
A BILL FOR AN ACT

RELATING TO MICROCHIP IDENTIFICATION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that one in three pets
2 will become lost during its lifetime. Sadly, ninety per cent of
3 these pets will not return home unless the pet is equipped with
4 some sort of identification. Across the nation, 1,500,000 stray
5 animals are euthanized by animal shelters and animal control
6 contractors. Microchip identification can save the lives of
7 these pets.

8 Today, national microchip registration companies provide a
9 more affordable and effective alternative for pet owners looking
10 for their lost pets. The legislature further finds that
11 microchip identification is the single most effective way of
12 returning lost pets to their owners. A microchip is about the
13 size of a grain of rice and implanted beneath the pet's skin
14 between the shoulders. It contains a unique number used to
15 identify animals, which can be scanned and then used to find the
16 owner's contact information in a registry. Found pets can be

1 taken to a veterinary office, rescue organization or shelter, or
2 even a pet store to have the pet checked for a microchip.

3 With support from social media, individuals with personal
4 scanners are available in every community and can respond to
5 found pet alerts posted on pet pages. National registries, such
6 as the nonprofit Found Animals organization, then send a
7 voicemail, text message, and electronic mail alert to owners
8 when their pet is found. The pet owner is then provided with
9 the contact information of the rescuer or finder. These support
10 networks allow finders to directly return lost pets to their
11 owners in communities where they live, since lost pets are most
12 often found within a mile of their home.

13 The legislature also finds that this streamlined process
14 effectively bypasses the need for animal control, saves taxpayer
15 money by eliminating the cost of intake and boarding, and avoids
16 the delays and additional stress on the pet from sitting alone
17 in a kennel waiting for its owner.

18 Therefore, the purpose of this Act is to save pets' lives
19 by requiring all dog and cat owners to microchip their pets.

1 SECTION 2. Chapter 143, Hawaii Revised Statutes, is
2 amended by adding a new section to be appropriately designated
3 and to read as follows:

4 "§143- Microchip identification. (a) An owner shall
5 have a microchip implanted in the owner's dog or cat, and the
6 owner shall register the microchip number and the owner's
7 contact information with a microchip registration company.

8 (b) When the contact information of the owner of a dog or
9 cat changes, the owner shall provide the new contact information
10 to the applicable microchip registration company no later than
11 thirty days after the change in contact information occurs.

12 (c) When the owner of a dog or cat transfers ownership to
13 another owner:

14 (1) The former owner shall inform the new owner of the
15 microchip registration company with which the dog or
16 cat's microchip is registered; and

17 (2) The new owner shall provide the microchip registration
18 company with the new owner's contact information no
19 later than thirty days after the transfer of ownership
20 occurs.

1 (d) Every animal control contractor or nonprofit animal
2 rescue organization shall implant a microchip in all stray dogs
3 and cats in its custody that do not have a microchip.

4 (e) All animal control contractors shall activate the
5 microchip registration company's found pet alerts to notify
6 owners whose pets' microchips are registered with that company if
7 the pet is found and the owner is not present.

8 (f) Veterinary clinics, animal shelters, and other animal
9 rescue organizations that scan found pets for microchips shall
10 release only the chip identification number to the finder upon
11 request.

12 (g) For the purposes of this section:

13 "Microchip" or "microchip identification" means a device
14 that is implanted under the skin of an animal and that contains
15 contact information for the owner of the animal.

16 "Owner" means any person owning, harboring, or keeping a
17 dog or cat; providing care or sustenance for a dog or cat; or
18 having custody of a dog or cat, whether temporarily or
19 permanently."

20 SECTION 3. Section 143-2, Hawaii Revised Statutes, is
21 amended to read as follows:

1 "§143-2 License or microchip required. It shall be
2 unlawful for any person to own or harbor a [~~dog~~]:

3 (1) Dog unless the dog is licensed and has been implanted
4 with a microchip identification as provided by this
5 chapter[~~7~~]; provided that the [~~legislative bodies of~~
6 ~~the several~~] counties may, by ordinance, dispense with
7 or modify the licensing requirements of this chapter[~~7~~
8 ~~This~~]; provided further that this chapter shall not
9 apply to dogs under the age of three months [~~which do~~
10 ~~not run at large, dogs in quarantine and~~] or dogs
11 brought into the State exclusively for the purpose of
12 entering them in a dog show or [~~dog~~] exhibition and
13 not [~~allowed~~] allowing them to run at large[~~7~~]; or

14 (2) Cat unless the cat has been implanted with a microchip
15 identification as provided by this chapter; provided
16 that the counties may, by ordinance, dispense with or
17 modify the licensing requirements of this chapter;
18 provided further that this chapter shall not apply to
19 cats under the age of three months or cats brought
20 into the State exclusively for the purpose of entering

1 them in a cat show or exhibition and not allowing them
2 to run at large."

3 SECTION 4. This Act does not affect rights and duties that
4 matured, penalties that were incurred, and proceedings that were
5 begun before its effective date.

6 SECTION 5. Statutory material to be repealed is bracketed
7 and stricken. New statutory material is underscored.

8 SECTION 6. This Act shall take effect on May 6, 2137.

S.B. NO. 1387
S.D. 1

Report Title:

Microchip Identification; Pets; Dog and Cat Owners

Description:

Requires dog and cat owners to microchip their pets, if the pets are not licensed. Effective 5/6/2137. (SD1)
