

JAN 24 2018

S.B. NO. 3107

A BILL FOR AN ACT

RELATING TO CHRONIC HEALTH CONDITIONS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

PART I

SECTION 1. The legislature finds that healthcare costs are skyrocketing. The legislature specifically finds that studies indicate that a small percentage of patients consume a disproportionate amount of healthcare resources. Many of these patients suffer from multiple chronic conditions, including substance abuse, mental illness, and homelessness. Chronic conditions that go untreated worsen with age. Further, the more chronic conditions an individual has, the greater the risks that individual faces for mortality, poor functional status, unnecessary hospitalizations, adverse drug events, duplicative tests, and conflicting medical advice. Approximately sixty-six per cent of total health care spending is directed toward the approximately twenty-seven per cent of Americans with multiple chronic conditions.

The purpose of this Act is to appropriate funds for the treatment of people with multiple chronic conditions, including

1 but not limited to mental health disorders, substance use
2 disorders, and homelessness.

3 **PART II**

4 SECTION 2. The legislature finds that current guidelines
5 on chronic conditions fail to account for complications posed by
6 additional chronic conditions. Specifically, guidelines for
7 people with mental illness and substance abuse problems rarely
8 address co-occurrence of other chronic conditions. Developing
9 targeted interventions designed for multiple chronic conditions
10 will help improve access to health care, public health, and
11 other services. Effective treatment of patients with multiple
12 chronic conditions requires heightened coordination of complex
13 medical and psychosocial care, development of accompanying
14 quality metrics, increased involvement of the public health
15 system, strengthening of public-private partnerships, and an
16 increase in qualified staff.

17 Therefore, the purpose of this part is to require the
18 department of health to establish a comprehensive and
19 coordinated continuum of treatment services for sufferers of
20 substance abuse disorders who have other chronic conditions.

1 SECTION 3. There is appropriated out of the general
2 revenues of the State of Hawaii the sum of \$2,000,000 or so much
3 thereof as may be necessary for fiscal year 2018-2019 for the
4 treatment of patients with multiple chronic conditions,
5 including substance use disorders, and the creation of a modern,
6 comprehensive, and coordinated continuum of treatment services
7 that includes defined goals and benefits.

8 The sum appropriated shall be expended by the department of
9 health for the purposes of this part.

10 **PART III**

11 SECTION 4. The legislature finds that the department of
12 health has started a pilot program for training primary
13 caregivers to address mild to moderate substance use disorders,
14 by providing screening, brief intervention, and referral to
15 treatment. This primary care strategy provides for early
16 intervention with at-risk substance users before more serious
17 consequences occur.

18 The legislature also finds that ninety per cent of people
19 with substance use disorders do not receive treatment; of those
20 who do not receive treatment, ninety-five per cent are unaware
21 that they have a problem. Improving primary care can identify

1 substance use disorders early, and reduce healthcare costs,
2 severity of drug and alcohol use, and risk of trauma.

3 The legislature also finds that a centralized referral and
4 treatment process is a key component of substance use treatment.
5 The referral and treatment process includes assisting a patient
6 access specialized treatment, select facilities, and navigate
7 barriers such as cost and transportation, and following up with
8 a patient as needed.

9 Therefore, the purpose of this part is to appropriate funds
10 for the department of health to establish a pilot project for a
11 comprehensive and coordinated centralized referral system in
12 each county.

13 SECTION 5. There is appropriated out of the general
14 revenues of the State of Hawaii the sum of \$1,500,000 or so much
15 thereof as may be necessary for fiscal year 2018-2019 for the
16 department of health to establish a pilot project for a
17 permanent centralized referral center in the city and county of
18 Honolulu, then expand and develop the program to address the
19 needs of other counties.

20 The sum appropriated shall be expended by the department of
21 health for the purposes of this part.

PART IV

SECTION 6. The legislature finds people with mental health disorders or substance abuse disorders can be particularly vulnerable to becoming homeless or being precariously housed. The legislature further finds that although the chronically homeless represent approximately sixteen per cent of the overall homeless population, they consume more than half of services. Approximately two-thirds of the chronically homeless have a substance use disorder or other chronic condition.

The legislature further finds that case managers with the expertise to address substance use disorders and other chronic conditions could better address the chronically homeless who have difficulty accessing housing. These skills include knowledge of theories of addiction, models of recovery, and practices of continuing care; ability to recognize the importance of family and social networks in the treatment process; and understanding of interdisciplinary and multicultural approaches to treatment, among others. Properly trained case managers can deal with special needs, such as HIV infection, poverty, childcare responsibilities, and physical or

1 developmental disabilities. Case managers can also ensure
2 smooth transitions in care and avoid gaps in service.

3 The legislature also finds that, although case management
4 programs have been recently created, they lack vital funding and
5 resources.

6 The purpose of this part is to provide funding for case
7 management programs to help those with substance use disorders.

8 SECTION 7. There is appropriated out of the general
9 revenues of the State of Hawaii the sum of \$1,000,000 or so much
10 thereof as may be necessary for fiscal year 2018-2019 for the
11 funding of case management programs to help those with substance
12 use disorders throughout the State.

13 The sum appropriated shall be expended by the department of
14 health for the purposes of this part.

15 **PART V**

16 SECTION 8. The legislature finds that peer mentors and
17 coaches assist their peers with setting recovery goals, finding
18 sober housing, making new friends, finding new uses of spare
19 time, and improving job skills. They also provide assistance
20 with other collateral issues. Peer mentors and coaches provide

1 valuable experience to the peers they serve as they have
2 experienced similar recovery paths.

3 The legislature further finds that peer mentoring and
4 coaching reduce health care costs, facilitate recovery, and
5 promote a sense of community. Peer mentors and coaches model
6 recovery behaviors and connect the person treated with valuable
7 services and resources.

8 The legislature further finds that many peer mentors and
9 coaches serve as volunteers. As such, they tend to have shorter
10 tenures than paid staff, and require constant supervision,
11 recruitment, and training. Stipends and other compensation are
12 sometimes provided to peer mentors and coaches.

13 Therefore, the purpose of this part is to appropriate funds
14 to service providers to hire supervisors to supervise and train
15 volunteer peer mentors and coaches, and to develop incentive and
16 stipend programs for volunteer peer mentors and coaches.

17 SECTION 9. There is appropriated out of the general
18 revenues of the State of Hawaii the sum of \$500,000 or so much
19 thereof as may be necessary for fiscal year 2018-2019 to fund
20 service providers to hire supervisors to supervise and train
21 volunteer peer mentors and coaches to help those with substance

1 use disorders, and to develop incentive or stipend programs for
2 volunteer peer mentors and coaches.

3 The sum appropriated shall be expended by the department of
4 health for the purposes of this part.

5 PART VI

6 SECTION 10. This Act shall take effect on July 1, 2018.
