

HHSC's Mission

The mission of Hawaii Health Systems Corporation is to provide accessible, high quality, cost-effective services that address the healthcare needs of Hawaii's unique island communities.

Background

The Hawaii Health Systems Corporation (HHSC) is the fourth largest public health system in the United States.

- HHSC is the largest provider of healthcare on the Neighbor Islands and is the only acute care provider in many communities offering a wide range of specialty services such as cardiovascular, cancer, and stroke.
- HHSC provides other community based services, such as (but not limited to) clinics, home health, assisted living, memory care, and adult day health directly and through affiliate organizations.
- A total of over **1300** physicians practice at HHSC facilities.
- HHSC employs more than **4300** workers statewide, of which over **1000** are registered nurses.
- HHSC operates over **1200** licensed beds through a network of acute, critical access hospitals, and long term care facilities located on five different islands.

The Importance of HHSC in Serving Hawaii's Communities cannot be overstated.

- HHSC serves as a vital component of the State's healthcare "safety net".
- HHSC facilities provide **75%** of the emergency room care and account for **63%** of total acute discharges for the counties of Hawaii, Maui, and Kauai.
- HHSC is largest provider of long term care in Hawaii and operate **776** licensed long term care beds.
- HHSC's facilities provided the care for almost **19%** of all acute care discharges and **27%** of all emergency room visits statewide. In fact, HHSC has more than double the emergency room visits of Queens Medical Center.
- For Hawaii county residents, HHSC facilities provided the care for approximately **66%** of all acute care discharges and **84%** of all emergency room visits.
- For Maui county residents, HHSC facilities provided the care for approximately **80%** of all acute care discharges and almost **88%** of all emergency room visits.
- For Kauai county residents, HHSC facilities provided the care for almost **21%** of all acute care discharges and **34%** of all emergency room visits.

Accomplishments

HHSC is, finally, beginning to work as a system and continues to provide high quality healthcare to the communities served, especially considering the challenges in today's healthcare environment. The following are some of the major accomplishments over the past year:

- A system-wide strategic plan was developed for 2012-2015 that identifies strategic initiatives to accomplish HHSC's mission and to work more as an integrated, efficient system.
- The development of the Electronic Medical Records (EMR) system is progressing well. In fact, HHSC is scheduled to go-live with its EMR system in 2013, with Kona Community Hospital and Kohala Hospital the first to implement the system in February 2013.
- Ka'u Hospital, Kauai Veterans Memorial Hospital, and Maluhia achieved the highest possible five-star rating from Medicare's Nursing Home Compare website. Further, Leahi Hospital received a five-star rating in the quality section of Medicare's Nursing Home Compare website.
- Both Kona Community Hospital and Maui Memorial Medical Center has received the Get With The Guidelines-Heart Failure Gold Quality Achievement Award from the American Heart Association. The recognition signifies that those facilities have reached an aggressive goal of treating heart failure patients with 85 percent compliance for at least 24 months to core standard levels of care as outlined by the American Heart Association/American College of Cardiology secondary prevention guidelines for heart failure patients.
- HHSC will be participating in two Health Care Innovation Awards. The University of Hawaii at Hilo, in collaboration with HHSC, received an award to improve medication reconciliation and management for the elderly on Kauai, Maui and Hawaii. In addition, HHSC partnered with St. Francis Healthcare and others to obtain a grant to develop a system for telehealth-based home monitoring for very high risk patients with complex health care needs to prevent hospitalizations. These awards, which total over \$20 million, will provide an opportunity to pursue innovative programs to improve healthcare in Hawaii.

Economic Challenges

Hawaii hospitals face an ever-changing and extremely challenging health care environment today with challenges such as:

- Inadequate government and third-party payor reimbursements for quality healthcare services.
- Long-term care waitlist.

- Escalating costs related to physician and clinical staff recruitment and retention.
- The need for capital investment in new technology, particularly in electronic medical records.
- The impact of the provisions of federal health care reform.
- The impact of other federal health care mandates, such as ICD-10.
- Increased costs of caring for Hawaii's elderly population.

Additional major issues impacting HHSC's financial viability include:

- Aging facilities, with extensive life and safety code issues, well beyond the average for similar facilities across the country.
- Exceptional leave benefits and other labor issues that place HHSC's labor costs above national norms.
- Inability to outsource non-clinical functions.
- Under-capitalization of the Corporation.
- Small scale operations, which are costly to maintain.
- Hilo Medical Center recently received recognition from HMSA as being the sole hospital in the State to increase quality, as measured on a spectrum of indicators, while simultaneously decreasing costs.
- Hilo Medical Center is proud to announce it has been named a 2012 Top Improver Award winner by Press Ganey Associates, Inc. This award recognizes hospitals that have shown continuous improvement over the previous two years. HMC is one of only 18 facilities to receive this award for improvement in patient satisfaction scores, as measured by comparing quarterly scores, with improved scores in three of the four eligible periods. The significance of this award is evident in that Press Ganey partners with more than 10,000 health care facilities, including more than half of all U.S. hospitals, to measure and improve the patient experience.

Financial Concerns

The past year has been very challenging year for HHSC (and all other healthcare systems in Hawaii) financially. A restriction in general fund allocation for FY12, lack of agreement on collective bargaining contracts, and reductions in federal (i.e., Medicare and Medicaid/QUEST) reimbursements have all had significant negative impacts. More specifically:

- HHSC was assessed a \$13.7 million restriction to its general fund appropriation by the Administration, a 16% reduction. After careful examination of its budget, HHSC was able to make budget adjustments to absorb the general fund reduction, but not without having to increase its accounts payable balances and reduce its cash balances. HHSC's accounts payable would be forced to increase

to a system-wide level of greater than 77 days, and HHSC's days cash on hand would fall to 25 days, which would mean that HHSC would end fiscal year 2013 with severe financial stress.

- The State still has not settled collective bargaining contracts for HGEA unit 9 (registered nurses) and UPW unit 10 (CNA's, LPN's, etc.). For HHSC, employees in these two units represent approximately 50% of HHSC's total employees. As a result, HHSC will not be able to recognize any labor savings (if any) from at least half of its employees.
- HHSC has experienced difficulty in managing its cash flow due to inconsistent payments for patient services from the administrators of the QUEST Expanded Access Plans (Evercare and Ohana). The timeliness of these payments are especially critical for HHSC's critical access hospitals and long-term care facilities, as payments from the QUEST Expanded Access Plans can account for as much as 90% of their patient cash collections. HHSC management is working with the staff and management of Evercare and Ohana weekly to resolve the issues, and similar issues are faced by all healthcare providers in the State of Hawaii.

Federal Funds

HHSC may stand to lose federal funds in the form of reduced Medicare payments as a result of the Federal Budget Control Act sequester. Should sequestration occur, there will be imposed a 2% cut in Medicare payments, which would result in an estimated negative impact of \$3.1 million to HHSC's revenues. An increase in HHSC's general fund appropriation would be necessary to absorb the impact of such sequestration reductions.

Further, in the recent legislation to avoid the "fiscal cliff," there is a provision that removes a 26.5% reimbursement reduction to physicians and shifts the burden of those cost savings to hospitals. It is anticipated that hospitals will bear the majority of the cost via a \$10.5 billion documentation and coding adjustment that seeks to recoup past overpayments by Medicare to hospitals resulting from the shift to Medicare severity diagnosis-related groups (MS-DRGs) and a \$4.2 billion rebasing of Medicaid disproportionate share hospital (DSH) payments. At this time, it is not clear what impact these cost savings measures will have on HHSC's reimbursements. HHSC management is in the process of evaluating the impact of these proposed measures and their applicability to HHSC.

HHSC REQUEST

Although HHSC is not seeking an emergency appropriation for fiscal year 2013, HHSC is urging the Legislature to maintain the annual general fund appropriation level of HHSC to \$84,440,000 for fiscal years 2014 and 2015, as recommended by the Administration. HHSC also urges the Legislature to support the \$50,000,000 in CIP funds for each year of fiscal year 2014 and 2015 as recommended by the Administration. Of critical

importance to HHSC is that approximately \$14,700,000 of these funds be used to fund the capital costs of HHSC's Electronic Medical Record/Health Information System project. The development of a plan for a "Center for Excellence for Long-term Care at Leahi is also a priority.

Further, HHSC respectfully requests that the Legislature consider funding two important initiatives that were not in the Administration's budget request. The first is the HHSC Primary Care Residency Program, which needs \$2,800,000 in general fund appropriations in fiscal year 2014 and \$3,200,000 in general fund appropriations in fiscal year 2015. These funds are requested to address the issue of the growing physician shortage in all the rural communities that HHSC serves, where it is estimated that the State of Hawaii has only 70% of the primary care physicians needed to adequately serve its population. Existing residency programs cannot receive funding from Medicare for new residents. This program is being created to fill the gap that is necessary to serve all rural communities in the State of Hawaii.

Kahuku Medical Center management also respectfully requests that the Legislature consider funding its request for an additional \$900,000 in annual general fund appropriations for both fiscal years 2014 and 2015 to sustain the critical healthcare services that Kahuku Medical Center provides to the residents of the North Shore of the island of Oahu.

Alternatives Considered

Three of HHSC's Regions (East Hawaii, West Hawaii, and Maui Regions) are exploring a potential affiliation with Banner Health, a large nonprofit health system that operates hospitals in the western half of the United States. HHSC supports these regions in exploring all opportunities to response to the challenges facing us today to reduce costs, increase quality, and expanding coverage of health care.

HHSC is also analyzing how it can re-structure itself to better meet the challenges of health care reform. In doing so, HHSC is evaluating its current governance structure as well as operations to see where there may be opportunities for the system as a whole to operate more efficiently and effectively in providing accessible, high quality, cost-effective services that address the healthcare needs of Hawaii's unique island communities.

NOTE: Eliminating specific corporate services in part or completely will require regional capacity buildup in varying degrees based on regional proficiency and competency in the specific functional area. This will result in duplication of services and higher costs, if expertise can be recruited on the various islands to do the work. There are no functions being performed that can be eliminated. Additionally, as mandated by Act 290, the regions have to agree upon the services and functions that corporate provides. In 2008, the biennium budget process and methodology were developed by the regions for the corporate services, function, and budget. The
