
A BILL FOR AN ACT

RELATING TO THE HOSPITAL SUSTAINABILITY PROGRAM.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the hospital
2 sustainability program, established by Act 217, Session Laws of
3 Hawaii 2012, has served a critical role in strengthening the
4 health care system in Hawaii. In the nine years since its
5 inception, the hospital sustainability program has helped acute
6 care facilities treat the most vulnerable patients in the State,
7 especially low-income individuals who require hospital services.
8 The program has been carried out in a public-private partnership
9 to ensure that patients in Hawaii can access quality, affordable
10 care.

11 The legislature further finds that, even with this program,
12 hospitals in the State face major financial challenges. These
13 challenges are due in part to the health and financial pressures
14 related to the coronavirus disease 2019 (COVID-19) pandemic.
15 Medicaid is jointly financed by the federal and state
16 governments by statutory formula. The federal government pays
17 between fifty per cent and seventy-four per cent, with

1 assistance levels determined by each state's per capita income.
2 States with the lowest per capita income receive higher federal
3 matching rates. Under federal rules, the state share must be
4 paid from public funds that are not federal funds. The
5 legislature finds that provider fees may be established to
6 provide public funding to help financially sustain Hawaii's
7 hospitals.

8 The legislature further finds that provider fees are used
9 in forty-nine states and the District of Columbia to draw down
10 federal funds to sustain medicaid programs. The fees have been
11 employed due to rising state budget deficits, increasing health
12 care costs, and expanding medicaid enrollment. Provider fees,
13 which are collected from specific categories of health care
14 providers that agree to the fee, may be imposed on nineteen
15 different classes of health care services, including inpatient
16 and outpatient hospital and nursing facility services.

17 The legislature therefore finds that, in Hawaii, a hospital
18 provider fee can result in substantial increases in medicaid
19 payments without putting additional constraints on the State's
20 budget. The additional federal funds obtained via the fee
21 program authorized by the hospital sustainability program can

1 maintain access to care for medicaid recipients. This will
2 allow hospitals in the State to continue to serve uninsured or
3 underinsured patients in a timely, effective manner. This helps
4 to ensure the overall sustainability of the health care system
5 in Hawaii during the challenging time of the COVID-19 pandemic.

6 The purpose of this Act is to preserve access to health
7 care for medicaid recipients by extending the hospital
8 sustainability program.

9 SECTION 2. Section 346G-3, Hawaii Revised Statutes, is
10 amended by adding a new definition to be appropriately inserted
11 and to read as follows:

12 ""Net benefit" means total payments using prevailing
13 federal medical assistance percentage rates made to private
14 hospitals, less the taxes paid under the hospital sustainability
15 program."

16 SECTION 3. Section 346G-4, Hawaii Revised Statutes, is
17 amended to read as follows:

18 "[+]§346G-4[+] **Hospital sustainability program special**

21 factors affecting the calculation of the aggregate net benefit,
