
A BILL FOR AN ACT

RELATING TO THE HOSPITAL SUSTAINABILITY PROGRAM.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the hospital
2 sustainability program established in 2012 has served a critical
3 role in strengthening Hawaii's health care system. In the
4 eleven years since the program's inception, the hospital
5 sustainability program has helped acute care facilities treat
6 the State's most vulnerable patients, especially low-income
7 individuals requiring hospital services. The program has been
8 carried out in a public-private partnership to ensure patients
9 in Hawaii have access to quality, affordable care.

10 The legislature further finds that, even with the program,
11 hospitals in the State face major financial challenges. These
12 challenges are due in part to the continuing health and
13 financial pressures related to the coronavirus disease 2019
14 pandemic and health care workforce shortage. The federal and
15 state governments jointly finance medicaid by statutory formula.
16 The federal government pays between fifty per cent and
17 seventy-four per cent, with a state's per capita income

1 determining the percentage. States with lower per capita
2 incomes relative to the national average receive higher federal
3 matching rates. Federal rules mandate that a state must pay the
4 state's share from public funds that are not federal funds.

5 The legislature further finds that provider fees exist in
6 forty-nine states and the District of Columbia as a means of
7 drawing down federal funds to sustain medicaid programs amid
8 rising state budget deficits, increasing health care costs, and
9 expanding medicaid enrollment. Provider fees, which are
10 collected from and agreed to by specific categories of
11 providers, may be imposed on nineteen different classes of
12 health care services, including inpatient and outpatient
13 hospital and nursing facility services. Public funding to help
14 financially sustain Hawaii's hospitals should continue by
15 assessing a provider fee through the hospital sustainability
16 program, which is currently scheduled to be repealed in 2024.

17 The legislature therefore finds that, in Hawaii, a provider
18 fee for hospitals has resulted in a substantial increase in
19 medicaid payments without placing additional constraints on the
20 State's budget. The additional federal funds obtained via the
21 hospital sustainability program allow hospitals in the State to

1 continue to serve uninsured or underinsured patients in a timely
2 and effective manner, thereby maintaining access to care for
3 medicaid recipients, and helping to ensure the overall
4 sustainability of the health care system in Hawaii.

5 The purpose of this Act is to preserve access to health
6 care for medicaid recipients and strengthen the hospital
7 sustainability program by:

- 8 (1) Amending the definition of "private hospital";
- 9 (2) Clarifying the uses of the hospital sustainability
10 program special fund;
- 11 (3) Increasing the hospital sustainability fee cap for
12 various facilities;
- 13 (4) Requiring the department of human services to consult
14 and negotiate with the hospital trade association in
15 the State regarding hospital sustainability fee
16 participation and rates;
- 17 (5) Clarifying the circumstances under which the hospital
18 sustainability fee shall be discontinued and the
19 distribution of remaining funds;
- 20 (6) Repealing the sunset dates of Act 217, Session Laws of
21 Hawaii 2012, and Act 123, Session Laws of Hawaii 2014,

1 thereby making the hospital sustainability program
2 permanent and permanently exempting the hospital
3 sustainability program from the central service and
4 administrative expenses assessments; and

5 (7) Appropriating funds out of the hospital sustainability
6 program special fund.

7 SECTION 2. Section 346G-2, Hawaii Revised Statutes, is
8 amended to read as follows:

9 "~~§~~**346G-2** Findings and declaration of necessity. It
10 is the intent of the legislature to establish a special fund
11 within the state treasury to receive revenue from the imposition
12 of a hospital sustainability fee to be administered by the
13 department of human services, which shall use the revenue from
14 the fee and associated federal medicaid matching funds
15 exclusively to make ~~direct~~ payments to hospitals and for other
16 purposes as ~~set forth~~ described in this chapter."

17 SECTION 3. Section 346G-3, Hawaii Revised Statutes, is
