
A BILL FOR AN ACT

RELATING TO TRANSPORTATION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 PART I

2 SECTION 1. The legislature finds that under existing law,
3 individuals under the age of fifteen are able to legally ride
4 high-speed electric bicycles, which has led to numerous safety
5 and other issues. Under existing law, low-speed electric
6 bicycles are defined as devices capable of speeds of up to
7 twenty miles per hour, even though modern federal definitions
8 allow for speeds of up to twenty-eight miles per hour, and the
9 vast majority of electric bicycles on the market today are
10 capable of reaching those speeds. This means a five-year-old is
11 legally able to ride a new electric bicycle and law enforcement
12 can do little about it.

13 The legislature further finds that due to increasingly
14 expensive fossil fuels and a lack of cheaper transit options,
15 Hawaii residents already pay among the highest costs in the
16 country to commute. A 2020 analysis studied all of the direct
17 and indirect costs of car ownership and use in Hawaii and found

1 that local taxpaying families pay about \$24,400 per year to own
2 and use a car, but could reduce that cost significantly by
3 switching from three cars per family to two, or two cars to one,
4 and by using an electric bicycle or similar mobility device for
5 short trips.

6 The legislature also finds that since its inception, the
7 current electric bicycle and moped rebate program, even with
8 minimal promotion and low subsidy amounts, has helped almost
9 three hundred Hawaii families access electric bikes. However,
10 the program's reach and effectiveness have been limited by
11 complicated restrictions and a lower rebate amount than other
12 successful programs.

13 In 2022, Denver's electric bike rebate program, which
14 provided families with up to a \$1,200 rebate, led to
15 considerable cost savings for Denver families. Participating
16 families replaced many trips by car with trips by electric
17 bicycle, which helped reduce vehicular traffic on crowded roads
18 by over one hundred thousand vehicular miles weekly. Ninety-six
19 per cent of respondents said that the availability of the rebate
20 made the difference when deciding to buy an electric bicycle.

1 The legislature further finds that updates to the law
2 regarding the use of helmets and operation of electric bicycles,
3 mopeds, and electric motorcycles are necessary to enhance road
4 safety for the entire community, and particularly for youths.

5 Accordingly, the purpose of this Act is to:

- 6 (1) Prohibit a person from operating a moped or electric
7 motorcycle in certain areas for bicycles;
- 8 (2) Rename the Electric Bicycle and Electric Moped Rebate
9 Program to the Electric Mobility Device Rebate
10 Program;
- 11 (3) Expand eligibility and amends the maximum rebate
12 amounts;
- 13 (4) Reduce the deadline to submit an application to six
14 months from the date of purchase;
- 15 (5) Authorize the Administrator of the rebate program to
16 authorize grants under certain circumstances;
- 17 (6) Require applicants who are enrolled in a school,
18 community, college, or university to demonstrate a
19 financial need to be eligible for an additional
20 assistance rebate;

- 1 (7) Exempt certain class 3 electric bicycles from
- 2 registration requirements;
- 3 (8) Establish a cap for the Electric Mobility Device
- 4 Subaccount and requirements for transferring funds
- 5 into the Subaccount;
- 6 (9) Amend the age requirement for helmet use from sixteen
- 7 to eighteen years of age;
- 8 (10) Prohibit a person under the age of fifteen from
- 9 operating a class 3 electric bicycle;
- 10 (11) Establish rules for electric bicycle operation;
- 11 (12) Allow use of electric bicycles on public sidewalks,
- 12 subject to certain conditions;
- 13 (13) Prohibit individuals under eighteen years of age from
- 14 operating an electric motorcycle or motor-driven
- 15 cycle;
- 16 (14) Changes the term "motor scooter" to "motor-driven
- 17 vehicle"; and
- 18 (15) Appropriate funds.

19 PART II
