A BILL FOR AN ACT

RELATING TO HEALTH.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that Act 90, Session Laws 2 of Hawaii 2019, established the involuntary hospitalization task 3 force and Act 263, Session Laws of Hawaii 2019, established a 4 working group to evaluate current behavioral health care and 5 related systems, including existing resources, systems gaps, and 6 identification of action steps that could be taken to improve 7 the overall system of care. The findings from these initiatives 8 highlight the need in Hawaii for a coordinated network of 9 stabilization beds that will allow triage, clinical assessment, 10 and recommendation for the next level of care for those 11 struggling with substance use, mental health conditions, and 12 homelessness.

13 The National Coalition for the Homeless has found that 14 sixty-four per cent of homeless individuals are dependent on 15 alcohol or other substances. In Hawaii, the Oahu homeless point 16 in time count reported that 36.4 per cent of homeless single 17 adults suffer from some type of mental illness. The

1

1 intersection of homelessness and behavioral health conditions 2 are a crisis in Hawaii, which contributes to Hawaii having the 3 second highest rate of homelessness in the nation. 4 Unfortunately, there is currently no coordinated system of 5 stabilization from the streets that assesses for and links to 6 the next level of clinical care. 7 The legislature additionally finds that the current options 8 for those needing stabilization from substance use, mental 9 health, and homelessness are stretched and emergency facilities 10 throughout the State have experienced substantial increases in 11 psychiatric emergency admissions, which has resulted in 12 overcrowding and unsafe environments for patients and medical 13 staff. 14 The legislature also finds comprehensive crisis response

15 and stabilization services are crucial elements of the continuum 16 of care. Reducing unnecessary transportation to emergency 17 departments and appropriately placing clients in more suitable 18 levels of care will improve outcomes for consumers, reduce 19 inpatient hospital stays, and facilitate access to other 20 behavioral health services.

1 The Hawaii coordinated access resource entry system 2 provides access to substance use treatment and behavioral health 3 services. The goal of the system is to implement a synchronized 4 system of care rather than an assortment of independent 5 services. Additionally, the Hawaii coordinated access resource 6 entry system has identified that the lack of stabilization beds 7 is a significant gap in services during its first three months 8 of operation.

9 Accordingly, the purpose of this Act is to require the 10 department of health to establish short-term residential beds 11 for the purpose of stabilization from mental health and 12 substance use and to assess patients and triage to clinically 13 appropriate level of care through the Hawaii coordinated access 14 resource entry system.

15 SECTION 2. The department of health shall establish a 16 continuum of stabilization beds statewide for non-forensic 17 patients with substance abuse or mental health disorders, or 18 both, by repurposing unused state facilities.

19 SECTION 3. There is appropriated out of the general
20 revenues of the State of Hawaii the sum of \$ or so
21 much thereof as may be necessary for fiscal year 2020-2021 for

S.B. NO. 2505

1 the department of health to establish a continuum of
2 stabilization beds statewide for non-forensic patients with
3 substance abuse or mental health disorders, or both, by
4 repurposing unused state facilities.
5 The sum appropriated shall be expended by the department of
6 health for the purposes of this Act.
7 SECTION 4. This Act shall take effect on July 1, 2020.

INTRODUCED BY:

Report Title:

Department of Health; Stabilization Beds; Substance Abuse and Mental Health Disorders; Appropriation

Description:

Requires and appropriates funds for the department of health to establish a continuum of stabilization beds statewide for nonforensic patients with substance abuse or mental health disorders, or both, by repurposing unused state facilities.
