
A BILL FOR AN ACT

RELATING TO NEWBORN HEARING SCREENING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that newborn hearing
2 screening is mandated by part XXIX, chapter 321, Hawaii Revised
3 Statutes, as a public health screening program that helps deaf
4 or hard of hearing children reach their developmental milestones
5 and be language-ready for school.

6 Furthermore, the national standards for early hearing
7 detection and intervention are hearing screening by age one
8 month, diagnostic audiologic evaluation by age three months, and
9 enrollment in early intervention services by age six months.
10 Studies show that children who are deaf or hard of hearing who
11 receive early hearing screening and appropriate follow-up have
12 better vocabulary outcomes, reach their language and
13 communication milestones, and are language-ready for school.

14 Currently, the department of health newborn hearing
15 screening program does not receive diagnostic audiologic
16 evaluation results for all newborns who do not pass newborn
17 hearing screening. The legislature further finds that

1 consistent reporting of diagnostic audiologic evaluation results
2 will allow the program to ensure that all infants who do not
3 pass hearing screening receive a diagnostic audiologic
4 evaluation and appropriate follow-up and support. Timely
5 diagnostic audiologic evaluation results will also facilitate
6 referrals into early intervention services for infants who are
7 deaf or hard of hearing.

8 The purpose of this Act is to ensure that timely diagnostic
9 audiologic evaluation results on newborns who did not pass
10 newborn hearing screening, or infants whose hearing status
11 changes, are provided to the department of health.

12 SECTION 2. Section 321-361, Hawaii Revised Statutes, is

3 audiologist or physician specialized in hearing function.

4 "Hearing screening" means objective procedures to detect
