1 WHEREAS, water is life; and

2

3 WHEREAS, access to reliable water infrastructure and clean
4 drinking water is essential for personal and public health; and

5

6 WHEREAS, a lack of access to a consistent water supply
7 prevents the development of basic infrastructure in rural and

9 medical and community health centers, grocery stores, and
10 financial institutions; and

12 WHEREAS, many communities located on the southwestern side

20 standpipe well for the community; and

21

22 WHEREAS, despite the establishment of the well, water
23 access remains a significant challenge for residents of Ocean
24 View, Miloli‘i, and neighboring communities, most of whose
25 residents continue to rely on catchment systems; and

26

H.C.R. NO. 54

1 WHEREAS, areas that receive much less rainfall than the
2 southwestern part of Hawai'i Island, such as Waikoloa, have
3 reliable county water infrastructure which receives
4 approximately nine inches of rainfall per year on average in
5 comparison to the twenty-six inches of rainfall experienced each
6 year on average in Ocean View; and

7
8 WHEREAS, inadequate water infrastructure represents a
9 glaring example of structural inequality for the southwestern
10 part of Hawai'i Island, which ranks below the state average in
11 household income, educational attainment, and other key social
12 and economic indicators; now, therefore,

13

17 Department of Water Supply is requested to convene a working
18 group to examine opportunities for increasing water access and
19 strengthening water infrastructure for underserved communities
20 on Hawai'i Island; and

21
22 BE IT FURTHER RESOLVED that the Hawai'i County Department of
23 Water Supply is urged to invite to participate in its working

27 community members; and

28
