. In my personal interactions with people in the pineapple and corn seed industries, specifically, I have *never* gotten the impression that federal requirements are treated cavalierly. Indeed, over the years I have come to the opinion—based on comparisons to my own past work experiences in such areas as manufacturing or ocean engineering—that these Hawaii agricultural activities have safety protocols deeply ingrained into their corporate cultures and attentive to the safety of the communities in which they operate. Chlorpyrifos-based insecticide is a component of a portfolio comprising integrated pest management approaches to pathogen mitigation that have been highly successful in *reducing* overall pesticide use in the United States. From what I have seen in the literature, incidence of human toxicity associated with chlorpyrifos largely has been limited to countries where adherence to such protocols is weak. There is no such evidence in Hawaii of any kind, to the contrary. The bill’s own finding [*sic*] that a, “West Kauai agribusiness operation sent at least ten farm workers to the hospital after exposure to chlorpyrifos” conflates evidence that professional safety standards in Hawaii agriculture receive rigorous compliance with the hysterically fake news that workers are being poisoned. *This citation seeks to justify legislation on fake news.* The bill itself recognizes that the EPA is in the process of establishing new human health standards with regard to chlorpyrifos use, yet this bill proposes to ban it before study has concluded. This is like invading Iraq because of weapons of mass destruction when their existence only has been hypothesized by paranoids. The proposal in HB 253 is redundant, pre-emptive regulation at the state level without scientific justification or even the most rudimentary scientific research undertaking. Do the research. HB 253 neither improves upon the federal regulatory process nor contributes to the scientific knowledge upon which it stands.

Regarding HB 252 Relating to Pesticides

I don’t know about you but I read the report of the Joint Fact-Finding (JFF) group and they were lame. The report relied on insinuation to assert, without evidence, a number of fictional public health outcomes. What a fail. No wonder the scientists all bailed on the JFF. I was astonished to find no references to some of the actual scientific analyses upon which I myself have come across in my own research. Perhaps I missed it, but the JFF ignored a Hawaii Tumor Registry report prepared for the Hawaii Department of Health which concluded that “there is no evidence of higher incidence of cancer on the island of Kauai overall or for specific geographic regions of the island, as compared to the state of Hawaii.”³ I don’t recall reading in the JFF report the remarkable conclusion repeatedly underscored in the research on Hawaii I have seen that, as I wrote in my first corn seed industry study, “*Urban*—not agricultural—applications are the most likely potential sources of environmental exposure to pesticide residues in the Hawaiian Islands.” In fifty years there has emerged *no* evidence causally linking the seed industry—the only one I personally have studied—to adverse human health effects. Indeed, putting agricultural workers and their families *out* of a job would create a much larger health hazard than anything the JFF found to whine about. I can’t remember a single place in the JFF report where *causality* was statistically or epidemiologically demonstrated running from pesticide use to health or environmental outcomes. All I read in the report was unsubstantiated fear and hysteria. I would be a continuing supporter of efforts by the State of Hawaii to fund

³ See for yourselves at <http://eha-web.doh.hawaii.gov/eha-cma/documents/20fb7e6f-de7f-4111-9ff6-ef8d6e547507>.

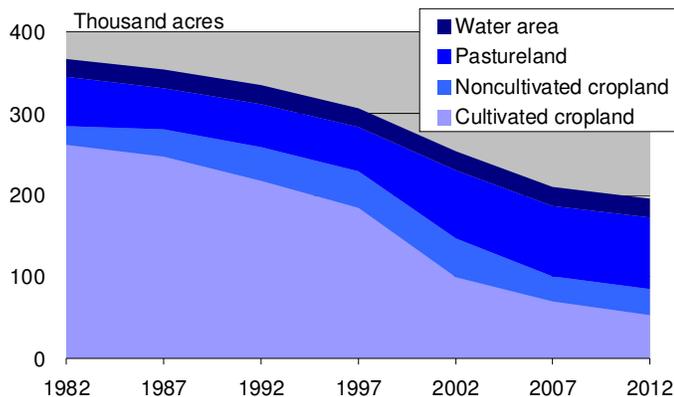

proper epidemiological and environmental study of pesticides as non-point sources of pollution and of potentially adverse human health outcomes, but it doesn't seem like the legislature is talking about that here. At any rate, I wasted too much of my life on the JFF report, and I encourage you to skip it, *ignore it*, and not waste yours.

Regarding HB 790 – Relating to Environmental Protection

OK now we're just getting redundant but, seriously, agricultural pesticides, that's your whole list? Not pest control exterminators, the people tenting houses? Have you been to the home and garden section of Lowe's or Home Depot, Wal-Mart, Koolau Farmers? You've seen a golf course at a resort area, right? Do you think they just look like that on their own? This bill is not really about environmental protection is it? I mean, just read the first sentence, what a crock. "The legislature finds that the number of large-scale, outdoor commercial agricultural operations in Hawaii has been increasing." OMG on what planet are you living? Correct me if I am wrong, but by my reckoning the amount of acreage in cultivated cropland in Hawaii has decreased, over the last 35 years, from more than 260,000 acres in 1982, when I first started coming back to Hawaii to work, to a little over 50,000 acres in 2012 at the time of the last *Census of Agriculture in Hawaii*, to—by my reckoning following the closure of HC&S on Maui—less than 20,000 acres in 2017, when the next Census enumeration will occur.⁴ So, *just for starters*, this bill can't even get the basic premise correct, finding that "the number of large-scale, outdoor commercial agricultural operations in Hawaii has been increasing [*sic*]." WRONG. *How on earth could it*

⁴ Here's what I get from the various editions of the *Census of Agriculture* for Hawaii:

	1982	1987	1992	1997	2002	2007	2012
By area							
Total cropland	284.6	280.3	259.5	229.6	146.4	100.2	85.7
Cultivated Cropland	261.5	247.6	217.6	183.8	99.7	69.1	53.1
Irrigated	153.0	148.4	114.7	76.5	65.9	57.6	46.1
Nonirrigated	108.5	99.2	102.9	107.3	33.8	11.5	7.0
Noncultivated Cropland	23.1	32.7	41.9	45.8	46.7	31.1	32.6
Irrigated	3.3	11.3	25.9	26.1	24.3	9.2	10.1
Nonirrigated	16.5	21.4	16.0	19.7	22.4	21.6	22.2
Total cropland	284.6	280.3	259.5	229.6	146.4	100.2	85.7
Pastureland	59.9	50.6	52.0	53.7	84.1	87.2	87.4
Rangeland	1,078.2	1,064.9	1,074.4	1,070.6	1,101.6	1,075.5	1,069.8
Forest land	1,620.9	1,592.4	1,583.6	1,599.4	1,595.0	1,525.8	1,526.9
Other rural land	482.8	467.0	461.7	499.0	502.3	481.1	477.5
Water area	23.0	23.1	22.9	22.9	23.0	23.1	23.1

get what follows correct, if quantitatively what it begins talking about is immaterial, not to mention incorrect?

Clearly, HB 790 is intended to discriminate against a very small group of individual agricultural firms to the complete neglect of *all other restricted pesticide users* in Hawaii. Right off the top you KNOW that the agenda this bill calls for—mandatory reporting by this small group of individual firms—public notification of use, redundant record-keeping (dudes: asked and answered by the federal government), etc. has *little* to do with public health and safety. Even if you were going to fund epidemiological research on this subject, *which this legislation does not propose*, you couldn't possibly interpret its findings in the absence of equally rigorous research on ALL uses of pesticides, restricted and others, but this bill has no intention of actually finding out whether or not pesticide exposure is of any concern. This bill simply *assumes* the result, that a public health risk of exposure *already exists*, and imposes mandatory notification and reporting requirements on a short list of existing users. I concede only that this bill arbitrarily adds “schools, healthcare facilities, childcare and eldercare facilities,” and the impossibly general, “other environmentally sensitive areas,” to the list, but not golf courses, resort areas, pest control practitioners, or the Hawaii Department Health as it pursues the next vector for catastrophic human risks such as the Zika virus or Ebola.

Fund the research, please, but stop jumping the gun on the basis of fictional premises, irrational fears, and fake studies such as the JFF report. This is not the Salem Witch Trials: stop inflaming mass hysteria. What this bill proposes is the equivalent of banning travel to the United States by Iranian cardiologists because some Iranians are Muslim.

Regarding HB 1282: Relating to Insecticide and Herbicide Use

First of all, I don't think I've ever heard of bee Colony Collapse Disorder (CCD) in Hawaii. The guy that came and took out the 15,000 bees living in several combs in my outside tool-chest said it was all mites, not neonicotinoids, killing bees in Hawaii. Besides, wouldn't neonicotinoids kill the mites *and* the bees? I mean, I'm no entomologist, but seriously. Kills bugs, but only your favorite bugs? And, I'm no environmental scientist, but I'm pretty sure that if I can buy glyphosate off the shelf at Wal-Mart, it is far, *far*, from being a restricted use pesticide. What, mosquito punk? Got pyrethroids?⁵ Do you, or do you not believe in the expertise of the Environmental Protection Agency and the scientific community at large? *Pay attention*. This bill is just more of that fake JFF stuff.

Here's my other general objection to this pesticide legislative agenda of “shoot the Iraqi first and investigate the terrorist later.” There is no scientific consensus on the contribution of neonicotinoids to the collapse of bee colonies around the world. There *is* scientific consensus on global climate change. There *is* scientific consensus on the safety of genetically-modified organisms. But, there is no scientific consensus on the contribution of neonicotinoids to CCD. Not yet. Maybe never. *So: fund the scientific research*, yo, but stop jumping the gun and irresponsibly banning the very tools that modern agriculture *responsibly* uses to grow crops in the tropics, *where there is no winter kill*. Everything else is growing at least as fast and the

⁵ Like the bug spray commercial, “RAID!!!”

pathogens are evolving at least as fast as the food and other crops that farmers are trying to grow in Hawaii. Stop listening to City Slickers who abused the agricultural condominium property regime to build their house on ag land where they were shocked, *shocked* to find that the farmer next door like raise cows because cows make cow pies. Stop reading Fakebook, show some respect for the scientific methodology, show some support for the Environmental Protection Agency, and show some kokua for your neighbors who are just trying to farm their land, using the best techniques modern agriculture can provide. They are not irresponsible. Today, they are on the verge of feeding the planet and they have never been more productive or had more respect for the aina in the history of the world.

Regarding HB 1571: Relating to Environment Protection

This is more of the same, lame, JFF bogacity. To my previous observations I simply will add: (1) first, if you moved next to the farm that's like moving next to the airport and then complaining about the noise from airplanes taking off, I'm just saying; but (2) second, and more importantly, you would think, after fifty *years* of people living near the seed farms—and most of the farms were there first—you would not have to conduct the epidemiological and environmental research on human health and natural exposures to pesticides because it was obvious. Yet, all the research I've seen says that not only is it not obvious, the putative problem *does not exist*. This is a research program this legislature does *not* propose to fund(!), in which the JFF itself did not engage. From the JFF's wild assertions one would think these communities would be populated with mutant creatures from a Zombie movie, the Living Dead, dragging themselves home from work and school in a toxic cloud. The JFF did NOT find causality remotely approximating this outcome. Indeed, the JFF itself reported finding *absence of causality*. After fifty *years*, there *is* no evidence of causality from seed industry operations to adverse human health effects. This bill's reference to "life-long pesticide exposure [being] linked to long-term health effects, including cancer and other serious diseases, decreased cognitive function, and behavioral problems," is the biggest pile of alternative facts in ALL of the aforementioned bills. By the logic of this bill, the assertion in the *Honolulu Star-Advertiser* that Native Hawaiians have greater cancer risk than non-Hawaiians should lead us to investigate their exposures in fictional hot spots such as West Kauai.⁶ Naturally, the legislature is silent on anything requiring this much research and scientific appraisal. Instead, this bill's *presumption* is to blame agricultural industry, rather than to understand the population's risk exposure (or lack thereof). The point is to understand whether, and to what extent, some risks rather than others are responsible, and to legislatively act responsibly, not to validate the unfounded fears of the alt-Pono.

Please, reject all of this legislation and get on with something that actually matters.

⁶ Kristin Consillio, "Hawaiians suffer cancer more than other isle groups," *Honolulu Star-Advertiser* (February 4, 2017) (<http://www.staradvertiser.com/2017/02/04/business/hawaiians-suffer-cancer-more-than-other-isle-groups/>).

Chamber of Commerce HAWAII

The Voice of Business

**Testimony to the House Committee on Agriculture and the Committee on
Energy and Environmental Protection
Tuesday, February 7, 2017 at 8:30 A.M.
Conference Room 325, State Capitol**

LATE

RE: HOUSE BILL 253 RELATING TO PESTICIDES

Chairs Creagan and Lee, Vice Chairs DeCoite and Lowen, and Members of the Committees:

The Chamber of Commerce Hawaii ("The Chamber") **opposes** HB 253, which prohibits the use of pesticides containing the active ingredient chlorpyrifos.

The Chamber is Hawaii's leading statewide business advocacy organization, representing about 1,600 businesses. Approximately 80% of our members are small businesses with less than 20 employees. As the "Voice of Business" in Hawaii, the organization works on behalf of members and the entire business community to improve the state's economic climate and to foster positive action on issues of common concern.

We are opposed to HB 253 as many of the claims made in this measure are inaccurate and misleading and contradict EPA's findings and regulatory standards for chlorpyrifos based on over 40 years of toxicological data. We also oppose the bill for the following reasons:

- Chlorpyrifos is registered by the U.S. EPA after thorough vetting for safety. EPA has the expertise to evaluate pesticide products and conducts comprehensive evaluations and periodic re-evaluations of each pesticide before allowing it to be sold and used.
- The product is available to farmers to use in every state. If arbitrarily banned in Hawaii, it would put our farmers at a disadvantage compared to mainland farmers.
- Farmers in Hawaii use this product safely as part of an Integrated Pest Management program because it is effective and critical in controlling damaging insects that destroy their crops.
- The often-cited school incident at Waimea Canyon Middle School that caused students to be evacuated, was determined by state officials **not** to be caused by pesticides.

We respectfully ask that this bill be deferred. Thank you for the opportunity to testify.

Comments: The USEPA has the expertise and resources to determine whether a ban, or further restrictions on any pesticide, including chlorpyrifos, is warranted. The agency is currently making that reassessment. Hawaii's farmers are not unique in their use of this product and should not be penalized by an arbitrary ban that could force them to use other products which may be less safe, less effective, and more expensive. Thank you.

Conference Room 325

Regarding HB 253 - Relating to Pesticides (Oppose)

The Honorable Richard Creagan; Chair, House Committee on Agriculture

The Honorable Chris Lee Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy & Environmental Protection Committee

Dear Chairman Creagan and Chairman Lee:

I am writing to express my opposition to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is my understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii. Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease; we need to keep our tool options.

Please oppose House Bill 253, Mahalo for the opportunity to submit testimony.

Subject: In Support of HB 253 - Chlorpyrifos Ban - AGR/EEP

From: Sylvia Pope-Young, PO Box 88032, Honolulu, HI 96830

Chair Creagan, Vice Chair DeCoite and members of the committee,

I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide. Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children. Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai`i on GMO research fields. At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i). In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops. Why wait? Hawai`i should act now to protect communities from this highly toxic brain-harming pesticide.

I urge you to pass HB 253.

Thank you,

Sylvia Pope-Young

Regarding HB 253 - Relating to Pesticides (Oppose)

The Honorable Richard Creagan; Chair, House Committee on Agriculture

The Honorable Chris Lee Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy & Environmental Protection Committee

Dear Chairman Creagan and Chairman Lee:

I am writing to express my opposition to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is my understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii. Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease; we need to keep our tool options.

Please oppose House Bill 253, Mahalo for the opportunity to submit testimony.

Charles Iona

The Honorable Richard Creagan; Chair, House Committee on Agriculture
The Honorable Chris Lee; Chair, Energy & Environmental Protection
The Honorable Members of the Joint Agriculture and Energy &
Environmental Protection Committee

RE: HB 253, RELATING TO PESTICIDES (OPPOSE)

Dear Chairman Creagan and Chairman Lee:

On behalf of HFRU I'm here today to advocate for our Right to Farm on behalf of Hawaii Island agricultural producers. Collectively, we represent 97% of all agricultural revenue on Hawaii Island; \$194 Million out of a total of \$202 total agricultural revenue, and almost 3,000 farmers and ranchers working on 630,000 acres of land.

HFRU is Opposed to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is our understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii.

Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease on a weekly basis; we must keep our tool options available.

HFRU must **oppose** HB 253 as we feel its intention is premature. We appreciate your consideration of our comments.

Mahalo,
Lorie Farrell

Comments: aloha committee members, please consider this testimony in favor of passing HB 253. chlorpyrifos is a known carcinogen. according to the EPA website, 'We have revised our human health risk assessment and drinking water exposure assessment for chlorpyrifos that supported our October 2015 proposal to revoke all food residue tolerances for chlorpyrifos. The revised analysis shows risks from dietary exposure (i.e. residues of chlorpyrifos on food crops) and drinking water.' On Kaua'i, a recent pollen study of local honeybee hives conducted by HDOA apiary program team found 15 out 23 samples had positive results for contamination of pesticides. chlorpyrifos was at the top of the list of harmful chemicals found in the hives sampled. as a beekeeper, this rate of contamination is unacceptable. as a producer of honey, the results of the pollen survey is disturbing and alarming. we must act quickly to reduce further contamination of honeybee hives and eliminate the harms and risks of using clorpyrifos. passing HB 253 will help to reduce the likelihood of accidental poisoning by eliminating the use of chlorpyrifos. HB 253 will reduce the use of chlorpyrifos greatly and help protect farm workers, pollinators and the environment. Please consider passing HB 253 and support the efforts of EPA in reassessing the harms & risks associated w/it's use. with respect and aloha, James G Trujillo Chair, Kaua'i Beekeepers Association

From: Kyle Barber <kyle.barberino@gmail.com>
Sent: Tuesday, February 7, 2017 7:18 AM
To: AGRtestimony
Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

The Honorable Members of the Joint Agriculture and Energy & Environmental Protection Committee

Dear Chairman Creagan and Chairman Lee:

I am writing to express my opposition to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is my understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii. Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease; we need to keep our tool options.

Please oppose House Bill 253, Mahalo for the opportunity to submit testimony.

David Fell

Subject: In Support of HB 253 - Chlorpyrifos Ban - AGR/EEP

From: Colleen O'Shea Wallace:

Aloha Chair Creagan, Vice Chair DeCoite and members of the committee - I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide.

I worked with pregnant farmworkers to promote breastfeeding and infant health while carrying out my public health practicum and am very concerned about the risks posed by highly toxic pesticides to mothers, infants, and young children both by direct exposure in the fields and by drift.

Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children. Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai'i on GMO research fields. At least 27 schools in Hawai'i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua'i). In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops. Why wait? Hawai'i should act now to protect communities from this highly toxic brain-harming pesticide.

I urge you to pass HB 253.

Mahalo nui loa,

Colleen O. Wallace, MPH (Makawao, Hawaii)

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

Mahalo

Subject: Oppose HB253, Relating to Pesticides

From: richard@hamakuasprings.com <Richard Ha>

Message:

**HOUSE COMMITTEE ON AGRICULTURE AND
HOUSE COMMITTEE ON ENERGY & ENVIRONMENTAL PROTECTION**

February 7, 2017, 8:30 a.m.

Conference Room 325

Regarding HB 253 - Relating to Pesticides (Oppose)

The Honorable Richard Creagan; Chair, House Committee on Agriculture

The Honorable Chris Lee Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy & Environmental Protection Committee

Dear Chairman Creagan and Chairman Lee:

I am writing to express my opposition to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is my understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii. Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease; we need to keep our tool options.

Please oppose House Bill 253, Mahalo for the opportunity to submit testimony.

Richard Ha

Subject: In Support of HB 253 - Chlorpyrifos Ban - AGR/EEP

From: Theresa Casagram, Koloa

Chair Creagan, Vice Chair DeCoite and members of the committee, I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide. Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children. Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai`i on GMO research fields. At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i). In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops. Why wait? Hawai`i should act now to protect communities from this highly toxic brain-harming pesticide. Stop the poisons on Kauai! I urge you to pass HB 253. Thank you.

At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i).

In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops.

Why wait? Hawai`i should act now to protect communities from this highly toxic brain-harming pesticide.

I urge you to pass HB 253.

Thank you,

Elif Beall
Kilauea, HI

Chair Creagan, Vice Chair DeCoite and members of the committee,

I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide.

Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children.

Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai`i on GMO research fields.

At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i).

In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops.

I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide.

Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children.

Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai`i on GMO research fields.

At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i).

In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops.

Why wait? Hawai`i should act now to protect communities from this highly toxic brain-harming pesticide.

I urge you to pass HB 253.

Thank you.

**HOUSE COMMITTEE ON AGRICULTURE AND
HOUSE COMMITTEE ON ENERGY & ENVIRONMENTAL PROTECTION**

February 7, 2017, 8:30 a.m.

Conference Room 325

Regarding HB 253 - Relating to Pesticides (Oppose)

The Honorable Richard Creagan; Chair, House Committee on Agriculture

The Honorable Chris Lee Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy & Environmental Protection Committee

Dear Chairman Creagan and Chairman Lee:

I am writing to express my opposition to HB 253, which would prohibit the use of pesticides containing the ingredient chlorpyrifos. It is my understanding that the Federal Government has already been ordered to render its decision on this product on or before March 31, 2017. Thus making this bill unnecessary for Hawaii. Eliminating crop protection tools prematurely for Hawaii farmers is problematic considering we are faced with increased threats of invasive pests and disease; we need to keep our tool options.

Please oppose House Bill 253, Mahalo for the opportunity to submit testimony.

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253.

The federal government actively regulates this and other pesticides, and is reviewing its regulations on pesticides containing the active ingredient chlorpyrifos.

Recent enforcement actions in Hawaii clearly indicate that the state and federal governments are taking robust action to ensure such products are used safely.

It would be both superfluous and confusing for the state to insert itself into this regulatory process, which is working.

Taking away farmers' tools to produce Hawaii-grown produce is the wrong way to go.

Please vote no on HB 253.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

This product is regulated to the hilt and many worthwhile uses have already been taken away based on scientific studies. The studies are probably extreme using 100 fold safety factors but they were scientifically based. Passing something like this would simply be scare tactics and do more harm than good.

Please vote no on HB 253.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

Dear Chairs Lee and Creagan, Vice-chairs Lowen and DeCoite, and members of the Committee of Energy & Environmental Protection and Committee on Agriculture,

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I disagree with the State of Hawaii getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

The EPA is currently producing an updated order outlining how chlorpyrifos may be used, and a final decision will be issued before the end of March. We believe that no statutes should be created until the EPA has ruled on the issue, as they have the expertise, a formal process of evaluation, and the authority to make these types of important decisions.

Please vote no on HB 253.

Mahalo for the opportunity to testify.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB 253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

Please vote no on HB 253.

Mahalo,

Mark Kijima

I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Please vote no on HB 253.

Subject: REGARDING HB 253: RELATING TO PESTICIDES

I oppose HB253, which will prohibit the use of pesticides containing the active ingredient chlorpyrifos. I don't agree with the state getting involved in the regulation of these pesticides, as the EPA already has a rigorous process in place for evaluating and registering the use of pesticides based on scientific data.

Further, there is no evidence that chlorpyrifos use by agriculture in Hawaii is a problem: 1) The full year study of air sampling by the UH at Waimea Canyon Middle School on Kauai found only trace amounts, which were 24-times below health concern levels, 2) The Kauai Department of Water has twice published findings on their recent screenings for pesticides in drinking water sources, and chlorpyrifos could not even be detected in any of the samples, and 3) The 2013-2014 State Wide Pesticide Sampling Pilot Project Water Quality Findings found only trace amounts of chlorpyrifos in drainage surface waters, at levels that were 8-times lower than the strictest EPA benchmark for human and environmental health.

The Kauai Department of Water noted that chlorpyrifos was an unlikely contaminant in groundwater, because it degrades quickly and because it is applied to the plant and not to the ground. The department noted that the University of Hawai'i and Department of Health had determined that chlorpyrifos is unlikely to leach into water. As legislators, I urge you to listen to the experts and the actual evidence.

It is my understanding that chlorpyrifos is one of the most widely used pest control products in the world and is registered for use in about 100 nations. Banning it will make it that much more difficult for our farmers to protect their lands and compete with other markets.

Subject: In Support of HB 253 - Chlorpyrifos Ban - AGR/EEP

From: Lewis Thompson
Holualoa, HI

Chair Creagan, Vice Chair DeCoite and members of the committee,

I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide.

Chlorpyrifos is a threat to communities, farmworkers, and particularly young and developing children.

Chlorpyrifos is a highly toxic brain-harming insecticide being used in high volumes in Hawai`i on GMO research fields.

At least 27 schools in Hawai`i are located within one mile of these research fields and their pesticide drift. Chlorpyrifos and other brain-harming pesticides were found in air samples of Waimea Canyon Middle School, in the hair samples of local children and in water samples of the Kekaha ditch (both near GMO test field sites on Kaua`i).

In 2016, 10 Syngenta field workers were hospitalized after exposure to chlorpyrifos. The EPA is currently suing Syngenta for worker safety violations related to the field worker's exposure to chlorpyrifos. The EPA is currently considering banning use of Chlorpyrifos on food crops.

Why wait? Hawai`i should act now to protect communities from this highly toxic brain-harming pesticide.

I urge you to pass HB 253.

Thank you.

Chair Creagan, Vice Chair DeCoite and members of the committee,

My name is Douglas Wilmore and I am a retired physician living on the island of Kauai. I was a member of the Joint Fact Finding group (JFF) which investigated the relationship between health and the environment and pesticides. .

During my professional academic life I worked for 45 years performing and evaluating laboratory and human scientific data. As such, I was elected to the National Academy of Sciences, Engineering and Medicine.

I am writing in strong support of HB253 which will place a statewide ban on the use of chlorpyrifos, a highly toxic insecticide.
