DEPUTY DIRECTOR

**TESTIMONY OF
GARY S. SUGANUMA, DIRECTOR OF TAXATION**

TESTIMONY ON THE FOLLOWING MEASURE:

H.B. No. 947, H.D.1, Relating to Agriculture

BEFORE THE:

Senate Committee on Agriculture and Environment

DATE: Monday, March 20, 2023

TIME: 1:01 p.m.

LOCATION: State Capitol, Room 224

Chair Gabbard, Vice-Chair Richards III, and Members of the Committee:

The Department of Taxation ("Department") offers the following comments regarding H.B. 947, H.D.1, for your consideration.

H.B. 947, H.D.1, adds a new section to chapter 235, Hawaii Revised Statutes (HRS), to create a nonrefundable income tax credit for "qualified expenses," up to an unspecified amount, for producing value-added products. The bill sets an unspecified aggregate cap and requires the Board of Agriculture to certify all "qualified expenses." The terms "net income tax liability," "qualified expenses," and "qualified taxpayer" are defined in this measure.

This bill has a defective effective date of June 30, 3000 and applies to taxable years beginning after December 31, 2023.

The Department defers to the Board of Agriculture on its ability to certify this credit and administer its aggregate cap, but requests that a third-party certification requirement be maintained, as the Department lacks subject-matter expertise to determine eligibility for and administration of this credit.

Department of Taxation Testimony
H.B. 947, H.D.1
March 20, 2023
Page 2 of 2

The Department further notes that it is able to administer this bill for taxable years beginning after December 31, 2023.

Thank you for the opportunity to provide comments on this measure.

CONFERENCE ROOM 224 AND VIDEO CONFERENCING

**HOUSE BILL NO. 947 HD1
RELATING TO AGRICULTURE**

Chair Gabbard and Members of the Committee:

Thank you for the opportunity to present testimony on House Bill 947 HD1. This bill establishes a new income tax credit that incentivizes private food manufacturers to use locally grown ingredients in their products. The Department supports the intent and provides the following comments.

The Department acknowledges this effort may help to support the development of agricultural self-sufficiency and food security within the State. However, we have concerns on the tax credit amount that is equal to the qualified expenses of eligible taxpayers as qualified expenses include purchase, maintenance, or improvement of food manufacturing equipment and facilities (page 6, lines 4-6). The amount of qualified expenses/tax credit could be generous (subject to the total amount allowed), and verifying the nature and value the proposed tax credit could present a challenge to the Department, given its limited resources and fiscal administration capacity.

Thank you for the opportunity to testify on this measure.

March 20, 2023

HEARING BEFORE THE
SENATE COMMITTEE ON AGRICULTURE AND ENVIRONMENT

TESTIMONY ON HB 947, HD1
RELATING TO AGRICULTURE

Conference Room 224 & Videoconference
1:01 PM

Aloha Chair Gabbard, Vice-Chair Richards, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports the intent of HB 947, HD1, which establishes a food manufacturer tax credit and defines "qualified taxpayers" as manufacturers that produce value-added products.

As expenses rise, increases in farm revenues and profits are critical to the continued viability of farms and ranches. One way farmers can do this is by "adding value" to raw agricultural crops. Currently, off-grade and excess production is sometimes wasted due to market conditions. Converting them into value-added products will not only increase farm revenue but also provide new business opportunities, increase employment opportunities, and address Hawai'i's goals of increased self-sufficiency and sustainability.

High production costs are a major driver of narrow profit margins for Hawai'i's farmers and value-added food producers. Labor, taxes, land, transportation, utilities, and supplies are all costs of doing business that often results in value-added food producers just being able to break even.

Hawai'i is potentially losing millions of dollars because of the cost to process agricultural crops into value-added products. HFB supports any program that supports the production of value-added products so that farmers can increase their income while allowing locally produced value-added goods can compete with imported products, strengthening our local economy.

The strength of Hawai'i's economy is dependent upon a diversity in commerce that is resilient to economic downturns and aggressive in creating new growth opportunities.

We are concerned that the removal of the use of local crops has been removed from the definition of “qualified taxpayer”.

Thank you for your efforts to protect and support Hawai'i's farmers and ranchers.

Written Statement of
Len Higashi
Executive Director
Hawaii Technology Development Corporation
before the
Senate Committee On Agriculture and Environment
Wednesday, March 20, 2023
1:01 p.m.
Conference Room 224 & Videoconference

In consideration of
HB947, HD1
RELATING TO AGRICULTURE

Chair Gabbard, Vice Chair Richards, and Members of the Committee.

The Hawai'i Technology Development Corporation (HTDC) offers **comments** on HB947, HD1 that establishes a food manufacturer tax credit for manufacturers that produce valued-added products using local crops for taxable years beginning after 12/31/2023.

HTDC supports initiatives aimed at growing tech and manufacturing jobs and supports the intent of this bill. HTDC comments that the bill does not specify the amount of time the manufacturer must keep the equipment or facility to claim the credit. HTDC administers the Manufacturing Development Program (a.k.a. Manufacturing Assistance Program or MAP grants) that provides up to 20% reimbursement up to \$100,000 on qualified expenses that help Hawai'i manufacturers become globally competitive. HTDC comments that manufacturers should be prohibited from claiming the tax credit and grant for the same expense. HTDC comments that this bill should be coordinated with HB1384. HTDC defers to the Board of Agriculture and Department of Taxation on implementation.

HTDC looks forward to working with stakeholders in moving this initiative forward. Thank you for the opportunity to offer these comments.

Agriculture & Food Security Committee

Monday, March 20, 2023, 1:01 pm

Senate Committee on Agriculture and Food Security

HOUSE BILL 947 – RELATING TO AGRICULTURE

Position: Strong Support

Me ke Aloha, Chair Gabbard, Vice-Chair Richards, and members of the Senate Committee on Agriculture and Food Security:

HB947 establishes a food manufacturer tax credit for producers of valued-added products. It carefully defines the benefit to avoid abuse of the credit.

The Agriculture & Food Security Committee strongly supports the incentive to purchase locally-produced foods, and this bill explores the possibilities by offering a tax credit to qualified producers who incorporate locally-produced foods in their products.

This may be an important boost for food agriculture generally, both incentivizing greater purchasing of locally produced food stuffs and also in the wider production of value-added products that can earn a premium and boost the agriculture industry as a whole.

Hawaii needs to accelerate its locally-produced foods for greater food security, and this will be accomplished in part by incentivizing use of the market. Our Committee recognizes that this not the full answer to our food security program, and appreciates multiple bills offered this session to move us in the right direction. We emphasize that the market cannot be the sole support of food security, but every possibility must be explored if we are to achieve food security before disaster strikes, as it is guaranteed to do, given the dimensions of climate change and our current inability to reduce carbon emissions.

Mahalo for the opportunity to address this matter.

/s/ Charley Ice Acting Chair, Agriculture and Food Security Committee
Environmental Caucus of the Democratic Party

SENATE COMMITTEE ON AGRICULTURE & ENVIRONMENT
Monday, March 20, 2023 — 1:01 p.m.

Ulupono Initiative supports HB 947 HD1, Relating to Agriculture.

Dear Chair Gabbard and Members of the Committee:

My name is Micah Munekata, and I am the Director of Government Affairs at Ulupono Initiative. We are a Hawai'i-focused impact investment firm that strives to improve the quality of life throughout the islands by helping our communities become more resilient and self-sufficient through locally produced food, renewable energy and clean transportation choices, and better management of freshwater resources.

Ulupono supports HB 947 HD1, which establishes a food manufacturer tax credit for qualified taxpayers who produce value-added products.

Ulupono supports local food manufacturing as it provides market options for local farmers and ranchers to bring products to consumers. By processing various fruits, vegetables, meats, or dairy products into value-added goods, farmers and ranchers can utilize all of their products, some of which may have previously been considered food waste, and diversify their revenue streams. This tax incentive will help grow local production and influence future investments in food manufacturing.

Ulupono would like to note that this measure does not define a “qualified expense.” As this bill moves forward, we ask the committee to consider the various expenses that would be covered with such a broad tax credit. For example, food manufacturing costs that may qualify include access to land and water, equipment purchases, labor force, food safety compliance, and processing and packaging.

We recommend that this committee consider amending the definition of a “qualified taxpayer” to read as:

- “Qualified taxpayer” means food manufacturers that produce [~~value-added products using local crops~~] local value-added processed, agricultural, or food products.

We also recommend adding the following definitions:

Investing in a Sustainable Hawai'i

- “Local value-added processed, agricultural, or food product” shall be defined to mean at least fifty-one per cent of the product’s primary agricultural product shall be grown, raised, and harvested in Hawaii.”
- “Primary agricultural product” means the major agricultural product in a processed or value-added agricultural or food product

These definitions were mirrored after the Department of Agriculture’s Seal of Quality Program—the top-of-the-line program established to protect the Hawai’i brand for both fresh and value-added products.

Thank you for this opportunity to testify.

Respectfully,

Micah Munekata
Director of Government Affairs

RE: HB947 HD1 Relating to Agriculture

Position: Support

The Hawaii Food Industry Association is comprised of two hundred member companies representing retailers, suppliers, producers, and distributors of food and beverage related products in the State of Hawaii.

Increasing local food production, is a goal we all share, and we are all aware of the many challenges that our local food producers face. High real estate prices, high labor costs, lack of economy of scale, and high energy costs can make it challenging or even impossible for locally made products to reach the market at competitive prices with imported products. For those interested in using local agricultural products in their manufacturing these challenges can be compounded because they apply to both the raw agricultural materials and the value added finished products. Unfortunately, these obstacles also mean that many who might be interested in manufacturing food here in Hawaii do not.

This measure would be an important step in making Hawaii food manufacturers, and agricultural producers more competitive. It will also incentivize more companies to choose to manufacture food products here in Hawaii, and facilitate deeper integration of local agricultural products within our food systems.

HFIA has proudly produced the Made in Hawaii Festival for over 25 years. We are keenly aware of the potential of our local food manufacturers and we know that with our support this sector and continue to grow and thrive. We urge you to pass this measure and we thank you for the opportunity to testify.

TAX FOUNDATION OF HAWAII

126 Queen Street, Suite 305

Honolulu, Hawaii 96813 Tel. 536-4587

SUBJECT: INCOME, Food Manufacturer Tax Credit

BILL NUMBER: HB 947 HD 1

INTRODUCED BY: House Committee on Finance

EXECUTIVE SUMMARY: Establishes a food manufacturer tax credit. Defines "qualified taxpayers" as manufacturers that produce valued-added products using local crops. Applies to taxable years beginning after 12/31/2023.

SYNOPSIS: Adds a new section to chapter 235, HRS, to establish the food manufacturer tax credit. The credit amount is 100% of the qualified expenses of the qualified taxpayer, up to \$_____.

Defines "qualified expenses" as the costs directly incurred by the taxpayer for the purchase, maintenance, or improvement of food manufacturing equipment and facilities.

Defines "qualified taxpayer" as food manufacturers that produce value-added products.

Requires the Department of Agriculture to verify and certify each claim for the credit including the total amount of credit for each taxable year and the cumulative amount of tax credit during the credit period. The department shall issue a certificate to qualifying taxpayers who shall file the certificate with the taxpayer's tax return.

Allows the Department of Agriculture to assess and collect a fee to offset the cost of certifying tax credit claims. If the amount of credits exceeds the taxpayer's income tax liability, the excess of credit over liability may be used as a credit against the taxpayer's income tax liability in subsequent years until exhausted. All claims for a credit under this section shall be properly filed on or before the end of the twelfth month following the close of the taxable year for which the credit may be claimed. Failure to comply with the foregoing provision shall constitute a waiver of the right to claim the credit.

The total amount of credits allowed shall not exceed \$_____ for all qualified taxpayers in any taxable year; however, any taxpayer who is not eligible to claim the credit in a taxable year due to the \$_____ cap having been exceeded for that taxable year shall be eligible to claim the credit in the subsequent taxable year.

EFFECTIVE DATE: June 30, 3000.

STAFF COMMENTS: The tax system is there to raise revenue to keep the government moving. Using the tax system to give taxpayers money to do things that lawmakers want them to do for social policy reasons merely throws the revenue raising system out of whack, making the system less than reliable as there is no way to determine how many taxpayers will avail themselves of the credit and in what amount.

Furthermore, tax credits are nothing more than the expenditure of public dollars, but out the back door. If, in fact, these dollars were subject to the appropriation process, would taxpayers be as generous about the expenditure of these funds when our kids are roasting in the public school classrooms, there isn't enough money for social service programs, or our state hospitals are on the verge of collapse?

The additional credit would require changes to tax forms and instructions, reprogramming, staff training, and other costs that could be massive compared to the amount that may be paid out in credits.

Digested: 2/28/2023

MAUI

CHAMBER OF COMMERCE

VOICE OF BUSINESS

HEARING BEFORE THE SENATE COMMITTEE ON
AGRICULTURE AND ENVIRONMENT
HAWAII STATE CAPITOL, SENATE CONFERENCE ROOM 224
MONDAY, MARCH 20, 2023 AT 1:01 P.M.

To The Honorable Senator Mike Gabbard, Chair
The Honorable Senator Herbert M. "Tim" Richards, III, Vice Chair
Members of the Committee on Agriculture and Environment

SUPPORT OF HB947 HD1 RELATING TO AGRICULTURE

The Maui Chamber of Commerce would like offer our **SUPPORT for HB947 HD1** relating to agriculture that establishes a food manufacturer tax credit and defines "qualified taxpayers" as manufacturers that produce value-added products.

Agriculture and manufacturing are difficult industries in Hawaii, but are very important to our economic diversification and sustainability efforts. We are pleased to work with the Maui County Farm Bureau and local manufacturers who create value-added food products through our Made in Maui County Festival. We wholeheartedly support this bill to establish a food manufacturer tax credit to help offset costs and support our manufacturing and agricultural industries.

Mahalo for the opportunity to offer **SUPPORT for HB947 HD1**.

Sincerely,

Pamela Tumpap
President

To advance and promote a healthy economic environment for business, advocating for a responsive government and quality education, while preserving Maui's unique community characteristics.

**Testimony to the Senate Committee on Agriculture and Environment
Wednesday, March 20th, 2023, at 1:00 P.M.
Conference Room 224 & Via Videoconference**

RE: HB 947 HD1 Relating to Agriculture

Chair Gabbard, Vice Chair Richards, and Members of the Committee:

The Hawaii Food Manufacturers Association **strongly supports** HB 947, which establishes a food manufacturer tax credit. Defines "qualified taxpayers" as manufacturers that produce valued-added products using local crops. Applies to taxable years beginning after 12/31/2023.

The Hawaii Food Manufacturers Association (HFMA) is a non-profit organization of approximately 120 members that has been promoting Hawaiian grown or manufactured products since 1977. The HFMA works to increase the understanding and appreciation of the unique flavors, quality, and care that go into the production of Hawaii's fine foods and beverages represented by our valued members and enjoyed by our valued community.

The food manufacturing industry in Hawaii generates \$900 million in annual revenue and is the largest manufacturing sector in the state using local inputs according to the Hawaii State Department of Business, Economic Development and Tourism. The industry provides over 6,100 jobs in the state and an annual payroll of more than \$160 million.

Food manufacturers have struggled in recent years due to the COVID-19 pandemic, supply chain shortages, and rising inflation. This bill would be a tremendous help to the small businesses that are struggling to keep their doors open and bring back workers that were laid off during the last few years.

The state set goals to double local food production by 2030, but that is likely not going to happen unless small mom and pop food manufacturers have access to more capital or can receive investment from the private sector. Currently, there is no incentive for private investors to invest in agriculture or food manufacturing in Hawaii.

Establishing an incentive for private food manufacturers in the State to use Hawaii-grown food ingredients would not only promote made-in-Hawaii products but will kick-start our economy and get the state closer to the goal of doubling local food production by 2030.

Thank you for the opportunity to testify.

Chamber of Commerce HAWAII

The Voice of Business

**Testimony to the House Committee on Agriculture and Environment
Wednesday, March 20, 2023, at 1:00 P.M.
Conference Room 224 & Videoconference**

RE: HB 947 HD1 Relating to Agriculture

Aloha Chair Gabbard, Vice Chair Richards, and Members of the Committee:

The Chamber of Commerce Hawaii ("The Chamber") **supports HB 947 HD1**, which establishes a food manufacturer tax credit. Defines "qualified taxpayers" as manufacturers that produce valued-added products using local crops. Applies to taxable years beginning after 12/31/2023.

Almost all industries in the State of Hawaii have struggled since the COVID-19 pandemic hit in 2020. On top of the pandemic, many businesses, included local food manufacturers, have had to deal with record high inflation, supply chain shortages, and a growing workforce shortage.

The state set goals to double local food production by 2030, but that is likely not going to happen unless food manufacturers have access to more capital or can receive investment from the private sector. Currently, there is no incentive for private investors to invest in agriculture or food manufacturing in Hawaii.

According to the department of Business, Economic Development, and Tourism, replacing just 14% of the food products currently imported into the State would amount to approximately \$313,000,000 in new revenues for Hawaii's good manufacturing sector. The State currently imports 85% - 90% of its food, fuel, and fiber.

Establishing an incentive for private food manufacturers in the State to use Hawaii-grown food ingredients would not only promote made-in-Hawaii products but will kick-start our economy and get the state closer to the goal of doubling local food production by 2030.

The Chamber is Hawaii's leading statewide business advocacy organization, representing about 2,000+ businesses. Approximately 80% of our members are small businesses with less than 20 employees. As the "Voice of Business" in Hawaii, the organization works on behalf of members and the entire business community to improve the state's economic climate and to foster positive action on issues of common concern.

Thank you for the opportunity to testify.
