I. Introduction and Summary

A. Introduction

Department of Transportation Highways (DOTH) manages the planning, construction, and maintenance of the State of Hawaii's approximate 2,675 lane miles of highway on Oahu, Kauai, Maui, Lanai, Molokai, and Hawaii. DOTH's mission is to provide a safe, efficient, and accessible highway system through the utilization of available resources in the maintenance, enhancement, and support of land transportation facilities. DOTH's primary function is to plan, design, and supervise the construction and maintenance of the State's highway system.

DOTH commissioned an ERP System Integrator (hereinafter referred to as "SI"), in March 2021 to provide an accounting system solution that would modernize certain State of Hawaii, Department of Transportation, Highways Division (DOTH) IT systems, associated systems, and business processes, including fully replacing DOTH's legacy Highways Financial Accounting System (HWYAC) and certain software components of DOTH Districts' AS400 systems.

The new DOTH Financial Management System (H4) will utilize SAP S/4HANA Cloud ERP and will cover DOTH Business Processes of Budget, General Ledger, Accounts Payable, Accounts Receivable, Lease Management, Fixed Assets, Procurement, Project & Grant, Federal Billing, Human Resources, Time and Labor, Payroll, Inventory Management, Plant Maintenance, Reporting, and Analytics.

DOTH also acquired a contract with IT Management Consulting Firm, Ohanasoft (hereinafter referred to as

"IV&V"), to provide information technology independent verification and validation consulting services for the implementation of the DOTH Highways Financial Management System. The IV&V contractor's role is to provide an objective, neutral, third-party view of the implementation of the Highways Financial Management System with the intent of protecting the State's interests for success of the project. Throughout the system implementation, the IV&V team will perform ongoing project IV&V activities and will identify issues/deficiencies/risks with the System implementation project, provide feedback and recommendations for mitigation and improvement, and provide on-going reporting on project activities.

The observation, feedback, and recommendations provided by IV&V are IV&V's own opinions, and IV&V is not a decision-maker of any activities in the H4 project implementation. IV&V makes no assurance, guarantee, or other promises as to the success of H4 project and is not responsible and not liable for the outcome of the H4 Project.

B. Summary

In February, there was a lot of effort put into the Project to construct and review Functional Specification Documents (FSDs). The total number of FSD submissions increased by only one; however, many meetings took place to make progress on the review and validation of the submitted FSDs.

The H4 Project has a new target Go-Live date of July 1st, 2023, and this is 12 months later than the original Go-Live target date. There were meetings to discuss the Project Plan, and updates are being made. However, the H4 Project Plan still has not been completed, and there is limited visibility into project resources and timelines. As stated in the previous report, it is our opinion that the new Go-Live date will not be met due to the remaining number of tasks.

FSDs are continuing to be reviewed and updated for all WRICEF items. As many as 94 FSDs were submitted for review as of the end of February. FSDs are heavily dependent on RTM and Fit/Gap. RTM has been conditionally approved, but DOTH has not approved Fit/Gap. Not finalizing both RTM and Fit/Gap may require reworking FSDs once they are finalized. As FSDs are being prepared, reports are closely examined, and we continue to observe that some details are missing from the report-related FSDs. These reports requirements should have been covered in detail during RTM, Fit/Gap, and especially for Analysis of Reporting Requirements (ARR); however, these documents do not provide sufficient information to cover all the details of the reports. Reports are usually the final desired outcome of an activity, and their detailed discovery is essential.

FSD review continues to be challenging because of the lack of SAP knowledge, terms, and processes. DOTH has voiced this opinion in the PMO meeting as well. To address this concern, it had been decided that Knowledge Transfer sessions for project team members (not end users) will be conducted, and a couple of sessions took place in February.

The lack of meeting documents, including decisions and action items made during the sessions, makes it difficult to track progress as a project team and makes it challenging to collaborate among project team members. There are still occasions where DOTH requirements and processes need to be re-explained; this has been reobserved during FSD sessions. As stated in previous reports, more coordination, collaboration, and cohesive leadership are necessary to design and develop an integrated solution. Continued efforts are required for more feedback, participation, and collaboration during the meetings and deliverable reviews.

As stated in previous reports, many changes to the H4 Project have been discussed, and new announcements have been made. It is recommended that SI and DOTH agree on the project's future direction -- including a revised project plan, schedule, requirements, scope, training, and any contractual consequences of delaying the Go-Live date -- and prepare a written change order.

The project is currently being implemented with fewer consultants than the initial plan. This poses a higher risk for the project as the remaining consultants must cover modules with DOTH requirements and processes even though they have not worked with DOTH subject matter experts as their counter-partner consultants from the beginning of the project. This creates a burden for the remaining consultants, and extra transfer of knowledge will be required from DOTH.

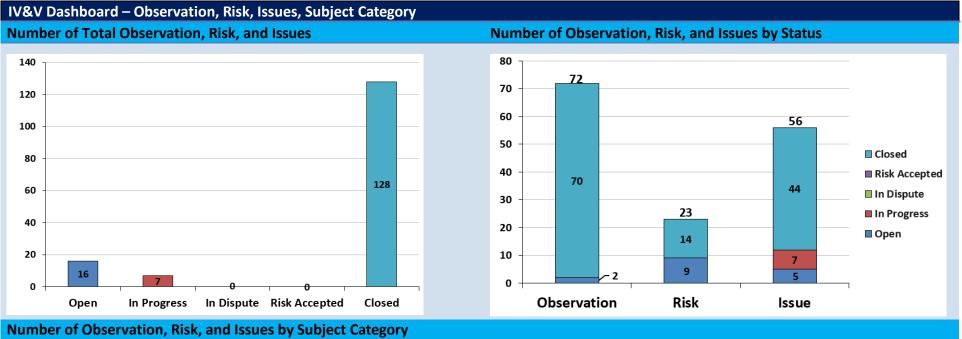

SAP Budget and Planning (SBP) Academy took place, and the presentation covered overall key concepts, terminologies, features, architecture, security, and screenshots of SBP.

III. IV&V Findings – Observations, Risk, Issue and Feedback/Mitigation

A. Subject Category: Schedule Management

Schedule Management: Observation, Risk, Issue and Feedback/Mitigation

Issue

ORI ID: I-210531-02

The final Project Plan/Implementation Schedule has not been approved by DOTH and the deliverable is not completed. This is a foundational document for a project management and scheduling, and it is one of the most critical deliverables. Delay in the Project Plan and Implementation Schedule pose decreased confidence in being able to manage project resources efficiently and meet the final Go-Live date. Also, without the Project Plan and the Implementation Schedule DOTH has limited project visibility and it will impact schedule and resource management. It is currently unknown, at a detail level, if the number of resources are adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e., one consultant or DOTH team member working more than 40 hours in a week, etc.)

Feedback/Mitigation/Updates

It is recommended that SI complete Project Plan/Implementation Schedule as soon as possible.

Project Plan/Implementation Schedule Submission History:

11/16/2020, 12/21/2020, 4/26/2021: The initial project plan was submitted and returned back to SI after DOTH review due to incompleteness.

6/3/2021: The New Target Date for Project Plan/Implementation Schedule is set to 6/11/21 by SI.

6/14/2021: Updated project plan was submitted by SI but returned back to SI due to incompleteness.

7/1/2021: It is currently unknown, at a detail level, if the number of resources are adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e. one consultant or DOTH team member working more than 40 hours in a week, etc.). Updated project plan was submitted by SI but returned back to SI after DOTH review due to incompleteness. Revised Acceptance Date: 8/31/2021

9/02/2021: No updates have been submitted to DOTH.

9/16/2021: DOTH interviewed an assistant project manager candidate on 9/7/2021.

9/30/2021: No updates have been submitted to DOTH.

10/5/2021: SI Assistant Project Manager submitted the revised project plan. DOTH has a meeting with the SI Assistant Project Manager and requested a revision due to the project plan being incomplete.

10/13/2021: SI Assistant Project Manager submitted the revised project plan and DOTH will hold a review meeting on 10/22/2021.

10/25/2021: DOTH had a meeting with the SI Assistant Project Manager to review Project Plan/Implementation Schedule. Progress has been made, however some data such as the dates and % completion need to be corrected.

11/10/2021: SI Assistant Project Manager submitted the revised project plan and DOTH will hold a review meeting on 11/24/2021.

11/24/2021: SI Assistant Project Manager and DOTH Project Manager worked together via Teams and updated and fixed the Project Plan. There will be a follow up meeting.

12/31/2021: SI Assistant Project Manager and DOTH Project Manager worked together via Teams and updated and fixed the Project Plan. It is still not complete.

1/31/2022: No new major update. The document is making incremental progress, however it is not completed yet.

2/28/2022: No new major update. It is still incomplete.

Schedule Management: Observation, Risk, Issue and Feedback/Mitigation

3/31/2022: The Assistant Project Manager left H4 implementation project. The Project Manager will continue to work on Project Plan/Implementation Schedule.

4/29/2022: No major updates. A new Go-Live date will be set after PDDs are approved by DOTH.

5/31/2022, 6/30/2022, 7/31/2022: No major updates.

8/31/2022: The new assistant project manager will be revising Project Plan/Implementation Schedule with updated Go-Live Date of 7/1/2023. 9/30/2022: No major updates.

10/31/2022: It is recommended that SI complete the Project Plan/Implementation Schedule as soon as possible since the absence of the Project Plan/Implementation Schedule prevents from proper resource planning, meeting schedules, and integrated solution development and this causes issues and inefficiency. The project meetings are not being held cohesively and the project focus is scattered.

11/30/2022: It was expected that after the new Go-Live date was set a revised Project Plan/Implementation Schedule would be prepared, however there is no update to the Project Plan. It is recommended that SI complete the Project Plan/Implementation Schedule as soon as possible.

12/31/2022: Project Plan/Implementation Schedule still has not been submitted to DOTH.

1/31/2023: A high-level project plan was presented during the PMO on 1/26/2023 but the detailed Project Plan/Implementation Schedule has not been submitted to DOTH.

2/28/2023: The Project Plan/Implementation Schedule was submitted to DOTH for review and approval. DOTH reviewed it internally and scheduled a meeting for further review and discussion with SI on 3/1/2023.

The Go-Live date of Wave 2 for Budget and Planning (SBP) has not been set yet.

Feedback/Mitigation/Updates

The Go-Live of Wave 2 for Budget and Planning (SBP) needs to be set as soon as possible because it impacts the project plan, resource scheduling, and project management. It is recommended to weigh the pros and cons of merging Wave 1 and Wave 2 given that there is significant delay in the project progress. 4/29/2022: No major updates. In accordance with meetings and discussions, it should be carefully considered that SBP goes live with other modules at once because it will eliminate any additional reconciliation process and streamline the whole end-to-end budget procedures if SBP goes live at the same time as FM.

5/31/2022: The issue of not discovering SBP functions and incorporating them into the current solution design was discussed again during the Project System PDD review. It is recommended that SBP functions and features need to be reviewed and considered when developing solution designs for Fund Management, Project System, FHWA requirements.

6/30/2022: No major updates.

7/31/2022: No major updates.

8/31/2022: No major updates.

9/30/2022: SI will provide additional information for SBP or its replacement application, because SBP is planned to be unsupported in the near future. 10/14/2022: SI stated that Wave 2 would start in November 2022. However, the Go-Live date of Wave 2 has yet to be determined.

11/15/2022: SI is working with DOTH resources and preparing for a Kickoff meeting.

12/21/2022: Wave 2 SPB Budgeting Kick-off meeting was held.

1/31/2023: SI is working on the Prepare Phase deliverables and preparing project team member training, however the Project Plan for Wave 2 has not been submitted yet and Go-Live date still has not been determined.

2/28/2023: SI provided training on 2/23/2023. No SBP project plan has been submitted to DOTH.

Risk

ORI ID: R-221031-01

New Go-Live date is set to 7/1/2023 but it is at high risk due to many deliverables remaining and delay in implementation.

Feedback/Mitigation/Updates

11/30/2022: New Go-Live date of 7/1/2023 appears to be at risk; DOTH and SI should discuss feasibility of the Go-Live date.

12/31/2022: It is recommended to discuss the Go-Live date of 7/1/2023 as it is an improbable target date to achieve.

1/31/2023: It is recommended for DOTH and SI to review the feasibility of 7/1/2023 Go-Live date and the Project Plan to be submitted as soon as possible.

2/28/2023: The Project Plan/Implementation Schedule was submitted to DOTH for review and approval. DOTH reviewed it internally and scheduled a meeting for further review and discussion with SI on 3/1/2023.

B. Subject Category: Resource Management

Resource Management: Observation, Risk, Issue and Feedback/Mitigation

Issue

ORI ID: I-220131-02

A few SI consultants are missing some DOTH requirements and PDD documents are not covering all the DOTH processes and requirements. Certain information is incorrect in the PDDs and it is unsure whether SI consultants have a full understanding of DOTH processes and requirements. Some consultants seemed to have limited experience with DOTH and FHWA and need more time to understand information related to DOTH and FHWA processes. This item also impacts the subject category of Solution Design and Configuration.

Feedback/Mitigation/Updates

SI and DOTH should confirm that the consultants meet the qualifications as stated in the RFP equivalent work experience.

2/28/2022: A high turnover on top of the limited DOT experiences of the consultants has been an issue that makes the project more challenging to be implemented. Another consultant (FHWA Billing) left the H4 project. SI found a replacement consultant, but he has not come to DOTH on-site yet. 3/31/2022: A new FHWA Billing consultant joined the H4 project and started to work on AR and FHWA Billing. Waterfall funding and FHWA solution are still in development. If there is turnover, it should be ensured that the consultant meets the qualification stated in the RFP. Consultants who are unfamiliar with FHWA and DOTH requirements should attend other relevant meetings, especially including FHWA, to bridge the FHWA and DOTH knowledge gaps.

Resource Management: Observation, Risk, Issue and Feedback/Mitigation 4/29/2022: No major updates. Consultants including the new FHWA Billing resource continue to develop FHWA solution design. 5/31/2022: RTM review started on 5/25/2022 with HCM, Payroll, and Timesheets. RTM review will ensure that consultants cover all the requirements. 6/30/2022: The limited DOTH experience on FHWA and the high turnover of consultants are causing multiple and duplicate discovery sessions over and over again, e.g., there were DOTH lead whiteboard/discussion sessions explaining Waterfall Funding, Split, End to End Process, FHWA scenario-based requirements, etc. on 9/14/2021, 11/17/2021, 12/8/2021, 1/31/2022, 4/12/2022. 7/31/2022: Progress has been made through additional meetings and discussions. 8/31/2022: Meetings for Plant Maintenance, FHWA PDD, and Charge Codes mapping were held and more requirements were discovered and discussed. 9/30/2022: A few consultants still do not seem to fully understand DOTH business requirements and terminologies. 10/31/2022: Lack of DOTH requirements and terminologies understanding by a few consultants continues to be an issue. 11/30/2022: It was observed during some FSD sessions that SI consultants are still in the process of discovering and understanding the details of DOTH requirements. 12/31/2022: FSD meetings were held and requirements need to be discussed and clarified in more detail. 1/31/2023: FHWA solution design and FSDs are being discussed and developed. We are still observing that details of processes and requirements are being explored. 2/28/2023: It is observed that DOTH requirements and processes have been discussed and clarified in more detail.

The Project Manager is supposed to be a full-time project manager for H4 Project. However, the current Project Manager will be managing another project - State of Hawaii Financial Management System (FAMIS Replacement Project).

Feedback/Mitigation/Updates

The H4 contract states the project manager position to be a full-time position. It is recommended that SI and DOTH have a discussion to see if this is allowable/acceptable and it does not cause conflict of interest and schedule.

9/30/2022: SI Project Manager is attending fewer meetings than before.

10/31/2022: No major updates.

Three SI consultants are rolling off the H4 project.

Feedback/Mitigation/Updates

It is recommended that DOTH requests additional resources from SI to adequately support the project.

10/31/2022: H4 project started with 12 consultants and now there are eight consultants assigned to the H4 project even though the project's scope of work did not change. These may be insufficient resources for the project. This may overload the remaining consultants with the quantity of work and also consultants may need to work with modules that fall outside of their expertise and may impact the project quality.

11/30/2022: It is recommended to monitor that proper knowledge transfer takes place and to find replacement resources for the H4 Project.

12/31/2022: The three vacant consultant positions still have not been filled.

Issue

ORI ID: I-220131-08

There are some requirements and processes that impact multiple modules, including waterfall funding, FHWA, etc. However, information often are siloed and it seems to be not communicated to the other consultants frequently. This results in multiple consultants asking for the information on a same topic each time at different meetings. This item also impacts the subject category of Solution Design and Configuration.

Feedback/Mitigation/Updates

It is recommended: More coordination and collaboration is needed to design and develop an integrated solution. Proactively communicate with other consultants on topics that may be relevant for another consultant. Meeting recordings should be utilized to understand the relevant topic for the related process in another module. All key project team members to attend the meetings related to critical core requirements such as waterfall funding. Analyze each meeting's agenda to see if there are other consultants that should attend for related information.

2/28/2022: There is another consultant who is leaving the project and a replacement consultant has not participated in a meeting, and these turnovers are adding difficulty to the current communication issue.

3/31/2022: More collaboration is expected among SI consultants where it requires integrated solutions such as Waterfall Funding, FHWA Billing, Labor, etc. When DOTH staff inquiries about solutions that integrate across two or more functions between H4 modules, DOTH staff should also be provided with the integrated solution answer as opposed to separate or siloed bits of information of each H4 module.

4/29/2022: Efforts were made to improve communication and collaboration. (E.g., Rules of Engagement prepared by SI)

5/31/2022: Collaboration made progress. For example, some requirements that impact multiple areas have been referenced by multiple PDDs of different areas. However, there are still some communication improvements to be made between SI consultants.

6/30/2022: More coordination and collaboration could be made where cross module interaction is needed.

7/31/2022: More coordination and collaboration were present during the PDD reviews.

8/31/2022: Some DOTH requirements that were presented and discussed previously were asked to be revisited again in the meetings.

9/30/2022: Improvements still need to be made in communication and collaboration between SI consultants.

10/31/2022: Communication and collaboration still need to improve between SI consultants, especially with three consultants leaving the project.

11/30/2022: It has been observed that during FSD meetings information is not being shared between modules, including basic information which impacts multiple modules. Since this information is not being shared among team members, DOTH has to re-explain basic information multiple times.

12/31/2022: More communication and collaboration are needed for integrated solution design. There have been siloed activities and approaches observed. 1/31/2023: Designing an integrated solution for FHWA and other modules will require additional collaboration effort, teamwork, and cooperation. The issues of siloed information and ununified solution design are still observed between models and cross-business areas where tight integration is needed. 2/28/2023: It is observed that more communication and collaboration are still needed for an integrated solution design. DOTH is still not clear on the end-toend FHWA System solution.

F. Subject Category: Contract Management

Contract Management: Observation, Risk, Issue and Feedback/Mitigation Risk Impact ORI ID: R-221130-02 The project is extended beyond the original due date. There was a lot of work done for items outside the project scope such as Plant Maintenance Inventory, which did not manifest. There have been no change orders for these items that are impacting important parts of the H4 Project. Feedback/Mitigation/Updates It is recommended to examine the contract, the schedule, and analyze the fit/gap to make necessary adjustments with change orders as needed. 12/31/2022: No major updates. 1/31/2023: No major updates. 2/28/2023: No major updates. It is recommended that SI and DOTH discuss the need for a change order due to scope change and schedule change. Contract Management: Observation, Risk, Issue and Feedback/Mitigation **Observation** ORI ID: 0-230228-01 SI submitted a change order for Fit/Gap based on all requirements. DOTH and SI are reviewing and making adjustments to come to an agreement. It is observed that the credit (hours) provided to DOTH for the various requirements appear to be underestimated.

Feedback/Mitigation/Updates

It is recommended for SI and DOTH to review Fit/Gap together and come to an agreement.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation

It is recommended that SI complete the deliverable as soon as possible.

11/18/2021: No major updates. 12/2/2021: No major updates.

12/31/2021: No major updates.

1/31/2022: No major updates. Not going through the full DOTH requirements and not completing RTM before PDDs are completed is causing some requirements to be missed and it is causing multiple issues. 2/28/2022: No major updates. 3/31/2022: No major updates.

4/29/2022: SI is targeting RTM to be completed by 5/31/2022.

5/31/2022: The first RTM review was held on 5/25/2022 and topics covered were HR, Payroll, and Time Sheets.

6/30/2022: No major updates. 7/31/2022: The AR RTM was reviewed.

8/2/2022: The Purchasing RTM was reviewed. 9/16/2022: Feedback was provided for multiple-modules RTM. The PO RTM was reviewed.

10/31/2022: FHWA RTM was reviewed.

11/30/2022: FHWA RTM is being reviewed and updated. It is noticed that RTM is still being updated by SI. Therefore, it is recommended that SI finalize RTM first and submit it officially for DOTH's review.

12/31/2022: The RTM review for Federal Billing and Projects and Grants were conducted and DOTH is waiting for the updates.

1/31/2023: The RTM review was held for FHWA and Project System. It is being reviewed and updated.

2/28/2023: The RTM was conditionally approved on 2/2/2023. However, FA, HR, FHWA are being reviewed and updated. It is recommended that RTM be fully completed prior to Fit/Gap.

Feedback/Mitigation/Updates

It is recommended that SI complete the deliverable as soon as possible.

11/18/2021: No major updates.

12/2/2021: No major updates.

12/31/2021: No major updates.

1/31/2022: No major updates. This is directly impacting the project schedule.

2/28/2022: No major update.

3/31/2022: No major updates.

4/29/2022: SI is targeting Fit/Gap Analysis to be completed by 5/31/2022.

5/31/2022: No major updates. 6/30/2022: No major updates. 7/31/2022: No major updates. 8/31/2022: No major updates. 9/30/2022: No major updates. 10/31/2022: No major updates.

11/30/2022: Since RTM is not finalized and it is being continuously updated, it is difficult to review and validate Fit/Gap with the incomplete RTM. It is recommended that RTM be completed accurately and thoroughly as soon as possible. It is concerning that WRICEF items have not been discussed and

Section: IV&V Findings – Observations, Risk, Issue and Feedback/Mitigation

validated in detail with DOTH which may lead to incorrect specification of WRICEF; it is impacting Fit/Gap and FSD where requirements are incorrectly understood.

12/1/2022: Fit/Gap meeting was held to make progress on the deliverable.

1/31/2023: Fit/Gap meeting was held to review FHWA and Project System. It should be competed as soon as possible to review FSDs accordingly.

2/28/2023: A change order for Fit/Gap was submitted on 2/15/2023 and a review meeting was held on 2/23/2023. It is being reviewed and updated for resubmission to DOTH.

RTM reports are being submitted by each module. There is difficulty cross-checking the information with supporting documents because of missing information. This item also impacts the subject category of Reports and Analytics.

Feedback/Mitigation/Updates

WRICEF ID Number information does not specify what PDD document the WRICEF item is in and it is difficult to cross check and find the corresponding WRICEF information in PDD. It is not possible to review and validate the Reports items because the reports information such as column fields names or sample reports have not been provided to DOTH.

8/31/2022: PDDs and RTM are being updated so that WRICEF items are cross-checked efficiently.

9/30/2022: No major updates.

10/31/2022: FHWA RTM was reviewed. Updates are needed for cross-checking information of RTM and PDDs.

11/30/2022: Reviewing and validating RTM continues to be an issue because of missing or inadequate references for cross-checking between RTM and PDDs.

12/31/2022: No major updates. Reviewing and validating RTM continues to be challenging.

1/31/2023: Reporting requirements are demanding more discovery sessions and time when reviewing RTM.

2/28/2023: Reporting requirements such as business logic, layouts, sources, etc., are being reviewed and discussed during the FSD meetings.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation

Risk

ORI ID: R-230228-01

FSDs are prepared without in-depth discussion during the RTM and Fit/GAP. An FSD is a final document before the System configuration, therefore it should be as complete as possible. However, there are a lot of discoveries still being made during the FSD sessions.

Feedback/Mitigation/Updates

It is recommended that the H4 Project Team work on detailed and complete discovery of DOTH requirements without postponing any elements to development and testing. All the details should be discovered by the completion of FSDs.

H. Subject Category: Solution Design and Configuration

Solution Design and Configuration: Observation, Risk, Issue and Feedback/Mitigation

Observation

ORI ID: 0-221206-01

There was a meeting to discuss how to improve FSD process, because there are more than 200 documents that need discussion and approval. The proposed method is to group similar topic FSDs in a batch to discuss in a same meeting.

Feedback/Mitigation/Updates

It is recommended to create a plan with FSD groups in advance for efficient and prioritized reviews and meetings.

1/31/2023: FSD documents are being reviewed by SI consultants who are covering multiple modules. The proposed method to group similar topic FSDs in a batch is not being utilized yet and the FSD discussions are being held as the documents are submitted and easier ones are being handled first. It will help to have FSD discussions to follow process flow instead of the current ad hoc approach.

2/28/2023: Meetings are not being grouped into similar topic FSDs.

I. Subject Category: Reports and Analytics

Reports and Analytics: Observation, Risk, Issue and Feedback/Mitigation

Risk

ORI ID: R-221130-03

RTM and FSD are being prepared without in-depth reports discussion and Analysis of Reporting Requirements (ARR) does not provide sufficient information to cover all the details of the reports. Reports are often the final desired outcome of an activity and detail discovery is essential.

Feedback/Mitigation/Updates

It is recommended that SI conduct detailed discovery of DOTH reports to ensure all the necessary information for input and output are covered.

12/31/2022: During the FSD discussions, additional details that need to be on the reports have been discovered.

1/31/2023: H4 project team is having deep-dive discussions on WRICEF's requirements, processes, and functional specifications.

2/28/2023: Reports WRICEF FSDs are being reviewed and new discoveries are being made. FSDs are being updated based on discussions.

J. Subject Category: Data Conversion

Data Conversion: Observation, Risk, Issue and Feedback/Mitigation

Risk

ORI ID: R-221130-04

Data Conversion strategy and plan documents have not covered the details such as source/target, cleansing, dependencies, and validations. These activities have been deferred to the Realize Phase from the Explore Phase causing delays, rework, or additional work later. WRICEF and detailed data conversion work deferred from the Explore Phase are discussed and performed during FSD sessions.

Data Conversion: Observation, Risk, Issue and Feedback/Mitigation

Feedback/Mitigation/Updates

It is recommended to catch up on work deferred from the Explore Phase and to explore Data Conversion materials in detail to finalize the Data Conversion WRICEF in FSD.

12/31/2022: Data conversion discussions are making progress. However, familiarity of H4 terminologies, functions, and processes by DOTH will be needed to adequately review and complete data conversion FSDs.

1/31/2023: FSD meetings are continuously being held to review data conversion specifications, especially to identify source of data that needs to be extract from.

2/28/2023: Data conversion discussions have been held and are making progress.

K. Subject Category: Documentation

Documentation: Observation, Risk, Issue and Feedback/Mitigation

Issue

ORI ID: I-221130-03

It is observed that meeting minutes or action items from the project discussions are not always provided. To-Do lists and summaries of the meetings may have been gathered on individual levels, but this makes it difficult to track the progress as a project team and also challenging to collaborate between project team members.

Feedback/Mitigation/Updates

It is recommended to prepare meeting summaries and/or to-do lists from the meetings to efficiently prepare, plan, and navigate the follow up activities and hold efficient meetings.

12/31/2022: No major updates.

1/31/2023: PMO meeting minutes and agenda for weekly standing meetings have been provided. It will help to have meeting minutes for other Realize Phase meetings as well.

2/28/2023: Meeting minutes are required to track action items and to-do tasks. For example, PO match options, H4 values for FAMIS project/Ph/Act fields, Workflow routings, source/object codes, fixed asset funds, payroll accounting entries, etc. Currently, it is difficult to track who needs to perform what task by when without meeting minutes.

Training and Knowledge Transfer: Observation, Risk, Issue and Feedback/Mitigation

Feedback/Mitigation/Updates

It is recommended that SI provide training and instruction on how to navigate and process basic transactions so that the project team members can be more experienced with H4 and get ready for the System testing, verification, and validation.

11/15/2022: No major updates. It is recommended that DOTH test availability of Dev environment from on and off DOTH network.

12/21/2022: Orientation meeting for Subject Matter Leader Knowledge Transfer was held. No dates for the trainings have been set yet.

1/31/2023: Weekly standing meetings have been started to provide project team member trainings.

2/28/2023: Knowledge Transfer sessions are taking place and training is being provided. However, it is observed that there is a lack of instruction (training material) for the training sessions.

A. Impact Definition

Value	Legend	Description
N/A	N/A	Not Applicable
No Impact	\checkmark	No Impact
Low	L	A priority of Low is assigned if there is a possibility of low impact to product quality, scope, cost, and/or schedule. Minimal disruption is possible and some monitoring is likely needed to ensure priority does not increase.
Medium	M	A priority of Medium is assigned if there is a possibility of moderate impact to product quality, scope, cost, and/or schedule. Some disruption is likely and a different approach may be required. Mitigation strategies should be implemented as soon as feasible.
High	H	A priority of High is assigned if there is a possibility of substantial impact to product quality, scope, cost, and/or schedule. A major disruption is likely and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately.

B. Status Definition

I-220303-01	Issue	M220303-1	3/3/2022	Training and Knowledge Transfer	GENERAL	Training	DOTH requested weekly SAP training from SI, but SI stated that it's difficult due to resource constraints. SI suggested to bring up questions as needed to each respective consultant.	21	Closed	High	N/A	One of the issues is the lack of SAP understanding that DOTH members have, and this makes it challenging to review PDDs and to make progress with the project. It is recommended that SI and DOTH both proactively work on bridging the knowledge app for H4 by SI defining additional training sessions and DOTH requesting system training and information as needed. The training dees not have to be a formal structured classroom session, but it could be an informal structured classroom once a week to keep DOTH users more familiar with H4 functionalities and features and to manitain the implementation momentum throughout the H4 project.	3/31/2022: SI started to have a standing meeting every week for discussion and Q&A on Fund Management module. R-221130-04	Risk	M221117-1	11/30/2022	Data Conversion	GENERAL	Data Conversion Preparedness	Data Conversion strategy and plan documents have not covered the details such as source/larger, clansing, dependencies, and validations. These activities have been deferred to the Realiter Phane from the Explore Phase causing delays, revervi, or additional work later. WRECE and detailed data conversion work deferred from the Explore Phase are discussed and performed during FSD sessions.	DOTH/SI	Open	High	High	It is recommended to atach up on work deferred from the Eprope Phase and to explore Data Conversion materials in detail to finalize the Data Conversion WRICEF in FSD.	12/33/2022: Data conversion discussions are making progress. However, Hamiliarity of H4 terminologies, functions, and processes by ODTI will be needed to adequately review and complete data conversion T5Ds. 13/12/2023: ISD entities are continuously being held to review data conversion specifications, especially to identify source of data that needs to be extract from. 2/28/2023: Data conversion discussions have been held and are making progress.	2/28/2023			
1-221130-03	Issue	M221117-1	11/30/2022	Documentation	GENERAL	Meeting Minutes/Follow Up Lists	It is observed that meeting minutes or action items from the project discussions are not always provided. To Do lists and summaries of the meetings may have been gathered on individual levels, but this makes it difficult to track the progress as a project team and also challenging to collaborate between project team members.	DOTH/SI	Open	Medium	N/A	It is recommended to prepare meeting summaries and/or to-do lists from the meetings to efficiently prepare, plan, and margize the follow up activities and hold efficient meetings.	12/32/2022: No major update. 12/32/2022: No meding minutes and agenda for weekly standing meetings have been provided. It will help to have meeting minutes for other Realize Phase meetings as well. 22/32/2023: Meeting minutes are required to tack action terms and to do tasks. For example, PO match options, H4 values for FAMIS project/PhA/Lct fields, Workflow routings, source/object cades, fixed asset funds, spyroll accounting entries, etc. Caurumb, it is difficult to track who needs to perform what task by when without meeting minutes.	2/28/2023
