THE SENATE THIRTY-SECOND LEGISLATURE, 2023 STATE OF HAWAII S.B. NO.758

JAN 202023

A BILL FOR AN ACT

RELATING TO FAMILY PLANNING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 The legislature finds that Hawaii has long been SECTION 1. a leader in advancing reproductive rights and advocating for 2 access to affordable and comprehensive sexual and reproductive 3 4 health care without discrimination. However, gaps in coverage 5 and care still exist, and Hawaii's benefits and protections have 6 not included equitable coverage for family planning and 7 infertility treatments. According to the Centers for Disease 8 Control and Prevention, in the United States, about one in four 9 heterosexual women ages fifteen through forty-nine with no prior 10 births have difficulty getting pregnant or staying pregnant.

In the United States, only twenty states have passed laws requiring certain insurers to either cover or offer coverage for infertility diagnosis and treatment. These states include Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Louisiana, Maine, Maryland, Massachusetts, Montana, New Hampshire, New Jersey, New York, Ohio, Rhode Island, Texas, Utah, and West Virginia. In Hawaii, pregnancy-related coverage

1 is included in accident and health insurance policies as a onetime only benefit for outpatient expenses arising from in vitro fertilization procedures. Unfortunately, the procedure is not covered in the first or second year of infertility but rather in the fifth year of infertility, or the patient is required to provide documentation that infertility is a result of a specified medical condition.

8 The legislature further finds that access to sexual and 9 reproductive health care is critical for the health and 10 well-being of all families in Hawaii, particularly by helping 11 people remain healthy and engage in family planning. Ensuring 12 that Hawaii's residents receive comprehensive, quality, and 13 culturally competent sexual and reproductive health care is a prudent economic policy that will improve the overall health of 14 15 the State's communities.

Accordingly, the purpose of this Act is to ensure comprehensive quality coverage for sexual reproductive health care services, including family planning and infertility treatments, for all Hawaii residents.

Report Title:

Health Insurance; Oocyte Cryopreservation; In Vitro Fertilization

Description:

Beginning with policies issued on or after 1/1/2024, requires health insurance policies to cover oocyte cryopreservation in certain circumstances. Removes the one-time benefit limitation for in vitro fertilization, and requires the insured or the insured's dependent spouse to have a history of infertility of at least two years' duration rather than five years'.
