

STATE OF HAWAII
DEPARTMENT OF EDUCATION
KA 'OIHANA HO'ONA'AUAO
P.O. BOX 2360
HONOLULU, HAWAII 96804

Date: 02/28/2023

Time: 10:00 AM

Location: CR 211 & Videoconference

Committee: Senate Ways and Means

Department: Education

Person Testifying: Keith T. Hayashi, Superintendent of Education

Title of Bill: SB 0106, SD1 RELATING TO EDUCATION.

Purpose of Bill: Authorizes the Department of Health to require the Department of Education to report coronavirus disease 2019 case counts and other related information in a manner most appropriate to public health and safety, as determined by the Department of Health. Repeals the requirement to publish the report on the Department of Education's website. (SD1)

Department's Position:

The Hawaii State Department of Education (Department) supports SB 106, SD 1, which requests changing from a weekly Department report on school coronavirus disease 2019 (COVID-19) cases to reporting case counts and related information in a manner most appropriate to public health and safety, as determined by the Hawaii State Department of Health (DOH).

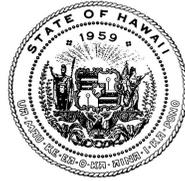

Given the prevalence of the COVID-19 vaccine and the mitigation strategies that have proven effective, the weekly COVID-19 reporting requirement is an administrative burden on schools that is yielding minimal benefits. The DOH still has a criteria for reporting a potential outbreak of COVID-19 similar to what is done for flu-like illnesses, with a protocol that existed many years prior to the recent epidemic.

The Department has a long history of collaboration with the DOH on reporting and responding to potential outbreaks of infectious illness at schools and is committed to continuing this collaboration on any and all protocols necessary to ensure public health and safety.

Should the measure move forward, the Department respectfully requests the following revision:

Page 1, Lines 14-15: "~~case counts~~ potential outbreaks and related information as appropriate to"

Thank you for the opportunity to provide testimony on SB 106, SD1.

**Testimony in SUPPORT of S.B. 106 S.D. 1
RELATING TO EDUCATION**

SENATOR DONOVAN M. DELA CRUZ, CHAIR
SENATE COMMITTEE ON WAYS AND MEANS

Hearing Date: 2/28/2023

Room Number: Conference Room 211 &
Videoconference

1 **Department Testimony:** Thank you for the opportunity to provide testimony in support of
2 Senate Bill 106 which changes the weekly Department of Education report on school
3 coronavirus disease 2019 (COVID-19) cases to reporting case counts and related information in
4 a manner most appropriate to public health and safety, as determined by the Hawaii State
5 Department of Health (DOH).

6 Given widespread availability of COVID-19 vaccine and other mitigation strategies that have
7 proven effective for controlling COVID-19 spread in schools, DOH recognized that the weekly
8 COVID-19 reporting requirement is an administrative burden on schools that provides minimal
9 benefits. The DOH has worked with DOE to establish criteria for reporting of potential outbreaks
10 of COVID-19. These criteria are similar to what DOE reports for for flu-like illnesses, with a
11 protocol that existed many years prior to the recent epidemic. DOH and DOE have a long history
12 of collaboration on reporting and responding to potential outbreaks of infectious illness at
13 schools. DOH is committed to continuing this collaboration on any and all protocols necessary to
14 ensure public health and safety.

15 **Offered Amendments:** Should the measure move forward, the Department supports the
16 following revision:

17 Page 1, Lines 14-15: “~~case counts~~ potential outbreaks and related information as
18 appropriate to”

Comments:

Aloha Chair Dela Cruz, Vice Chair Keith-Agaran, and members of the Ways and Means Committee:

I am writing in opposition to SB106, which will rescind the requirement that the Department of Education (DOE) report COVID-19 cases by school on a weekly basis.

As the State rolled back its COVID-19 protocols, people were told to keep informed and to take measures to keep themselves safe. Yet, information has become less accessible and it can be difficult to gauge the risk of infection. Department of Health (DOH) reporting went from daily to weekly reports, and based on interviews from the DOH, the case counts reported cannot truly be relied upon to give an accurate level of infection in the community because of the non-reporting of at-home tests.

While it might be said that the DOE and DOH should be allowed to determine the reporting of cases, it also should be noted that the requirement for the DOE to report cases by school arose because parents and community members asked for more information, and the measure passed over much objection by the DOE and DOH. The law was passed after override of the governor's veto which echoed DOE and DOH objections.

Because of the law, the DOE did publish COVID-19 cases by school on a weekly basis, and parents and community members have been able to check if a school has had COVID-19 cases. This has allowed families to find the information easily, and depending on the status of their school, it has allowed them to feel more at ease, to know that they should check if what they think is a cold is actually COVID-19, or to make sure that their child is taking steps to be safer. This is consistent with the purpose of the law to provide transparency and give families and community members information so that they can make better, informed decisions to keep themselves safe, which also makes the larger community safer.

There is a push to say that COVID-19 has ended, and we will likely see an end to emergency measures and support. In some ways, this points to a greater, not lesser, need for public access to information, as protective measures and support are withdrawn and people are left to fend for themselves to an even greater degree.

The harmful effects of COVID, past and present, continue. We can still watch the news and see Hawaii hospitals raise concerns about staffing. Long COVID, which can arise from mild cases,

continues to harm those inflicted. Absences in school and work affect education and businesses. And there will likely continue to be infection surges with the presence of more transmissible variants of COVID that develop and spread globally.

While no one wants to unnecessarily burden the DOE, the website and means for meeting the reporting requirement already are in place. Rather than withdraw the access to information prematurely, it makes sense to ensure that parents and communities are receiving the information they need. When I asked a parent for his opinion about the change in the reporting requirement, he said that he is concerned about being told when there is a case in his child's class. His experience has been that access to information has been uneven.

Before withdrawing the reporting requirement, we should make sure that access to needed information is ensured. Until this is done, please vote against this bill to keep information available.

Thank you for your consideration.

Lynn Otaguro

Comments:

Reporting is over-rated. This will cause an unnecessary burden on the DOE. There doesn't seem to be a corresponding benefit to the cost and burden it will cause.
