
A BILL FOR AN ACT

RELATING TO AVIAN INFLUENZA.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that H5 avian influenza
2 viruses, also referred to as bird flu, include the H5N1 subtype
3 of bird flu virus that has spread globally in birds since its
4 initial discovery in 1996 and recently has been detected in
5 several mammal species. Bird flu can cause severe illness with
6 a high mortality rate among certain bird populations, such as
7 poultry, and can cross between species and infect dairy cows.
8 According to the federal Centers for Disease Control and
9 Prevention (CDC), as of January 20, 2025, bird flu has been
10 detected in every state, with nine hundred twenty-eight dairy
11 herds and 136,327,394 poultry having been affected. In November
12 2024, the H5N1 bird flu virus was first confirmed in Hawaii in a
13 backyard flock of birds in central Oahu. H5 has since been
14 detected through wastewater testing in Hilo and on Kauai.

15 The legislature also finds that as of January 20, 2025, the
16 CDC reported sixty-seven confirmed human cases of bird flu.
17 Nearly all the cases occurred in farm workers. While symptoms

1 are typically mild, one case did result in death. No human-to-
2 human transmission has been reported, and the current risk to
3 the public is considered low. However, close monitoring is
4 warranted to identify any change in the virus that may increase
5 transmissibility or infection severity. Enhanced biosecurity
6 will help protect local farms and food production, and increased
7 testing of birds, humans, and wastewater will help better
8 understand the spread of bird flu in Hawaii and its potential
9 impacts on human health. In addition, education will help
10 inform the public about bird flu, their risk, and how to stay
11 safe.

12 Accordingly, the purpose of this Act is to appropriate
13 funds to the department of health and department of agriculture
14 to prevent, monitor, and respond to avian influenza in Hawaii.

15 SECTION 2. There is appropriated out of the general
16 revenues of the State of Hawaii the sum of \$ or so
17 much thereof as may be necessary for fiscal year 2025-2026 to
18 carry out the purposes of this Act, including to prevent,
19 monitor, and respond to avian influenza in the State.

20 The sum appropriated shall be expended by the department of
21 health for the purposes of this Act.

1 SECTION 3. There is appropriated out of the general
2 revenues of the State of Hawaii the sum of \$ or so
3 much thereof as may be necessary for fiscal year 2025-2026 to
4 carry out the purposes of this Act, including to prevent,
5 monitor, and respond to avian influenza in the State.

6 The sum appropriated shall be expended by the department of
7 agriculture for the purposes of this Act.

8 SECTION 4. This Act shall take effect on December 31,
9 2050.

Report Title:

DOH; DOA; Avian Influenza; Appropriations

Description:

Appropriates funds to the Department of Health and Department of Agriculture to prevent, monitor, and respond to avian influenza in Hawaii. Effective 12/31/2050. (SD1)
