A BILL FOR AN ACT

RELATING TO THE OFFICE OF PLANNING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that Hawaii's clean
2 energy initiative is admirable and worthy of our best efforts to
3 achieve one hundred per cent renewable energy by 2045. The
4 legislature also finds that fulfilling these ambitious goals
5 will necessitate intensive land usage across the State,
6 increasing the potential for public controversy.

7 In 2019, more than two hundred residents were arrested for
8 protesting the delivery of turbine components to Na Pua Makani
9 wind energy project in Kahuku. The controversial project is
10 vehemently opposed by the host community, primarily because of
11 the massive five hundred sixty-eight foot turbines and proximity
12 to residences and schools, which is as close as 1,645 feet.

13 The legislature further finds that careful planning and
14 public input will help minimize disruption of future renewable
15 energy projects. Without such a plan, future renewable energy
16 projects will likely face fierce opposition and the clean energy
17 initiative goal itself could be jeopardized.

1 The Hawaii state energy office has developed two powerful,
2 dynamic data visualization programs, HAVEN and HEVI, to better
3 understand land use impacts and technical requirements of moving
4 Hawaii toward its clean energy goals. These valuable tools can
5 be used to support a proactive review of land availability and
6 need for each of the renewable energy technologies by the office
7 of planning and land use commission.

8 Accordingly, the purpose of this Act is to create a
9 renewable energy siting plan that identifies appropriate lands
10 needed to achieve each benchmark of the Hawaii clean energy
11 initiative.

12 SECTION 2. (a) The office of planning shall prepare a
13 comprehensive renewable energy siting plan, in consultation with
14 the office of energy, land use commission, planning departments
15 of each county, electric utilities, and with public input.

16 (b) The plan shall provide an inventory of suitable land
17 for each of the renewable energy technologies on each of the
18 islands, the estimated land requirements to produce various
19 amounts of renewable energy, multiple scenarios of land
20 requirements to provide renewable energy in amounts sufficient
21 to meet the benchmarks of the clean energy initiative.

S.B. NO. 2805

1 (c) The office of planning shall submit a report on its
 2 utility-scale renewable energy siting plan to the legislature no
 3 later than twenty days prior to the convening of the regular
 4 session of 2022.

5 (d) For the purposes of this section, "renewable energy"
 6 has the same meaning as defined under section 269-91, Hawaii
 7 Revised Statutes.

8 SECTION 3. This Act shall take effect upon its approval.

S.B. NO. 2805

Report Title:

Office of Planning; Renewable Energy Siting Plan

Description:

Requires the office of planning to prepare a comprehensive renewable energy siting plan. Requires report to the legislature.

The summary description of legislation appearing on this page is for informational purposes only and is not legislation or evidence of legislative intent.
