## HOUSE RESOLUTION

REQUESTING THE DEPARTMENT OF HEALTH TO CONDUCT A STUDY TO  
EXAMINE WHETHER BED-HOLD POLICIES PLACE AN UNDUE FINANCIAL  
BURDEN ON INDIVIDUALS IN ASSISTED LIVING FACILITIES.

1           WHEREAS, assisted living facilities provide a great value  
2 and service to the State as long-term care facilities for  
3 residents; and  
4

5           WHEREAS, according to the December 2021 report *The Elderly*  
6 *Population in Hawaii: Current Living Circumstances and Housing*  
7 *Options* issued by the Department of Business, Economic  
8 Development, and Tourism, the State has a total of seventeen  
9 assisted living facilities with 2,367 assisted living units; and  
10

11           WHEREAS, each assisted living unit typically has the  
12 capacity to accommodate up to two residents, with rent ranging  
13 from \$3,800 to \$8,800 per month; and  
14

15           WHEREAS, residents of assisted living facilities are  
16 generally elderly residents who require intermittent or  
17 occasional help with activities of daily living; and  
18

19           WHEREAS, however, there are times when residents of  
20 assisted living facilities require acute or extended levels of  
21 care outside of assisted living facilities; and  
22

23           WHEREAS, according to one study, close to twenty-five  
24 percent of Medicare residents are re-hospitalized within the  
25 first thirty days of the resident being transferred to an  
26 assisted living facility from a hospital; and  
27

28           WHEREAS, when residents of assisted living facilities  
29 require temporary hospitalization, they often must pay for the  
30 dual costs of reserving their bed at the assisted living  
31 facility and their hospital stay; and  
32

# H.R. NO. 165

1 WHEREAS, this practice of paying care facilities to reserve  
2 beds while the resident is temporarily absent is known as a bed-  
3 hold policy; and  
4

5 WHEREAS, the establishment of bed-hold policies in assisted  
6 living facilities may disproportionately affect vulnerable  
7 populations, such as elderly individuals, low-income  
8 individuals, and individuals with chronic illnesses, which could  
9 exacerbate existing health inequalities; and  
10

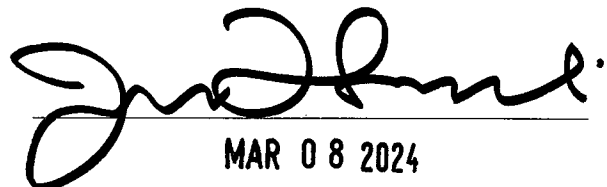

11 WHEREAS, in addition to imposing financial burdens on  
12 residents of assisted living facilities, especially those with  
13 limited financial resources, bed-hold policies may cause  
14 residents to delay or avoid medical care that could impact their  
15 health and well-being and lead to increased health care costs in  
16 the long-term due to preventable complications and emergency  
17 room visits; now, therefore,  
18

19 BE IT RESOLVED by the House of Representatives of the  
20 Thirty-second Legislature of the State of Hawaii, Regular  
21 Session of 2024, that the Department of Health is requested to  
22 conduct a study to examine whether bed-hold policies place an  
23 undue financial burden on individuals in assisted living  
24 facilities; and  
25

26 BE IT FURTHER RESOLVED that the Department of Health is  
27 requested to submit a report of its findings and  
28 recommendations, including any proposed legislation, to the  
29 Legislature no later than twenty days prior to the convening of  
30 the Regular Session of 2025; and  
31

32 BE IT FURTHER RESOLVED that a certified copy of this  
33 Resolution be transmitted to the Director of Health.
