# A BILL FOR AN ACT

---

RELATING TO MEDICAL CANNABIS.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1       SECTION 1. The legislature finds that Act 241, Session  
2 Laws of Hawaii 2015, codified as Hawaii Revised Statutes chapter  
3 329D, established a license scheme for a statewide system of  
4 medical cannabis dispensaries to ensure access to medical  
5 cannabis for qualifying patients. Further amendments to the  
6 dispensary program were made by Act 230, Session Laws of Hawaii  
7 2016, and by Act 41, Session Laws of Hawaii 2017.

8       The legislature further finds that the medical cannabis  
9 dispensary program still lacks clear administrative guidelines  
10 for independent laboratory certification. To date, two  
11 laboratories in the State are certified to test a limited range  
12 of the statutorily-permitted medical cannabis product forms.  
13 There is no laboratory currently certified to test all of the  
14 permitted cannabis product forms. This has not only resulted in  
15 delays for dispensary licensees to dispense explicitly permitted  
16 products, it also prevents qualified patients from accessing the

1 range of products that they may need to treat their specific  
2 conditions.

3       The legislature further finds that some of the testing  
4 requirements and standards established in the administrative  
5 rules governing the medical cannabis dispensary program are  
6 based on requirements and standards previously implemented in  
7 other jurisdictions but Hawaii's administrative rules do not  
8 include the corresponding action limits or thresholds of  
9 compliance. Therefore, Hawaii's administrative rules lack clear  
10 medical cannabis sampling guidelines. This has resulted in  
11 widely varying sampling protocols and sample weights, which in  
12 turn results in widely varying testing costs that are passed  
13 onto and borne by qualifying patients.

14       The legislature further finds that the current  
15 administrative rules lack a process for dispensary licensees to  
16 appeal test results or challenge the validity of testing  
17 methodologies employed by licensed laboratories. This  
18 potentially has a negative impact on patient access to certain  
19 types of medical cannabis products since certain testing  
20 methodologies commonly produce inaccurate results when applied  
21 to genetic variants of cannabis that are rich in cannabidiol.

1       The purpose of this Act is to establish standards for  
2 independent laboratory testing for medical cannabis including:

3       (1) Evidence-based action limits for Environmental  
4       Protection Agency registered pesticides and microbial  
5       contaminants that have been successfully employed in  
6       other jurisdictions in the United States;

7       (2) Fixed sample size and sampling protocol for batches of  
8       medical cannabis and manufactured cannabis products;  
9       and

10      (3) A clear appeal process for laboratory test results.

11      SECTION 2. Section 329D-8, Hawaii Revised Statutes, is  
12 amended to read as follows:

13      "**§329D-8 Laboratory standards and testing; laboratory**  
14 **certification.** (a) The department shall establish and enforce  
15 standards for laboratory-based testing of cannabis and  
16 manufactured cannabis products for content, contamination, and  
17 consistency[+] by requiring that a certified laboratory issue a  
18 certificate of analysis for each batch of cannabis and  
19 manufactured cannabis products as required under this section to  
20 include results and supporting data for the following:

1        (1) The chemical profile of the batch for the following  
2        compounds:

3        (A) Delta 9 Tetrahydrocannabinol (THC);

4        (B) Tetrahydrocannabinolic Acid (THCA);

5        (C) Cannabidiol (CBD);

6        (D) Cannabidiolic Acid (CBDA);

7        (E) Cannabigerol (CBG); and

8        (F) Cannabinol (CBD);

9        (2) The presence of the following heavy metal  
10       contaminants, which shall not exceed the following  
11       parts per million (ppm) levels:

12       (A) Arsenic: 10 ppm;

13       (B) Lead: 6 ppm;

14       (C) Cadmium: 4 ppm; and

15       (D) Mercury: 2 ppm;

16       (3) The presence of Environmental Protection Agency-  
17       regulated pesticides which shall not exceed the  
18       following levels:

19       (A) Abamectin: 1 ppm;

20       (B) Acephate: 1 ppm;

21       (C) Acequinocyl: 2 ppm;

- 1            (D)    Acetamiprid: 1 ppm;
- 2            (E)    Aldicarb: 1 ppm;
- 3            (F)    Azoxystrobin: 1 ppm;
- 4            (G)    Bifenazate: 1 ppm;
- 5            (H)    Bifenthrin: 1 ppm;
- 6            (I)    Boscalid: 1 ppm;
- 7            (J)    Carbaryl: 1 ppm;
- 8            (K)    Carbofuran: 1 ppm;
- 9            (L)    Chlorantraniliprole: 1 ppm;
- 10           (M)    Chlorfenapyr: 1 ppm;
- 11           (N)    Chlorpyrifos: 1 ppm;
- 12           (O)    Clofentezine: 1 ppm;
- 13           (P)    Cyfluthrin: 1 ppm;
- 14           (Q)    Cypermethrin: 1 ppm;
- 15           (R)    Dichlorvos (DDVP): 1 ppm;
- 16           (S)    Diazinon: 1 ppm;
- 17           (T)    Dimethoate: 1 ppm;
- 18           (U)    Ethoprophos: 1 ppm;
- 19           (V)    Etofenprox: 1 ppm;
- 20           (W)    Etoxazole: 1 ppm;
- 21           (X)    Fenpyroximate: 1 ppm;

1            (Y) Fipronil: 1 ppm;  
2            (Z) Flonicamid: 1 ppm;  
3            (AA) Fludioxonil: 1 ppm;  
4            (AB) Hexythianox: 1 ppm;  
5            (AC) Imazalil: 0.1 ppm;  
6            (AD) Imidacloprid: 1 ppm;  
7            (AE) Kresoxim-methyl: 1 ppm;  
8            (AF) Malathion: 1 ppm;  
9            (AG) Metalaxil: 1 ppm;  
10           (AH) Methiocarb: 1 ppm;  
11           (AI) Methomyl: 1 ppm;  
12           (AJ) Methyl parathion: 1 ppm;  
13           (AK) MGK-264: 1 ppm;  
14           (AL) Myclobutanil: 1 ppm;  
15           (AM) Naled: 1 ppm;  
16           (AN) Oxamyl: 1 ppm;  
17           (AO) Paclobutrazol: 1 ppm;  
18           (AP) Permethrins: 1 ppm;  
19           (AQ) Phosmet: 1 ppm;  
20           (AR) Piperonyl butoxide: 1 ppm;  
21           (AS) Prallethrin: 1 ppm;

- 1            (AT) Propiconazole: 1 ppm;  
2            (AU) Propoxur: 1 ppm;  
3            (AV) Pyrethrins: 1 ppm;  
4            (AW) Pyridaben: 1 ppm;  
5            (AX) Spinosad: 1 ppm;  
6            (AY) Spiromesifen: 1 ppm;  
7            (AZ) Spirotetramat: 1 ppm;  
8            (AAA) Tebuconazole: 1 ppm;  
9            (AAB) Thiacloprid: 1 ppm;  
10           (AAC) Thiamethoxam: 1 ppm; and  
11           (AAD) Trifloxystrobin: 1 ppm;  
12           (4) The presence of solvents, which shall not exceed the  
13           following levels:  
14           (A) Butanes: 800 ppm;  
15           (B) Heptanes: 500 ppm;  
16           (C) Benzene: 1 ppm;  
17           (D) Toluene: 1 ppm;  
18           (E) Hexane: 10 ppm; and  
19           (F) Total xylenes (m,o,p-xylene): 1 ppm;  
20           (5) Any visible foreign or extraneous material that is not  
21           intended to be part of the product being produced,

1 including but not limited to mold, hair, insects,  
2 metal, or plastic;

3 (6) Moisture content of plant material which shall be less  
4 than fifteen per cent;

5 (7) Microbiological impurities, including but not limited  
6 to:

7 (A) Total viable aerobic bacteria, which shall not  
8 exceed:

9 (i) Unprocessed and processed materials: 100,000  
10 colony forming units per gram; and

11 (ii) Carbon dioxide and solvent based extracts:  
12 10,000 colony forming units per gram;

13 (B) Total yeast and mold, which shall not exceed:

14 (i) Unprocessed and processed materials: 20,000  
15 colony forming units per gram; and

16 (ii) Carbon dioxide and solvent based extracts:  
17 100 colony forming units per gram.

18 (C) Total coliforms, which shall not exceed:

19 (i) Unprocessed and processed materials: 1,000  
20 colony forming units per gram; and

1                   (ii) Carbon dioxide and solvent based extracts:

2                               100 colony forming units per gram.

3           (D) Bile-tolerant gram-negative bacteria, which shall  
4                   not exceed:

5                   (i) Unprocessed and processed materials: 1,000  
6                               colony forming units per gram; and

7                   (ii) Carbon dioxide and solvent based extracts:  
8                               100 colony forming units per gram.

9           (E) E. coli (pathogenic strains) and salmonella spp.,  
10                   which shall not be detected in 1 gram;

11           (F) Aspergillus fumigatus, Aspergillus flavus, and  
12                   Aspergillus niger, which shall not exceed 1  
13                   colony forming units per gram; and

14           (G) Mycotoxins, which shall not exceed 20 micrograms  
15                   per kilogram of material.

16           (b) The department may adopt additional standards;

17   provided that in establishing these standards, the department  
18   shall:

19           (1) Review and take guidance from the testing programs and  
20                   standards utilized in other jurisdictions;

(2) Consider the impact of the standards on the retail cost of the product to the qualifying patient;

(3) Review and take guidance from the testing programs and standards for pesticides under the regulations of the United States Environmental Protection Agency;

(4) For the testing for microbiological impurities, consider the benefits of organically grown cannabis that features the use of bacteria in lieu of pesticides; and

(5) Include permission for qualifying patients and primary caregivers to obtain testing services directly from certified laboratories on the island where the qualifying patient and primary caregiver reside.

(c) In conducting testing for cannabis and manufactured cannabis products pursuant to this section, a certified laboratory shall randomly select the minimal sample required for statistical representativeness from each batch of medical cannabis or manufactured cannabis products provided by the licensed dispensary; provided that:

(1) The maximum batch size for cannabis flower shall be \_\_\_\_\_ ; and

1        (2) The maximum batch size for manufactured cannabis  
2        products shall be the equivalent of one gallon, or its  
3        equivalent weight, of cannabis extract.

4        (d) The department shall provide a dispensary licensee the  
5        opportunity for resampling and retesting of a failed batch of  
6        medical cannabis or manufactured cannabis products by a  
7        certified laboratory; provided that:

8        (1) If the retesting results in a second failing result,  
9        the batch shall be considered to have definitively  
10       failed; and

11       (2) If the retesting results in a passing result, the  
12       department shall:

13       (A) Review the two results and make a determination  
14       as to whether the batch has passed or failed, or  
15       whether additional testing is required; and

16       (B) Notify the dispensary licensee and the relevant  
17       certified laboratories of its decision within  
18       five business days.

19       (e) The department shall establish a process that conforms  
20       with the requirements of chapter 91 to permit a dispensary

1 licensee to challenge the validity of a testing methodology  
2 employed by a certified laboratory as follows:

3 (1) The dispensary licensee shall submit to the  
4 department, in writing, its basis and justification  
5 for the challenge along with relevant evidence,  
6 background information, and any supporting data;

7 (2) The department shall notify the certified laboratory  
8 whose testing methodology is the subject of the  
9 challenge and shall provide the laboratory with an  
10 opportunity to respond in writing and to submit  
11 evidence, background information, and data to rebut  
12 the challenge; and

13 (3) The department shall evaluate the written submissions  
14 and make a final determination as to the validity of  
15 the testing methodology being challenged within thirty  
16 days, and notify all dispensary licensees and  
17 certified laboratories of the final determination.

18 ~~[(b)]~~ (f) The department may certify laboratories that can  
19 test cannabis and manufactured cannabis products prior to the  
20 sale of cannabis and manufactured cannabis products."

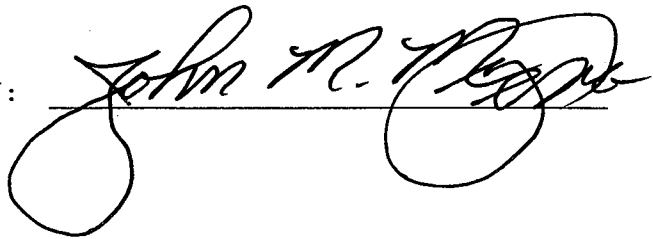

1       SECTION 3. This Act does not affect rights and duties that  
2 matured, penalties that were incurred, and proceedings that were  
3 begun before its effective date.

4       SECTION 4. Statutory material to be repealed is bracketed  
5 and stricken. New statutory material is underscored.

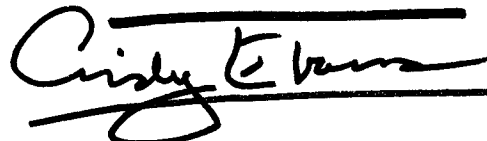

6       SECTION 5. This Act shall take effect upon its approval.

7

INTRODUCED BY:

JAN 23 2018

**Report Title:**

Medical Cannabis Laboratory Testing

**Description:**

Establishes standards for medical cannabis testing and certification.

*The summary description of legislation appearing on this page is for informational purposes only and is not legislation or evidence of legislative intent.*
