THE DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS
BEFORE THE
HOUSE COMMITTEE ON FINANCE
BIENNIUM BUDGET REQUEST FOR FISCAL BIENNIUM 2017-2019
THE TWENTY-NINTH LEGISLATURE
INTERIM OF 2016
JANUARY 10, 2017

Honorable Chair Luke, Vice Chair Cullen, and Members of the House Committee on Finance.

I am Catherine Awakuni Colón, and I am the Director of the Department of Commerce and Consumer Affairs (“DCCA” or “Department”). I appreciate this opportunity to discuss the Department’s fiscal biennium 2017-2019 (“FB17-19”) budget with the members of the Committee.

Overview

The Department's mission is to promote a strong and healthy business environment by upholding fairness and public confidence in the marketplace, and by increasing knowledge and opportunity for our businesses and citizens.

DCCA’s funding structure was established by the Legislature in 1996 through the creation of the compliance resolution fund (“CRF”). The CRF is the primary funding source for DCCA’s programs. The Department’s financial strategy is based on ensuring that divisions have revenues to pay their expenses and that they contribute equitably to departmental overhead costs, while maintaining sufficient reserves to address unexpected contingencies. The Legislature’s foresight to develop this self-sufficiency model has benefitted our customers and the public we serve and the State over many years. Self-sufficiency notwithstanding, strong fiscal oversight continues to be important to the Department. Consistent with applicable law, the fees and revenue collected by the Department are provisioned for the purpose of delivering important commerce and consumer protection related services.

Toward that end, I appreciate the Committee's thorough review and consideration of the Department's budget.

Impact of Current Economic and Fiscal Conditions

The Department and its divisions continued throughout fiscal year ("FY") 2016 to address the challenges of operating in a quickly evolving consumer and business environment affected by technological advances and increased consumer needs. A number of critical decisions were reached by DCCA divisions and attached agencies during the past year, and the Department is working to ensure that its operational systems are shored up and any backlogs that may have built up in its different regulatory areas are receiving due attention. Major activity in communications (Oceanic Time Warner-Charter Communications merger), consumer safety prosecutions (Takata airbag case), energy/utilities (Next Era-Hawaiian Electric proposed merger), and health care (insurance rate determinations) were priorities of the Department this year, and these efforts required many of the responsible divisions and agencies to allocate added resources to resolving those issues while also handling their traditional regulatory responsibilities. In addition, consumer activity has been bolstered by a healthy economy in the State, resulting in greater demands on the Department to respond to consumer complaints and to process and review applications to engage in business activity by DCCA's professional and vocational licensing staff and enforcement arms like the Regulated Industries Complaints Office and the Office of Consumer Protection.

The past year also brought about a number of developments on the national political stage that may result in significant changes to existing programs and legal structures over legislative sessions to come, including potential overhauls of the nation's Affordable Care Act, energy and environmental regulation, and aspects of banking and financial services regulation put in place to build consumer protections in the wake of recent global economic downturns. The full impacts of these possible changes on Hawaii and its businesses and consumers are difficult to anticipate at this time, but each will certainly require careful monitoring to ensure those living and operating in the State are impacted in as positive a manner as possible.

The Department, thus, continues to take a selective approach when developing its budget that aims at addressing the essential needs of the Department, including general cost adjustments felt by all agencies, and makes requests to utilize resources in a manner that most efficiently allows DCCA to carry out its mission.

Federal Funds

None of the Department's programs have lost or are at risk of losing federal funds. One of the Department's federal grants that provide funding for work in the area of health insurance – Grants to Support States in Health Insurance Rate Review – has been extended multiple times and is currently anticipated to expire on September 30, 2017 when all funds are scheduled to be exhausted.

Budget Request

The Department formulated a budget that provides the resources necessary for our programs to perform their functions and meet their goals and objectives. Pursuant to instructions in Finance Memorandum 16-12 issued by the Department of Budget and Finance (“B&F”), notable requests in the current budget include:

1. Adding \$3,144,640 in FY18 and \$2,620,676 in FY19 to strengthen and extend the State’s INET communications network and to expand broadband for unserved/underserved areas through a pilot WiFi project.

The Cable Television Division requests approval to expend trust funds of \$5,765,316 during FB17-19 (\$3,144,640 in FY18 and \$2,620,676 in FY19) to provide access to available resources to support projects and programs to (1) strengthen and extend the State’s Institutional Network (“INET”) for state and county government, and (2) facilitate the expansion of broadband access to unserved and underserved areas across the State. Enabling greater use of INET/broadband-dedicated funds will further statewide efforts to modernize the government’s capabilities and to foster growth by upgrading and expanding the State’s broadband/communications infrastructure, enabling government agencies at all levels to better serve and provide for the safety and welfare of the public.

The proposed funding source is monies from cable subscribers that have been collected and are being held by Oceanic Time Warner Cable LLC (“OTWC”) specifically for such purposes. Under the franchise agreement with OTWC, the funds in this account are restricted and can only “be used for INET/broadband connections or interconnections and equipment as directed by” the DCCA Director.¹

Highlights of this budget request are:

- a. \$4,755,316 to upgrade, strengthen, and extend the INET and to fund the purchase of INET end-user equipment for state and county agency INET users through (1) \$3,150,316 for reconfiguration of INET on-island fiber optic networks in strategic locations on the islands of Hawaii and Maui and related equipment replacement and other DCCA-authorized INET upgrades, reconfigurations, equipment, or extensions; (2) \$1,005,000 for new and replacement equipment and infrastructure to support the INET and to expand the number of INET locations and INET bandwidth capacity across the State; and (3) \$600,000 to fund the design, purchase, and installation of user end-equipment for INET connections across the State via one-time capital allocations to be administered by each county.

¹See Decision and Order No. 346, issued by DCCA on January 14, 2010.

- b. \$1,010,000 to extend access to Internet services through a Department-led pilot project to provide public WiFi hotspots at state or county locations across the State, with an emphasis placed on locations that can provide Internet access for residents in unserved and underserved rural communities and in socio-economic high risk areas. Deployment targets of this Wifi pilot project include the establishment of twenty (20) total WiFi hotspot locations spread equally across the four (4) major counties, as well as the funding of additional INET network enhancement work throughout all parts of the State.

INET improvements and enhancements will benefit Hawaii's government, as a whole, at both the state and county levels by directly assisting the information technology programs and projects of the State through the various INET partners including the Office of Enterprise Technology Services, the Department of Education, the University of Hawaii, the Hawaii State Public Library System, as well as each of the counties. Deploying INET funding through partnerships with the counties further boosts the overall benefits to the people of Hawaii by first achieving statewide INET goals and also doing so in a way that strengthens the counties' respective communications networks and supports them in carrying out their public safety functions.

Funding for DCCA's WiFi pilot project will bolster statewide efforts to provide public Internet access to Hawaii residents at public facilities, particularly in unserved and underserved rural communities and in socio-economic high risk areas, by utilizing partnerships and facilities in each county to enhance the public services provided by state and county agencies to residents across the State and to increase civic participation in state and county government.

2. Adding or converting various positions throughout the Department to improve operations and services provided to the public in critical areas.

DCCA includes various position-related requests as part of its overall FB17-19 budget submission, each of which is intended to either improve an important aspect of the Department's current functioning or to strengthen DCCA services in areas where greater workload demands are anticipated. Overall, the Department is seeking creation of eight full-time permanent positions, creation of two full-time temporary positions, the transfer of one full-time investigator position to becoming a staff attorney, and the conversion of one position to a permanent position. Collective ceiling increases for these position items are \$464,881 in FY18 and \$852,321 in FY19 across all divisions.

The Department believes that each of these requests will increase the level of services that DCCA's programs provide to the public by either adding resources to areas that currently lack sufficient staffing, such as records and licensing application processing, or by adding positions to areas that have been lacking sufficient action, such as public education and outreach in the real estate area, or by adding or refocusing positions in areas that will enable the Department to more quickly and effectively

investigate and prosecute in cases of consumer harm, such as investigations and legal actions by the Regulated Industries Complaints Office and the Office of Consumer Protection.

For example, the Department is seeking the addition of one permanent position and ceiling increase of \$68,145 in FY18 and \$130,180 in FY19 for a staff attorney position in the Office of Consumer Protection to provide additional legal expertise within the division without taking away from the work of existing staff attorneys representing the State in other areas of consumer protection. As evidenced by recent successful actions by the Office of Consumer Protection, including the Takata airbag case and the coordinated settlement of Volkswagen emissions standards violations in conjunction with the Department of the Attorney General, proactive efforts in this area can significantly boost both the level of consumer protections to the people of the State and the amount of restitution received by harmed Hawaii consumers.

To improve its internal operations the Professional and Vocational Licensing Division is requesting the addition of four positions specifically to increase staffing in its records section, which will translate to improved application and request processing times experienced by the public. The Division and Department anticipate greater demand for application and licensee requests flowing through this section as the amount of license types and overall license applications continues to increase year after year, and the level and resource requirements of new processing requirements increase – such as the addition of criminal background check requirements for large licensing populations in the health field (i.e., nurse applications). While the current licensing staff has worked hard to maintain a satisfactory level of service despite consistently rising demand, the requested staffing increases are necessary to ensure the Division does not fall far behind in responding to processing requests from the licensing public.

Requests to add two temporary exempt staff members to the Real Estate Branch of the Professional and Vocational Licensing Division are aimed at improving consumer education and outreach for real estate and condominium education. Adding one exempt position (Condominium Specialist) and resources necessary, pursuant to HRS sections 514B-63 and -73, will help effectively manage the Condominium Licensing program by assisting the Hawaii Real Estate Commission's educational outreach in performing strategic planning and implementation of educational outreach regarding condominium related issues. Also, the request for one exempt position (Real Estate Program Specialist) and resources necessary, pursuant to HRS section 467-5, will help effectively manage the Real Estate Licensing program by providing support for educational activities as necessary. The filling of the position is critical in providing timely services of the Real Estate Branch to the public, consumers, applicants, licensees, and others.

The remaining position requests are also intended to each improve DCCA operations by addressing specific division or program needs, including the addition of a

Deputy position for the Business Registration Division and the conversion of an investigator position to an attorney position within the Regulated Industries Complaints Office.

3. Adding \$942,000 in FY18 to provide the Public Utilities Commission with resources to acquire consultant support services and to provide staff training in the regulated utilities area.

As Hawaii continues to transform its energy sector, the Public Utilities Commission is responsible for administering key energy initiatives through several major legislative mandates, including the Renewable Portfolio Standards, the Energy Efficiency Portfolio Standards, the Public Benefit Fee, and the Community-Based Renewable Energy Program. The State remains committed to some of the nation's most aggressive clean energy goals, which makes Hawaii a worldwide model and testbed for innovation in both energy technology and legal/regulatory structures. While the proceeding concerning the offer by Next-Era Energy to acquire Hawaii's major electric utilities recently concluded, the sense of urgency and the work necessary for Hawaii to hit its critical clean energy targets continues unabated. In order to keep pace with desired change, the Commission continues to push forward to resolve a large list of key energy-related dockets and issues that were heavily impacted since late 2014 by the resource-consuming merger proposal of Next-Era Energy and the Hawaiian Electric Companies.

Commission resources were reallocated during calendar year 2015 and the first half of 2016 from critical energy dockets toward resolving the NextEra proceeding. The dockets impacted include the review of the electric utilities' Power Supply Improvement Plans, creation of a cohesive Distributed Energy Resources policy for the State, and the establishment of a workable Community-Based Renewable Energy tariff structure and program, each of which have received a renewed level of time and attention. As a result, the Commission is currently in the situation of restarting the work on the postponed dockets while getting prepared for calendar year 2017, a year in which it is anticipated that there will be five major rate cases. Hawaiian Electric Light Company's (Hawaii Island) and Hawaiian Electric Company's (Oahu) applications have already been filed, and Maui Electric Company Limited's application is anticipated in mid-2017 along with general rate increase applications from Hawaii Gas and Kauai Island Utility Cooperative.

The Commission's request for added funds to both hire consultants with advanced technical and regulatory expertise and to quickly train a continuously expanding staff in the intricacies of energy and general utilities regulation will greatly assist the Commission to address its heavy backlog of important proceedings and in continuing to increase its internal capacity as the State marches toward its statutory target of 100% renewable energy by 2045.

RICO investigators investigate both allegations of professional misconduct by licensees and allegations of unlicensed activity. RICO staff attorneys review completed investigations and take the legal actions necessary to ensure that licensing violations and unlicensed activity violations are appropriately addressed.</p> <p>RICO currently has ten staff attorneys and a supervising attorney, 26 field investigators and 11 intake investigators. From 1984 to 2013, the number of licensees has increased from 86,000 to 138,000. At the same time, there are more cases that involve serious and complex licensing issues that require the participation of a Staff Attorney. Increased caseloads in the Legal Section are affecting the timeliness of case processing and detracting from positive work being done by the Division. Transferring a position from the Investigations Branch to the Legal Branch will provide for a better ratio of investigators to attorneys, which will lead to more efficient, effective and timely licensing enforcement.</p> <p>The purpose of this request is to transfer one position count (Pos. # 103178) from the Investigations Branch to the Legal Branch and fill the position as a Staff Attorney.</p> <p>The Regulated Industries Complaints Office (RICO) is the enforcement arm for the various professions and vocations administratively attached to the Department of Commerce and Consumer Affairs (DCCA). Fully staffed, BREG consists of 79 employees, who carry out BREG's program, which includes maintaining the state's business registry; reviewing, examining and licensing broker-dealers, agents, investment advisers, and investment adviser representatives; reviewing and ensuring franchise applications are in compliance with state laws; investigating and prosecuting violations of state securities and franchise laws; providing community outreach through the Investor Education Program; and running the Business Action Center on Oahu, Maui, and providing services in Hilo and Kona.</p> <p>Maintaining the state's business registry involves the registration, filing, and recording of corporations, partnerships, limited liability companies, limited liability partnerships, trade names, trade marks, and service marks. More than 145,000 documents are filed, reviewed and processed annually.</p> <p>The Securities Compliance Branch (SEC) currently receives, reviews and processes nearly 38,000 licensing applications and filings annually. The Investor Education Program (IEP) conducts investor education presentations and events throughout the state. The IEP conducted more than 155 outreach activities and reached 30,000 people last year in addition to being the Hawaii LifeSmarts sponsor and state coordinator. CCA-106	EA	AR	2	6	Add 2 permanent positions and ceiling	<p>The Financial Surveillance section of the Insurance Division's Financial Surveillance and Examination Branch (FS&E) conducts a continuous program of financial analyses and examinations of Hawaii-domiciled insurance companies, agencies, and mutual benefit societies, to determine financial condition, solvency, and compliance with applicable laws and administrative rules in an effort to safeguard consumer interests and maintain integrity in the industry. The Insurance Division is subject to review by the National Association of Insurance Commissioners' (NAIC) Financial Regulation Standards and Accreditation Program, which requires state insurance departments to regulate domestic insurers' corporate and financial affairs. The Financial Surveillance sections recommends the adoption of legislation and administrative rules to ensure that the Insurance Division meets the NAIC's Accreditation Program Requirements and that the Insurance Commissioner has adequate statutory and administrative authority and the necessary resources to carry out that authority.</p> <p>Over the past several years in response to the U.S. and global financial crisis in 2008, the NAIC's Accreditation Program implemented its Solvency Modernization Initiative (SMI). The SMI is a critical self-examination to update the insurance solvency regulation framework in the United States and includes a review of international developments regarding insurance supervision, banking supervision, and international accounting standards and their potential use in insurance regulation in the United States. The SMI scope includes the entire financial regulatory system in this country and all aspects relative to the financial condition of an insurer, and is not limited to the evaluation of solvency-related areas. The SMI focuses on key issues, such as capital requirements, governance and risk management, group supervision, statutory accounting and financial reporting, and reinsurance.</p> <p>At the heart of the SMI, through its Accreditation Program, the NAIC requires regulators to be able to assess the enterprise risk within a holding company system and its impact or contagion upon the insurers within that group. Therefore, the NAIC wanted regulators to enhance certain features of group supervision within the model laws and monitoring practices, providing clearer windows into group operations, while building upon the existing walls that provide solvency protection for insurers. The concepts addressed in the enhanced "windows and walls" approach include: (1) communication between regulators; (2) supervisory colleges; (3) access to and collection of information; (4) enforcement measures; (5) group capital assessment; and (6) accreditation.</p>	B	2.00		70,109	2.00			140,218

A new application is needed to efficiently be able to manage the caseload of the Securities Enforcement Branch (SEB) and to allow for data analysis in order to provide for proper data reporting and management. The current CMS application consists of over 2,600 cases, involving more than 1,800 complainants, nearly 4,000 respondents and over 550 legal actions. Nearly \$40 million in assessed civil penalties and fines is tracked through this current system. The CMS system was not built with the specific needs of the SEB in mind. The SEB cases are often complex and involve multiple respondents and numerous legal actions occur in one case. The current CMS system does not have the capacity for adequate data mining and analysis of case data that is required for proper data reporting and management of cases. The current system also does not allow for the Securities Compliance Branch (SEC) to view case information that is essential to the review and approval of securities applications and filings. An application is needed to provide a solution to modernize with technology the current manual system of tracking the intake and review of franchise and securities filings and applications and field examinations.
