
A BILL FOR AN ACT

RELATING TO THE TRANSITION OF THE OAHU REGIONAL HEALTH CARE
SYSTEM FROM THE HAWAII HEALTH SYSTEMS CORPORATION INTO THE
DEPARTMENT OF HEALTH.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 PART I

2 SECTION 1. The legislature finds that the Hawaii health
3 systems corporation comprises five semi-autonomous health care
4 regions within the State, including east Hawaii, west Hawaii,
5 Kauai, Oahu, and Maui. The Maui region no longer operates any
6 health care facilities.

7 The legislature further finds that the Oahu region is
8 unique and distinguishable from the other regions due to the
9 logistical complexities of the Oahu regional health care system
10 facilities and the limited but crucial nature of the services
11 these facilities, Leahi hospital and Maluhia, currently provide.
12 Because the Oahu facilities almost exclusively serve long-term
13 care and medicaid patients, groups traditionally underserved by
14 private facilities because of the high cost of their care, the
15 Oahu region's long-term care operations are run more as a

1 safety-net social service and, compared to the other regions,
2 have less opportunity for additional revenue generation.

3 While the need for long-term care beds on Oahu has
4 decreased in recent years, a study completed by the department
5 of business, economic development, and tourism has projected
6 that the population aged sixty-five and older will grow by one
7 hundred forty-eight per cent over the next twenty-five years.
8 On Oahu, this translates to an estimated shortfall of eleven
9 hundred long-term care beds in the next five to ten years alone.
10 Thus, despite the costs of long-term care, it is vital that
11 state facilities continue to operate to ensure that beds remain
12 available for our aging population.

13 Similar to the Oahu region, the department of health
14 operates the Hawaii state hospital, a facility that does not
15 generate revenue but is nonetheless necessary to provide care
16 and treatment for mentally ill patients in Hawaii. In recent
17 years, the Hawaii state hospital has experienced a challenge in
18 providing sufficient bed space for admitted patients. As of
19 September 2019, two hundred twenty patients occupied beds at the
20 Hawaii state hospital--well over the maximum capacity of two
21 hundred two. To meet its needs, the Hawaii state hospital was

1 also required to contract with Kahi Mohala, a privately-run
2 facility, to care for an additional forty-six patients.

3 Beyond its responsibility for the Hawaii state hospital,
4 the department of health has also been charged with addressing
5 the significant gap in the behavioral health care system between
6 acute psychiatric care facilities and low acuity residential
7 treatment. Data collected in the State estimates that more than
8 half of all individuals experiencing a mental health crisis, or
9 fifty-four per cent, have needs that align better with services
10 delivered within a subacute level of care facility rather than
11 an emergency room.

12 The legislature also finds that Act 90, Session Laws of
13 Hawaii 2019, established the involuntary hospitalization task
14 force and Act 263, Session Laws of Hawaii 2019, established a
15 working group to evaluate current behavioral health care and
16 related systems, including existing resources, systems gaps, and
17 identification of action steps that would be taken to improve
18 the overall system of care. The findings from these initiatives
19 highlight the need in Hawaii for a coordinated network of
20 stabilization beds that will allow triage, clinical assessment,
21 and recommendation for the next level of care for those

1 struggling with substance use, mental health conditions, and
2 homelessness.

3 The National Coalition for the Homeless has found that
4 sixty-four per cent of homeless individuals are dependent on
5 alcohol or other substances. In Hawaii, the Oahu homeless point
6 in time count reported that 36.4 per cent of homeless single
7 adults suffer from some type of mental illness. The
8 intersection of homelessness and behavioral health conditions
9 are a crisis in Hawaii, which contributes to Hawaii having the
10 second highest rate of homelessness in the nation.
11 Unfortunately, there is currently no coordinated system of
12 stabilization from the streets that assesses for and links to
13 the next level of clinical care.

14 The legislature additionally finds that the current options
15 for those needing stabilization from challenges related to
16 substance use, mental health, and homelessness are overburdened
17 and inadequate, and emergency facilities throughout the State
18 have experienced substantial increases in psychiatric emergency
19 admissions, resulting in overcrowding and unsafe environments
20 for patients and medical staff.

1 The legislature also finds that comprehensive crisis
2 response and stabilization services are crucial elements of the
3 continuum of care. Reducing unnecessary transportation to
4 emergency departments and appropriately placing individuals in
5 more suitable levels of care will improve outcomes for patients,
6 reduce inpatient hospital stays, and facilitate access to other
7 behavioral health services.

8 Subacute residential stabilization services have been a
9 missing component of a comprehensive behavioral health continuum
10 of care, which would bridge the gap between acute
11 hospitalization and lower level residential and community
12 resources. Many individuals who are transported to an emergency
13 room or for emergency examination and hospitalization are not
14 acute enough in their illness to warrant psychiatric
15 hospitalization. On the other hand, their symptomology is too
16 acute for them to be admitted to a group home, shelter, or other
17 existing low acuity residential program or, if they are
18 admitted, they are often unsuccessful in those environments.
19 More often than not, these individuals fail because they have
20 not had time to stabilize in an environment where they can be
21 closely monitored. This lack of post-acute care contributes to

1 the poor outcomes of both acute behavioral health inpatient and
2 community-based services because many individuals are not
3 appropriate for either level, but fall somewhere in the middle.

4 The legislature further finds that state facilities exist
5 that have underutilized space that could accommodate these
6 services with minimal effort and adjustments and reduce certain
7 burdens and barriers. Therefore, assertive efforts should be
8 undertaken to ensure the availability of these resources and to
9 organize them in a way that is beneficial to the State.

10 Through discussions with the Oahu region, it has been
11 determined that some of the Oahu region's health care
12 facilities, particularly Leahi hospital, are currently
13 underutilized and have the potential to be re-purposed for other
14 important health care and social service needs.

15 The legislature further finds that, while statutorily tied
16 to the Hawaii health systems corporation, the Oahu region
17 operates mostly autonomously and its functions and target
18 population are unique from those of the other regional health
19 care systems. As such, there is little necessity for the Oahu
20 regional health care system to remain a part of the Hawaii
21 health systems corporation. With proper planning and

1 implementation, the Oahu regional health care system could be
2 strategically assimilated into the department of health, and its
3 facilities could be used, in addition to long-term care, to help
4 alleviate the need for subacute residential mental health
5 stabilization and other subacute care services.

6 The purpose of this Act is to:

- 7 (1) Commence the transfer of the Oahu regional health care
8 system in its entirety from the Hawaii health systems
9 corporation to the department of health, beginning
10 with the transfer of the Oahu regional health care
11 system's budget into the department of health;
- 12 (2) Enable the Oahu regional health care system,
13 department of health, Hawaii health systems
14 corporation, and other state agencies to implement the
15 processes and transactions required to effectuate the
16 completion of the transition;
- 17 (3) Require the department of health to consult with the
18 University of Hawaii regarding services provided at
19 Leahi hospital and Maluhia, and allow University of
20 Hawaii students to rotate through those facilities for
21 training purposes;

- 1 (4) Authorize the department of health to pay rent to the
2 University of Hawaii for the use of the Leahi hospital
3 property at a rate and on terms to be negotiated
4 between the department of health and the University of
5 Hawaii;
- 6 (5) Clarify the rights, powers, and exemptions held by the
7 Oahu regional health care system during the transition
8 period and the rights, powers, and exemptions held by
9 the inpatient services division of the department of
10 health following completion of the transfer of the
11 Oahu regional health care system;
- 12 (6) Appropriate moneys from the mental health and
13 substance abuse special fund to expand and operate
14 programs at Leahi hospital and Maluhia that are
15 mutually advantageous to the department of health, the
16 Oahu region, and the State; and
- 17 (7) Authorize the issuance of general obligation bonds and
18 appropriate the proceeds of the bonds for improvements
19 at Leahi hospital and Maluhia.
