## A BILL FOR AN ACT

RELATING TO FIRE PROTECTION.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. The legislature finds that automatic fire  
2           sprinkler systems have a proven record of significantly reducing  
3           loss of life, injury, and property damage caused by fires. The  
4           legislature also finds that eight out of ten deaths caused by  
5           fire occur in the home. Only the sprinkler head closest to the  
6           fire will activate and eighty-five per cent of fires are  
7           contained by the operation of just one sprinkler. This is due  
8           to:

9           (1) Engineered lumber now used as a composite joist or  
10           beam as part of today's modern, lightweight  
11           construction material. Compared with traditional wood  
12           materials in older homes, lightweight construction  
13           assemblies collapsed in six minutes versus eighteen  
14           minutes for wood;

15           (2) Modern furnishings burn quicker and hotter than  
16           traditional legacy furnishings. These place not only

1 occupants, but fire fighters in extreme peril when a  
2 fire occurs in a home without sprinklers; and

3 (3) Open plan designs contribute to rapid fire spread.

4 Higher ceiling heights and open plan designs with less  
5 compartmentalization provide larger volumes of oxygen  
6 to promote fire spread.

7 California, Maryland, and the District of Columbia require  
8 residential sprinklers in all new one- and two-family dwellings.  
9 Approximately eighteen states do not require sprinklers, but  
10 allow local jurisdictions to require them. Communities that  
11 have adopted a residential sprinkler requirement in new one- and  
12 two-family dwellings have not seen any decrease in the  
13 residential construction or the sale of new homes, and the  
14 economies of scale reduces costs. However, residential fire  
15 sprinklers in one- and two-family dwellings are rare in this  
16 State. One reason for the lack of residential fire sprinklers  
17 is the cost. The legislature finds that an incentive is needed  
18 to encourage the installation of fire sprinklers in new homes.

19 The purpose of this Act is to provide an incentive to  
20 install an automatic fire sprinkler system in any new one- or  
21 two-family dwelling for an owner/occupant of a building that is

# H.B. NO. 296

1 used only for residential purposes, by establishing a tax credit  
2 for a percentage of the actual cost of the system, including  
3 installation, water meter, and permitting fees.

4 SECTION 2. Chapter 235, Hawaii Revised Statutes, is  
5 amended by adding a new section to part I to be appropriately  
6 designated and to read as follows:

7 "§235- Tax credit to promote the installation of fire  
8 sprinklers in residences. (a) Any qualifying taxpayer who is  
9 an owner/occupant and files an individual income tax return for  
10 a taxable year may claim an income tax credit under this section  
11 against the Hawaii state individual net income tax.

12 (b) The tax credit may be claimed for an eligible  
13 automatic fire sprinkler system that is installed and placed in  
14 service by the taxpayer during the taxable year in any one- or  
15 two-family dwelling unit in a building that is used only for  
16 residential purposes. For each automatic sprinkler system, the  
17 tax credit that may be claimed shall be no more than thirty per  
18 cent of the actual cost of the system, including installation,  
19 water meter, and permitting fees; provided that:

20 (1) Only the owner/occupant of the dwelling or the  
21 purchaser installing the automatic sprinkler system in

# H.B. NO. 296

1           a new one- or two-family dwelling used only for  
2           residential purposes shall be entitled to a single tax  
3           credit;

4           (2) Only one credit may be claimed per tax map key number;  
5           and

6           (3) The amount of the credit taken shall not exceed  
7           \$10,000.

8           (c) The basis of eligible property for depreciation or  
9           accelerated cost recovery system purposes for state income taxes  
10           shall be reduced by the amount of credit allowable and claimed.  
11           No deduction shall be allowed for that portion of otherwise  
12           deductible qualified costs for which a credit is claimed under  
13           this section.

14           (d) If the tax credit claimed by the taxpayer under this  
15           section exceeds the amount of the income tax payments due from  
16           the taxpayer, the excess of credit over payments due shall be  
17           used as a credit against the taxpayer's income tax liability in  
18           subsequent years until exhausted.

19           (e) The director of taxation shall prepare forms that may  
20           be necessary to claim a credit under this section, may require

# H.B. NO. 296

1 proof of the claim for the tax credit, and may adopt rules  
2 pursuant to chapter 91 necessary to carry out this section.

3 (f) All of the provisions relating to assessments and  
4 refunds under this chapter and under section 231-23(c)(1) shall  
5 apply to the tax credit under this section.

6 (g) Claims for the tax credit under this section,  
7 including any amended claims, shall be filed on or before the  
8 end of the twelfth month following the taxable year for which  
9 the credit may be claimed.

10 (h) If the State or a county requires an automatic fire  
11 sprinkler system to be installed, no claim for a tax credit for  
12 the automatic sprinkler shall be allowed."

13 SECTION 3. New statutory material is underscored.

14 SECTION 4. This Act shall take effect upon its approval  
15 and shall:

16 (1) Apply to taxable years beginning after December 31,  
17 2016; and

18 (2) Be repealed on June 30, 2027.

JAN 20 2017

# H.B. NO. 296

**Report Title:**

State Fire Council Package; Fire Sprinklers; Tax Credit

**Description:**

Establishes a tax credit of 30% of the actual cost, including installation, water meter, and permitting fees, of an automatic fire sprinkler system in any one- and two-family dwelling in a structure used only for residential purposes. Sunset 6/30/2027.
