# Text to 911

## **What is Text to 911?**

Text to 911 is an emergency service that is provided to all mobile users in the State of Hawaii. It allows someone to use their activated cell phone to contact the 911 center via text message instead of calling 911.

## **Should I always text 911 because it's easier than calling?**

No. Calling 911 is still a faster, more efficient way of relaying an emergency to Police, Fire, Ambulance, or Ocean Safety. Calling 911 will also provide the 911 center with access to your location. Texting to 911 should only be used when you are unable to make a voice call.

## **When would someone use text to 911?**

- If you are in a situation where it is not safe to place a voice call to 911.
- If you are experiencing an emergency that renders you incapable of speaking or hearing.
- If you are in a location with sporadic cellular voice service.

## **If I am able to text to 911, will the 911 center automatically know my location?**

No. If you send a text message to 911, it is important to give the 911 call taker an accurate address or location as quickly as possible, if you can.

## **What do I say in a text?**

You will need to provide your location and the type of emergency you have (Police, Fire, or Ambulance) and address if you know it, including floor or room number if you are in a building. Send brief messages, but please do not use abbreviations. The 911 Center Dispatcher will then respond with text questions pertaining to your situation.
