TESTIMONY ON SENATE CONCURRENT RESOLUTION 64 / SENATE RESOLUTATION 52 URGING THE STATE AND COUNTIES TO PRIORITIZE AND DIRECT ALL AVAILABLE RESOURCES TO SUPPORTING COORDINATED INTERAGENCY COLLABORATION AND PUBLIC-PRIVATE PARTNERSHIPS AIMED AT ADDRESSING THE ONGOING FENTANYL EPIDEMIC.

By Tommy Johnson, Director

Senate Committee on Health and Human Services Senator Joy A. San Buenaventura, Chair Senator Henry J.C. Aquino, Vice Chair

Friday, March 22, 2024; 1:00 p.m. State Capitol, Conference Room 225 & Via Video Conference

Chair San Buenaventura, Vice Chair Aquino, and members of the Committee:

The Department of Corrections and Rehabilitation (DCR) **strongly** supports Senate Concurrent Resolution (SCR) 64 / Senate Resolution 52, which urges the State and Counties to prioritize and direct all available resources to supporting coordinated interagency collaboration and public-private partnerships to address the ongoing fentanyl epidemic.

The DCR appreciates working with the Department of Health (DOH), Hawai'i Health and Harm Reduction Center (HHHRC), Hawai'i Island Fentanyl Task Force (HIFTF), and other agencies to address the opioid epidemic and the harm caused by drugs such as fentanyl. With their assistance, and in recognition of the public health crisis, we have installed Narcan vending machines in our facilities and made Narcan available to both the public entering our facilities and our staff. We are also working on providing Narcan to DCR offices statewide to ensure wider availability and accessibility to this life-saving treatment.

We need continued interagency collaboration and public-private partnerships to combat this crisis.

Thank you for the opportunity to provide testimony in **strong support** of SCR 64 / SR 52.

# Testimony in SUPPORT of SCR64 URGING THE STATE AND COUNTIES TO PRIORITIZE AND DIRECT ALL AVAILABLE RESOURCES TO SUPPORTING COORDINATED INTERAGENCY COLLABORATION AND PUBLIC-PRIVATE PARTNERSHIPS AIMED AT ADDRESSING THE ONGOING FENTANYL EPIDEMIC.

### SENATOR JOY SAN BUENAVENTURA, CHAIR SENATE COMMITTEE ON HEALTH & HUMAN SERVICES

March 22, 2024, 1:00 PM Room Number: 225

- 1 Fiscal Implications: Undetermined
- 2 **Department Position:** The Department supports this measure.
- 3 **Department Testimony:** The Alcohol and Drug Abuse Division (ADAD) provides the
- 4 following testimony on behalf of the Department of Health (Department).
- 5 The resolution urges the state and counties to prioritize and direct all available resources to
- 6 support coordinated interagency collaboration and public-private partnerships aimed at
- 7 addressing the ongoing fentanyl epidemic.
- 8 Recent Hawai'i death certificate data show a greater prevalence of fatal opioid poisonings among
- 9 residents due to synthetic opioids such as like fentanyl.
- 10 The Department in February 2024 worked with the Hawai'i Opioid Settlement Advisory
- 11 Committee (HOSAC) to use settlement funds to support a statewide stakeholder training with the
- Hawai'i Island Fentanyl Task Force. The HOSAC takes an interagency approach with a broad
- membership encompassing the following counties and agencies:
- The mayor, or mayor's designee, from each of the following: the County of Hawai'i, the
- 15 County of Kaua'i, the County of Maui, and the City and County of Honolulu;

- A designee of the Director of the Department of Health;
- The director of the Department of Corrections and Rehabilitation, or designee;
- The Superintendent of the Department of Education, or designee; and
- The University of Hawai'i Medical School President, or designee.
- 5 In addition to the purchase of naloxone and fentanyl test strips, the Department in consultation
- 6 with the HOSAC is also working on an agreement with the County of Hawai'i to expand
- 7 interagency coordination through the formation of fentanyl task forces on Oahu, Maui and
- 8 Kaua'i.
- 9 Thank you for the opportunity to testify on this measure.

#### **Testimony of Farah Aquino**

Homeless Coordinator, Kaua'i County Housing Agency

## Before the Senate Committee on Health and Human Services

March 22, 202; 1:00 PM Conference Room 225 & Videoconference

In consideration of Senate Resolution No. 52 and Senate Concurrent Resolution No. 64

Honorable Chair San Buenaventura, Vice Chair Aquino, and Members of the Committee:

On behalf of the County of Kaua'i Housing Agency, I <u>strongly support</u> Senate Resolution No. 52 and Concurrent Resolution No. 64, which urges the State and Counties to prioritize and direct all available resources to supporting coordinated interagency collaboration and public-private partnerships to address the ongoing fentanyl epidemic. As the Homeless Coordinator, I have known too many people who have died as a direct result of fentanyl on our small island.

Across Hawai'i, every twenty-eight hours, someone dies from a drug overdose. Increasingly, these overdose deaths are being caused by opioids such as fentanyl. I consider this a public health emergency.

Defeating the war on fentanyl will require collaboration and building coalitions beyond our island shores. We strongly urge you to pass Senate Concurrent Resolution No. 64 to help our island communities beat this epidemic and save lives.

Mahalo nui loa for the opportunity to testify in support of this measure.

4444 Rice Street, Suite 330 • Līhu'e, Hawai'i 96766 • (808) 241-4444 (b) • (808) 241-5118 (f)

Committee on Health and Human Services Senator Joy A. San Buenaventura, Chair Senator Henry J.C. Aquino, Vice Chair

Hawai'i State Legislature 415 S. Beretania Street Honolulu, Hawai'i 96813

Subject:

**SCR 64/ SR 52** 

Hearing Date: Friday, March 22, 2024, at 1:00 p.m.

Time/Place of Hearing: Via Videoconference, Conference Room 225

Aloha Honorable Chair San Buenaventura, Vice Chair Aquino, and members of the Committees on Health and Human Services,

On behalf of the County of Hawai'i, I express my strong support for SCR 64/SR 52, urging the State and Counties to prioritize and direct all available resources to supporting coordinated interagency collaboration and public-private partnerships aimed at addressing the ongoing fentanyl epidemic.

In 2017, the U.S. Department of Health and Human Services declared the opioid crisis a public health emergency. In 2022 the opioid epidemic was marked by a further increase in individuals with opioid use disorder, with fentanyl causing 72% of the record 110,000 U.S. overdose deaths in 2022. Hawai'i and especially Hawai'i Island are experiencing this deadly epidemic, Federal data have indicated that there is now an overdose death every7 days on Hawai'i Island, many of those involving fentanyl. For every fatal overdose, there are approximately 14 non-fatal overdoses. Hawai'i Island EMS data indicates that Hawai'i County first responders reverse two overdoses a week, overwhelming care providers and resulting in medical, social, judicial, and economic consequences.

The Hawai'i Island Fentanyl Taskforce was established in 2021, with a mission to reduce the demand and supply of illicit drugs in all age groups, especially fentanyl, through education, prevention, treatment, harm reduction and recovery support activities, as well as supporting law enforcement and judicial initiatives. Now in its 3<sup>rd</sup> year, there is an emergent need to plan for the future.

I strongly support SCR 64/ SR 52 directing comprehensive resources to address the ongoing fentanyl epidemic. Thank you for the opportunity to testify on this matter.

Mitchell D. Roth

### Testimony of THE HAWAI'I ISLAND FENTANYL TASK FORCE

### Before the Senate Committee on HEALTH AND HUMAN SERVICES

Friday, March 22, 2024 1:00 PM State Capitol Room 225 & Videoconference

In support of
SENATE CONCURRENT RESOLUTION NO. 64 URGING THE STATE AND COUNTIES TO
PRIORITIZE AND DIRECT ALL AVAILABLE RESOURCES TO SUPPORTING
COORDINATED INTERAGENCY COLLABORATION AND PUBLIC-PRIVATE

PARTNERSHIPS AIMED AT ADDRESSING THE ONGOING FENTANYL EPIDEMIC.

The Hawai'i Island Fentanyl Task Force <u>strongly supports</u> Senate Concurrent Resolution No. 64, which urges the State and Counties to prioritize and direct all available resources to supporting coordinated interagency collaboration and public-private partnerships to address the ongoing fentanyl epidemic.

Across Hawai'i, every twenty-eight hours, someone dies from a drug overdose. Increasingly, these overdose deaths are being caused by opioids such as fentanyl. We consider this a public health emergency and are ringing the alarm.

This epidemic can be stopped by addressing the root causes of drug use, expanding access to treatment and harm reduction strategies, providing prevention through education, and reducing the supply of illicit opioids entering our islands – all are active initiatives of the Hawai'i Island Fentanyl Task Force. These initiatives are essential but insufficient if we don't activate our community's awareness.

Defeating the war on fentanyl will require collaboration and building coalitions beyond our island shores. We strongly urge you to pass Senate Concurrent Resolution No. 64 to help our island communities beat this epidemic and save lives.

Mahalo nui loa for the opportunity to testify in support of this measure.

Mahalo for scheduling a hearing on SCR64 - also mahalo again for supporting distribution of fentanyl test strips last session.

The Hawai'i Island Fentanyl Task Force continues its united collaboration to address this deadly issue with strong support from federal, state and county agencies, not for profit service providers, and inspiring "boots on the ground" volunteers, however, the death rate shared with us earlier this week (CDC data) in Hawai'i is now one death every 28 hours and on Hawai'i Island, one death every 7 days. (Was previously one every 8 days.)

The urgency is greater. Please support this concurrent resolution.

Comments: Aloha members of the legislature, I stand before you today in strong support of making Narcan, a life-saving medication that reverses opioid overdoses, readily available throughout our state. Opioid overdoses are a devastating reality in Hawaii. According to the Department of Health, \*EVERY 11 MINIUTES SOMEONE SOMEWHERE DIES OF AN OVERDOSE\*. These deaths are preventable. Narcan can quickly reverse an overdose and give someone a second chance. We need to be clear: Narcan saves lives. It's not a solution to addiction, but it's a crucial tool in harm reduction. Harm reduction programs work. They meet people where they're at, provide support, and most importantly, help keep people alive. By making Narcan more accessible, we can equip our communities to respond to overdoses. This includes not just people who struggle with addiction, but also their loved ones, friends, and even bystanders. The wider Narcan is available, the more lives we can save. I urge you to support this legislation and make Narcan readily available throughout Hawaii. Let's send a message that we value life and will do everything we can to prevent these tragic deaths. Mahalo.

#### **Testimony of**

## Kevin Kunz, MD, MPH Addiction Medicine Specialist Hilo, Hawaii

The Honorable Joy San Buenaventura, Chair

And Members of the Senate Committee on Health and Human Services

Before the Senate Committee on Health and Human Services, Friday, March 22, 2024, 1:00 PM

In support of:

SENATE CONCURRENT RESOLUTION NO. 64 URGING THE STATE AND COUNTIES TO PRIORITIZE AND DIRECT ALL AVAILABLE RESOURCES TO SUPPORTING COORDINATED INTERAGENCY COLLABORATION AND PUBLIC-PRIVATE PARTNERSHIPS AIMED AT ADDRESSING THE ONGOING FENTANYL EPIDEMIC.

Thank you for the opportunity to testify in support of Resolution 52

As the unprecedented public health emergency of drug overdose deaths escalates in Hawaii, the silence and absence of effective action by all sectors is astounding, and most sadly it has been deadly. How was the loud and clear message from the fentanyl overdose death crisis on the continent ignored—did anyone really believe Hawaii would be immune? That this raging forest fire of fentanyl would stop when it reached the Pacific? How was it that as early as 2017, when there was clear evidence that fentanyl had arrived here, and as the scorched the earth elsewhere burned, we acted as though we would be immune? Or as so often happens with unhealthy substance use and addictive diseases, did the potential stakeholders and problem solvers at multiple levels just look the other way, hoping someone else would take care of this? After 30 years of working on the Big Island as a physician specializing in addiction medicine, the current fentanyl crisis has taught me this: unless our entire community rises up and screams "we have had enough", Hawaii will soon hold equal status nationally, as fentanyl will be the leading cause of death for our Islanders as well.

Another lesson learned in our State and our Nation's 40-plus years of addressing drug addiction: almost all current actions we take against illicit drugs and addressing addictive disease are essential to save lives, yet insufficient to stop our ever growing epidemic and skyrocketing death rates. Interdiction of illicit drugs by Law Enforcement saves lives, yet it has not changed the course of our rising drug problem. It is and has been insufficient to stop the exponential rise in drug overdoses and deaths. Treatment of those with substance use disorders saves lives. Yet less than 25% of those needing treatment for addiction receive it, and of those that do, 50-80% return to drug use within a year. It is essential and

saves lives, yet insufficient to curb the epidemic. Harm Reduction interventions like Narcan to treat overdoses saves lives. More is needed, it is essential yet it is and will be insufficient to attenuate the fentanyl epidemic. Drug overdose deaths have risen exponentially for over 40 years. The drugs may change, the demographic s may change, yet the statistics have only gotten worse. Every single year. Prevention and education at every level is essential –it can save lives. Yet implementation in school curricula and other interventions come late, are delegated away to "outside" sectors ( i.e. education, health departments, government).

What is missing and what can we do? I will get there, yet first things first. I assume here that others have brought forth to you the facts about fentanyl, and the other new drugs (like xylazine and nitizines) that have entered America and Hawaii's illicit drug supply. And that fentanyl is cheap to make, easy to transport and just 2 mg can kill a naïve user. And that fentanyl is now laced into virtually all other substances, including cannabis and counterfeit pills of every sort. Here on the Big Island, we have lost teenagers who died of unintentional fentanyl poisoning as they smoked a cannabis joint, or used another substance, not realizing it was laced with fentanyl. One group, the Hawaii Island Fentanyl Task Force was founded after the death of a 14 year old girl in November of 2021 from an unintentional fentanyl poisoning as she experimented with another substance. That community stood up, saying "enough is enough". That is what we all must do statewide. So you know how deadly these substances are. And I assume that you already know that there is an average of one drug overdose death in our State every 28 hours, and that at the last publically available Department of Health count - a few years ago – about a third of all of Hawaii's overdose deaths were caused by opioids, and the majority of these were fentanyl. And that this has progressively gotten worse. I have embedded below the latest CDC drug overdose death statistics, that are the most current available, through June of 2023.

So what can we do? Everything we have been doing for the last 4 decades has saved lives yet has been insufficient to quell the ever growing overdose death epidemic, the fentanyl crisis and the unfettered fentanyl overdoses and deaths. What can we do? What can we do?

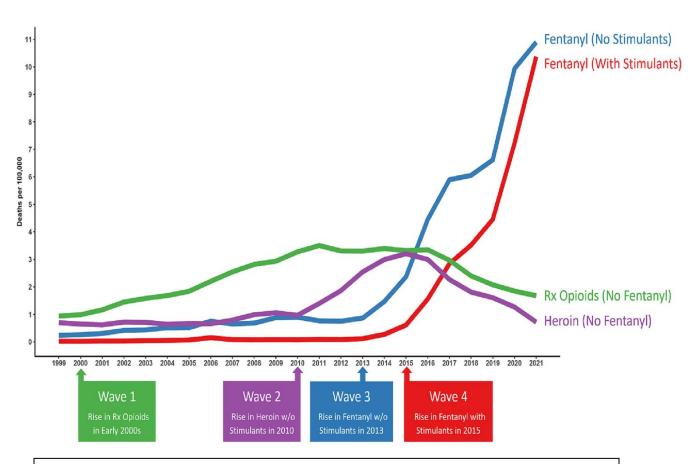

Who are you? Who are we? You may identify as a county or state leader or employee, or as a health system or agency employee or leader, or as the average hard working citizen who cares about your family, your work, and your community, and so forth and so on. Perhaps you have been in some way essential in saving lives —and thank you for that! - yet the record shows you have not touched the epidemic, it has raged despite all you have done. What you have done and are doing is essential, it is saving lives. Keep doing it. Yet it will not subdue this epidemic. Keep collaborating with your peers across all stakeholder groups. Never give up. Yet these things alone will not stop the epidemic. We have a 40 year experiment that proves this. You are saving lives as the epidemic of drug destruction and death grows.

Now, who are we? Who are we and what can we do? If for 40 plus years all the many significant efforts have not reduced overdoses and overdose deaths have continued to rise, what can we do? What can we do if all the important and significant efforts of every sector I've mentioned have saved lives yet have not reduced, nor stabilized, nor halted the overdoses, then what can we do? What can the mothers do who have lost a child? What can the family do that has lost a member to overdose? What

can any of us do that have seen our family, our friends, or neighbors negatively impacted by addiction or overdose? What can we do?

We the people can rise up together. We can work not just as ordinary citizens, employees or professionals, yet join together as an Ohana that will not stand for this slaughter. And it is a slaughter. Would we tolerate any other killer of this magntude. Would a rogue virus killing as swiftly as fentanyl be ignored? Would a serial killer taking one of our community out every 28 hours be tolerated? We the people can stand up and say loudly together: ENOUGH! We, all of us, must spread awareness and know that at the end of the day, we are together, and in a loud voice demand that we be heard. Rallies. Sign waving. Public led educational pop-ups, community and county volunteer task forces. Demonstrations. Picketing! Speaking with each other. Gaining strength in numbers. Don't wait for government to solve this – they have not and cannot. Don't wait for health systems, law enforcement and harm reduction experts to solve this – they have not and cannot. We the people – this is our last gasp chance.

In closing let me summarize. The efforts of all sectors - health care, law enforcement, government agencies, addiction treatment programs, non-profits, and others - are saving lives every day, yet they have not, are not and cannot stop this epidemic. We can. We must. Please, stand up. Make noise. Join together. Join in the campaign to save our children, or families, our communities. Spread the word.

Charting the fourth wave: demographic trends in polysubstance fentanyl overdose deaths in the United States, 2010–2021 J. Friedman, C. L. Shover Addiction. Volume118, Issue12 December 2023 Pages 2477-2485

#### **HAWAII COUNTY**

https://www.cdc.gov/nchs/nvss/vsrr/provcounty-drug overdose.htm

COUNTY	OD Deaths 12 months ending June 2023	Population (rounded)	Frequency of OD Deaths (average)	
Honolulu	205	1,000,000	1 every 2 days	
Hawaii	52	200,000	1 every 7 days	
Maui	52	165,000	1 every 7 days	
Kauai	11	73,000	1 every 33 days	
State of Hawaii	320	1,440,000	1 every 28 hours	

Summarized from: CDC Provisional County Overdose Deaths https://www.cdc.gov/nchs/nvss/vsrr/provcounty-drug overdose.htm March 22, 2024

The Honorable Joy San Buenaventura, Chair and Members of the Senate Committee on Health and Human Services

IN SUPPORT OF SENATE CONCURRENT RESOLUTION NO. 64 URGING THE STATE AND COUNTIES TO PRIORITIZE AND DIRECT ALL AVAILABLE RESOURCES TO SUPPORTING COORDINATED INTERAGENCY COLLABORATION AND PUBLIC-PRIVATE PARTNERSHIPS AIMED AT ADDRESSING THE ONGOING FENTANYL EPIDEMIC.

I <u>strongly support</u> Senate Concurrent Resolution No. 64, which urges the State and Counties to prioritize and direct all available resources to supporting coordinated interagency collaboration and public-private partnerships to address the ongoing fentanyl epidemic.

Across Hawai'i, every twenty-eight hours, someone dies from a drug overdose. Increasingly, these overdose deaths are being caused by opioids such as fentanyl. We consider this a public health emergency and are ringing the alarm.

This epidemic can be stopped by addressing the root causes of drug use, expanding access to treatment and harm reduction strategies, providing prevention through education, and reducing the supply of illicit opioids entering our islands – all are active initiatives of the Hawai'i Island Fentanyl Task Force. These initiatives are essential but insufficient if we don't activate our community's awareness.

Defeating the war on fentanyl will require collaboration and building coalitions beyond our island shores. We strongly urge you to pass Senate Concurrent Resolution No. 64 to help our island communities beat this epidemic and save lives.

Mahalo nui loa for the opportunity to testify in support of this measure.

Wally Lau Co-Lead, Hawai'i Island Fentanyl Task Force
