# A BILL FOR AN ACT

---

RELATING TO THE LICENSURE OF MIDWIVES.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

PART I

SECTION 1. The legislature finds that one of the challenges faced by the country's health care system is providing quality care to segments of the population who do not have access to essential services because of geographic limitations. Further, the legislature finds that mothers have accessed midwifery services throughout history and that using midwifery care to deliver maternal child health care is an effective way of overcoming certain barriers to accessing care, particularly for communities located in rural and remote areas. This is especially important in Hawaii, where residents on the neighbor islands and in rural areas do not have the same level of access to maternal child health care as residents in urban areas of Oahu.

The legislature further finds that midwifery services are used extensively across the country with no compromise in

1 quality of care when the services are within the scope of  
2 practice of a midwife provider.

3 The legislature additionally finds that licensing the  
4 midwife profession will empower consumer choice, reduce access  
5 disparities, enhance provider availability, and improve quality  
6 of maternal child health care.

7 As determined by Senate Concurrent Resolution No. 64, S.D.1  
8 (1998), the subsequent sunrise Auditor's Report No. 99-14  
9 (1999), House Concurrent Resolution No. 65, H.D.1 (2016), and  
10 the subsequent sunrise Auditor's Report No. 17-01 (2017), the  
11 legislature finds that it is necessary to establish a regulatory  
12 process for the entire midwifery profession.

13 The purpose of this Act is to regulate midwives engaged in  
14 the practice of midwifery care by establishing licensure  
15 requirements and regulatory requirements under the department of  
16 commerce and consumer affairs.
