

LESLIE H. KONDO State Auditor

(808) 587-0800 lao.auditors@hawaii.gov

HOUSE COMMITTEE ON LABOR & PUBLIC EMPLOYMENT

The Honorable Aaron Ling Johanson, Chair The Honorable Stacelynn K.M. Eli, Vice Chair

H.B. NO. 1462, RELATING TO UNFUNDED LIABILITIES

Hearing: Tuesday, February 5, 2019, 9:30 a.m.

The Office of the Auditor has no position regarding the merits of the study required in H.B. No. 1462. However, we suggest that we are not the appropriate agency to perform the study.

H.B. No. 1462 requires us to conduct a study on the feasibility of providing health benefits to state and county employees using a self-insured model. Specifically, the bill requires us to examine the potential impacts of transitioning health benefits to a fully self-insured model, partially self-insured model, or other risk retention model including:

- 1. Risks to the State from acting as its own insurer, including but not limited to:
 - (A) Uncontrolled utilization; and
 - (B) Cost increases from catastrophic claims events;
- 2. Investment returns on reserves in the employer-union health benefits trust fund;
- 3. Administrative cost savings, including any federal tax or fee savings;
- 4. Fiduciary and legal obligations of the State;
- 5. Benefits available for employees and other insured persons;
- 6. Changes in provider reimbursement levels, capitation, and care management practices;
- 7. Any other factors or impacts the state auditor deems to be relevant;
- 8. Risk assumptions used and analysis of the assumptions; and
- 9. The funding model proposed under part II, which involves a rate stabilization reserve fund, maximum levels of employer contributions to the other post-employment benefits trust fund, the diversion of the excess in employer contributions to the employees' retirement fund, and the use of transient accommodations tax revenues to supplement deficient county public employer contribution amounts.

The bill would also require us to collect an assortment of data relating to health benefits, including, among other things, historical census data, health benefit premium rates, contributions, and health plan documents.

Our office does not have the expertise to conduct this study. Our work primarily is performance audits, meaning we evaluate a department or program's operations against appropriate criteria, such as relevant statutes, administrative rules, policies, procedures, and best practices.

House Committee on Labor & Public Employment H.B. No. 1462 Page 2

The study contemplated by this bill requires different skills and expertise from those required to audit a department or agency's operations. While we appreciate that the bill includes an appropriation to hire a consultant, we do not have an estimate for how much time and resources would be necessary to complete such an expansive study.

We suggest that another agency – such as the Employer-Union Health Benefits Trust Fund (EUTF) or the Legislative Reference Bureau – may be better suited to perform the requested study and recommend that the bill be amended to reflect the more appropriately suited agency to perform the work.

Thank you for considering our testimony related to H.B. No. 1462.

DEPARTMENT OF BUDGET AND FINANCE
STATE OF HAWAII
TO THE HOUSE COMMITTEES ON LABOR & PUBLIC EMPLOYMENT
ON HOUSE BILL NO. 1462

February 5, 2019 9:30 a.m. Room 309

RELATING TO UNFUNDED LIABILITIES

Chair Johanson, Vice Chair Eli, and Members of the Committee:

The Hawaii Employer-Union Health Benefits Trust Fund (EUTF) Board of Trustees has not been able to take a position on this bill. Their next meeting is scheduled for February 19, 2019. However in the past, the EUTF Board has provided comments on Part I and opposed Part II.

Part I. Under Section 87A-16(b), Hawaii Revised Statutes (HRS), the EUTF Board is able to self-insure its health benefit plans. The EUTF Board currently self-insures the prescription drug, administered by CVS/SilverScript, and supplemental medical and prescription drug, administered by HMA, plans. The following is a summary of the funding methodology for the EUTF's health benefit plans:

- 1. Fully-insured Kaiser medical and prescription drug, and life insurance plans.
- 2. Self-insured prescription drug, administered by CVS and SilverScript, and supplemental medical and prescription drug, administered by HMA, plans.

EUTF's Mission: We care for the health and well being of our beneficiaries by striving to provide quality benefit plans that are affordable, reliable, and meet their changing needs. We provide informed service that is excellent, courteous, and compassionate.

 Fully-insured with one-way risk sharing – HMSA medical, HDS dental and VSP vision plans.

Under the fully-insured with one-way risk sharing model, the EUTF Board negotiates a premium with the contracted carrier. Should claims and expenses exceed the premiums collected, the loss is borne by the insurer. However, should premiums exceed claims and expenses, the surplus is refunded to the EUTF. This can also be viewed as EUTF self-insuring up to the premium amount with insurance (i.e. stop loss insurance) above the premium.

The decision to self-insure or fully-insure is made by the EUTF Board in consultation with the EUTF's benefit consultant, Segal Consulting, as part of the request for proposals conducted to contract medical, prescription drug, dental, vision and life insurance contractors in accordance with Chapter 103D, HRS. The EUTF Board examines the proposed premiums including expenses and federal taxes under a fully-insured model versus the projected claims, proposed fees, federal taxes and risk under a self-insured model to determine the funding method. Request for proposals are conducted at least every three years for medical and prescription drug plans and every four years for dental, vision and life insurance plans.

The health care industry is always changing and the recommendations from a study today may not be applicable to the future. For example, during the most recent medical RFP (for retiree plans beginning January 1, 2018 and employee plans beginning July 1, 2018), the largest medical insurer in the state was currently in the process of changing its reimbursement model for its primary care providers and there were discussions at the federal level of terminating the Affordable Care Act. Current events have significant impact on a decision whether to self-insure or fully-insure.

Part II. Act 268, Session Laws Hawaii 2013 (Act 268) established a mechanism to fund the unfunded actuarial accrued liability (UAAL) of the State and counties related to other post-employment benefits (i.e. retiree health benefits) or also known as OPEB. by requiring the employers to contribute the annual required contribution (ARC) which is comprised of the normal cost and an amortization payment to pay off the UAAL in 30 years. Under Act 268, the State is projected to be fully funded by June 30, 2044. Additionally, the State's funded ratio (assets / actuarial accrued liability) has increased from 0% at July 1, 2013 to 12.1% at July 1, 2018 and is expected to increase by 3-4% each year under Act 268. The bill will no longer require that the State and counties fund the normal cost and amortization payment but would only require the annual retiree premiums. The estimated \$140 million in investment income from the \$2 billion Rate Stabilization Reserve in combined employer assets will do little to address the employers' retiree premiums in the future – \$474 million in the fiscal year ended June 30, 2018 that are projected to increase to \$1.0 billion in 10 years. Additionally, with the elimination of the Act 268 funding mechanism, the State's actuary will be required to use a much lower investment return rate (i.e. high quality, municipal bond rates approximately 3.6%) to value the actuarial accrued liability. This could result in a significant increase in the State's July 1, 2018 UAAL of \$9.3 billion (e.g. a 1% decrease in the rate of return increases the UAAL by \$1.6 million). Lastly, the elimination of Act 268 could negatively impact bond ratings.

Thank you for the opportunity to testify.

BEFORE THE

HOUSE COMMITTEE ON LABOR AND PUBLIC EMPLOYMENT

Representative Aaron Ling Johanson, Chair Representative Stacelynn K.M. Eli, Vice Chair

HB1462 RELATING TO UNFUNDED LIABILITIES

TESTIMONY OF
KEKA SANBORN
Vice President of Strategy,
Hawaii-Western Management Group

February 5, 2019, 9:30 a.m. State Capitol Conference Room 309

Chair Johanson, Vice Chair Eli, and Committee Members:

My name is Keka Sanborn, the Vice President of Strategy for Hawaii-Western Management Group (HWMG). HWMG supports HB1462.

By way of background, HWMG is a small, kama'aina third-party administrator providing health insurance management services for a wide range of organizations including Hawaii Medical Assurance Association (HMAA), Charter Communications, Hawaii Electricians Local Union 1186, and labor unions. HWMG is proud to be 100% employee-owned through its Employee Stock Ownership Plan (ESOP).

HWMG manages numerous self-insured plans for its clients. Self-insured or self-funded plans have a number of potential advantages over fully insured plans, including allowing employers to (i) customize the plan to meet the specific needs of its workforce, (ii) maintain control over the health plan reserves and enabling the maximum interest income to reinvest in the needs of the workforce (that would otherwise be generated by an insurance carrier through the investment of premium dollars) on workforce-specific wellness programs and other initiatives to benefit the employees, (iii) not have to prepay for coverage, thereby providing for improved cash flow, (iv) avoid the Affordable Care Act tax, (v) contract freely with providers or a provider network that is best suited to meet the healthcare needs of its employees. All these benefits allow the employer to lower health care costs while still maintaining a level of health benefits.

Accordingly, HWMG respectfully urges the passage of this measure. Thank you for the opportunity to testify on this matter of critical importance.

DIRECTOR

ROBERT YU

DEPUTY DIRECTOR

TESTIMONY BY RODRICK K. BECKER DIRECTOR, DEPARTMENT OF BUDGET AND FINANCE TO THE HOUSE COMMITTEE ON LABOR AND PUBLIC EMPLOYMENT ON HOUSE BILL NO. 1462

February 5, 2019 9:30 a.m. Room 309

RELATING TO UNFUNDED LIABILITIES

House Bill No. 1462:

- Requires the State Auditor to study the feasibility of providing health benefits to
 State and county employees using a self-insured model, and makes an unspecified general fund appropriation to the State Auditor for that purpose;
- Establishes the Rate Stabilization Reserve Fund (RSRF) to provide reserve funding
 to stabilize the Hawaii Employer-Union Health Benefits Trust Fund (EUTF) at times
 when the EUTF has insufficient moneys to cover the costs of providing health and
 other benefit plans for active employees and retirees and their beneficiaries;
- Requires all unencumbered and unexpended moneys in excess of \$2.0 billion
 remaining in the EUTF at the end of each fiscal year be transferred to the RSRF;
- Provides that when the separate accounts for each public employer within the Other
 Post-Employment Benefit (OPEB) Trust Fund have a combined balance of
 \$2.0 billion, any earnings from the \$2.0 billion remaining in the OPEB Trust Fund be
 transferred to the separate accounts for each public employer in the RSRF at the
 end of each fiscal year; and

 Amends the definition of "annual required contribution" (ARC) by deleting references to the normal cost and the amortization payment for the unfunded liability.

The Department of Budget and Finance (B&F) would like to provide the following comments on Part II of the bill which pertains to the RSRF and other-related amendments. It should be noted that although the purpose section for Part II indicates that the bill caps public employer prefunding, the specific amendments in Part II do not appear to establish a cap of \$2.0 billion. All the amendments do is specify that amounts over \$2.0 billion are to be transferred to the RSRF. Further, the bill does not modify requirements that the public employers make ARC payments. The bill only deletes specific references to what the ARC payments consist of.

In closing, B&F strongly urges that the Legislature maintain the commitment to address the State's OPEB unfunded liability that was established by the passage of Act 268, SLH 2013.

Thank you for the opportunity to provide our comments.

LEGISLATIVE TAX BILL SERVICE

TAX FOUNDATION OF HAWATI

126 Queen Street, Suite 304

Honolulu, Hawaii 96813 Tel. 536-4587

SUBJECT: MISCELLANEOUS, Rate Stabilization Reserve Fund for OPEB

BILL NUMBER: HB 1462

INTRODUCED BY: CACHOLA, BROWER, CABANILLA ARAKAWA, CREAGAN, DECOITE, ELI, HAR, HASHIMOTO, D. KOBAYASHI, MIZUNO, NAKASHIMA, NISHIMOTO, OHNO, ONISHI, SAY, TODD, WARD, WILDBERGER, McKelvey

EXECUTIVE SUMMARY: Establishes the Rate Stabilization Reserve Fund within the Hawaii Employer-Union Health Benefits Trust Fund to help subsidize the costs of providing health and other benefit plans for active employees and retirees and their beneficiaries. Caps employer contributions to the Other Post-Employment Benefits (OPEB) trust fund, which are made to prefund the unfunded actuarial accrued liability of the Employer Union trust fund, when the separate accounts for each public employer within the OPEB trust fund have a combined balance of at least \$2,000,000,000. Provides for the use of a portion of transient accommodations tax revenues to supplement deficient county public employer contribution amounts.

This bill deals with other post-employment benefits for state workers – meaning ERS and EUTF. Act 268, SLH 2013, established a mechanism to pay down the unfunded liabilities over time. The bill recites that it can deal with those problems without raising taxes, affecting workers' benefits, or laying off people. The reality, however, is that at its core, the bill tosses away the fiscal discipline of Act 268, instead relying upon a pay-as-you-go mentality. In addition, key pieces of this legislation conflict with federal law and the terms of the existing OPEB trust instruments.

SYNOPSIS: The following summarizes Part II of the bill.

Adds a new section to HRS chapter 87A that establishes a rate stabilization reserve fund. The fund is to provide reserve funding to stabilize the fund when there is insufficient money in the fund to cover the costs of providing health and other benefit plans for employee-beneficiaries and dependent-beneficiaries. Unless otherwise specified by law, the rate stabilization reserve fund shall not be subject to appropriations for any purpose and shall not be subject to claims by creditors of the employers.

Provides that any balance in the employee benefits trust fund under section 87A-31 will be transferred to the new rate stabilization reserve fund.

Deletes the language providing that a public employer's required contribution to the employee benefits trust fund includes an amortization payment that is designed to fund the unfunded actuarial accrued liability over the next thirty years. Adds language stating that no public employer contribution shall be required if the separate accounts for each public employer within the employee benefits trust fund have a combined balance of at least \$2 billion.

Re: SB 1262 Page 2

EFFECTIVE DATE: This Act shall take effect on July 1, 2019; provided that part II shall take effect on July 1, 2020.

STAFF COMMENTS: These comments relate to Part II.

The state long ago agreed to pay post-employment benefits to its workers. ERS, or Employees' Retirement System, represents the retirement benefits. EUTF, the Employer-Union Health Benefits Trust Fund, represents the medical benefits. At June 30, 2013, ERS had an "unfunded actuarial accrued liability" of about \$8.4 billion. For EUTF, the number was about \$18.2 billion. Those numbers represent the present value of what we taxpayers owe for these future benefits. In comparison, the total annual state general fund budget is \$5.5 billion.

Faced with these staggering numbers, Act 268, SLH 2013, was enacted. Act 268 requires public employers to pay actuarially determined annual required contributions to fund the present cost of the benefits and to eat away at the unfunded balance over thirty years' time. If the public employers do not pay their required contribution, the general excise tax would be sequestered to pay it if the delinquent employer was the state; if the delinquent employer was one of the counties, that county's share of the transient accommodations tax would be sequestered. Again, the idea was to pay down the unfunded liability over a period of several years.

The bill proposes to deal with the issue by establishing a new fund to "stabilize" the system when there is insufficient money. The first issue, of course, is figuring out how to fund this fund.

To accomplish this trick, the bill basically proposes to do away with the amortization built into Act 268. "Clearly, given current and projected revenues, the State and the counties cannot afford to prefund both health and pension unfunded liabilities, which are projected to total more than \$800,000,000 per year in later years," as stated in the preamble to the bill as introduced, and "[b]y not requiring other post-employment benefits prefunding through 2049, this Act will free up moneys for important state, county, and other public employee services, projects, and needs." In other words, the bill proposes to deal with the unfunded liabilities problem by denying that it's a problem. "Don't worry," it's telling everyone. "We can pay the current year's costs of the post-employment benefit programs we created. There won't be any rainy day. So just go about your business."

This might be fine if there is in fact no rainy day, and the economy chugs along giving us enough money to pay these obligations. But if bad things happen – we've recently had to face crippling economic recessions as well as natural disasters – then we might deeply regret ever having gone into pay-as-you-go mode.

In addition, one of the central premises behind the proposed stabilization fund is that it won't be raided, ever. The reality, however, is that nice, fat stabilization funds make for very tempting raid targets. However well-intentioned this legislature is, however, it normally can't bind a future legislature.

Next, the bill proposes that the stabilization fund be fed by transfers from the existing funds. Nominally such transfers would accomplish nothing, being payments of money from the State's right pocket to its left pocket, but, as testifiers in previous years have pointed out, such transfers Re: SB 1262 Page 3

would violate the trust instrument that establishes the trust funds in the first place, and they would violate the Internal Revenue Code, a federal law that cannot be modified by state law. Such transfers also potentially violate ERISA, a federal law that has been held to have a very broad preemptive sweep. If enacted, then, it seems clear that key pieces of the plan won't work.

Digested 2/4/2019

The Honorable Rep. Aaron Ling Johanson, Chair Labor & Public Employment Committee Hawaii State Capitol 415 South Beretania Street, Room 436 Honolulu, HI 96813

Dear Chair Johanson and members of the Committee:

I am in strong support of **House Bill 1462 Relating to Unfunded Liabilities** which will be heard by the Labor & Public Employment Committee on February 5, 2019.

Our state faces a shortfall of over \$12 billion in health unfunded liabilities. Act 268 (2013) requires the State and counties to pre-fund Other Post-Employment Benefits (OPEB) annual required contributions to cover the Employer Union Health Benefits Trust Fund (EUTF) unfunded liability. The pre-funding amount is about \$500 million per year for the next 30 years.

As of 2018, the total pre-funded amount is \$2.37 billion. However, paying down the billions of dollars in unfunded liability may require drastic measures such as raising General Excise Tax (GET) and property taxes; laying-off state and county employees; cutting back benefits for state and county employees; increasing employee contributions; or using a combination of the aforementioned solutions. None of these drastic measures apply in HB 1462.

HB 1462, when enacted into law, could potentially save over \$500 million each year for the next 30 years. These savings may be used to fund much-needed state and county projects and provide a welcomed relief for taxpayers.

Part I of HB 1462 also requires a feasibility study to determine the advantages of providing health benefits to state and county employees under a self-insured model. Over 300 businesses and organizations in Hawaii have successfully converted to self-insured from fully-insured. In addition, research has shown that 29 states that converted from a fully-insured health program to self-insured were able to control costs, save money and customize benefits. Part II of HB 1462 is

| the implementation to convert from a fully-insured to a self-insured model, | should the s | study |
|---|--------------|-------|
| justify conversion like the 29 states utilizing the self-insured concept. | | |

| For the above reasons, I respectfully ask that your committee pass House Bill 1462 Relating to |
|--|
| Unfunded Liabilities to help the state meet its unfunded health care obligations for current |
| public workers, retirees, future retirees and their dependents. |

Sincerely,

Ken Farm
