A BILL FOR AN ACT

RELATING TO ELECTRONICALLY-STORED IDENTIFICATION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the use of
2 electronically-stored driver's licenses and identification cards
3 is expanding. The states of Arizona, Connecticut, Georgia,
4 Iowa, Kentucky, Maryland, Oklahoma, and Utah all either support
5 the use of electronically-stored identification or are in the
6 process of enacting legislation to support that use.
7 Additionally, users of electronically-stored identification in
8 those states will be able to present electronically-stored
9 identification at Transportation Security Administration
10 checkpoints in participating airports. The legislature further
11 finds that electronically-stored identification provides a
12 secure and safe alternative to carrying and presenting a
13 physical driver's license or identification card.

14 The purpose of this Act is to authorize electronically-
15 stored driver's licenses and identification cards to be stored
16 and presented through an approved electronic identification
17 storage service.

1 SECTION 2. Chapter 286, Hawaii Revised Statutes, is
2 amended by adding a new section to be appropriately designated
3 and to read as follows:

4 "§286- Electronically-stored identification. (a) An
5 electronically-stored driver's license or identification card
6 shall be accepted in any situation in which presentation of a
7 driver's license or identification card is required.

8 (b) The director shall designate the electronic
9 identification storage services that may be used pursuant to
10 subsection (a). The director may procure and designate
11 commercially available electronic identification storage
12 services or electronic identification storage services provided
13 by the State; provided that no electronic identification storage
14 services shall be procured or designated by the director without
15 a determination that the electronic identification storage
16 services meets minimum standards of security, safety, and
17 privacy as determined by the director.

18 (c) The department shall adopt rules in accordance with
19 chapter 91 to implement this section.

20 (d) For the purposes of this section:

1 "Electronic identification storage services" means a
2 software application capable of securely storing and displaying
3 an electronic image of an existing driver's license or
4 identification card.

5 "Electronically-stored driver's license or identification
6 card" means an electronic image of an existing driver's license
7 or identification card, as those terms are defined in section
8 286-2, stored in an electronic identification storage service."

9 SECTION 3. New statutory material is underscored.

10 SECTION 4. This Act shall take effect upon its approval.

11
INTRODUCED BY:  _____

S.B. NO. 2523

Report Title:

Driver's License; Identification Card; Electronically-Stored
Identification

Description:

Authorizes electronically-stored driver's licenses and
identification cards to be stored and presented through an
approved electronic identification storage service.
