**Testimony in SUPPORT of SB2401 SD1
RELATING TO FERAL ANIMALS.**

SENATOR DONOVAN M. DELA CRUZ, CHAIR
SENATE COMMITTEE ON WAYS AND MEANS

Hearing Date: Feb. 28, 2024

Room Number: 211

1 **Fiscal Implications:** This measure will not impact the priorities identified in the Governor's
2 Executive Budget Request for the Department of Health's (Department) appropriations and
3 personnel priorities.

4 **Department Testimony:** The Department of Health (Department) supports SB2401 SD1, which
5 appropriates funds for the Counties of Kauai, Maui, Hawaii, and the City and County of
6 Honolulu (CCH) to implement feral chicken control programs and the Department to implement
7 a feeding feral animal public education campaign.

8 The Department acknowledges the need for control of feral chickens by the CCH and other
9 county agencies and supports an educational campaign to reduce the amount of feeding of feral
10 animals statewide. Feral animals, whether chickens, cats, or other animals can increase the feral
11 populations which is not in the best interest of the animals themselves, environment, or in some
12 cases, human health. Educating residents and visitors about the adverse effects of feeding feral
13 animals is crucial to the success of any feral animal reduction program in Hawaii.

14 In crafting an educational campaign, the Department will collaborate with other government and
15 private agencies or organizations with similar interests and priorities.

16 Thank you for the opportunity to testify.

17 **Offered Amendments:** None

TESTIMONY OF SHARON HURD
CHAIRPERSON, BOARD OF AGRICULTURE

BEFORE THE SENATE COMMITTEE ON WAYS AND MEANS

WEDNESDAY, FEBRUARY 28, 2024
10:01 AM
CONFERENCE ROOM 211

SENATE BILL 2401, SD1
RELATING TO FERAL CHICKENS

Chair Dela Cruz, Vice Chair Moriwaki, and Members of the Committee:

Thank you for the opportunity to testify on Senate Bill 2401, SD1. This bill allocates funds to the City and County of Honolulu and Department of health for feral chicken control program and the feeding of feral animals education program. The Department expresses our **strong support**.

This past fall, the department convened the working group to discover best practices with the City and County of Honolulu's feral chicken program, further conversations statewide led to a similar request for the County of Hawaii and County of Maui which the legislature included in SB2401 SD1.

Thank you for the opportunity to testify on this measure.

Dear Chair Dela Cruz, Vice Chair Moriwaki, and Members of the Committee on Ways and Means,

SUBJECT: S.B. 2401 S.D. 1 - Relating To Feral Chickens
HEARING: Wednesday, February 28, 2024, 10:00 a.m.

The City and County of Honolulu offers its support to S.B. 2401 S.D. 1. The Department of Customer Services (CSD) of the City and County of Honolulu (City) entered into a five year master agreement with Terminix International Co., LP, d.b.a. Sandwich Isle Pest Solutions (Sandwich Isle) for feral chicken management services on private property. Under this contract, private landowners on O'ahu may retain Sandwich Isle directly for feral chicken control services, including cage rentals and disposal services. The costs for these services are partially paid by the City and County of Honolulu while the remainder is paid by the property owner/manager.

The table below outlines the price allocations.

Service	Total Price	Landowner's Cost	City's Cost
Full Service (one week)	\$475.00	\$375.00	\$100.00
Cage Rental (one week)	\$75.00	\$50.00	\$25.00
Feral Chicken Disposal (per chicken)	\$25.00	\$10.00	\$15.00

Testimony for S.B. 2401 S.D. 1
February 26, 2024
Page 2

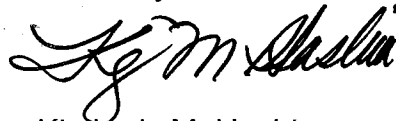

The Contract is funded for the current year with \$50,000.00 from the City & County of Honolulu's general fund. Sandwich Isle commenced services on September 5, 2023, and as of January 15, 2024, the following number of property owners/managers have utilized Sandwich Isle's services resulting in 111 feral chickens euthanized:

Full Services:	21 customers
Cage Rental:	28 customers
Disposal:	18 customers

With additional funding from the State, CSD could amend the contract to include a portion of the expenses to be paid with State funds thereby lowering the cost for private landowners.

Thank you for this opportunity to offer support to S.B.2401 S.D. 1.

Sincerely,

Kimberly M. Hashiro
Director

RE: Comments on SB 2401, SD1: Relating to Feral Chickens
Wednesday, Feb. 28, 2024, 10:01 a.m., Room 211 & Videoconference

On behalf of the Hawaiian Humane Society, thank you for considering our comments on Senate Bill 2401, SD1, which makes an appropriation to each county as a grant-in-aid for the implementation of feral chicken control programs; makes an appropriation to the Department of Health for a feeding of feral animals education campaign; and declares that the general fund expenditure ceiling is exceeded.

Hawaiian Humane is grateful to the sponsors of this measure for looking at this issue holistically rather than presupposing that lethal control is the only possible strategy to curb the feral chicken population. Education is a key component. We also advocate for stronger enforcement against cockfighting operations to reduce a primary source of this population, as well as prevent animal cruelty and protect human beings from associated illegal activities.

Regarding the birds that are already on the landscape, we advocate for the adoption of an avian birth control program, which is more humane and less costly than lethal eradication. We urge the committee to ask the state Department of Agriculture to submit a Special Local Need (SLN) registration to the U.S. Environmental Protection Agency, which would allow already existing avian birth control products to be used by qualified local companies to curb the chicken population.

Mahalo for your consideration of our comments.

HEARING BEFORE THE
SENATE COMMITTEE ON WAYS AND MEANS

TESTIMONY ON SB 2401, SD1
RELATING TO FERAL CHICKENS

Conference Room 211 & Videoconference
10:01 AM

Aloha Chair Dela Cruz, Vice-Chair Moriwaki, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports SB 2401, SD1, which makes an appropriation to each county as a grant-in-aid for the implementation of feral chicken control programs and makes an appropriation to the Department of Health for a feeding of feral animals education campaign.

Across the State, various feral species are creating havoc on agriculture as well as the ecosystems in which they exist. They continue to destroy crops and pasture lands by devouring any living vegetation as they continue to spread.

The feral chicken and rooster populations in Hawai'i have skyrocketed and have become an ever-increasing problem. Aside from roosters crowing in the hours before dawn, the feral chickens damage crops, spread weeds, threaten native plants, and are a road hazard. The noise, health issues, and environmental damage from feral chickens have become major concerns and need to be controlled.

These feral populations can pose a danger, especially as populations grow and their health is put into jeopardy due to inadequate food. Diseases that they normally tolerate will become serious debilitating illnesses that could put our domestic livestock and poultry industries in jeopardy. Such fears are not unreasonable, as incidences such as bovine tuberculosis spread from feral pigs have been documented in Molokai.

Hawai'i's farmers and ranchers are working to provide Hawai'i with an increased level of self-sufficiency, but will not be able to do so if their products are consumed or damaged by feral animals. Feral chickens and roosters can cause major damage to property, agriculture (crops and livestock), Hawai'i's native species and ecosystems, and Hawai'i's

cultural and historic resources. They can also threaten the health of people, wildlife, pets, and other domestic animals. As Hawai'i's feral animal populations continue to expand, these damages, costs, and risks will only keep rising. The State and Counties need to develop a long-term management plan, that includes a feeding of feral animals education program, to address this ever-growing problem.

Thank you for this opportunity to testify on this important subject.
