THE SENATE THIRTY-SECOND LEGISLATURE, 2023 STATE OF HAWAII

S.B. NO. 690

JAN 20 2023

#### A BILL FOR AN ACT

RELATING TO ENERGY EFFICIENCY.

#### BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that there have been many 2 advances in the energy efficiency of lighting. Fluorescent bulbs were promoted in the 1980s because they are up to thirty-3 five per cent more energy efficient than the incandescent light 4 fixtures widely in use at that time; however, further advances 5 6 have been made with light-emitting diodes (LEDs) that are now up 7 to eighty per cent more energy efficient than fluorescent bulbs and can last three to five times longer than fluorescent bulbs 8 9 and thirty times longer than incandescent bulbs.

10 The legislature further finds that all fluorescent bulbs 11 contain mercury, a toxic pollutant that bioaccumulates in the 12 environment, can pollute air and water, and causes harm to 13 wildlife and human health. The legislature notes that mercury-14 free alternatives exist for most of the thousands of products 15 that contain mercury components.

16 The legislature believes that LEDs are a better alternative 17 because they do not contain any mercury, are more energy

1 efficient, and are the cheaper life-cycle cost lighting option 2 for consumers and businesses. Phasing out the sale of mercurycontaining bulbs in Hawaii will prevent additional toxic 3 pollutants from being brought into the State's ecosystem, reduce 4 5 energy use, and save consumer dollars. 6 Accordingly, the purpose of this act is to prohibit the 7 sale of certain fluorescent lamps in the State as a new 8 manufactured product, with certain exemptions. 9 SECTION 2. Chapter 196, Hawaii Revised Statutes, is 10 amended by adding a new part to be appropriately designated and 11 to read as follows: 12 "PART . FLUORESCENT LAMPS 13 §196-Definitions. As used in this part, unless the 14 context otherwise requires: 15 "Compact fluorescent lamp" means a compact low-pressure, 16 mercury-containing, electric-discharge light source in which a 17 fluorescent coating transforms some of the ultraviolet energy generated by the mercury discharge into visible light, and 18 19 includes the following characteristics: 20 (1) One base (end cap) of any type, including but not 21 limited to screw, bayonet, two pins, and four pins;

1 (E) A lamp used for coral zooxanthellae symbiosis 2 from which the radiation power emitted between 3 four hundred and four hundred eighty nanometers 4 represents at least forty per cent of the total 5 radiation power emitted between two hundred fifty 6 and eight hundred nanometers; or 7 (F) Any lamp used in a sunlamp product. For the 8 purposes of this subparagraph, "sunlamp product" 9 has the same meaning as defined in title 21 Code 10 of Federal Regulations section 1040.20(b)(9); 11 (3) Used for medical or veterinary diagnosis or treatment or used in a medical device; 12 13 (4) Used in pharmaceutical product manufacturing or 14 quality control; 15 (5)Used for spectroscopy and photometric applications, 16 such as ultraviolet-visible spectroscopy, molecular 17 spectroscopy, atomic absorption spectroscopy, 18 nondispersive infrared, Fourier transform infrared, 19 medical analysis, ellipsometry, layer thickness 20 measurement, process monitoring, or environmental 21 monitoring; or

(6) Used by academic and research institutions exclusively 1 for conducting research projects and experiments." 2 SECTION 3. This Act shall take effect upon its approval. 3 4
