Doc Bailey - Biography

I have been in the industry for over thirty-three years. I started off working for Coast Crane in Northern California where I became trained in Grove and National cranes. Upon my departure I went into business for myself, where I have performed Inspections, Repairs, and services all around the world. I am currently the distributor for LinkBelt Cranes for the state of Hawaii and the Pacific Islands. The growth in my business has afforded me opportunities beyond my greatest dreams. With age setting in I am heading down a path to provide more inspections and training than the day to day physically tasks out in the cold and heat. In 2017 I was appointed to the Hawaii Machinery Operators Advisory Board (HMOAB) for the state of Hawaii. This has allowed me to work with some of the brightest people in the industry to help make Hawaii a better and safer place for crane operators. It would be an honor to be part of the CCAA board.
