7  
8           WHEREAS, the presence of grass, trees, and other vegetation  
9 adjacent to or under electric utility lines is a significant

22 and

1 WHEREAS, the Wildfire Prevention Working Group also found  
2 that guinea grass, fountain grass, molasses grass, and

15 may pose a significant wildfire risk; and

16  
17 WHEREAS, the Bureau of Labor Statistics has reported that  
18 the Tree Industry average annual fatal-incident rate is thirty  
19 (30) times greater than the All-Industry average annual fatal-  
20 incident rate; and

21  
22 WHEREAS, the Legislature recognizes that other state  
23 jurisdictions have recognized the additional hazard presented to  
24 individuals performing line clearance tree trimming at or near  
25 electric utility facilities and have adopted state law requiring  
26 minimum safety standards, training and qualifications for  
27 individuals performing such work; and

28  
29 WHEREAS, additional study into appropriate vegetation  
30 management will enable the State to develop appropriate  
31 policies, regulations, and guidance for the parties responsible  
32 for the management of vegetation on public and private lands to  
33 mitigate wildfire risk and establish minimum safety standards,
