A BILL FOR AN ACT

RELATING TO RENEWABLE ENERGY.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

- 1 SECTION 1. The legislature finds that it has established
- 2 goals for the State to achieve a one hundred per cent renewable
- 3 energy portfolio standard by 2045, reduce greenhouse gas
- 4 emissions to at least fifty per cent below 2005 levels by 2030,
- 5 and uphold the State's zero emissions clean economy target to
- 6 sequester more atmospheric carbon and greenhouse gases than
- 7 emitted within the State by no later than 2045.
- 8 The legislature further finds that section 171-95, Hawaii
- 9 Revised Statutes, provides opportunities for the board of land
- 10 and natural resources to assist in reaching the State's
- 11 renewable energy goals by authorizing the board to lease,
- 12 without public auction, certain public lands to public utilities
- 13 and renewable energy producers. However, the legislature finds
- 14 that the operative definition of "renewable energy producers"
- 15 within that law should be broadened to allow more public lands
- 16 to be leased for the generation of more types of renewable
- 17 energy.
