Findings

THE AUDITORS IDENTIFIED A MATERIAL WEAKNESS in internal control over financial reporting that was required to be reported under *Government Auditing Standards*. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. The material weakness identified by the auditors related to timely reconciliation and year-end closing procedures to ensure financial activity is accurately reflected in the financial statements. Management is in the process of reviewing and updating year-end procedures to ensure all transactions are properly recorded and reported prior to the start of the annual audit.

There were no instances of noncompliance or other matters required to be reported under *Government Auditing Standards*. The Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* is reported separately and is available upon request.
